TEAM, INC.

(Exact name of registrant as specified in its charter)

TEXAS

74-1765729

Edgar Filing: TEAM INC - Form 10-K

(State of incorporation)
200 Hermann Drive, Alvin, Texas
(Address of principal executive offices)

(I.R.S. Employer Identification No.)
77511
(Zip Code)

Registrant's telephone number, including area code: (281) 331-6154

Securities registered pursuant to Section 12(b) of the Act:

Title of each Class	Name of Each Exchange on which Registered
Common Stock, \$.30 par value	The NASDAQ Global Select Market

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of accelerated filer and large accelerated filer in Rule 12b-2 of the Exchange Act.

(Check one): Large accelerated filer Accelerated filer Non-accelerated filer

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

State the aggregate market value of the voting and non-voting common equity held by non-affiliates of the registrant as of the completion of the most recent second quarter:

Voting common stock (November 30, 2008) \$ 443,655,396

For purposes for the foregoing calculation only, all directors, executive officers, the Team, Inc. Salary Deferral Plan and Trust and known 5% or greater beneficial owners have been deemed affiliates. The 5% beneficial owners have been determined based on summarized December 31, 2008 Section 13 filings.

Indicate the number of shares outstanding of each of the registrant's classes of common stock, as of the latest practicable date:

Certain items required in Part III of this Form 10-K can be found in our 2009 Proxy Statement and are incorporated herein by reference. A copy of the 2009 Proxy Statement will be provided, without charge, to any person who receives a copy of this Form 10-K and submits a written request to Team, Inc., Attn: Corporate Secretary, 200 Hermann Drive, Alvin, Texas, 77511.

PART I

ITEM 1. BUSINESS

General Information

Unless otherwise indicated, the terms Team, Inc., Team, the Company, we, our and us are used in this report to refer to Team, Inc., to one or more of our consolidated subsidiaries or to all of them taken as a whole. We are incorporated in the State of Texas and our company website can be found at www.teamindustrialservices.com. Our corporate headquarters is located at 200 Hermann Drive, Alvin, Texas, 77511 and our telephone number is (281) 331-6154. Our stock is traded on the NASDAQ Global Select Market (NASDAQ) under the symbol TISI and our fiscal year ends on May 31 of each calendar year.

We are a leading provider of specialty maintenance and construction services required in maintaining high temperature and high pressure piping systems and vessels that are utilized extensively in heavy industries. We offer an array of complementary services including:

leak repair,

hot tapping,

fugitive emissions control,

field machining,

technical bolting,

field valve repair,

non-destructive testing, and

field heat treating.

We offer these services in over 100 locations throughout the United States and international markets including Aruba, Belgium, Canada, Singapore, The Netherlands, Trinidad and Venezuela.

Narrative Description of Business

Our industrial services are available 24 hours a day, 7 days a week, 365 days a year. We market our services to companies in a diverse array of heavy industries which include the petrochemical, refining, power, pipeline, pulp and paper, steel industries, municipalities, shipbuilding,

Edgar Filing: TEAM INC - Form 10-K

original equipment manufacturers (OEMs), distributors and end users, and some of the world's largest engineering and construction firms. Our services are also provided across a broad geographic reach. For our fiscal year ended May 31, 2009, our revenues by geographic region originated in the United States (70%), Canada (23%), Europe (5%) and other foreign locations (2%). While we continue to develop different types of services and products which meet the needs of our customers, the following discussion describes the primary services we currently offer:

Leak Repair Services. Our leak repair services consist of on-stream repairs of leaks in pipes, valves, flanges and other parts of piping systems and related equipment. Our on-stream repairs utilize both standard and

Table of Contents

Index to Financial Statements

custom-designed clamps and enclosures for piping systems. We use specially developed techniques, sealants and equipment for repairs. Many of our repairs are furnished as interim measures which allow plant systems to continue operating until more permanent repairs can be made during turnarounds. Our leak repair services involve inspection of the leak by our field crew who record pertinent information about the faulty part of the system and transmit the information to our engineering department for determination of appropriate repair techniques. Repair materials such as clamps and enclosures are custom designed and manufactured at our ISO-9001 certified manufacturing centers and delivered to the job site. We maintain an inventory of raw materials and semi-finished clamps and enclosures to reduce the time required to manufacture the finished product.

Hot Tapping Services. Our hot tapping services consist of providing a full range of hot tapping, Line-stop® and Freeze-stop® services with capabilities for up to 48" diameter pipelines. Hot tapping services involve utilizing special equipment to cut a hole in a pressurized pipeline so that a new branch pipe can be connected onto the existing pipeline without interrupting operations. Line-stop® services permit the line to be depressurized downstream so that maintenance work can be performed on the piping system. We typically perform these services by mechanically cutting into the pipeline similar to a hot tap and installing a special plugging device to stop the process flow. The Hi-stop® is a proprietary and patented procedure that allows stopping of the process flow in extreme pressures and temperatures. In some cases, we may use a line freezing procedure by injecting liquid nitrogen into installed special external chambers around the pipe to stop the process flow.

Emissions Control Services. We provide fugitive volatile organic chemical (VOC) emission leak detection services that include identification, monitoring, data management and reporting primarily for the chemical, refining and natural gas processing industries. These services are designed to monitor and record VOC emissions from specific process equipment and piping components as required by environmental regulations and customer requests, typically assisting the customer in enhancing an ongoing maintenance program and/or complying with present and/or future environmental regulations. We provide specialty trained technicians in the use of portable organic chemical analyzers and data loggers to measure potential leaks at designated plant components maintained in customer or our proprietary databases. The measured data is used to prepare standard reports in compliance with U.S. Environmental Protection Agency (EPA) and local regulatory requirements. We also provide enhanced custom-designed reports to customer specifications.

Field Machining Services; Technical Bolting. We use portable machining equipment to repair or modify machinery, equipment, vessels and piping systems not easily removed from a permanent location. As opposed to conventional machining processes where the work piece rotates and the cutting tool is fixed, in field machining, the work piece remains fixed in position and the cutting tool rotates. Other common descriptions for this service are on-site or in-place machining. Field machining services include flange facing, pipe cutting, line boring, journal turning, drilling and milling. We provide customers technical bolting as a complimentary service to field machining during turnaround or maintenance activities. These services involve the use of hydraulic or pneumatic equipment with industry standard bolt tightening techniques to achieve reliable and leak-free connections following plant maintenance turnarounds or expansion projects. Additional services include bolt disassembly and hot bolting, which is a process to remove and replace a bolt as the process is operating.

Field Valve Repair Services. We perform on-site repairs to manual and control valves, pressure and safety relief valves as well as specialty valve actuator diagnostics and repair. We are certified and authorized to perform testing and repairs to pressure and safety relief valves by The National Board of Boiler and Pressure Vessel Inspectors. This certification requires specific procedures, testing and documentation to maintain the safe operation of these essential plant valves. We provide special transportable trailers to the plant site which contain specialty machines to manufacture valve components without removing the valve from the piping system. In addition, we provide preventive maintenance programs for VOC specific valves and valve data management programs.

Table of Contents

Index to Financial Statements

Non-destructive Testing Services. We offer inspection and evaluation of piping, piping components and equipment to determine the present condition and predict remaining operability. Our inspection services use all the common methods of non-destructive testing, including radiography, ultrasound, magnetic particle and dye penetrate, and higher end robotic and newly developed advanced technology systems. Many of the visual inspection programs we provide require specialized training to industry and regulatory standards. Inspection services are marketed to our traditional industrial customer base, and customers outside our traditional customer base such as the aerospace and automotive industries. Inspection services frequently require industry recognized training and certification processes. We maintain training and certification programs which are designed to meet or exceed industry standards.

