#### FORWARD-LOOKING STATEMENTS

Certain of the statements included in this Quarterly Report on Form 10-Q, including but not limited to those in Management s Discussion and Analysis of Financial Condition and Results of Operations, constitute forward-looking statements within the meaning of the U.S. Private Securities Litigation Reform Act of 1995. Words such as expects, believes, anticipates, includes, plans, shall or variations of such words are generally part of forward-looking statements. Forward-looking statements are made based on management s current expectations and beliefs concerning future developments and their potential effects upon Prudential Financial, Inc. and its subsidiaries. There can be no assurance that future developments affecting Prudential Financial, Inc. and its subsidiaries will be those anticipated by management. These forward-looking statements are not a guarantee of future performance and involve risks and uncertainties, and there are certain important factors that could cause actual results to differ, possibly materially, from expectations or estimates reflected in such forward-looking statements, including, among others: (1) general economic, market and political conditions, including the performance and fluctuations of fixed income, equity, real estate and other financial markets, particularly in light of ongoing severe economic conditions and the severe stress experienced by the global financial markets that began in the second half of 2007 and has continued and substantially increased since then; (2) the availability and cost of external financing for our operations, which has been affected by the stress experienced by the global financial markets; (3) interest rate fluctuations; (4) reestimates of our reserves for future policy benefits and claims; (5) differences between actual experience regarding mortality, morbidity, persistency, surrender experience, interest rates or market returns and the assumptions we use in pricing our products, establishing liabilities and reserves or for other purposes; (6) changes in our assumptions related to deferred policy acquisition costs, valuation of business acquired or goodwill; (7) changes in our claims-paying or credit ratings; (8) investment losses, defaults and counterparty non-performance; (9) competition in our product lines and for personnel; (10) changes in tax law; (11) economic, political, currency and other risks relating to our international operations; (12) fluctuations in foreign currency exchange rates and foreign securities markets; (13) regulatory or legislative changes, including government actions in response to the stress experienced by the global financial markets; (14) adverse determinations in litigation or regulatory matters and our exposure to contingent liabilities, including in connection with our divestiture or winding down of businesses; (15) domestic or international military actions, natural or man-made disasters including terrorist activities or pandemic disease, or other events resulting in catastrophic loss of life; (16) ineffectiveness of risk management policies and procedures in identifying, monitoring and managing risks; (17) effects of acquisitions, divestitures and restructurings, including possible difficulties in integrating and realizing the projected results of acquisitions; (18) changes in statutory or U.S. GAAP accounting principles, practices or policies; (19) changes in assumptions for retirement expense; (20) Prudential Financial, Inc. s primary reliance, as a holding company, on dividends or distributions from its subsidiaries to meet debt payment obligations and the ability of the subsidiaries to pay such dividends or distributions in light of our ratings objectives and/or applicable regulatory restrictions; and (21) risks due to the lack of legal separation between our Financial Services Businesses and our Closed Block Business. As noted above, the adverse market and economic conditions that began in the second half of 2007 have continued and substantially worsened since then. The foregoing risks are even more pronounced in these unprecedented market and economic conditions. Prudential Financial, Inc. does not intend, and is under no obligation, to update any particular forward-looking statement included in this document. See Risk Factors included in this Quarterly Report on Form 10-Q for discussion of certain risks relating to our businesses and investment in our securities.

ii

Throughout this Quarterly Report on Form 10-Q, Prudential Financial and the Registrant refer to Prudential Financial, Inc., the ultimate holding company for all of our companies. Prudential Insurance refers to The Prudential Insurance Company of America, before and after its demutualization on December 18, 2001. Prudential, the Company, we and our refer to our consolidated operations before and after demutualization.

#### **Notes to Unaudited Interim Consolidated Financial Statements**

#### 1. BUSINESS AND BASIS OF PRESENTATION

Prudential Financial, Inc. ( Prudential Financial ) and its subsidiaries (collectively, Prudential or the Company ) provide a wide range of insurance, investment management, and other financial products and services to both individual and institutional customers throughout the United States and in many other countries. Principal products and services provided include life insurance, annuities, retirement-related services, mutual funds, investment management, and real estate services. The Company has organized its principal operations into the Financial Services Businesses and the Closed Block Business. The Financial Services Businesses operate through three operating divisions: U.S. Retirement Solutions and Investment Management, U.S. Individual Life and Group Insurance, and International Insurance and Investments. The Company s real estate and relocation services business as well as businesses that are not sufficiently material to warrant separate disclosure and businesses to be divested, including the Company s investment in the retail securities brokerage joint venture Wachovia Securities Financial Holdings, LLC (Wachovia Securities), are included in Corporate and Other operations within the Financial Services Businesses. The Closed Block Business, which includes the Closed Block (see Note 5), is managed separately from the Financial Services Businesses. The Closed Block Business was established on the date of demutualization and includes the Company s in force participating insurance and annuity products and assets that are used for the payment of benefits and policyholders dividends on these products, as well as other assets and equity that support these products and related liabilities. In connection with the demutualization, the Company ceased offering these participating products.

# Basis of Presentation

The Unaudited Interim Consolidated Financial Statements include the accounts of Prudential Financial, entities over which the Company exercises control, including majority-owned subsidiaries and minority-owned entities such as limited partnerships in which the Company is the general partner, and variable interest entities in which the Company is considered the primary beneficiary. The Unaudited Interim Consolidated Financial Statements have been prepared in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP) on a basis consistent with reporting interim financial information in accordance with instructions to Form 10-Q and Article 10 of Regulation S-X of the Securities and Exchange Commission (SEC). Intercompany balances and transactions have been eliminated.

In the opinion of management, all adjustments necessary for a fair statement of the financial position and results of operations have been made. All such adjustments are of a normal, recurring nature. Interim results are not necessarily indicative of the results that may be expected for the full year. These financial statements should be read in conjunction with the Company s Audited Consolidated Financial Statements included in the Company s Annual Report on Form 10-K for the year ended December 31, 2008.

## Use of Estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as of the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

The most significant estimates include those used in determining deferred policy acquisition costs and related amortization; measurement of goodwill and any related impairment; valuation of business acquired and its amortization; valuation of investments including derivatives (in the absence of quoted market values) and the recognition of other-than-temporary impairments; future policy benefits including guarantees; pension and other postretirement benefits; provision for income taxes and valuation of deferred tax assets; reserves for contingent liabilities, including reserves for losses in connection with unresolved legal matters.

Notes to Una	udited Interim	Consolidated	<b>Financial Statements</b>	(Continued)

#### Reclassifications

Certain amounts in prior periods have been reclassified to conform to the current period presentation.

#### 2. ACCOUNTING POLICIES AND PRONOUNCEMENTS

## Share-Based Payments

The Company issues employee share-based compensation awards, under a plan authorized by the Board of Directors, that are subject to specific vesting conditions. Generally the awards vest ratably over a three-year period, the nominal vesting period, or at the date the employee retires (as defined by the plan), if earlier. The Company accounts for those awards granted between (a) the adoption of the fair value recognition provisions of Statement of Financial Accounting Standards (SFAS) No. 123 Accounting for Stock Based Compensation on January 1, 2003, and (b) the adoption on January 1, 2006 of SFAS No. 123(R) which specify that an employee vests in the award upon retirement, using the nominal vesting period approach. Under this approach, the Company records compensation expense over the nominal vesting period. If the employee retires before the end of the nominal vesting period, any remaining unrecognized compensation cost is recognized at the date of retirement.

Upon the adoption of SFAS No. 123(R), the Company revised its approach to the recognition of compensation costs for awards granted to retirement-eligible employees and awards that vest when an employee becomes retirement-eligible to apply the non-substantive vesting period approach to all new share-based compensation awards granted after January 1, 2006. Under this approach, all compensation cost is recognized on the date of grant for awards issued to retirement-eligible employees, or over the period from the grant date to the date retirement eligibility is achieved, if that is expected to occur during the nominal vesting period.

If the Company had accounted for all share-based compensation awards granted after January 1, 2003 under the non-substantive vesting period approach, net income of the Financial Services Businesses for the three months ended March 31, 2008 would have been increased by \$0.8 million, with no reportable impact to the earnings per share of Common Stock, on both a basic and diluted basis. There is no impact to net income for 2009, as all compensation expense relating to share-based compensation awards accounted for under the nominal vesting period approach had been recognized in net income by December 31, 2008.

# Investments in Debt and Equity Securities

Fixed maturities are comprised of bonds, notes and redeemable preferred stock. Fixed maturities classified as available for sale are carried at fair value. See Note 11 for additional information regarding the determination of fair value. Fixed maturities that the Company has both the positive intent and ability to hold to maturity are carried at amortized cost and classified as held to maturity. The amortized cost of fixed maturities is

adjusted for amortization of premiums and accretion of discounts to maturity. Interest income, as well as the related amortization of premium and accretion of discount is included in Net investment income under the effective yield method. For mortgage-backed and asset-backed securities, the effective yield is based on estimated cash flows, including prepayment assumptions based on data from widely accepted third-party data sources or internal estimates. In addition to prepayment assumptions cash flow estimates vary based on assumptions regarding the underlying collateral including default rates and changes in value. These assumptions can significantly impact income recognition and the amount of other-than-temporary impairments recognized in other comprehensive income. For high credit quality mortgage-backed and asset-backed securities (those rated AA or above), cash flows are provided quarterly, and the amortized cost and effective yield of the security are adjusted as necessary to reflect historical prepayment experience and changes in estimated future prepayments. The adjustments to amortized cost are recorded as a charge or credit to net investment income in accordance with

## **Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

the retrospective method. For asset-backed and mortgage-backed securities rated below AA, the effective yield is adjusted prospectively for any changes in estimated cash flows. See the discussion below on realized investment gains and losses for a description of the accounting for impairments as well as the impact of the Company s adoption of FASB Staff Position (FSP) FAS 115-2 and FAS 124-2, Recognition and Presentation of Other-Than-Temporary Impairments. Unrealized gains and losses on fixed maturities classified as available for sale, net of tax, and the effect on deferred policy acquisition costs, valuation of business acquired, future policy benefits and policyholders dividends that would result from the realization of unrealized gains and losses, are included in Accumulated other comprehensive income (loss).

Trading account assets supporting insurance liabilities, at fair value includes invested assets that support certain products included in the Retirement segment, as well as certain products included in the International Insurance segment, which are experience rated, meaning that the investment results associated with these products are expected to ultimately accrue to contractholders. Realized and unrealized gains and losses for these investments are reported in Asset management fees and other income. Interest and dividend income from these investments is reported in Net investment income.

Other trading account assets, at fair value consist primarily of investments and certain derivatives used by the Company either in its capacity as a broker-dealer or for asset and liability management activities. These instruments are carried at fair value. Realized and unrealized gains and losses on other trading account assets are reported in Asset management fees and other income. Interest and dividend income from these investments is reported in Net investment income.

Equity securities available for sale are comprised of common stock, mutual fund shares, non-redeemable preferred stock, and perpetual preferred stock, and are carried at fair value. The associated unrealized gains and losses, net of tax, and the effect on deferred policy acquisition costs, valuation of business acquired, future policy benefits and policyholders—dividends that would result from the realization of unrealized gains and losses, are included in—Accumulated other comprehensive income (loss). The cost of equity securities is written down to fair value when a decline in value is considered to be other-than-temporary. See the discussion below on realized investment gains and losses for a description of the accounting for impairments. Dividends from these investments are recognized in—Net investment income—when declared.

Short-term investments primarily consist of highly liquid debt instruments with a maturity of greater than three months and less than twelve months when purchased, other than those debt instruments meeting this definition that are included in Trading account assets supporting insurance liabilities, at fair value. These investments are generally carried at fair value and include money market investments, short-term debt securities issued by government sponsored entities and other highly liquid debt instruments.

Realized investment gains (losses) are computed using the specific identification method with the exception of some of the Company s International Insurance businesses—portfolios, where the average cost method is used. Realized investment gains and losses are generated from numerous sources, including the sale of fixed maturity securities, equity securities, investments in joint ventures and limited partnerships and other types of investments, as well as adjustments to the cost basis of investments for net other-than-temporary impairments recognized in earnings. Realized investment gains and losses are also generated from prepayment premiums received on private fixed maturity securities, recoveries of principal on previously impaired securities, provisions for losses on commercial mortgage and other loans, fair value changes on commercial mortgage loans carried at fair value, gains on commercial mortgage loans in connection with securitization transactions, fair value changes on embedded derivatives and derivatives that do not qualify for hedge accounting treatment, except those derivatives used in the Company s capacity as a broker or dealer.

## **Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

The Company s available-for-sale and held-to-maturity securities with unrealized losses are reviewed quarterly to identify other-than-temporary impairments in value. In evaluating whether a decline in value is other-than-temporary, the Company considers several factors including, but not limited to the following: (1) the extent and the duration of the decline; (2) the reasons for the decline in value (credit event, currency or interest-rate related, including general credit spread widening); and (3) the financial condition of and near-term prospects of the issuer. With regard to available-for-sale equity securities, the Company also considers the ability and intent to hold the investment for a period of time to allow for a recovery of value. When it is determined that a decline in value of an equity security is other-than-temporary, the carrying value of the equity security is reduced to its fair value, with a corresponding charge to earnings.

In addition, in April 2009, the Financial Accounting Standards Board (FASB) issued FSP FAS 115-2 and FAS 124-2, Recognition and Presentation of Other-Than-Temporary Impairments. The Company early adopted this guidance on January 1, 2009. This guidance indicates that an other-than-temporary impairment must be recognized in earnings for a debt security in an unrealized loss position when an entity either (a) has the intent to sell the debt security or (b) more likely than not will be required to sell the debt security before its anticipated recovery. Prior to the adoption of this guidance the Company was required to record an other-than-temporary impairment for a debt security unless it could assert that it had both the intent and ability to hold the security for a period of time sufficient to allow for a recovery in its fair value to its amortized cost basis. For all debt securities in unrealized loss positions that do not meet either of these two criteria, FSP FAS 115-2 and FAS 124-2 requires that the Company analyze its ability to recover the amortized cost by comparing the net present value of projected future cash flows with the amortized cost of the security. The net present value is calculated by discounting the Company s best estimate of projected future cash flows at the effective interest rate implicit in the debt security prior to impairment. The Company may use the estimated fair value of collateral as a proxy for the net present value if it believes that the security is dependent on the liquidation of collateral for recovery of its investment. If the net present value is less than the amortized cost of the investment, an other-than-temporary impairment is recorded.

Under FSP FAS 115-2 and FAS 124-2, when an other-than-temporary impairment of a debt security has occurred, the amount of the other-than-temporary impairment recognized in earnings depends on whether the Company intends to sell the security or more likely than not will be required to sell the security before recovery of its amortized cost basis. If the debt security meets either of these two criteria, the other-than-temporary impairment recognized in earnings is equal to the entire difference between the security s amortized cost basis and its fair value at the impairment measurement date. For other-than-temporary impairments of debt securities that do not meet these two criteria, the net amount recognized in earnings is equal to the difference between the amortized cost of the debt security and its net present value calculated as described above. Any difference between the fair value and the net present value of the debt security at the impairment measurement date is recorded in Other comprehensive income (loss). Unrealized gains or losses on securities for which an other-than-temporary impairment has been recognized in earnings is tracked as a separate component of Accumulated other comprehensive income (loss). Prior to the adoption of FSP FAS 115-2 and FAS 124-2, an other-than-temporary impairment recognized in earnings for debt securities was equal to the total difference between amortized cost and fair value at the time of impairment.

For debt securities, the split between the amount of an other-than-temporary impairment recognized in other comprehensive income and the net amount recognized in earnings is driven principally by assumptions regarding the amount and timing of projected cash flows. For mortgage-backed and asset-backed securities, cash flow estimates including prepayment assumptions, are based on data from widely accepted third-party data sources or internal estimates. In addition to prepayment assumptions, cash flow estimates vary based on assumptions regarding the underlying collateral including default rates, recoveries and changes in value. For all other debt

## **Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

securities, cash flow estimates are driven by assumptions regarding probability of default and estimates regarding timing and amount of recoveries associated with a default. The Company has developed these estimates using information based on its historical experience as well as using market observable data, such as industry analyst reports and forecasts, sector credit ratings and other data relevant to the collectability of a security.

The new cost basis of an impaired security is not adjusted for subsequent increases in estimated fair value. In periods subsequent to the recognition of an other-than-temporary impairment, the impaired security is accounted for as if it had been purchased on the measurement date of the impairment. For debt securities, the discount (or reduced premium) based on the new cost basis may be accreted into net investment income in future periods based on prospective changes in cash flow estimates, to reflect adjustments to the effective yield.

## Goodwill

The Company tests goodwill for impairment annually as of December 31 and more frequently if an event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying amount. A reporting unit is an operating segment or a unit one level below the operating segment. The Company evaluated the goodwill of the Retirement segment s full service business for potential impairment as of March 31, 2009 and determined that a goodwill impairment did not exist, as the fair value of the business, which was calculated by applying a discounted cash flow analysis to its expected future earnings, was greater than its carrying value. The carrying value of the Retirement segment s full service business goodwill was \$444 million as of March 31, 2009.

# Derivative Financial Instruments

Derivatives are financial instruments whose values are derived from interest rates, foreign exchange rates, financial indices or the values of securities or commodities. Derivative financial instruments generally used by the Company include swaps, futures, forwards and options and may be exchange-traded or contracted in the over-the-counter market. Derivative positions are carried at fair value, generally by obtaining quoted market prices or through the use of valuation models. Values can be affected by changes in interest rates, foreign exchange rates, financial indices, values of securities or commodities, credit spreads, market volatility, expected returns and liquidity. Values can also be affected by changes in estimates and assumptions, including those related to counterparty behavior, used in valuation models.

Derivatives are used in a non-dealer capacity in insurance, investment and international businesses as well as treasury operations to manage the characteristics of the Company s asset/liability mix, to manage the interest rate and currency characteristics of assets or liabilities and to mitigate the risk of a diminution, upon translation to U.S. dollars, of expected non-U.S. earnings and net investments in foreign operations resulting from unfavorable changes in currency exchange rates. Additionally, derivatives may be used to seek to reduce exposure to interest rate, credit, foreign currency and equity risks associated with assets held or expected to be purchased or sold, and liabilities incurred or expected to be incurred. As discussed in detail below and in Note 13, all realized and unrealized changes in fair value of non-dealer related derivatives, with the exception of the effective portion of cash flow hedges and effective hedges of net investments in foreign operations, are recorded in current earnings. Cash flows from these derivatives are reported in the operating, investing, or financing activities sections in the Consolidated Statements of Cash Flows.

Derivatives are also used in a derivative dealer or broker capacity in the Company s securities operations to meet the needs of clients by structuring transactions that allow clients to manage their exposure to interest rates,

## **Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

foreign exchange rates, indices or prices of securities and commodities and similarly in a dealer or broker capacity through the operation of certain hedge portfolios. Realized and unrealized changes in fair value of derivatives used in these dealer related operations are included in Asset management fees and other income in the periods in which the changes occur. Cash flows from such derivatives are reported in the operating activities section of the Consolidated Statements of Cash Flows.

Derivatives are recorded either as assets, within Other trading account assets, or Other long-term investments, or as liabilities, within Other liabilities, in the Consolidated Statements of Financial Position, except for embedded derivatives which are recorded in the Consolidated Statements of Financial Position with the associated host contract. The Company nets the fair value of all derivative financial instruments with counterparties for which a master netting arrangement has been executed pursuant to FASB Interpretation (FIN) No. 39 and FSP No. 39-1.

For non-dealer related derivatives the Company designates derivatives as either (1) a hedge of the fair value of a recognized asset or liability or unrecognized firm commitment (fair value hedge); (2) a hedge of a forecasted transaction or of the variability of cash flows to be received or paid related to a recognized asset or liability (cash flow hedge); (3) a foreign-currency fair value or cash flow hedge (foreign currency hedge); (4) a hedge of a net investment in a foreign operation; or (5) a derivative that does not qualify for hedge accounting.

To qualify for hedge accounting treatment, a derivative must be highly effective in mitigating the designated risk of the hedged item. Effectiveness of the hedge is formally assessed at inception and throughout the life of the hedging relationship. Even if a derivative qualifies for hedge accounting treatment, there may be an element of ineffectiveness of the hedge. Under such circumstances, the ineffective portion is recorded in Realized investment gains (losses), net.

The Company formally documents at inception all relationships between hedging instruments and hedged items, as well as its risk-management objective and strategy for undertaking various hedge transactions. This process includes linking all derivatives designated as fair value, cash flow, or foreign currency, hedges to specific assets and liabilities on the balance sheet or to specific firm commitments or forecasted transactions. Hedges of a net investment in a foreign operation are linked to the specific foreign operation.

When a derivative is designated as a fair value hedge and is determined to be highly effective, changes in its fair value, along with changes in the fair value of the hedged asset or liability (including losses or gains on firm commitments), are reported on a net basis in the income statement, generally in Realized investment gains (losses), net. When swaps are used in hedge accounting relationships, periodic settlements are recorded in the same income statement line as the related settlements of the hedged items.

When a derivative is designated as a cash flow hedge and is determined to be highly effective, changes in its fair value are recorded in Accumulated other comprehensive income (loss) until earnings are affected by the variability of cash flows being hedged (e.g., when periodic settlements on a variable-rate asset or liability are recorded in earnings). At that time, the related portion of deferred gains or losses on the derivative instrument is reclassified and reported in the income statement line item associated with the hedged item.

When a derivative is designated as a foreign currency hedge and is determined to be highly effective, changes in its fair value are recorded in either current period earnings or Accumulated other comprehensive income (loss), depending on whether the hedge transaction is a fair value hedge (e.g., a hedge of a recognized

## **Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

foreign currency asset or liability) or a cash flow hedge (e.g., a foreign currency denominated forecasted transaction). When a derivative is used as a hedge of a net investment in a foreign operation, its change in fair value, to the extent effective as a hedge, is recorded in the cumulative translation adjustment account within Accumulated other comprehensive income (loss).

If it is determined that a derivative no longer qualifies as an effective fair value or cash flow hedge or management removes the hedge designation, the derivative will continue to be carried on the balance sheet at its fair value, with changes in fair value recognized currently in Realized investment gains (losses), net. The asset or liability under a fair value hedge will no longer be adjusted for changes in fair value and the existing basis adjustment is amortized to the income statement line associated with the asset or liability. The component of Accumulated other comprehensive income (loss) related to discontinued cash flow hedges is amortized to the income statement line associated with the hedged cash flows consistent with the earnings impact of the original hedged cash flows.

When hedge accounting is discontinued because the hedged item no longer meets the definition of a firm commitment, or because it is probable that the forecasted transaction will not occur by the end of the specified time period, the derivative will continue to be carried on the balance sheet at its fair value, with changes in fair value recognized currently in Realized investment gains (losses), net. Any asset or liability that was recorded pursuant to recognition of the firm commitment is removed from the balance sheet and recognized currently in Realized investment gains (losses), net. Gains and losses that were in Accumulated other comprehensive income (loss) pursuant to the hedge of a forecasted transaction are recognized immediately in Realized investment gains (losses), net.

If a derivative does not qualify for hedge accounting, all changes in its fair value, including net receipts and payments, are included in Realized investment gains (losses), net without considering changes in the fair value of the economically associated assets or liabilities.

The Company is a party to financial instruments that contain derivative instruments that are embedded in the financial instruments. At inception, the Company assesses whether the economic characteristics of the embedded derivative are clearly and closely related to the economic characteristics of the remaining component of the financial instrument (i.e., the host contract) and whether a separate instrument with the same terms as the embedded instrument would meet the definition of a derivative instrument. When it is determined that (1) the embedded derivative possesses economic characteristics that are not clearly and closely related to the economic characteristics of the host contract, and (2) a separate instrument with the same terms would qualify as a derivative instrument, the embedded derivative is separated from the host contract, carried at fair value, and changes in its fair value are included in Realized investment gains (losses), net. For certain financial instruments that contain an embedded derivative that otherwise would need to be bifurcated and reported at fair value, the Company may elect to classify the entire instrument as a trading account asset and report it within Other trading account assets, at fair value.

# **Income Taxes**

The Company s liability for income taxes includes the liability for unrecognized tax benefits and interest and penalties which relate to tax years still subject to review by the Internal Revenue Service (IRS) or other taxing jurisdictions. Audit periods remain open for review until the statute of limitations has passed. Generally, for tax years which produce net operating losses, capital losses or tax credit carryforwards (tax attributes), the statute of limitations does not close, to the extent of these tax attributes, until the expiration of the statute of limitations for the tax year in which they are fully utilized. The completion of review or the expiration of the statute of limitations for a given audit period could result in an

adjustment to the liability for income taxes. The

## **Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

statute of limitations for the 2002 and 2003 tax years is set to expire in 2009. It is reasonably possible that the total net amount of unrecognized tax benefits will decrease anywhere from \$0 to \$200 million within the next 12 months due to the expiration of the statute of limitations. Taxable years 2004 through 2008 are still open for IRS examination.

The dividends received deduction ( DRD ) reduces the amount of dividend income subject to U.S. tax and in recent years is the primary component of the difference between the Company s effective tax rate and the federal statutory tax rate of 35%. The DRD for the current period was estimated using information from 2008, current year results, and was adjusted to take into account the current year s equity market performance. The actual current year DRD can vary from the estimate based on factors such as, but not limited to, changes in the amount of dividends received that are eligible for the DRD, changes in the amount of distributions received from mutual fund investments, changes in the account balances of variable life and annuity contracts, and the Company s taxable income before the DRD.

In August 2007, the IRS, released Revenue Ruling 2007-54, which included, among other items, guidance on the methodology to be followed in calculating the DRD related to variable life insurance and annuity contracts. In September 2007, the IRS released Revenue Ruling 2007-61. Revenue Ruling 2007-61 suspends Revenue Ruling 2007-54 and informs taxpayers that the U.S. Treasury Department and the IRS intend to address through new regulations the issues considered in Revenue Ruling 2007-54, including the methodology to be followed in determining the DRD related to variable life insurance and annuity contracts. These activities had no impact on the Company s 2008 or 2009 results. A change in the DRD, including the possible retroactive or prospective elimination of this deduction through regulation or legislation, could increase actual tax expense and reduce the Company s consolidated net income.

In December 2006, the IRS completed all fieldwork with respect to its examination of the consolidated federal income tax returns for tax years 2002 and 2003. The final report was initially submitted to the Joint Committee on Taxation for their review in April 2007. The final report was resubmitted in March 2008 and again in April 2008. The Joint Committee returned the report to the IRS for additional review of an industry issue regarding the methodology for calculating the DRD related to variable life insurance and annuity contracts. The IRS completed its review of the issue and proposed an adjustment with respect to the calculation of the DRD. In order to expedite receipt of an income tax refund related to the 2002 and 2003 years, the Company has agreed to such adjustment. Nevertheless, the Company believes that its return position is technically correct. Therefore, the Company intends to file a protective refund claim to recover the taxes associated with the agreed upon adjustment and to pursue such other actions as appropriate. The report, with the adjustment, was submitted to the Joint Committee on Taxation in October 2008. The Company was advised on January 2, 2009 that the Joint Committee completed its consideration of the report and has taken no exception to the conclusions reached by the IRS. Accordingly, the final report was processed and a \$157 million refund was received in February 2009. The statute of limitations for these years is set to expire during 2009. These activities had no impact on the Company s 2008 or 2009 results.

In January 2007, the IRS began an examination of the consolidated U.S. federal income tax years 2004 through 2006. For the consolidated U.S. federal income tax years 2007 and 2008, the Company participated in the IRS s Compliance Assurance Program (CAP). Under CAP, the IRS assigns an examination team to review completed transactions contemporaneously during the 2007 and 2008 tax years in order to reach agreement with the Company on how they should be reported in the tax return. If disagreements arise, accelerated resolutions programs are available to resolve the disagreements in a timely manner before the tax return is filed. It is management s expectation this program will shorten the time period between the filing of the Company s federal income tax return and the IRS s completion of its examination of the return.

## **Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

#### Accounting Pronouncements Adopted

In April 2009, the FASB issued FSP FAS 115-2 and FAS 124-2, Recognition and Presentation of Other-Than-Temporary Impairments. This FSP amends the other-than-temporary impairment guidance for debt securities and expands the presentation and disclosure requirements of other-than-temporary impairments on debt and equity securities in the financial statements. This FSP also requires that the required annual disclosures for debt and equity securities be made for interim reporting periods. This FSP does not amend existing recognition and measurement guidance related to other-than-temporary impairments of equity securities. This FSP is effective for interim and annual reporting periods ending after June 15, 2009, with early adoption permitted for periods ending after March 15, 2009. The Company early adopted this guidance effective January 1, 2009, which resulted in a net after-tax increase to retained earnings and decrease to Accumulated other comprehensive income (loss) of \$686 million, as of January 1, 2009. The disclosures required by this FSP are provided in Note 4. See Investments in Debt and Equity Securities above for more information.

In April 2009, the FASB issued FSP FAS 157-4, Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly. This FSP provides additional guidance for estimating fair value in accordance with FASB Statement No. 157, Fair Value Measurements, when the volume and level of activity for the asset or liability have significantly decreased. This FSP also includes guidance on identifying circumstances that indicate a transaction is not orderly. This FSP also amends the disclosure requirements in interim and annual periods. This FSP is effective for interim and annual reporting periods ending after June 15, 2009, and shall be applied prospectively. Early adoption is permitted for periods ending after March 15, 2009. The Company s early adoption of this guidance effective January 1, 2009 did not have a material effect on the Company s consolidated financial position or results of operations. The disclosures required by this FSP are provided in Note 11.

In April 2009, the FASB issued FSP FAS 141(R)-1, Accounting for Assets Acquired and Liabilities Assumed in a Business Combination That Arise from Contingencies. This FSP requires an asset acquired or liability assumed in a business combination that arises from a contingency to be recognized at fair value at the acquisition date, if the acquisition date fair value of that asset or liability can be determined during the measurement period. If the acquisition date fair value of an asset acquired or liability assumed in a business combination that arises from a contingency cannot be determined during the measurement period, the asset or liability shall be recognized at the acquisition date using the guidance in SFAS No. 5, Accounting for Contingencies. This FSP also amends disclosure requirements. This FSP is effective for assets or liabilities arising from contingencies in business combinations for which the acquisition date is on or after January 1, 2009. The Company s adoption of this guidance effective January 1, 2009 did not have a material effect on the Company s consolidated financial position or results of operations.

In September 2008, the FASB Emerging Issues Task Force (EITF) reached consensus on EITF Issue No. 08-5, Issuer's Accounting for Liabilities Measured at Fair Value with a Third-Party Credit Enhancement. The consensus concluded that (a) the issuer of a liability (including debt) with a third-party credit enhancement that is inseparable from the liability, shall not include the effect of the credit enhancement in the fair value measurement of the liability; (b) the issuer shall disclose the existence of any third-party credit enhancement on such liabilities, and (c) in the period of adoption the issuer shall disclose the valuation techniques used to measure the fair value of such liabilities and disclose any changes from valuation techniques used in prior periods. The Company's adoption of this guidance on a prospective basis effective January 1, 2009 did not have a material effect on the Company's consolidated financial position or results of operations.

In June 2008, the FASB EITF reached consensus on the following issues contained in EITF Issue No. 07-5, Determining Whether an Instrument (or an Embedded Feature) is Indexed to an Entity s Own Stock: (1) how

## **Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

an entity should evaluate whether an instrument (or embedded feature) is indexed to the entity s own stock; (2) how the currency in which the strike price of an equity-linked financial instrument (or embedded equity-linked feature) is denominated affects the determination of whether the instrument is indexed to the entity s own stock; (3) how an issuer should account for equity-linked financial instruments issued to investors for purposes of establishing a market-based measure of the grant-date fair value of employee stock options. This guidance clarifies what instruments qualify as indexed to an entity s own stock and are thereby exempt from requirements of FASB Statement No. 133, Accounting for Derivative Instruments and Hedging Activities, and eligible for equity classification under EITF Issue No. 00-19, Accounting for Derivative Financial Instruments Indexed to, and Potentially Settled in, a Company s Own Stock. The Company s adoption of this guidance effective January 1, 2009 did not have a material effect on the Company s consolidated financial position or results of operations.

In June 2008, the FASB issued FSP EITF 03-6-1, Determining Whether Instruments Granted in Share-Based Payment Transactions Are Participating Securities. This FSP states that unvested share-based payment awards that contain nonforfeitable rights to dividends or dividend equivalents (whether paid or unpaid) are participating securities and shall be included in the computation of earnings per share (EPS) pursuant to the two-class method described in paragraphs 60 and 61 of FASB Statement No. 128, Earnings per Share. This FSP is effective for fiscal years and interim periods beginning after December 15, 2008, and must be applied retrospectively to all EPS data presented. The Company s adoption of this guidance effective January 1, 2009 had no reportable impact on earnings per basic share of Common Stock and earnings per diluted share of Common Stock for the three months ended March 31, 2008. The Company s adoption of this guidance effective January 1, 2009 reduced earnings per basic share of Common Stock for the years ended December 31, 2008, 2007, 2006, 2005 and 2004 by \$0.01, \$0.05, \$0.06, \$0.06 and \$0.02, respectively, and earnings per diluted share of Common Stock by \$0.01, \$0.01, \$0.02, \$0.03 and \$0.01, respectively.

In May 2008, the FASB issued FSP APB 14-1, Accounting for Convertible Debt Instruments That May Be Settled in Cash upon Conversion (Including Partial Cash Settlement). This FSP, which is effective for fiscal years and interim periods beginning after December 15, 2008 and must be applied retrospectively, addresses the accounting for certain convertible debt instruments including those that have been issued by the Company. It requires bifurcation of the instrument into a debt component that is initially recorded at fair value and an equity component. The difference between the fair value of the debt component and the initial proceeds from issuance of the instrument is recorded as a component of equity within additional paid-in capital. The liability component of the debt instrument is accreted to par using the effective yield method, with the accretion being reported as a component of interest expense. Bond issuance costs are allocated to the debt and equity components in proportion to the debt proceeds. The Company s adoption of this guidance effective January 1, 2009 reduced net income for the three months ended March 31, 2008 by \$9 million or \$0.02 per share of Common Stock, on both a basic and diluted basis. The Company s adoption of this guidance effective January 1, 2009 reduced net income for the years ended December 31, 2008, 2007, 2006 and 2005 by \$44 million, \$42 million, \$36 million and \$5 million, or \$0.10, \$0.09, \$0.07 and \$0.01 per share of Common Stock, on both a basic and diluted basis, respectively.

In April 2008, the FASB issued FSP FAS 142-3, Determination of the Useful Life of Intangible Assets. This FSP amends the list of factors an entity should consider in developing renewal or extension assumptions used to determine the useful life of recognized intangible assets under SFAS No. 142. The new guidance applies to (1) intangible assets that are acquired individually or with a group of other assets and (2) intangible assets acquired in both business combinations and asset acquisitions. This FSP is effective for fiscal years and interim periods beginning after December 15, 2008, with the guidance for determining the useful life of a recognized intangible asset being applied prospectively to intangible assets acquired after the effective date and the

## **Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

disclosure requirements being applied prospectively to all intangible assets recognized as of, and after, the effective date. The Company s adoption of this guidance effective January 1, 2009 did not have a material effect on the Company s consolidated financial position or results of operations.

In March 2008, the FASB issued SFAS No. 161, Disclosures about Derivative Instruments and Hedging Activities an amendment of SFAS No. 133. This statement amends and expands the disclosure requirements for derivative instruments and hedging activities by requiring companies to provide enhanced disclosures about (a) how and why an entity uses derivative instruments, (b) how derivative instruments and related hedged items are accounted for under FASB Statement No. 133 and its related interpretations, and (c) how derivative instruments and related hedged items affect an entity s financial position, financial performance, and cash flows. The Company s adoption of this guidance effective January 1, 2009 did not have a material effect on the Company s consolidated financial position or results of operations. The required disclosures are provided in Note 13.

In February 2008, the FASB issued FSP FAS 140-3, Accounting for Transfers of Financial Assets and Repurchase Financing Transactions. The FSP provides recognition and derecognition guidance for a repurchase financing transaction, which is a repurchase agreement that relates to a previously transferred financial asset between the same counterparties, that is entered into contemporaneously with or in contemplation of, the initial transfer. The FSP is effective for fiscal years beginning after November 15, 2008. The Company s adoption of this guidance on a prospective basis effective January 1, 2009 did not have a material effect on the Company s consolidated financial position or results of operations.

In February 2008, the FASB issued FSP FAS 157-2, Effective Date of FASB Statement No. 157. This FSP applies to nonfinancial assets and nonfinancial liabilities, except for items that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually). FSP FAS 157-2 delays the effective date of SFAS No. 157 for these items to fiscal years beginning after November 15, 2008, and interim periods within those fiscal years. The Company s adoption of this guidance effective January 1, 2009 did not have a material effect on the Company s consolidated financial position or results of operations.

In December 2007, the FASB issued SFAS No. 141R, Business Combinations. This statement, which addresses the accounting for business acquisitions, is effective for fiscal years beginning on or after December 15, 2008, with early adoption prohibited, and generally applies to business acquisitions completed after December 31, 2008. Among other things, the new standard requires that all acquisition-related costs be expensed as incurred, and that all restructuring costs related to acquired operations be expensed as incurred. This new standard also addresses the current and subsequent accounting for assets and liabilities arising from contingencies acquired or assumed and, for acquisitions both prior and subsequent to December 31, 2008, requires the acquirer to recognize changes in the amount of its deferred tax benefits that are recognizable because of a business combination either in income from continuing operations in the period of the combination or directly in contributed capital, depending on the circumstances. The Company s adoption of this guidance effective January 1, 2009 did not have a material effect on the Company s consolidated financial position or results of operations, but may have an effect on the accounting for future business combinations.

In December 2007, the FASB issued SFAS No. 160, Noncontrolling Interests in Consolidated Financial Statements. SFAS No. 160 changes the accounting for minority interests, which will be recharacterized as noncontrolling interests and classified by the parent company as a component of equity. Upon adoption, SFAS No. 160 requires retroactive adoption of the presentation and disclosure requirements for existing minority interests and prospective adoption for all other requirements. The Company s adoption of this guidance effective January 1, 2009 did not have a material effect on the Company s consolidated financial position or results of operations, but did affect financial statement presentation and

disclosure. Noncontrolling interests, previously

## Notes to Unaudited Interim Consolidated Financial Statements (Continued)

reported as a liability, are now required to be reported as a separate component of equity on the balance sheet, and totaled \$341 million at March 31, 2008 and totaled \$351 million, \$409 million, \$329 million, \$110 million, and \$97 million at December 31, 2008, 2007, 2006, 2005 and 2004, respectively. In addition, income attributable to the noncontrolling interests, which was previously reported as an expense in General and administrative expenses and reflected within Income from Continuing Operations is now reported as a separate amount below Net Income, and totaled \$24 million for the three months ended March 31, 2008 and totaled \$36 million, \$67 million, \$25 million, \$21 million and \$13 million for the years ended December 31, 2008, 2007, 2006, 2005 and 2004, respectively.

## Recent Accounting Pronouncements

In April 2009, the FASB issued FSP FAS 107-1 and APB 28-1, Interim Disclosures about Fair Value of Financial Instruments. This FSP requires disclosures about fair value of financial instruments for interim reporting periods of publicly traded companies as well as in annual financial statements. This FSP also amends the disclosure requirements. This FSP is effective for interim reporting periods ending after June 15, 2009, with early adoption permitted. The Company will adopt this guidance beginning with the interim period ending June 30, 2009. The Company s adoption of this guidance is not expected to have a material effect on the Company s consolidated financial position or results of operations, but will affect interim disclosures.

## 3. ACQUISITIONS AND DISPOSITIONS

Acquisition of Hyundai Investment and Securities Co., Ltd.

In 2004, the Company acquired an 80 percent interest in Hyundai Investment and Securities Co., Ltd., a Korean asset management firm, from an agency of the Korean government, for \$301 million in cash, including \$210 million used to repay debt assumed. Subsequent to the acquisition, the company was renamed Prudential Investment & Securities Co., Ltd. On January 25, 2008, the Company acquired the remaining 20 percent for \$90 million.

## Additional Investment in UBI Pramerica

On January 18, 2008, the Company made an additional investment of \$154 million in its UBI Pramerica operating joint venture in Italy, which is accounted for under the equity method. This additional investment was necessary to maintain the Company s ownership interest at 35 percent and was a result of the merger of the Company s joint venture partner with another Italian bank, and the subsequent consolidation of their asset management companies into the UBI Pramerica joint venture.

# **Discontinued Operations**

Income (loss) from discontinued businesses, including charges upon disposition, are as follows:

	Three Months March 3	
	2009 (in million	2008 ns)
Equity sales, trading and research operations	\$ \$	(1)
Real estate investments sold or held for sale	2	1
International securities operations		1
Income from discontinued operations before income taxes	2	1
Income tax expense	1	
Income from discontinued operations, net of taxes	\$ 1 \$	1

The Company s Unaudited Interim Consolidated Statements of Financial Position include total assets and total liabilities related to discontinued businesses of \$65 million and \$19 million, respectively, as of March 31, 2009 and \$66 million and \$21 million, respectively, as of December 31, 2008. Charges recorded in connection with the disposals of businesses include estimates that are subject to subsequent adjustment. It is possible that such adjustments might be material to future net results of operations of a particular quarterly or annual period.

## 4. INVESTMENTS

# Fixed Maturities and Equity Securities

The following tables provide information relating to fixed maturities and equity securities (excluding investments classified as trading) as of the dates indicated:

			March 31, 2009

\$

(100)

As discussed in Note 2, a portion of certain other-than-temporary impairment ( OTTI ) losses on fixed maturity securities are recognized in Other comprehensive income (loss) ( OCI ). The net amount recognized in earnings ( credit loss impairments ) represents the difference between the amortized cost of the security and

## Notes to Unaudited Interim Consolidated Financial Statements (Continued)

the net present value of its projected future cash flows discounted at the effective interest rate implicit in the debt security prior to impairment. Any remaining difference between the fair value and amortized cost is recognized in OCI. The following table sets forth the amount of credit loss impairments on fixed maturity securities held by the Company as of the dates indicated, for which a portion of the OTTI loss was recognized in OCI, and the corresponding changes in such amounts.

Credit losses recognized in earnings on fixed maturity securities held by the Company for which a portion of the OTTI loss was recognized in OCI

#### Net Unrealized Investment Gains (Losses)

Net unrealized investment gains and losses on securities classified as available for sale and certain other long-term investments and other assets are included in the Consolidated Statements of Financial Position as a component of Accumulated other comprehensive income (loss), or AOCI. Changes in these amounts include reclassification adjustments to exclude from Other comprehensive income (loss) those items that are included as part of Net income for a period that had been part of Other comprehensive income (loss) in earlier periods. The amounts for the periods indicated below, split between amounts related to fixed maturity securities on which an OTTI loss has been recognized, and all other net unrealized investment gains and losses, are as follows:

Net Unrealized Investment Gains and Losses on Fixed Maturity Securities on which an OTTI loss has been recognized

	Net Unrealized Gains (Losses) On Investments	Deferred Policy Acquisition Costs and Valuation of Business Acquired	Future Policy Benefits	Policyholders Dividends (in millions)	Deferred Income Tax (Liability) Benefit	Accumulated Other Comprehensive Income (Loss) Related To Net Unrealized Investment Gains (Losses)

<sup>(1)</sup> Includes \$1,844 million of fair value and \$140 million of gross unrealized losses at March 31, 2009 on securities classified as held to maturity, which are not reflected in accumulated other comprehensive income.

(1) Includes \$926 million of fair value and \$133 million of gross unrealized losses at December 31, 2008 on securities classified as held to maturity, which are not reflected in accumulated other comprehensive income.

#### **Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

The gross unrealized losses at March 31, 2009 and December 31, 2008 are composed of \$12,331 million and \$12,863 million related to investment grade securities and \$4,832 million and \$3,752 million related to below investment grade securities, respectively. At March 31, 2009, \$11,997 million of the gross unrealized losses represented declines in value of greater than 20%, \$3,779 million of which had been in that position for less than six months, as compared to \$11,505 million at December 31, 2008 that represented declines in value of greater than 20%, \$10,509 million of which had been in that position for less than six months. At March 31, 2009, the \$10,763 million of gross unrealized losses of twelve months or more were concentrated in asset backed securities, and in the manufacturing, services and finance sectors of the Company s corporate securities. At December 31, 2008, the \$8,731 million of gross unrealized losses of twelve months or more were concentrated in asset backed securities, and in the manufacturing and utilities sectors of the Company s corporate securities. In accordance with its policy described in Note 2, the Company concluded that an adjustment to earnings for other-than-temporary impairments for these securities was not warranted at March 31, 2009 or December 31, 2008. These conclusions are based on a detailed analysis of the underlying credit and cashflows on each security. The gross unrealized losses are primarily attributable to credit spread widening and increased liquidity discounts. At March 31, 2009, the Company does not intend to sell the security and it is not more likely than not that the Company will be required to sell the security before the anticipated recovery of its remaining amortized cost basis.

#### Duration of Gross Unrealized Loss Positions for Equity Securities

The following tables show the fair value and gross unrealized losses aggregated by length of time that individual equity securities have been in a continuous unrealized loss position, as of the dates indicated:

		Less than twelve months			March 31, 2009 Twelve months or more			Total		
	Fair Value	-	ealized osses	Fair Value (in 1	_	ealized osses s)	Fair Value	_	realized Losses	
Equity securities, available for sale	\$ 2,809	\$	1,312	\$ 406	\$	123	\$ 3,215	\$	1,435	
		nan twe onths	elve	Decemb Twelve	,		1	Γotal		
	Fair Value		ealized osses	Fair Value (in 1	_	ealized osses s)	Fair Value	_	realized Losses	
Equity securities, available for sale	\$ 3,978	\$	1,419	\$ 263	\$	63	\$ 4,241	\$	1,482	

At March 31, 2009, \$1,270 million of the gross unrealized losses represented declines of greater than 20%, \$635 million of which had been in that position for less than six months. At December 31, 2008, \$1,227 million of the gross unrealized losses represented declines of greater than 20%, \$1,086 million of which had been in that position for less than six months. Securities with fair value of \$406 million and \$263 million and gross unrealized losses of \$123 million and \$63 million that have been in a continuous unrealized loss position for twelve months or more as of March 31, 2009 and December 31, 2008, respectively, represent perpetual preferred securities, which have characteristics of both debt and equity securities and to which an impairment model similar to the Company s fixed maturities is applied. In accordance with its policy described in Note 2, the Company concluded that an adjustment for other-than-temporary impairments for these securities was not warranted at March 31,

2009 or December 31, 2008.

#### **Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

#### Variable Interest Entities

In the normal course of its activities, the Company enters into relationships with various special purpose entities and other entities that are deemed to be variable interest entities (VIEs), in accordance with FIN No. 46(R), Consolidation of Variable Interest Entities. A VIE is an entity that either (1) has equity investors that lack certain essential characteristics of a controlling financial interest (including the ability to control the entity, the obligation to absorb the entity s expected losses and the right to receive the entity s expected residual returns) or (2) lacks sufficient equity to finance its own activities without financial support provided by other entities, which in turn would be expected to absorb at least some of the expected losses of the VIE. If the Company determines that it stands to absorb a majority of the VIE s expected losses or to receive a majority of the VIE s expected residual returns, the Company would be deemed to be the VIE s primary beneficiary and would be required to consolidate the VIE.

