1. Overview

A. Industry

(1) Industry characteristics and growth potential

- TFT-LCD technology is one of the most widely used technologies in the manufacture of flat panel displays and the demand for flat panel displays is growing rapidly. The flat panel display industry is characterized by high entry barriers due to rapidly evolving technology, capital-intensive characteristics, and the significant investments required to achieve economies of scale, among other factors. There is strong competition between a limited number of players within the industry and production capacity in the industry, including ours, is being continually increased.
- The demand for LCD panels for Notebook Computers & Monitors has been closely related to the IT industry cycle. The demand for LCD panels for TVs is growing with the start of HDTV broadcasting and as LCD TV is anticipated to play a key role in the digital display market. There is a competition between TFT-LCD and PDP technologies in the area of large flat TV products. In addition, LCD panel markets for applications, such as mobile phones, PDAs, medical applications and automobile navigation systems, among others, are growing steadily.
- The average selling prices of our display panels have declined in general and are expected to continually decline with time irrespective of industry-wide fluctuations as a result of, among other factors, technology advances and cost reductions.

(2) Cyclicity

- The TFT-LCD business has high cyclicity as well as being a capital intensive business. In spite of the increase in demand for products, this industry has experienced periodic volatility caused by imbalances between demand and supply due to capacity expansion within the industry.
- Intense competition and expectations of demand growth may lead panel manufacturers to invest in manufacturing capacity on similar schedules, resulting in a surge in capacity when production is ramped up at new fabrication facilities.
- During such surges in capacity growth, our customers can exert and have exerted strong downward pricing pressure, resulting in sharp declines in average selling prices and significant fluctuations in our gross margins. Conversely, demand surges and fluctuations in the supply chain can lead to price increases.

(3) Competitiveness

- Our ability to compete successfully depends on factors both within and outside our control, including product pricing, performance and reliability, successful and timely investment and product development, success of our end-brand customers in marketing their brands and products, component and raw material supply costs, foreign exchange rate and general economic and industry conditions.

Table of Contents

- Core competitiveness includes technology leadership, capability to design new products and premium products, timely investment in advanced fabs, cost leadership through application of large production lines, innovation of process and productivity, and collaborative customer relationships.

- Most importantly, cost leadership and stable and long-term relationships with customers are critical to secure profit even in a buyer's market.

- A substantial portion of our sales is attributable to a limited group of end-brand customers and their designated system integrators. The loss of these end-brand customers, as a result of customers entering into strategic supplier arrangements with our competitors or otherwise, would thus result in reduced sales.

- Developing new products and technologies that can be differentiated from those of our competitors is critical to the success of our business. We take active measures to protect our intellectual property internationally by obtaining patents and undertaking monitoring activities in our major markets. It is also necessary to recruit and retain the experienced key staffs and highly skilled line operators.

(4) Sourcing material

- Materials are sourced in-house (color filters) as well as from domestic and overseas vendors. Recently, the domestic portion has grown due to the active participation of domestic vendors.

- The shortage of raw materials may arise temporarily due to the rapid increase in demand for raw materials resulting from capacity expansion in the TFT-LCD industry.

- We have purchased, and expect to purchase, a substantial portion of our equipment from a limited number of qualified foreign and local suppliers. From time to time, increased demand for new equipment may cause lead times to extend beyond those normally required by the equipment vendors.

(5) Others

- Most TFT-LCD panel makers are located in Asia.
 - a. Korea: LG.Philips LCD, Samsung Electronics (including Joint Venture between Samsung Electronics and Sony Corporation), BOE-Hydis
 - b. Taiwan: AU Optronics, Chi Mei Optoelectronics, CPT, QDI, etc.
 - c. Japan: Sharp, IPS-Alpha, etc.
 - d. China: SVA-NEC, BOE-OT, etc.

B. Company

(1) Business overview

- We started the TFT-LCD business in 1998. We currently operate seven fabrication facilities located in Gumi and Paju, Korea and four module facilities located in Gumi & Paju, Korea and Nanjing, China.
- We became the first LCD maker in the world which commenced commercial production at a 4th generation fab (P3) in July 2000 and at a 5th generation fab (P4) in March 2002, and we started mass production at our 6th generation fab (P6) in August 2004, which allows us to produce LCD panels for large TVs and monitors. Following mass production at our 7th generation fab (P7) in January 2006, we became a panel maker who operates both 6th and 7th generation lines, which we believe will strengthen our position as a leader in the LCD TV market.
- Non-consolidated sales revenue in the third quarter of 2006 increased by around 31% to KRW 2,730 billion compared to KRW 2,086 billion in the second quarter of 2006 and increased by 13% compared to KRW 2,416 billion in the third quarter of 2005.
- Due to the continuous fall in product prices, we incurred a non-consolidated operating loss of KRW 384 billion in the third quarter of 2006 compared to a non-consolidated operating loss of KRW 445 billion in the second quarter of 2006. We also incurred a non-consolidated net loss of KRW 321 billion in the third quarter of 2006 compared to a non-consolidated net loss of KRW 322 billion in the second quarter of 2006.
- Business area of the company for disclosure is limited to LCD business.