Field Heat Treating Services. Our field heat treating services include electric resistance and gas-fired combustion, primarily utilized by industrial users to enhance the metallurgical properties of their process piping and equipment. Electric resistance heating is the transfer of high energy power sources through attached heaters to the plant component to preheat weld joints, to remove contaminants and moisture prior to welding and post-weld heat treatments to relieve metal thermal stresses induced by the welding process. Specialty heat treating processes are performed using gas fired combustion on large pressure vessels for stress relieving, to bake specialty paint coatings and controlled drying of abrasion and temperature resistant refractories. Special high frequency heating commonly called induction heating is used to expand metal parts for assembly or disassembly, expansion of large bolting for industrial turbines and stress relieving projects which is cost prohibitive for electric resistance or gas-fired combustion.

Description of Segment and Divisions

We operate in only one segment industrial services. Within the industrial services segment, we are organized as two divisions. Our TMS division provides the services of leak repair, hot tapping, fugitive emissions control, field machining, technical bolting and field valve repair. Our TCM division provides the services of non-destructive testing and field heat treating. Each division has goodwill relating to past acquisitions and we assess goodwill for impairment at the lower TMS and TCM divisional level. Both divisions derive their revenues from providing specialized labor intensive industrial services and the market for their services is principally dictated by the population of process piping systems in industrial plants and facilities. Services provided by both the TMS and TCM divisions are provided through a network of field branch locations in proximity to industrial plants. The structure of those branch locations is similar, with locations overseen by a branch/regional manager, one or more sales representatives and a cadre of technicians to service the business requirements of our customers. While TMS and TCM division field locations are generally separate, both divisions are supported by common and often centralized technical and commercial support staffs, quality assurance, training, finance, legal, human resources and health and safety departments.

Acquisitions and Dispositions

On January 9, 2008, we acquired all the stock of Leak Repairs Specam (LRS), a specialty industrial services company. LRS currently provides a range of services similar to those offered by our TMS division, including on-stream leak sealing, hot tapping, fugitive emissions monitoring, field machining and bolting services. LRS is headquartered near Vlissingen, The Netherlands and has four service locations in The Netherlands and Belgium. The purchase price of the acquisition was \$18.6 million plus working capital adjustments, professional fees, and net of cash acquired. Financing for the acquisition was obtained through our bank syndicate.

On June 1, 2007, we acquired all of the stock of Aitec, Inc. (Aitec) for \$33.8 million, plus working capital adjustments, professional fees, and net of cash acquired. The final purchase price of \$34.7 million includes working capital adjustments of \$0.1 million and professional fees of \$0.8 million. Aitec, is a non-destructive testing and inspection services company headquartered near Toronto, Ontario with 13 service locations across Canada. We believe the Aitec acquisition made Team the second-largest inspection service provider in Canada. Financing for the acquisition was obtained through our bank syndicate.

Table of Contents

Index to Financial Statements

Marketing and Customers

Our industrial services are marketed principally by personnel based at our service locations. We believe that these service locations are situated to facilitate timely responses to customer needs with on-call expertise, which is an important feature of selling and providing our services. Our array of integrated services also causes us to benefit from the procurement trends of many of our customers who are seeking reductions in the number of contractors and vendors in their facilities. No customer accounted for 10% or more of consolidated revenues during any of the last three fiscal years.

Generally, customers are billed on a time and materials basis, although some work may be performed pursuant to a fixed-price bid. Services are usually performed pursuant to purchase orders issued under written customer agreements. While most purchase orders provide for the performance of a single job, some provide for services to be performed on a run and maintain basis. Substantially all our agreements and contracts may be terminated by either party on short notice. The agreements generally specify the range of services to be performed and the hourly rates for labor. While many contracts cover specific plants or locations, we also enter into multiple-site regional or national contracts, which cover multiple plants or locations.

Seasonality

We experience some seasonal fluctuations. Historically, the refining industry has scheduled plant shutdowns (commonly referred to as turnarounds) for the fall and spring seasons. Large turnarounds can significantly impact our revenues.

Employees

At May 31, 2009, we had approximately 3,400 employees in our worldwide operations. Our employees in the U.S. are predominantly not unionized. Our Canadian employees and certain employees outside of North America, primarily Europe, are unionized. There have been no employee work stoppages to date and we believe our relations with our employees and their representative organizations are good. One of our subsidiaries is a party to a collective bargaining agreement with certain employees that requires the subsidiary to pay specified wages, provide certain benefits to their union employees and contribute certain amounts to multi-employer pension plans and employee benefit trusts. If the participating subsidiary withdrew from, or otherwise terminated participation in, the multi-employer pension plan were to otherwise become under-funded, the subsidiary could be assessed liabilities for additional contributions related to the under-funding of this plan. The collective bargaining agreement has typically been renegotiated and renewed on similar terms.

Regulation

A significant portion of our business activities are subject to foreign, federal, state and local laws and regulations. These regulations are administered by various foreign, federal, state and local health and safety and environmental agencies and authorities, including the Occupational Safety and Health Administration of the U.S. Department of Labor and the EPA. From time to time, we are also subject to a wide range of reporting requirements, certifications and compliance as prescribed by various federal and state governmental agencies that include, but are not limited to, the Nuclear Regulatory Commission, Chemical Safety Board, Department of Transportation and Federal Aviation Administration. Expenditures relating to such regulations are made in the normal course of our business and are neither material nor place us at any competitive disadvantage. We do not currently expect compliance with such laws will require us to make material expenditures.

From time to time, in the operation of our environmental consulting and engineering services, the assets of which were sold in 1996, we handled small quantities of certain hazardous wastes or other substances generated by our customers. Under the Comprehensive Environmental Response, Compensation and Liability Act of

Table of Contents

Index to Financial Statements

1980 (the Superfund Act), the EPA is authorized to take administrative and judicial action to either cause parties who are responsible under the Superfund Act for cleaning up any unauthorized release of hazardous substances to do so, or to clean up such hazardous substances and to seek reimbursement of the costs thereof from the responsible parties, who are jointly and severally liable for such costs under the Superfund Act. The EPA may also bring suit for treble damages from responsible parties who unreasonably refuse to voluntarily participate in such a clean up or funding thereof. Responsible parties include anyone who owns or operates the facility where the release occurred (either currently and/or at the time such hazardous substances were disposed of), or who by contract arranges for disposal, treatment, transportation for disposal or treatment of a hazardous substance, or who accepts hazardous substances for transport to disposal or treatment facilities selected by such person from which there is a release. We believe that our risk of liability is minimized since our handling consisted solely of maintaining and storing small samples of materials for laboratory analysis that are classified as hazardous. Due to its prohibitive costs, we accordingly do not currently carry insurance to cover liabilities which we may incur under the Superfund Act or similar environmental statutes.

Compliance Matters

During a recent internal management review of one of our branch operations in Trinidad, we were informed of allegations of improper payments, made by our local employees, to employees of certain customers, including foreign government owned enterprises. Consequently, the Audit Committee of our Board of Directors initiated an investigation of those allegations with the assistance of independent outside counsel. The investigation has found evidence suggesting that payments, which may violate the Foreign Corrupt Practices Act (FCPA), were made to employees of foreign government owned enterprises. While the investigation is ongoing, there has been no indication that the improper payments extend beyond the one Trinidad branch. Based upon the evidence obtained to date, we believe that the total of these improper payments over the past five years did not exceed \$50,000. The total annual revenues from the impacted Trinidad branch represent approximately one-half of one percent of our annual consolidated revenues. Based on current information, we are unable at this time to predict when the investigation will be completed or what regulatory or other outcomes may result.

We have voluntarily disclosed information relating to the initial allegations, the investigation and the initial findings to the U.S. Department of Justice (DOJ) and to the Securities and Exchange Commission (SEC), and we will cooperate with the DOJ and SEC in connection with their review of this matter. The outcome of this investigation cannot be predicted at this time; however, the FCPA and related statutes and regulations do provide for potential monetary penalties as well as criminal and civil sanctions in connection with FCPA violations.