Consolidated Variable Interest Entities for which the Company is the Sponsor

The Company is the sponsor of certain asset-backed investment vehicles (commonly referred to as collateralized debt obligations, or CDOs ) and certain other vehicles for which the Company earns fee income for investment management services, including certain investment structures which the Company s asset management business invests with other co-investors in investment funds referred to as feeder funds. The Company sells or syndicates investments through these vehicles, principally as part of the proprietary investing activity of the Company s asset management businesses. Additionally, the Company may invest in debt or equity securities issued by these vehicles. CDOs raise capital by issuing debt securities, and use the proceeds to purchase investments, typically interest-bearing financial instruments. The Company analyzes these relationships to determine whether or not it absorbs the majority of expected losses or receives the majority of the expected residual returns, and thus is the primary beneficiary. This analysis includes a review of the Company s size and relative position in the capital structure and/or a review of cash flow projections driven by assumptions regarding the underlying collateral including default rate, recovery rate, deal call probability, reinvestment rates and fees and expenses. The Company has not provided material financial or other support that was not contractually required to any VIE for which it is the sponsor.

The Company has determined that it is the primary beneficiary of certain VIEs that it sponsors, including one CDO and certain other investment structures, as it absorbs a majority of the expected losses or receives the majority of the expected residual returns. These VIEs are consolidated and reflected in the table below. The table below reflects the carrying amount and balance sheet caption in which the assets of consolidated VIEs for which the Company is the sponsor are reported. The liabilities of consolidated VIEs for which the Company is the sponsor are included in Other liabilities and Separate account liabilities and are also reflected in the table below. The creditors of these VIEs do not have recourse to the Company in excess of the assets contained within the VIE.

	March 31, 2009		nber 31, 008
		(in millions)	
Fixed maturities, available for sale	\$ 25	\$	29

Total assets of consolidated VIEs	\$ 590	\$ 678
Total liabilities of consolidated VIEs	\$ 501	\$ 515

#### **Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

Unconsolidated Variable Interest Entities for which the Company is the Sponsor

The Company has also determined that it is not the primary beneficiary of certain VIEs that it sponsors, including certain CDOs and other investment structures, as it will not absorb a majority of the expected losses or receive the majority of the expected residual returns. The Company s maximum exposure to loss resulting from its relationship with unconsolidated VIEs it sponsors is limited to its investment in the VIEs, which was \$608 million and \$674 million at March 31, 2009 and December 31, 2008, respectively. These investments are reflected in Fixed maturities, available for sale and Other long-term investments. The fair value of assets held within these unconsolidated VIEs was \$6,022 million and \$5,916 million as of March 31, 2009 and December 31, 2008, respectively. There are no liabilities associated with these unconsolidated VIEs on the Company s balance sheet.

Consolidated Variable Interest Entities for which the Company is not the Sponsor

The Company is the primary beneficiary of certain VIEs in which the Company has invested, as part of its investment activities, but over which the Company does not exercise control and is not the sponsor. Included among these structured investments are structured investments issued by a VIE that manages yen-denominated investments coupled with cross-currency coupon swap agreements thereby creating synthetic dual currency investments. The Company is position in the capital structure and/or relative size indicates that the Company is the primary beneficiary. The Company has not provided material financial or other support that was not contractually required to these VIEs. The table below reflects the carrying amount and balance sheet caption in which the assets of consolidated VIEs for which the Company is not the sponsor are reported. The liabilities of consolidated VIEs for which the Company is not the sponsor are included in Other liabilities and are also reflected in the table below. These liabilities primarily comprise obligations under debt instruments issued by the VIEs that are non-recourse to the Company. The creditors of each consolidated VIE have recourse only to the assets of that VIE. As reflected in the table below, total assets of consolidated VIEs for which the Company is not a sponsor decreased from December 31, 2008 to March 31, 2009, reflecting the deconsolidation of a VIE that manages investments in the European market. The assets held by the VIE were distributed to the Company during March 2009.

	March 31, 2009	December 31, 2008
	(in ı	millions)
Fixed maturities, available for sale	\$ 108	\$ 124
Fixed maturities, held to maturity	929	1,012
Other trading account assets		404
Other long-term investments	40	43
Cash and cash equivalents	4	79
Accrued investment income	4	8
Other assets		55
Total assets of consolidated VIEs	\$ 1,085	\$ 1.725
Total assets of consolidated VIES	\$ 1,005	ψ 1,723
Total liabilities of consolidated VIEs	\$ 3	\$ 61

In addition, not reflected in the table above, the Company has created a trust that is a VIE, to facilitate Prudential Insurance s Funding Agreement Notes Issuance Program (FANIP). The trust issues medium-term notes secured by funding agreements issued to the trust by Prudential Insurance with the proceeds of such notes. The trust is the beneficiary of an indemnity agreement with the Company that provides that the Company is responsible for any and all costs related to the notes issued with limited exception. As a result, the Company has determined that it is the primary beneficiary of the trust, which is therefore consolidated.

#### **Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

The funding agreements represent an intercompany transaction that is eliminated upon consolidation. However, in recognition of the security interest in such funding agreements, the trust s medium-term note liability of \$6,511 million and \$7,130 million at March 31, 2009 and December 31, 2008, respectively, is classified on the Consolidated Statements of Financial Position within Policyholders account balances. Creditors of the trust do have recourse to the Company if the trust fails to make contractual payments on the medium-term notes. The Company has not provided material financial or other support that was not contractually required to the trust.

Significant Variable Interests in Unconsolidated Variable Interest Entities for which the Company is not the Sponsor

In addition, in the normal course of its activities, the Company will invest in structured investments including VIEs for which it is not the sponsor. These structured investments typically invest in fixed income investments and are managed by third parties and include asset-backed securities, commercial mortgage-backed securities and residential mortgage-backed securities. The Company s maximum exposure to loss on these structured investments, both VIEs and non-VIEs, is limited to the amount of its investment. The Company has not provided material financial or other support that was not contractually required to these structures. The Company has determined that it is not the primary beneficiary of these structures due to its relative size and position in the capital structure of these entities.

Included among these structured investments are asset-backed securities issued by VIEs that manage investments in the European market. In addition to a stated coupon, each investment provides a return based on the VIE s portfolio of assets and related investment activity. The market value of these VIEs was approximately \$7 billion and \$8 billion as of March 31, 2009 and December 31, 2008, respectively, and these VIEs were financed primarily through the issuance of notes similar to those purchased by the Company. The Company generally accounts for these investments as available for sale fixed maturities containing embedded derivatives that are bifurcated and marked-to-market through Realized investment gains (losses), net, based upon the change in value of the underlying portfolio. The Company s variable interest in each of these VIEs represents less than 50% of the only class of variable interests issued by the VIE. The Company s maximum exposure to loss from these interests was \$906 million and \$1,095 million at March 31, 2009 and December 31, 2008, respectively, which includes the fair value of the embedded derivatives.

### 5. CLOSED BLOCK

On the date of demutualization, Prudential Insurance established a Closed Block for certain individual life insurance policies and annuities issued by Prudential Insurance in the U.S. The recorded assets and liabilities were allocated to the Closed Block at their historical carrying amounts. The Closed Block forms the principal component of the Closed Block Business.

The policies included in the Closed Block are specified individual life insurance policies and individual annuity contracts that were in force on the effective date of the Plan of Reorganization and for which Prudential Insurance is currently paying or expects to pay experience-based policy dividends. Assets have been allocated to the Closed Block in an amount that has been determined to produce cash flows which, together with revenues from policies included in the Closed Block, are expected to be sufficient to support obligations and liabilities relating to these policies, including provision for payment of benefits, certain expenses, and taxes and to provide for continuation of the policyholder dividend scales in effect in 2000, assuming experience underlying such scales continues. To the extent that, over time, cash flows from the assets allocated to the Closed Block and claims and other experience related to the Closed Block are, in the aggregate, more or less favorable than what

#### **Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

was assumed when the Closed Block was established, total dividends paid to Closed Block policyholders in the future may be greater than or less than the total dividends that would have been paid to these policyholders if the policyholder dividend scales in effect in 2000 had been continued. Any cash flows in excess of amounts assumed will be available for distribution over time to Closed Block policyholders and will not be available to stockholders. If the Closed Block has insufficient funds to make guaranteed policy benefit payments, such payments will be made from assets outside of the Closed Block. The Closed Block will continue in effect as long as any policy in the Closed Block remains in force unless, with the consent of the New Jersey insurance regulator, it is terminated earlier.

The excess of Closed Block Liabilities over Closed Block Assets at the date of the demutualization (adjusted to eliminate the impact of related amounts in Accumulated other comprehensive income (loss) ) represented the estimated maximum future earnings at that date from the Closed Block expected to result from operations attributed to the Closed Block after income taxes. In establishing the Closed Block, the Company developed an actuarial calculation of the timing of such maximum future earnings. If actual cumulative earnings of the Closed Block from inception through the end of any given period are greater than the expected cumulative earnings, only the expected earnings will be recognized in income. Any excess of actual cumulative earnings over expected cumulative earnings will represent undistributed accumulated earnings attributable to policyholders, which are recorded as a policyholder dividend obligation. The policyholder dividend obligation represents amounts to be paid to Closed Block policyholders as an additional policyholder dividend unless otherwise offset by future Closed Block performance that is less favorable than originally expected. If the actual cumulative earnings of the Closed Block from its inception through the end of any given period are less than the expected cumulative earnings of the Closed Block, the Company will recognize only the actual earnings in income. However, the Company may reduce policyholder dividend scales in the future, which would be intended to increase future actual earnings until the actual cumulative earnings equaled the expected cumulative earnings. As of January 1, 2009, the Company recognized an adjusted policyholder dividend obligation of \$851 million, to Closed Block policyholders for the excess of actual cumulative earnings over the expected cumulative earnings, which reflects a cumulative adjustment of \$418 million related to the Company s adoption of FSP FAS 115-2 and FAS 124-2, Recognition and Presentation of Other-Than-Temporary Impairments effective January 1, 2009. See Note 2 for more information on the adoption of FSP FAS 115-2 and FAS 124-2. As of March 31, 2009, the excess of actual cumulative earnings over the expected cumulative earnings was \$299 million. However, due to the accumulation of net unrealized investment losses that have arisen subsequent to the establishment of the Closed Block, the policyholder dividend obligation balance as of March 31, 2009 and December 31, 2008 was reduced to zero through Accumulated other comprehensive income (loss). See the table below for changes in the components of the policyholder dividend obligation for the three months ended March 31, 2009.

- (2) See Note 2 for additional information on the adoption of FSP FAS 115-2 and FAS 124-2.

#### 7. EARNINGS PER SHARE

The Company has outstanding two separate classes of common stock. The Common Stock reflects the performance of the Financial Services Businesses and the Class B Stock reflects the performance of the Closed Block Business. Accordingly, earnings per share is calculated separately for each of these two classes of common stock.

Net income for the Financial Services Businesses and the Closed Block Business is determined in accordance with U.S. GAAP and includes general and administrative expenses charged to each of the respective businesses based on the Company s methodology for the allocation of such expenses. Cash flows between the

## Notes to Unaudited Interim Consolidated Financial Statements (Continued)

Financial Services Businesses and the Closed Block Business related to administrative expenses are determined by a policy servicing fee arrangement that is based upon insurance and policies in force and statutory cash premiums. To the extent reported administrative expenses vary from these cash flow amounts, the differences are recorded, on an after tax basis, as direct equity adjustments to the equity balances of the businesses.

The direct equity adjustments modify the earnings available to each of the classes of common stock for earnings per share purposes.

#### Common Stock

A reconciliation of the numerators and denominators of the basic and diluted per share computations is as follows:

		Three Months Ended Mar 2009			rch 31, 2008		
	Income	Weighted Average Shares (in millio		Income per share	Weighted Average Shares amounts)	S	Per hare nount
Basic earnings per share							
Income (loss) from continuing operations attributable to the Financial Services							
Businesses	\$ (17)			\$91			
Direct equity adjustment	11			12			
Less: Income (loss) attributable to noncontrolling interests	(11)			24			
Less: Earnings allocated to participating unvested share-based payment awards							
Income from continuing operations attributable to the Financial Services Businesses available to holders of Common Stock after direct equity adjustment	\$ 5	422.1	\$ 0.01	\$ 79	442.1	\$	0.18
Add: Earnings allocated to participating unvested share-based payment awards Basic	\$			\$			
Less: Earnings allocated to participating unvested share-based payment awards Diluted							
Effect of dilutive securities and compensation programs							
Stock options		0.1			3.9		
Deferred and long-term compensation programs		1.0			0.9		
Diluted earnings per share Income from continuing operations attributable to the Financial Services Businesses available to holders of Common Stock after direct equity adjustment	\$ 5	423.2	\$ 0.01	\$ 79	446.9	\$	0.18

Unvested share-based payment awards that contain nonforfeitable rights to dividends are participating securities and included in the computation of earnings per share pursuant to the two-class method. Under this method, earnings of the Financial Services Businesses attributable to Prudential Financial, Inc. are allocated between Common Stock and the participating awards, as if the awards were a second class of stock. Earnings allocated to participating unvested share-based payment awards for the three months ended March 31, 2009 and 2008 was based on 4.1 million and 2.8 million of such awards, respectively, weighted for the period they were

#### Notes to Unaudited Interim Consolidated Financial Statements (Continued)

outstanding. The computation of earnings per share of Common Stock excludes the dilutive impact of participating unvested share-based awards based on the application of the two-class method.

For the three months ended March 31, 2009 and 2008, 19.1 million and 4.1 million options, respectively, weighted for the portion of the period they were outstanding, with a weighted average exercise price of \$54.66 and \$83.44 per share, respectively were excluded from the computation of diluted earnings per share because the options, based on application of the treasury stock method, were antidilutive.

The Company s convertible senior notes provide for the Company to issue shares of its Common Stock as a component of the conversion of the notes. As of March 31, 2009, \$4 million of senior notes related to the \$2.0 billion December 2006 issuance remain outstanding. These will be dilutive to earnings per share if the average market price of the Common Stock for a particular period is above the initial conversion price of \$104.21. As of March 31, 2009, \$1.894 billion of senior notes related to the \$3.0 billion December 2007 issuance remain outstanding. These senior notes will be dilutive to earnings per share if the average market price of the Common Stock for a particular period is above the initial conversion price of \$132.39. See Note 8 for additional information regarding the convertible senior notes.

#### Class B Stock

Income (loss) from continuing operations per share of Class B Stock was \$4.00 and \$(10.00) for the three months ended March 31, 2009 and 2008, respectively.

The income (loss) from continuing operations attributable to the Closed Block Business available to holders of Class B Stock after direct equity adjustment for the three months ended March 31, 2009 and 2008 amounted to \$8 million and \$(20) million, respectively. The direct equity adjustment resulted in a decrease in the income (loss) from continuing operations attributable to the Closed Block Business applicable to holders of Class B Stock for earnings per share purposes of \$11 million and \$12 million for the three months ended March 31, 2009 and 2008, respectively. For the three months ended March 31, 2009 and 2008, the weighted average number of shares of Class B Stock used in the calculation of earnings per share amounted to 2.0 million. There are no potentially dilutive shares associated with the Class B Stock.

#### 8. SHORT-TERM AND LONG-TERM DEBT

## Commercial Paper

Prudential Financial has a commercial paper program rated A-1 by Standard & Poor s Rating Services (S&P), P-2 by Moody s Investor Service, Inc. (Moody s) and F2 by Fitch Ratings Ltd. (Fitch) as of March 31, 2009. Prudential Financial s outstanding commercial paper borrowings were \$734 million and \$1,243 million as of March 31, 2009 and December 31, 2008, respectively.

Prudential Funding, LLC, a wholly owned subsidiary of Prudential Insurance, has a commercial paper program, rated A-1+ by S&P, P-1 by Moody s and F1 by Fitch as of March 31, 2009. Prudential Funding s outstanding commercial paper and master note borrowings were \$2,573 million and \$4,354 million as of March 31, 2009 and December 31, 2008, respectively.

As of March 31, 2009 and December 31, 2008, the weighted average maturity of the total commercial paper outstanding was 24 and 29 days, respectively.

The outstanding commercial paper as of March 31, 2009 includes \$374 million and \$750 million under the Commercial Paper Funding Facility ( CPFF ) sponsored by the Federal Reserve Bank of New York related to

#### **Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

Prudential Financial s and Prudential Funding s commercial paper programs, respectively. On February 19, 2009, the commercial paper credit rating of Prudential Financial was downgraded by Fitch from F1 to F2. Consequently, as of that date, Prudential Financial was no longer eligible to issue commercial paper under the CPFF. As of April 30, 2009, there are no CPFF borrowings outstanding under either of the Company s commercial paper programs.

#### Convertible Senior Notes

On December 12, 2007, Prudential Financial issued in a private placement \$3.0 billion of floating rate convertible senior notes that are convertible by the holders at any time after issuance into cash and shares of Prudential Financial s Common Stock. The conversion price, \$132.39 per share, is subject to adjustment upon certain corporate events. The conversion feature requires net settlement in shares; therefore, upon conversion, a holder would receive cash up to the par amount of the convertible notes surrendered for conversion and shares of Prudential Financial Common Stock only for the portion of the settlement amount in excess of the par amount, if any. These notes are redeemable by Prudential Financial, at par plus accrued interest, on or after June 16, 2009. Holders of the notes may also require Prudential Financial to repurchase the notes, at par plus accrued interest, on contractually specified dates, of which the first such date is June 15, 2009. During the first quarter of 2009, the Company repurchased, in individually negotiated transactions, \$245 million of these notes which were offered to the Company by certain holders. These notes were repurchased at a discount resulting in a pre-tax gain of \$7 million that is recorded within Asset management fees and other income. As of March 31, 2009, \$1,894 million of these notes remain outstanding. In addition, as of March 31, 2009, \$4 million of floating rate convertible senior notes that were issued by Prudential Financial to repurchase these notes is December 2006 remain outstanding. The next date on which holders of these notes may require Prudential Financial to repurchase these notes is December 12, 2009.

#### Federal Home Loan Bank of New York

In June 2008, Prudential Insurance became a member of the Federal Home Loan Bank of New York (FHLBNY), which provides Prudential Insurance access to collateralized advances, collateralized funding agreements, and other FHLBNY products. Collateralized advances from the FHLBNY are classified in Short-term debt or Long-term debt, depending on the maturity date of the obligation. Collateralized funding agreements issued to the FHLBNY are classified in Policyholders account balances. These funding agreements have priority claim status above debt holders of Prudential Insurance.

Prudential Insurance s membership in FHLBNY requires the ownership of member stock, and borrowings from FHLBNY require the purchase of FHLBNY activity based stock in an amount equal to 4.5% of the outstanding borrowings. All FHLBNY stock purchased by Prudential Insurance is classified as restricted general account investments within Other long-term investments, and the carrying value of these investments was \$267 million as of March 31, 2009. Under guidance of the New Jersey Department of Banking and Insurance, the total amount of qualifying mortgage-related assets and U.S. Treasury securities that can be pledged as collateral by Prudential Insurance to FHLBNY is limited to 5% of the net admitted assets of Prudential Insurance on a statutory basis, exclusive of separate account assets, as of the prior year end, which equates to \$7.5 billion based on net admitted assets as of December 31, 2008. Based upon the existing guidance and on the fair value of qualifying assets owned by Prudential Insurance within the Financial Services Businesses as of March 31, 2009 (including assets on loan and assets pledged to the FHLBNY at that date and taking into account applicable required collateralization levels and required purchases of activity based FHLBNY stock), the estimated total borrowing capacity with the FHLBNY was approximately \$6.5 billion as of March 31, 2009. The fair value of the qualifying assets pledged as collateral by Prudential Insurance must be maintained at certain specified levels

#### Notes to Unaudited Interim Consolidated Financial Statements (Continued)

of the borrowed amount, which can vary, depending on the nature of the assets pledged. As of March 31, 2009, Prudential Insurance had pledged qualifying assets with a fair value of \$5,408 million, which is above the minimum level required by the FHLBNY, and had total outstanding borrowings of \$4.5 billion. The total borrowings from the FHLBNY as of March 31, 2009, is comprised of collateralized advances, of which \$1 billion is reflected in Short-term debt and \$2 billion is reflected in Long-term debt, as well as \$1.5 billion of collateralized funding agreements that are reflected in Policyholders account balances. Subsequent to March 31, 2009, \$1.0 billion of collateralized advances were repaid upon maturity.

Due to the rating downgrades experienced by Prudential Insurance during the first quarter of 2009, Prudential Insurance is currently only able to initiate new borrowings from the FHLBNY for a term of 90 days or less which can be refinanced on similar terms.

#### TALF Borrowings

During the first quarter of 2009, the Company purchased asset-backed securities under the Federal Reserve s Term Asset-Backed Securities Loan Facility (TALF). TALF provides secured financing for asset-backed securities backed by certain types of consumer and small business loans. TALF financing is non-recourse to the borrower, is collateralized by the purchased asset-backed securities and provides financing for the purchase price of the asset-backed securities, less a haircut that varies based on the type of collateral. Borrowers under the program can deliver the collateralized asset-backed securities to a special purpose vehicle created by Federal Reserve in full defeasance of the loan.

As of March 31, 2009, the Company has \$786 million of asset-backed securities purchased under TALF that are reflected within Other trading account assets, and has \$736 million of secured financing from the Federal Reserve related to the purchase of these securities that is reflected within Long-term debt. The Company is carrying the securities at fair value as SFAS No. 115 trading assets and the loan at fair value under the fair value option afforded by SFAS No. 159.

### 9. EMPLOYEE BENEFIT PLANS

The Company has funded and non-funded contributory and non-contributory defined benefit pension plans, which cover substantially all of its employees. For some employees, benefits are based on final average earnings and length of service, while benefits for other employees are based on an account balance that takes into consideration age, service and earnings during their career.

The Company provides certain health care and life insurance benefits for its retired employees, their beneficiaries and covered dependents ( other postretirement benefits ). The health care plan is contributory; the life insurance plan is non-contributory. Substantially all of the Company s U.S. employees may become eligible to receive other postretirement benefits if they retire after age 55 with at least 10 years of service or under certain circumstances after age 50 with at least 20 years of continuous service. The Company has elected to amortize its transition obligation for other postretirement benefits over 20 years.

### Notes to Unaudited Interim Consolidated Financial Statements (Continued)

Net periodic (benefit) cost included in General and administrative expenses includes the following components:

Three Months Ended March 31, Other Postretirement **Pension Benefits Benefits** 2009 2009 2008 (in millions) Components of net periodic (benefit) cost Service cost \$ 41 \$ 39 \$ 3 \$ 3 29 Interest cost 115 117 31 Expected return on plan assets (182)(180)(27)(40)Amortization of prior service cost 11 (3)(3)Amortization of actuarial (gain) loss, net 8 4 11 Special termination benefits 2 \$ (11) (7) \$ 13 (9)Net periodic (benefit) cost

#### 10. SEGMENT INFORMATION

### Segments

The Company has organized its principal operations into the Financial Services Businesses and the Closed Block Business. Within the Financial Services Businesses, the Company operates through three divisions, which together encompass seven reportable segments. The Company s real estate and relocation services business as well as businesses that are not sufficiently material to warrant separate disclosure and businesses to be divested, including the Company s investment in Wachovia Securities, are included in Corporate and Other operations within the Financial Services Businesses. Collectively, the businesses that comprise the three operating divisions and Corporate and Other are referred to as the Financial Services Businesses.

### Adjusted Operating Income

In managing the Financial Services Businesses, the Company analyzes the operating performance of each segment using adjusted operating income. Adjusted operating income does not equate to income (loss) from continuing operations before income taxes and equity in earnings of operating joint ventures or net income as determined in accordance with U.S. GAAP but is the measure of segment profit or loss used by the Company to evaluate segment performance and allocate resources, and consistent with SFAS No. 131, Disclosures about Segments of an Enterprise and Related Information, is the measure of segment performance presented below.

Adjusted operating income is calculated by adjusting each segment s income (loss) from continuing operations before income taxes and equity in earnings of operating joint ventures for the following items, which are described in greater detail below:

realized investment gains (losses), net, and related charges and adjustments;

net investment gains and losses on trading account assets supporting insurance liabilities and changes in experience-rated contractholder liabilities due to asset value changes;

the contribution to income/loss of divested businesses that have been or will be sold or exited but that did not qualify for discontinued operations accounting treatment under U.S. GAAP; and

equity in earnings of operating joint ventures and earnings attributable to noncontrolling interests.

### **Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

These items are important to an understanding of overall results of operations. Adjusted operating income is not a substitute for income determined in accordance with U.S. GAAP, and the Company's definition of adjusted operating income may differ from that used by other companies. However, the Company believes that the presentation of adjusted operating income as measured for management purposes enhances the understanding of results of operations by highlighting the results from ongoing operations and the underlying profitability factors of the Financial Services Businesses.

Realized investment gains (losses), net, and related charges and adjustments. Adjusted operating income excludes realized investment gains (losses), net, except as indicated below. A significant element of realized investment gains and losses are impairments and credit-related and interest rate-related gains and losses from sales of securities. Impairments and losses from sales of credit-impaired securities, the timing of which depends largely on market credit cycles, can vary considerably across periods. The timing of other sales that would result in gains or losses, such as interest rate-related gains or losses, is largely subject to the Company s discretion and influenced by market opportunities, as well as the Company s tax and capital profile. Trends in the underlying profitability of the Company s businesses can be more clearly identified without the fluctuating effects of these transactions.

Charges that relate to realized investment gains (losses), net, are also excluded from adjusted operating income. The related charges are associated with: policyholder dividends; amortization of deferred policy acquisition costs, valuation of business acquired (VOBA), unearned revenue reserves and deferred sales inducements; interest credited to policyholders account balances; reserves for future policy benefits; and payments associated with the market value adjustment features related to certain of the annuity products the Company sells. The related charges associated with policyholder dividends include a percentage of the net increase in the fair value of specified assets included in Gibraltar Life s reorganization plan that is required to be paid as a special dividend to Gibraltar Life policyholders. Deferred policy acquisition costs, VOBA, unearned revenue reserves and deferred sales inducements for certain products are amortized based on estimated gross profits, which include net realized investment gains and losses on the underlying invested assets. The related charge for these items represents the portion of this amortization associated with net realized investment gains and losses. The related charges for interest credited to policyholders account balances relate to certain group life policies that pass back certain realized investment gains and losses to the policyholder. The reserves for certain policies are adjusted when cash flows related to these policies are affected by net realized investment gains and losses, and the related charge for reserves for future policy benefits represents that adjustment. Certain of the Company s annuity products contain a market value adjustment feature that requires us to pay to the contractholder or entitles us to receive from the contractholder, upon surrender, a market value adjustment based on the crediting rates on the contract surrendered compared to crediting rates on newly issued contracts or based on an index rate at the time of purchase compared to an index rate at time of surrender, as applicable. These payments mitigate the net realized investment gains or losses incurred upon the disposition of the underlying invested assets. The related charge represents the payments or receipts associated with these market value adjustment features.

Adjustments to Realized investment gains (losses), net, for purposes of calculating adjusted operating income, include the following:

Gains and losses pertaining to derivative contracts that do not qualify for hedge accounting treatment, other than derivatives used in the Company's capacity as a broker or dealer, are included in Realized investment gains (losses), net. This includes mark-to-market adjustments of open contracts as well as periodic settlements. As discussed further below, adjusted operating income includes a portion of realized gains and losses pertaining to certain derivative contracts.

### **Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

Adjusted operating income of the International Insurance segment and International Investments segment, excluding the global commodities group, reflect the impact of an intercompany arrangement with Corporate and Other operations pursuant to which the segments non-U.S. dollar denominated earnings in all countries for a particular year, including its interim reporting periods, are translated at fixed currency exchange rates. The fixed rates are determined in connection with a currency hedging program designed to mitigate the risk that unfavorable rate changes will reduce the segments U.S. dollar equivalent earnings. Pursuant to this program, the Company s Corporate and Other operations execute forward currency contracts with third parties to sell the hedged currency in exchange for U.S. dollars at a specified exchange rate. The maturities of these contracts correspond with the future periods in which the identified non-U.S. dollar denominated earnings are expected to be generated. These contracts do not qualify for hedge accounting under U.S. GAAP and, as noted above, all resulting profits or losses from such contracts are included in Realized investment gains (losses), net. When the contracts are terminated in the same period that the expected earnings emerge, the resulting positive or negative cash flow effect is included in adjusted operating income (a net gain of \$5 million and \$1 million for the three months ended March 31, 2009 and 2008, respectively). As of March 31, 2009 and December 31, 2008, the fair value of open contracts used for this purpose was a net asset of \$110 million and a net asset of \$85 million, respectively.

The Company uses interest rate and currency swaps and other derivatives to manage interest and currency exchange rate exposures arising from mismatches between assets and liabilities, including duration mismatches. For the derivative contracts that do not qualify for hedge accounting treatment, mark-to-market adjustments of open contracts as well as periodic settlements are included in Realized investment gains (losses), net. However, the periodic swap settlements, as well as other derivative related yield adjustments, are included in adjusted operating income to reflect the after-hedge yield of the underlying instruments. In certain instances, when these derivative contracts are terminated or offset before their final maturity, the resulting realized gains or losses recorded within Realized investment gains (losses), net are recognized in adjusted operating income over periods that generally approximate the expected terms of the derivatives or underlying instruments in order to reflect the after-hedge yield of the underlying instruments. Adjusted operating income includes net gains of \$26 million and \$12 million for the three months ended March 31, 2009 and 2008, respectively, due to periodic settlements and yield adjustments of such contracts.

Certain products the Company sells are accounted for as freestanding derivatives or contain embedded derivatives. Changes in the fair value of these derivatives, along with any fees received or payments made relating to the derivative, are recorded in Realized investment gains (losses), net. These Realized investment gains (losses), net are included in adjusted operating income in the period in which the gain or loss is recorded. In addition, the changes in fair value of any associated derivative portfolio that is part of an economic hedging program related to the risk of these products (but which do not qualify for hedge accounting treatment under U.S. GAAP) are also included in adjusted operating income in the period in which the gains or losses on the derivative portfolio are recorded. Adjusted operating income includes net gains of \$1,345 million and net losses of \$43 million for the three months ended March 31, 2009 and 2008, respectively, related to these products and any associated derivative portfolio. Offsetting the net gain of \$1,345 million in the first quarter of 2009, is \$1,067 million of amortization from deferred policy acquisition and other costs, which are also included in adjusted operating income.

Adjustments are also made for the purposes of calculating adjusted operating income for the following items:

The Company conducts certain activities for which Realized investment gains (losses), net are a principal source of earnings for its businesses and therefore included in adjusted operating income, particularly within the Company s Asset Management segment. For example, Asset Management s proprietary investing business

### **Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

makes investments for sale or syndication to other investors or for placement or co-investment in the Company s managed funds and structured products. The Realized investment gains (losses), net associated with the sale of these proprietary investments, including related derivative results, are a principal activity for this business and included in adjusted operating income. In addition, the Realized investment gains (losses), net associated with loans originated by the Company s commercial mortgage operations, including related derivative results and retained mortgage servicing rights, are a principal activity for this business and included in adjusted operating income. Net realized investment losses of \$48 million and \$39 million for the three months ended March 31, 2009 and 2008, respectively, related to these and other businesses were included in adjusted operating income as an adjustment to Realized investment gains (losses), net.

The Company has certain investments in its general account portfolios that are classified as trading. These trading investments are carried at fair value and included in Other trading account assets, at fair value on the Company's statements of financial position. Realized and unrealized gains and losses for these investments are recorded in Asset management fees and other income, and interest and dividend income for these investments is recorded in Net investment income. Consistent with the exclusion of realized investment gains and losses with respect to other investments managed on a consistent basis, the net gains or losses on these investments, which is recorded within Asset management fees and other income, is excluded from adjusted operating income and is reflected as an adjustment to Realized investment gains (losses), net. In addition, the secured financing received from the Federal Reserve under TALF that is reflected within Long-term debt, is carried at fair value under the fair value option afforded by SFAS No. 159. The changes in the fair value of this debt, which is recorded within Asset management fees and other income, is also excluded from adjusted operating income and are reflected as an adjustment to Realized investment gains (losses), net. This is consistent with the securities purchased with the proceeds from this financing, which are carried at fair value and included in Other trading account assets, at fair value as discussed above. The net impact of these adjustments was net losses of \$40 million and net gains of \$3 million for the three months ended March 31, 2009 and 2008, respectively, of which \$40 million of gains for the three months ended March 31, 2009 were related to the change in fair value of the TALF debt.

The Company has certain assets and liabilities for which, under GAAP, the change in value due to changes in foreign currency exchange rates during the period is recorded in Asset management fees and other income. To the extent the foreign currency exposure on these assets and liabilities is economically hedged, the change in value included in Asset management fees and other income is excluded from adjusted operating income and is reflected as an adjustment to Realized investment gains (losses), net. These adjustments were a net gain of \$78 million and \$65 million for the three months ended March 31, 2009 and 2008, respectively.

Investment gains and losses on trading account assets supporting insurance liabilities and changes in experience-rated contractholder liabilities due to asset value changes. Certain products included in the Retirement and International Insurance segments, are experience-rated in that investment results associated with these products are expected to ultimately accrue to contractholders. The investments supporting these experience-rated products, excluding commercial mortgage and other loans, are classified as trading and are carried at fair value. These trading investments are reflected on the statements of financial position as Trading account assets supporting insurance liabilities, at fair value. Realized and unrealized gains and losses for these investments are reported in Asset management fees and other income. Interest and dividend income for these investments is reported in Net investment income. Commercial mortgage and other loans that support these experience-rated products are carried at unpaid principal, net of unamortized discounts and an allowance for losses, and are reflected on the statements of financial position as Commercial mortgage and other loans.

Adjusted operating income excludes net investment gains and losses on trading account assets supporting insurance liabilities. This is consistent with the exclusion of realized investment gains and losses with respect to

### **Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

other investments supporting insurance liabilities managed on a consistent basis. In addition, to be consistent with the historical treatment of charges related to realized investment gains and losses on investments, adjusted operating income also excludes the change in contractholder liabilities due to asset value changes in the pool of investments (including commercial mortgage and other loans) supporting these experience-rated contracts, which are reflected in Interest credited to policyholders account balances. The result of this approach is that adjusted operating income for these products includes net fee revenue and interest spread the Company earns on these experience-rated contracts, and excludes changes in fair value of the pool of investments, both realized and unrealized, that are expected to accrue to the contractholders.

Divested businesses. The contribution to income/loss of divested businesses that have been or will be sold or exited, but that did not qualify for discontinued operations accounting treatment under U.S. GAAP, are excluded from adjusted operating income as the results of divested businesses are not relevant to understanding the Company s ongoing operating results.

Equity in earnings of operating joint ventures and earnings attributable to noncontrolling interests. Equity in earnings of operating joint ventures, on a pre-tax basis, are included in adjusted operating income as these results are a principal source of earnings. These earnings are reflected on a U.S. GAAP basis on an after-tax basis as a separate line on the Company s Unaudited Interim Consolidated Statements of Operations.

Earnings attributable to noncontrolling interests are excluded from adjusted operating income. Earnings attributable to noncontrolling interests represents the portion of earnings from consolidated entities that relates to the equity interests of minority investors, and are reflected on a U.S. GAAP basis as a separate line on the Company s Unaudited Interim Consolidated Statements of Operations.

## Notes to Unaudited Interim Consolidated Financial Statements (Continued)

The summary below reconciles adjusted operating income before income taxes for the Financial Services Businesses to income from continuing operations before income taxes and equity in earnings of operating joint ventures:

### 11. FAIR VALUE OF ASSETS AND LIABILITIES

**Fair Value Measurement** Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. SFAS No. 157 establishes a framework for measuring fair value that includes a hierarchy used to classify the inputs used in measuring fair value. The hierarchy prioritizes the inputs to valuation techniques used to measure fair value into three levels. The level in the fair value hierarchy within which the fair value measurement falls is determined based on the lowest level input that is significant to the fair value measurement. The levels of the fair value hierarchy are as follows:

Level 1 Fair value is based on unadjusted quoted prices in active markets that are accessible to the Company for identical assets or liabilities. These generally provide the most reliable evidence and are used to measure fair value whenever available. Active markets are defined as having the following for the measured asset/liability: i) many transactions, ii) current prices, iii) price quotes not varying substantially among market makers, iv) narrow bid/ask spreads and v) most information publicly available. The Company s Level 1 assets and liabilities primarily include certain cash equivalents and short term investments, equity securities and derivative contracts that are traded in an active exchange market. Prices are obtained from readily available sources for market transactions involving identical assets or liabilities.

Level 2 Fair value is based on significant inputs, other than Level 1 inputs, that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the asset or liability through corroboration with observable market data. Level 2 inputs include quoted market prices in active markets for similar assets and liabilities, quoted market prices in markets that are not active for identical or similar assets or liabilities and other market observable inputs. The Company s Level 2 assets and liabilities include: fixed

### **Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

maturities (corporate public and private bonds, most government securities, certain asset-backed and mortgage-backed securities, etc.), certain equity securities and commercial mortgage loans, short-term investments and certain cash equivalents (primarily commercial paper), and certain over-the-counter derivatives. Valuations are generally obtained from third party pricing services for identical or comparable assets or liabilities or through the use of valuation methodologies using observable market inputs.

Prices from pricing services are sourced from multiple vendors, and a vendor hierarchy is maintained by asset type based on historical pricing experience and vendor expertise. The Company generally receives prices from multiple pricing services for each security, but ultimately use the price from the pricing service highest in the vendor hierarchy based on the respective asset type. In order to validate reasonability, prices are reviewed by internal asset managers through comparison with directly observed recent market trades and internal estimates of current fair value, developed using market observable inputs and economic indicators.

The use of valuation methodologies using observable inputs for private fixed maturities are primarily determined using a discounted cash flow model, which utilizes a discount rate based upon the average of spread surveys collected from private market intermediaries who are active in both primary and secondary transactions, and takes into account, among other factors, the credit quality and industry sector of the issuer and the reduced liquidity associated with private placements. Private fixed maturities also include debt investments in funds that, in addition to a stated coupon, pay a return based upon the results of the underlying portfolios. The fair values of these securities are determined by reference to the funds net asset value (NAV). Any restrictions on the ability to redeem interests in these funds at NAV are considered to have a de minimis effect on the fair value.

The fair values of common stock mutual fund shares that transact regularly (but do not trade in active markets because they are not publicly available) are based on transaction prices of identical fund shares and are classified within Level 2 in the fair value hierarchy. The fair values of preferred equity securities are based on prices obtained from independent pricing services and, in order to validate reasonability, are compared with directly observed recent market trades. Accordingly, these securities are generally classified within Level 2 in the fair value hierarchy.

The fair value of commercial loans held for investment and accounted for using the Fair Value Option, as discussed in Note 2, is determined based on the present value of the expected future cash flows discounted at the appropriate U.S. Treasury rate, adjusted for the current market spread for similar quality loans. The interest rate and market spread assumptions for similar quality loans are generally observable based upon market transactions.

The majority of the Company s derivative positions is traded in the over-the-counter (OTC) derivative market and is classified within Level 2 in the fair value hierarchy. OTC derivatives classified within Level 2 are valued using models generally accepted in the financial services industry that use actively quoted or observable market input values from external market data providers, non-binding broker-dealer quotations, third-party pricing vendors and/or recent trading activity. The fair values of most OTC derivatives, including forward rate agreements, interest rate and cross currency swaps, commodity swaps, commodity forward contracts, single name credit default swaps and to-be-announced forward contracts on highly rated mortgage-backed securities issued by U.S. government sponsored entities are determined using discounted cash flow models. The fair values of European style option contracts are determined using Black-Scholes option pricing models. These models key assumptions include the contractual terms of the respective contract, along with significant observable inputs, including interest rates, currency rates, credit spreads, yield curves, equity prices, index dividend yields, non-performance risk and volatility. OTC derivative contracts are executed under master netting agreements with counterparties with a Credit Support Annex, or CSA, which is a bilateral ratings-sensitive agreement that requires collateral postings at established credit threshold levels. These agreements protect the interests of the Company and its

counterparties, should either party suffer a credit rating deterioration. The vast majority of the

### **Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

Company s derivative agreements are with highly rated major international financial institutions. Consistent with the practice of major international financial institutions, the Company uses the credit spread embedded in the London Interbank Offered Rate (LIBOR) interest rate curve to reflect non-performance risk when determining the fair value of derivative assets and liabilities. The Company believes this credit spread is an appropriate estimate of the non-performance risk for derivative related assets and liabilities between highly rated institutions after consideration of the impacts of the collateral posting process. Most OTC derivative contracts have bid and ask prices that are actively quoted or can be readily obtained from external market data providers. The Company s policy is to use mid-market pricing in determining its best estimate of fair value.

Other long-term investments carried at fair value include limited partnerships which are consolidated because the Company is either deemed to exercise control or considered the primary beneficiary of a variable interest entity. These entities are considered investment companies and follow specialized industry accounting whereby their assets are carried at fair value. The investments held by these entities include various feeder fund investments in underlying master funds (whose underlying holdings generally include public fixed maturities and equity securities), as well as wholly-owned real estate held within other investment funds.

The fair value of the feeder fund investments in master funds are generally determined by reference to the investments in the underlying master funds. The fair value of investments in funds holding publicly traded equity securities are generally based on quoted prices in active markets for identical investments and are therefore reflected as Level 1. The fair value of investments in funds holding public fixed maturities are generally based on validated quotes from pricing services as described above, and are reflected in Level 2.

Level 3 Fair value is based on at least one or more significant unobservable inputs for the asset or liability. These inputs reflect the Company's assumptions about the assumptions market participants would use in pricing the asset or liability. The Company's Level 3 assets and liabilities primarily include: certain private fixed maturities and equity securities, certain manually priced public equity securities and fixed maturities, certain highly structured over-the-counter derivative contracts, certain commercial mortgage loans, certain consolidated real estate funds for which the Company is the general partner, and embedded derivatives resulting from certain products with guaranteed benefits. In circumstances where vendor pricing is not available, internally developed valuations or non-binding broker quotes are used to determine fair value.

Non-binding broker quotes are reviewed for reasonableness, based on the Company's understanding of the market. These estimates may use significant unobservable inputs, which reflect the Company's own assumptions about the inputs market participants would use in pricing the asset. Circumstances where observable market data is not available may include events such as market illiquidity and credit events related to the security. Under certain conditions, the Company may conclude the prices received from independent third party pricing services or brokers are not reasonable or reflective of market activity. In those instances, the Company may choose to over-ride the third-party pricing information or quotes received and apply internally developed values to the related assets or liabilities. In such cases, the valuations are generally classified as Level 3. As of March 31, 2009 such over-rides on a net basis resulted in lower pricing levels being used and in aggregate were not materially different from the prices received from the independent pricing services.

For certain private fixed maturities, including those that are distressed, the discounted cash flow model may also incorporate significant unobservable inputs, which reflect the Company s own assumptions about the inputs market participants would use in pricing the asset. Certain public fixed maturities and private fixed maturities priced internally are based on observable and unobservable inputs. Significant unobservable inputs used include: issue specific credit adjustments, material non-public financial information, management judgment, estimation of future earnings and cashflows, default rate assumptions, liquidity assumptions and non-binding quotes from market makers. These inputs are usually considered unobservable, as not all market participants will have access to this data.

### **Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

Estimated fair values for most privately traded equity securities are determined using valuation and discounted cash flow models that require a substantial level of judgment. In determining the fair value of certain privately traded equity securities the discounted cash flow model may also use unobservable inputs, which reflect the Company s assumptions about the inputs market participants would use in pricing the asset.

The fair value of loans held for sale and accounted for using the Fair Value Option discussed in Note 2 is determined utilizing pricing indicators from the whole loan market, which is considered the principal exit market for these loans. The Company has evaluated the valuation inputs used for these assets, including the terms of the loans, prevailing interest rates and credit risk, and deemed that the primary pricing inputs are unobservable.

The fair value of wholly-owned real estate held in consolidated investment funds is determined through an independent appraisal process. The appraisals generally utilize a discounted cash flow model, following an income approach that incorporates various assumptions including rental revenue, operating expenses and discount rates. These appraisals and the related assumptions are updated at least annually, and incorporate historical property experience and any observable market data, including any market transactions.

The fair values of the GMAB, GMWB and GMIWB liabilities are calculated as the present value of future expected benefit payments to customers less the present value of assessed rider fees attributable to the embedded derivative feature. Since there is no observable active market for the transfer of these obligations, the valuations are calculated using internally developed models with option pricing techniques. The models are based on a risk neutral valuation framework and incorporate premiums for risks inherent in valuation techniques, inputs, and the general uncertainty around the timing and amount of future cash flows. The determination of these risk premiums requires the use of management judgement. Under SFAS No. 157 the Company is also required to incorporate the Company s own risk of non-performance in the valuation of the embedded derivatives associated with the Company s optional living benefit features. Since insurance liabilities are senior to debt, the Company believes that reflecting the claims-paying ratings of the Company s insurance subsidiaries in the valuation of the liability appropriately takes into consideration the Company s own risk of non-performance. Historically, the expected cash flows were discounted using forward LIBOR interest rates, which were commonly viewed as being consistent with AA quality claims-paying ratings. However, in light of first quarter of 2009 developments, including rating agency downgrades to the claims-paying ratings of the Company s insurance subsidiaries, the Company determined that forward LIBOR interest rates were no longer indicative of the Company s claims-paying ability. Beginning in the first quarter of 2009, the adjustment for the Company s non-performance risk is determined taking into consideration publicly available information relating to the claims-paying ability of the Company s insurance subsidiaries, as indicated by the credit spreads associated with funding agreements issued by these subsidiaries. The Company adjusts these credit spreads to remove any liquidity risk premium. As a result, in the first quarter of 2009 the Company increased the discount rate used in the valuations of the embedded derivatives associated with the Company s optional living benefit features, reflecting the market perceived increase in the Company s non-performance risk, and thereby reduced the fair value of the embedded derivative liabilities. The increase in the discount rate over forward LIBOR rates generally ranged from 250 to 300 basis points for the portion of the interest rate curve most relevant to these liabilities.

Other significant inputs to the valuation models include capital market assumptions, such as interest rate and implied volatility assumptions, as well as various policyholder behavior assumptions that are actuarially determined, including lapse rates, benefit utilization rates, mortality rates and withdrawal rates. These assumptions are reviewed at least annually, and updated based upon historical experience and give consideration to any observable market data, including market transactions such as acquisitions and reinsurance transactions. In the first quarter of 2009 the Company further updated the volatility assumptions for the Individual Annuities segment to reflect the inclusion of new market inputs. The Company no longer solely utilizes the implied volatility of over-the-counter equity options but a blend of these implied volatilities and an index based on historical volatilities.

### **Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

Level 3 includes OTC derivatives where the bid-ask spreads are generally wider than derivatives classified within Level 2 thus requiring more judgment in estimating the mid-market price of such derivatives.

