Biomet, Inc. announced today financial results for its second fiscal quarter ended November 30, 2008.

Net sales increased 6% to approximately \$643 million

Hip sales increased 10% worldwide, with 12% growth in the U.S.

Knee sales increased 7% worldwide, with U.S. growth at 11%

Net sales increased 6% during the second quarter of fiscal year 2009 to \$642.8 million from \$607.2 million for the second quarter of fiscal year 2008. U.S. sales increased 9% to \$379.5 million during the quarter, while Europe sales of \$195.4 million decreased 1% on a reported basis and International (primarily Canada, South America, and the Pacific Rim) sales of \$67.9 million increased 7% on a reported basis. For the six-month period ended November 30, 2008, net sales of \$1,249.8 million increased 9% on a reported basis.

Operating income for the second quarter of fiscal year 2009 was \$80.0 million on a reported basis, compared to an operating loss of \$251.0 million for the second quarter of fiscal year 2008.

During the second quarter of fiscal year 2009, Biomet reported \$131.4 million of special items (pre-tax), including purchase accounting charges of \$94.3 million. The purchase accounting charges primarily relate to amortization expense for established intangible assets, along with depreciation expense as a result of the step-up of property to fair value. A reconciliation of reported results to adjusted results can be viewed in the Investors Section of Biomet's website, www.biomet.com, under the section entitled, Quarterly Financial Results, or by clicking on the following link:

<http://www.biomet.com/fileLibrary/corporate/investors/financials/fiscal2009Q2OtherFinancialInformation.pdf>

The Company's net interest expense for the second quarter of fiscal year 2009 was \$139.2 million compared to \$148.7 million for the second quarter of last year.

Biomet's President and Chief Executive Officer Jeffrey R. Binder stated, "I am pleased with our consolidated sales results for the second quarter of fiscal year 2009, as we experienced our sixth consecutive quarter of double-digit global reconstructive device sales growth on a constant currency basis. I'm particularly pleased with the 14% sales growth for our hip products, attributable to demand for several product lines including our recently introduced E-Poly Acetabular Liners and the Regenerate[®] Ringloc[®]+ Modular Acetabular System. I'm satisfied with the turnaround in our spine franchise, which resulted in 9% sales growth due to new product introductions in the cervical, thoracolumbar and spacer segments, as well as improvements that have been made overall regarding inventory efficiency and performance management."

Products primarily driving the strong growth for Biomet's global hip sales included the ~~M~~h-Magnum Acetabular System, the

traditional and Microplasty versions of the Taperlo® Hip Stem, E-Poly Acetabular Liners, and the Regenere® Ringloc®+ Modular Acetabular System, in addition to European sales of the Bi-Metric® and Aura® Hip Stems and the Exceed ABT (Advanced Bearing Technologies) Acetabular System.

Biomet's knee sales increased 10% on a constant currency basis during the second quarter as a result of continued demand for the Oxford® Partial Knee System and the Vanguard Complete Knee System. The free-floating mobile-bearing Oxford® System is the most widely used and clinically proven partial knee in the world with 10, 15 and 20-year published results. The Vanguard System offers surgeons and their patients more implant combinations than any other total knee system on the market.

Dental reconstructive device sales increased 2% worldwide during the second quarter on a constant currency basis, due to a combination of factors including a difficult economic environment, the elective nature of dental implant procedures, and the availability of alternative treatment options that are more commonly reimbursed through insurance.

During the second quarter, the positive sales growth for internal fixation and craniomaxillofacial fixation products was partially offset by decreased sales of electrical stimulation and external fixation devices. Spine product sales increased 10% in the United States and increased 9% worldwide, on a constant currency basis with solid growth coming from both spine hardware and spinal stimulation devices. Sales of other products were impacted by decreased sales of softgoods and bracing products, while Biomet's sports medicine division reported solid sales growth during the second quarter of fiscal year 2009.

Financial Schedule Presentation

The Company's unaudited condensed consolidated financial statements as of and for the three months ended November 30, 2008 and 2007, for the six months ended November 30, 2008, for the periods July 12 to November 30, 2007 (Successor) and June 1 to July 11, 2007 (Predecessor), and other financial data included in this press release have been prepared in a manner that complies, in all material respects, with generally accepted accounting principles in the United States and reflects purchase accounting adjustments related to the merger referenced below.

In the related website schedules, the June 1 to July 11, 2007 (Predecessor) and July 12 to November 30, 2007 (Successor) periods have been combined and are referred to as combined. The combined presentation does not comply with U.S. Generally Accepted Accounting Principles (GAAP), but is presented because we believe it provides the most meaningful comparison of our results. The results of the Successor are not comparable to the results of the Predecessor due to the difference in basis of presentation as a result of purchase accounting related to the Merger.

Forward-Looking Statements

Edgar Filing: BIOMET INC - Form 424B3

This press release contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934, as amended. Those statements are often indicated by the use of words such as will, intend, anticipate, estimate, expect, plan and similar expressions. Forward-looking statements involve certain risks and uncertainties. Actual results may differ materially from those contemplated by the forward looking statements due to, among others, the following factors: the results of ongoing investigations by the United States Department of Justice; the ability to successfully implement new technologies; the Company's ability to sustain sales and earnings growth; the Company's success in achieving timely approval or clearance of its products with domestic and foreign regulatory entities; the impact to the business as a result of the economic downturn in both foreign and domestic markets; the impact of anticipated changes in the musculoskeletal industry and the ability of the Company to react to and capitalize on those changes; the ability of the Company to successfully implement its desired organizational changes; the impact of the Company's managerial changes; and other factors set forth in the Company's filings with the SEC, including the Company's most recent annual report on Form 10-K (as amended) and quarterly reports on Form 10-Q. Although the Company believes that the assumptions on which the forward-looking statements contained herein are based are reasonable, any of those assumptions could prove to be inaccurate given the inherent uncertainties as to the occurrence or non-occurrence of future events. There can be no assurance as to the accuracy of forward-looking statements contained in this press release. The inclusion of a forward-looking statement herein should not be regarded as a representation by the Company that the Company's objectives will be achieved. The Company undertakes no obligation to update publicly or revise any forward-looking statements, whether as a result of new information, future events or otherwise. Accordingly, the reader is cautioned not to place undue reliance on forward-looking statements which speak only as of the date on which they were made.