Intellectual Property

While we are the holder of various patents, trademarks, trade secrets and licenses, we do not consider any single intellectual property to be material to our consolidated business operations.

Competition

In general, competition stems from a large number of other outside service contractors. More than 100 different competitors are currently active in our markets. We believe we have a competitive advantage over most service contractors due to the quality, training and experience of our technicians, our nationwide and increasingly international service capability, our broad range of services, and our technical support and manufacturing capabilities supporting the service network. However, there are other competitors that may offer a similar range of coverage or services and include, but are not limited to, Furmanite Corporation, T.D. Williamson, Inc., Acuren Group, Inc. and JV Industrial Companies.

Available Information

As a public company, we are required to file periodic reports with the SEC within established deadlines. Any document we file with the SEC may be viewed or copied at the SEC's Public Reference Room at 100 F Street, N.E., Washington, D.C. 20549. Additional information regarding the Public Reference Room can be obtained by calling the SEC at (800) SEC-0330. Our SEC filings are also available to the public through the SEC's website located at www.sec.gov.

Our internet website address is www.teamindustrialservices.com. Information contained on our website is not part of this report on Form 10-K. Our annual reports on Form 10-K, quarterly reports on Form 10-Q, Proxy Statements and current reports on Form 8-K filed with (or furnished to) the SEC are available on our website, free of charge, as soon as reasonably practicable after we file or furnish such material. We also post our code of business conduct and ethics, our governance principles and the charters of our board's committees on our website. Our governance documents are available in print to any stockholder that makes a written request to Team, Inc., Attn: Corporate Secretary, 200 Hermann Drive, Alvin, Texas, 77511.

ITEM 1A. RISK FACTORS

The risk factors described below should be carefully considered in addition to other information contained or incorporated by reference herein. We operate in a continually changing business environment and new risk factors emerge from time to time. We cannot predict such risk factors, nor can we assess the impact, if any, of such risk factors on our business or the extent to which any factors may cause actual results to differ materially from those projected. The following risks and uncertainties should be considered in evaluating our outlook of future Company performance.

The current economic environment may affect our customers demand for our services. The current economic recession has reduced the availability of liquidity and credit and, in many cases, reduced demand for our customers' products. Continued disruption of the credit markets could also adversely affect our customers' ability to finance on-going maintenance and new projects, resulting in contract cancellations or suspensions, and project delays. An extended or deepening recession may result in further plant closures or other contractions in our customer base. These factors may also adversely affect our ability to collect payment for work we have previously performed. Furthermore, our ability to expand our business could be limited if, in the future, we are unable to increase our credit capacity under our Credit Facility on favorable terms or at all. Such disruptions, should they occur, could materially impact our results of operations, financial position or cash flows.

Our revenues are heavily dependent on certain industries. Sales of our services are dependent on customers in certain industries, particularly the refining and petrochemical industries. As experienced in the past, and as expected to occur in the future, downturns characterized by diminished demand for services in these industries could have a material impact on our results of operations, financial position or cash flows.

We sell our services in highly competitive markets, which places pressure on our profit margins and limits our ability to maintain or increase the market share of our services. Our competition generally stems from other outside service contractors, many of whom offer a similar range of services. The current economic recession has generally reduced demand for industrial services and thus created a more competitive bidding environment for new and existing work. Additionally, our customers may bring historically out-sourced services back in-house to improve their staffing utilization and reduce the need for staffing reductions. No assurances can be made that we will continue to maintain our pricing model and our profit margins or increase our market share.

No assurances can be made that we will be successful in maintaining or renewing our contracts with our customers. A significant portion of our contracts and agreements with customers may be terminated by either party on short notice. Although we actively pursue the renewal of our contracts, we can not assure that we will be able to renew these contracts or that the terms of the renewed contracts will be as favorable as the existing contracts. If we are unable to renew or replace these contracts, or if we renew on less favorable terms, we may suffer a material reduction in revenue and earnings.

Table of Contents

Index to Financial Statements

No assurances can be made that we will be successful in hiring or retaining members of a skilled technical workforce. We have a skilled technical workforce and an industry recognized technician training program for each of our service lines that prepares new employees as well as further trains our existing employees. The competition for these individuals is intense. The loss of the services of a number of these individuals or failure to attract new employees could adversely affect our ability to perform our obligations on our customers' projects or maintenance and consequently could negatively impact the demand for our products and services and consequently our financial condition and operating results. Our inability to predict the length and breadth of the current economic recession may result in staffing levels below the level required to achieve our financial objectives when markets recover.

Unsatisfactory safety performance can affect customer relationships, result in higher operating costs and negatively impact our ability to hire and retain a skilled technical workforce. Our workers are subject to the normal hazards associated with providing services at industrial facilities. Even with proper safety precautions, these hazards can lead to personal injury, loss of life, damage to, or destruction of, property, plant and equipment, lower employee morale and environmental damage. We are intensely focused on maintaining a strong safety environment and reducing the risk of accidents to the lowest possible level. Poor safety performance may limit or eliminate potential revenue streams from many of our largest customers and may materially increase our future insurance and other operating costs. Our growth strategy requires that we increase the size of our workforce. While we normally target experienced personnel for employment, we also hire inexperienced employees. Even with thorough training, inexperienced employees have a higher likelihood of injury which could lead to higher operating costs and insurance rates. Although we maintain insurance coverage, such coverage may be inadequate to protect us from all expenses related to these risks.

Our operations and properties are subject to extensive governmental regulation under environmental laws. These laws and regulations can impose substantial sanctions for violations or operational changes that may limit our services. We must conform our operations to applicable regulatory requirements and adapt to changes in such requirements in all locations in which we operate. These actions may increase the overall costs of providing our services. Some of our services involve handling or monitoring highly regulated materials, including hazardous wastes. Environmental laws and regulations generally impose limitations and standards for regulated materials and require us to obtain permits and comply with various other requirements. The improper characterization, handling, disposal or monitoring of regulated materials or any other failure by us to comply with increasingly complex and strictly enforced federal, state and local environmental laws and regulations or associated environmental permits could subject us to the assessment of administrative, civil and criminal penalties, the imposition of investigatory or remedial obligations, or the issuance of injunctions that could restrict or prevent our ability to operate our business and complete contracted services. A defect in our services or faulty workmanship could result in an environmental liability if, as a result of the defect or faulty workmanship, a contaminate is released into the environment.

We currently maintain liability insurance to limit any potential loss, but there can be no assurance that our insurance will fully protect us against a claim or loss. We perform services in hazardous environments on or around high-pressure, high temperature systems and our employees are exposed to a number of hazards, including exposure to hazardous materials, explosion hazards and fire hazards. Incidents that occur at these large industrial facilities or systems, regardless of fault, may be catastrophic and adversely impact our employees and third parties by causing serious personal injury, loss of life, damage to property or the environment, and interruption of operations. Our contracts typically require us to indemnify our customers for injury, damage or loss arising out of our presence at our customers' location, regardless of fault, or the performance of our services and provide for warranties for materials and workmanship. We may also be required to name the customer as an additional insured under our insurance policies. We maintain insurance coverage against these and other risks associated with our business in accordance with standard industry practice. This insurance may not protect us against liability for some kinds of events, including events involving pollution, product or professional liability, losses resulting from business interruption or acts of terrorism or damages from breach of contract by the Company. We cannot assure you our insurance will be adequate in risk coverage or policy limits to cover all

Table of Contents

Index to Financial Statements

losses or liabilities that we may incur. Moreover, in the future, we cannot assure that we will be able to maintain insurance at levels of risk coverage or policy limits that we deem adequate. Any future damages caused by our products or services that are not covered by insurance or are in excess of policy limits could have a material adverse effect on our results of operations, financial position or cash flows.