Derivatives that are valued based upon models with unobservable market input values or input values from less actively traded or less-developed markets are classified within Level 3 in the fair value hierarchy. Derivatives classified as Level 3 include first-to-default credit basket swaps, look-back equity options and other structured options. The fair values of first-to-default credit basket swaps are derived from relevant observable inputs such as: individual credit default spreads, interest rates, recovery rates and unobservable model-specific input values such as correlation between different credits within the same basket. Look-back equity options and other structured options and derivatives are valued using simulation models such as the Monte Carlo technique. The input values for look-back equity options are derived from observable market indices such as interest rates, dividend yields, equity indices as well as unobservable model-specific input values such as certain volatility parameters. Level 3 methodologies are validated through periodic comparison of the Company s fair values to broker-dealer s values.

Long-term debt carried at fair value includes funding received from the Federal Reserve Bank of New York on a non-recourse basis to finance the purchase of eligible asset-backed securities, under TALF. The Company values these liabilities using various inputs including the value of the collateral (eligible asset-backed securities), the value of similar non-TALF eligible collateral and various other market observable and non-observable inputs which incorporate significant management judgement. As a result, the pricing of the collateral assets ( other trading account assets ) and associated non-recourse liabilities have been classified within Level 3 in the Company s fair value hierarchy. See Note 8 for additional information regarding the Company s participation in TALF.

- (1) Other represents the impact of the deconsolidation of certain real estate funds.
- (2) Transfers into or out of Level 3 are generally reported as the value as of the beginning of the quarter in which the transfer occurs.
- (3) Unrealized gains or losses related to assets still held at the end of the period do not include amortization or accretion of premiums and discounts.
- (4) Separate account assets represent segregated funds that are invested for certain customers. Investment risks associated with market value changes are borne by the customers, except to the extent of minimum guarantees made by the Company with respect to certain accounts. Separate account liabilities are not included in the above table as they are reported at contract value and not fair value in the Company s Unaudited Interim Consolidated Statement of Financial Position.

Other-than-temporary impairments on Level 3 fixed maturity securities transferred to other comprehensive income were \$32 million for asset-backed securities and \$(11) million for corporate securities.

**Transfers** Transfers into Level 3 for fixed maturity available for sale corporate securities and asset-backed securities were primarily the result of unobservable inputs utilized within valuation methodologies and the use of broker quotes (that could not be validated) when previously, information from third party pricing services (that could be validated) was utilized. Partially offsetting these transfers into Level 3 were transfers out of Level 3 due to the use of observable inputs in valuation methodologies as well as the utilization of pricing service information for certain assets that the Company was able to validate. Transfers into Level 3 for trading account assets supporting insurance liabilities-corporate securities and asset-backed securities are due to the use of unobservable inputs within the valuation methodologies and broker quotes (that could not be validated), when previously information from third party pricing services (that could be validated) was utilized.

### Notes to Unaudited Interim Consolidated Financial Statements (Continued)

The following tables provide a summary of the changes in fair value of Level 3 assets and liabilities for the period January 1, 2008 to March 31, 2008, as well as the portion of gains or losses included in income attributable to unrealized gains or losses related to those assets and liabilities still held at March 31, 2008.

<sup>(1)</sup> Separate account assets represent segregated funds that are invested for certain customers. Investment risks associated with market value changes are borne by the customers, except to the extent of minimum guarantees made by the Company with respect to certain accounts. Separate account liabilities are not included in the above table as they are reported at contract value and not fair value in the Company s consolidated Statement of Financial Position.

Nonrecurring Fair Value Measurements Certain assets and liabilities are measured at fair value on a nonrecurring basis. As of March 31, 2009, the Company has written down certain commercial loans that are carried at the lower of cost or market, to their fair value of \$92 million. This resulted in charges of \$4 million for the three months ended March 31, 2009. The fair value measurements were classified as Level 3 in the valuation hierarchy. The inputs utilized for these valuations are pricing indicators from the whole loan market, which the Company considers its principal market for these loans. Losses of \$23 million were recorded for the three months ended March 31, 2008 for similar assets.

In addition, as of March 31, 2009, certain cost method investments had been written down to fair value of \$58 million, resulting in impairments of \$23 million for the three months ended March 31, 2009. The fair value adjustments were based on inputs classified as Level 3 in the valuation hierarchy. The inputs utilized were primarily discounted estimated future cash flows and valuations provided by the general partners taken into consideration with deal and management fee expenses. During the three months ended March 31, 2008 \$2 million of losses were recorded on certain equity method investments using inputs classified as Level 3 in the valuation hierarchy.

<sup>(2)</sup> Unrealized gains or losses related to assets still held at the end of the period do not include amortization or accretion of premiums and discounts.

### Notes to Unaudited Interim Consolidated Financial Statements (Continued)

**Fair Value Option** SFAS No. 159 provides a fair value option election that allows the Company to irrevocably elect fair value as the measurement attribute for certain financial assets and liabilities. The following table presents information regarding changes in fair values recorded in earnings, including gains or losses on sales, for commercial mortgage loans and long-term debt where the fair value option has been elected.

	Three Months Ended March 31, 2009	Three Months Ended March 31, 2008	
Acceptor	(In )	millions)	
Assets:			
Commercial Mortgage Loans:			
Changes in instrument-specific credit risk	\$ (19)	\$	(19)
Other changes in fair value	\$ (2)	\$	14
Liabilities:			
Long-term debt:			
Changes in fair value	\$ 40	\$	

Changes in fair value are reflected in Realized investment gains (losses), net for commercial mortgage loans and Asset management fees and other income for long-term debt. Changes in fair value due to instrument-specific credit risk are estimated based on changes in credit spreads and quality ratings for the period reported.

None of the commercial mortgage loans where the fair value option has been selected are more than 90 days past due or in non-accrual status. Interest income on commercial mortgage loans is included in net investment income. For the three months ended March 31, 2009 and 2008, the Company recorded \$9 million and \$11 million, respectively, of interest income on these loans. Interest income on these loans is recorded based on the effective interest rates as determined at the closing of the loan. The fair values and aggregate contractual principal amounts of commercial mortgage loans, for which the fair value option has been elected, were \$494 million and \$524 million, respectively, as of March 31, 2009.

The fair values and aggregate contractual principal amounts of long-term debt, for which the fair value option has been elected, were \$736 million and \$776 million, respectively, as of March 31, 2009.

### 12. INVESTMENT IN WACHOVIA SECURITIES

On July 1, 2003, the Company combined its retail securities brokerage and clearing operations with those of Wachovia Corporation (Wachovia and formed Wachovia Securities, a joint venture currently headquartered in St. Louis, Missouri. The transaction included the contribution of certain assets and liabilities of the Company s securities brokerage operations; however, the Company retained certain assets and liabilities related to the contributed operations, including liabilities for certain litigation and regulatory matters. The Company and Wachovia have each agreed to indemnify the other for certain losses, including losses resulting from litigation and regulatory matters relating to certain events arising from the operations of their respective contributed businesses prior to March 31, 2004. Reflecting the Company s intention to put its interest in the Wachovia Securities joint venture, as discussed below, the results of the joint venture are included in Corporate and Other operations as a divested business.

On October 1, 2007, Wachovia completed the acquisition of A.G. Edwards, Inc. ( A.G. Edwards ) and on January 1, 2008 contributed the retail securities brokerage business of A.G. Edwards to the joint venture. Wachovia s contribution of this business entitled the Company to elect a lookback option (which the Company elected) that permits the Company to delay for a period of two years ending on January 1, 2010, the decision on

### **Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

whether or not to make payments to avoid or limit dilution of its 38% ownership interest in the joint venture. During this lookback period, the Company s share in the earnings of the joint venture and one-time costs associated with the combination of the A.G. Edwards business with Wachovia Securities is based on the Company s diluted ownership level, which has not yet been determined. At the end of the lookback period, the Company may put its joint venture interests to Wachovia based on the appraised value of the joint venture excluding the A.G. Edwards business, as of January 1, 2008, the date of the combination of the A.G. Edwards business with Wachovia Securities. Based upon the existing agreements and the Company s estimates of the values of the A.G. Edwards business and the joint venture excluding the A.G. Edwards business, the Company adjusted the carrying value of its ownership interest in the joint venture effective as of January 1, 2008 to reflect the addition of the A.G. Edwards business and the dilution of the Company s 38% ownership interest and to record the value of the above described rights under the lookback option. The Company accordingly recognized a corresponding increase to Additional paid-in capital of \$1.041 billion, net of tax, which represented the excess of the estimated value of the Company s share of the A.G. Edwards business received (of approximately \$1.444 billion) and the estimated value of the lookback option acquired (of approximately \$580 million) over the carrying value of the portion of the Company s ownership interest in Wachovia Securities that was diluted (of approximately \$422 million), net of taxes (of approximately \$561 million). The Company s recorded share of pre-tax losses from the joint venture of \$20 million for the three months ended March 31, 2009 reflects its estimated diluted ownership level based upon the existing agreements and its estimates of the values of the A.G. Edwards business and the joint venture excluding the A.G. Edwards business. Establishment of definitive agreed or appraised values for the A.G. Edwards business and the joint venture excluding the A.G. Edwards business will result in an adjustment to the credit to equity and a true-up to the Company s earnings from the joint venture for any difference between the diluted ownership percentage used to record earnings for the three months ended March 31, 2009 and the finally determined diluted ownership percentage. The Company does not anticipate any such adjustment to have a material effect on its reported results of operations.

On October 3, 2008, Wachovia and Wells Fargo & Company (Wells Fargo) announced that they had entered into an Agreement and Plan of Merger, pursuant to which Wachovia would be merged into Wells Fargo, which would succeed to Wachovia s rights and obligations under the joint venture arrangements. As reported by Wells Fargo, this merger was completed on December 31, 2008. Wachovia Securities recently announced that it would begin using the Wells Fargo Advisors name.

On December 4, 2008, the Company announced its intention, assuming completion of the merger of Wachovia into Wells Fargo, to exercise its right under the lookback option to put its joint venture interests to Wells Fargo. Under the terms of the joint venture agreements, closing of the put transaction would occur on or about January 1, 2010. As indicated above, the results associated with the Company s joint venture interest have been classified as results of a divested business, reflecting the Company s intention to exit this business.

### 13. DERIVATIVE INSTRUMENTS

Types of Derivative Instruments and Derivative Strategies used in a non-dealer or broker capacity

Interest rate swaps are used by the Company to manage interest rate exposures arising from mismatches between assets and liabilities (including duration mismatches) and to hedge against changes in the value of assets it anticipates acquiring and other anticipated transactions and commitments. Swaps may be attributed to specific assets or liabilities or may be used on a portfolio basis. Under interest rate swaps, the Company agrees with other parties to exchange, at specified intervals, the difference between fixed rate and floating rate interest amounts calculated by reference to an agreed upon notional principal amount. Generally, no cash is exchanged at the outset of the contract and no principal payments are made by either party. These transactions are entered into pursuant to master agreements that provide for a single net

payment to be made by one counterparty at each due date.

### **Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

Exchange-traded futures and options are used by the Company to reduce risks from changes in interest rates, to alter mismatches between the duration of assets in a portfolio and the duration of liabilities supported by those assets, and to hedge against changes in the value of securities it owns or anticipates acquiring or selling. In exchange-traded futures transactions, the Company agrees to purchase or sell a specified number of contracts, the values of which are determined by the values of underlying referenced investments, and to post variation margin on a daily basis in an amount equal to the difference in the daily market values of those contracts. The Company enters into exchange-traded futures and options with regulated futures commission s merchants who are members of a trading exchange.

Currency derivatives, including exchange-traded currency futures and options, currency forwards and currency swaps, are used by the Company to reduce risks from changes in currency exchange rates with respect to investments denominated in foreign currencies that the Company either holds or intends to acquire or sell. The Company also uses currency forwards to hedge the currency risk associated with net investments in foreign operations and anticipated earnings of its foreign operations.

Under currency forwards, the Company agrees with other parties to deliver a specified amount of an identified currency at a specified future date. Typically, the price is agreed upon at the time of the contract and payment for such a contract is made at the specified future date. As noted above, the Company uses currency forwards to mitigate the risk that unfavorable changes in currency exchange rates will reduce U.S. dollar equivalent earnings generated by certain of its non-U.S. businesses, primarily its international insurance and investment operations. The Company executes forward sales of the hedged currency in exchange for U.S. dollars at a specified exchange rate. The maturities of these forwards correspond with the future periods in which the non-U.S. earnings are expected to be generated. These earnings hedges do not qualify for hedge accounting.

Under currency swaps, the Company agrees with other parties to exchange, at specified intervals, the difference between one currency and another at an exchange rate and calculated by reference to an agreed principal amount. Generally, the principal amount of each currency is exchanged at the beginning and termination of the currency swap by each party. These transactions are entered into pursuant to master agreements that provide for a single net payment to be made by one counterparty for payments made in the same currency at each due date.

Credit derivatives are used by the Company to enhance the return on the Company s investment portfolio by creating credit exposure similar to an investment in public fixed maturity cash instruments. With credit derivatives the Company sells credit protection on an identified name, or a basket of names in a first to default structure, and in return receives a quarterly premium. With single name credit default derivatives, this premium or credit spread generally corresponds to the difference between the yield on the referenced name s public fixed maturity cash instruments and swap rates, at the time the agreement is executed. With first to default baskets, the premium generally corresponds to a high proportion of the sum of the credit spreads of the names in the basket. If there is an event of default by the referenced name or one of the referenced names in a basket, as defined by the agreement, then the Company is obligated to pay the counterparty the referenced amount of the contract and receive in return the referenced defaulted security or similar security. See Note 14 for a discussion of guarantees related to these credit derivatives. In addition to selling credit protection, in limited instances the Company has purchased credit protection using credit derivatives in order to hedge specific credit exposures in the Company s investment portfolio.

The Company uses to be announced (TBA) forward contracts to gain exposure to the investment risk and return of mortgage-backed securities. TBA transactions can help the Company to achieve better diversification and to enhance the return on its investment portfolio. TBAs provide a more liquid and cost effective method of achieving these goals than purchasing or selling individual mortgage-backed pools. Typically, the price is agreed upon at the time of the contract and payment for such a contract is made at a specified future date.

# **Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

In its mortgage operations, the Company enters into commitments to fund commercial mortgage loans at specified interest rates and other applicable terms within specified periods of time. These commitments are legally binding agreements to extend credit to a counterparty. Loan commitments for loans that will be held for sale are recognized as derivatives and recorded at fair value. The determination of the fair value of loan commitments accounted for as derivatives considers various factors including, among others, terms of the related loan, the intended exit strategy for the loans based upon either a securitization valuation models or investor purchase commitments, prevailing interest rates, and origination income or expense. Loan commitments that relate to the origination of mortgage loans that will be held for investment are not accounted for as derivatives and accordingly are not recognized in the Company s financial statements. See Note 14 for a further discussion of these loan commitments.

The Company sells variable annuity products, which contain embedded derivatives. These embedded derivatives are marked to market through Realized investment gains (losses), net based on the change in value of the underlying contractual guarantees, which are determined using valuation models. The Company maintains a portfolio of derivative instruments that is intended to economically hedge the risks related to the above products features. The derivatives may include, but are not limited to equity options, total return swaps, interest rate swap options, caps, floors, and other instruments. In addition, some variable annuity products feature an automatic rebalancing element to minimize risks inherent in the Company s guarantees which reduces the need for hedges.

The Company invests in fixed maturities that, in addition to a stated coupon, provide a return based upon the results of an underlying portfolio of fixed income investments and related investment activity. The Company accounts for these investments as available for sale fixed maturities containing embedded derivatives. Such embedded derivatives are marked to market through Realized investment gains (losses), net, based upon the change in value of the underlying portfolio.

The table below provides a summary of the gross notional amount and fair value of derivatives contracts, excluding embedded derivatives which are recorded with the associated host, by the primary underlying. Many derivative instruments contain multiple underlyings.

	March 3 Notional Amount Ass			,	r Valu	e abilities

# Notes to Unaudited Interim Consolidated Financial Statements (Continued)

# Cash Flow, Fair Value and Net Investment Hedges

The primary derivative instruments used by the Company in its fair value, cash flow, and net investment hedge accounting relationships are interest rate swaps, currency swaps and currency forwards. These instruments are only designated for hedge accounting in instances where the appropriate criteria are met. The Company does not use futures, options, credit, equity or embedded derivatives in any of its fair value, cash flow or net investment hedge accounting relationships.

The following table provides the financial statement classification and impact of derivatives used in qualifying and non-qualifying hedge relationships, excluding the offset of the hedged item in an effective hedge relationship:

	Three M End March 3 (in mil	led 31, 2009

# Notes to Unaudited Interim Consolidated Financial Statements (Continued)

- (1) Amounts deferred in Stockholders Equity
- (2) Relates to the sale of an equity method investment

For the period ending March 31, 2009, the ineffective portion of derivatives accounted for using hedge accounting was not material to the Company s results of operations and there were no material amounts reclassified into earnings relating to instances in which the Company discontinued cash flow hedge accounting because the forecasted transaction did not occur by the anticipated date or within the additional time period permitted by SFAS No. 133. In addition, there were no instances in which the Company discontinued fair value hedge accounting due to a hedged firm commitment no longer qualifying as a fair value hedge.

Presented below is a roll forward of current period cash flow hedges in Accumulated other comprehensive income (loss) before taxes:

	(in n	nillions)
Balance, December 31, 2008	\$	(227)
Net deferred gains on cash flow hedges from January 1 to March 31, 2009		37
Amount reclassified into current period earnings		4
Balance, March 31, 2009	\$	(186)

As of March 31, 2009, the Company does not have any qualifying cash flow hedges of forecasted transactions other than those related to the variability of the payment or receipt of interest or foreign currency amounts on existing financial instruments. The maximum length of time for which these variable cash flows are hedged is 14 years. Income amounts deferred in Accumulated other comprehensive income (loss) as a result of cash flow hedges are included in Net unrealized investment gains (losses) in the Consolidated Statements of Stockholders Equity.

For effective net investment hedges, the amounts, before applicable taxes, recorded in the cumulative translation adjustment account within Accumulated other comprehensive income (loss) were gains of \$171 million in 2009.

# Credit Derivatives Written

The following tables set forth the Company s exposure from credit derivatives where the Company has written credit protection excluding credit protection written on the Company s own credit and embedded derivatives contained in European managed investments, by NAIC rating of the underlying credits as of March 31, 2009.

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

NAIC		March 31, 2009 Single Name First to Default Basket					tal

# Notes to Unaudited Interim Consolidated Financial Statements (Continued)

(1) First-to-default credit swap baskets, which may include credits of varying qualities, are grouped above based on the lowest credit in the basket. However, such basket swaps may entail greater credit risk than the rating level of the lowest credit.

The following table sets forth the composition of the Company s credit derivatives where the Company has written credit protection excluding credit protection written on the Company s own credit and embedded derivatives contained in European managed investments, by industry category as of the dates indicated.

	March	March 31, 2009					
Industry	Notional	Fair Value					
	(in m	illions)					
Corporate Securities:							
Manufacturing	\$ 45	\$	(1)				
Utilities	5						
Finance							
Services	28						
Energy	20						
Transportation	30						
Retail and Wholesale	30						
Other	195		(3)				
First to Default Baskets(1)	852		(194)				
Total Credit Derivatives	\$ 1,205	\$	(198)				

(1) Credit default baskets may include various industry categories.

The Company entered into a credit derivative that will require the Company to make certain payments in the event of deterioration in the value of the surplus notes issued by a subsidiary of Prudential Insurance. The notional of this credit derivative is \$500 million and the fair value as of March 31, 2009 was a liability of \$21 million, net of \$145 million in collateral that has been pledged.

The Company holds certain externally-managed investments in the European market which contain embedded derivatives whose fair value are primarily driven by changes in credit spreads. These investments are medium term notes that are collateralized by investment portfolios primarily consisting of investment grade European fixed income securities, including corporate bonds and asset-backed securities, and derivatives, as well as varying degrees of leverage. The notes have a stated coupon and provide a return based on the performance of the underlying portfolios and the level of leverage. The Company invests in these notes to earn a coupon through maturity, consistent with its investment purpose for other debt securities. The notes are accounted for under U.S. GAAP as available for sale fixed maturity securities with bifurcated embedded derivatives (total return swaps). Changes in the value of the fixed maturity securities are reported in Stockholders Equity under the heading Accumulated Other Comprehensive Income and changes in the market value of the embedded total return swaps are included in current period earnings in Realized investment gains (losses), net. The Company s maximum exposure to loss from these interests was \$906 million at March 31, 2009.

In addition to selling credit protection, the Company has purchased credit protection using credit derivatives in order to hedge specific credit exposures in the Company s investment portfolio. As of March 31, 2009 the Company had \$1.577 billion of outstanding notional amounts, reported at fair value as an asset of \$335 million.

# Notes to Unaudited Interim Consolidated Financial Statements (Continued)

# Types of Derivative Instruments and Derivative Strategies used in a broker/dealer capacity

Futures, forwards and options contracts, and swap agreements, are also used in a derivative dealer or broker capacity in the Company s commodities operations to facilitate transactions of the Company s clients, hedge proprietary trading activities and as a means of risk management. These derivatives allow the company to structure transactions to manage its exposure to commodities and securities prices, foreign exchange rates and interest rates. Risk exposures are managed through diversification, by controlling position sizes and by entering into offsetting positions. For example, the Company may manage the risk related to its precious metals inventory by entering into an offsetting position in exchange traded futures contracts.

The fair value of the Company s derivative contracts used in a derivative dealer or broker capacity is reported on a net-by-counterparty basis in the Company s consolidated statement of financial condition when management believes a legal right of setoff exists under an enforceable netting agreement.

Realized and unrealized gains and losses from marking-to-market the derivatives used in proprietary positions are recognized on a trade date basis and reported in Asset management fees and other income.

The following table sets forth the income statement impact of derivatives used in a broker/dealer capacity.

	Three Months End March 31, 2009 (in millions)	
Asset management fees and other income		
Interest Rate	\$	2
Credit		
Commodity		15
Currency		9
Equity		2
Total Asset management fees and other income	\$	28

## Credit Risk

The Company is exposed to credit-related losses in the event of non-performance by counterparties to financial derivative transactions. The Company manages credit risk by entering into derivative transactions with major international financial institutions and other creditworthy counterparties, and by obtaining collateral where appropriate. Additionally, limits are set on single party credit exposures which are subject to periodic management review.

The credit exposure of the Company s over-the-counter (OTC) derivative transactions is represented by the contracts with a positive fair value (market value) at the reporting date. To reduce credit exposures, the Company seeks to (i) enter into OTC derivative transactions pursuant to master agreements that provide for a netting of payments and receipts with a single counterparty (ii) enter into agreements that allow the use of credit support annexes (CSAs), which are bilateral rating-sensitive agreements that require collateral postings at established threshold levels. Likewise, the Company effects exchange-traded futures and options transactions through regulated exchanges and these transactions are settled on a daily basis, thereby reducing credit risk exposure in the event of non-performance by counterparties to such financial instruments.

The vast majority of the Company s OTC derivative agreements are with highly rated major international financial institutions. Consistent with the practice of major international financial institutions, the Company utilizes the credit spread embedded in the LIBOR curve to reflect non-performance risk when determining the

# **Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

fair value of OTC derivative assets and liabilities after consideration of the impacts of the collateral posting process discussed above. This credit spread is an appropriate estimate of the non-performance risk of the Company s OTC derivative related assets and liabilities.

Certain of the Company s derivative agreements with some of its counterparties contain credit-risk related triggers. If the Company s credit rating were to fall below a certain level, the counterparties to the derivative instruments could request termination at the then fair value of the derivative or demand immediate full collateralization on derivative instruments in net liability positions. If a downgrade occurred and the derivative positions were terminated, the Company anticipates it would be able to replace the derivative positions with other counterparties in the normal course of business. The aggregate fair value of all derivative instruments with credit-risk-related contingent features that are in a net liability position were \$337 million at March 31, 2009, for which the Company has posted collateral of \$259 million in the normal course of business. If the credit-risk-related contingent features underlying these agreements had been triggered on March 31, 2009, the Company estimates that it would be required to post a maximum of \$78 million of additional collateral to its counterparties.

# 14. CONTINGENT LIABILITIES AND LITIGATION AND REGULATORY MATTERS

## **Commitments and Guarantees**

In connection with the Company s commercial mortgage operations, it originates commercial mortgage loans. At March 31, 2009, the Company had outstanding commercial mortgage loan commitments with borrowers of \$2,699 million. In certain of these transactions, the Company prearranges that it will sell the loan to an investor, including to governmental sponsored entities as discussed below, after the Company funds the loan. At March 31, 2009, \$1,483 million of the Company s commitments to originate commercial mortgage loans are subject to such arrangements.

The Company also has other commitments, some of which are contingent upon events or circumstances not under the Company s control, including those at the discretion of the Company s counterparties. These other commitments amounted to \$9,376 million at March 31, 2009. Reflected in these other commitments are \$9,291 million of commitments to purchase or fund investments, including \$6,850 million that the Company anticipates will ultimately be funded from its separate accounts. Of these separate account commitments, \$2,737 million have recourse to Prudential Insurance if the separate accounts are unable to fund the amounts when due.

In the course of the Company s business, it provides certain guarantees and indemnities to third parties pursuant to which it may be contingently required to make payments now or in the future.

A number of guarantees provided by the Company relate to real estate investments held in its separate accounts, in which the separate account has borrowed funds, and the Company has guaranteed their obligation to their lender. The Company provides these guarantees to assist the separate account in obtaining financing for the transaction. The Company s maximum potential exposure under these guarantees was \$1,833 million at March 31, 2009, of which all but \$346 million is limited to the assets of the separate account for which exposure primarily relates to guarantees limited to fraud, criminal activity or other bad acts. These guarantees generally expire at various times over the next fifteen years. At

March 31, 2009, no amounts were accrued as a result of the Company s assessment that it is unlikely payments will be required. Any payments that may become required of the Company under these guarantees would either first be reduced by proceeds received by the creditor on a sale of the underlying collateral, or would provide the Company with rights to obtain the underlying collateral.

The Company has also provided a guarantee to a syndication of lenders in connection with a retail development project in Singapore that is 50% co-owned by the Company and an unconsolidated real estate fund managed by the Company. The principal provisions in the guarantee require that the loan-to-value ratio of the

# **Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

retail development project be maintained at 60% or lower, based on an external appraisal. A loan-to-value ratio in excess of 60% would require the Company and its co-owner to jointly and severally paydown the loan balance to the 60% level. The current loan-to-value ratio, based on a December 2008 appraisal, is 59.6%. Other obligations under the guarantee include guaranteeing the interest-servicing on the loan on a proportionate basis and undertaking to fund development cost overruns. The Company s exposure under the guarantee was \$162 million at March 31, 2009, which assumes the co-owner honors its joint guarantee.

As discussed in Note 13, the Company writes credit derivatives under which the Company is obligated to pay the counterparty the referenced amount of the contract and receive in return the defaulted security or similar security. The Company s maximum amount at risk under these credit derivatives, assuming the value of the underlying referenced securities become worthless, is \$1,205 million at March 31, 2009. These credit derivatives generally have maturities of five years or less.

Certain contracts underwritten by the Retirement segment include guarantees related to financial assets owned by the guaranteed party. These contracts are accounted for as derivatives, at fair value, in accordance with SFAS No. 133. At March 31, 2009, such contracts in force carried a total guaranteed value of \$5,790 million. These guarantees are supported by collateral that is not reflected on the Company s balance sheet. This collateral had a fair value of \$5,693 million at March 31, 2009.

The Company arranges for credit enhancements of certain debt instruments that provide financing for commercial real estate assets, including certain tax-exempt bond financings. The credit enhancements provide assurances to the debt holders as to the timely payment of amounts due under the debt instruments. At March 31, 2009, such enhancement arrangements total \$215 million, with remaining contractual maturities of up to 15 years. The Company s obligations to reimburse required payments are secured by mortgages on the related real estate, which properties are valued at \$269 million at March 31, 2009. The Company receives certain ongoing fees for providing these enhancement arrangements and anticipates the extinguishment of its obligation under these enhancements prior to maturity through the aggregation and transfer of its positions to a substitute enhancement provider. At March 31, 2009, the Company has accrued liabilities of \$1 million representing unearned fees on these arrangements.

As part of the commercial mortgage activities of the Company s Asset Management segment, the Company provides commercial mortgage origination, underwriting and servicing for certain government sponsored entities, such as Fannie Mae and Freddie Mac. The Company has agreed to indemnify the government sponsored entities for a portion of the credit risk associated with certain of the mortgages it services through a delegated authority arrangement. Under these arrangements, the Company originates multi-family mortgages for sale to the government sponsored entities based on underwriting standards they specify, and make payments to them for a specified percentage share of losses they incur on certain loans serviced by the Company. The Company s percentage share of losses incurred generally varies from 2% to 20% of the loan balance, and is typically based on a first-loss exposure for a stated percentage of the loan balance, plus a shared exposure with the government sponsored entity for any losses in excess of the stated first-loss percentage, subject to a contractually specified maximum percentage. The Company services \$6,857 million of mortgages subject to these loss-sharing arrangements as of March 31, 2009, all of which are collateralized by first priority liens on the underlying multi-family residential properties. As of March 31, 2009, these mortgages had an average debt service coverage ratio of 1.81 times and an average loan-to-value ratio of 61%. The maximum exposure to loss as of March 31, 2009, assuming no recovery on any of the underlying collateral, is \$932 million, with first-loss exposure of \$297 million. Over the three years ended December 31, 2008, the Company s total share of losses related to indemnifications that were settled was \$8 million, with no additional settlements in the first quarter of 2009. As of March 31, 2009, the Company has established a liability of \$17 million related to these indemnifications.

# **Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

In connection with certain acquisitions, the Company has agreed to pay additional consideration in future periods, contingent upon the attainment by the acquired entity of defined operating objectives. At March 31, 2009, maximum potential future consideration pursuant to such arrangements, to be resolved over the following five years, is \$130 million. Any such payments would result in increases in intangible assets, including goodwill.

The Company is also subject to other financial guarantees and indemnity arrangements. The Company has provided indemnities and guarantees related to acquisitions, dispositions, investments and other transactions that are triggered by, among other things, breaches of representations, warranties or covenants provided by the Company. These obligations are typically subject to various time limitations, defined by the contract or by operation of law, such as statutes of limitation. In some cases, the maximum potential obligation is subject to contractual limitations, while in other cases such limitations are not specified or applicable. Since certain of these obligations are not subject to limitations, it is not possible to determine the maximum potential amount due under these guarantees. At March 31, 2009, the Company has accrued liabilities of \$5 million associated with all other financial guarantees and indemnity arrangements, which does not include retained liabilities associated with sold businesses.

# **Contingent Liabilities**

On an ongoing basis, the Company s internal supervisory and control functions review the quality of sales, marketing and other customer interface procedures and practices and may recommend modifications or enhancements. From time to time, this review process identifies product administration, servicing or other errors, including errors relating to the timing or amount of payments or contract values due to customers. In such cases, if appropriate, the Company may offer customers remediation and may incur charges, including the cost of such remediation, administrative costs and regulatory fines.

# Litigation and Regulatory Matters

The Company is subject to legal and regulatory actions in the ordinary course of its businesses. Pending legal and regulatory actions include proceedings relating to aspects of the Company s businesses and operations that are specific to it and proceedings that are typical of the businesses in which it operates, including in both cases businesses that have either been divested or placed in wind-down status. Some of these proceedings have been brought on behalf of various alleged classes of complainants. In certain of these matters, the plaintiffs are seeking large and/or indeterminate amounts, including punitive or exemplary damages. The outcome of a litigation or regulatory matter, and the amount or range of potential loss at any particular time, is often inherently uncertain.

# **Individual Life and Group Insurance**

In November 2008, a purported nationwide class action, *Garcia v. Prudential Insurance Company of America*, was filed in the United States District Court for the District of New Jersey. The complaint, which is brought on behalf of beneficiaries of Prudential policies whose death benefits were placed in retained asset accounts, alleges that by investing the death benefits in these accounts, Prudential wrongfully delayed

payment and improperly retained undisclosed profits. It alleges claims of breach of the contract of insurance, breach of contract with regard to the retained asset accounts, breach of fiduciary duty and unjust enrichment, and seeks an accounting, disgorgement, injunctive relief, attorneys fees, and prejudgment and post-judgment interest. In March 2009, Prudential filed a motion to dismiss the complaint.

# **Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

From November 2002 to March 2005, eleven separate complaints were filed against the Company and the law firm of Leeds Morelli & Brown in New Jersey state court. The cases were consolidated for pre-trial proceedings in New Jersey Superior Court, Essex County and captioned *Lederman v. Prudential Financial, Inc., et al.* The complaints allege that an alternative dispute resolution agreement entered into among Prudential Insurance, over 350 claimants who are current and former Prudential Insurance employees, and Leeds Morelli & Brown (the law firm representing the claimants) was illegal and that Prudential Insurance conspired with Leeds Morelli & Brown to commit fraud, malpractice, breach of contract, and violate racketeering laws by advancing legal fees to the law firm with the purpose of limiting Prudential s liability to the claimants. In 2004, the Superior Court sealed these lawsuits and compelled them to arbitration. In May 2006, the Appellate Division reversed the trial court s decisions, held that the cases were improperly sealed, and should be heard in court rather than arbitrated. In March 2007, the court granted plaintiffs motion to amend the complaint to add over 200 additional plaintiffs and a claim under the New Jersey discrimination law but denied without prejudice plaintiffs motion for a joint trial on liability issues. In June 2007, Prudential Financial and Prudential Insurance moved to dismiss the complaint. In November 2007, the court granted the motion, in part, and dismissed the commercial bribery and conspiracy to commit malpractice claims, and denied the motion with respect to other claims. In January 2008, plaintiffs filed a demand pursuant to New Jersey law stating that they were seeking damages in the amount of \$6.5 billion.

The Company, along with a number of other insurance companies, received formal requests for information from the State of New York Attorney General s Office ( NYAG ), the Securities and Exchange Commission ( SEC ), the Connecticut Attorney General s Office, the Massachusetts Office of the Attorney General, the Department of Labor, the United States Attorney for the Southern District of California, the District Attorney of the County of San Diego, and various state insurance departments relating to payments to insurance intermediaries and certain other practices that may be viewed as anti-competitive. In December 2006, Prudential Insurance reached a resolution of the NYAG investigation. Under the terms of the settlement, Prudential Insurance paid a \$2.5 million penalty and established a \$16.5 million fund for policyholders, adopted business reforms and agreed, among other things, to continue to cooperate with the NYAG in any litigation, ongoing investigations or other proceedings. Prudential Insurance also settled the litigation brought by the California Department of Insurance and agreed to business reforms and disclosures as to group insurance contracts insuring customers or residents in California and to pay certain costs of investigation. In April 2008, Prudential Insurance reached a settlement of proceedings relating to payments to insurance intermediaries and certain other practices with the District Attorneys of San Diego, Los Angeles and Alameda counties. Pursuant to this settlement, Prudential Insurance paid \$350,000 in penalties and costs. These matters are also the subject of litigation brought by private plaintiffs, including purported class actions that have been consolidated in the multidistrict litigation in the United States District Court for the District of New Jersey, In re Employee Benefit Insurance Brokerage Antitrust Litigation. In August and September 2007, the court dismissed the anti-trust and RICO claims. In January and February 2008, the court dismissed the ERISA claims with prejudice and the state law claims without prejudice. Plaintiffs have appealed to the Third Circuit Court of Appeals.

In April 2005, the Company voluntarily commenced a review of the accounting for its reinsurance arrangements to confirm that it complied with applicable accounting rules. This review included an inventory and examination of current and past arrangements, including those relating to the Company s wind down and divested businesses and discontinued operations. Subsequent to commencing this voluntary review, the Company received a formal request from the Connecticut Attorney General for information regarding its participation in reinsurance transactions generally and a formal request from the SEC for information regarding certain reinsurance contracts entered into with a single counterparty since 1997 as well as specific contracts entered into with that counterparty in the years 1997 through 2002 relating to the Company s property and casualty insurance operations that were sold in 2003. In August 2008, the Company reached a resolution of this matter. The SEC s complaint, filed on August 6, 2008 in the United States District Court for the District of New Jersey, alleges,

# **Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

among other things, that the Company improperly accounted for the reinsurance contracts, resulting in overstatements of the Company s consolidated results for the years 2000, 2001 and 2002 in certain of the Company s reports filed with the SEC under the Exchange Act, in violation of the financial reporting, books-and-records and internal control provisions of the Exchange Act and related rules and regulations of the SEC thereunder. In connection with the settlement, the Company has consented to entry of a final judgment enjoining it from future violations of specified provisions of the Exchange Act and related rules and regulations of the SEC thereunder. The settlement, in which the Company neither admits nor denies the allegations in the complaint, resolves the SEC s investigations into these matters without the imposition of any monetary fine or penalty. The settlement documents include allegations that may result in litigation, adverse publicity and other potentially adverse impacts to the Company s businesses.

# **Retirement Solutions and Investment Management**

The Company s subsidiary, Prudential Annuities Life Assurance Corporation, formerly named American Skandia Life Assurance Corporation, has substantially completed a remediation program to correct errors in the administration of approximately 11,000 annuity contracts issued by that company. The owners of these contracts did not receive notification that the contracts were approaching or past their designated annuitization date or default annuitization date (both dates referred to as the contractual annuity date) and the contracts were not annuitized at their contractual annuity dates. Some of these contracts also were affected by data integrity errors resulting in incorrect contractual annuity dates. The lack of notice and data integrity errors, as reflected on the annuities administrative system, all occurred before the acquisition of the American Skandia entities by the Company. The remediation and administrative costs of the remediation program are subject to the indemnification provisions of the acquisition agreement pursuant to which the Company purchased the American Skandia entities in May 2003 from Skandia Insurance Company Ltd (publ) (Skandia).

In October 2007, Prudential Retirement Insurance and Annuity Co. ( PRIAC ) filed an action in the United States District Court for the Southern District of New York, Prudential Retirement Insurance & Annuity Co. v. State Street Global Advisors, in PRIAC s fiduciary capacity and on behalf of certain defined benefit and defined contribution plan clients of PRIAC, against an unaffiliated asset manager, State Street Global Advisors ( SSgA ) and SSgA s affiliate, State Street Bank and Trust Company ( State Street ). This action seeks, among other relief, restitution of certain losses attributable to certain investment funds sold by SSgA as to which PRIAC believes SSgA employed investment strategies and practices that were misrepresented by SSgA and failed to exercise the standard of care of a prudent investment manager. PRIAC also intends to vigorously pursue any other available remedies against SSgA and State Street in respect of this matter. Given the unusual circumstances surrounding the management of these SSgA funds and in order to protect the interests of the affected plans and their participants while PRIAC pursues these remedies, PRIAC implemented a process under which affected plan clients that authorized PRIAC to proceed on their behalf have received payments from funds provided by PRIAC for the losses referred to above. The Company s consolidated financial statements, and the results of the Retirement segment included in the Company s Investment Division, for the year ended December 31, 2007 include a pre-tax charge of \$82 million, reflecting these payments to plan clients and certain related costs. In September 2008, the United States District Court for the Southern District of New York denied the State Street defendants motion to dismiss claims for damages and other relief under Section 502(a)(2) of ERISA, but dismissed the claims for equitable relief under Section 502(a)(3) of ERISA. In October 2008, defendants answered the complaint and asserted counterclaims for contribution and indemnification, defamation and violations of Massachusetts unfair and deceptive trade practices law.

Notes to Unaudited Interim Consolidated Financial Statements (Continued)

# Securities

Prudential Securities has been named as a defendant in a number of industry-wide purported class actions in the United States District Court for the Southern District of New York relating to its former securities underwriting business. Plaintiffs in one consolidated proceeding, captioned *In re: Initial Public Offering Securities Litigation*, allege, among other things, that the underwriters engaged in a scheme involving tying agreements, undisclosed compensation arrangements and research analyst conflicts to manipulate and inflate the prices of shares sold in initial public offerings in violation of the federal securities laws. Certain issuers of these securities and their current and former officers and directors have also been named as defendants. In October 2004, the district court granted plaintiffs motion for class certification in six focus cases. In December 2006, the United States Court of Appeals for the Second Circuit vacated that decision and remanded the case to the district court for further proceeding. In August 2000, Prudential Securities was named as a defendant, along with other underwriters, in a purported class action, captioned *CHS Electronics Inc. v. Credit Suisse First Boston Corp. et al.*, which alleges on behalf of issuers of securities in initial public offerings that the defendants conspired to fix at 7% the discount that underwriting syndicates receive from issuers in violation of federal antitrust laws. Plaintiffs moved for class certification in September 2004 and for partial summary judgment in November 2005. In April 2006, the district court denied class certification. In September 2007, the Second Circuit Court of Appeals reversed the district court s decision denying class certification and remanded the cases to the district court for further proceedings. In a related action, captioned *Gillet v. Goldman Sachs et al.*, plaintiffs allege substantially the same antitrust claims on behalf of investors, though only injunctive relief is currently being sought. In June 2008, *CHS El* 

# **Other Matters**

Mutual Fund Market Timing Practices

In August 2006, Prudential Equity Group, LLC ( PEG ), a wholly owned subsidiary of the Company, reached a resolution of the previously disclosed regulatory and criminal investigations into deceptive market related activities involving PEG s former Prudential Securities operations. The settlements relate to conduct that generally occurred between 1999 and 2003 involving certain former Prudential Securities brokers in Boston and certain other branch offices in the U.S., their supervisors, and other members of the Prudential Securities control structure with responsibilities that related to the market timing activities, including certain former members of Prudential Securities senior management. The Prudential Securities operations were contributed to a joint venture with Wachovia Corporation in July 2003, but PEG retained liability for the market timing related activities. In connection with the resolution of the investigations, PEG entered into separate settlements with each of the United States Attorney for the District of Massachusetts ( USAO ), the Secretary of the Commonwealth of Massachusetts, Securities Division, SEC, the National Association of Securities Dealers, the New York Stock Exchange, the New Jersey Bureau of Securities and the NYAG. These settlements resolve the investigations by the above named authorities into these matters as to all Prudential entities without further regulatory proceedings or filing of charges so long as the terms of the settlement are followed and provided, in the case of the settlement agreement reached with the USAO, that the USAO has reserved the right to prosecute PEG if there is a material breach by PEG of that agreement during its five year term and in certain other specified events. Under the terms of the settlements, PEG paid \$270 million into a Fair Fund administered by the SEC to compensate those harmed by the market timing activities. In addition, \$330 million was paid in fines and penalties. Pursuant to the settlements, PEG retained, at PEG s ongoing cost and expense, the services of an Independent Distribution Consultant acceptable to certain of the authorities to develop a proposed distribution plan for the distribution of Fair Fund amounts according to a methodology developed in consultation with and acceptable to certain of the authorities. In addition, as part of the settlements, PEG agreed, among other things, to continue to cooperate with

# **Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

the above named authorities in any litigation, ongoing investigations or other proceedings relating to or arising from their investigations into these matters. In connection with the settlements, the Company agreed with the USAO, among other things, to cooperate with the USAO and to maintain and periodically report on the effectiveness of its compliance procedures. The settlement documents include findings and admissions that may adversely affect existing litigation or cause additional litigation and result in adverse publicity and other potentially adverse impacts to the Company s businesses.

In addition to the regulatory proceedings described above that were settled in 2006, in October 2004, the Company and Prudential Securities were named as defendants in several class actions brought on behalf of purchasers and holders of shares in a number of mutual fund complexes. The actions are consolidated as part of a multi-district proceeding, *In re: Mutual Fund Investment Litigation*, pending in the United States District Court for the District of Maryland. The complaints allege that the purchasers and holders were harmed by dilution of the funds—values and excessive fees, caused by market timing and late trading, and seek unspecified damages. In August 2005, the Company was dismissed from several of the actions, without prejudice to repleading the state claims, but remains a defendant in other actions in the consolidated proceeding. In July 2006, in one of the consolidated mutual fund actions, *Saunders v. Putnam American Government Income Fund, et al.*, the United States District Court for the District of Maryland granted plaintiffs leave to refile their federal securities law claims against Prudential Securities. In August 2006, the second amended complaint was filed alleging federal securities law claims on behalf of a purported nationwide class of mutual fund investors seeking compensatory and punitive damages in unspecified amounts. In June 2008, the Company was dismissed with prejudice from the remaining actions consolidated in *In re: Mutual Fund Investment Litigation* other than *Saunders v. Putnam American Government Income Fund, et al.* In July 2008, the Company moved for summary judgment and plaintiffs moved for class certification in *Saunders*.

Commencing in 2003, the Company received formal requests for information from the SEC and NYAG relating to market timing in variable annuities by certain American Skandia entities. In connection with these investigations, with the approval of Skandia, an offer was made by American Skandia to the SEC and NYAG, to settle these matters by paying restitution and a civil penalty of \$95 million in the aggregate. In April 2009, AST Investment Services, Inc., formerly named American Skandia Investment Services, Inc. ( ASISI ), reached a resolution of these investigations by the SEC and NYAG into market timing related misconduct involving certain variable annuities. The settlements relate to conduct that generally occurred between January 1998 and September 2003. The Company acquired ASISI from Skandia in May 2003. Subsequent to the acquisition, the Company implemented controls, procedures and measures designed to protect customers from the types of activities involved in these investigations. These settlements resolve the investigations by the above named authorities into these matters, subject to the settlement terms. Under the terms of the settlements, ASISI has paid a total of \$34 million in disgorgement and an additional \$34 million as a civil money penalty. These amounts will be paid into a Fair Fund administered by the SEC to compensate those harmed by the market timing related activities. In the settlements, ASISI has agreed to retain, at its ongoing cost and expense, the services of an Independent Distribution Consultant acceptable to the Staff of the SEC to develop a proposed distribution plan for the distribution of Fair Fund amounts according to a methodology developed in consultation with and acceptable to the Staff. As part of these settlements, ASISI has undertaken that by the end of 2009 it will undergo a compliance review by an independent third party, who shall issue a report of its findings and recommendations to ASISI s Board of Directors, the Audit Committee of the Advanced Series Trust Board of Trustees and the Staff of the SEC. In addition, ASISI has agreed, among other things, to continue to cooperate with the SEC and NYAG in any litigation, ongoing investigations or other proceedings relating to or arising from their investigations into these matters. Under the terms of the purchase agreement pursuant to which the Company acquired ASISI from Skandia, the Company was indemnified for the costs of the settlements.

**Notes to Unaudited Interim Consolidated Financial Statements (Continued)** 

Corporate

In April 2009, the Company s Board of Directors (the Board ) received a letter demanding that the Board take action to recover allegedly improperly paid compensation to certain current and former employees and executive officers of the Company since at least 2005. The demand is made by a Prudential Financial stockholder, Service Employees International Union Pension Plans Master Trust (SEIU), and is one of many that SEIU has sent to large corporations. SEIU claims that the Company must bring an action, under theories of unjust enrichment and corporate waste, to recoup incentive compensation that was based on allegedly flawed economic metrics. SEIU also seeks rescission of exercised stock options because the options were based on mistaken facts concerning the fair value of the Company s stock. The letter states that between 2005 and 2008 the Company paid cash and equity compensation of approximately \$165 million to its senior executives and authorized senior executives to exercise stock options worth approximately \$66 million. The letter also demands that the Board enjoin any further approved, but unpaid, compensation payments, overhaul the Company s compensation structure, and allow stockholders an advisory vote on the Compensation Committee s report in the Company s annual proxy statement. SEUI reserves the right to bring a derivative action should the Board decline to act. The Board has taken the letter under advisement.

