**LG Display Updates Third Quarter 2008 Business Outlook**

**Seoul, Korea (September 10, 2008)** - LG Display (NYSE:LPL, KRX:034220), one of the world's leading TFT-LCD manufacturers, today updated its outlook for the third quarter of 2008.

Due to the sluggish global economic environment, the price of LCD panels has dropped more than expected. Given the market situation, LG Display expects the third quarter earnings results are not likely to meet the initial guidance. Therefore, the company decided to update the outlook based on currently available information and current market conditions as part of its transparent disclosure practices.

[Area Shipments]

LG Display's area shipments are expected to increase by a mid teens percentage in the third quarter compared to the second quarter of 2008, a decline from the initial guidance of a low twenties percentage increase quarter-on-quarter.

[Average selling price per square meter of glass]

The ASP per square meter is expected to decline by a high teens percentage quarter-on-quarter, compared to a low teens percentage decrease guided initially.

[COGS reduction per square meter]

As the company has initially guided, COGS reduction per square meter for the third quarter is expected to be a mid to high single digit percentage.

James Jeong, CFO of LG Display, said, "With the principle of responding flexibly to market situations, the company has been adjusting the input volume of glass substrates since the end of July, thus maintaining healthy inventory levels." He added, "We expect to achieve the estimated COGS reduction guidance and through the business outlook update, our third quarter EBITDA margin is expected to be around mid twenties percentage. With our pursuit of profit oriented business operations, we will effectively cope with short-term market situations while continue to boost our competitiveness in the long term to create value for our shareholders, customers and employees."

**About LG Display**

LG Display Co., Ltd [NYSE: LPL, KRX: 034220] is a leading manufacturer and supplier of thin-film transistor liquid crystal display (TFT-LCD) panels, OLEDs and flexible displays.

The company provides TFT-LCD panels in a wide range of sizes and specifications for use in TVs, monitors, notebook PCs, and various applications. LG Display currently operates seven fabrication facilities and five back-end assembly facilities in Korea, China and Poland. The company has a total of 23,000 employees operating in ten countries around the world. Please visit <http://www.lgdisplay.com> for more information.