We are involved and are likely to continue to be involved in legal proceedings, which will increase our costs and, if adversely determined, could have a material effect on our results of operations, financial position or cash flows. We are currently a defendant in legal proceedings arising from the operation of our business and it is reasonable to expect that we will be named in future actions. Most of the legal proceedings against us arise out of the normal course of performing services at customer facilities, and include claims for workers' compensation, personal injury and property damage. Legal proceedings can be expensive to defend and can divert the attention of management and other personnel for significant periods of time, regardless of the ultimate outcome. An unsuccessful defense of a liability claim could have an adverse effect on our business, results of operations, financial condition or cash flows.

Economic, political and other risks associated with international operations could adversely affect our business. A significant portion of our operations are conducted and located outside the United States and, accordingly, our business is subject to risks associated with doing business internationally, including changes in foreign currency exchange rates, instability in political or economic conditions, differing employee relations, trade protection measures, and difficulty in administering and enforcing corporate policies which may be different than the normal business practices of local cultures. In many foreign countries, particularly in those with developing economies, it is common to engage in business practices that are prohibited by U.S. regulations applicable to us such as the FCPA. Our international business operations may include projects in countries where corruption is prevalent. Although we have and continue to implement policies and procedures designed to ensure compliance with these laws, there can be no assurance that all of our employees, contractors or agents, including those based in or from countries where practices which violate such U.S. laws may be customary, will not take actions in violation of our policies and procedures. Any violation of foreign or U.S. laws by our employees, contractors or agents, even if such violation is prohibited by our policies and procedures, could have a material adverse effect on our results of operations, financial position or cash flows.

Our growth strategy entails risk for investors. We intend to continue to pursue acquisitions in the specialty maintenance and construction services industry to complement and diversify our existing business. We may not be able to continue to expand our market presence through attractive acquisitions, and any future acquisitions may present unforeseen integration difficulties or costs. From time to time, we make acquisitions of other businesses that enhance our services or the geographic scope of our Company. No assurances can be made that we will realize the cost savings, synergies or revenue enhancements that we may anticipate from any acquisition, or that we will realize such benefits within the time frame that we expect. If we are not able to address the challenges associated with acquisitions and successfully integrate acquired businesses, or if our integrated product and service offerings fail to achieve market acceptance, our business could be adversely affected. The consideration paid in connection with an acquisition may also affect our financial results. To the extent we issue stock or other rights to purchase stock, including options or other rights, existing shareholders may be diluted and earnings per share may decrease. In addition, acquisitions may result in the incurrence of additional debt.

Our level of indebtedness could have important consequences to us. Our level of indebtedness may make it more difficult for us to satisfy our obligations with respect to our indebtedness, increase our vulnerability to general adverse economic conditions, industry conditions and rising interest rates, limit our ability to take advantage of business opportunities as a result of various restrictive covenants in our debt agreements, place us at a competitive disadvantage compared to our competitors that have less debt or limit our ability to borrow money or sell stock to fund our working capital, capital expenditures, acquisitions or other corporate requirements.

Table of Contents

Index to Financial Statements

The price of our outstanding securities may suffer if we cannot control fluctuations in our sales and operating results. Historically, our quarterly and annual sales and operating results have fluctuated. We expect fluctuations to continue in the future. In addition to general economic and political conditions, the following factors affect our sales: the timing of significant customer orders, the timing of planned maintenance projects at customer facilities, changes in competitive pricing, wide variations in profitability by product line, variations in operating expenses, rapid increases in raw material and labor costs, the timing of announcements or introductions of new products or services by us, our competitors or our respective customers, the acceptance of those services, our ability to adequately meet staffing requirements with qualified personnel, relative variations in manufacturing efficiencies and costs, and the relative strength or weakness of international markets. Since our quarterly and annual revenues and operating results vary, we believe that period-to-period comparisons are not necessarily meaningful and you should not rely on those comparisons as indicators of our future performance. Due to the foregoing factors, it is possible that in some future quarter or quarters our revenues or operating results will not meet the expectations of public stock market analysts or investors, which could cause the price of our outstanding securities to decline or be volatile.

Our business may be adversely impacted by work stoppages, staffing shortages, and other labor matters. At May 31, 2009, we had approximately 3,400 employees and contractors, approximately 600 of whom were located in Canada and Europe where employees predominantly are represented by unions. Although we believe that our relations with our employees are good and we have had no strikes or work stoppages, no assurances can be made that we will not experience these and other types of conflicts with labor unions, works councils, other groups representing employees, or our employees generally, or that any future negotiations with our labor unions will not result in significant increases in the cost of labor.

Other risk factors. Other risk factor may include interruption of our operations, or the operations of our customers due to fire, hurricanes, earthquakes, power loss, telecommunications failure, terrorist attacks, labor disruptions, health epidemics and other events beyond our control.

Any one of these factors, or a combination of these factors, could materially affect our future results of operations and whether any forward-looking statements in this Form 10-K ultimately prove to be accurate.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

We own several facilities used in our operations. Our 88,000 square foot facility in Alvin, Texas consists of our corporate office, primary training facility and ISO-9001 certified manufacturing facility for clamps, enclosures and sealants. Our 11,000 square foot facility in Pearland, Texas is used as an equipment distribution center to support regional operations. Our 18,000 square foot facility in Houston, Texas, 10,000 square foot facility in Milwaukee, Wisconsin, and our 17,000 square foot facility in Edmonton, Alberta are offices for our branch service locations in those areas. All other facilities used in our operations are provided through operating leases.

Included in property, plant and equipment is \$7.5 million pertaining to land in or around Houston. This primarily consists of \$6.9 million attributable to 50 acres purchased in October 2007 to construct future facilities to replace those currently in Alvin, Texas and Pearland, Texas. Due to the current economic recession and its effect on our growth, we have postponed construction of the future facilities until such time as the industrial services sector recovers.

We believe that our property and equipment are adequate for our current needs, although additional investments are expected to be made in property and equipment for expansion, replacement of assets at the end of their useful lives and in connection with corporate development activities.

ITEM 3. LEGAL PROCEEDINGS

We have, from time to time, provided temporary leak repair services for the steam operations of Consolidated Edison of New York (Con Ed) located in New York City. In July 2007, a Con Ed steam main located in midtown Manhattan ruptured causing one death and other injuries and property damage. Multiple separate lawsuits have been filed against Con Ed, the City of New York and us in the Supreme Courts of New York located in Kings, New York and Bronx County, alleging that our temporary leak repair services may have contributed to the cause of the rupture. The lawsuits seek generally unspecified compensatory damages for personal injury, property damage and business interruption. Additionally, on March 31, 2008 we received a letter from Con Ed alleging that our contract with Con Ed requires us to indemnify and defend Con Ed for additional claims filed against Con Ed as a result of the rupture. Con Ed filed an action to join Team and the City of New York as defendants in all lawsuits filed against Con Ed that did not include Team and the City of New York as direct defendants. We intend to vigorously defend the lawsuits and Con Ed s claim for indemnification. We are unable to estimate the amount of liability to us, if any, associated with these lawsuits and the claim for indemnification. We maintain insurance coverage, subject to a deductible limit of \$250,000, which we believe should cover these claims and have placed our insurers on notice. We do not believe the final resolution of these matters will have a material adverse effect on our results of operations, financial position or cash flows.

We are involved in various claims, suits, investigations, and legal proceedings. We accrue a liability when we believe that it is both probable that a liability has been incurred and the amount of the loss can be reasonably estimated. We review these accruals at least quarterly and adjust them to reflect ongoing negotiations, settlements, rulings, advice of legal counsel, and other relevant information. However, litigation is inherently unpredictable. Therefore, we could incur judgments or enter into settlements of claims that could adversely affect our results of operations, financial position or cash flows.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

None

Table of Contents**Index to Financial Statements****PART II****ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES****Market Information**

Our common stock is listed on the NASDAQ under the ticker symbol "TISI". The table below reflects the high and low closing sales prices of our common stock on the NASDAQ by quarter for the fiscal years ended May 31, 2009 and 2008, respectively.