In March 2009, a purported class action, *Bauer v. Prudential Financial, et al.*, was filed in the United States District Court for the District of New Jersey. The case names as defendants, the Company, certain Company Directors, the Chief Financial Officer, Controller and former Chief Executive Officer and former Principal Accounting Officer, underwriters and the Company s independent auditors. The complaint, brought on behalf of purchasers of the Company s 9% Junior Subordinated Notes (retail hybrid subordinated debt), alleges that the Company s March 2006 Form S-3 Registration Statement and Prospectus and the June 2008 Prospectus Supplement, both of which incorporated other public filings, contained material misstatements or omissions. In light of the Company s disclosures in connection with its 2008 financial results, plaintiffs contend that the earlier offering documents failed to disclose impairments in the Company s asset-backed securities collateralized with subprime mortgages and goodwill associated with certain subsidiaries and other assets, and that the Company had inadequate controls relating to such reporting. The complaint asserts violations of the Securities Act of 1933, alleging Section 11 claims against all defendants, Section 12(a)(2) claims against the Company and underwriters and Section 15 claims against the individual defendants, and seeks unspecified compensatory and recessionary damages, interest, costs, fees, expenses and such injunctive relief as may be deemed appropriate by the court. In April 2009, two additional purported class action complaints were filed in the same court, *Haddock v. Prudential Financial, Inc. et al.* and *Pinchuk v. Prudential Financial, Inc. et al.* The complaints essentially allege the same claims and seek the same relief as *Bauer*.

Other

In September and October 2005, five purported class action lawsuits were filed against the Company, Prudential Securities and PEG claiming that stockbrokers were improperly classified as exempt employees under state and federal wage and hour laws, were improperly denied overtime pay and that improper deductions were made from the stockbrokers wages. Two of the stockbrokers complaints, *Janowsky v. Wachovia Securities, LLC* and *Prudential Securities Incorporated and Goldstein v. Prudential Financial, Inc.*, were filed in the United States District Court for the Southern District of New York. The *Goldstein* complaint purports to have been filed on behalf of a nationwide class. The *Janowsky* complaint alleges a class of New York brokers. Motions to dismiss and compel arbitration were filed in the *Janowsky and Goldstein* matters, which have been consolidated for pre-trial purposes. The three stockbrokers complaints filed in California Superior Court, *Dewane v. Prudential Equity Group, Prudential Securities Incorporated, and Wachovia Securities LLC; DiLustro v. Prudential Securities Incorporated, Prudential Equity Group Inc. and Wachovia Securities;* and Carayanis v. Prudential Equity Group LLC and Prudential Securities Inc., purport to have been brought on behalf of classes

# **Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

of California brokers. The Carayanis complaint was subsequently withdrawn without prejudice in May 2006. In June 2006, a purported New York state class action complaint was filed in the United States District Court for the Eastern District of New York, Panesenko v. Wachovia Securities, et al., alleging that the Company failed to pay overtime to stockbrokers in violation of state and federal law and that improper deductions were made from the stockbrokers wages in violation of state law. In September 2006, Prudential Securities was sued in Badain v. Wachovia Securities, et al., a purported nationwide class action filed in the United States District Court for the Western District of New York. The complaint alleges that Prudential Securities failed to pay overtime to stockbrokers in violation of state and federal law and that improper deductions were made from the stockbrokers wages in violation of state law. In December 2006, these cases were transferred to the United States District Court for the Central District of California by the Judicial Panel on Multidistrict Litigation for coordinated or consolidated pre-trial proceedings. In October 2006, a class action lawsuit, Bouder v. Prudential Financial, Inc. and Prudential Insurance Company of America, was filed in the United States District Court for the District of New Jersey, claiming that the Prudential Insurance failed to pay overtime to insurance agents who were registered representatives in violation of federal and Pennsylvania law, and that improper deductions were made from these agents wages in violation of state law. The complaint seeks back overtime pay and statutory damages, recovery of improper deductions, interest, and attorneys fees. In March 2008, the court conditionally certified a nationwide class. In March 2008, a purported nationwide class action lawsuit was filed in the United States District Court for the Southern District of California, Wang v. Prudential Financial, Inc. and Prudential Insurance, on behalf of agents who sold the Company s financial products. The complaint alleges claims that the Company failed to pay overtime and provide other benefits in violation of California and federal law and seeks compensatory and punitive damages in unspecified amounts. In September 2008, Wang was transferred to the United States District Court for the District of New Jersey and consolidated with the Bouder matter. In January 2009, an amended complaint was filed in the consolidated matter which adds wage claims based on the laws of thirteen additional states. In March 2009, a second amended complaint was filed which dropped the breach of contract claims. The Company moved to dismiss certain of the state claims in the consolidated complaint.

# Summary

The Company s litigation and regulatory matters are subject to many uncertainties, and given their complexity and scope, their outcome cannot be predicted. It is possible that the Company s results of operations or cash flow in a particular quarterly or annual period could be materially affected by an ultimate unfavorable resolution of pending litigation and regulatory matters depending, in part, upon the results of operations or cash flow for such period. In light of the unpredictability of the Company s litigation and regulatory matters, it is also possible that in certain cases an ultimate unfavorable resolution of one or more pending litigation or regulatory matters could have a material adverse effect on the Company s financial position. Management believes, however, that, based on information currently known to it, the ultimate outcome of all pending litigation and regulatory matters, after consideration of applicable reserves and rights to indemnification, is not likely to have a material adverse effect on the Company s financial position.

See Notes to Unaudited Interim Supplemental Combining Financial Information

# Notes to Unaudited Interim Supplemental Combining Financial Information

#### 1. BASIS OF PRESENTATION

The supplemental combining financial information presents the consolidated financial position and results of operations for Prudential Financial, Inc. and its subsidiaries (together, the Company), separately reporting the Financial Services Businesses and the Closed Block Business. The Financial Services Businesses and the Closed Block Business are both fully integrated operations of the Company and are not separate legal entities. The supplemental combining financial information presents the results of the Financial Services Businesses and the Closed Block Business as if they were separate reporting entities and should be read in conjunction with the Consolidated Financial Statements.

The Company has outstanding two classes of common stock. The Common Stock reflects the performance of the Financial Services Businesses and the Class B Stock reflects the performance of the Closed Block Business.

The Closed Block Business was established on the date of demutualization and includes the assets and liabilities of the Closed Block (see Note 5 to the Unaudited Interim Consolidated Financial Statements for a description of the Closed Block). It also includes assets held outside the Closed Block necessary to meet insurance regulatory capital requirements related to products included within the Closed Block; deferred policy acquisition costs related to the Closed Block policies; the principal amount of the IHC debt (as discussed in Note 2 below) and related unamortized debt issuance costs, as well as an interest rate swap related to the IHC debt; and certain other related assets and liabilities. The Financial Services Businesses consist of the U.S. Retirement Solutions and Investment Management, U.S. Individual Life and Group Insurance, and International Insurance and Investments divisions and Corporate and Other operations.

# 2. ALLOCATION OF RESULTS

This supplemental combining financial information reflects the assets, liabilities, revenues and expenses directly attributable to the Financial Services Businesses and the Closed Block Business, as well as allocations deemed reasonable by management in order to fairly present the financial position and results of operations of the Financial Services Businesses and the Closed Block Business on a stand alone basis. While management considers the allocations utilized to be reasonable, management has the discretion to make operational and financial decisions that may affect the allocation methods and resulting assets, liabilities, revenues and expenses of each business. In addition, management has limited discretion over accounting policies and the appropriate allocation of earnings between the two businesses. The Company is subject to agreements which provide that, in most instances, the Company may not change the allocation methodology or accounting policies for the allocation of earnings between the Financial Services Businesses and Closed Block Business without the prior consent of the Class B Stock holders or IHC debt bond insurer.

The Financial Services Businesses and Closed Block Business participate in separate internal short-term cash management facilities, pursuant to which they invest cash from securities lending and repurchase activities as well as certain trading and operating activities. The net funds invested in these facilities are generally held in investments that are short term, including mortgage- and asset-backed securities. Historically, a proportionate interest in each security held in a commingled portfolio was allocated to the Financial Services Businesses and the Closed Block Business as of the balance sheet date, based upon their proportional cash contributions to a single facility. Participation in the commingled facility by the Financial Services Businesses and the Closed Block Business was dependent on cash flows arising from the activities noted above, which in turn, under the historical allocation methodology, could change the allocation of the facility s assets between the two Businesses.

A proportionate share of any realized investment gain or loss was recorded by each Business based upon their respective ownership percentages in the commingled facility as of the date of the realized gain or loss.

# Notes to Unaudited Interim Supplemental Combining Financial Information (Continued)

Beginning April 1, 2008, management implemented changes in order to permit each Business to hold discrete ownership of its investments in separate facilities without affecting or being affected by the level of participation of the other Business. With these changes, any realized investment gain or loss are recorded by the respective Business based upon their discrete ownership of investments in their facility. Beginning in the third quarter of 2007, pending the implementation of these changes, the commingled facility was managed so that the proportionate interests of the Financial Services Businesses and Closed Block Business in the entire facility were maintained at approximately the same proportions held as of June 30, 2007 (approximately 49% and 51%, respectively).

General corporate overhead not directly attributable to a specific business that has been incurred in connection with the generation of the businesses—revenues is generally allocated between the Financial Services Businesses and the Closed Block Business based on the general and administrative expenses of each business as a percentage of the total general and administrative expenses for all businesses.

Prudential Holdings, LLC, a wholly owned subsidiary of Prudential Financial, Inc., has outstanding senior secured notes (the IHC debt), of which net proceeds of \$1.66 billion were allocated to the Financial Services Businesses concurrent with the demutualization on December 18, 2001. The IHC debt is serviced by the cash flows of the Closed Block Business, and the results of the Closed Block Business reflect interest expense associated with the IHC debt.

Income taxes are allocated between the Financial Services Businesses and the Closed Block Business as if they were separate companies based on the taxable income or losses and other tax characterizations of each business. If a business generates benefits, such as net operating losses, it is entitled to record such tax benefits to the extent they are expected to be utilized on a consolidated basis.

Holders of Common Stock have no interest in a separate legal entity representing the Financial Services Businesses; holders of the Class B Stock have no interest in a separate legal entity representing the Closed Block Business; and holders of each class of common stock are subject to all of the risks associated with an investment in the Company.

In the event of a liquidation, dissolution or winding-up of the Company, holders of Common Stock and holders of Class B Stock would be entitled to receive a proportionate share of the net assets of the Company that remain after paying all liabilities and the liquidation preferences of any preferred stock.

The results of the Financial Services Businesses are subject to certain risks pertaining to the Closed Block. These include any expenses and liabilities from litigation affecting the Closed Block policies as well as the consequences of certain potential adverse tax determinations. In connection with the sale of the Class B Stock and IHC debt, the cost of indemnifying the investors with respect to certain matters will be borne by the Financial Services Businesses.

# Item 2. Management s Discussion and Analysis of Financial Condition and Results of Operations

Management s Discussion and Analysis of Financial Condition and Results of Operations (MD&A) addresses the consolidated financial condition of Prudential Financial as of March 31, 2009, compared with December 31, 2008, and its consolidated results of operations for the three months ended March 31, 2009 and 2008. You should read the following analysis of our consolidated financial condition and results of operations in conjunction with the MD&A and the audited Consolidated Financial Statements included in the Company s Annual Report on Form 10-K for the year ended December 31, 2008, as well as the Risk Factors section, the statements under Forward-Looking Statements and the Unaudited Interim Consolidated Financial Statements included elsewhere in this Quarterly Report on Form 10-Q.

## Overview

Prudential Financial has two classes of common stock outstanding. The Common Stock, which is publicly traded (NYSE:PRU), reflects the performance of the Financial Services Businesses, while the Class B Stock, which was issued through a private placement and does not trade on any exchange, reflects the performance of the Closed Block Business. The Financial Services Businesses and the Closed Block Business are discussed below.

#### **Financial Services Businesses**

Our Financial Services Businesses consist of three operating divisions, which together encompass seven segments, and our Corporate and Other operations. The U.S. Retirement Solutions and Investment Management division consists of our Individual Annuities, Retirement and Asset Management segments. The U.S. Individual Life and Group Insurance division consists of our Individual Life and Group Insurance segments. The International Insurance and Investments division consists of our International Insurance and Investments segments. Our Corporate and Other operations include our real estate and relocation services business, as well as corporate items and initiatives that are not allocated to business segments. Corporate and Other operations also include businesses that have been or will be divested, including our investment in the retail brokerage joint venture with Wachovia Securities, and businesses that we have placed in wind-down status.

We attribute financing costs to each segment based on the amount of financing used by each segment, excluding financing costs associated with corporate debt which costs are reflected in Corporate and Other operations. The net investment income of each segment includes earnings on the amount of capital that management believes is necessary to support the risks of that segment.

We seek growth internally and through acquisitions, joint ventures or other forms of business combinations or investments. Our principal acquisition focus is in our current business lines, both domestic and international.

# **Closed Block Business**

In connection with the demutualization, we ceased offering domestic participating products. The liabilities for our traditional domestic in force participating products were segregated, together with assets, in a regulatory mechanism referred to as the Closed Block. The Closed Block is designed generally to provide for the reasonable expectations for future policy dividends after demutualization of holders of participating individual life insurance policies and annuities included in the Closed Block by allocating assets that will be used exclusively for payment of benefits, including policyholder dividends, expenses and taxes with respect to these products. See Note 5 to the Consolidated Financial

Statements for more information on the Closed Block. At the time of demutualization, we determined the amount of Closed Block assets so that the Closed Block assets initially had a lower book value than the Closed Block liabilities. We expect that the Closed Block assets will generate sufficient cash flow, together with anticipated revenues from the Closed Block policies, over the life of

the Closed Block to fund payments of all expenses, taxes, and policyholder benefits to be paid to, and the reasonable dividend expectations of, holders of the Closed Block policies. We also segregated for accounting purposes the assets that we need to hold outside the Closed Block to meet capital requirements related to the Closed Block policies. No policies sold after demutualization will be added to the Closed Block, and its in force business is expected to ultimately decline as we pay policyholder benefits in full. We also expect the proportion of our business represented by the Closed Block to decline as we grow other businesses.

Concurrently with our demutualization, Prudential Holdings, LLC, a wholly owned subsidiary of Prudential Financial that owns the capital stock of Prudential Insurance, issued \$1.75 billion in senior secured notes, which we refer to as the IHC debt. The net proceeds from the issuances of the Class B Stock and IHC debt, except for \$72 million used to purchase a guaranteed investment contract to fund a portion of the bond insurance cost associated with that debt, were allocated to the Financial Services Businesses. However, we expect that the IHC debt will be serviced by the net cash flows of the Closed Block Business over time, and we include interest expenses associated with the IHC debt when we report results of the Closed Block Business.

The Closed Block Business consists principally of the Closed Block, assets that we must hold outside the Closed Block to meet capital requirements related to the Closed Block policies, invested assets held outside the Closed Block that represent the difference between the Closed Block assets and Closed Block liabilities and the interest maintenance reserve, deferred policy acquisition costs related to Closed Block policies, the principal amount of the IHC debt and related hedging activities, and certain other related assets and liabilities.

The Closed Block Business is not a separate legal entity from the Financial Services Businesses; however, they are operated as separate entities and are separated for financial reporting purposes. The Financial Services Businesses are not obligated to pay dividends on Closed Block policies. Dividends on Closed Block policies reflect the experience of the Closed Block over time and are subject to adjustment by Prudential Insurance s Board of Directors. Further, our plan of demutualization provides that we are not required to pay dividends on policies within the Closed Block from assets that are not within the Closed Block and that the establishment of the Closed Block does not represent a guarantee that any certain level of dividends will be maintained.

# **Executive Summary**

Prudential Financial, a financial services leader with approximately \$542 billion of assets under management as of March 31, 2009, has operations in the United States, Asia, Europe and Latin America. Through our subsidiaries and affiliates, we offer a wide array of financial products and services, including life insurance, annuities, retirement-related services, mutual funds, investment management, and real estate services. We offer these products and services to individual and institutional customers through one of the largest distribution networks in the financial services industry.

# **Current Developments**

Financial Markets. The stress experienced by global financial markets that began in the second half of 2007, has continued and substantially increased since then. The volatility and disruption in the global financial markets have reached unprecedented levels in the post World War II period. The availability and cost of credit has been materially affected. These factors, combined with economic conditions in the U.S., including depressed home and commercial real estate prices and increasing foreclosures, falling equity market values, declining business and consumer confidence, and rising unemployment, have precipitated a severe economic recession and concerns of prolonged adverse economic conditions.

Due to the economic environment, the global fixed-income markets are experiencing a period of both extreme volatility and limited market liquidity conditions, which has affected a broad range of asset classes and sectors. As a result, the market for fixed income instruments has experienced decreased liquidity, increased price

volatility, credit downgrade events, and increased probability of default. These events in the credit markets as well as volatility in equity and real estate markets have had and may continue to have a substantial adverse effect on us.

As further discussed in Liquidity and Capital Resources, the U.S. federal government has taken numerous actions to address financial market conditions. These actions include the U.S. Treasury s Capital Purchase Program, which is part of the Troubled Asset Relief Program, or TARP, as well as the Term Asset-Backed Securities Loan Facility, or TALF. The TARP Capital Purchase Program involves the issuance by qualifying institutions of preferred stock and warrants to purchase common stock to the U.S. Treasury. TALF is designed to provide secured financing for certain types of asset-backed securities.

We have applied to participate in the Capital Purchase Program, although no determination with respect to our participation has been made. If we do participate in the Capital Purchase Program, we will become subject to additional requirements and restrictions on our business. See Item 1A, Risk Factors for additional information. In the first quarter of 2009, we participated in TALF as an eligible borrower. We continue to evaluate other government sponsored programs for which we may be eligible.

As a result of the volatility and disruption in the global financial markets, we undertook certain actions during 2008 as described in more detail in our 2008 Annual Report on Form 10-K. Due to the continuation of the financial markets dislocations into 2009 and in order to manage our liquidity and capital resources, we undertook certain additional actions in the first quarter of 2009, including the following:

Made capital contributions and capital loans to our international insurance operations in Japan totaling \$366 million.

Borrowed \$1.5 billion in the form of collateralized funding agreements from the Federal Home Loan Bank of New York, or FHLBNY.

Replaced certain inter-company funding agreements between Prudential Insurance and Prudential Financial, previously funded through proceeds from the sale of Prudential Financial s retail medium-term notes, with a portion of the funding agreements issued to FHLBNY making the corresponding proceeds available for general corporate purposes.

Reduced exposure to short-term financing markets, primarily through planned runoff of commercial paper borrowings.

Undertook sales of assets held by some of our affiliates to reduce their borrowing needs.

Realized gains from derivative positions related to our Japanese insurance operations.

For additional information on our liquidity and capital resources, and the actions we undertook in the first quarter of 2009, see Liquidity and Capital Resources.

We continue to monitor the liquidity and capital needs of Prudential Financial and its subsidiaries. If the disruption in the credit and capital markets continues or worsens, we will need to take additional capital management actions to maintain capital consistent with our rating objectives, which may include additional internal actions or, if internal resources are insufficient or market conditions continue to deteriorate, access to external sources of capital, if available.

During the first quarter of 2009, rating agencies downgraded certain ratings of Prudential Financial and its subsidiaries. Downgrades in our claims-paying or credit ratings could potentially, among other things, limit our ability to market products, reduce our competitiveness, increase the number or value of policy surrenders and withdrawals, increase our borrowing costs and potentially make it more difficult to borrow funds, adversely affect the availability of financial guarantees, such as letters of credit, cause additional collateral requirements or

other required payments under certain agreements, allow counterparties to terminate derivative agreements and/or hurt our relationships with creditors or trading counterparties thereby potentially negatively effecting our profitability, liquidity and/or capital. Refer to Ratings for more information.

Our financial condition and results of operations for the first quarter of 2009 reflect the following:

Net loss of our Financial Services Businesses attributable to Prudential Financial, Inc. was \$5 million as the continuation of unfavorable financial market conditions into 2009 had a negative effect on our investment portfolio, resulting in net realized investment losses and related adjustments, and on reported results of certain of our domestic businesses that are more market sensitive.

Pre-tax net realized investment losses and related adjustments of the Financial Services Businesses were \$710 million, primarily reflecting other-than-temporary impairments of fixed maturity and equity securities of \$677 million.

We continued to have positive net flows in our domestic annuity, retirement and asset management businesses, as well as solid sales in our domestic and international insurance businesses.

Full Service Retirement gross deposits and sales were \$10.5 billion and net additions were \$6.3 billion, an increase from gross deposits and sales of \$4.6 billion and net additions of \$653 million during the first quarter of 2008.

Net unrealized losses on general account fixed maturity investments of the Financial Services Businesses amounted to \$7.514 billion as of March 31, 2009, compared to \$6.567 billion as of December 31, 2008. Gross unrealized gains decreased from \$4.684 billion as of December 31, 2008 to \$3.734 billion as of March 31, 2009 and gross unrealized losses decreased slightly from \$11.251 billion to \$11.248 billion for the same periods. Net unrealized losses on general account fixed maturity investments of the Closed Block Business amounted to \$4.971 billion as of March 31, 2009, compared to \$4.035 billion as of December 31, 2008.

As of March 31, 2009, Prudential Financial, the parent holding company, had cash and short-term investments of \$4.745 billion after repurchases during the first quarter of 2009 of \$245 million original principal amount of Prudential Financial convertible debt securities; however, adverse capital market conditions have affected and may continue to affect the availability and cost of borrowed funds and could impact our ability to refinance existing borrowings.

#### **Results of Operations**

We analyze performance of the segments and Corporate and Other operations of the Financial Services Businesses using a measure called adjusted operating income. See Consolidated Results of Operations for a definition of adjusted operating income and a discussion of its use as a measure of segment operating performance.

Shown below are the contributions of each segment and Corporate and Other operations to our adjusted operating income for the three months ended March 31, 2009 and 2008 and a reconciliation of adjusted operating income of our segments and Corporate and Other operations to income from continuing operations before income taxes and equity in earnings of operating joint ventures.

Results for the three months ended March 31, 2009 presented above reflect the following:

Individual Annuities segment results for the first quarter of 2009 declined in comparison to the first quarter of 2008, primarily reflecting the impact of unfavorable market conditions. Results for the first quarter of 2009 included a \$1,358 million favorable variance in the mark-to-market of embedded derivatives and related hedge positions associated with our living benefit features, primarily driven by a market-perceived increase in our own risk of non-performance. This favorable variance was largely offset by a corresponding \$1,080 million increase in the amortization of deferred policy acquisition and other costs. Results for the first quarter of 2009 also included a \$304 million charge for the market

performance adjustments to the reserves for the guaranteed minimum death and income benefit features of our variable annuity products and the estimate of total gross profits used as a basis for amortizing deferred policy acquisition and other costs, largely reflecting the impact of current market conditions. Also contributing to the decline was a decrease in fee income, driven by lower average variable annuity asset balances invested in separate accounts.

Retirement segment results for the first quarter of 2009 increased in comparison to the first quarter of 2008, primarily driven by improved investment results in both our full service and institutional investment products businesses. Results also included a favorable variance in the mark-to-market of embedded derivatives and derivative hedge positions related to the guaranteed minimum withdrawal benefits associated with certain defined contribution accounts, driven by a market-perceived increase in our own risk of non-performance. Partially offsetting these items was a decline in asset management fees, driven by a decrease in average full service fee-based retirement account values, primarily resulting from equity market depreciation.

Asset Management segment results for the first quarter of 2009 decreased from the first quarter of 2008 largely due to a decline in performance based incentive fees primarily related to institutional real estate funds, as well as lower asset management fees. In addition, results from the segment seal estate proprietary investing business decreased primarily from co-investments.

Individual Life segment results for the first quarter of 2009 declined from the first quarter of 2008 primarily due to a net increase in amortization of deferred policy acquisition costs, net of related amortization of unearned revenue reserves, related to market induced lower persistency on variable products. Results also include a decrease in asset based fees due to unfavorable equity market performance as well as unfavorable mortality experience, net of reinsurance.

Group Insurance segment results increased slightly, as the benefit from more favorable claims experience in our group life and group disability businesses in the first quarter of 2009, was mostly offset by the benefit in the first quarter of 2008 from a \$20 million premium adjustment for updated data on a large group life insurance case.

The International Insurance segment is comprised of its Life Planner and Gibraltar Life operations. Results from the segment s Life Planner operations increased primarily reflecting improved investment income margins and the continued growth of our Japanese Life Planner operations, which were partially offset by higher amortization of deferred policy acquisition costs and higher general and administrative expenses. Results from the segment s Gibraltar Life operation increased slightly, as improved investment income margins and more favorable mortality were offset by higher general and administrative expenses.

International Investments segment results for the first quarter of 2009 declined from the prior year quarter reflecting lower results from the segment s Korean asset management operation primarily due to a decline in asset based fees.

Corporate and Other results for the first quarter of 2009 declined from the first quarter of 2008 primarily due to lower investment earnings, increased interest expense on capital debt and losses in our real estate and relocation services business.

Realized investment gains (losses), net, and related adjustments for the Financial Services Businesses in the first quarter of 2009 amounted to a loss of \$710 million, primarily reflecting other-than-temporary impairments of fixed maturity and equity securities of \$677 million.

Income from continuing operations before income taxes in the Closed Block Business increased \$56 million in the first quarter of 2009 compared to the first quarter of 2008. The decrease in net realized gains and net investment income compared to the prior period was more than offset by the resulting decrease in the cumulative earnings policyholder dividend obligation expense.

#### **Accounting Policies & Pronouncements**

#### **Application of Critical Accounting Estimates**

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America, or U.S. GAAP, requires the application of accounting policies that often involve a significant degree of judgment. Management, on an ongoing basis, reviews estimates and assumptions used in the preparation of financial statements. If management determines that modifications in assumptions and estimates are appropriate given current facts and circumstances, results of operations and financial position as reported in the Consolidated Financial Statements could change significantly.

Management believes the accounting policies relating to the following areas are most dependent on the application of estimates and assumptions:

Valuation of investments, including the recognition of other-than-temporary impairments;

Policyholder liabilities;

Deferred policy acquisition costs;

Goodwill;

Pension and other postretirement benefits;

Taxes on income; and

Reserves for contingencies, including reserves for losses in connection with unresolved legal matters.

See below for an updated discussion of the application of estimates and assumptions around Goodwill. For an updated discussion of the application of estimates and assumptions around the valuation of investments, see Valuation of Assets and Liabilities Fair Value of Assets and Liabilities. For an updated discussion of the application of estimates and assumptions around the recognition of other-than-temporary impairments, see Realized Investment Gains and Losses and General Account Investments General Account Investments Fixed Maturity Securities Other-than-Temporary Impairments of Fixed Maturity Securities.

A discussion of each of the remaining critical accounting estimates may be found in our Annual Report on Form 10-K for the year ended December 31, 2008, under Management s Discussion and Analysis of Financial Condition and Results of Operations Accounting Policies and Pronouncements Application of Critical Accounting Estimates.

#### Goodwill

Goodwill is tested for impairment on an annual basis as of December 31 of each year and more frequently if events occur or circumstances change that would indicate a potential for impairment. The test is performed at the reporting unit level which is equal to or one level below our operating segments. Reporting units that have goodwill subject to testing are the Asset Management segment, the International Insurance segment s Life Planners business, and the Retirement segment s full service business. After a review of current market conditions, it was determined that the \$444 million of goodwill associated with the Retirement Full Service reporting unit would be tested for impairment as of the valuation date of March 31, 2009.

As required by accounting guidance, the impairment testing process consists of two steps. Step 1 requires that the fair value of the reporting unit be calculated and compared to the reporting unit s carrying value. If the fair value is greater than the carrying value, it is concluded there is no impairment and the analysis is complete. If the fair value is less than the carrying value, Step 2 of the process is completed to determine the amount of impairment, if any.

The fair value of the Retirement segment so full service reporting unit was determined using a discounted cash flow approach. A discount rate of 13.1%, reflecting the market expected weighted average rate of return of the reporting unit was applied to the projected future cash flows and resulted in a total fair value that was greater than the reporting unit so carrying value. Accordingly, it was concluded there was no impairment of Retirement Full Service goodwill as of the valuation date of March 31, 2009. A decline in forecasted cash flows of 8.7%, an increase in the discount rate above 14.1%, or an increase in the reporting unit so carrying value of approximately 10% could result in the Retirement business failing Step 1 and requiring a Step 2 assessment. Further market declines or other events impacting the fair value of this business, or increases in the level of equity required to support this business from what we have assumed, could result in an impairment of some or all of the goodwill associated with this business in future periods, resulting in a charge to General and administrative expenses.

#### **Accounting Pronouncements Adopted**

See Note 2 to the Unaudited Interim Consolidated Financial Statements for a discussion of recently adopted accounting pronouncements, including the adoption of FSP FAS 115-2 and FAS 124-2, Recognition and Presentation of Other-Than-Temporary Impairments , FSP FAS 157-4, Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly, FSP APB 14-1, Accounting for Convertible Debt Instruments That May Be Settled in Cash upon Conversion (Including Partial Cash Settlement), FSP EITF 03-6-1, Determining Whether Instruments Granted in Share-Based Payment Transactions Are Participating Securities, and SFAS No. 160, Noncontrolling Interests in Consolidated Financial Statements.

### **Recent Accounting Pronouncements**

See Note 2 to the Unaudited Interim Consolidated Financial Statements for a discussion of recently issued accounting pronouncements.

## **Consolidated Results of Operations**

The following table summarizes income from continuing operations for the Financial Services Businesses and the Closed Block Business as well as other components comprising net income.

Financial Services Businesses by segment:	2009	rch 31,	2008

#### **Results of Operations Financial Services Businesses**

2009 to 2008 Three Month Comparison. Income (loss) from continuing operations for the Financial Services Businesses decreased \$108 million, from income of \$91 million in the first quarter of 2008 to a loss of \$17 million in the first quarter of 2009 reflecting the impact of the continuation of unfavorable market conditions into 2009 on the results of our investment portfolio and certain of our domestic segments. Results for the current and prior year quarter include pre-tax net investment losses in our general account. In addition, the decrease reflects reserve increases for the guaranteed minimum death and income benefit features of our variable annuity products and increased amortization of deferred policy acquisitions and other costs primarily due to the impact of market conditions. Partially offsetting these items was a benefit in the current quarter in the mark-to-market of embedded derivatives and related hedge positions associated with certain variable annuity and retirement products, net of amortization of deferred policy acquisition and other costs, driven by a market-perceived increase in our own risk of non-performance. On a diluted per share basis, income from continuing operations attributable to the Financial Services Businesses for the three months ended March 31, 2009 of \$0.01 per share of Common Stock decreased from \$0.18 per share of Common Stock for the three months ended March 31, 2008. We analyze the operating performance of the segments included in the Financial Services Businesses using adjusted operating income as described in Segment Measures, below. For a discussion of our segment results on this basis see Results of Operations for Financial Services Businesses by Segment, below. In addition, for a discussion of the realized investment gains (losses), net attributable to the Financial Services Businesses, see Realized Investment Gains and Losses and General Account Investments Realized Investment Gains and Losses, below. For additional information regarding investment income, excluding realized investment gains (losses) see Gains and Losses and General Account Investments General Account Investments. below.

The direct equity adjustment increased income from continuing operations available to holders of the Common Stock for earnings per share purposes by \$11 million for the three months ended March 31, 2009, compared to \$12 million for the three months ended March 31, 2008. The direct equity adjustment modifies earnings available to holders of the Common Stock and the Class B Stock for earnings per share purposes. The holders of the Common Stock will benefit from the direct equity adjustment as long as reported administrative expenses of the Closed Block Business are less than the cash flows for administrative expenses determined by the policy servicing fee arrangement that is based upon insurance and policies in force and statutory cash premiums. As statutory cash premiums and policies in force in the Closed Block Business decline, we expect the benefit to the Common Stock holders from the direct equity adjustment to decline accordingly. If the reported administrative expenses of the Closed Block Business exceed the cash flows for administrative expenses determined by the policy servicing fee arrangement, the direct equity adjustment will reduce income available to holders of the Common Stock for earnings per share purposes.

#### **Results of Operations Closed Block Business**

2009 to 2008 Three Month Comparison. Income (loss) from continuing operations for the Closed Block Business for the three months ended March 31, 2009, was income of \$19 million, or \$4.00 per share of Class B Stock, compared to a loss of \$8 million, or \$(10.00) per share of Class B Stock, for the three months ended March 31, 2008. The direct equity adjustment decreased income from continuing operations available to the Class B Stock holders for earnings per share purposes by \$11 million for the three months ended March 31, 2009, compared to \$12 million for the three months ended March 31, 2008. For a discussion of the results of operations for the Closed Block Business, see Results of Operations of Closed Block Business, below.

#### **Segment Measures**

In managing our business, we analyze operating performance separately for our Financial Services Businesses and our Closed Block Business. For the Financial Services Businesses, we analyze our segments—operating performance using—adjusted operating income. Results of the Closed Block Business for all periods are evaluated and presented only in accordance with U.S. GAAP. Adjusted operating income does not equate to

income (loss) from continuing operations before income taxes and equity in earnings of operating joint ventures or net income as determined in accordance with U.S. GAAP but is the measure of segment profit or loss we use to evaluate segment performance and allocate resources, and consistent with SFAS No. 131, Disclosures about Segments of an Enterprise and Related Information, is our measure of segment performance.

Adjusted operating income is calculated for the segments of the Financial Services Businesses by adjusting each segment s income (loss) from continuing operations before income taxes and equity in earnings of operating joint ventures for the following items:

realized investment gains (losses), net, except as indicated below, and related charges and adjustments;

net investment gains and losses on trading account assets supporting insurance liabilities and changes in experience-rated contractholder liabilities due to asset value changes;

the contribution to income/loss of divested businesses that have been or will be sold or exited that do not qualify for discontinued operations accounting treatment under U.S. GAAP; and

equity in earnings of operating joint ventures and earnings attributable to noncontrolling interests.

The items above are important to an understanding of our overall results of operations. Adjusted operating income is not a substitute for income determined in accordance with U.S. GAAP, and our definition of adjusted operating income may differ from that used by other companies. However, we believe that the presentation of adjusted operating income as we measure it for management purposes enhances understanding of our results of operations by highlighting the results from ongoing operations and the underlying profitability of the Financial Services Businesses.

Adjusted operating income excludes Realized investment gains (losses), net, except as indicated below, and related charges and adjustments. A significant element of realized investment gains and losses are impairments and credit-related and interest rate-related gains and losses from sales of securities. Impairments and losses from sales of credit-impaired securities, the timing of which depends largely on market credit cycles, can vary considerably across periods. The timing of other sales that would result in gains or losses, such as interest rate-related gains or losses, is largely subject to our discretion and influenced by market opportunities, as well as our tax and capital profile. Trends in the underlying profitability of our businesses can be more clearly identified without the fluctuating effects of these transactions. Similarly, adjusted operating income excludes investment gains and losses on trading account assets supporting insurance liabilities and changes in experience-rated contractholder liabilities due to asset value changes, because these recorded changes in asset and liability values are expected to ultimately accrue to the contractholders. Adjusted operating income excludes the results of divested businesses because they are not relevant to understanding our ongoing operating results. The contributions to income/loss of wind-down businesses that we have not divested remain in adjusted operating income. See Note 10 to the Unaudited Interim Consolidated Financial Statements for further information on the presentation of segment results.

As noted above, certain Realized investment gains (losses), net, are included in adjusted operating income. We include in adjusted operating income the portion of our realized investment gains and losses on derivatives that arise from the termination of contracts used to hedge our foreign currency earnings in the same period that the expected earnings emerge. Similarly, we include in adjusted operating income the portion of realized investment gains and losses on derivatives that represent current period yield adjustments. The realized investment gains or losses from products that are free standing derivatives, or contain embedded derivatives, along with the realized investment gains or losses from associated derivative portfolios that are part of an economic hedging program related to the risk of these products, are included in adjusted operating income. Adjusted operating income also includes those realized investment gains and losses that represent profit or loss of certain of our businesses which primarily originate investments for sale or syndication to unrelated investors.

#### Results of Operations for Financial Services Businesses by Segment

#### U.S. Retirement Solutions and Investment Management Division

#### Individual Annuities

Operating Results

The following table sets forth the Individual Annuities segment s operating results for the periods indicated.

	Three Mor Marc 2009	ded	
		illions)	000
Operating results:			
Revenues	\$ 1,892	\$	573
Benefits and expenses	1,875		458
Adjusted operating income	17		115
Realized investment gains (losses), net, and related adjustments(1)	(22)		(53)
Related charges(1)(2)	(7)		17
Income (loss) from continuing operations before income taxes and equity in earnings of operating joint ventures	\$ (12)	\$	79

- (1) Revenues exclude Realized investment gains (losses), net, and related charges and adjustments. The related charges represent payments related to the market value adjustment features of certain of our annuity products. See Realized Investment Gains and Losses and General Account Investments Realized Investment Gains and Losses.
- (2) Benefits and expenses exclude related charges which represent the unfavorable (favorable) impact of Realized investment gains (losses), net, on change in reserves and the amortization of deferred policy acquisition costs, deferred sales inducements and value of business acquired.

Adjusted Operating Income

2009 to 2008 Three Month Comparison. Adjusted operating income decreased \$98 million, from \$115 million in the first quarter of 2009. Included within this decrease is a \$1,358 million favorable variance in the mark-to-market of embedded derivatives and related hedge positions associated with our living benefit features. The favorable variance in our hedging results reflects a benefit of \$1,318 million in the first quarter of 2009 compared to a charge of \$40 million in the first quarter of 2008. The benefit in the first quarter of 2009 includes \$1,311 million of benefits related to updates of inputs used in the valuation of the embedded derivatives, including a \$1,219 million benefit related to an update to reflect a market-perceived increase in our own risk of non-performance, and a \$92 million benefit reflecting inclusion of new market inputs for implied volatility. Under SFAS No. 157 we are required to incorporate our own risk of non-performance in the valuation of the embedded derivatives associated with our living benefit features. In light of first quarter of 2009 developments, including rating agency downgrades to the claims-paying ratings of our insurance subsidiaries, we updated the discount rate used in these valuations to reflect the market-perceived increase in our non-performance risk. In the first quarter of 2009, we used a higher discount rate in the valuation as a result of the increase in our non-performance risk, thereby reducing the value of the embedded derivative liabilities. For

additional information regarding the methodology used in determining the fair value of the embedded derivatives associated with our living benefit features, including the first quarter of 2009 updates, see Valuation of Assets and Liabilities Fair Value of Assets and Liabilities Valuation of Variable Annuity Optional Living Benefit Features. The corresponding increase in current period gross profits related to the \$1,358 million favorable variance in the mark-to-market of embedded derivatives and related hedge positions associated with our living benefit features led to an offsetting increase in the amortization of deferred policy acquisition and other costs of \$1,080 million.

The primary risk exposures of these optional living benefit features relate to actual deviations from, or changes to, the assumptions used in their original pricing, including equity market returns, interest rates, market volatility, timing of annuitization and withdrawals, contract lapses and contractholder mortality. Together with certain product design elements, our capital markets hedging program is designed to limit our exposure to the equity market, interest rate, and market volatility risk inherent in the living benefit features of certain variable annuity products, as part of our overall risk management strategy. Excluding the \$1,311 million of benefits related to updates of the assumptions used in the valuation of the embedded derivatives associated with our living benefit features, the first quarter of 2009 capital markets hedging activities resulted in a \$7 million benefit, reflecting a \$91 million benefit related to the change in the fair value of the embedded derivatives, partially offset by an \$84 million charge related to the change in the fair value of the related hedge positions. The capital markets hedging activities for the first quarter of 2008 resulted in a \$40 million charge, reflecting a \$263 million charge related to the change in the fair value of the embedded derivatives, partially offset by a \$223 million benefit related to the change in the fair value of the related hedge positions. Given the sensitivity of the fair value of both the embedded derivatives and related hedge positions to financial market conditions, the variance related to the mark-to-market of these items for a given period will be largely dependent on the financial market conditions throughout the period. A decrease in the availability or an increase in the cost of the derivative hedging instruments used in these capital markets hedging activities could have an adverse impact on our results of operations going forward. Changes in our non-performance risk or changes in the actuarial assumptions around the timing of annuitization and withdrawals, contract lapses and contractholder mortality could also result in fluctuations in the estimated fair value of the embedded derivatives associated with our living benefit features and could positively or negatively impact our results of operations going forward.

Adjusted operating income for the first quarter of 2009 also included charges of \$304 million related to the quarterly market performance adjustments to the reserves for the guaranteed minimum death and income benefit features of our variable annuity products and to our estimate of total gross profits used as a basis for amortizing deferred policy acquisition and other costs. The \$304 million of charges, including \$167 million relating to reserve increases for the guaranteed minimum death and income benefit features of our variable annuity products and \$137 million relating to increased amortization of deferred policy acquisition and other costs, reflect market performance related adjustments to our estimate of total gross profits to reflect actual fund performance in the first quarter of 2009. In light of recent market conditions, beginning in the fourth quarter of 2008 we determined that adjustments to our estimate of total gross profits to reflect actual fund performance and any corresponding changes to the future rate of return assumptions should no longer be dependent on a comparison to a statistically generated range of estimated gross profits. Instead, for purposes of evaluating deferred policy acquisition and other costs and the reserves for the guaranteed minimum death and income benefit features of our variable annuity products, total estimated gross profits are updated for these items each quarter. Market value declines in the first quarter of 2009 decreased our estimates of total gross profits by establishing a new, lower starting point for the variable annuity account values used in estimating gross profits for future periods. The previously expected rate of return for the first quarter of 2009 was based upon our current maximum future rate of return assumption under the reversion to the mean approach, as discussed below. The decrease in our estimate of total gross profits results in a higher required rate of amortization, which is applied to all prior periods gross profits. The resulting cumulative adjustment to prior amortization is recognized in the current period. In addition, the higher rate of amortization will also be applied to future gross profits in calculating amortization in future periods which, all else being equal, will result in lower net profits in future periods.

Included within the \$137 million increase in amortization of deferred policy acquisition and other costs related to the quarterly market performance adjustment discussed above is a \$73 million charge to amortize the remaining balance of valuation of business acquired, or VOBA, related to the variable annuity contracts acquired from Allstate. The additional charge was required as the declines in estimated future gross profits related to market performance caused the present value of estimated gross profits for these contracts to fall below zero.

We continue to derive our future rate of return assumptions using a reversion to the mean approach, a common industry practice. Under this approach, we consider actual returns over a period of time and initially

adjust future projected returns over a four year period so that the assets grow at the long-term expected rate of return for the entire period. However, beginning in the fourth quarter of 2008 and continuing through the first quarter of 2009, the projected future annual rate of return calculated using the reversion to the mean approach for all contract groups was greater than 10.5%, our current maximum future rate of return assumption across all asset types for this business. Therefore, we utilize the maximum future rate of return over the four year period, thereby limiting the impact of the reversion to the mean, and further decreasing our estimate of total gross profits. Further or continued market declines could result in additional market depreciation within our separate account assets and corresponding decreases in our gross profits, as well as additional adjustments to the amortization of deferred policy acquisition and other costs, and the costs relating to the reserves for the guaranteed minimum death and income benefit features of our variable annuity products. Given that the estimates of future gross profits are already based upon our maximum future rate of return assumption as discussed above, all else being equal, future quarterly rates of return lower than 2.6% will result in additional increases in the amortization of deferred policy acquisition and other costs, and the costs relating to the reserves for the guaranteed minimum death and income benefit features of our variable annuity products.

Absent the effect of the hedge results and market performance adjustments discussed above, adjusted operating income for the first quarter of 2009 decreased \$72 million from the first quarter of 2008, primarily relating to a decrease in fee income, driven by lower average variable annuity asset balances invested in separate accounts. The declines in separate account assets were due to market depreciation and transfers of balances to a fixed-income based general account option. The transfer of balances to our general account relates to an automatic rebalancing element in some of our living benefit features, which, as part of the overall product design, transferred approximately \$7 billion of investments out of the separate accounts and into our general account over the twelve months ended March 31, 2009, due to equity market declines. Higher average annuity account values invested in our general account resulting from these transfers also led to improved investment results, which partially offset the decrease in fee income.

#### Revenues

2009 to 2008 Three Month Comparison. Revenues, as shown in the table above under Operating Results, increased \$1,319 million, from \$573 million in the first quarter of 2008 to \$1,892 million in the first quarter of 2009. Policy charges and fees and asset management fees and other income increased \$1,208 million, including a \$1,358 million favorable variance in the mark-to-market of embedded derivatives and related hedge positions associated with our living benefit features, primarily driven by a market-perceived increase in our own risk of non-performance, as discussed above. This favorable variance was partially offset by a decrease in fee income driven by lower average variable annuity asset balances invested in separate accounts due to market depreciation and the transfer of balances to our general account relating to an automatic rebalancing element in some of our living benefit features. In addition, net investment income increased \$113 million, reflecting higher average annuity account values invested in our general account, also resulting from these transfers.

#### Benefits and Expenses

2009 to 2008 Three Month Comparison. Benefits and expenses, as shown in the table above under Operating Results, increased \$1,417 million, from \$458 million in the first quarter of 2008 to \$1,875 million in the first quarter of 2009. Absent the impact of the \$304 million market performance adjustments and the \$1,080 million increase in the amortization of deferred policy acquisition and other costs due to the favorable variance in the mark-to-market of embedded derivatives and related hedge positions associated with our living benefit features discussed above, which account for \$1,384 million of the increase, benefits and expenses increased \$33 million. On this basis, policyholders benefits, including changes in reserves, increased \$66 million primarily reflecting higher actual and expected contract guarantee claims costs related to the reserves for the guaranteed minimum death and income benefit features of our variable annuity products, as well as an unfavorable impact relating to the quarterly adjustment for current period experience, as explained below. Also on this basis, interest credited to policyholders account balances increased \$52 million primarily reflecting

higher average annuity account values invested in our general account resulting from transfers relating to an automatic rebalancing element in some of our living benefit features. Partially offsetting these increases was a \$52 million decrease in general and administrative expenses, net of capitalization, and a \$23 million decrease in the amortization of deferred policy acquisition costs, absent the effect of the items mentioned above. The decrease in general and administrative expenses, net of capitalization, on this basis, was driven by declines in distribution and asset management costs associated with lower variable annuity account values, and lower amortization of VOBA primarily reflecting the impact of lower gross profits due to the decrease in fee income. The decrease in the amortization of deferred policy acquisition costs on this basis primarily reflects the favorable impact of the quarterly adjustments for current period experience, as explained below. Interest expense declined \$10 million, reflecting paydowns of inter-company debt, which were funded with affiliated capital contributions.

The quarterly adjustments for current period experience referred to above reflect the cumulative impact of differences between actual gross profits for the period and the previously estimated expected gross profits for the period, as well as an update for current and future expected claims costs associated with the guaranteed minimum death and income benefit features of our variable annuity products. To the extent each period s actual experience differs from the previous estimate for that period, the assumed level of total gross profits may change, and a cumulative adjustment to previous periods amortization, referred to as an adjustment for current period experience, may be required in the current period. This adjustment to previous periods amortization is in addition to the direct impact of actual gross profits on current period amortization. Adjusted operating income for the first quarter of 2009 includes a net charge of \$23 million relating to these quarterly adjustments, while the first quarter of 2008 includes a net charge of \$15 million. The adjustment for the reserves for the guaranteed minimum death and income benefit features of our variable annuity products in the first quarter of 2009 was a \$48 million charge, primarily reflecting lower than expected fee income and lower than expected lapses, as well as higher actual contract guarantee claims costs in the first quarter of 2009. Partially offsetting this amount, the adjustment for deferred policy acquisition and other costs was a \$25 million benefit in the first quarter of 2009, reflecting a reduction in amortization due to better than expected gross profits, resulting primarily from the favorable variance in the mark-to-market of embedded derivatives and related hedge positions associated with our living benefit features, offset by lower than expected fee income.