(3) Market characteristics

- Due to the recent high growth in the display appliance market for the flat display format, the scale of the LCD market is growing at a rapid rate, resulting in expansion of the market centered mainly in America, Japan, Europe and China.

(4) New business

- Due to our downward adjustment of 2006 capital expenditure, P7 is expected to reach a production capacity of 75,000 input glass sheets per month by the end of 2006.
- We have commenced building construction of P8 at our Paju display cluster in Korea in anticipation of growth in the TFT-LCD market, and decided to invest in a multi-purpose generation 5.5 facility at P8 plant to meet our customer's forthcoming needs, particularly in the expanding wide format notebook and high-end monitor segments.
- In September 2005, we entered into an agreement to build a back-end module production plant in Wroclaw, Poland, becoming the first global LCD industry player to commence such a production facility in Europe. We broke ground on the plant in June 2006 and expect to begin production - during the first half of 2007. In October 2006, we formed a strategic alliance with Toshiba Corporation whereby Toshiba would take a 19.9% equity participation in our subsidiary, a LCD module plant, in Poland currently under construction in Wroclaw, Poland and LG.Philips LCD Poland Sp. z o.o. would supply Toshiba with a quantity of LCD TV panels produced in the plant in Poland.
- In May 2006, we entered into an investment agreement with the Guangzhou Development District Administrative Committee to construct a module production plant in Guangzhou, China, and in August 2006, we established LG.Philips LCD Guangzhou Co., Ltd. which plant is under construction.

We have reviewed the accompanying non-consolidated balance sheet of LG.Philips LCD Co., Ltd. (the Company) as of September 30, 2006, and the related non-consolidated statements of operations and cash flows for the three-month and nine-month periods ended September 30, 2006 and 2005, expressed in Korean won. These interim financial statements are the responsibility of the Company's management. Our responsibility is to issue a report on these interim financial statements based on our reviews.

We conducted our reviews in accordance with the quarterly review standards established by the Securities and Futures Commission of the Republic of Korea. These standards require that we plan and perform our review to obtain moderate assurance as to whether the financial statements are free of material misstatement. A review is limited primarily to inquiries of company personnel and analytical procedures applied to financial data and thus provides less assurance than an audit. We have not performed an audit and, accordingly, we do not express an audit opinion.

Based on our reviews, nothing has come to our attention that causes us to believe that the non-consolidated interim financial statements referred to above are not presented fairly, in all material respects, in accordance with accounting principles generally accepted in the Republic of Korea.

We have audited the non-consolidated balance sheet of LG.Philips LCD Co., Ltd. as of December 31, 2005, and the related non-consolidated statements of operations, appropriations of retained earnings and cash flows for the year then ended, in accordance with auditing standards generally accepted in the Republic of Korea. We expressed an unqualified opinion on those financial statements in our audit report dated January 20, 2006. These financial statements are not included in this review report. The non-consolidated balance sheet as of December 31, 2005, presented herein for comparative purposes, is consistent, in all material respects, with the above audited balance sheet as of December 31, 2005.

2. Summary of Significant Accounting Policies

The significant accounting policies followed by the Company and its consolidated subsidiaries (collectively referred to as the consolidated companies) in the preparation of the accompanying consolidated financial statements, are the same as those followed by the Company in its preparation of annual consolidated financial statements and are summarized below.

Basis of Consolidated Financial Statement Presentation

The Company maintains its accounting records in Korean won and prepares statutory financial statements in the Korean language (Hangul) in conformity with the accounting principles generally accepted in the Republic of Korea. Certain accounting principles applied by the Company that conform with financial accounting standards and accounting principles in the Republic of Korea may not conform with generally accepted accounting principles in other countries. Accordingly, these consolidated financial statements are intended for use by those who are informed about Korean accounting principles and practices. The accompanying consolidated financial statements have been condensed, restructured and translated into English from the Korean language consolidated financial statements. Certain information attached to the Korean language financial statements, but not required for a fair presentation of the Company's financial position and results of operations, is not presented in the accompanying consolidated financial statements.

Accounting Estimates

The preparation of the financial statements requires management to make estimates and assumptions that affect amounts reported therein. Although these estimates are based on management's best knowledge of current events and actions that the Company may undertake in the future, actual results may differ from those estimates.

Application of the Statements of Korean Financial Accounting Standards

The Korean Accounting Standards Board has published a series of Statements of Korean Financial Accounting Standards (SKFAS), which will gradually replace the existing financial accounting standards established by the Korean Financial Supervisory Commission. As SKFAS Nos. 18 through 20 became applicable to the Company on January 1, 2006, the Company adopted these Standards in its financial statements covering periods beginning January 1, 2006.

3. Financial Instruments

As of September 30, 2006 and December 31, 2005, long-term financial instruments represent key money deposits required to maintain checking accounts and, accordingly, the withdrawal of such deposits is restricted.