	Sales Price	
	High	Low
2009		
Quarter Ended:		
August 31, 2008	\$ 39.66	\$ 30.94
November 30, 2008	\$ 39.43	\$ 19.89
February 28, 2009	\$ 27.89	\$ 12.87
May 31, 2009	\$ 15.87	\$ 10.32
2008		
Quarter Ended:		
August 31, 2007	\$ 24.19	\$ 20.26
November 30, 2007	\$ 34.35	\$ 22.46
February 29, 2008	\$ 38.00	\$ 27.46
May 31, 2008	\$ 34.52	\$ 27.22

Table of Contents**Index to Financial Statements****Performance Graph**

The following performance graph compares the performance of our common stock to the NASDAQ Composite Index and a Peer Group Index. The comparison assumes \$100 was invested on May 31, 2004 in our common stock, the NASDAQ Composite Index and in the Peer Group Index. The values of each investment are based on share price appreciation, with reinvestment of all dividends, assuming any were paid. For each graph, the investments are assumed to have occurred at the beginning of each period presented. The following companies are included in the Peer Group Index used in the graph: Furmanite Corporation, Matrix Service Company, T-3 Energy Services, and Versar, Inc.

*\$100 invested on 5/31/04 in stock or index, including reinvestment of dividends.
Fiscal year ending May 31.

Peer Group	\$ 100.00	\$ 64.58	\$ 169.85	\$ 286.61	\$ 371.27	\$ 136.79

Notes: The above information was provided by Research Data Group, Inc.

Holdings

There were 194 holders of record of our common stock as of July 31, 2009 excluding beneficial owners of stock held in street name.

Dividends

No cash dividends were declared or paid during the fiscal years ended May 31, 2009, 2008 and 2007. We are not permitted to pay cash dividends without the consent of our bank syndicate. Accordingly, we have no present intention to pay cash dividends in the foreseeable future. Additionally, any future dividend payments will continue to depend on our financial condition, market conditions and other matters deemed relevant by the Board of Directors.

Description of Securities

On July 25, 2007, we announced a two-for-one stock split in the form of a 100 percent dividend payable on August 29, 2007 to all shareholders of record on August 15, 2007. To fund the requirement of new shares, we utilized approximately 1 million shares of treasury stock and issued an additional 8 million shares of common stock. All share and per share information has been retroactively adjusted to reflect the stock split.

Securities Authorized for Issuance Under Equity Compensation Plans

This information has been omitted from this report on Form 10-K as we intend to file such information in our definitive proxy statement no later than 120 days following the close of our fiscal year ended May 31, 2009. The information required regarding equity compensation plans is hereby incorporated by reference.

Table of Contents**Index to Financial Statements****ITEM 6. SELECTED FINANCIAL DATA**

The following is a summary of selected financial information for the five years ended May 31, 2009 (amounts in thousands, except per share data):

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following review of our results of operations and financial condition should be read in conjunction with Item 1 Business, Item 1A Risk Factors, Item 2 Properties, and Item 8 Consolidated Financial Statements and Supplementary Data, included in this Form 10-K.

CAUTIONARY STATEMENT FOR THE PURPOSE OF

SAFE HARBOR PROVISIONS OF THE

PRIVATE SECURITIES LITIGATION REFORM ACT OF 1995

This report includes forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. In addition, other written or oral statements that constitute forward-looking statements may be made by us or on behalf of the Company in other materials we release to the public including all statements, other than statements of historical facts, included or incorporated by reference in this Form 10-K, that address activities, events or developments which we expect or anticipate will or may occur in the future. You can generally identify our forward-looking statements by the words anticipate, believe, expect, plan, intend, estimate, projection, predict, budget, forecast, goal, guidance, target, will, could, should, may and similar expressions.

We based our forward-looking statements on our reasonable beliefs and assumptions, and our current expectations, estimates and projections about ourselves and our industry. We caution that these statements are not guarantees of future performance and involve risks, uncertainties and assumptions that we cannot predict. In addition, we based many of these forward-looking statements on assumptions about future events that may prove to be inaccurate. We wish to ensure that such statements are accompanied by meaningful cautionary statements, so as to obtain the protections of the safe harbor established in the Private Securities Litigation Reform Act of 1995. Accordingly, you should carefully consider the statements under Risk Factors, which address factors that could cause our actual results to differ materially from those set forth in forward-looking statements. We undertake no obligation to update publicly any forward-looking statements, whether as a result of new information, future events or otherwise.

This Management's Discussion and Analysis of Financial Condition and Results of Operations is provided as a supplement to the accompanying consolidated financial statements and notes to help provide an understanding of our financial condition, changes in financial condition, and results of operations.

General Information

We are a leading provider of specialty maintenance and construction services required in maintaining high temperature and high pressure piping systems and vessels that are utilized extensively in heavy industries. We offer an array of complimentary services including:

leak repair,

hot tapping,

fugitive emissions control,

field machining,

technical bolting,

field valve repair,

non-destructive testing, and

field heat treating.

Table of Contents**Index to Financial Statements**

We offer these services in over 100 locations throughout the United States and international markets including Aruba, Belgium, Canada, Singapore, The Netherlands, Trinidad and Venezuela.

Our industrial services are available 24 hours a day, 7 days a week, 365 days a year. We market our services to companies in a diverse array of industries which include the petrochemical, refining, power, pipeline, pulp and paper, steel industries, municipalities, shipbuilding, OEMs, distributors and end users and some of the world's largest engineering and construction firms. Our products and services are provided across a broad geographic reach.

Year Ended May 31, 2009 Compared to Year Ended May 31, 2008

The following table sets forth the components of revenue and operating income from our continuing operations for fiscal 2009 and 2008 (in thousands):

	Year ended May 31, 2009	Year ended May 31, 2008	Increase (Decrease)	
			\$	%
Revenues:				
TCM Division	\$ 270,420	\$ 274,531	\$ (4,111)	(1)%
TMS Division	227,139	203,944	23,195	11%
Total revenues	497,559	478,475	19,084	4%
Gross margin:				
TCM Division	81,654	84,145	(2,491)	(3)%
TMS Division	75,405	71,520	3,885	5%
Total gross margin	157,059	155,665	1,394	1%
S, G&A expenses:				
Field Operations	96,571	91,390	5,181	6%
Corporate costs	20,190	18,402	1,788	10%
Total S, G&A	116,761	109,792	6,969	6%
Earnings from unconsolidated affiliates	973		973	100%
Operating income	\$ 41,271	\$ 45,873	\$ (4,602)	(10)%

Revenues. Our revenues for the year ended May 31, 2009 were \$497.6 million compared to \$478.5 million for the year ended May 31, 2008, an increase of \$19.1 million or 4%. Our revenues for the year ended May 31, 2009 include incremental revenues associated with the LRS acquisitions of \$14.2 million. Revenues for our TCM division for the year ended May 31, 2009 were \$270.4 million compared to \$274.5 million for the year ended May 31, 2008, a decrease of \$4.1 million or 1%. Revenues for our TMS division (inclusive of LRS) for the year ended May 31, 2009 were \$227.1 million compared to \$203.9 million for the year ended May 31, 2008, an increase of \$23.2 million or 11%. The increase in revenues during the current year was primarily due to the positive sales environment in the first half of our 2009 fiscal year. The effects of the economic recession did not dramatically affect our revenues until the second half of our fiscal year. Specifically, revenues for the second half of the fiscal year were \$225.5 million, sequentially down \$46.6 million or 17% from the first half of the year, and down \$27.2 million or 11% from the same period in the prior year. This second half decrease reflects the change in spending habits of our customers who sought to cancel or delay projects, cut discretionary project spending, and delay maintenance when and where possible. While several industrial sectors which we serve are more economically distressed than others, nearly all our customers are adopting more conservative near-term spending postures. As a result, we are seeing more frequent deferrals and downsizing of turnarounds, a shift to reduced spending by many customers, and more discussions about the need for rate adjustments. Consistent with these observations, we experienced recent revenue softness in virtually all service lines and geographic areas. Additionally, exchange rate fluctuations, specifically between the United States and Canada, further adversely affected revenues by \$19.0 million.