Account Values

The following table sets forth changes in account values for the individual annuity business, for the periods indicated. For our individual annuity business, assets are reported at account value, and net sales (redemptions) are gross sales minus redemptions or surrenders and withdrawals, as applicable.

	Marc 2009	nths Ended ch 31, 2008 llions)
Variable Annuities(1):		
Beginning total account value	\$ 60,007	\$ 80,330
Sales	2,108	2,829
Surrenders and withdrawals	(1,443)	(2,173)
Net sales	665	656
Benefit payments	(256)	(294)
Net flows	409	362
Change in market value, interest credited and other activity	(2,269)	(5,409)
Policy charges	(205)	(306)
Ending total account value(2)	\$ 57,942	\$ 74,977
Fixed Annuities:		
Beginning total account value	\$ 3,295	\$ 3,488
Sales	55	17
Surrenders and withdrawals	(77)	(53)
Net redemptions	(22)	(36)
Benefit payments	(43)	(43)
Net flows	(65)	(79)
Interest credited and other activity	33	32
Policy charges		(1)
Ending total account value	\$ 3,263	\$ 3,440

2009 to 2008 Three Month Comparison. Total account values for fixed and variable annuities amounted to \$61.2 billion as of March 31, 2009, a decrease of \$2.1 billion from December 31, 2008. The decrease came primarily from decreases in the market value of customers—variable annuities due to equity market declines, partially offset by positive variable annuity net flows. Total account values as of March 31, 2009 decreased \$17.2 billion from March 31, 2008, primarily due to decreases in the market value of customers—variable annuities due to significant equity market declines, partially offset by positive variable annuity net flows. Individual variable annuity gross sales decreased by \$721 million, from \$2,829 million in the first quarter of 2008 to \$2,108 million in the first quarter of 2009 and individual variable annuity surrenders and withdrawals decreased by \$730 million, from \$2,173 million in the first quarter of 2008 to \$1,443 million in the first quarter of 2009, reflecting the decrease in both inflows and outflows which generally occurs during periods of market volatility and equity market decline. The decrease in individual variable annuity surrenders and withdrawals also reflects lower lapses for policies where the current policyholder account value is

<sup>(1)</sup> Variable annuities include only those sold as retail investment products. Investments through defined contribution plan products are included with such products within the Retirement segment.

<sup>(2)</sup> As of March 31, 2009, variable annuity account values are invested in equity funds (\$17 billion or 29%), market value adjusted or fixed rate options (\$14 billion or 25%), balanced funds (\$12 billion or 21%), bond funds (\$10 billion or 17%), and other (\$5 billion or 8%).

below the guaranteed minimum death benefit.

As a result of the volatility and disruption in the global financial markets, in recent periods we have seen significant increases in the net amount at risk for our variable annuity products with riders that include optional living and guaranteed minimum death benefit features. The net amount at risk is generally defined as the present

value of the guaranteed minimum benefit amount in excess of the contractholder s current account balance. Variable annuity account values with living benefit features were \$33.2 billion, \$33.1 billion and \$36.0 billion as of March 31, 2009, December 31, 2008 and March 31, 2008, respectively. We segregate our variable annuity living benefit features into four broad product groupings based on our risk management strategies. The following table sets forth the account value and net amount at risk of our variable annuities with living benefit features based on these product grouping, as of the dates indicated.

			2009 Amount	Decemb Account	ber 31, 2008 Net Amount		March Account		008 Amount
Risk Management Strategy:	Value		at Risk Value at Risk (in millions)			Value	a	t Risk	
Automatic rebalancing element and capital markets hedging	\$ 11,309	\$	1,325	\$ 9,655	\$	1,071	\$ 4,959	\$	258
Automatic rebalancing element only	7,815		189	7,998		257	9,348		
Capital markets hedging only	10,337		3,783	11,287		3,097	15,495		469
No automatic rebalancing element or capital markets hedging	3,750		2,134	4,114		1,876	6,233		744
Total variable annuity account values with living benefit									
features	\$ 33,211	\$	7,431	\$ 33,054	\$	6,301	\$ 36,035	\$	1,471

The automatic rebalancing element included in the design of certain variable annuity products transfers assets between contractholder sub-accounts depending on a number of factors, including the investment performance of the sub-accounts. Negative investment performance may result in transfers to either a fixed-income based general account option or a separate account bond portfolio. In certain situations, assets may transfer back when investment performance improves. The automatic rebalancing element is designed to limit our exposure to equity market risk and market volatility. In our capital markets hedging program we purchase equity options and interest rate derivatives to hedge certain guarantees for changes in equity markets, interest rates, and market volatility. Our latest offerings of variable annuity products with living benefit features all include an automatic rebalancing element. As of March 31, 2009 approximately 58% of variable annuity account values with living benefit features included an automatic rebalancing element in the product design, compared to 53% and 40% as of December 31, 2008 and March 31, 2008, respectively. As of March 31, 2009 approximately 20% of the net amount at risk associated with variable annuity account values with living benefit features included an automatic rebalancing element in the product design, compared to 21% and 18% as of December 31, 2008 and March 31, 2008, respectively.

Our guaranteed minimum death benefits guarantee a minimum return on the contract value or an enhanced value, if applicable, to be used for purposes of determining benefits payable in the event of death. All of the \$33.2 billion, \$33.1 billion and \$36.0 billion of variable annuity account values with living benefit features as of March 31, 2009, December 31, 2008 and March 31, 2008, respectively, also contain guaranteed minimum death benefits. An additional \$21.3 billion, \$23.3 billion and \$34.2 billion of variable annuity account values, respectively, contain guaranteed minimum death benefits, but no living benefit features. The following table sets forth the account value and net amount at risk of our variable annuities with guaranteed minimum death benefits split between those that include an automatic rebalancing element in the design and those that do not, as of the dates indicated.

	March 31, 2009		December 31, 2008		Marc		008		
Risk Management Strategy:	Account Value		Amount t Risk	Account Value		: Amount nt Risk	Account Value		Amount t Risk
				(in n	nillion	ıs)			
Automatic rebalancing element	\$ 19,124	\$	1,843	\$ 17,653	\$	1,698	\$ 14,307	\$	381
No automatic rebalancing	35,397		16,093	38,733		14,404	55,911		5,073
Total variable annuity account values with guaranteed									
minimum death benefits	\$ 54,521	\$	17,936	\$ 56,386	\$	16,102	\$ 70,218	\$	5,454

As of March 31, 2009 approximately 35% of variable annuity account values with guaranteed minimum death benefits included an automatic rebalancing element in the product design, compared to 31% and 20% as of December 31, 2008 and March 31, 2008, respectively. As of March 31, 2009 approximately 10% of the net amount at risk associated with variable annuity account values with guaranteed minimum death benefits included an automatic rebalancing element in the product design, compared to 11% and 7% as of December 31, 2008 and March 31, 2008, respectively.

#### Retirement

Operating Results

The following table sets forth the Retirement segment s operating results for the periods indicated.

	Three Months Ended March 31,	
	2009	2008
	(in mi	illions)
Operating results:		
Revenues	\$ 1,208	\$ 1,267
Benefits and expenses	1,049	1,143
Adjusted operating income	159	124
Realized investment gains (losses), net, and related adjustments(1)	(318)	(179)
Related charges(2)	1	(3)
Investment gains (losses) on trading account assets supporting insurance liabilities, net(3)	197	(105)
Change in experience-rated contractholder liabilities due to asset value changes(4)	(97)	43
Income (loss) from continuing operations before income taxes and equity in earnings of operating joint ventures	\$ (58)	\$ (120)

- (1) Revenues exclude Realized investment gains (losses), net, and related adjustments. See Realized Investment Gains and Losses and General Account Investments Realized Investment Gains and Losses.
- (2) Benefits and expenses exclude related charges which represent the unfavorable (favorable) impact of Realized investment gains (losses), net, on change in reserves and the amortization of deferred policy acquisition costs.
- (3) Revenues exclude net investment gains and losses on trading account assets supporting insurance liabilities. See Investment Gains and Losses on Trading Account Assets Supporting Insurance Liabilities and Changes in Experience-Rated Contractholder Liabilities Due to Asset Value Changes.
- (4) Benefits and expenses exclude changes in contractholder liabilities due to asset value changes in the pool of investments supporting these experience-rated contracts. See Investment Gains and Losses on Trading Account Assets Supporting Insurance Liabilities and Changes in Experience-Rated Contractholder Liabilities Due to Asset Value Changes.

On October 10, 2008, we acquired MullinTBG Insurance Agency Services, LLC and related entities, or MullinTBG, a provider of executive benefit solutions and financing strategies, including nonqualified executive deferred compensation plans. The acquisition included \$8.9 billion of nonqualified full service retirement account values that we administer, which are not reported on our balance sheet.

Adjusted Operating Income

2009 to 2008 Three Month Comparison. Adjusted operating income for the Retirement segment increased \$35 million, from \$124 million in the first quarter of 2008 to \$159 million in the first quarter of 2009, reflecting an increase in adjusted operating income for our institutional investment products business and relatively unchanged results in our full service business. The increase in our institutional investment products business was driven by improved investment results primarily due to higher net yields, including the impact of the scheduled maturity of a single large guaranteed investment contract which had an interest crediting rate in excess of our

general account invested asset yield and increased net settlements on interest rate swaps used to manage the duration of the investment portfolio. Also contributing to the increase was a greater benefit from reserve releases, including reserve refinements primarily reflecting updates of client census data and more favorable case experience related to our group annuity blocks of business. Results for the full service business include the offsetting impacts of lower asset management fees, higher general and administrative expenses, higher investment results, and a favorable variance in the mark-to-market of embedded derivatives and derivative hedge positions related to the guaranteed minimum withdrawal benefits associated with certain defined contribution accounts. The decline in asset management fees was driven by a decrease in average full service fee-based retirement account values primarily resulting from equity market depreciation. The increase in general and administrative expenses primarily relates to expenses incurred to support several large client sales, partially offset by the absence of costs related to an interim service agreement relating to the retirement business acquired from Union Bank of California, N.A., which were included in the first quarter of 2008. The increase in investment results was driven by higher average invested assets in our general account due to full service participant transfers from our equity based separate account products to our general account stable value products, as well as higher net yields due to the impact of lower crediting rates on general account liabilities, resulting from rate resets. Substantially all of our stable value general account products are either fully or partially participating, and we have the ability to reset crediting rates annually or semi-annually giving effect to previous investment experience.

The results of the full service business also include a \$27 million favorable variance in the mark-to-market of embedded derivatives and derivative hedge positions related to the guaranteed minimum withdrawal benefits associated with certain defined contribution accounts. The favorable variance in our hedging results reflects a benefit of \$25 million in the first quarter of 2009 compared to a charge of \$2 million in the first quarter of 2008. The benefit in the first quarter of 2009 was primarily driven by a \$23 million benefit related to an update of the inputs used in the valuation of the embedded derivative to reflect a market-perceived increase in our own risk of non-performance. Under SFAS No. 157 we are required to incorporate our own risk of non-performance in the valuation of the embedded derivatives related to the guaranteed minimum withdrawal benefits. In light of first quarter of 2009 developments, including rating agency downgrades to the claims-paying ratings of our insurance subsidiaries, we updated the discount rate used in these valuations to reflect the market-perceived increase in our non-performance risk. In the first quarter of 2009, we used a higher discount rate in the valuation as a result of the increase in our non-performance risk, thereby reducing the value of the embedded derivative liabilities. For additional information regarding the methodology used in determining the fair value of the embedded derivatives related to the these guaranteed minimum withdrawal benefits, including the update relating to our non-performance risk, see Valuation of Assets and Liabilities Fair Value of Assets and Liabilities Valuation of Variable Annuity Optional Living Benefit Features. The corresponding increase in current period gross profits related to the \$27 million favorable variance in the mark-to-market of embedded derivatives and derivative hedge positions related to the guaranteed minimum withdrawal benefits led to an offsetting increase in the amortization of deferred policy acquisition costs of \$10 million.

We have evaluated the goodwill of the Retirement segment s full service business for potential impairment as of March 31, 2009 and determined that a goodwill impairment did not exist, as the fair value of the business, which was calculated by applying a discounted cash flow analysis to its expected future earnings, was greater than its carrying value. The carrying value of the Retirement segment s full service business goodwill was \$444 million as of March 31, 2009. Further market declines or other events impacting the fair value of this business, or increases in the level of equity required to support this business from what we had assumed, could result in an impairment of some or all of the goodwill associated with this business in future periods, resulting in a charge to General and administrative expenses.

Revenues

2009 to 2008 Three Month Comparison. Revenues, as shown in the table above under Operating Results, decreased \$59 million, from \$1,267 million in the first quarter of 2008 to \$1,208 million in the first quarter of 2009. Premiums decreased \$42 million, driven by lower single premium group annuity sales, partially offset by higher life-contingent structured settlement sales, and resulted in a corresponding decrease in policyholders benefits, including the change in policy reserves, as discussed below. Also contributing to the decrease was a \$32 million decline in net investment income, primarily reflecting lower portfolio yields, including lower interest rates on floating rate investments due to rate resets, partially offset by the impact of a larger base of invested assets in our full service business, driven by participant transfers from our equity based separate account products to our general account stable value products. Policy charges and fee income and asset management fees and other income increased \$15 million, driven by the favorable variance in the mark-to-market of embedded derivatives and derivative hedge positions related to the guaranteed minimum withdrawal benefits associated with certain defined contribution accounts, as discussed above, increased net settlements on interest rate swaps used to manage the duration of the investment portfolio, and \$12 million of revenues in the first quarter of 2009 associated with the acquired operations of MullinTBG. Partially offsetting these increases was a decline in asset management fees driven by a decrease in average full service fee-based retirement account values primarily resulting from equity market depreciation, as well as full service participant transfers from our equity based separate account products to our general account stable value products.

Benefits and Expenses

2009 to 2008 Three Month Comparison. Benefits and expenses, as shown in the table above under Operating Results, decreased \$94 million, from \$1,143 million in the first quarter of 2008 to \$1,049 million in the first quarter of 2009. Policyholders benefits, including the change in policy reserves, decreased \$54 million, primarily reflecting the decrease in premiums discussed above, as well as an increased benefit from reserve releases, including reserve refinements primarily reflecting updates of client census data and more favorable case experience related to our group annuity blocks of business. In addition, interest credited to policyholders account balances decreased \$45 million, primarily reflecting lower crediting rates on floating rate guaranteed investment products and lower crediting rates on full service stable value product liabilities due to rate resets, partially offset by the impact of higher full service general account stable value product account values from participant transfers from equity based separate account products. Interest expense decreased \$18 million, reflecting lower interest rates on borrowings used to support investments. Partially offsetting these decreases, general and administrative expenses, net of capitalization, increased \$16 million, driven by \$14 million of costs related to the acquired operations of MullinTBG and expenses incurred to support several large client sales, partially offset by the absence of costs related to an interim service agreement relating to the retirement business acquired from Union Bank of California, N.A., which were included in the first quarter of 2008. Amortization of deferred policy acquisition costs increased \$7 million, primarily due to the increase in gross profits related to the favorable variance in the mark-to-market of embedded derivatives and derivative hedge positions.

Sales Results and Account Values

The following table shows the changes in the account values and net additions (withdrawals) of Retirement segment products for the periods indicated. Net additions (withdrawals) are deposits and sales or additions, as applicable, minus withdrawals and benefits. These concepts do not correspond to revenues under U.S. GAAP, but are used as a relevant measure of business activity.

	Three Months Ended March 31, 2009 2008 (in millions)	
Full Service(1):		
Beginning total account value	\$ 99,738	\$ 112,192
Deposits and sales	10,489	4,586
Withdrawals and benefits	(4,231)	(3,933)
Change in market value, interest credited and interest income	(3,837)	(5,785)
Ending total account value	\$ 102,159	\$ 107,060
Net additions (withdrawals)	\$ 6,258	\$ 653
Institutional Investment Products(2): Beginning total account value Additions Withdrawals and benefits	\$ 50,491 627 (2,037)	\$ 51,591 1,810 (1,702)
Change in market value, interest credited and interest income	(152)	561
Other(3)	101	(593)
Ending total account value  Net additions (withdrawals)	\$ 49,030	\$ 51,667 \$ 108
rict additions (withdrawais)	\$ (1,410)	ψ 100

- (1) Ending total account value for the full service business includes assets of Prudential s retirement plan of \$4.5 billion and \$5.5 billion as of March 31, 2009 and 2008, respectively.
- (2) Ending total account value for the institutional investment products business includes assets of Prudential s retirement plan of \$5.0 billion and \$5.2 billion as of March 31, 2009 and 2008, respectively. Ending total account value for the institutional investments products business also includes \$1.5 billion as of March 31, 2009 related to collateralized funding agreements issued to the Federal Home Loan Bank of New York (FHLBNY), and \$2.4 billion and \$3.1 billion as of March 31, 2009 and 2008, respectively, related to affiliated funding agreements issued using the proceeds from the sale of Prudential Financial retail medium-term notes. For additional information regarding the FHLBNY and the retail medium-term notes program see, Liquidity and Capital Resources.
- (3) Other includes transfers from (to) the Asset Management segment of \$(206) million for the three months ended March 31, 2008. For the three months ended March 31, 2009, Other also includes \$1,500 million representing collateralized funding agreements issued to the FHLBNY and \$(1,015) million representing terminations of affiliated funding agreements utilizing proceeds from the issuances to FHLBNY. Remaining amounts for all periods presented primarily represent changes in asset balances for externally-managed accounts.

2009 to 2008 Three Month Comparison. Account values in our full service business amounted to \$102.2 billion as of March 31, 2009, an increase of \$2.421 billion from December 31, 2008. The increase in account values was driven primarily by net additions of \$6.3 billion, partially offset by a decrease in the market value of customer funds due to declines in the equity markets. Account values in our full service business as of March 31, 2009 decreased \$4.9 billion from March 31, 2008, driven primarily by a decrease in the market value of customer funds due to significant declines in the equity markets, partially offset by \$9.5 billion of net additions for the twelve months ended March 31, 2009, as well as the addition of \$8.9 billion of account values related to the acquisition of MullinTBG. Net additions increased \$5.605 billion, from \$653 million in the first quarter of 2008 to \$6.258 billion in the first quarter of 2009, primarily reflecting higher new plan sales. New plan sales in the first quarter of 2009 included a concentration of large client sales, including five client sales over \$100 million, totaling \$5.2 billion, compared to two client sales over \$100 million in the first quarter of 2008, which totaled \$0.3 billion.

Account values in our institutional investment products business amounted to \$49.0 billion as of March 31, 2009, a decrease of \$1.461 billion from December 31, 2008, primarily reflecting net withdrawals of \$1.410 billion, driven by the impact of scheduled withdrawals in our guaranteed investment products. Account values in our institutional investment products business as of March 31, 2009 decreased \$2.637 billion from March 31, 2008, also reflecting the impact of scheduled withdrawals in our guaranteed investment products. Net additions (withdrawals) decreased \$1.518 billion, from net additions of \$108 million in the first quarter of 2008 to net withdrawals of \$1.410 billion in the first quarter of 2009. This decrease reflects the impact of both lower additions and higher scheduled withdrawals in our guaranteed investment products. Sales of our retail notes and institutional notes have been negatively impacted by unfavorable capital markets conditions, in particular during the second half of 2008 and through the first quarter of 2009, as the stress experienced by global financial markets that began in the second half of 2007 continued and substantially increased. Rating agency downgrades to the claims-paying ratings of our insurance subsidiaries in the first quarter of 2009 could also have an adverse impact on sales of our guaranteed investment products in future periods.

#### Asset Management

Operating Results

The following table sets forth the Asset Management segment s operating results for the periods indicated.

	Three M Ma	ded	
	2009	20	800
	( <b>in</b> 1	millions)	
Operating results:			
Revenues	\$ 263	\$	548
Expenses	264		429
Adjusted operating income	(1)		119
Realized investment gains (losses), net, and related adjustments(1)	(6)		12
Equity in earnings of operating joint ventures and earnings attributable to noncontrolling interests(2)	(11)		18
Income (loss) from continuing operations before income taxes and equity in earnings of operating joint ventures	\$ (18)	\$	149

- (1) Revenues exclude Realized investment gains (losses), net, and related adjustments. See Realized Investment Gains and Losses and General Account Investments Realized Investment Gains and Losses.
- (2) Equity in earnings of operating joint ventures are included in adjusted operating income but excluded from income from continuing operations before income taxes and equity in earnings of operating joint ventures as they are reflected on a U.S. GAAP basis on an after-tax basis as a separate line in our Unaudited Interim Consolidated Statements of Operations. Earnings attributable to noncontrolling interests are excluded from adjusted operating income but included in income from continuing operations before income taxes and equity in earnings of operating joint ventures as they are reflected on a U.S. GAAP basis as a separate line in our Unaudited Interim Consolidated Statements of Operations. Earnings attributable to noncontrolling interests represent the portion of earnings from consolidated entities that relate to the equity interests of minority investors, and are reflected on a U.S. GAAP basis as a separate line on the Company s Unaudited Interim Consolidated Statements of Operations.

Adjusted Operating Income

2009 to 2008 Three Month Comparison. Adjusted operating income decreased \$120 million, from income of \$119 million in the first quarter of 2008 to a loss of \$1 million in the first quarter of 2009. Results in 2009 reflect a decrease in performance based incentive fees, primarily related to institutional real estate funds reflecting a decline in real estate values, in addition to lower asset management fees primarily from retail and

institutional customer assets as a result of decreased asset values due to market depreciation. Results of the segment s proprietary investing business decreased due to a decline in real estate proprietary investing, primarily from co-investments, reflecting lower real estate values, partially offset by gains in equity investments and lower losses in a fixed income fund. In the fourth quarter of 2008, two entities within the Asset Management segment

made a request to redeem their entire investment from this fixed income fund, which aggregate investments were \$170 million at March 31, 2009. The fixed income fund has indicated that it expects to meet redemptions over a period of time with the first redemption payment expected to occur in the second quarter of 2009. Due to market conditions, the amount and timing of the payment of subsequent redemption proceeds cannot be predicted at this time. In addition, results for the first quarter of 2009 reflect lower income related to mutual fund service fees and securities lending activities, partially offset by a decrease in compensation costs.

#### Revenues

The following tables set forth the Asset Management segment s revenues, presented on a basis consistent with the table above under Results, by type, asset management fees by source and assets under management for the periods indicated. In managing our business we analyze assets under management, which do not correspond to U.S. GAAP assets, because a principal source of our revenues are fees based on assets under management.

	Three Months Ended		
		rch 31,	
	2009	20 nillions)	800

Retail customers(2)	61.3	81.8
General account	172.3	177.9
Total	\$ 386.3	\$ 433.9

- (1) Consists of third party institutional assets and group insurance contracts.
- (2) Consists of individual mutual funds and both variable annuities and variable life insurance assets in our separate accounts. This also includes funds invested in proprietary mutual funds through our defined contribution plan products. Fixed annuities and the fixed rate options of both variable annuities and variable life insurance are included in the general account.

The following table sets forth the proprietary investments of the Asset Management segment at fair market value (including the value of derivative instruments used to mitigate equity market and currency risk) by asset class and source as of the dates indicated.

	March 31, 2009 (in	March 31, 2008 millions)
Co-Investments:		
Real Estate	\$ 275	\$ 220
Fixed Income(1)	171	530
Seed Investments:		
Real Estate	216	198
Public Equity(2)	168	379
Fixed Income	56	71
Loans Secured by Investor Equity Commitments or Fund Assets:		
Real Estate secured by Investor Equity	135	658
Real Estate secured by Fund Assets	307	161
Total	\$ 1,328	\$ 2,217

- (1) Includes aggregate investments in a fixed income fund of \$170 million and \$490 million at March 31, 2009 and 2008, respectively.
- (2) The March 31, 2009 total of \$168 million includes \$57 million in broker trade receivables. These receivables were settled for cash in early April.

2009 to 2008 Three Month Comparison. Revenues, as shown in the table above under Operating Results, decreased \$285 million, from \$548 million in the first quarter of 2008 to \$263 million in the first quarter of 2009. Service, distribution and other revenues decreased \$120 million primarily related to lower revenues in certain consolidated real estate funds, which were fully offset by lower expenses related to minority interest in these funds. In addition, service fee revenues declined primarily due to a change in the service fee arrangement with Wachovia Securities and lower assets under management, with a corresponding decrease in expense. The remainder of the decrease in service, distribution and other revenues includes lower mutual fund service fee revenues, as well as a decline in revenues related to securities lending activities. Incentive fees decreased \$89 million primarily related to institutional real estate funds as a result of adverse real estate market conditions. A portion of these incentive based fees are offset in incentive compensation expense in accordance with the terms of the contractual agreements. Certain of our incentive fees continue to be subject to positive or negative future adjustment based on cumulative fund performance in relation to specified benchmarks. As of March 31, 2009, \$123 million of cumulative incentive fee revenue, net of compensation, is subject to future adjustment, which is essentially unchanged from December 31, 2008. In the first quarter of 2009, adjustments of \$23 million related to previously recognized incentive fees contributed to the decline in incentive fees resulting from fund performance. Asset management fees decreased \$42 million, primarily from the management of retail and institutional customer assets as a result of lower asset values due to market depreciation. In addition, revenues from proprietary investing decreased \$26 million driven by lower real estate proprietary investing primarily from co-investments, partially offset by an increase in a fixed i

#### Expenses

2009 to 2008 Three Month Comparison. Expenses, as shown in the table above under Operating Results, decreased \$165 million, from \$429 million in the first quarter of 2008 to \$264 million in the first quarter of 2009, driven by lower expenses related to the decline in mutual fund service fee revenue, incentive based fees, and revenues associated with certain real estate funds, as discussed above. In addition, compensation costs decreased primarily due to lower incentive compensation as a result of lower revenues, as well as lower headcount.

#### U.S. Individual Life and Group Insurance Division

(1) Revenues exclude Realized investment gains (losses), net, and related adjustments. See Realized Investment Gains and Losses and General Account Investments Realized Investment Gains and Losses.

Adjusted Operating Income

2009 to 2008 Three Month Comparison. Adjusted operating income decreased \$56 million, from \$96 million in the first quarter of 2009. The decrease in adjusted operating income reflects a net increase in amortization of deferred policy acquisition costs net of related amortization of unearned revenue reserves, primarily reflecting the impact of the recent unfavorable equity markets on variable product policy persistency. Also contributing to the decrease in adjusted operating income in 2009 was a decrease in asset based fees due to lower separate account asset balances reflecting the impact of the unfavorable equity markets, as well as losses on separate account fund liquidations associated with variable policy lapses and surrenders. Due to policyholder options under some of the variable contracts, lapses may occur on a quarter lag with the market risk during this lag being borne by the Company. Variable policy lapses may continue to negatively impact results of the second quarter of 2009 due to the continued unfavorable equity markets in the first quarter of 2009. Unfavorable mortality experience, net of reinsurance, compared to the first quarter of 2008 also contributed to the decrease in adjusted operating income.

The net increase in the amortization of deferred policy acquisition costs net of related amortization of unearned revenue reserves includes the impact of actual market performance on both actual profits and estimated future gross profits, used as the basis for amortizing deferred policy acquisition costs. We continue to derive our future rate of return assumptions using a reversion to the mean approach, a common industry practice. Under this approach, we consider actual returns over a period of time and initially adjust future projected returns over a four year period so that the assets grow at the long-term expected rate of return for the entire period. However, beginning in the fourth quarter of 2008, the projected future rate of return calculated using the reversion to the mean approach was greater than 10.9%, our current maximum future rate of

return assumption across all asset types for this business. As a result, we utilized the maximum future rate of return over the four year period, thereby limiting the impact of the reversion to the mean, and further decreasing our estimate of total gross profits.

Revenues

2009 to 2008 Three Month Comparison. Revenues, as shown in the table above under Operating Results, were unchanged from the first quarter of 2008 to the first quarter of 2009 at \$680 million, as an increase in premiums and net investment income was offset by decreases in asset based fees. Premiums increased

\$12 million, primarily due to increased premiums on term life insurance reflecting continued growth of our in force block of term insurance. Net investment income increased \$17 million, reflecting higher asset balances primarily from the financing of regulatory requirements associated with statutory reserves for certain term and universal life insurance policies and growth in universal life account balances due to increased policyholder deposits, partially offset by losses on an investment in a real property separate account fund. Policy charges and fees and asset management fees and other income decreased \$29 million, primarily reflecting lower asset based fees due to lower separate account asset balances reflecting the unfavorable impact of equity market performance as well as losses on separate account fund liquidations associated with variable policy lapses and surrenders.

### Benefits and Expenses

2009 to 2008 Three Month Comparison. Benefits and expenses, as shown in the table above under Operating Results, increased \$56 million, from \$584 million in the first quarter of 2008 to \$640 million in the first quarter of 2009. Policyholders benefits, including interest credited to policyholders account balances, increased \$37 million, reflecting higher death claim costs, higher policyholder reserves from growth in our in force block of term insurance and an increase in interest credited to policyholders account balances due to growth in universal life account balances from increased policyholder deposits. Amortization of deferred policy acquisition costs increased \$17 million, primarily reflecting the impact of unfavorable equity markets on variable product policy persistency.

#### Sales Results

The following table sets forth individual life insurance annualized new business premiums for the periods indicated. In managing our individual life insurance business, we analyze annualized new business premiums, which do not correspond to revenues under U.S. GAAP, because annualized new business premiums measure the current sales performance of the business, while revenues primarily reflect the renewal persistency and aging of in force policies written in prior years and net investment income, in addition to current sales. Annualized new business premiums include 10% of first year excess premiums and deposits.

	Three Months Ende March 31,			nded
	20	009	20	800
		(in millions)		
Annualized New Business Premiums(1):				
Excluding corporate-owned life insurance:				
Variable life	\$	4	\$	11
Universal life		28		17
Term life		52		51
Total excluding corporate-owned life insurance		84		79
Corporate-owned life insurance				
•				
Total	\$	84	\$	79
Total	Ψ	01	Ψ	"
Annualized new business premiums by distribution channel, excluding corporate-owned life insurance(1):				
• • • • • • • • • • • • • • • • • • • •	d.	22	Ф	20
Prudential Agents	\$	22	\$	28
Third party		62		51
Total	\$	84	\$	79

(1) The Individual Life Sales measure was modified in the fourth quarter of 2008 to reflect annualized new business premiums, which represent annualized scheduled premiums plus 10% of excess (unscheduled) and single premiums from new sales. This new measure provides a more meaningful presentation of sales results and trends than the former measure, which included 100% of excess (unscheduled) or single premiums. Prior period amounts have been restated to conform to the current presentation.

2009 to 2008 Three Month Comparison. Sales of new life insurance, excluding corporate-owned life insurance, measured as described above, increased \$5 million, from \$79 million in the first quarter of 2008 to \$84 million in the first quarter of 2009. The increase in sales is primarily due to a \$10 million increase in sales of universal life products by the third party distribution channel, partially offset by a \$7 million decrease in sales of variable life products by Prudential Agents. Term life product sales were slightly higher than the prior year quarter. Sales from the third party distribution channel were \$11 million higher than the prior year quarter due to higher sales of universal life products reflecting the impact of product repricing in the second half of 2008 as well as a higher level of large case sales in the first quarter of 2009. Sales by Prudential Agents were \$6 million lower than the prior year quarter primarily due to lower sales of variable life products which sales were impacted by the unfavorable market conditions experienced in the first quarter of 2009. The number of Prudential Agents decreased from 2,436 at March 31, 2008 to 2,389 at March 31, 2009.

Policy Surrender Experience

The following table sets forth the individual life insurance business—policy surrender experience for variable and universal life insurance, measured by cash value of surrenders, for the periods indicated. These amounts do not correspond to expenses under U.S. GAAP. In managing this business, we analyze the cash value of surrenders because it is a measure of the degree to which policyholders are maintaining their in force business with us, a driver of future profitability. Generally, our term life insurance products do not provide for cash surrender values.

	Three Months Ended March 31,		
	2009 (\$ in r	2008 millions)	
Cash value of surrenders	\$ 256	\$ 178	
Cash value of surrenders as a percentage of mean future benefit reserves, policyholders account balances, and separate account balances	5.5%	3.1%	

2009 to 2008 Three Month Comparison. The total cash value of surrenders increased \$78 million, from \$178 million in the first quarter of 2008 to \$256 million in the first quarter of 2009, reflecting a greater volume of surrenders of variable life insurance in 2009 compared to the prior year quarter, due primarily to market conditions and policyholders electing to surrender their policies rather than make premium payments or make the contractually required deposits needed to keep the policies in force. The level of surrenders as a percentage of mean future policy benefit reserves, policyholders account balances and separate account balances increased from 3.1% in the first quarter of 2008 to 5.5% in the first quarter of 2009.

### **Group Insurance**

Operating Results

The following table sets forth the Group Insurance segment s operating results for the periods indicated.

	Three Months Ende March 31,			
	2009		2008	
		(in m	illions	)
Operating results:				
Revenues	\$ 1,	333	\$	1,257
Benefits and expenses	1,	240		1,167
Adjusted operating income		93		90
Realized investment gains (losses), net, and related adjustments(1)		(99)		(87)
Related charges(2)		(2)		
		. ,		
Income (loss) from continuing operations before income taxes and equity in earnings of operating joint ventures	\$	(8)	\$	3

- (1) Revenues exclude Realized investment gains (losses), net, and related adjustments. See Realized Investment Gains and Losses and General Account Investments Realized Investment Gains and Losses.
- (2) Benefits and expenses exclude related charges which represent the unfavorable (favorable) impact of Realized investment gains (losses), net, on interest credited to policyholders account balances.

Adjusted Operating Income

2009 to 2008 Three Month Comparison. Adjusted operating income increased \$3 million, from \$90 million in the first quarter of 2008 to \$93 million in the first quarter of 2009, reflecting more favorable claims experience in our group life and group disability businesses. Partially offsetting this increase was the benefit to the prior year quarter of a \$20 million premium adjustment for updated data on a large group life insurance case. Also offsetting the increase in adjusted operating income was higher operating expenses primarily related to business growth.

Revenues

2009 to 2008 Three Month Comparison. Revenues, as shown in the table above under Operating Results, increased by \$76 million, from \$1.257 billion in the first quarter of 2008 to \$1.333 billion in the first quarter of 2009. Group life premiums and policy charges and fee income increased by \$64 million, from \$793 million in the first quarter of 2008 to \$857 million in the first quarter of 2009. This increase primarily reflects higher premiums from non-experience-rated group life business due to growth of business in force resulting from new sales, and strong persistency of 96% in the first quarter of 2009 compared to 95% in the first quarter of 2008. Partially offsetting the increase in group life premium is the premium adjustment recorded during the first quarter of 2008 discussed above. Group disability premiums and policy charges and fee income, which include long-term care products, increased by \$10 million from \$280 million in the first quarter of 2008 to \$290 million in the first quarter of 2009. This increase primarily reflects growth in business in force resulting from new sales and strong persistency of 95% in the first quarter of 2009, which compared to 91% in the first quarter of 2008.

Benefits and Expenses

The following table sets forth the Group Insurance segment s benefits and administrative operating expense ratios for the periods indicated.

	Three Month March	
	2009	2008
Benefits ratio(1):		
Group life	88.0%	87.1%
Group disability	86.2	91.1
Administrative operating expense ratio(2):		
Group life	8.8	8.2
Group disability	17.9	17.4

- (1) Ratio of policyholder benefits to earned premiums, policy charges and fee income. Group disability ratios include long-term care products.
- (2) Ratio of administrative operating expenses (excluding commissions) to gross premiums, policy charges and fee income. Group disability ratios include long-term care products.

2009 to 2008 Three Month Comparison. Benefits and expenses, as shown in the table above under Operating Results, increased by \$73 million, from \$1.167 billion in the first quarter of 2008 to \$1.240 billion in the first quarter of 2009. This increase reflects a \$59 million increase in policyholders benefits, including the change in policy reserves, from \$945 million in the first quarter of 2008 to \$1.004 billion in the first quarter of 2009, primarily due to growth of business in force, partially offset by more favorable claims experience in both our group life and group disability businesses. Also contributing to the increase in benefits and expenses were higher operating expenses primarily related to business growth.

The group life benefits ratio deteriorated 0.9 percentage points from the first quarter of 2008 to the first quarter of 2009, reflecting the premium adjustment recorded during the first quarter of 2008 for updated data on a large case, as discussed above. Excluding the impact of this premium adjustment, the group life benefits ratio improved approximately 1.1 percentage points due to more favorable mortality experience. The group disability benefits ratio improved 4.9 percentage points from the first quarter of 2008 to the first quarter of 2009, due to more favorable claim experience. The group life and group disability administrative operating expense ratios were relatively unchanged from the first quarter of 2008 to the first quarter of 2009.

Sales Results

The following table sets forth the Group Insurance segment s annualized new business premiums for the periods indicated. In managing our group insurance business, we analyze annualized new business premiums, which do not correspond to revenues under U.S. GAAP, because annualized new business premiums measure the current sales performance of the business unit, while revenues primarily reflect the renewal persistency and aging of in force policies written in prior years and net investment income, in addition to current sales.

	Three Mont March	
	2009 (in milli	2008
Annualized new business premiums(1):	(111 1111111	ions)
Group life	\$ 210	\$ 112

Group disability(2)	134	114
Total	\$ 344	\$ 226

- (1) Amounts exclude new premiums resulting from rate changes on existing policies, from additional coverage under our Servicemembers Group Life Insurance contract and from excess premiums on group universal life insurance that build cash value but do not purchase face amounts, and include premiums from the takeover of claim liabilities.
- (2) Includes long-term care products.

2009 to 2008 Three Month Comparison. Total annualized new business premiums increased \$118 million, from \$226 million in the first quarter of 2008 to \$344 million in the first quarter of 2009. Group life sales increased \$98 million driven primarily by increased large case sales to both new and existing customers and higher premiums associated with the assumption of existing liabilities from third parties during first quarter of 2009. Group disability sales increased \$20 million due to increased sales to new and existing customers, partially offset by lower disability premiums associated with the assumption of existing liabilities from third parties during the first quarter of 2009.

#### **International Insurance and Investments Division**

### Impact of foreign currency exchange rate movements on earnings

As a U.S.-based company with significant business operations outside the U.S., we seek to mitigate the risk that future unfavorable foreign currency exchange rate movements will reduce our U.S. dollar equivalent earnings. The operations of our International Insurance and International Investments segments are subject to currency fluctuations that can materially affect their U.S. dollar earnings from period to period even if earnings on a local currency basis are relatively constant. As discussed further below, we enter into forward currency derivative contracts, as well as dual currency and synthetic dual currency investments, as part of our strategy to effectively fix the currency exchange rates for a portion of our prospective non-U.S. dollar denominated earnings streams, thereby reducing earnings volatility from unfavorable and favorable foreign currency exchange rate movements.

### Forward currency hedging program

The financial results of our International Insurance segment and International Investments segment, excluding the global commodities group, for all periods presented reflect the impact of an intercompany arrangement with Corporate and Other operations pursuant to which the segments non-U.S. dollar denominated earnings in all countries are translated at fixed currency exchange rates. The fixed rates are determined in connection with a currency income hedging program designed to mitigate the risk that unfavorable exchange rate changes will reduce the segments U.S. dollar equivalent earnings. Pursuant to this program, Corporate and Other operations executes forward currency contracts with third parties to sell the hedged currency in exchange for U.S. dollars at specified exchange rates. The maturities of these contracts correspond with the future periods in which the identified non-U.S. dollar denominated earnings are expected to be generated. This program is primarily associated with the International Insurance segment s businesses in Japan, Korea and Taiwan and the International Investments segment s businesses in Korea and Europe. The intercompany arrangement with Corporate and Other operations increased (decreased) revenues and adjusted operating income of each segment as follows for the periods indicated:

	Three Mont March	
	2009	2008
	(in milli	ions)
Impact on revenues and adjusted operating income:		
International Insurance	\$ (4)	\$
International Investments	3	
Total International Insurance and Investments Division	\$ (1)	\$

Results of Corporate and Other operations include any differences between the translation adjustments recorded by the segments and the gains or losses recorded from the forward currency contracts that settled during the period. The consolidated net impact of this program recorded within the Corporate and Other operations were gains of \$6 million and \$1 million for the three months ended March 31, 2009 and 2008.

The notional amount of these forward currency contracts was \$2.6 billion and \$2.8 billion as of March 31, 2009 and December 31, 2008, respectively, of which \$1.7 billion and \$1.8 billion as of March 31, 2009 and December 31, 2008, respectively, related to our Japanese insurance operations.

Dual currency and synthetic dual currency investments

In addition, our Japanese insurance operations also hold dual currency investments in the form of fixed maturities and loans. The principal of these dual currency investments are yen-denominated while the related interest income is U.S. dollar denominated. These investments are the economic equivalent of exchanging what would otherwise be fixed streams of yen-denominated interest income for fixed streams of U.S. dollars interest income. Our Japanese insurance operations also hold investments in yen-denominated investments that have been coupled with cross-currency coupon swap agreements, creating synthetic dual currency investments. The yen/U.S. dollar exchange rate is effectively fixed, as we are obligated in future periods to exchange fixed amounts of Japanese yen interest payments generated by the yen-denominated investments for U.S. dollars at the yen/U.S. dollar exchange rates specified by the cross-currency coupon swap agreements. As of March 31, 2009 and December 31, 2008, the notional amount of these investments was ¥500 billion, or \$4.4 billion, and ¥500 billion, or \$4.4 billion, respectively, based upon the foreign currency exchange rates applicable at the time these investments were acquired. For the three months ended March 31, 2009 and 2008, the weighted average yields generated by these investments were 2.7% and 2.4%, respectively.

Presented below is the fair value of these instruments as reflected on our balance sheet for the periods presented.

	March 31, 2009		nber 31, 008
	(in	millions)	
Cross-currency coupon swap agreements	\$ 31	\$	12
Foreign exchange component of interest on dual currency investments	(62)		(82)
Total	\$ (31)	\$	(70)

The table below presents as of March 31, 2009, the yen-denominated earnings subject to our dual currency and synthetic dual currency investments and the related weighted average exchange rates resulting from these investments.

Year	(1) Interest component of dual currency investments	Cross- coupon s of synt currency	currency wap element hetic dual investments (in billions)	earning	enominated gs subject to these estments	Weighted average exchange rate per U.S. Dollar (Yen per \$)
Remainder of 2009	¥ 2.7	¥	4.4	¥	7.1	88.9
2010	3.4		5.0		8.4	87.4
2011	3.2		3.9		7.1	84.9
2012	3.1		2.9		6.0	83.3
2013-2034	32.4		53.5		85.9	79.1
Total	¥ 44.8	¥	69.7	¥	114.5	80.8

(1) Yen amounts are imputed from the contractual U.S. dollar denominated interest cash flows.

The present value of the U.S. dollar denominated earnings reflected in the table above is \$1.1 billion as of March 31, 2009. The table above does not reflect the forward currency income hedging program discussed above. In establishing the level of yen-denominated earnings that will be hedged through the forward currency income hedging program we take into account the anticipated level of U.S. dollar denominated earnings that will

110

be generated by dual currency and synthetic dual currency investments, as well as the anticipated level of U.S. dollar denominated earnings that will be generated by U.S. dollar denominated products and investments, which are discussed in greater detail below.

Impact of foreign currency exchange rate movements on equity

Hedges of U.S. GAAP equity and available economic capital

We also seek to mitigate the risk that future unfavorable foreign currency exchange rate movements will reduce our U.S. dollar equivalent equity in foreign subsidiaries through various hedging strategies. We are in the process of developing an economic capital framework, which includes available economic capital, as discussed in Liquidity and Capital Resources Prudential Financial Economic Capital, and as we further develop this framework, or as other events occur, we may alter this strategy. Available economic capital represents the excess of the fair value of assets over the fair value of liabilities for the current in force block of business. In our Japanese insurance operations we currently seek to hedge a portion of estimated available economic capital and other measures of value, including the amount attributable to the U.S. GAAP equity of our Japanese insurance operations, which totaled \$4.7 billion as of March 31, 2009 excluding Accumulated other comprehensive income components of Stockholders Equity and certain other adjustments. We hedge the estimated available economic capital in our Japanese insurance operations through a variety of instruments, including U.S. dollar denominated assets financed with yen-denominated liabilities and equity held in our Japanese insurance operations. In addition, we may also hedge estimated available economic capital using instruments held in our U.S. domiciled entities, such as U.S. dollar denominated debt that has been swapped to yen. In certain of our other foreign insurance operations, the U.S. GAAP equity exposure is mitigated by entering into forward currency contracts that generally qualify for hedge accounting treatment, and by holding U.S. dollar denominated investments. Beginning in the second quarter of 2009, we anticipate reducing or eliminating our hedges of the U.S. GAAP equity exposure of our Korean operations due to a variety of considerations, including a desire to limit the potential for cash settlement outflows that would result from a strengthening K

As of March 31, 2009, the aggregate amount of the instruments serving as hedges of our estimated available economic capital in our Japanese insurance operations amounted to \$6.7 billion, a decrease of \$1.1 billion from the \$7.8 billion hedged as of December 31, 2008. These instruments were principally comprised of available for sale U.S. dollar denominated investments with an amortized cost of \$4.4 billion and held to maturity U.S. dollar denominated investments with an amortized cost of \$1.5 billion held in our Japanese insurance operations, as well as \$0.7 billion of net yen-denominated liabilities held in our U.S. domiciled entities, including a portion that has been converted to yen using swaps. The effects of the U.S. dollar denominated liabilities are reported in Corporate & Other operations. These amounts do not reflect the forward currency income hedging program or dual currency and synthetic dual currency investments discussed above, which when added to the \$6.7 billion of instruments serving as a hedge of our estimated available economic capital, results in a total estimated available economic capital hedge of approximately \$9.5 billion as of March 31, 2009.

The available for sale investments under U.S. GAAP are recorded at fair value on the balance sheet with unrealized changes in fair value (except as described below for impairments), including those from changes in foreign currency exchange rate movements, recorded as unrealized gains or losses in Accumulated other comprehensive income within Stockholders Equity. Changes in the U.S. GAAP equity of our Japanese insurance operations due to foreign currency exchange rate movements are also recorded in Accumulated other comprehensive income as a Currency translation adjustment. The impact of changes in foreign currency exchange rates on the U.S. GAAP equity of our Japanese insurance operations is partially offset by foreign currency exchange related changes in designated Yen-denominated debt and other hedging instruments within the Currency translation adjustment account. To a larger degree the impact of foreign exchange rate changes on the U.S. GAAP equity of our Japanese insurance operations is offset by the related changes in fair value due to foreign currency exchange rate movements of the portion of the available for sale investments that supports our Japanese insurance operations U.S. GAAP equity, hence creating a natural equity hedge. For U.S. dollar

denominated investments that support the portion of estimated available economic capital above our U.S. GAAP equity there is no offsetting impact to equity.

