**Explanatory Note**

Viisage Technology, Inc. (the Company) is filing this Amendment No. 2 to Form 10-K to amend its Form 10-K/A for the year ended December 31, 2004, filed with the Securities and Exchange Commission on July 5, 2005 (the Original Filing), in order to amend Item 9A, Controls and Procedures. The description of the Company's controls and procedures in Item 9A has been amended in response to comments made by the Staff of the Securities and Exchange Commission.

Except for the matters disclosed in Item 9A and Exhibits 23.1, 31.1 and 31.2, which are filed herewith pursuant to the requirements of Rule 12b-15 under the Securities Exchange Act of 1934, this Amendment No. 2 to Form 10-K/A continues to speak as of the date of the Original Filing and does not modify, amend or update in any way the financial statements or any other item or disclosures in the Original Filing.

**Item 9A. Controls and Procedures**

(a) *Evaluation of Disclosure Controls and Procedures* We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in our reports under the Securities Exchange Act of 1934, as amended, or the Exchange Act, is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to management, including the Company's Chief Executive Officer, or CEO, and Chief Financial Officer, or CFO, as appropriate, to allow timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, management recognized that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, as ours are designed to do, and management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

In connection with the preparation of this Annual Report on Form 10-K/A, an evaluation was performed under the supervision and with the participation of our management, including the CEO and CFO, of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Exchange Act) as of December 31, 2004. In performing this evaluation, management reviewed our internal controls over financial reporting, noting that there were two that had significant deficiencies that constituted material weaknesses in our control processes. The first of these is with regard to insufficient personnel resources and technical accounting expertise within the accounting function to effect a timely financial close process and to effectively evaluate and resolve non-routine and/or complex accounting transactions. The second is with regard to inadequate or ineffective control processes around information technology systems, including inadequate system security, inadequate restricted access to systems, inadequate segregation of duties within systems, lack of appropriate system documentation, ineffective change management processes and insufficient disaster recovery plans. Based on that evaluation, our CEO and CFO concluded that our disclosure controls and procedures were not effective as of December 31, 2004. Please see Management's Report on Internal Control over Financial Reporting in Item 8 of this Annual Report on Form 10-K/A for greater detail about these material weaknesses. We have not incurred, and do not expect to incur, significant capital expenditures related to remedial actions taken or to be taken to address these material weaknesses.

Our Annual Report on Form 10-K for our fiscal year ended December 31, 2004 was filed approximately three months after the filing deadline. While the filing of reports within the time periods specified by the SEC's rules and forms is an element of disclosure controls and procedures, management does not believe that a material weakness in the design of our controls and procedures was involved in our inability to timely file our Form 10-K. One week prior to the statutory filing date for our Form 10-K, we received notification of material pending litigation. We, the Audit Committee of our Board of Directors, our independent auditors and counsel required additional time to complete a review of this pending litigation involving us and its effect, if any, on our financial statements. We determined that the audit of our financial statements could not be finalized until such review had been completed, and therefore, that audited financial statements, as required to be included in the Form 10-K, could not be filed in accordance with the filing deadline. Management believes that no additional controls or procedures would have allowed this review and the related financial statement audit to be completed prior to the filing deadline for the Form 10-K.

In conducting the Company's evaluation of the effectiveness of its internal control over financial reporting, management determined that the internal control over financial reporting of Viisage Technology AG, Trans Digital Technologies Corporation, Imaging Automation, Inc. would be excluded from the fiscal 2004 internal control assessment, as permitted by the Securities and Exchange Commission.

In January 2004, Viisage Technology AG (formerly ZN Vision Technologies AG) was acquired for an aggregate purchase price of approximately \$31.6 million. Viisage AG contributed approximately 2.1% of the Company's total revenue in 2004 and accounted for approximately 1.3% of the total assets at December 31, 2004. In February 2004, Trans Digital Technologies Corporation was acquired for an aggregate purchase price of approximately \$56.6 million. Trans Digital Technologies contributed approximately 36.5% of the Company's total revenue in 2004 and accounted for approximately 8.6% of its total assets at December 31, 2004. In October 2004, Imaging Automation, Inc. was acquired for an aggregate purchase price of approximately \$39.8 million. Imaging Automation contributed approximately 1.1% of the Company's total revenue in 2004 and accounted for approximately 1.7% of its total assets at December 31, 2004. See Note 12 to the consolidated financial statements for further discussion of these acquisitions and their impact on the Company's consolidated financial statements.

(b) *Management's annual report on internal control over financial reporting.* The information required to be furnished pursuant to this item is set forth under the caption "Management's Report on Internal Control over Financial Reporting" in Item 8 of this Annual Report on Form 10-K/A, which is incorporated herein by reference.

(c) *Changes in internal controls.* During the fourth quarter of 2004, management took the following steps they believed necessary to help address the material weaknesses discussed above and in "Management's Annual Report on Internal Control over Financial Reporting" :

Identified gaps in information technology, or IT, policies and procedures in November 2004, in particular inadequate system security, inadequate restricted access to systems, inadequate segregation of duties within systems, lack of appropriate system documentation, ineffective change management processes and insufficient disaster recovery plans;

Developed a detailed plan to remediate identified deficiencies in November 2004; and

Completed policy and procedure documentation of all key IT processes in December 2004.

In addition, subsequent to December 31, 2004, management took additional steps to help address the material weaknesses, as described in "Management's Annual Report on Internal Control over Financial Reporting." All of the remedial actions described above and in "Management's Annual Report on Internal Control over Financial Reporting" were changes in our internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.