Table of Contents**Index to Financial Statements**

Gross Margin. Our gross margin for the year ended May 31, 2009 was \$157.1 million compared to \$155.7 million for the year ended May 31, 2008, an increase of \$1.4 million or 1%. Gross margin as a percentage of revenue was 32% for the year ended May 31, 2009 compared to 33% for the year ended May 31, 2008. Gross margin for our TCM division for the year ended May 31, 2009 was \$81.7 million compared to \$84.1 million for the year ended May 31, 2008, a decrease of \$2.5 million or 3%. TCM division gross margin as a percentage of revenue was 30% for the year ended May 31, 2009 and 31% for the year ended May 31, 2008. Gross margin for our TMS division (inclusive of LRS) was \$75.4 million for the year ended May 31, 2009 compared to \$71.5 million for the year ended May 31, 2008, an increase of \$3.9 million or 5%. TMS division gross margin as a percentage of revenue was 33% for the year ended May 31, 2009 and 35% for the year ended May 31, 2008.

Selling, General and Administrative Expenses. Our S,G&A for the year ended May 31, 2009 was \$116.8 million compared to \$109.8 million for the year ended May 31, 2008, an increase of \$7.0 million or 6%. This reflects investments in our network of over 100 locations. Approximately \$5.2 million of the increase in S,G&A was due to field operations and \$1.8 million of the increase was due to centralized corporate support costs. The \$1.8 million increase in corporate support costs in the current period included a \$1.4 million increase of stock based employee compensation expense. S,G&A as a percentage of revenue was 23% for the year ended May 31, 2009 consistent with the year ended May 31, 2008.

Earnings From Unconsolidated Affiliates. Our earnings from unconsolidated affiliates consists entirely of our joint venture (50% ownership) formed in May 2008, to perform non-destructive testing and inspection services in Alaska. The joint venture is an integral part of our operations in Alaska and all technicians working on behalf of the joint venture are our employees.

Interest. Interest expense was \$4.9 million for the year ended May 31, 2009 compared to \$6.5 million for the year ended May 31, 2008. This decrease is the result of lower levels of outstanding borrowings during the year and lower interest rates applied to those borrowings.

Taxes. The provision for income taxes was \$13.5 million on pretax income of \$36.4 million for the year ended May 31, 2009. The provision for income taxes was \$15.8 million on pretax income of \$39.4 million for the year ended May 31, 2008. The effective tax rate for fiscal 2009 was 37% compared to 40% for fiscal 2008. The lower effective tax rate for fiscal 2009 is primarily due to the recognition of employment and research tax credits and the mixture of state and foreign taxes to which the income is subject.

Year Ended May 31, 2008 Compared to Year Ended May 31, 2007

The following table sets forth the components of revenue and operating income from our continuing operations for fiscal 2008 and 2007 (in thousands):

	Year ended May 31, 2008	Year ended May 31, 2007	Increase	
			\$	%
Revenues:				
TCM Division	\$ 274,531	\$ 171,030	\$ 103,501	61%
TMS Division	203,944	147,318	56,626	38%
Total revenues	478,475	318,348	160,127	50%
Gross margin:				
TCM Division	84,145	54,478	29,667	54%
TMS Division	71,520	55,684	15,836	28%
Total gross margin	155,665	110,162	45,503	41%
S, G&A expenses:				
Field Operations	91,390	65,377	26,013	40%
Corporate costs	18,402	14,448	3,954	27%
Total S, G&A	109,792	79,825	29,967	38%

Operating income	\$	45,873	\$	30,337	\$	15,536	51%
------------------	----	--------	----	--------	----	--------	-----

Table of Contents**Index to Financial Statements**

Revenues. Our revenues from continuing operations for the year ended May 31, 2008 were \$478.5 million compared to \$318.3 million for the year ended May 31, 2007, an increase of \$160.1 million or 50%. Our revenues for the year ended May 31, 2008 include revenues associated with the recent Aitec and LRS acquisitions of \$53.9 million and \$11.6 million, respectively. Organic revenue growth also continues to be broad based across all service lines and geographic regions. Revenues for our TCM division (inclusive of Aitec) for the year ended May 31, 2008 were \$274.5 million compared to \$171.0 million for the year ended May 31, 2007, an increase of \$103.5 million or 61%. Revenues for our TMS division (inclusive of LRS) for the year ended May 31, 2008 were \$203.9 million compared to \$147.3 million for the year ended May 31, 2007, an increase of \$56.6 million, or 38%.

Gross Margin. Our gross margin for the year ended May 31, 2008 was \$155.7 million compared to \$110.2 million for the year ended May 31, 2007, an increase of \$45.5 million or 41%. Gross margin as a percentage of revenue was relatively consistent with the prior year as improvements in the TCM divisional gross margin percentages during the current year offset decreases in the TMS divisional gross margin percentages. Gross margin for our TCM division for the year ended May 31, 2008 was \$84.1 million compared to \$54.5 million for the year ended May 31, 2007, an increase of \$29.7 million or 54%. TCM division gross margins as a percentage of revenue was 31% for the year ended May 31, 2008 and 32% for the year ended May 31, 2007. Gross margin for our TMS division was \$71.5 million for the year ended May 31, 2008 compared to \$55.7 million for the year ended May 31, 2007, an increase of \$15.8 million or 28%. TMS division gross margin as a percentage of revenue was 35% for the year ended May 31, 2008 and 38% for the year ended May 31, 2007 down slightly from the Katrina/Rita hurricane influenced prior year period in which there was an abundance of high margin projects.

Selling, General and Administrative Expenses. Our S,G&A for the year ended May 31, 2008 was \$109.8 million compared to \$79.8 million for the year ended May 31, 2007, an increase of \$30.0 million or 38%. This reflects investments in our network of over 100 service locations. Approximately \$26.0 million of the increase in S,G&A was due to field operations and \$4.0 million of the increase was due to centralized corporate support costs. The \$4.0 million increase in corporate support costs in the current period included a \$1.9 million increase of stock based employee compensation. S,G&A as a percentage of revenue was 23% for the year ended May 31, 2008 compared to 25% for the year ended May 31, 2007.

Interest. Interest expense was \$6.5 million for the year ended May 31, 2008 as compared to \$4.2 million for the year ended May 31, 2007. This increase is the result of higher interest rates on our LIBOR based debt and higher levels of outstanding borrowings during the year.

Taxes. The provision for income taxes was \$15.8 million on pretax income of \$39.4 million for the year ended May 31, 2008. The provision for income taxes was \$10.6 million on pretax income of \$26.1 million for the year ended May 31, 2007. The effective tax rate for the year ended May 31, 2008 was 40% compared to 41% for the year ended May 31, 2007. The rate differential is due to the mixture of non-deductible expenses in relation to taxable income and the mixture of state and foreign taxes to which the income is subject.

Liquidity and Capital Resources

Financing for our operations consists primarily of vendor financing and leasing arrangements, a bank facility and cash flows attributable to our operations, which we believe are sufficient to fund our business needs.

Vendor Financing. In February 2009, we renewed our enterprise agreement with a vendor for server and desktop volume licensing with software assurance for a term of three years. Financing for the agreement was provided by the vendor under a three year non-interest bearing note (the Software Licensing Note) with monthly payments of \$26,901. The Software Licensing Note has been discounted at 3.5%, which approximated our effective borrowing rate at the time we entered into the agreement. At May 31, 2009, the outstanding principal balance of the Software Licensing Note was \$0.8 million.