The investments designated as held to maturity under U.S. GAAP are recorded at amortized cost on the balance sheet, but are remeasured for foreign currency exchange rate movements, with the related change in value recorded within Asset management fees and other income. The remeasurement related to the change in value for foreign currency exchange rate movements for these investments is excluded from adjusted operating income, as part of our application of the hedge of available economic capital.

The U.S. dollar denominated investments that hedge a portion of our estimated available economic capital in our Japanese insurance operations pay a coupon, which is reflected within Net investment income, and, therefore, included in adjusted operating income, which is approximately 200 to 300 basis points greater than what a similar yen-based investment would pay. The incremental impact of this higher yield will vary over time, and is dependent on the duration of the underlying investment, as well as interest rate environments in the U.S. and Japan at the time of the investment. See Realized Investment Gains and Losses and General Account Investments General Account Investments Investment Results for a discussion of the investment yields generated by our Japanese insurance operations.

Because these U.S. dollar denominated investments are recorded on the books of yen-based entities, foreign currency exchange movements will impact their value. To the extent the value of the yen strengthens as compared to the U.S. dollar, the value of these U.S. dollar denominated investments will decrease as a result of changes in the foreign currency exchange rates. Upon the ultimate sale or maturity of the U.S. dollar denominated investments, any realized change in value related to changes in the foreign currency exchange rates will be included in Realized gains (losses), net within the income statement and, excluded from adjusted operating income. Similarly, other-than-temporary impairments on these investments may include the impact of changes in foreign currency exchange rates, which will be included in Realized gains (losses), net within the income statement, and, as such, excluded from adjusted operating income. See Realized Investment Gains and Losses and General Account Investments General Account Investments Fixed Maturity Securities Other-than-Temporary Impairments of Fixed Maturity Securities for a discussion of our policies regarding impairments.

In 2008, we began incorporating the impact of foreign currency exchange rate movements on the remaining U.S. dollar denominated net asset position of our Japanese insurance operations, which primarily relates to accrued investment income, as part of our overall application of the hedge of available economic capital. These U.S. dollar denominated assets and liabilities are remeasured for foreign currency exchange rate movements, as they are non-yen denominated items on the books of yen-based entities, and the related change in value is recorded within Asset management fees and other income. As these U.S. dollar denominated assets and liabilities are included in the determination of the Japanese insurance operations level of available economic capital, we exclude all remeasurement related to these items from adjusted operating income.

In addition, as of March 31, 2009 and December 31, 2008, our international insurance operations also had \$6.6 billion and \$6.2 billion, respectively, of foreign currency exposure from U.S. dollar liabilities for U.S. dollar denominated products issued by these operations. A portion of these liabilities are coinsured to our U.S. domiciled insurance operations and supported by U.S. dollar denominated assets. For the U.S. dollar liabilities retained in Japan, our Japanese operations hold U.S. dollar denominated investments, including a significant portion that are designated as available for sale, and other related U.S. dollar denominated net assets, primarily accrued investment income, to support these products. The change in value due to changes in foreign currency exchange rate movements, or remeasurement, of the related U.S. dollar denominated assets and liabilities associated with these products is excluded from adjusted operating income.

#### International Insurance

The results of our International Insurance operations are translated on the basis of weighted average monthly exchange rates, inclusive of the effects of the intercompany arrangement discussed above. To provide a better understanding of operating performance within the International Insurance segment, where indicated below, we have analyzed our results of operations excluding the effect of the year over year change in foreign currency exchange rates. Our results of operations excluding the effect of foreign currency fluctuations were derived by translating foreign currencies to U.S. dollars at uniform exchange rates for all periods presented, including, for constant dollar information discussed below, Japanese yen at a rate of 106 yen per U.S. dollar; Korean won at a rate of 950 won per U.S. dollar. In addition, for constant dollar information discussed below, activity denominated in U.S. dollars is reported based on the amounts as transacted in U.S. dollars. Annualized new business premiums presented on a constant exchange rate basis in the Sales Results section below reflect translation based on these same uniform exchange rates.

### Operating Results

The following table sets forth the International Insurance segment s operating results for the periods indicated.

	Three Months Ende March 31, 2009 2008 (in millions)		h 31, 2008
Operating results:			
Revenues:			
Life Planner operations	\$ 1,0	642	\$ 1,577

		425	413
	2	+23	413
Realized investment gains (losses), net, and related adjustments(1)	(4	457)	(68)
Related charges(1)(2)		52	(27)
Investment gains (losses) on trading account assets supporting insurance liabilities, net(3)		(52)	(157)
Change in experience-rated contractholder liabilities due to asset value changes(4)		52	157
Equity in earnings of operating joint ventures and earnings attributable to noncontrolling interests(5)		2	1
Income from continuing operations before income taxes and equity in earnings of operating joint ventures	\$	22	\$ 319

(1) Revenues exclude Realized investment gains (losses), net, and related charges and adjustments. The related charges represent payments related to the market value adjustment features of certain of our annuity products and the impact of Realized investment gains (losses), net, on the amortization of unearned revenue reserves. See Realized Investment Gains and Losses and General Account Investments Realized Investment Gains and Losses.

- (2) Benefits and expenses exclude related charges that represent the element of Dividends to policyholders that is based on a portion of certain realized investment gains required to be paid to policyholders and the impact of Realized investment gains (losses), net, on the amortization of deferred policy acquisition costs.
- (3) Revenues exclude net investment gains and losses on trading account assets supporting insurance liabilities. See Investment Gains and Losses on Trading Account Assets Supporting Insurance Liabilities and Changes in Experience-Rated Contractholder Liabilities Due to Asset Value Changes.
- (4) Benefits and expenses exclude changes in contractholder liabilities due to asset value changes in the pool of investments supporting these experience-rated contracts. See Investment Gains and Losses on Trading Account Assets Supporting Insurance Liabilities and Changes in Experience-Rated Contractholder Liabilities Due to Asset Value Changes.
- (5) Equity in earnings of operating joint ventures are included in adjusted operating income but excluded from income from continuing operations before income taxes and equity in earnings of operating joint ventures as they are reflected on a U.S. GAAP basis on an after-tax basis as a separate line in our Unaudited Interim Consolidated Statements of Operations. Earnings attributable to noncontrolling interests are excluded from adjusted operating income but included in income from continuing operations before income taxes and equity in earnings of operating joint ventures as they are reflected on a U.S. GAAP basis as a separate line in our Unaudited Interim Consolidated Statements of Operations. Earnings attributable to noncontrolling interests represents the portion of earnings from consolidated entities that relates to the equity interests of minority investors.

On March 2, 2009, we announced that Gibraltar Life signed a definitive agreement to serve as reorganization sponsor for Yamato Life, a life insurance company in Japan with general account assets of approximately \$2.2 billion that declared bankruptcy in October 2008. The agreement provides for Yamato to be acquired by Gibraltar without purchase price consideration, but that Gibraltar Life will contribute capital, from its general account assets, to Yamato in connection with the acquisition. The amount of the capital contribution is expected to be approximately \$100 million. This transaction is expected to close in the second or third quarter of 2009.

Adjusted Operating Income

2009 to 2008 Three Month Comparison. Adjusted operating income from Life Planner operations increased \$9 million, from \$285 million in the first quarter of 2008 to \$294 million in the first quarter of 2009, including a \$1 million unfavorable impact of currency fluctuations. This increase primarily reflects improved investment income margins and the continued growth of our Japanese Life Planner operation. The improved investment income margins primarily reflect higher investment yields on fixed maturities in our Japanese investment portfolio and investment portfolio growth. Partially offsetting these items was increased amortization of deferred policy acquisition costs reflecting less favorable persistency and unfavorable market conditions. In addition, higher general and administrative expenses, as discussed below, also partially offset the increases in adjusted operating income.

Gibraltar Life s adjusted operating income increased \$3 million, from \$128 million in the first quarter of 2008 to \$131 million in the first quarter of 2009, with no impact from currency fluctuations. This increase reflects improved investment income margins which benefited from various investment portfolio strategies and the continued growth of our U.S. dollar denominated fixed annuity product. Also contributing to the increase was more favorable mortality experience than that of the prior year quarter. Offsetting these increases were higher general and administrative expenses.

Revenues

2009 to 2008 Three Month Comparison. Revenues, as shown in the table above under Operating Results, increased \$212 million, from \$2.325 billion in the first quarter of 2008 to \$2.537 billion in the first quarter of 2009, including a net favorable impact of \$83 million relating to currency fluctuations. Excluding the impact of currency fluctuations, revenues increased \$129 million, from \$2.336 billion in the first quarter of 2008 to \$2.465 billion in the first quarter of 2009.

Revenues from our Life Planner operations increased \$65 million, from \$1.577 billion in the first quarter of 2008 to \$1.642 billion in the first quarter of 2009, including a net unfavorable impact of currency fluctuations of \$38 million. Excluding the impact of currency fluctuations, revenues increased \$103 million from the first

quarter of 2008 to the first quarter of 2009. This increase in revenues came primarily from increases in premiums and policy charges and fee income of \$59 million, from \$1.319 billion in the first quarter of 2008 to \$1.378 billion in the first quarter of 2009. Premiums and policy charges and fee income from our Japanese Life Planner operation increased \$51 million, from \$944 million in the first quarter of 2008 to \$995 million in the first quarter of 2009, primarily reflecting growth of business in force from new sales and strong persistency. Net investment income also increased \$36 million, from \$228 million in the first quarter of 2008 to \$264 million in the first quarter of 2009, primarily due to higher investment yields on fixed maturities in our Japanese investment portfolio and investment portfolio growth.

Revenues from Gibraltar Life increased \$147 million, from \$748 million in the first quarter of 2008 to \$895 million in the first quarter of 2009, including a favorable impact from currency fluctuations of \$121 million. Excluding the impact of currency fluctuations, revenues for Gibraltar Life increased \$26 million from the first quarter of 2008 to the first quarter of 2009. This increase reflects a \$23 million increase in net investment income, from \$222 million in the first quarter of 2008 to \$245 million in the first quarter of 2009, driven by the continued growth of our U.S. dollar denominated fixed annuity product and higher portfolio yields from various investment portfolio strategies, including the increased utilization of U.S. dollar denominated investments.

Due to the long-term nature of many of the products we sell in Japan, we have historically sought to add duration exposure to our Japanese investment portfolio by employing various strategies, including investing in longer-term securities or, by entering into long-duration floating-to-fixed interest rate swaps. These strategies better support the characteristics of our long-dated product liabilities, and have resulted in higher portfolio yields. Based on an evaluation of recent market conditions, beginning in the fourth quarter of 2008 and continuing into the first quarter of 2009, we terminated or offset many of these interest rate swaps in consideration of, among other things, the interest rate environment. The resulting realized investment gains from terminating or offsetting these interest rate swaps will be recognized in adjusted operating income over periods that generally approximate the expected terms of the derivatives. We continue to manage the interest rate risk profile of our businesses in the context of market conditions and relative opportunities, and we expect to resume implementing strategies to lengthen the duration of our Japanese investment portfolio as our assessment of market conditions changes. As we do so, the impact to our portfolio yields upon the resumption of these strategies will depend on the then current interest rate environment.

## Benefits and Expenses

2009 to 2008 Three Month Comparison. Benefits and expenses, as shown in the table above under Operating Results, increased \$200 million, from \$1.912 billion in the first quarter of 2008 to \$2.112 billion in the first quarter of 2009, including a net unfavorable impact of \$84 million related to currency fluctuations. Excluding the impact of currency fluctuations, benefits and expenses increased \$116 million, from \$1.916 billion in the first quarter of 2008 to \$2.032 billion in the first quarter of 2009. Included in general and administrative expenses are \$6 million of expenses related to an on-going initiative in Japan to enhance our information processes and technology systems in order to improve efficiency and lower costs. We continue to estimate that we will incur approximately \$60 million of non-capitalizable costs related to this initiative in 2009, with the vast majority of these expenditures to be recognized in our Gibraltar Life operations.

Benefits and expenses of our Life Planner operations increased \$56 million, from \$1.292 billion in the first quarter of 2008 to \$1.348 billion in the first quarter of 2009, including a net favorable impact of \$37 million from currency fluctuations. Excluding the impact of currency fluctuations, benefits and expenses increased \$93 million from the first quarter of 2008 to the first quarter of 2009. Benefits and expenses of our Japanese Life Planner operation increased \$69 million from \$882 million in the first quarter of 2008 to \$951 million in the first quarter of 2009, primarily reflecting an increase in policyholder benefits, including changes in reserves, which was driven by the growth in business in force. Also contributing to the increase in benefits and expenses was an increase in the amortization of deferred policy acquisition costs, reflecting less favorable persistency and unfavorable market conditions, and higher general and administrative expenses. General and administrative

expenses were higher primarily reflecting \$6 million of expenses related to an on-going initiative in Japan mentioned above and \$4 million of guaranty fund assessments, both of which were recorded in the first quarter of 2009.

Gibraltar Life s benefits and expenses increased \$144 million, from \$620 million in the first quarter of 2008 to \$764 million in the first quarter of 2009, including a net unfavorable impact of currency fluctuations of \$121 million. Excluding the impact of currency fluctuations, benefits and expenses increased \$23 million from the first quarter of 2008 to the first quarter of 2009. This increase reflects higher amortization of deferred policy acquisition costs related to the continued growth of our U.S. dollar denominated fixed annuity product, as well as higher general and administrative expenses, which include the impact of a \$5 million guaranty fund assessment recorded during the first quarter of 2009. Partially offsetting these increases was a decrease in policyholder benefits, including changes in reserves, which was driven by more favorable mortality experience than that of the prior year quarter.

#### Sales Results

In managing our international insurance business, we analyze revenues, as well as annualized new business premiums, which do not correspond to revenues under U.S. GAAP. Annualized new business premiums measure the current sales performance of the segment, while revenues primarily reflect the renewal persistency of policies written in prior years and net investment income, in addition to current sales. Annualized new business premiums include 10% of first year premiums or deposits from single pay products. Annualized new business premiums on an actual and constant exchange rate basis are as follows for the periods indicated.

	Three Mon Marc 2009 (in mil	h 31, 2008
Annualized new business premiums:		
On an actual exchange rate basis:		
Life Planner operations	\$ 220	\$ 235
Gibraltar Life	113	94
Total	\$ 333	\$ 329
On a constant exchange rate basis:		
Life Planner operations	\$ 224	\$ 233
Gibraltar Life Gibraltar Life	105	96
Total	\$ 329	\$ 329

2009 to 2008 Three Month Comparison. On a constant exchange rate basis, annualized new business premiums were unchanged at \$329 million in both the first quarter of 2009 and 2008.

Annualized new business premiums, on a constant exchange rate basis, from our Life Planner operations decreased \$9 million, mainly due to lower sales in Korea of annuity products. Sales in Japan through the first quarter of 2009 were relatively flat when compared to the prior year quarter, despite the economic environment and concerns over U.S. financial institutions, as sales strengthened towards the end of the first quarter of 2009.

The number of Life Planners increased by 259, or 4%, from 6,138 as of March 31, 2008 to 6,397 as of March 31, 2009, driven by increases of 119 in Taiwan, 97 in Korea, and 53 in Brazil. During the same period, the number of Life Planners in Japan decreased by 30, reflective of the transfer of 128 Life Planners to Gibraltar, primarily in support of our efforts to expand our bank channel distribution and to service orphaned policyholders. Factoring in these transfers, the number of Life Planners in Japan would have increased 3%, from March 31, 2008 to March 31, 2009, which reflects lower recruiting in Japan in the later part of 2008 due to a more selective

screening process meant to further improve Life Planner retention and quality, as well as recruiting challenges posed by the current economic environment. Prior to March 31, 2008, an additional 95 Japanese Life Planners were transferred to Gibraltar.

Annualized new business premiums, on a constant exchange rate basis, from our Gibraltar Life operation increased \$9 million, driven by increased life product sales in our bank distribution channel, which was partially offset by lower Life Advisor sales. The number of Life Advisors increased by 135, or 2%, from 6,035 as of March 31, 2008 to 6,170 as of March 31, 2009, as we continue to focus on hiring practices to enhance retention and productivity. The vast majority of the Life Planners transferred to Gibraltar, as discussed above, are not considered Life Advisors.

Investment Margins and Other Profitability Factors

Many of our insurance products sold in international markets provide for the buildup of cash values for the policyholder at mandated guaranteed interest rates. Japanese authorities regulate interest rates guaranteed in our Japanese insurance contracts. The regulated guaranteed interest rates do not necessarily match the actual returns on the underlying investments. The spread between the actual investment returns and these guaranteed rates of return to the policyholder is an element of the profit or loss that we will experience on these products. With regulatory approval, guaranteed rates may be changed on new business. While these actions enhance our ability to set rates commensurate with available investment returns, the major sources of profitability on our products sold in Japan, other than those sold by Gibraltar Life, are margins on mortality, morbidity and expense charges rather than investment spreads.

We base premiums and cash values in most countries in which we operate on mandated mortality and morbidity tables. Our mortality and morbidity experience in the International Insurance segment on an overall basis in the first three months of 2009 and the first three months of 2008 was well within our pricing assumptions and below the guaranteed levels reflected in the premiums we charge.

### International Investments

Operating Results

The following table sets forth the International Investments segment s operating results for the periods indicated.

	Th	Three Months Ende March 31,		ded
	20	09	20	008
		(in n	nillions)	
Operating results:				
Revenues	\$ 1	05	\$	176
Expenses		95		150
Adjusted operating income		10		26
Realized investment gains (losses), net, and related adjustments(1)				3
Equity in earnings of operating joint ventures and earnings attributable to noncontrolling interests(2)		(8)		(9)
Income from continuing operations before income taxes and equity in earnings of operating joint ventures	\$	2	\$	20

- (1) Revenues exclude Realized investment gains (losses), net, and related adjustments. See Realized Investment Gains and Losses and General Account Investments Realized Investment Gains and Losses.
- (2) Equity in earnings of operating joint ventures are included in adjusted operating income but excluded from income from continuing operations before income taxes and equity in earnings of operating joint ventures as they are reflected on a U.S. GAAP basis on an

117

after-tax basis as a separate line in our Unaudited Interim Consolidated Statements of Operations. Earnings attributable to noncontrolling interests are excluded from adjusted operating income but included in income from continuing operations before income taxes and equity in earnings of operating joint ventures as they are reflected on a U.S. GAAP basis as a separate line in our Unaudited Interim Consolidated Statements of Operations. Earnings attributable to noncontrolling interests represents the portion of earnings from consolidated entities that relates to the equity interests of minority investors.

In 2004, we acquired an 80 percent interest in Hyundai Investment and Securities Co., Ltd., a Korean asset management firm, from an agency of the Korean government. We subsequently renamed the company Prudential Investment & Securities Co., Ltd, or PISC. On January 25, 2008, we acquired the remaining 20 percent for \$90 million and PISC is now a wholly owned operation.

On January 18, 2008, we made an additional investment of \$154 million in our UBI Pramerica operating joint venture in Italy, which we account for under the equity method. This additional investment was necessary to maintain our ownership interest at 35 percent and was a result of the merger of our joint venture partner with another Italian bank, and their subsequent consolidation of the asset management companies into the UBI Pramerica joint venture.

On July 1, 2008, we acquired a 40 percent interest in GAP Asset Management of Brazil, which we account for under the equity method as an operating joint venture.

Adjusted Operating Income

2009 to 2008 Three Month Comparison. Adjusted operating income decreased \$16 million, from \$26 million in the first quarter of 2008 to \$10 million in the first quarter of 2009. This decrease reflects lower results from the segment s Korean asset management operation primarily due to a decline in asset based fees. The results from the segment s global commodities group were relatively unchanged, as less favorable sales and trading results and a lower benefit from market value changes on securities relating to exchange memberships in the first quarter of 2009, were offset by a \$19 million credit loss related to a brokerage client that was recorded in the first quarter of 2008. The adjusted operating income of our Korean asset management operation includes \$3 million and \$5 million in the first quarter of 2009 and 2008, respectively, of fee revenue from the Korean government under an agreement entered into in connection with the acquisition of PISC, related to the provision of asset management and brokerage services, which agreement ended on February 27, 2009.

Revenues

2009 to 2008 Three Month Comparison. Revenues, as shown in the table above under Operating Results, decreased \$71 million, from \$176 million in the first quarter of 2008 to \$105 million in the first quarter of 2009, primarily reflecting lower revenues in the Korean asset management operation and the global commodities group.

Expenses

2009 to 2008 Three Month Comparison. Expenses, as shown in the table above under Operating Results, decreased \$55 million, from \$150 million in the first quarter of 2008 to \$95 million in the first quarter of 2009, primarily reflecting lower expenses corresponding with the lower level of revenues generated by the Korean asset management operation and the global commodities group.

## **Corporate and Other**

Corporate and Other includes corporate operations, after allocations to our business segments, and real estate and relocation services.

Corporate operations consist primarily of: (1) investment returns on capital that is not deployed in any business segments; (2) returns from investments not allocated to business segments, including debt-financed investment portfolios, as well as tax credit investments and other tax-enhanced investments financed by business segments; (3) capital debt that is used or will be used to meet the capital requirements of the Company and the related interest expense; (4) income and expense from qualified pension and other employee benefit plans, after allocations to business segments; (5) corporate-level income and expense, after allocations to business segments, including corporate governance, corporate advertising, philanthropic activities and deferred compensation; (6) certain retained obligations relating to policyholders whom we had previously agreed to provide insurance for reduced or no premium in accordance with contractual settlements related to prior individual life insurance sales practices remediation; (7) businesses that we have placed in wind-down status but have not divested; and (8) the impact of transactions with other segments.

- (3) Revenues exclude net investment gains and losses on trading account assets supporting insurance liabilities. See Investment Gains and Losses on Trading Account Assets Supporting Insurance Liabilities and Changes in Experience-Rated Contractholder Liabilities Due to Asset Value Changes.
- (4) See Divested Businesses.
- (5) Equity in earnings of operating joint ventures are included in adjusted operating income but excluded from income from continuing operations before income taxes and equity in earnings of operating joint ventures as they are reflected on a U.S. GAAP basis on an after-tax basis as a separate line on our Consolidated Statements of Operations. Earnings attributable to noncontrolling interests are excluded from adjusted operating income but included in income from continuing operations before income taxes and equity in earnings of operating joint ventures as they are reflected on a U.S. GAAP basis as a separate line in our Unaudited Interim Consolidated Statements of Operations. Earnings attributable to noncontrolling interests represents the portion of earnings from consolidated entities that relates to the equity interests of minority investors.

2009 to 2008 Three Month Comparison. Adjusted operating income decreased \$115 million, from a loss of \$51 million in the first quarter of 2008 to a loss of \$166 million in the first quarter of 2009. The greater loss in 2009 is primarily due to lower investment earnings, increased interest expense on capital debt and less favorable results in our real estate and relocation services business. Adjusted operating income from corporate operations decreased \$75 million, from a loss of \$28 million in the first quarter of 2008 to a loss of \$103 million in the first

quarter of 2009. Investment income, net of interest expense, excluding capital debt interest expense, decreased \$60 million, primarily reflecting lower earnings from the investment of proceeds from our convertible debt issues, as discussed below, as well as other borrowings, including borrowings from the Federal Home Loan Bank of New York, and lower yields on other invested assets. Capital debt interest expense increased by \$48 million due to increased borrowings, which includes the issuance in June 2008 of \$1.5 billion of junior subordinated notes. Partially offsetting these items was the benefit from other corporate activities of \$50 million, reflecting the gain on the repurchase of some of our outstanding convertible debt, as discussed below, and corporate operations hedging activities.

The proceeds from our \$2 billion December 2006 convertible debt issuance were used to fund an investment portfolio of fixed income securities until December 2007. These proceeds, as well as the remaining proceeds from our \$3 billion December 2007 convertible debt issuance, were invested primarily in short-term investments or used to support operating needs in lieu of other short-term borrowings. In December 2008, we repurchased substantially all of our \$2 billion December 2006 convertible debt issuance. In December 2008, we repurchased, in individually negotiated transactions, \$853 million of our \$3 billion December 2007 convertible debt issuance, which notes were offered to us by certain holders. In March 2009, we repurchased an additional \$245 million of our \$3 billion December 2007 convertible debt issuance, also in individually negotiated transactions, which notes were offered to us by certain holders. The March 2009 repurchase resulted in a pre-tax gain of \$7 million, which is included in other corporate activities.

Corporate operations pension income and employee benefits decreased \$17 million, which primarily reflects increased post-retirement benefit costs due to the amortization of prior year losses and lower asset base. Income from our qualified pension plan increased \$5 million, from \$72 million in the first quarter of 2008 to \$77 million in the first quarter of 2009.

Adjusted operating income of our real estate and relocation services business decreased \$40 million, from a loss of \$23 million in the first quarter of 2008 to a loss of \$63 million in the first quarter of 2009. Results for 2009 include our share of the earnings from equity method investments, which include goodwill impairments of \$26 million within these entities. Also contributing to the decline in adjusted operating income are lower royalty fees and lower relocation revenue from real estate referral fees and homesale transactions due to the less favorable residential real estate market conditions. Certain of our clients utilize a fixed fee home sale program under which we assume the benefits and burdens of ownership with respect to a relocating employee s home that is purchased by us, including carrying costs and any loss on sale. As of March 31, 2009, we held in unsold inventory homes with a net value of \$57 million under this program.

### **Results of Operations of Closed Block Business**

We established the Closed Block Business effective as of the date of demutualization. The Closed Block Business includes our in force traditional domestic participating life insurance and annuity products and assets that are used for the payment of benefits and policyholder dividends on these policies, as well as other assets and equity and related liabilities that support these policies. We no longer offer these traditional domestic participating policies. See — Overview Closed Block Business — for additional details.

At the end of each year, the Board of Directors of Prudential Insurance determines the dividends payable on participating policies for the following year based on the experience of the Closed Block, including investment income, net realized and unrealized investment gains, mortality experience and other factors. Although Closed Block experience for dividend action decisions is based upon statutory results, at the time the Closed Block was established, we developed, as required by U.S. GAAP, an actuarial calculation of the timing of the maximum future earnings from the policies included in the Closed Block. If actual cumulative earnings in any given period are greater than the cumulative earnings we expected, we will record this excess as a policyholder dividend

obligation. We will subsequently pay this excess to Closed Block policyholders as an additional dividend unless it is otherwise offset by future Closed Block performance that is less favorable than we originally expected. The policyholder dividends we charge to expense within the Closed Block Business will include any change in our policyholder dividend obligation that we recognize for the excess of actual cumulative earnings in any given period over the cumulative earnings we expected in addition to the actual policyholder dividends declared by the Board of Directors of Prudential Insurance.

As of March 31, 2009, the excess of actual cumulative earnings over the expected cumulative earnings was \$299 million. Actual cumulative earnings, as required by U.S. GAAP, reflect the recognition of realized investment gains and losses in the current period, as well as changes in assets and related liabilities that support the Closed Block policies. However, due to the accumulation of net unrealized investment losses that have arisen subsequent to the establishment of the Closed Block, the policyholder dividend obligation balance as of March 31, 2009 is zero.

Operating Results

Management does not consider adjusted operating income to assess the operating performance of the Closed Block Business. Consequently, results of the Closed Block Business for all periods are presented only in accordance with U.S. GAAP. The following table sets forth the Closed Block Business U.S. GAAP results for the periods indicated.

	Three Months Ended March 31,			
	2009		2008	
	(in millions)			s)
U.S. GAAP results:				
Revenues	\$ 1	,140	\$	1,671
Benefits and expenses	1	,110		1,697
Income (loss) from continuing operations before income taxes and equity in earnings of operating joint ventures	\$	30	\$	(26)

Income (Loss) from Continuing Operations Before Income Taxes and Equity in Earnings of Operating Joint Ventures

2009 to 2008 Three Month Comparison. Income from continuing operations before income taxes and equity in earnings of operating joint ventures increased \$56 million, from a loss of \$26 million in the first quarter of 2008 to income of \$30 million in the first quarter of 2009. Results for 2009 include a decrease of \$325 million in net realized investment gains, from losses of \$110 million in the first quarter of 2008 to losses of \$435 million in the first quarter of 2009. For a discussion of Closed Block Business realized investment gains (losses), net, see

Realized Investment Gains and Losses and General Account Investments Realized Investment Gains and Losses. Net investment income, net of interest expense, decreased \$94 million, primarily related to a decrease in income on joint ventures and limited partnership investments accounted for under the equity method and lower portfolio yields, including lower interest rates on floating rate investments due to rate resets. These decreases to income were more than offset by a decrease in dividends paid and accrued to policyholders, primarily due to a decrease in the 2009 dividend scale. The impact of these items contributed to actual cumulative earnings which, when compared to the expected cumulative earnings, resulted in a decrease in the cumulative earnings policyholder dividend obligation expense of \$399 million from the first quarter of 2008, compared to the first quarter of 2009. As noted above, as of March 31, 2009, the excess of actual cumulative earnings over the expected cumulative earnings was \$299 million. If actual cumulative earnings fall below expected cumulative earnings in future periods, it could result in volatility in the Closed Block Business earnings.

Revenues

2009 to 2008 Three Month Comparison. Revenues, as shown in the table above under Operating Results, decreased \$531 million, from \$1.671 billion in the first quarter of 2008 to \$1.140 billion in the first quarter of 2009, principally driven by the \$325 million decrease in net realized investment gains and a decrease of \$119 million in net investment income, as discussed above. In addition, premiums declined, with a corresponding decrease in changes in reserves, primarily due to a lower amount of dividends used by policyholders to purchase additional insurance, as a result of the dividend scale reduction.

Benefits and Expenses

2009 to 2008 Three Month Comparison. Benefits and expenses, as shown in the table above under Operating Results, decreased \$587 million, from \$1.697 billion in the first quarter of 2008 to \$1.110 billion in the first quarter of 2008. This decrease included a \$499 million decline in dividends to policyholders reflecting a decrease in the cumulative earnings policyholder dividend obligation expense of \$399 million, as well as a decrease in dividends paid and accrued to policyholders of \$100 million, primarily due to a decrease in the dividend scale. Policyholders benefits, including changes in reserves, decreased \$60 million driven by a decline in premiums, as discussed above.

#### **Income Taxes**

Our income tax provision amounted to an income tax expense of \$4 million in the first quarter of 2009 compared to income tax expense of \$23 million in the first quarter of 2008. The decline in income tax expense primarily reflects the decline in pre-tax income from continuing operations before income taxes and equity in earnings of operating joint ventures from the first quarter of 2008 to the first quarter of 2009.

We employ various tax strategies, including strategies to minimize the amount of taxes resulting from realized capital gains.

The dividends received deduction, or DRD, reduces the amount of dividend income subject to U.S. tax and in recent years is the primary component of the difference between our effective tax rate and the federal statutory tax rate of 35%. The DRD for the current period was estimated using information from 2008, current year results, and was adjusted to take into account the current year sequity market performance. The actual current year DRD can vary from the estimate based on factors such as, but not limited to, changes in the amount of dividends received that are eligible for the DRD, changes in the amount of distributions received from mutual fund investments, changes in the account balances of variable life and annuity contracts, and our taxable income before the DRD.

In August 2007, the Internal Revenue Service, or IRS, released Revenue Ruling 2007-54, which included, among other items, guidance on the methodology to be followed in calculating the dividends received deduction related to variable life insurance and annuity contracts. In September 2007, the IRS released Revenue Ruling 2007-61. Revenue Ruling 2007-61 suspends Revenue Ruling 2007-54 and informs taxpayers that the U.S. Treasury Department and the IRS intend to address through new regulations the issues considered in Revenue Ruling 2007-54, including the methodology to be followed in determining the dividends received deduction related to variable life insurance and annuity contracts. These activities had no impact on our 2008 or 2009 results. A change in the DRD, including the possible retroactive or prospective elimination of this deduction through regulation or legislation, could increase our actual tax expense and reduce our consolidated net income.

In December 2006, the IRS completed all fieldwork with respect to its examination of the consolidated federal income tax returns for tax years 2002 and 2003. The final report was initially submitted to the Joint Committee on Taxation for their review in April 2007. The final report was resubmitted in March 2008 and again

in April 2008. The Joint Committee returned the report to the IRS for additional review of an industry issue regarding the methodology for calculating the DRD related to variable life insurance and annuity contracts. The IRS completed its review of the issue and proposed an adjustment with respect to the calculation of the DRD. In order to expedite receipt of an income tax refund related to the 2002 and 2003 years, we have agreed to such adjustment. Nevertheless, we believe that our return position is technically correct. Therefore, we intend to file a protective refund claim to recover the taxes associated with the agreed upon adjustment and to pursue such other actions as appropriate. The report, with the adjustment, was submitted to the Joint Committee on Taxation in October 2008. We were advised on January 2, 2009 that the Joint Committee completed its consideration of the report and has taken no exception to the conclusions reached by the IRS. Accordingly, the final report was processed and a \$157 million refund was received in February 2009. The statute of limitations for these years is set to expire during 2009. These activities had no impact on our 2008 or 2009 results.

In January 2007, the IRS began an examination of the consolidated U.S. federal income tax years 2004 through 2006. For the consolidated U.S. federal income tax years 2007 and 2008, we participated in the IRS s Compliance Assurance Program, or CAP. Under CAP, the IRS assigns an examination team to review completed transactions contemporaneously during the 2007 and 2008 tax years in order to reach agreement with us on how they should be reported in the tax return. If disagreements arise, accelerated resolutions programs are available to resolve the disagreements in a timely manner before the tax return is filed. It is management s expectation this program will shorten the time period between the filing of our federal income tax return and the IRS s completion of its examination of the return.

### **Discontinued Operations**

Included within net income are the results of businesses which are reflected as discontinued operations under U.S. GAAP. A summary of the results of discontinued operations by business is as follows for the periods indicated:

		Three Months Ended March 31,		
	2009	2008		
	(in m	(in millions)		
Equity sales, trading and research operations	\$	\$	(1)	
Real estate investments sold or held for sale	2		1	
International securities operations			1	
Income from discontinued operations before income taxes	2		1	
Income tax expense	1			
Income from discontinued operations, net of taxes	\$ 1	\$	1	

For additional information regarding discontinued operations, see Note 3 of the Unaudited Interim Consolidated Financial Statements.

#### Divested Businesses

Our income from continuing operations includes results from several businesses that have been or will be sold or exited that do not qualify for discontinued operations accounting treatment under U.S. GAAP. The results of these divested businesses are reflected in our Corporate and Other operations, but excluded from adjusted operating income. A summary of the results of the divested businesses that have been excluded from adjusted operating income is as follows for the periods indicated:

	Three Months Ended			
	Ma			
	2009	2	8008

Prudential Securities capital markets	(4)		1	
Total divested businesses excluded from adjusted operating income	\$ (32)	\$	(67)	

### Investment Gains and Losses on Trading Account Assets Supporting Insurance Liabilities and

#### Changes in Experience-Rated Contractholder Liabilities Due to Asset Value Changes

Certain products included in the Retirement and International Insurance segments, are experience-rated in that investment results associated with these products are expected to ultimately accrue to contractholders. The investments supporting these experience-rated products, excluding commercial mortgage and other loans, are classified as trading and are carried at fair value. These trading investments are reflected on the statements of financial position as Trading account assets supporting insurance liabilities, at fair value. Realized and unrealized gains and losses for these investments are reported in Asset management fees and other income. Interest and dividend income for these investments is reported in Net investment income. Commercial mortgage and other loans that support these experience-rated products are carried at unpaid principal, net of unamortized discounts and an allowance for losses, and are reflected on the statements of financial position as Commercial mortgage and other loans.

Adjusted operating income excludes net investment gains and losses on trading account assets supporting insurance liabilities. This is consistent with the exclusion of realized investment gains and losses with respect to other investments supporting insurance liabilities managed on a consistent basis. In addition, to be consistent with the historical treatment of charges related to realized investment gains and losses on investments, adjusted operating income also excludes the change in contractholder liabilities due to asset value changes in the pool of investments (including commercial mortgage and other loans) supporting these experience-rated contracts, which are reflected in Interest credited to policyholders account balances. The result of this approach is that adjusted operating income for these products includes net fee revenue and interest spread we earn on these experience-rated contracts, and excludes changes in fair value of the pool of investments, both realized and unrealized, that we expect will ultimately accrue to the contractholders.

Results for the three months ended March 31, 2009 and 2008 include the recognition of net investment gains of \$145 million and net investment losses of \$262 million, respectively, on Trading account assets supporting insurance liabilities, at fair value. These net investment gains and losses primarily represent interest-rate related mark-to-market adjustments, which include the impact of changes in credit spreads on fixed maturity securities. Consistent with our treatment of Realized investment gains (losses), net, these gains and losses, which are expected to ultimately accrue to the contractholders, are excluded from adjusted operating income. In addition, results for the three months ended March 31, 2009 and 2008 include increases of \$45 million and decreases of

\$200 million, respectively, in contractholder liabilities due to asset value changes in the pool of investments that support these experience-rated contracts. These liability changes are reflected in Interest credited to policyholders account balances and are also excluded from adjusted operating income. Contractholder liabilities do not reflect declines in recorded asset values of \$564 million and \$86 million, as of March 31, 2009 and 2008, respectively, which we expect to recover in future periods through increases in recorded asset values or reductions in crediting rates on contractholder liabilities.

In addition, as prescribed by U.S. GAAP, changes in the fair value of commercial mortgage and other loans held in our general account, other than when associated with impairments, are not recognized in income in the current period, while the impact of these changes in value are reflected as a change in the liability to fully participating contractholders in the current period. Included in the amounts above related to the change in the liability to contractholders are increases related to commercial mortgage and other loans of \$19 million and \$11 million, for the three months ended March 31, 2009 and 2008, respectively.

#### Valuation of Assets and Liabilities

#### Fair Value of Assets and Liabilities

As discussed in Notes 2 and 11 to the Unaudited Interim Consolidated Financial Statements, we adopted SFAS No. 157 effective January 1, 2008. SFAS No. 157 establishes a framework for measuring fair value that includes a hierarchy used to classify the inputs used in measuring fair value. The hierarchy prioritizes the inputs to valuation techniques used to measure fair value into three levels. The level in the fair value hierarchy within which the fair value measurement falls is determined based on the lowest level input that is significant to the fair value measurement. The levels of the fair value hierarchy are as follows:

Level 1 Fair value is based on unadjusted quoted prices in active markets that are accessible to us for identical assets or liabilities. These generally provide the most reliable evidence and are used to measure fair value whenever available. Active markets are defined as having the following for the measured asset/liability: i) many transactions, ii) current prices, iii) price quotes not varying substantially among market makers, iv) narrow bid/ask spreads and v) most information publicly available. Our Level 1 assets and liabilities primarily include certain cash equivalents and short term investments, equity securities and derivative contracts that are traded in an active exchange market. Prices are obtained from readily available sources for market transactions involving identical assets or liabilities.

Level 2 Fair value is based on significant inputs, other than Level 1 inputs, that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the asset or liability through corroboration with observable market data. Level 2 inputs include quoted market prices in active markets for similar assets and liabilities, quoted market prices in markets that are not active for identical or similar assets or liabilities and other market observable inputs. Our Level 2 assets and liabilities include: fixed maturities (corporate public and private bonds, most government securities, certain asset- and mortgage-backed securities, etc.), certain equity securities and commercial mortgage loans, short-term investments and certain cash equivalents (primarily commercial paper) and certain over-the-counter derivatives. Valuations are generally obtained from third party pricing services for identical or comparable assets or liabilities, or through the use of valuation methodologies using observable market inputs. Prices from services are validated through comparison to trade data and internal estimates of current fair value, generally developed using market observable inputs and economic indicators.

Level 3 Fair value is based on at least one or more significant unobservable inputs for the asset or liability. These inputs reflect our assumptions about the assumptions market participants would use in pricing the asset or liability. Our Level 3 assets and liabilities primarily include: certain private fixed maturities and equity securities, certain manually priced public equity securities and fixed maturities, including certain asset-backed securities

and securities where we chose to over-ride pricing information received from third parties as discussed below, certain highly structured over-the-counter derivative contracts, certain commercial mortgage loans, certain consolidated real estate funds for which we are the general partner, and embedded derivatives resulting from certain products with guaranteed benefits. Prices are determined using valuation methodologies such as option pricing models, discounted cash flow models and other similar techniques. Non-binding broker quotes, which we utilize when pricing service information is not available, are reviewed for reasonableness based on our understanding of the market, and are generally considered Level 3. Under certain conditions, we may conclude the prices received from independent third party pricing services or brokers are not reasonable or reflective of market activity. In those instances, we may choose to over-ride the third-party pricing information or quotes received and apply internally developed values to the related assets or liabilities. To the extent the internally developed valuations use significant unobservable inputs, they are classified as Level 3. As of March 31, 2009 and December 31, 2008 over-rides on a net basis were not material.

As discussed in Note 2 to the Consolidated Financial Statements, we adopted FSP FAS 157-4 effective January 1, 2009. This FSP did not provide new accounting guidance but rather, clarified existing guidance regarding the calculation of fair value of an asset or liability when markets are inactive or transactions are executed in a distressed manner. The Company s fair value methodologies already incorporated these concepts and accordingly, the FSP resulted in no material changes to our valuation processes. The FSP also increased the level of detail required for disclosures of fixed maturities to provide amounts separately for Corporate, Foreign Government, Asset-backed, Residential Mortgage-backed, Commercial Mortgage-backed, US Government, and State & Municipal fixed maturity securities. This level of information is required prospectively as of January 1, 2009 and accordingly, prior periods have not been restated.

The tables below present the balances of assets and liabilities measured at fair value on a recurring basis, as of March 31, 2009 and December 31, 2008, for Consolidated, Financial Services Businesses and Closed Block Business.

<sup>(1)</sup> The amount of Level 3 assets taken as a percentage of total assets measured at fair value on a recurring basis totaled 6%, 7% and 2% for Consolidated, Financial Services Businesses and Closed Block Business, respectively. Excluding separate account assets for which the risk is borne by the policyholder, the amount of Level 3 assets taken as a percentage of total assets measured at fair value on a recurring basis totaled 3% for both Consolidated and Financial Services Businesses. The amount of Level 3 liabilities was immaterial to our balance sheet.

<sup>(2)</sup> Netting amounts represent cash collateral and the impact of offsetting asset and liability positions held with the same counterparty as permitted by FASB Interpretation No. 39, Offsetting of Amounts Related to Certain Contracts and FSP FIN 39-1, Amendment of FASB Interpretation No. 39.

<sup>(3)</sup> Separate account assets represent segregated funds that are invested for certain customers. Investment risks associated with market value changes are borne by the customers, except to the extent of minimum guarantees made by us with respect to certain accounts. Separate

account assets classified as Level 3 consist primarily of real estate and real estate investment funds. Separate account liabilities are not included in the above table as they are reported at contract value and not fair value in our Consolidated Statement of Financial Position.

(4) The negative Other long-term investments amount for Financial Services Businesses reflects the impact of inter-company eliminations.

- (1) The amount of Level 3 assets taken as a percentage of total assets measured at fair value on a recurring basis totaled 7%, 8% and 1% for Consolidated, Financial Services Businesses and Closed Block Business, respectively. Excluding separate account assets for which the risk is borne by the policyholder, the amount of Level 3 assets taken as a percentage of total assets measured at fair value on a recurring basis totaled 3% for both Consolidated and Financial Services Businesses. The amount of Level 3 liabilities was immaterial to our balance sheet.
- (2) Netting amounts represent cash collateral and the impact of offsetting asset and liability positions held with the same counterparty as permitted by FASB Interpretation No. 39, Offsetting of Amounts Related to Certain Contracts and FSP FIN 39-1, Amendment of FASB Interpretation No. 39.
- (3) Separate account assets represent segregated funds that are invested for certain customers. Investment risks associated with market value changes are borne by the customers, except to the extent of minimum guarantees made by us with respect to certain accounts. Separate account assets classified as Level 3 consist primarily of real estate and real estate investment funds. Separate account liabilities are not included in the above table as they are reported at contract value and not fair value in our Consolidated Statement of Financial Position.
- (4) The negative Other liability amount for Financial Services Businesses reflects the impact of inter-company eliminations.

For additional information regarding the balances of assets and liabilities measured at fair value by hierarchy level see Note 11 to the Unaudited Interim Consolidated Financial Statements.

The determination of fair value, which for certain assets and liabilities is dependent on the application of estimates and assumptions, can have a significant impact on our results of operations. As discussed in more detail below, the determination of fair value for certain assets and liabilities may require the application of a greater degree of judgment given current market conditions, as the ability to value assets and liabilities can be significantly impacted by a decrease in market activity or a lack of transactions executed in an orderly manner. The following sections describe the key estimates and assumptions surrounding certain assets and liabilities, measured at fair value on a recurring basis, that could have a significant impact on our results of operations or involve the use of significant unobservable inputs. Information regarding Separate Account Assets is excluded as the risk of assets for these categories is ultimately borne by our customers and policyholders.

Valuation of Fixed Maturity Securities

Our public fixed maturity securities include investments in corporate, foreign government, asset-backed, residential mortgage-backed, commercial mortgage-backed, U.S. government, and state and municipal securities. The fair values of our public fixed maturity securities are generally based on prices obtained from independent pricing services. Prices are sourced from multiple pricing services, and a vendor hierarchy is maintained by asset

type based on historical pricing experience and vendor expertise. We generally receive prices from multiple pricing services for each security, but ultimately use the price from the pricing service highest in the vendor hierarchy based on the respective asset type. In order to validate reasonability, prices are reviewed by our internal asset managers through comparison with directly observed recent market trades and internal estimates of current fair value, generally developed using market observable inputs and economic indicators. Consistent with the fair value hierarchy described above, securities with validated quotes from pricing services are generally reflected within Level 2. If we conclude pricing information received from third party pricing services is not reflective of market activity or other inputs we have observed in the market, we may challenge the price through a formal process with the pricing service. If the pricing service updates the price to be more consistent in comparison to our presented market observations, the security remains within Level 2.

If we ultimately conclude that pricing information received from the independent pricing service is not reflective of market activity, we use values based on non-binding broker quotes, if available. If we conclude values from both pricing services and brokers are not reflective of market activity, we may over-ride the information from the pricing service or broker with an internally developed valuation. As of March 31, 2009 and December 31, 2008, such over-rides, in aggregate, were not material. In circumstances where vendor pricing is not available, we also use internally developed valuations or non-binding broker quotes to determine fair value. These estimates may use significant unobservable inputs, which reflect our own assumptions about the inputs market participants would use in pricing the asset. Circumstances where observable market data is not available may include events such as market illiquidity and credit events related to the security. Pricing service over-rides, internally developed valuations and non-binding broker quotes are generally included in Level 3 in our fair value hierarchy. Despite the dislocated markets and low levels of liquidity in 2008 and the first quarter of 2009, pricing received from the independent pricing services was not materially different from our internal estimates of current market value for the vast majority of our fixed maturity portfolio. As a result, we generally continued to use the price provided by the independent pricing service under our normal pricing protocol.

Our private fixed maturities are primarily comprised of investments in private placement securities originated by our internal private asset managers. The fair values of these private fixed maturities are primarily determined using a discounted cash flow model, which utilizes a discount rate based upon the average of spread surveys collected from private market intermediaries who are active in both primary and secondary transactions, and takes into account, among other factors, the credit quality and industry sector of the issuer and the reduced liquidity associated with private placements. Generally, these securities have been reflected within Level 2 in our fair value hierarchy. For certain of these securities, including those that have a distressed credit profile, the discounted cash flow model may also incorporate significant unobservable inputs, which reflect our own assumptions about the inputs market participants would use in pricing the asset. Accordingly, these securities have been reflected within Level 3 in our fair value hierarchy.

Private fixed maturities also include debt investments in funds that, in addition to a stated coupon, pay a return based upon the results of the underlying portfolios. The fair values of these securities are determined by reference to the funds net asset value (NAV). Any restrictions on our ability to redeem our interests in these funds at NAV are considered to have a de minimis effect on the fair value. Since the NAV at which the funds trade can be observed by redemption and subscription transactions between third parties, the fair values of these investments have been reflected within Level 2 in our fair value hierarchy.

Our Level 3 fixed maturity securities generally include certain public fixed maturities and private fixed maturities priced internally based on observable and unobservable inputs. As of March 31, 2009 and December 31, 2008, about half of our Level 3 fixed maturity securities were public fixed maturities, with values primarily based on non-binding broker-quotes, and about half were private fixed maturities, with values primary based on internally developed models, as discussed above. Significant unobservable inputs used included: issue specific credit adjustments, material non-public financial information, management judgment, estimation of future earnings and cashflows, default rate assumptions, liquidity assumptions and non-binding quotes from market makers. These inputs are usually considered unobservable, as not all market participants will have access

to this data. As of March 31, 2009 and December 31, 2008 we classified approximately \$448 million and \$122 million respectively of our investments in asset-backed securities collateralized by sub-prime mortgages as Level 3, primarily reflecting securities valued based on non-binding broker quotes. The vast majority of our asset-backed securities collateralized by sub-prime mortgages are valued using information from independent pricing services, and are included in Level 2 based on the process described above. Net realized and unrealized losses for Level 3 Available for Sale fixed maturities totaled \$71 million and \$263 million, respectively, for the three months ended March 31, 2009 and \$144 million and \$122 million, respectively, for the three months ended March 31, 2008.

For additional information regarding our holdings of asset-backed securities collateralized by sub-prime mortgages, see, Realized Investment Gains and Losses and General Account Investments General Account Investments Fixed Maturity Securities Asset-Backed Securities. While the fair value of these investments, as well as others within our portfolio of fixed maturities, has declined in recent quarters due to increased credit spreads and illiquidity in the financial markets, we believe the ultimate value that will be realized from these investments is greater than that reflected by their current fair value.

#### Valuation of Equity Securities

Equity securities consist principally of investments in common and preferred stock of publicly traded companies, privately traded securities, as well as common stock mutual fund shares. The fair values of most publicly traded equity securities are based on quoted market prices in active markets for identical assets and are classified within Level 1 in our fair value hierarchy. Estimated fair values for privately traded equity securities are determined using valuation and discounted cash flow models that require a substantial level of judgment. In determining the fair value of certain privately traded equity securities the discounted cash flow model may also use unobservable inputs, which reflect our own assumptions about the inputs market participants would use in pricing the asset. Most privately traded equity securities are classified within Level 3. The fair values of common stock mutual fund shares that transact regularly (but do not trade in active markets because they are not publicly available) are based on transaction prices of identical fund shares and are classified within Level 2 in our fair value hierarchy. The fair values of preferred equity securities are based on prices obtained from independent pricing services and, in order to validate reasonability, are compared with recent market trades we have directly observed. Accordingly, these securities are generally classified within Level 2 in our fair value hierarchy.

### Impact of Valuation of Fixed Maturities and Equity Securities on Results of Operations

The impact our determination of fair value for fixed maturity and equity securities has on our results of operations is dependent on our classification of the security as either trading, available for sale, or held to maturity. For our investments classified as trading, the impact of changes in fair value is recorded within Asset management fees and other income. For our investments classified as available for sale, the impact of changes in fair value is recorded as an unrealized gain or loss in Accumulated other comprehensive income (loss), net, a separate component of equity. Our investments classified as held to maturity are carried at amortized cost. In addition, investments classified as available for sale, as well as those classified as held to maturity, are subject to impairment reviews to identify when a decline in fair value is other-than-temporary. When it is determined that a decline in value of an equity security is other-than-temporary, the carrying value of the equity security is impaired to its fair value, with a corresponding charge to earnings. Under FSP FAS 115-2 and FAS 124-2, effective January 1, 2009, when an other-than-temporary impairment of a debt security has occurred, the amount of the other-than-temporary impairment recognized in earnings depends on whether the Company intends to sell the security or more likely than not will be required to sell the security before recovery of its amortized cost basis. If the debt security meets either of these two criteria, the other-than-temporary impairment recognized in earnings is equal to the entire difference between the security s amortized cost basis and its fair value at the impairment measurement date. For other-than-temporary impairments of debt securities that do not meet either of these two criteria, the net amount recognized in earnings is equal to the difference between the amortized cost of the debt security and the net present value of its projected future cash flows, discounted at the effective interest

rate implicit in the debt security prior to impairment. Any difference between the fair value and the net present value of the debt security at the impairment measurement date is recorded in Other comprehensive income (loss). Prior to the adoption of FSP FAS 115-2 and FAS 124-2, the other-than-temporary impairment recognized in earnings for debt securities was equal to the total difference between amortized cost and fair value at the impairment measurement date. The other-than-temporary impairment charged to earnings is reflected within Realized investment gains (losses), net in the statement of operations and is included in income from continuing operations under U.S. GAAP but excluded from adjusted operating income. The level of impairment losses can be expected to increase when economic conditions worsen and decrease when economic conditions improve. See Realized Investment Gains and Losses and General Account Investments Realized Investment Gains and Losses for a discussion of the effects of impairments on our operating results for the quarters ended March 31, 2009 and 2008.

For a further discussion of our policies regarding other-than-temporary declines in investment value and the related methodology for recording fixed maturity other-than-temporary impairments, see General Account Investments Fixed Maturity Securities Other-than-Temporary Impairments of Fixed Maturity Securities below. For a further discussion of our policies regarding other-than-temporary declines in investment value and the related methodology for recording equity impairments, see General Account Investments Equity Securities Other-than-Temporary Impairments of Equity Securities below.

### Valuation of Commercial Mortgage Loans

Upon the adoption of SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities, we elected the fair value option for certain loans held within the commercial mortgage operations of the asset management segment. Specifically, the fair value option was elected for funded commercial mortgage loans held for sale that were originated beginning January 1, 2008. In addition, we elected the fair value option for fixed rate commercial mortgage loans held for investment that were held at December 31, 2007 and for such loans originated beginning January 1, 2008. We elected the fair value option for the loan programs mentioned above primarily to eliminate the need for hedge accounting under SFAS No. 133, while still achieving an offset in earnings from the associated interest rate derivative hedges.

Due to volatility in the credit markets, we experienced unexpected volatility in the fair value of the aforementioned fixed rate commercial mortgage loans held for investment that was not substantially offset by the associated interest rate derivative hedges during the quarter ended March 31, 2008. Therefore, we decided to no longer elect the fair value option on loans held for investment that were originated after March 31, 2008, and have applied hedge accounting under SFAS No. 133.

The fair value of loans held for investment and accounted for using the Fair Value Option discussed above is determined based on the present value of the expected future cash flows discounted at the appropriate U.S. Treasury rate, adjusted for the current market spread for similar quality loans. Since the interest rate and market spread assumptions for similar quality loans are generally observable based upon market transactions, the fair value of loans held for investment has been reflected within Level 2 in our fair value hierarchy.

The fair value of loans held for sale and accounted for using the Fair Value Option discussed above, as well as those loans reported at fair value on a non-recurring basis accounted for using the lower of cost or market approach is determined utilizing pricing indicators from the whole loan market, which we consider our principal exit market for these loans. We have evaluated the valuation inputs used for these assets, including the terms of the loans, prevailing interest rates and credit risk, and deemed that the primary pricing inputs are Level 3 in our fair value hierarchy.

#### Valuation of Other Long-Term Investments

Other long-term investments carried at fair value include limited partnerships which we consolidate because we are either deemed to exercise control or are considered the primary beneficiary of a variable interest entity. These entities are considered investment companies and follow specialized industry accounting whereby their assets are carried at fair value. The investments held by these entities include various feeder fund investments in underlying master funds (whose underlying holdings generally include public fixed maturities and equity securities), as well as wholly-owned real estate held within other investment funds.

The fair value of the feeder fund investments in master funds are generally determined by reference to the investments in the underlying master funds. The fair value of investments in funds holding publicly traded equity securities are generally based on quoted prices in active markets for identical investments and are therefore reflected as Level 1. The fair value of investments in funds holding public fixed maturities are generally based on validated quotes from pricing services as described above, and are reflected in Level 2.

The fair value of wholly-owned real estate held in consolidated investment funds is determined through an independent appraisal process. The appraisals generally utilize a discounted cash flow model, following an income approach, that incorporates various assumptions including rental revenue, operating expenses and discount rates. These appraisals and the related assumptions are updated at least annually, and incorporate historical property experience and any observable market data, including any market transactions. Since many of the assumptions utilized are unobservable and are considered to be significant inputs to the valuation, the real estate investments within other long-term investments have been reflected within Level 3 in our fair value hierarchy. Consolidated real estate investment funds classified as Level 3 as of March 31, 2009 and December 31, 2008 totaled approximately \$0.4 billion and \$1.0 billion respectively. Our direct investment in these funds is not material, and the majority of the assets recorded as a result of the consolidation of these funds is offset by a noncontrolling interest reflected as a separate component of equity, which amount is not considered to be fair value and therefore, not included in fair value reporting above.

## Valuation of Derivative Instruments

Derivatives are recorded at fair value either as assets, within Other trading account assets, or Other long-term investments, or as liabilities, within Other liabilities, except for embedded derivatives which are recorded with the associated host contract. The fair values of derivative contracts are determined based on quoted prices in active exchanges or through the use of valuation models. The fair values of derivative contracts can be affected by changes in interest rates, foreign exchange rates, commodity prices, credit spreads, market volatility, expected returns, non-performance risk and liquidity as well as other factors. Liquidity valuation adjustments are made to reflect the cost of exiting significant risk positions, and consider the bid-ask spread, maturity, complexity, and other specific attributes of the underlying derivative position. Fair values can also be affected by changes in estimates and assumptions including those related to counterparty behavior used in valuation models.

Our over-the-counter, or OTC, derivative contracts are executed under master netting agreements with counterparties with a Credit Support Annex, or CSA, which is a bilateral ratings-sensitive agreement that requires collateral postings at established credit threshold levels. These agreements protect our interest, as well as those of our counterparties, should either party suffer a credit rating deterioration. The vast majority of our derivative agreements are with highly rated major international financial institutions. Consistent with the practice of major international financial institutions, we use the credit spread embedded in the LIBOR interest rate curve to reflect non-performance risk when determining the fair value of our derivative assets and liabilities. We believe this credit spread is an appropriate estimate of the non-performance risk for derivative related assets and liabilities between highly rated institutions after consideration of the impacts of the collateral posting process.

Our exchange-traded futures and options include treasury futures, Eurodollar futures, commodity futures, Eurodollar options and commodity options. Exchange-traded futures and options are valued using quoted prices in active markets and are classified within Level 1 in our fair value

hierarchy.

The majority of our derivative positions are traded in the OTC derivative market and are classified within Level 2 in our fair value hierarchy. OTC derivatives classified within Level 2 are valued using models generally accepted in the financial services industry that use actively quoted or observable market input values from external market data providers, non-binding broker-dealer quotations, third-party pricing vendors and/or recent trading activity. The fair values of most OTC derivatives, including forward rate agreements, interest rate and cross currency swaps, commodity swaps, commodity forward contracts, single name credit default swaps and to-be-announced forward contracts on highly rated mortgage-backed securities issued by U.S. government sponsored entities are determined using discounted cash flow models. The fair values of European style option contracts are determined using Black-Scholes option pricing models. These models key assumptions include the contractual terms of the respective contract, along with significant observable inputs, including interest rates, currency rates, credit spreads, yield curves, equity prices, index dividend yields, non-performance risk and volatility.

Most OTC derivative contracts have bid and ask prices that are actively quoted or can be readily obtained from external market data providers. Our policy is to use mid-market pricing consistent with our best estimate of fair value. The bid-ask spreads for derivatives classified within Level 3 of the fair value hierarchy are generally wider than derivatives classified within Level 2 thus requiring more judgment in estimating the mid-market price of such derivatives. The fair values of OTC derivative assets and liabilities classified as Level 3 totaled approximately \$1.1 billion and \$194 million as of March 31, 2009 and \$1.3 billion and \$140 million as of December 31, 2008, respectively, without giving consideration to the impact of netting.

Derivatives that are valued based upon models with unobservable market input values or input values from less actively traded or less-developed markets are classified within Level 3 in our fair value hierarchy. Derivatives classified as Level 3 include first-to-default credit basket swaps, look-back equity options and other structured options. For additional information regarding embedded derivatives in our annuity and retirement products classified as Level 3, see Valuation of Variable Annuity Optional Living Benefit Features below. The fair values of first-to-default credit basket swaps are derived from relevant observable inputs such as: individual credit default spreads, interest rates, recovery rates and unobservable model-specific input values such as correlation between different credits within the same basket. Look-back equity options and other structured options and derivatives are valued using simulation models such as the Monte Carlo technique. The input values for look-back equity options are derived from observable market indices such as interest rates, dividend yields, equity indices as well as unobservable model-specific input values such as certain volatility parameters. Level 3 methodologies are validated through periodic comparison of our fair values to broker-dealer s values.

All realized and unrealized changes in fair value of non-dealer related derivatives, with the exception of the effective portion of qualifying cash flow hedges and hedges of net investments in foreign operations, are recorded in current earnings. Generally, the changes in fair value of such non-dealer related derivatives, excluding those that qualify for hedge accounting, are recorded in Realized investment gains (losses), net. For additional information regarding the impact of changes in fair value of derivative instruments on our results of operations see Realized Investment Gains and Losses and General Account Investments Realized Investment Gains and Losses below.

We hold externally-managed investments in the European market, as discussed in greater detail under Realized Investment Gains and Losses and General Account Investments General Account Investments Fixed Maturity Securities Asset-Backed Securities. These investments are valued using market observable inputs including benchmark yields and reported trades and are classified as Level 2 for fair value reporting. The fair value of the embedded derivatives associated with these investments declined during the first quarter of 2009 due to the under performance of the investments, and as of March 31, 2009 remains in a loss position on a cumulative basis as a result of the recent stress in the credit markets. However, we believe the investment fundamentals remain sound, and the ultimate value that will be realized from these investments is greater than reflected by the current fair value of the embedded derivatives.

#### Valuation of Variable Annuity Optional Living Benefit Features

Our liability for future policy benefits includes general account liabilities for guarantees on variable annuity contracts, including guaranteed minimum accumulation benefits (GMAB), guaranteed minimum withdrawal benefits (GMWB) and guaranteed minimum income and withdrawal benefits (GMIWB). While these guarantees primarily relate to the optional living benefit features of our Individual Annuities segment, they are also included in certain variable annuities in our International Insurance segment and certain retirement account based group variable annuities in our Retirement segment. These benefits are accounted for as embedded derivatives and are carried at fair value with changes in fair value included in Realized investment gains (losses), net.

The fair values of the GMAB, GMWB and GMIWB liabilities are calculated as the present value of future expected benefit payments to customers less the present value of assessed rider fees attributable to the embedded derivative feature. Since there is no observable active market for the transfer of these obligations, the valuations are calculated using internally developed models with option pricing techniques. The models are based on a risk neutral valuation framework and incorporate premiums for risks inherent in valuation techniques, inputs, and the general uncertainty around the timing and amount of future cash flows. The determination of these risk premiums requires the use of management judgment. Under SFAS No. 157 we are also required to incorporate our own risk of non-performance in the valuation of the embedded derivatives associated with our optional living benefit features. Since insurance liabilities are senior to debt, we believe that reflecting the claims-paying ratings of our insurance subsidiaries in the valuation of the liability appropriately takes into consideration our own risk of non-performance. Historically, the expected cash flows were discounted using forward LIBOR interest rates, which were commonly viewed as being consistent with AA quality claims-paying ratings. However, in light of first quarter of 2009 developments, including rating agency downgrades to the claims-paying ratings of our insurance subsidiaries, we determined that forward LIBOR interest rates were no longer indicative of a market participant s view of our claims-paying ability. Beginning in the first quarter of 2009, the adjustment for our non-performance risk is determined taking into consideration publicly-available information relating to the claims-paying ability of our insurance subsidiaries, as indicated by the credit spreads associated with funding agreements issued by these subsidiaries. We adjust these credit spreads to remove any liquidity risk premium. As a result, in the first quarter of 2009 we increased the discount rate used in the valuations of the embedded derivatives associated with our optional living benefit features, reflecting the market perceived increase in our non-performance risk, and thereby reduced the fair value of the embedded derivative liabilities. The increase in the discount rate over forward LIBOR rates generally ranged from 250 to 300 basis points for the portion of the interest rate curve most relevant to these liabilities. The reduction in fair value resulted in a \$1,219 million pre-tax benefit to our Individual Annuities segment and a \$23 million pre-tax benefit to our Retirement segment in the first quarter of 2009.

Other significant inputs to the valuation models include capital market assumptions, such as interest rate and implied volatility assumptions, as well as various policyholder behavior assumptions that are actuarially determined, including lapse rates, benefit utilization rates, mortality rates and withdrawal rates. These assumptions are reviewed at least annually, and updated based upon historical experience and give consideration to any observable market data, including market transactions such as acquisitions and reinsurance transactions. In the first quarter of 2009 we further updated our volatility assumptions for our Individual Annuities segment to reflect the inclusion of new market inputs. We no longer solely utilize the implied volatility of over-the-counter equity options, but a blend of these implied volatilities and an index based on historical volatilities. This update to our volatility assumption, which resulted in a reduction in the fair value of the embedded derivatives associated with our optional living benefit features, was included in the \$92 million pre-tax benefit to our Individual Annuities segment in the first quarter of 2009.

Since many of the assumptions utilized in the valuation of the embedded derivatives associated with our optional living benefit features are unobservable and are considered to be significant inputs to the liability valuation, the liability included in future policy benefits has been reflected within Level 3 in our fair value hierarchy. The change in fair value of the GMAB, GMWB and GMIWB resulted in a decrease in the total

liability of \$1,413 million for the first quarter of 2009, primarily reflecting the update of our non-performance risk assumption discussed above. This change was significantly offset by increased amortization of deferred policy acquisition and other costs, and changes in value of related hedging instruments, primarily in our Individual Annuities segment as described in more detail under Results of Operations for Financial Services Businesses by Segment U.S. Retirement Solutions and Investment Management Division Individual Annuities.

#### Valuation of Long-Term Debt

Long-term debt carried at fair value includes funding received from the Federal Reserve Bank of New York on a non-recourse basis to finance the purchase of eligible asset-backed securities, under TALF. We value these liabilities using various inputs including the value of the collateral (eligible asset-backed securities), the value of similar non-TALF eligible collateral and various other market observable and non-observable inputs which incorporate significant management judgement. As a result, the pricing of the collateral assets (other trading account assets) and associated non-recourse liabilities have been classified within Level 3 in our fair value hierarchy. See Note 8 to the Unaudited Interim Consolidated Financial Statements for additional information regarding our participation in TALF.

#### Valuation of Other Assets and Other Liabilities

Other assets carried at fair value include U.S. Treasury bills held within our global commodities group whose fair values are determined consistent with similar securities described above under Valuation of Fixed Maturity Securities. Included in other liabilities are various derivatives contracts executed within our global commodities group, including exchange-traded futures, foreign currency and commodity contracts. The fair values of these derivative instruments are determined consistent with similar derivative instruments described above under Valuation of Derivative Instruments.

#### Valuation of Trading Account Assets

Trading account assets, including trading account assets supporting insurance liabilities, consist primarily of public corporate bonds, treasuries, equity securities and derivatives whose fair values are determined consistent with similar instruments described above in Valuation of Fixed Maturity Securities, Valuation of Equity Securities and Valuation of Derivative Instruments. Other trading account assets also includes collateral assets we hold under TALF, as described above in Valuation of Long-Term Debt.

#### Valuation of Cash Equivalents and Short-term Investments

Cash equivalents and short-term investments carried at fair value include money market instruments, commercial paper and other highly liquid debt instruments. Money market instruments are generally valued using unadjusted quoted prices in active markets that are accessible to us for identical assets and are primarily classified as Level 1. The remaining instruments in the Cash Equivalents and Short-term Investments category are typically not traded in active markets; however, their fair values are based on market observable inputs and, accordingly, these investments have been classified within Level 2 in our fair value hierarchy.

#### Realized Investment Gains and Losses and General Account Investments

## **Realized Investment Gains and Losses**

Realized investment gains and losses are generated from numerous sources, including the sale of fixed maturity securities, equity securities, investments in joint ventures and limited partnerships and other types of investments, as well as adjustments to the cost basis of investments for other-than-temporary impairments. Realized investment gains and losses are also generated from prepayment premiums received on private fixed

maturity securities, recoveries of principal on previously impaired securities, provisions for losses on commercial mortgage and other loans, fair value changes on commercial mortgage operations loans, fair value changes on embedded derivatives and derivatives, except those derivatives that qualify for cash flow hedge accounting treatment and those derivatives used in our capacity as a broker or dealer.

We perform quarterly impairment reviews to determine when a decline in value is other-than-temporary. In evaluating whether a decline in value is other-than-temporary, we consistently consider several factors including, but not limited to, the following: (1) the extent and duration of the decline in value; (2) the reasons for the decline in value (credit event, currency, or interest-rate related, including general credit spread widening); and (3) the financial condition of and near-term prospects of the issuer. In addition, under FSP FAS 115-2 and FAS 124-2, Recognition and Presentation of Other-Than-Temporary Impairments, which we adopted effective January 1, 2009, an other-than-temporary impairment must be recognized for a debt security if we intend to sell the security or more likely than not will be required to sell the security before recovery of its amortized cost basis. With regard to available-for-sale equity securities, we also consider the ability and intent to hold the investment for a period of time to allow for a recovery of value.

When it is determined that a decline in value of an equity security is other-than-temporary, the carrying value of the equity security is impaired to its fair value, with a corresponding charge to Realized investment gains (losses), net. Under FSP FAS 115-2 and FAS 124-2, when an other-than-temporary impairment of a debt security has occurred, the amount of the other-than-temporary impairment recognized in Realized investment gains (losses), net depends on whether we intend to sell the security or more likely than not will be required to sell the security before recovery of its amortized cost basis. If the debt security meets either of these two criteria, the other-than-temporary impairment recognized in earnings is equal to the entire difference between the security s amortized cost basis and its fair value at the impairment measurement date. For other-than-temporary impairments of debt securities that do not meet either of these two criteria, the net amount recognized in earnings is equal to the difference between the amortized cost of the debt security and the net present value of its projected future cash flows, discounted at the effective interest rate implicit in the debt security prior to impairment. Any difference between the fair value and the net present value of the debt security at the impairment measurement date is recorded in Other comprehensive income (loss).

Prior to our adoption of FSP FAS 115-2 and FAS 124-2, we were required to recognize an other-than-temporary impairment for a debt security unless we could assert that we had both the intent and ability to hold the security for a period of time sufficient to allow for a recovery in the debt security s fair value to its amortized cost basis. In light of market conditions and liquidity concerns, beginning in the third quarter of 2008, our determinations of whether the decline in value of a debt security was other-than-temporary placed greater emphasis on our internal analysis of the underlying credit and our ability and intent to hold the investment for a period of time to allow for a recovery of value, versus the extent and duration of a decline in fair value. When we determined that there was an other-than-temporary impairment, we wrote down the carrying value of the debt security to its fair value, with a corresponding charge recorded in Realized investment gains (losses), net. For a further discussion of our policies regarding other-than-temporary declines in investment value and the related methodology for recording fixed maturity other-than-temporary impairments, see General Account Investments Fixed Maturity Securities Other-than-Temporary Impairments of Fixed Maturity Securities below. For a further discussion of our policies regarding other-than-temporary declines in investment value and the related methodology for recording equity impairments, see General Account Investments Equity Securities Other-than-Temporary Impairments of Equity Securities below.

The level of other-than-temporary impairments generally reflects economic conditions and is expected to increase when economic conditions worsen and to decrease when economic conditions improve. Historically, the causes of other-than-temporary impairments have been specific to each individual issuer and have not directly resulted in impairments to other securities within the same industry or geographic region. However, as discussed in more detail below, certain of the other-than-temporary impairments recognized for the three months ended March 31, 2009 and 2008 relate to asset-backed securities collateralized by sub-prime mortgages and reflect the

overall deterioration of the housing market. We may realize additional credit and interest rate related losses through sales of investments pursuant to our credit risk and portfolio management objectives. In light of the unprecedented current market conditions, and in consideration of the potential impact on capital and tax positions, beginning in the fourth quarter of 2008 we temporarily curtailed the active trading policy of certain portfolios, and are currently evaluating our going forward trading strategies. Other-than-temporary impairments, interest rate related losses and credit losses (other than those related to certain of our businesses which primarily originate investments for sale or syndication to unrelated investors) are excluded from adjusted operating income. In periods subsequent to the recognition of an other-than-temporary impairment, the impaired security is accounted for as if it had been purchased on the measurement date of the impairment. For debt securities, the discount (or reduced premium) based on the new cost basis may be accreted into net investment income, and included in adjusted operating income in future periods based on prospective changes in cash flow estimates, to reflect adjustments to the effective yield.

We require most issuers of private fixed maturity securities to pay us make-whole yield maintenance payments when they prepay the securities. Prepayments are driven by factors specific to the activities of our borrowers as well as the interest rate environment.

We use interest and currency swaps and other derivatives to manage interest and currency exchange rate exposures arising from mismatches between assets and liabilities, including duration mismatches. We use derivative contracts to mitigate the risk that unfavorable changes in currency exchange rates will reduce U.S. dollar equivalent earnings generated by certain of our non-U.S. businesses. We also use equity-based derivatives to hedge the equity risks embedded in some of our annuity products. Derivative contracts also include forward purchases and sales of to-be-announced mortgage-backed securities primarily related to our mortgage dollar roll program. Many of these derivative contracts do not qualify for hedge accounting, and, consequently, we recognize the changes in fair value of such contracts from period to period in current earnings, although we do not necessarily account for the related assets or liabilities the same way. Accordingly, realized investment gains and losses from our derivative activities can contribute significantly to fluctuations in net income.

Adjusted operating income excludes Realized investment gains (losses), net, (other than those representing profit or loss of certain of our businesses which primarily originate investments for sale or syndication to unrelated investors, and those associated with terminating hedges of foreign currency earnings, current period yield adjustments, or product derivatives and the effect of any related economic hedging program) and related charges and adjustments.

The following tables set forth Realized investment gains (losses), net, by investment type for the Financial Services Businesses and Closed Block Business, as well as related charges and adjustments associated with the Financial Services Businesses, for the three months ended March 31, 2009 and 2008, respectively. For a discussion of our general account investment portfolio and related results, including overall income yield and investment income, as well as our policies regarding other-than-temporary declines in investment value and the related methodology for recording impairment charges, see General Account Investments below. For additional details regarding adjusted operating income, which is our measure of performance for the segments of our Financial Services Businesses, see Note 8 to the Unaudited Interim Consolidated Financial Statements.

	2009 N	Three Months Ended March 31, 2009 200 (in millions)

- (1) The Financial Services Businesses include \$240 million and \$290 million in the three months ended March 31, 2009 and 2008, respectively, related to other-than-temporary impairments of asset-backed securities collateralized by sub-prime mortgages. The Closed Block Business includes \$101 million and \$113 million in the three months ended March 31, 2009 and 2008, respectively, related to other-than-temporary impairments of asset-backed securities collateralized by sub-prime mortgages.
- (2) The Financial Services Businesses include \$138 million and \$208 million of losses in the three months ended March 31, 2009 and 2008, respectively, related to embedded derivatives associated with certain externally managed investments in the European market.
- (3) Related adjustments include that portion of Realized investment gains (losses), net, that are included in adjusted operating income, including those pertaining to certain derivative contracts, as well as those that represent profit or loss of certain of our businesses which primarily originate investments for sale or syndication to unrelated investors. Related adjustments also include that portion of Asset management fees and other income that are excluded from adjusted operating income, including the change in value due to the impact of changes in foreign currency exchange rates during the period on certain assets and liabilities for which we economically hedge the foreign currency exposure as well as counterparty credit losses on derivative positions. See Note 8 to the Unaudited Interim Consolidated Financial Statements for additional information on these related adjustments.
- (4) Reflects charges that are related to realized investment gains (losses), net, and excluded from adjusted operating income, as described more fully in Note 8 to the Unaudited Interim Consolidated Financial Statements.

#### 2009 to 2008 Three Month Comparison

Financial Services Businesses

The Financial Services Businesses net realized investment gains in the first quarter of 2009 were \$580 million, compared to net realized investment losses of \$802 million in the first quarter of 2008.

Net realized losses on fixed maturity securities were \$249 million in the first quarter of 2009, compared to net realized losses of \$398 million in the first quarter of 2008, as set forth in the following table:

	Three Months Ende March 31,			ded
	2	2009		2008
Realized investment gains (losses) - Fixed Maturity Securities Financial Services Businesses

Net gains (losses) on sales and maturities Fixed Maturity Investments(2)	\$	216	\$	11

<sup>(1)</sup> Represents the difference between the fair value of the impaired debt security and the net present value of its projected future cash flows at the time of impairment that is recorded in Other comprehensive income (loss).

Gross trading gains on sales and maturities of fixed maturity securities of \$280 million in the first quarter of 2009 were primarily due to sales of government bonds in our Gibraltar Life and Japanese Life Planner operations. Gross losses on sales and maturities of fixed maturity securities of \$64 million in the first quarter of 2009 were primarily due to lower prices resulting from credit spread widening and liquidity concerns. None of the gross losses on sales and maturities in the first quarter of 2009 related to asset-backed securities collateralized by sub-prime mortgages.

Gross losses on sales and maturities of fixed maturity investments of \$67 million in the first quarter of 2008, were primarily related to credit spread increases in the credit markets resulting generally from concerns over sub-prime mortgage exposures, and interest rates. None of the gross losses on sales and maturities in the first quarter of 2008 related to asset-backed securities collateralized by sub-prime mortgages. See

General Account Investments Fixed Maturity Securities Asset-Backed Securities for additional information regarding our exposure to sub-prime

<sup>(2)</sup> Amounts exclude credit related losses through sales of investments pursuant to our credit risk and portfolio management objectives.

mortgages. See below for additional information regarding the other-than-temporary impairments of fixed maturity securities in the first quarter of 2009 and 2008.

Net realized losses on equity securities were \$266 million in the first quarter of 2009, of which other-than-temporary impairments were \$253 million and net trading losses on sales of equity securities were \$13 million. Net realized losses on equity securities were \$56 million in the first quarter of 2008, of which other-than-temporary impairments were \$48 million and net trading losses on sales of equity securities were \$8 million. See below for additional information regarding the other-than-temporary impairments of equity securities in the first quarter of 2009 and 2008.

Net realized gains on derivatives were \$1.187 million in the first quarter of 2009, compared to net realized losses of \$331 million in the first quarter of 2008. The net derivative gains in the first quarter of 2009 primarily reflect net gains of \$1,346 million on embedded derivatives and related hedge positions associated with certain variable annuity contracts. This benefit was driven by a market-perceived increase in our own risk of non-performance. For additional information regarding the methodology used in determining the fair value of the embedded derivatives associated with our living benefit features, including the first quarter of 2009 updates, see Valuation of Assets and Liabilities Fair Value of Assets and Liabilities Valuation of Variable Annuity Optional Living Benefit Features. Also contributing to the net derivative gains in 2009 were net mark-to-market gains of \$202 million on foreign currency forward contracts used to hedge the future income of non-U.S. businesses due to the strengthening of the U.S. dollar. Partially offsetting these gains were net mark-to-market losses of \$201 million on interest rate derivatives used to manage duration, and net losses of \$138 million on embedded derivatives associated with certain externally managed investments in the European market due to under performance in the applicable financial markets. Net mark-to-market losses on interest rate derivatives used to manage duration includes the impact of long-duration floating-to-fixed interest rate swaps we entered into in order to add duration exposure to our Japanese investment portfolio. Based on an evaluation of recent market conditions, beginning in the fourth quarter of 2008 and continuing into the first quarter of 2009, we terminated or offset many of these interest rate swaps in consideration of, among other things, the interest rate environment. We continue to manage the interest rate risk profile of our businesses in the context of market conditions and relative opportunities, and we expect to resume implementing strategies to lengthen the duration of our Japanese investment portfolio as our assessment of market conditions changes. The net derivative losses in the first quarter of 2008 primarily reflect net mark-to-market losses of \$208 million on embedded derivatives associated with certain externally managed investments in the European market, due to spread widening, and negative mark-to-market adjustments of \$139 million on foreign currency forward contracts used to hedge the future income of non-U.S. businesses, due to the weakening of the U.S. dollar. Also contributing to the net derivative losses in 2008 were net losses of \$40 million on embedded derivatives and related hedge positions associated with certain domestic variable annuity contracts. Partially offsetting these losses were net gains of \$100 million on interest rate derivatives used to manage duration, as interest rates declined. For information regarding our externally managed investments in the European market, see General Account Investments Fixed Maturity Securities Asset-Backed Securities. For information regarding our methodology for determining the fair value of our derivative instruments, see Valuation of Assets and Liabilities Fair Value of Assets and Liabilities Valuation of Derivative Instruments.

Net realized losses on other investments were \$92 million in the first quarter of 2009, primarily related to increases in our commercial mortgage and other loan loss reserves and mark-to-market losses on mortgage loans within our divested commercial mortgage securitization operations due to continued instability in the commercial mortgage-backed securities market during the first quarter of 2009. For additional information regarding these operations, see Divested Businesses. Net realized losses on other investments were \$17 million in the first quarter of 2008, primarily related to mark-to-market losses on mortgage loans within our divested commercial mortgage securitization operations.

During the first quarter of 2009 we recorded other-than-temporary impairments of \$678 million in earnings, compared to total other-than-temporary impairments of \$437 million recorded in earnings in the first quarter of 2008. The following tables set forth, for the periods indicated, the composition of other-than-temporary impairments recorded in earnings attributable to the Financial Services Businesses by asset type, and for fixed maturity securities, by reason.

		onths Ended rch 31,
	2009	2008

Other-than-temporary impairments on fixed maturity securities recorded in			
earnings Financial Services Businesses			
Due to credit events or adverse conditions of the respective issuer(1)	\$ 46	\$ 18	\$ 64
Due to other accounting guidelines(2)	244	80	324
Total	\$ 290	\$ 98	\$ 388

- (1) Represents circumstances where we believe credit events or other adverse conditions of the respective issuers have caused, or will lead to, a deficiency in the contractual cash flows related to the investment. In certain of these circumstances the decrease in fair value, at the time the impairment was recorded, was partially driven by general credit spread widening or liquidity concerns and we believe the recoverable value of the investment, based on the expected future cash flows, is greater than the current fair value.
- (2) Includes certain circumstances relating to asset-backed securities with a credit rating below AA, where the present value of prospective cash flows of the security have declined, but we do not believe credit events or other adverse conditions of the respective issuers have caused a deficiency in the contractual cash flows related to the investment. Also includes circumstances where we cannot assert our ability or intent to hold for a period of time to allow for a recovery of value. In certain of these circumstances the decrease in fair value, at the time the impairment was recorded, was driven primarily by general credit spread widening or liquidity concerns, and we believe the recoverable value of the investment, based on the expected future cash flows, is greater than the current fair value.

Fixed maturity other-than-temporary impairments in the first quarter of 2009 were concentrated in asset-backed securities collateralized by sub-prime mortgages, and the finance, services, and manufacturing sectors of our corporate securities, and were primarily driven by downgrades in credit, bankruptcy or other adverse financial conditions of the respective issuers, which have caused, or we believe will lead to, a deficiency in the contractual cash flows related to the investment. Equity security other-than-temporary impairments in the first quarter of 2009 were primarily driven by overall declines in the Japanese equity markets and losses in our mutual fund shares representing our interest in high yield bond funds of certain of our separate account investments supporting corporate owned life insurance. Fixed maturity other-than-temporary impairments in the first quarter of 2008 were concentrated in asset-backed securities and the services, finance, and manufacturing sectors of our corporate securities, and were primarily driven by credit spread increases as discussed above, liquidity concerns, downgrades in credit, bankruptcy or other adverse financial conditions of the respective issuers. For information regarding the fair value methodology used in determining our other-than-temporary impairments, see Valuation of Assets and Liabilities Fair Value of Assets and Liabilities Valuation of Fixed Maturity Securities, and Valuation of Assets and Liabilities Fair Value of Assets and Liabilities Valuation of Equity Securities.

#### Closed Block Business

For the Closed Block Business, net realized investment losses in the first quarter of 2009 were \$435 million, compared to net realized investment losses of \$110 million in the first quarter of 2008.

Net realized losses on fixed maturity securities were \$110 million in the first quarter of 2009, compared to net realized losses of \$28 million in the first quarter of 2008, as set forth in the following table:

	Three Months Ende March 31,		
	2009	2008 nillions)	
Realized investment gains (losses) Fixed Maturity Securities Closed Block Business	(111 11	illillolis)

Credit related losses on sales	(5)	(26)
Total gross realized investment losses	(193)	(245)
Realized investment gains (losses), net Fixed Maturity Securities	\$ (110)	\$ (28)
Net gains (losses) on sales and maturities Fixed Maturity Investments(2)	\$ 76	\$ 148

- (1) Represents the difference between the fair value of the impaired debt security and the net present value of its projected future cash flows at the time of impairment that is recorded in Other comprehensive income (loss).
- (2) Amounts exclude credit related losses through sales of investments pursuant to our credit risk and portfolio management objectives.

Net gains on sales and maturities of fixed maturity securities of \$76 million in the first quarter of 2009 were primarily due to sales related to our total return strategy. Gross losses on sales and maturities of fixed maturity securities of \$7 million in the first quarter of 2009, declined in comparison to \$68 million of such losses in the first quarter of 2008, primarily due to the curtailment of our active trading policies, as discussed below. There were no gross losses on sales or maturities in the first quarter of 2009 or the first quarter of 2008 related to asset-backed securities collateralized by sub-prime mortgages. In light of the unprecedented current market conditions and in consideration of the potential impact on capital and tax positions, beginning in the fourth quarter of 2008 we curtailed our active trading policy, which resulted in a lower level of realized losses in this portfolio than might otherwise have been incurred, and are continuing to limit our active trading strategy for this portfolio while we evaluate our going forward trading strategies for the Closed Block Business. Net gains on sales and maturities of fixed maturity securities of \$148 million in the first quarter of 2008 were also primarily due to sales related to our total return strategy. See General Account Investments Fixed Maturity Securities Asset-Backed Securities for additional information regarding our exposure to sub-prime mortgages. See below for additional information regarding the other-than-temporary impairments of fixed maturity securities in the first quarter of 2009 and 2008.

Net realized losses on equity securities were \$235 million in the first quarter of 2009, including other-than-temporary impairments of \$240 million, partially offset by net trading gains on sales of equity securities of \$5 million. Net realized losses on equity securities were \$93 million in the first quarter of 2008, of which net trading losses on equity securities were \$41 million, and other-than-temporary impairments were \$52 million. Results for both periods reflect sales pursuant to our active management strategy, which is currently being evaluated as noted above. See below for additional information regarding the other-than-temporary impairments of equity securities in the first quarter of 2009 and 2008.

Net realized losses on derivatives were \$37 million in the first quarter of 2009, compared to net realized gains of \$14 million in the first quarter of 2008. Derivative gains in the first quarter of 2009 primarily reflect net mark-to-market losses of \$88 million on interest rate derivatives used to manage duration, partially offset by net gains of \$37 million related to currency derivatives used to hedge foreign denominated investments and net mark-to-market gains of \$27 million on credit derivatives. Derivative gains in the first quarter of 2008 primarily reflect the impact of interest rate derivatives used to manage the duration of the fixed maturity investment portfolio partially offset by net losses on currency derivatives used to hedge foreign investments. For information regarding our methodology for determining the fair value of our derivative instruments, see Valuation of Assets and Liabilities Fair Value of Assets and Liabilities Valuation of Derivative Instruments.

Net realized losses on other investments were \$53 million in the first quarter of 2009, primarily related to increases in our commercial mortgage loan loss reserves and other-than-temporary impairments on joint ventures and partnerships.

During the first quarter of 2009 we recorded other-than-temporary impairments of \$443 million in earnings, compared to other-than-temporary impairments of \$204 million recorded in earnings in the first quarter of 2008. The following tables set forth, for the periods indicated, the composition of other-than-temporary impairments recorded in earnings attributable to the Closed Block Business by asset type, and for fixed maturity securities, by reason.

Due to other accounting guidelines(3)			2	2	
Total	\$ 101	\$	80	\$ 181	

- (1) Excludes the portion of other-than-temporary impairment recorded in Other comprehensive income (loss), representing any difference between the fair value of the impaired debt security and the net present value of its projected future cash flows at the time of impairment.
- (2) Represents circumstances where we believe credit events or other adverse conditions of the respective issuers have caused, or will lead to, a deficiency in the contractual cash flows related to the investment. The amount of the impairment recorded in earnings is the difference between the amortized cost of the debt security and the net present value of its projected future cash flows discounted at the effective interest rate implicit in the debt security prior to impairment.
- (3) Primarily represents circumstances where we intend to sell the security or more likely than not will be required to sell the security before recovery of its amortized cost basis.

Other-than-temporary impairments on fixed maturity securities recorded in			
earnings Closed Block Business			
Due to credit events or adverse conditions of the respective issuer(1)	\$ 17	\$ 8	\$ 25
Due to other accounting guidelines(2)	96	30	126
Total	\$ 113	\$ 38	\$ 151

- (1) Represents circumstances where we believe credit events or other adverse conditions of the respective issuers have caused, or will lead to, a deficiency in the contractual cash flows related to the investment. In certain of these circumstances the decrease in the fair value, at the time the impairment was recorded, was partially driven by general credit spread widening or liquidity concerns and we believe the recoverable value of the investment, based on the expected future cash flows, is greater than the current fair value.
- (2) Includes certain circumstances relating to asset-backed securities with a credit rating below AA, where the present value of prospective cash flows of the security have declined, but we do not believe credit events or other adverse conditions of the respective issuers have caused a deficiency in the contractual cash flows related to the investment. Also includes circumstances where we cannot assert our ability or intent to hold for a period of time to allow for a recovery of value. In certain of these circumstances the decrease in fair value, at the time the impairment was recorded, was driven primarily by general credit spread widening or liquidity concerns, and we believe the recoverable value of the investment, based on the expected future cash flows, is greater than the current fair value.

Other-than-temporary impairments in the first quarter of 2009 were concentrated in asset-backed securities collateralized by sub-prime mortgages, and the finance, services, and manufacturing sectors of our corporate securities and were primarily driven by liquidity concerns, downgrades in credit, bankruptcy or other adverse financial conditions of the respective issuers, which have caused, or we believe will lead to, a deficiency in the contractual cash flows related to the investment. Other-than-temporary impairments in the first quarter of 2008 were concentrated in asset-backed securities and the services, finance, and manufacturing sectors of our corporate securities and were primarily driven by credit spread increases as discussed above, liquidity concerns, downgrades in credit, bankruptcy or other adverse financial conditions of the respective issuers.

Equity security other-than-temporary impairments in the first quarter of 2009 and 2008 were primarily driven by overall declines in the equity markets. For information regarding the fair value methodology used in determining our other-than-temporary impairments, see Valuation of Assets and Liabilities Fair Value of Assets and Liabilities Valuation of Fixed Maturity Securities, and Valuation of Assets and Liabilities Fair Value of Assets and Liabilities Valuation of Equity Securities.

#### **General Account Investments**

### Portfolio Composition

Our investment portfolio consists of public and private fixed maturity securities, commercial mortgage and other loans, equity securities and other invested assets. The composition of our general account reflects, within the discipline provided by our risk management approach, our need for competitive results and the selection of diverse investment alternatives available primarily through our Asset Management segment. The size of our portfolio enables us to invest in asset classes that may be unavailable to the typical investor.

Our total general account investments were \$226.955 billion and \$230.351 billion as of March 31, 2009 and December 31, 2008, respectively, which are segregated between the Financial Services Businesses and the Closed Block Business. Total general account investments attributable to the Financial Services Businesses were \$169.130 billion and \$171.644 billion as of March 31, 2009 and December 31, 2008, respectively, while total general account investments attributable to the Closed Block Business were \$57.825 billion and \$58.707 billion as of March 31, 2009 and December 31, 2008, respectively. The following table sets forth the composition of the investments of our general account as of the dates indicated. The average duration of our general account investment portfolio attributable to the domestic Financial Services Businesses, including the impact of derivatives, as of March 31, 2009 is between 4 and 5 years.

	March 31, 2009

- (1) Other long-term investments consist of real estate and non-real estate related investments in joint ventures (other than our investment in operating joint ventures, which includes our investment in Wachovia Securities) and partnerships, investment real estate held through direct ownership and other miscellaneous investments.
- (2) Short-term investments consist primarily of money market funds with virtually no sub-prime exposure.
- (3) Includes invested assets of brokerage, trading and banking operations, real estate and relocation services, and asset management operations. Excludes assets of our asset management operations managed for third parties and those assets classified as Separate account assets on our balance sheet. For additional information regarding these investments, see Invested Assets of Other Entities and Operations below.

The decrease in general account investments attributable to the Financial Services Businesses in the first quarter of 2009 was primarily a result of the impact of foreign currency and net declines in market value, partially offset by the reinvestment of net investment results. The decrease in general account investments attributable to the Closed Block Business in the first quarter of 2009 was primarily due to reductions in leverage and a net decrease in market value, partially offset by portfolio growth as a result of reinvestment of net investment income.

We have substantial insurance operations in Japan, with 34% and 35% of our Financial Services Businesses general account investments relating to our Japanese insurance operations as of March 31, 2009 and December 31, 2008, respectively. Total general account investments related to our Japanese insurance operations were \$57.8 billion and \$59.8 billion as of March 31, 2009 and December 31, 2008, respectively. The average duration of our general account investment portfolio related to our Japanese insurance operations, including the impact of derivatives, as of March 31, 2009 is approximately 11 years. The decrease in general account investments related to our Japanese insurance operations in the first quarter of 2009 is primarily attributable to the impact of changes in foreign currency exchange rates and net declines in market value, partially offset by portfolio growth as a result of business growth and the reinvestment of net investment income. The following table sets forth the composition of the investments of our Japanese insurance operations general account as of the dates indicated.

	March 31, 2009		ember 31, 2008

- (2) Excludes assets classified as Separate accounts assets on our balance sheet.