Table of Contents**Index to Financial Statements**

Leasing Arrangements. We also entered into operating leases to rent facilities and obtain vehicles and equipment for our field operations. Our obligations under non-cancellable operating leases, primarily consisting of facility and auto leases, were approximately \$35.0 million at May 31, 2009 and are as follows (in thousands):

Twelve Months Ended May 31,	Operating Leases
2010	\$ 13,368
2011	9,832
2012	6,219
2013	3,467
2014	1,928
Thereafter	188
Total	\$ 35,002

Total rent expense resulting from operating leases for the twelve months ended May 31, 2009, 2008 and 2007 was \$19.9 million, \$18.7 million and \$12.9 million, respectively.

Bank Facility. In May 2007, we amended and restated our existing banking facility comprised of a term loan and a revolving credit facility. Our existing banking facility, further amended in June 2008, provides us with a \$145 million revolving line of credit and a \$15 million term loan through a banking syndicate. In January 2008, we amended our existing banking facility to allow us to borrow in Euros or U.S. Dollars. Our existing banking facility, as amended (collectively, the Credit Facility) bears interest based on a variable Eurodollar rate option (LIBOR plus 1.25% at May 31, 2009) and the margin is set based on our financial covenants as set forth in the Credit Facility. The Credit Facility matures in May 2012 and is secured by virtually all of our domestic assets and a majority of the stock of our foreign subsidiaries, and has commitment fees of .25% that are applied to unused borrowing capacity. It also contains financial covenants and restrictions on the creation of liens on assets, the acquisition or sale of subsidiaries and the incurrence of certain liabilities. At May 31, 2009, there were \$1.0 million of capitalized loan costs which are being amortized over the life of the Credit Facility. At May 31, 2009, we were in compliance with all covenants of the Credit Facility.

On May 31, 2007, we entered into an interest rate swap with our bank to hedge at a fixed pay rate of 4.97%, a portion of the variable cash flows associated with the variable Eurodollar interest expense on our Credit Facility. The portion of the Credit Facility hedged begins with a notional value of \$30.0 million effective June 1, 2007 and decreases to \$16.3 million by March 1, 2010. Changes in the cash flows of the interest rate swap are expected to be highly effective in offsetting the changes in cash flows attributable to fluctuations in the variable LIBOR rate on the notional amounts of the Credit Facility. The interest rate swap agreement is designated as a cash flow hedge, with the changes in fair value, to the extent the swap agreement is effective, recognized in other comprehensive income until the hedged interest expense is recognized in earnings.

On February 12, 2008, we borrowed 12.3 million under the Credit Facility to serve as an economic hedge of our net investment in our European operations as fluctuations in the fair value of the borrowing attributable to the U.S. Dollar/Euro spot rate will offset translation gains or losses attributable to our investment in our European operations.

In October 2008, our Canadian subsidiary entered into a revolving credit facility with a bank (the Canadian Line of Credit). The Canadian Line of Credit allows our subsidiary to borrow up to \$7.5 million Canadian (approximately \$6.8 million U.S.). We have provided an unconditional guarantee of borrowings by our Canadian subsidiary, effectively making Team, Inc. liable to the bank as principal debtor. The Canadian Line of Credit also contains cross-default provisions with our Credit Facility. Borrowings under the Canadian Line of Credit are used for working capital and other general needs of our Canadian operations, bear interest at a LIBOR based interest rate (LIBOR plus 1.25% at May 31, 2009) and matures in May 2012.

In order to secure our insurance programs, we are required to post letters of credit generally issued by a bank as collateral. A letter of credit commits the issuer to remit specified amounts to the holder, if the holder

Table of Contents

Index to Financial Statements

demonstrates that we failed to meet our obligations under the letter of credit. If this were to occur, we would be obligated to reimburse the issuer for any payments the issuer was required to remit to the holder of the letter of credit. At May 31, 2009, we were contingently liable for outstanding stand-by letters of credit totaling \$6.8 million. Outstanding letters of credit reduce amounts available under our Credit Facility and are considered as having been funded for purposes of calculating our financial covenants under the Credit Facility.

Restrictions On Cash. Included in our cash and cash equivalents at May 31, 2009 is \$3.1 million of cash in Europe. Any repatriation of cash from Europe, if deemed to be a dividend from our European subsidiary for tax purposes, would result in adverse tax consequences. While not legally restricted from repatriating this cash, we consider all earnings of our European subsidiary to be permanently reinvested and access to cash in Europe to be limited.

Cashflows Attributable to Our Operations. For the year ended May 31, 2009, cash provided by operating activities was \$38.9 million. Net income of \$22.9 million, when adjusted for non-cash items such as depreciation and amortization, deferred financing costs, allowance for doubtful accounts, non-cash compensation and deferred tax charges, was \$41.4 million.

Cashflows Attributable to Our Investing Activities. For the year ended May 31, 2009, cash used in investing activities was \$14.7 million, consisting primarily of \$16.4 million of capital expenditures (we incurred approximately \$25.6 million and \$16.5 million for capital expenditures during fiscal years 2008 and 2007, respectively). Capital expenditures can vary depending upon specific customer needs that may arise unexpectedly. We anticipate capital expenditures for the next twelve months to be approximately \$10 million to \$15 million for equipment.

Cashflows Attributable to Our Financing Activities. For the year ended May 31, 2009, cash used in financing activities was \$16.2 million. Repayments of the Credit Facility used \$19.4 million of cash.

Critical Accounting Policies

The process of preparing financial statements in accordance with Generally Accepted Accounting Principles in the U.S. (GAAP) requires our management to make estimates and judgments. It is possible that materially different amounts could be recorded if these estimates and judgments change or if actual results differ from these estimates and judgments. We have identified the following six critical accounting policies that require a significant amount of estimation and judgment and are considered to be important to the portrayal of our financial position and results of operations:

Revenue Recognition,

Valuation of Intangible Assets,

Income Taxes,

Workers Compensation, Auto, Medical and General Liability Accruals,

Allowance for Doubtful Accounts Receivable, and

Estimated Useful Lives.

Revenue Recognition. We determine our revenue recognition guidelines for our operations based on guidance provided in applicable accounting standards and positions adopted by the Financial Accounting Standards Board (FASB) or the SEC. Most of our projects are short-term in nature and we predominantly derive revenues by providing a variety of industrial services on a time and material basis. For all of these services our revenues are recognized when services are rendered or when product is shipped and risk of ownership passes to the customer.

Edgar Filing: TEAM INC - Form 10-K

However, due to various contractual terms with our customers, at the end of any reporting period there may be earned but unbilled revenue that is accrued to properly match revenues with related costs. At

Table of Contents

Index to Financial Statements

May 31, 2009 and 2008, the amount of earned but unbilled revenue was \$6.5 million and \$7.5 million, respectively. For services performed pursuant to a fixed price bid, revenues are recognized upon completion of the job. Costs associated with such jobs are deferred until completion, resulting in deferred costs of \$0.5 million and \$0.4 million at May 31, 2009 and 2008, respectively.

Valuation of Intangible Assets. Intangible assets consists primarily of goodwill. Goodwill represents the excess of costs over fair value of assets of businesses acquired. Goodwill and intangible assets acquired in a purchase business combination and determined to have an indefinite useful life are not amortized, but are instead tested for impairment at least annually in accordance with the provisions of FASB Statement No. 142, *Goodwill and Other Intangible Assets* (FASB No. 142). Intangible assets with estimated useful lives are amortized over their respective estimated useful lives to their estimated residual values and reviewed for impairment in accordance with FASB Statement No. 144, *Accounting for Impairment or Disposal of Long-Lived Assets* (FASB No. 144).