Our Japanese insurance operations use the yen as their functional currency, as it is the currency in which they conduct the majority of their operations. Although the majority of the Japanese general account is invested in yen denominated investments, our Japanese insurance operations also hold significant investments denominated in U.S. dollars. As of March 31, 2009, our Japanese insurance operations had \$12.4 billion of

investments denominated in U.S. dollars, including \$1.3 billion that were hedged to yen through third party derivative contracts and \$6.5 billion that support liabilities denominated in U.S. dollars. As of December 31, 2008, our Japanese insurance operations had \$12.3 billion of investments denominated in U.S. dollars, including \$1.1 billion that were hedged to yen through third party derivative contracts and \$6.0 billion that support liabilities denominated in U.S. dollars. For additional information regarding U.S. dollar investments held in our Japanese insurance operations see, Results of Operations for Financial Services Businesses by Segment International Insurance and Investments Division.

- (1) Yields are annualized, for interim periods, and based on quarterly averages calculated using beginning and end of period balances. Yields are based on carrying values except for fixed maturities, equity securities and securities lending activity. Yields for fixed maturities are based on amortized cost. Yields for equity securities are based on cost. Yields for securities lending activity are calculated net of corresponding liabilities and rebate expenses. Yields exclude investment income on assets other than those included in invested assets of the Financial Services Businesses. Prior periods yields are presented on a basis consistent with the current period presentation.
- (2) Includes investment income of securities brokerage, securities trading, banking operations, real estate and relocation services, and asset management operations.

The net investment income yield on our general account investments after investment expenses, excluding realized investment gains (losses), was 4.66% and 5.07% for the three months ended March 31, 2009 and 2008, respectively. The net investment income yield attributable to the Financial Services Businesses was 4.47% for the three months ended March 31, 2009, compared to 4.76% for the three months ended March 31, 2008. See below for a discussion of the change in the Financial Services Businesses yields.

The net investment income yield attributable to the Closed Block Business was 5.22% for the three months ended March 31, 2009 compared to 5.95% for the three months ended March 31, 2008. The decrease was primarily due to the impact of lower interest rates on floating rate investments due to rate resets and lower income from investments in joint ventures and limited partnerships, driven by lower appreciation and losses on the underlying assets.

The following tables set forth the income yield and investment income, excluding realized investment gains (losses), for each major investment category of the Financial Services Business general account, excluding the Japanese operations portion of the general account which is presented separately below, for the periods indicated.

	Three Mont		Three Mon March 3

Prior periods yields are presented on a basis consistent with the current period presentation.

(2) Includes investment income of securities brokerage, securities trading, banking operations, real estate and relocation services, and asset management operations.

The net investment income yield attributable to the non-Japanese operations portion of the Financial Services Businesses portfolio was 5.20% for the three months ended March 31, 2009, compared to 5.66% for the

three months ended March 31, 2008. The decrease was primarily due to a decrease in fixed maturity yields as a result of lower interest rates on floating rate investments due to rate resets and lower income from short term investments as a result of lower short-term rates.

The following tables set forth the income yield and investment income, excluding realized investment gains (losses), for each major investment category of our Japanese operations general account for the periods indicated.

	Three Mont March 31		Three Months Ended March 31, 2008

Total investment income	3.02%	\$ 462	2.79%	\$ 370		

(1) Yields are annualized, for interim periods, and based on quarterly averages calculated using beginning and end of period balances. Yields are based on carrying values except for fixed maturities, equity securities and securities lending activity. Yields for fixed maturities are based on amortized cost. Yields for equity securities are based on cost. Yields for securities lending activity are calculated net of corresponding liabilities and rebate expenses. Yields exclude investment income on assets other than those included in invested assets of the Financial Services Businesses. Prior periods yields are presented on a basis consistent with the current period presentation.

The net investment income yield attributable to the Japanese insurance operations—portfolios was 3.02% for the three months ended March 31, 2009, compared to 2.79% for the three months ended March 31, 2008. The increase in yield on the Japanese insurance portfolio is primarily attributable to various investment portfolio strategies, including an increase in unhedged U.S. dollar investments and increased exposure to corporate securities. The U.S. dollar denominated fixed maturities that are not hedged to yen through third party derivative contracts provide a yield that is substantially higher than the yield on comparable Japanese fixed maturities. The average value of U.S. dollar denominated fixed maturities that are not hedged to yen through third party derivative contracts for the three months ended March 31, 2009 and 2008 was approximately \$9.7 billion and \$9.0 billion, respectively, based on amortized cost. For additional information regarding U.S. dollar investments held in our Japanese insurance operations see, Results of Operations for Financial Services Businesses by Segment International Insurance and Investments Division.

### Fixed Maturity Securities

Our fixed maturity securities portfolio consists of publicly-traded and privately-placed debt securities across an array of industry categories. The fixed maturity securities relating to our international insurance operations are primarily comprised of foreign government securities.

Fixed Maturity Securities and Unrealized Gains and Losses by Industry Category

The following table sets forth the composition of the portion of our fixed maturity securities portfolio by industry category attributable to the Financial Services Businesses as of the dates indicated and the associated gross unrealized gains and losses.

- (1) Investment data has been classified based on standard industry categorizations for domestic public holdings and similar classifications by industry for all other holdings.
- (2) Includes \$108 million of gross unrealized gains and \$140 million of gross unrealized losses as of March 31, 2009, compared to \$157 million of gross unrealized gains and \$133 million of gross unrealized losses as of December 31, 2008 on securities classified as held to maturity, which are not reflected in other comprehensive income.
- (3) As of March 31, 2009 and December 31, 2008, based on amortized cost, 87% represent Japanese government bonds held by our Japanese insurance operations, with no other individual country representing more than 5% of the balance.
- (4) Excluded from the above are securities held outside the general account in other entities and operations. For additional information regarding investments held outside the general account, see Invested Assets of Other Entities and Operations below.
- (5) The table above excludes fixed maturity securities classified as trading. See Trading Account Assets Supporting Insurance Liabilities and Other Trading Account Assets for additional information.

As a percentage of amortized cost, fixed maturity investments attributable to the Financial Services Businesses as of March 31, 2009 consist primarily of 25% foreign government securities, 16% manufacturing sector, 9% public utility sector, and 9% asset-backed securities compared to 26% foreign government securities, 15% manufacturing sector, 9% asset-backed securities and 8% public utility sector as of December 31, 2008.

The gross unrealized losses related to our fixed maturity portfolio attributable to the Financial Services Businesses of \$11.248 billion as of March 31, 2009 were relatively unchanged compared to \$11.251 billion as of December 31, 2008, as credit spread tightening and the recognition of other-than-temporary impairments in the current period, were largely offset by the increase in amortized cost resulting from our adoption of FSP FAS 115-2 and FAS 124-2 on January 1, 2009. For additional information regarding our adoption of this FSP, see Note 2 to the Unaudited Interim Consolidated Financial Statements. The gross unrealized losses as of March 31, 2009 were concentrated primarily in asset-backed and commercial mortgage-backed securities and the manufacturing, finance and service sectors of our corporate securities and the manufacturing and service sectors of our corporate securities. The gross unrealized gains related to our fixed maturity portfolio attributable to the Financial Services Businesses decreased from \$4.684 billion as of December 31, 2008 to \$3.734 billion as of March 31, 2009, primarily due to the impact of changes in foreign currency exchange rates and an increase in risk-free rates.

The following table sets forth the composition of the portion of our fixed maturity securities portfolio by industry category attributable to the Closed Block Business as of the dates indicated and the associated gross unrealized gains and losses.

Investment data has been classified based on standard industry categorizations for domestic public holdings and similar classifications by industry for all other holdings.

<sup>(2)</sup> As of March 31, 2009 and December 31, 2008, based on amortized cost, no individual foreign country represents more than 10% of the balance.

(3) The table above excludes fixed maturity securities classified as trading. See Other Trading Account Assets for additional information.

As a percentage of amortized cost, fixed maturity investments attributable to the Closed Block Business consist primarily of 20% manufacturing sector, 13% asset-backed securities, 13% utilities sector, 10% services sector, 9% commercial mortgage-backed securities and 7% residential mortgage-backed securities, as of both March 31, 2009 and December 31, 2008.

The gross unrealized losses related to our fixed maturity portfolio attributable to the Closed Block Business increased from \$5.319 billion as of December 31, 2008 to \$5.862 billion as of March 31, 2009, primarily due to the increase in amortized cost resulting from our adoption of FSP FAS 115-2 and FAS 124-2 on January 1, 2009, partially offset by credit spread tightening and the recognition of other-than-temporary impairments in the current period. The gross unrealized losses as of March 31, 2009 were concentrated primarily in asset-backed securities, commercial mortgage-backed securities and the manufacturing, services, and utility sectors of our corporate securities and the manufacturing, services, and utility sectors of our corporate securities. The gross unrealized gains related to our fixed maturity portfolio attributable to the Closed Block Business decreased from \$1.284 billion as of December 31, 2008 to \$891 million as of March 31, 2009, primarily due to an increase in risk-free rates.

Asset-Backed Securities

As of March 31, 2009, included within asset-backed securities attributable to the Financial Services Businesses on an amortized cost basis is approximately \$5.476 billion (\$2.844 billion fair value) of securities collateralized by sub-prime mortgages. While there is no market standard definition, we define sub-prime mortgages as residential mortgages that are originated to weaker quality obligors as indicated by weaker credit scores, as well as mortgages with higher loan-to-value ratios, or limited documentation. The significant deterioration of the U.S. housing market, high interest rate resets, and relaxed underwriting standards for some originators of sub-prime mortgages have led to higher delinquency rates, particularly for those mortgages issued in 2006 and 2007. The following tables set forth the amortized cost and fair value of our asset-backed securities attributable to the Financial Services Businesses as of the dates indicated, by credit quality, and for asset-backed securities collateralized by sub-prime mortgages, by year of issuance (vintage).

<sup>(1)</sup> Our enhanced short-term portfolio is used primarily to invest cash proceeds of securities lending and repurchase activities, commercial paper issuances and cash generated from certain trading and operating activities. The investment policy statement of this portfolio requires that securities purchased for this portfolio have a remaining expected average life of 2 years or less when acquired.

<sup>(2)</sup> Included within the \$5.5 billion of asset-backed securities collateralized by sub-prime mortgages as of March 31, 2009 are \$0.9 billion of securities supported by guarantees from monoline bond insurers, of which \$0.7 billion are collateralized by second-lien exposures. See Fixed Maturity Securities Guaranteed by Monoline Bond Insurers for additional information regarding guarantees from monoline bond insurers.

<sup>(3)</sup> As of March 31, 2009, includes the \$(739) million impact of the bifurcated embedded derivative described below.

<sup>(4)</sup> As of March 31, 2009, includes collateralized debt obligations with amortized cost of \$470 million and fair value of \$326 million, with less than 1% secured by sub-prime mortgages. Also includes asset-backed securities collateralized by education loans, equipment leases, timeshares, aircraft, and franchises.

<sup>(5)</sup> Excluded from the table above are asset-backed securities held outside the general account in other entities and operations. For additional information regarding asset-backed securities held outside the general account, see — Invested Assets of Other Entities and Operations — below. Also excluded from the table above are asset-backed securities classified as trading and carried at fair value. See — Trading Account Assets Supporting Insurance Liabilities — and — Other Trading Account Assets — for additional information regarding these securities.

The tables above provide ratings as assigned by nationally recognized rating agencies as of March 31, 2009, and reflect credit rating downgrades on asset-backed securities collateralized by sub-prime mortgages processed by the rating agencies in 2009. In making our investment decisions, rather than relying solely on the rating agencies—evaluations, we assign internal ratings to our asset-backed securities based upon our dedicated asset-backed securities unit—s independent evaluation of the underlying collateral and securitization structure, including any guarantees from monoline bond insurers. The following tables set forth the percentage, based on amortized cost, of our asset-backed securities collateralized by sub-prime mortgages attributable to the Financial Services Businesses by lowest rating agency rating, as of the dates indicated.

#### Asset-Backed Securities Collateralized by Sub-prime Mortgages Financial Services Businesses

		Lowest	Rating Ag	ency Rating	
					BB
	AAA	AA	A	BBB	and below
December 31, 2008	22%	22%	13%	22%	21%
March 31, 2009	6%	18%	14%	18%	44%

The changes in the ratings above reflect the impact of both paydowns in the senior tranches and increased downgrade activity consistent with the continued collateral deterioration.

On an amortized cost basis, asset-backed securities collateralized by sub-prime mortgages attributable to the Financial Services Businesses increased from \$5.356 billion as of December 31, 2008 to \$5.476 billion as of March 31, 2009, primarily reflecting the increase in amortized cost resulting from our adoption of FSP FAS 115-2 and FAS 124-2 on January 1, 2009, partially offset by principal paydowns and other-than-temporary impairments recognized. For additional information regarding our adoption of this FSP, see Note 2 to the Unaudited Interim Consolidated Financial Statements. Gross unrealized losses related to our asset-backed securities collateralized by sub-prime mortgages attributable to the Financial Services Businesses were \$2.634 billion as of March 31, 2009 and \$1.781 billion as of December 31, 2008. For additional information regarding other-than-temporary impairments of asset-backed securities collateralized by sub-prime mortgages see Realized Investment Gains and Losses above.

The weighted average estimated subordination percentage of our asset-backed securities collateralized by sub-prime mortgages attributable to the Financial Services Businesses, excluding those supported by guarantees from monoline bond insurers, was 32% as of March 31, 2009. The subordination percentage represents the current weighted average estimated percentage of the capital structure subordinated to our investment holding that is available to absorb losses before the security incurs the first dollar loss of principal. As of March 31, 2009, based on amortized cost, approximately 83% of the asset-backed securities collateralized by sub-prime mortgages attributable to the Financial Services Businesses have estimated credit subordination percentages of 20% or more, and 45% have estimated credit subordination percentages of 30% or more.

In addition to subordination, certain securities, referred to as front pay or second pay securities, benefit from the prioritization of principal cash flows within the senior tranches of the structure. In most instances, these shorter duration senior securities have priority to principal cash flows over other securities in the structure, including longer duration senior securities. Included within the \$5.476 billion of asset-backed securities collateralized by sub-prime mortgages attributable to the Financial Services Businesses as of March 31, 2009 were \$1.536 billion of securities, on an amortized cost basis, that represent front pay or second pay securities, depending on the overall structure of the securities.

The \$765 million of externally managed investments in the European market, included above in asset-backed securities of the Financial Services Businesses as of March 31, 2009, reflects our investment in medium term notes that are collateralized by investment portfolios primarily consisting of European fixed income

securities, including 43% European corporate and bank bonds, 19% bank capital, 13% European asset-backed securities, and 25% other, as well as derivatives and varying degrees of leverage. Our investment in these notes further diversifies our credit risk. As of March 31, 2009 none of the underlying investments are securities collateralized by U.S. sub-prime mortgages, and 86% of the underlying investments are rated investment grade. The notes have a stated coupon and provide a return based on the return of the underlying portfolios and the level of leverage. The notes are accounted for as available for sale fixed maturity securities with bifurcated embedded derivatives (total return swaps). Changes in the value of the fixed maturity securities are reported in Stockholders Equity under the heading Accumulated Other Comprehensive Income. Changes in the market value of the embedded total return swaps are included in current period earnings in Realized investment gains (losses), net. As discussed further in Note 8 to the Unaudited Interim Consolidated Financial Statements, any changes in market value of the embedded total return swaps are excluded from adjusted operating income. The fair value of the embedded derivatives associated with these investments declined in the first quarter of 2009 due to the under performance of the investments, and as of March 31, 2009 was in a \$739 million loss position on a cumulative basis as a result of the recent stress in the credit markets. However, we believe the investment fundamentals remain sound, and the ultimate value that will be realized from these investments is greater than reflected by the current fair value of the embedded derivatives. During the second quarter of 2008, we restructured certain of these investments, which included an additional investment of approximately \$500 million to fund our share of leverage in certain of the existing portfolios. Beginning in the second quarter of 2008, the underlying restructured portfolio of investments and derivatives, totaling approximately \$680 million, is held directly on our balance sheet primarily within Other trading account assets, at fair value. We expect the difference between the market value of the investments at the time of the restructuring and the par amount, previously recognized primarily in Realized investment gains (losses), net due to changes in the market value of the embedded total return swap, will be recognized, primarily in net investment income, and included in adjusted operating income over the remaining life of the investments, due to our investment in higher-yielding restructured assets.

As of March 31, 2009, included within asset-backed securities attributable to the Closed Block Business on an amortized cost basis is approximately \$4.354 billion (\$2.385 billion fair value) of securities collateralized by sub-prime mortgages. See above for a description of asset-backed securities collateralized by sub-prime mortgages. The following tables set forth the amortized cost and fair value of our asset-backed securities attributable to the Closed Block Business as of the dates indicated, by credit quality, and for asset-backed securities collateralized by sub-prime mortgages, by year of issuance (vintage).

- (3) As of March 31, 2009, includes the \$(151) million impact of the embedded derivative described below.
- (4) As of March 31, 2009, includes collateralized debt obligations with amortized cost of \$58 million and fair value of \$48 million, with none secured by sub-prime mortgages. Also includes asset-backed securities collateralized by equipment leases, timeshares, aircraft and franchises.
- (5) Excluded from the table above are asset-backed securities classified as other trading and carried at fair value. For additional information see Other Trading Account Assets.

The tables above provide ratings as assigned by nationally recognized rating agencies as of March 31, 2009, and reflect credit rating downgrades on asset-backed securities collateralized by sub-prime mortgages processed by the rating agencies in 2009. In making our investment decisions, rather than relying solely on the rating agencies—evaluations, we assign internal ratings to our asset-backed securities based upon our dedicated asset-

backed securities unit s independent evaluation of the underlying collateral and securitization structure, including any guarantees from monoline bond insurers. The following tables set forth the percentage, based on amortized cost, of our asset-backed securities collateralized by sub-prime mortgages attributable to the Closed Block Business by lowest rating agency rating, as of the dates indicated.

#### Asset-Backed Securities Collateralized by Sub-prime Mortgages Closed Block Business

		Lowest Ra	iting Age	ncy Rating	<i>i</i>		
					BB and		
	AAA	AA	A	BBB	below		
December 31, 2008	26%	25%	10%	18%	21%		
March 31, 2009	9%	20%	9%	13%	49%		

The changes in the ratings above reflect the impact of both paydowns in the senior tranches and increased downgrade activity consistent with the continued collateral deterioration.

On an amortized cost basis, asset-backed securities collateralized by sub-prime mortgages attributable to the Closed Block Business decreased from \$4.438 billion as of December 31, 2008 to \$4.354 billion as of March 31, 2009, primarily reflecting principal paydowns and other-than-temporary impairments recognized partially offset by the increase in amortized cost resulting from our adoption of FSP FAS 115-2 and FAS 124-2 on January 1, 2009, For additional information regarding our adoption of this FSP, see Note 2 to the Unaudited Interim Consolidated Financial Statements. Gross unrealized losses related to our asset-backed securities collateralized by sub-prime mortgages attributable to the Closed Block Business were \$1.969 billion as of March 31, 2009 and \$1.405 billion as of December 31, 2008. For additional information regarding other-than-temporary impairments of asset-backed securities collateralized by sub-prime mortgages see Realized Investment Gains and Losses above.

The weighted average estimated subordination percentage of asset-backed securities collateralized by sub-prime mortgages attributable to the Closed Block Business, excluding those supported by guarantees from monoline bond insurers, was 34% as of March 31, 2009. The subordination percentage represents the current weighted average estimated percentage of the capital structure subordinated to our investment holding that is available to absorb losses before the security incurs the first dollar loss of principal. As of March 31, 2009, based on amortized cost, approximately 91% of the asset-backed securities collateralized by sub-prime mortgages attributable to the Closed Block Business have estimated credit subordination percentages of 30% or more.

In addition to subordination, certain securities, referred to as front pay or second pay securities, benefit from the prioritization of principal cash flows within the senior tranches of the structure. In most instances, these shorter duration senior securities have priority to principal cash flows over other securities in the structure, including longer duration senior securities. Included within the \$4.354 billion of asset-backed securities collateralized by sub-prime mortgages attributable to the Closed Block Business as of March 31, 2009 were \$1.526 billion of securities, on an amortized cost basis, that represent front pay or second pay securities, depending on the overall structure of the securities.

The \$130 million of externally managed investments in the European market, included in asset-backed securities of the Closed Block Business as of March 31, 2009, reflects our investment in medium term notes that are collateralized by investment portfolios primarily consisting of European fixed income securities, including 43% European corporate and bank bonds, 19% bank capital, 13% European asset-backed securities, and 25% other, as well as derivatives and varying degrees of leverage. Our investment in these notes further diversifies our credit risk. As of March 31, 2009 none of the underlying investments are securities collateralized by U.S. sub-prime mortgages, and 86% of the underlying investments are rated investment grade. The notes have a stated

coupon and provide a return based on the return of the underlying portfolios and the level of leverage. The notes are accounted for as available for sale fixed maturity securities with bifurcated embedded derivatives (total return swaps). Changes in the value of the fixed maturity securities are reported in Stockholders Equity under the heading Accumulated Other Comprehensive Income. Changes in the market value of the embedded total return swaps are included in current period earnings in Realized investment gains (losses), net. The fair value of the embedded derivatives associated with these investments declined in 2009 due to the under performance of the investments, and as of March 31, 2009 was in a \$151 million loss position on a cumulative basis as a result of the recent stress in the credit markets. However, we believe the investment fundamentals remain sound, and the ultimate value that will be realized from these investments is greater than reflected by the current fair value of the embedded derivatives.

Residential Mortgage-Backed Securities

As of March 31, 2009, on an amortized cost basis, \$9.511 billion of the residential mortgage-backed securities in the Financial Services Businesses were publicly traded agency pass-through securities, which are supported by implicit or explicit government guarantees and have credit ratings of AA or above. Of these pass-through securities, \$8.231 billion are supported by the U.S. government, and \$1.280 billion are supported by foreign governments. Collateralized mortgage obligations, including approximately \$46 million secured by ALT-A mortgages, represented the remaining \$183 million of residential mortgage-backed securities (and less than 1% of total fixed maturities in the Financial Services Businesses), and 79% have credit ratings of A or above, while the remaining 21% have credit ratings of B or higher.

As of March 31, 2009, on an amortized cost basis, \$2.393 billion of the residential mortgage-backed securities in the Closed Block Business were publicly traded agency pass-through securities, which are supported by implicit or explicit U.S. government guarantees and have credit ratings of AAA. Collateralized mortgage obligations, including approximately \$139 million secured by ALT-A mortgages, represented the remaining \$516 million of residential mortgage-backed securities (and 1% of total fixed maturities in the Closed Block Business), and 91% have AAA credit ratings, 3% have A credit ratings, 3% have BBB credit ratings and the remaining 3% have B credit ratings. For additional information regarding our exposure to Federal National Mortgage Association, or Fannie Mae, and Federal Home Loan Mortgage Corporation, or Freddie Mac, see Government Sponsored Entities.

Commercial Mortgage-Backed Securities

Weakness in commercial real estate fundamentals, along with an overall decrease in liquidity and availability of capital have led to a very difficult refinancing environment and an increase in the overall delinquency rate on commercial mortgages in the commercial mortgage-backed securities market. Difficult conditions in the global financial markets and the overall economic downturn continue to put additional pressure on these fundamentals through rising vacancies, falling rents and falling property values. In addition, we have recognized several market factors related to commercial mortgage-backed securities issued in 2006 and 2007, including less stringent underwriting, higher levels of leverage and collateral valuations that are generally no longer realizable. To ensure our investment objectives and asset strategies are maintained, we consider these market factors in making our investment decisions on securities in these vintages. The following tables set forth the amortized cost and fair value of our commercial mortgage-backed securities attributable to the Financial Services Businesses as of the dates indicated by credit quality and by year of issuance (vintage).

<sup>(1)</sup> Excluded from the table above are available for sale commercial mortgage-backed securities held outside the general account in other entities and operations. For additional information regarding commercial mortgage-backed securities held outside the general account, see — Invested Assets of Other Entities and Operations below. Also excluded from the table above are commercial mortgage-backed securities classified as trading and carried at fair value. See — Trading Account Assets Supporting Insurance Liabilities — for additional information regarding these securities.

The weighted average estimated subordination percentage of our commercial mortgage-backed securities attributable to the Financial Services Businesses was 33% as of March 31, 2009. The subordination percentage represents the current weighted average estimated percentage of the capital structure subordinated to our investment holding that is available to absorb losses before the security incurs the first dollar loss of principal. The weighted average estimated subordination percentage includes an adjustment for that portion of the capital structure, which has been effectively defeased by U.S. Treasury securities. As of March 31, 2009, based on amortized cost, approximately 93% of the commercial mortgage-backed securities attributable to the Financial Services Businesses have estimated credit subordination percentages of 20% or more, and 78% have estimated credit subordination percentages of 30% or more. The following tables set forth the weighted average estimated subordination percentage, adjusted for that portion of the capital structure which has been effectively defeased by U.S. Treasury securities, of our commercial mortgage-backed securities collateralized by U.S. and Non-U.S.

<sup>(2)</sup> Included in the table above as of March 31, 2009 are commercial mortgage-backed securities collateralized by Non-U.S. properties with amortized cost of \$10 million in AAA, \$4 million in AA, \$32 million in AB million in BB and \$129 million in BB and below.

properties, attributable to the Financial Services Businesses based on amortized cost as of March 31, 2009, by rating and vintage.

2004 & Prior												

The super senior structure was introduced to the U.S. commercial mortgage-backed securities market in late 2004 and was modified in early 2005 to increase subordination from 20% to 30%. With the changes to the commercial mortgage-backed securities structure in 2005, there became three distinct AAA classes for commercial mortgage-backed securities with fixed rate terms, (1) super senior AAA with 30% subordination, (2) mezzanine AAA with 20% subordination and (3) junior AAA with approximately 14% subordination. The super senior class has priority over the mezzanine and junior classes to all principal cashflows (repayments, prepayments and recoveries on defaulted loans). As a result, all super senior bonds must be completely repaid before the mezzanine or junior bonds receive any principal cashflows. In addition, the super senior bonds will not experience any loss of principal until both the entire mezzanine and junior bonds are written-down to zero. We believe the importance of this additional credit enhancement afforded to the super senior class over the mezzanine and junior classes is limited in a benign commercial real estate cycle with low defaults but becomes more significant in a deep commercial real estate downturn under which expected losses increase substantially.

In addition to enhanced subordination, certain securities within the super senior class benefit from the prioritization of principal cash flows. The super senior class is generally structured such that shorter duration time tranches have priority over longer duration time tranches as to all principal cashflows (repayments, prepayments, and recoveries on defaulted loans) until the deal reaches 30% cumulative net loss, at which point all super senior securities are paid pro rata. As a result, short of reaching 30% cumulative net losses, the shorter duration super senior tranches must be completely repaid before the longest duration super senior tranche receives any principal cashflows. We have generally focused our purchases of recent vintage commercial mortgage-backed securities on shorter duration super senior tranches that we believe have sufficient priority to

ensure that in most scenarios our positions will be fully repaid prior to the structure reaching the 30% cumulative net loss threshold. The following tables set forth the amortized cost of our AAA commercial mortgage-backed securities attributable to the Financial Services Businesses as of the dates indicated, by type and by year of issuance (vintage).

Fixed Maturity Securities Credit Quality

The Securities Valuation Office, or SVO, of the NAIC, evaluates the investments of insurers for regulatory reporting purposes and assigns fixed maturity securities to one of six categories called NAIC Designations. NAIC designations of 1 or 2 include fixed maturities considered investment grade, which include securities rated Baa3 or higher by Moody s or BBB- or higher by Standard & Poor s. NAIC Designations of 3 through 6 are referred to as below investment grade, which include securities rated Ba1 or lower by Moody s and BB+ or lower by Standard & Poor s. As a result of time lags between the funding of investments, the finalization of legal documents and the completion of the SVO filing process, the fixed maturity portfolio generally includes securities that have not yet been rated by the SVO as of each balance sheet date. Pending receipt of SVO ratings, the categorization of these securities by NAIC designation is based on the expected ratings indicated by internal analysis.

Investments of our international insurance companies are not subject to NAIC guidelines. Investments of our Japanese insurance operations are regulated locally by the Financial Services Agency, an agency of the Japanese government. The Financial Services Agency has its own investment quality criteria and risk control standards. Our Japanese insurance companies comply with the Financial Services Agency s credit quality review and risk monitoring guidelines. The credit quality ratings of the non-U.S. dollar denominated investments of our Japanese insurance companies are based on ratings assigned by Moody s, Standard & Poor s, or rating equivalents based on ratings assigned by Japanese credit ratings agencies.

The amortized cost of our public and private below investment grade fixed maturities attributable to the Financial Services Businesses totaled \$10.3 billion, or 8%, of the total fixed maturities as of March 31, 2009 and \$9.0 billion, or 7%, of the total fixed maturities as of December 31, 2008. Below investment grade fixed maturities represented 25% and 19% of the gross unrealized losses attributable to the Financial Services Businesses as of March 31, 2009 and December 31, 2008, respectively. The increase in below investment grade fixed maturity securities is primarily due to credit migration on securities held resulting from slowing economic conditions, rather than new originations or purchases.

The amortized cost of our public and private below investment grade fixed maturities attributable to the Closed Block Business totaled \$7.5 billion, or 17%, of the total fixed maturities as of March 31, 2009 and \$6.6 billion, or 15%, of the total fixed maturities as of December 31, 2008. Below investment grade fixed maturities represented 35% of the gross unrealized losses attributable to the Closed Block Business as of March 31, 2009, compared to 29% of gross unrealized losses as of December 31, 2008.

Public Fixed Maturities Credit Quality

As of March 31, 2009, on an amortized cost basis, \$1.542 billion, or 1%, of fixed maturity investments attributable to the Financial Services Businesses were supported by guarantees from monoline bond insurers. As of March 31, 2009, 70% of these investments had investment grade credit ratings, reflecting the credit quality of the monoline bond insurers. Management estimates, taking into account the structure and credit quality of the underlying investments and giving no effect to the support of these securities by guarantees from monoline bond insurers, that 43% of the \$1.542 billion total attributable to the Financial Services Businesses as of March 31, 2009 (based upon amortized cost) would have investment grade credit ratings, including 15% of the asset-backed securities collateralized by sub-prime mortgages, 53% of the other asset-backed securities, and all of the municipal bonds. As of March 31, 2009, the bond insurance is provided by five insurance companies, with no company representing more than 37% of the overall amortized cost of the securities supported by bond insurance attributable to the Financial Services Businesses. For additional information regarding credit derivatives we have purchased in order to hedge our exposure relating to certain of these guarantees from monoline bond insurers, see Credit Derivative Exposure to Public Fixed Maturities.

As of March 31, 2009, on an amortized cost basis, \$636 million, or 1%, of fixed maturity investments attributable to the Closed Block Business were supported by guarantees from monoline bond insurers. As of March 31, 2009, 64% of these investments had investment grade credit ratings, reflecting the credit quality of the monoline bond insurers. Management estimates, taking into account the structure and credit quality of the underlying investments and giving no effect to the support of these securities by guarantees from monoline bond insurers, that 49% of the \$636 million total attributable to the Closed Block Business as of March 31, 2009 (based upon amortized cost) would have investment grade credit ratings, including 29% of the asset-backed securities collateralized by sub-prime mortgages, 88% of the other asset-backed securities, and all of the municipal bonds. As of March 31, 2009, the bond insurance is provided by five insurance companies, with no company representing more than 37% of the overall amortized cost of the securities supported by bond insurance attributable to the Closed Block Business.

Credit Derivative Exposure to Public Fixed Maturities

In addition to the credit exposure from public fixed maturities noted above, we sell credit derivatives to enhance the return on our investment portfolio by creating credit exposure similar to an investment in public fixed maturity cash instruments.

In a credit derivative we sell credit protection on an identified name, or a basket of names in a first to default structure, and in return receive a quarterly premium. With single name credit default derivatives, this premium or credit spread generally corresponds to the difference between the yield on the referenced name s public fixed maturity cash instruments and swap rates, at the time the agreement is executed. With first-to-default baskets, because of the additional credit risk inherent in a basket of named credits, the premium generally corresponds to

a high proportion of the sum of the credit spreads of the names in the basket. If there is an event of default by the referenced name or one of the referenced names in a basket, as defined by the agreement, then we are obligated to pay the counterparty the referenced amount of the contract and receive in return the referenced defaulted security or similar security. Subsequent defaults on the remaining names within such instruments require no further payment to counterparties.

The majority of referenced names in the credit derivatives where we have sold credit protection, as well as all the counterparties to these agreements, are investment grade credit quality and our credit derivatives generally have maturities of five years or less. As of March 31, 2009 and December 31, 2008, we had \$1.205 billion and \$1.222 billion, respectively, in outstanding notional amounts of credit derivative contracts where we have sold credit protection. The Financial Services Businesses had \$1.141 billion and \$1.161 billion of outstanding notional amounts as of March 31, 2009 and December 31, 2008, respectively. The Closed Block Business had \$64 million and \$61 million of outstanding notional amounts, as of March 31, 2009 and December 31, 2008, respectively. Credit derivative contracts are recorded at fair value with changes in fair value, including the premium received, recorded in Realized investment gains (losses), net. The premium received for the credit derivatives we sell attributable to the Financial Services Businesses was \$2 million for the three months ended March 31, 2009 and \$3 million for the three months ended March 31, 2008, and is included in adjusted operating income as an adjustment to Realized investment gains (losses), net.

The following table sets forth our exposure where we have sold credit protection through credit derivatives in the Financial Services Businesses by NAIC rating of the underlying credits as of the dates indicated.

In addition to selling credit protection, we have purchased credit protection using credit derivatives in order to hedge specific credit exposures in our investment portfolio, including exposures relating to certain guarantees from monoline bond insurers. For additional information relating to our exposure to guarantees from monoline bond insurers see, Fixed Maturity Securities Guaranteed by Monoline Bond Insurers. As of March 31, 2009 and December 31, 2008, the Financial Services Businesses had \$1.247 billion and \$1.069 billion of outstanding notional amounts, reported at fair value as a \$237 million asset and a \$189 million asset, respectively. As of March 31, 2009 and December 31, 2008, the Closed Block Business had \$330 million and \$309 million of outstanding notional amounts, reported at fair value as an asset of \$98 million and \$64 million, respectively. The premium paid for the credit derivatives we purchase attributable to the Financial Services Businesses was \$7 million for the three months ended March 31, 2009 and \$3 million for the three months ended March 31, 2008, and is included in adjusted operating income as an adjustment to Realized investment gains (losses), net. See Note 13 to the Unaudited Interim Consolidated Financial Statements for additional information regarding credit derivatives and an overall description of our derivative activities.

Unrealized Losses from Fixed Maturity Securities

The following table sets forth the amortized cost and gross unrealized losses of fixed maturity securities attributable to the Financial Services Businesses where the estimated fair value had declined and remained below amortized cost by 20% or more for the following timeframes:

Unrealized Losses from Fixed Maturity Securities, Greater than 20% Financial Services Businesses

	(in m	illions)	

<sup>(1)</sup> First-to-default credit swap baskets, which may include credits of varying qualities, are grouped above based on the lowest credit in the basket. However, such basket swaps may entail greater credit risk than the rating level of the lowest credit.

Less than three months	\$ 3,154	\$ 827	\$ 9,612	\$ 2,605
Three months or greater but less than six months	5,611	1,684	13,481	4,623
Six months or greater but less than nine months	9,747	3,759	1,082	488
Nine months or greater but less than twelve months	1,092	536	272	159
Greater than twelve months	1,629	974		
Total	\$ 21,233	\$ 7,780	\$ 24,447	\$ 7,875

(1) The aging of amortized cost and gross unrealized losses is determined based upon a count of the number of months the estimated fair value remained below amortized cost by 20% or more, using month-end valuations. The month count was reset back to historical unrealized loss month counts for securities impacted by the adoption of FSP FAS 115-2 and FAS 124-2.

The gross unrealized losses were primarily concentrated in asset-backed securities as of March 31, 2009 and December 31, 2008. Gross unrealized losses attributable to the Financial Services Businesses where the estimated fair value had declined and remained below amortized cost by 20% or more of \$7.780 billion as of March 31, 2009 includes \$2.529 billion relating to asset-backed securities collateralized by sub-prime mortgages. We have not recognized the gross unrealized losses shown in the tables above as other-than-temporary impairments in earnings based on our detailed analysis of the underlying credit and cashflows on each of these securities. The gross unrealized losses are primarily attributable to credit spread widening in the structured credit marketplace and liquidity discounts, and we believe the recoverable value of these investments based on the expected future cash flows is greater than or equal to our remaining amortized cost. At March 31, 2009, we do not intend to sell the security and it is not more likely than not that we will be required to sell the security before the anticipated recovery of its remaining amortized cost basis. See Other-Than-Temporary Impairments of Fixed Maturity Securities for a discussion of the factors we consider in making these determinations.

The following table sets forth the amortized cost and gross unrealized losses of fixed maturity securities attributable to the Closed Block Business where the estimated fair value had declined and remained below amortized cost by 20% or more for the following timeframes:

#### Unrealized Losses from Fixed Maturity Securities, Greater than 20% Closed Block Business

	March	31, 2009 Gross	Decembe	er 31, 2008 Gross
	Amortized Cost(1)	Unrealized Losses(1)	Amortized Cost(1)	Unrealized Losses(1)
		(in m	illions)

Three months or greater but less than six months	2,237	757	6,159	2,338
Six months or greater but less than nine months	4,923	2,050	662	325
Nine months or greater but less than twelve months	768	414	25	21
Greater than twelve months	746	471		
Total	\$ 10,459	\$ 4,180	\$ 10,223	\$ 3,612

(1) The aging of amortized cost and gross unrealized losses is determined based upon a count of the number of months the estimated fair value remained below amortized cost by 20% or more, using month-end valuations. The month count was reset back to historical unrealized loss month counts for securities impacted by the adoption of FSP FAS 115-2 and FAS 124-2.

The gross unrealized losses were primarily concentrated in asset-backed securities as of March 31, 2009 and December 31, 2008. Gross unrealized losses attributable to the Closed Block Business where the estimated fair value had declined and remained below amortized cost by 20% or more of \$4.180 billion as of March 31, 2009 includes \$1.868 billion relating to asset-backed securities collateralized by sub-prime mortgages. We have not recognized the gross unrealized losses shown in the tables above as other-than-temporary impairments in earnings based on our detailed analysis of the underlying credit and cashflows on each of these securities. The gross unrealized losses are primarily attributable to general credit spread widening in the structured credit marketplace and liquidity discounts, and we believe the recoverable value of these investments based on the expected future cash flows is greater than or equal to our remaining amortized cost. At March 31, 2009, we do not intend to sell the security and it is not more likely than not that we will be required to sell the security before the anticipated recovery of its remaining amortized cost basis. See Other-Than-Temporary Impairments of Fixed Maturity Securities for a discussion of the factors we consider in making these determinations.

Other-Than-Temporary Impairments of Fixed Maturity Securities

We maintain separate monitoring processes for public and private fixed maturities and create watch lists to highlight securities that require special scrutiny and management. Our public fixed maturity asset managers formally review all public fixed maturity holdings on a quarterly basis and more frequently when necessary to identify potential credit deterioration whether due to ratings downgrades, unexpected price variances, and/or company or industry specific concerns.

For private placements our credit and portfolio management processes help ensure prudent controls over valuation and management. We have separate pricing and authorization processes to establish checks and balances for new investments. We apply consistent standards of credit analysis and due diligence for all transactions, whether they originate through our own in-house origination staff or through agents. Our regional offices closely monitor the portfolios in their regions. We set all valuation standards centrally, and we assess the fair value of all investments quarterly. Our private fixed maturity asset managers formally review all private fixed maturity holdings on a quarterly basis and more frequently when necessary to identify potential credit deterioration whether due to ratings downgrades, unexpected price variances, and/or company or industry specific concerns.

Fixed maturity securities classified as held to maturity are those securities where we have the intent and ability to hold the securities until maturity. These securities are reflected at amortized cost in our consolidated statements of financial position. Other fixed maturity securities are considered available for sale, and, as a result, we record unrealized gains and losses to the extent that amortized cost is different from estimated fair value. All held to maturity securities and all available for sale securities with unrealized losses are subject to our review to identify other-than-temporary impairments in value. In evaluating whether a decline in value is other-than-temporary, we consistently consider several factors including, but not limited to, the following:

the extent and the duration of the decline, including, but not limited to, the following general guidelines;

declines in value greater than 20%, maintained for six months or greater;

declines in value greater than 15%, maintained for more than one year on below investment grade bonds; and

declines in value less than six months where there has been a precipitous (generally 50% or greater) decline in value;

the reasons for the decline in value (credit event, currency or interest rate related, including general credit spread widening); and

the financial condition of and near-term prospects of the issuer.

Given recent market conditions and liquidity concerns, and the resulting historically wide bid-ask spreads and high levels of price volatility, the extent and duration of a decline in value have become less indicative of when the market may believe there has been credit deterioration with respect to an issuer. Considering these current conditions, beginning in the third quarter of 2008 our determinations of whether a decline in value is other-than-temporary have placed greater emphasis on our analysis of the underlying credit versus the extent and duration of a decline in value. Our credit analysis of an investment includes determining whether the issuer is current on its contractual payments, evaluating whether it is probable that we will be able to collect all amounts due according to the contractual terms of the security, and analyzing our overall ability to recover the amortized cost of the investment. We continue to utilize valuation declines as a potential indicator of credit deterioration, and apply additional levels of scrutiny in our analysis as the severity and duration of the decline increases.

In addition, we adopted FSP FAS 115-2 and FAS 124-2, Recognition and Presentation of Other-Than-Temporary Impairments on January 1, 2009. Effective with the adoption of this guidance we recognize an other-than-temporary impairment in earnings for a debt security in an unrealized loss position when either (a) we have the intent to sell the debt security or (b) more likely than not we will be required to sell the debt security before

its anticipated recovery. For all debt securities in unrealized loss positions that do not meet either of these two criteria, we analyze our ability to recover the amortized cost by comparing the net present value of projected future cash flows with the amortized cost of the security. If the net present value is less than the amortized cost of the investment, an other-than-temporary impairment is recorded. The net present value is calculated by discounting our best estimate of projected future cash flows at the effective interest rate implicit in the debt security prior to impairment. Our estimates of projected future cash flows are driven by assumptions regarding probability of default and estimates regarding timing and amount of recoveries associated with a default. We develop these estimates using information based on historical internal experience, our internal credit analysis of an investment, as mentioned above, and market observable data, such as industry analyst reports and forecast, sector credit ratings and other data relevant to the collectability of the security. For mortgage-backed and asset-backed securities, cash flow estimates also include prepayment assumptions and other assumptions regarding the underlying collateral including default rates, recoveries and changes in value. The determination of the assumptions used in these projections requires the use of significant management judgment.

The amount of the other-than-temporary impairment recognized in Realized investment gains (losses), net depends on whether we intend to sell the security or more likely than not will be required to sell the security before recovery of its amortized cost basis. If the debt security meets either of these two criteria, the other-than-temporary impairment recognized in earnings is equal to the entire difference between the security s amortized cost basis and its fair value at the impairment measurement date. For other-than-temporary impairments of debt securities that do not meet these two criteria, the net amount recognized in earnings is equal to the difference between the amortized cost of the debt security and its net present value as calculated above. Any difference between the fair value and the net present value of the debt security at the impairment measurement date is recorded in Other comprehensive income (loss).

Prior to the adoption of FSP FAS 115-2 and FAS 124-2 on January 1, 2009, we were required to record an other-than-temporary impairment unless we could assert that we had both the intent and ability to hold the security for a period of time sufficient to allow for a recovery in the debt security s fair value to its amortized cost basis. When we determined that there was an other-than-temporary impairment based on the factors described above, the amount recognized in Realized investment gains (losses), net was equal to the total difference between amortized cost and fair value at the impairment measurement date.

The new cost basis of an impaired security is not adjusted for subsequent increases in estimated fair value. In periods subsequent to the recognition of an other-than-temporary impairment, the impaired security is accounted for as if it had been purchased on the measurement date of the impairment. For debt securities, the discount (or reduced premium) based on the new cost basis may be accreted into net investment income in future periods based on prospective changes in cash flow estimates, to reflect adjustments to the effective yield. For further information regarding the fair value methodology used in determining our other-than-temporary impairments, see Valuation of Assets and Liabilities Valuation of Fixed Maturities, above.

Other-than-temporary impairments of general account fixed maturity securities attributable to the Financial Services Businesses that were recognized in earnings were \$409 million and \$376 million for the three months ended March 31, 2009 and 2008, respectively. Included in the other-than-temporary impairments of general account fixed maturities attributable to the Financial Services Businesses for the three months ended March 31, 2009 and 2008, were \$240 million and \$290 million, respectively, of other-than-temporary impairments on asset-backed securities collateralized by sub-prime mortgages. Other-than-temporary impairments of fixed maturity securities attributable to the Closed Block Business that were recognized in earnings were \$181 million and \$151 million for the three months ended March 31, 2009 and 2008, respectively. Included in the other-than-temporary impairments of fixed maturities attributable to the Closed Block Business for the three months ended March 31, 2009 and 2008, were \$101 million and \$113 million, respectively, of other-than-temporary impairments on asset-backed securities collateralized by sub-prime mortgages. For a further discussion of other-than-temporary impairments, see Realized Investment Gains and Losses above.

#### Trading account assets supporting insurance liabilities

Certain products included in the retirement business we acquired from CIGNA, as well as certain products included in the International Insurance segment, are experience-rated, meaning that we expect the investment results associated with these products will ultimately accrue to contractholders. The investments supporting these experience-rated products, excluding commercial mortgage and other loans, are classified as trading. These trading investments are reflected on the balance sheet as Trading account assets supporting insurance liabilities, at fair value. Realized and unrealized gains and losses for these investments are reported in Asset management fees and other income. Investment income for these investments is reported in Net investment income. The following table sets forth the composition of this portfolio as of the dates indicated.

	Mar Amortiz Cost		Fair Value	December Amortized Cost nillions)	er 31, 2008 Fair Value

As a percentage of amortized cost, 74% of the portfolio was publicly traded as of March 31, 2009, compared to 75% as of December 31, 2008. As of both March 31, 2009 and December 31, 2008, 88% of the fixed maturity portfolio was classified as investment grade. As of March 31, 2009, \$1.216 billion of the residential mortgage-backed securities were publicly traded agency pass-through securities, which are supported by implicit or explicit government guarantees all of which have credit ratings of AAA. Collateralized mortgage obligations, including approximately \$128 million secured by ALT-A mortgages, represented the remaining \$236 million of residential mortgage-backed securities, of which 95% have credit ratings of A or better and 5% are below investment grade. For a discussion of changes in the fair value of our trading account assets supporting insurance liabilities see Investment Gains and Losses on Trading Account Assets Supporting Insurance Liabilities and Changes in Experience-Rated Contractholder Liabilities Due to Asset Value Changes, above.

#### **Other Trading Account Assets**

Other trading account assets, at fair value consist primarily of investments and certain derivatives we use either in our capacity as a broker-dealer or for asset and liability management activities. Also, for certain financial instruments that contain an embedded derivative that otherwise would need to be bifurcated and reported at fair value, we may elect to classify the entire instrument as a trading account asset and report it within. Other trading account assets. These instruments are carried at fair value, with realized and unrealized gains and losses reported in Asset management fees and other income. Interest and dividend income from these investments is reported in Net investment income. The following table sets forth the composition of our other trading account assets as of the dates indicated.