Our annual goodwill impairment test is conducted by first comparing the estimated fair value of the reporting unit to which the intangible asset is attributable and then comparing the implied fair value of goodwill with its carrying amount. The estimated fair value of the reporting unit is determined by using discounted future cash flow estimates. The reporting units used for purposes of computing the annual impairment test of goodwill, pursuant to FASB No. 142, are the TCM and TMS divisions, both of which comprise our industrial services segment. All goodwill assigned to those reporting units is attributable to business acquisitions that are part of those units. There was \$56.5 million and \$62.9 million of goodwill at May 31, 2009 and 2008, respectively. Based upon results of the annual impairment testing, conducted in May 2009, there have been no impairments of goodwill.

Income Taxes. We follow the guidance in FASB Statement No. 109, *Accounting for Income Taxes* (FASB No. 109) which requires that we use the asset and liability method of accounting for deferred income taxes and provide deferred income taxes for all significant temporary differences. As part of the process of preparing our consolidated financial statements, we are required to estimate our income taxes in each of the jurisdictions in which we operate. This process involves estimating our actual current tax payable and related tax expense together with assessing temporary differences resulting from differing treatment of certain items, such as depreciation, for tax and accounting purposes. These differences can result in deferred tax assets and liabilities, which are included within our consolidated balance sheets. We must then assess the likelihood that our deferred tax assets will be recovered from future taxable income and, to the extent we believe that it is more likely than not (a likelihood of more than 50%) that some portion or all of the deferred tax assets will not be realized, we must establish a valuation allowance. We consider all available evidence, both positive and negative, to determine whether, based on the weight of the evidence, a valuation allowance is needed. Evidence used includes information about our current financial position and our results of operations for the current and preceding years, as well as all currently available information about future years, including our anticipated future performance, the reversal of deferred tax liabilities and tax planning strategies.

Management believes future sources of taxable income, reversing temporary differences and other tax planning strategies will be sufficient to realize assets for which no reserve has been established. While we have considered these factors in assessing the need for a valuation allowance, there is no assurance that a valuation allowance would not need to be established in the future if information about future years change. Any change in the valuation allowance would impact our income tax provision and net income in the period in which such a determination is made. As of May 31, 2009, we believe that it is more likely than not that we will have sufficient future taxable income to allow us to realize the benefits of the net deferred tax assets. Our belief is based upon our track record of consistent earnings over the past five years and projections of future taxable income over the periods in which the deferred tax assets are deductible. Accordingly, no valuation allowance has been recorded.

Table of Contents

Index to Financial Statements

Workers Compensation, Auto, Medical and General Liability Accruals. In accordance with FASB Statement No. 5, *Accounting for Contingencies* (FASB No. 5), we record a loss contingency when it is probable that a liability has been incurred and the amount of the loss can be reasonably estimated. We review our loss contingencies on an ongoing basis to ensure that we have appropriate reserves recorded on our balance sheet. These reserves are based on historical experience with claims incurred but not received, estimates and judgments made by management, applicable insurance coverage for litigation matters, and are adjusted as circumstances warrant. For workers' compensation, automobile liability and general liability claims, our self-insured retention is \$500,000 per occurrence. For medical claims, our self-insured retention is \$150,000 per individual claimant determined on an annual basis. For environmental liability claims, our self-insured retention is \$100,000 per occurrence. We maintain insurance for claims that exceed such self-retention limits. The insurance is subject to terms, conditions, limitations and exclusions that may not fully compensate us for all losses. Our estimates and judgments could change based on new information, changes in laws or regulations, changes in management's plans or intentions, or the outcome of legal proceedings, settlements or other factors. If different estimates and judgments were applied with respect to these matters, it is likely that reserves would be recorded for different amounts.

Allowance for Doubtful Accounts. In the ordinary course of business, a percentage of our accounts receivable are not collected due to billing disputes, customer bankruptcies, dissatisfaction with the services we performed and other various reasons. To account for those accounts receivable that will eventually be deemed uncollectible we establish an allowance. The allowance for doubtful accounts is based on a combination of our historical experience and management's review of long outstanding accounts receivable. The allowance for doubtful accounts was \$3.7 million and \$3.6 million at May 31, 2009 and 2008, respectively.

Estimated Useful Lives. The estimated useful lives of our long-lived assets are used to compute depreciation expense, future asset retirement obligations and are also used in impairment testing. Estimated useful lives are based, among other things, on the assumption that we provide an appropriate level of associated capital expenditures and maintenance while the assets are still in operation. Without these continued associated capital expenditures and maintenance, the useful lives of these assets could decrease significantly. Estimated useful lives could be impacted by such factors as future energy prices, environmental regulations, various legal factors and competition. If the useful lives of these assets were found to be shorter than originally estimated, depreciation expense may increase, liabilities for future asset retirement obligations may be insufficient and impairments in carrying values of tangible and intangible assets may result.

Accounting Principles Not Yet Adopted

FASB No. 168. In June 2009, the FASB issued Statement No. 168, *The FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting Principles* (FASB No. 168). FASB No. 168 identifies the sources of accounting principles and the framework for selecting the principles to be used in the preparation of financial statements of nongovernmental entities that are presented in conformity with GAAP. FASB No. 168 will supersede all then-existing non-SEC accounting and reporting standards. All other non-grandfathered non-SEC accounting literature not included in the Codification will become non-authoritative. FASB No. 168 is effective for financial statements issued for interim and annual periods ending after September 15, 2009. We do not believe this pronouncement will have any effect on our results of operations, financial position or cash flows.

FASB No. 167. In June 2009, the FASB issued Statement No. 167, *Amendments to FASB Interpretation No. 46(R)*, which amends the consolidation guidance applicable to variable interest entities. The amendments will significantly affect the overall consolidation analysis under FASB Interpretation No. 46(R). This statement is effective as of the beginning of the first fiscal year that begins after November 15, 2009. We are still assessing the impact of this statement on our results of operations, financial position or cash flows.

FASB No. 165. In May 2009, the FASB issued Statement No. 165, *Subsequent Events*, which established principles and requirements for subsequent events. The statement details the period after the balance sheet date during which the Company should evaluate events or transactions that may occur for potential recognition or

Table of Contents**Index to Financial Statements**

disclosure in the financial statements, the circumstances under which the Company should recognize events or transactions occurring after the balance sheet date in its financial statements and the required disclosures for such events. This statement is effective for interim or annual reporting periods ending after June 15, 2009. We do not believe this pronouncement will have a material effect on our results of operations, financial position or cash flows.

FASB No. 141R. In December 2007, the FASB issued Statement No. 141 (revised 2007), *Business Combinations* (FASB No. 141R) which replaces FASB No. 141, *Business Combinations* . FASB No. 141R applies to all business combinations, including combinations among mutual entities and combinations by contract alone. FASB No. 141R requires that all business combinations will be accounted for by applying the acquisition method. FASB No. 141R is effective for business combinations consummated in fiscal years beginning on or after December 15, 2008. Early application is prohibited. We are still assessing what impact this pronouncement will have on our results of operations, financial position or cash flows.

Newly Adopted Accounting Principles

FASB No. 162. In May 2008, the FASB issued Statement No. 162, *The Hierarchy of Generally Accepted Accounting Principles* (FASB No. 162). FASB No. 162 identifies the sources of accounting principles and the framework for selecting the principles to be used in the preparation of financial statements of non-governmental entities that are presented in conformity with generally accepted accounting principles. FASB No. 162 directs the hierarchy to the entity, as the entity is responsible for selecting accounting principles for financial statements that are presented in conformity with generally accepted accounting principles. FASB No. 162 became effective on November 13, 2008 and had no effect on our results of operations, financial position or cash flows.

FASB No. 161. In March 2008, the FASB issued Statement No. 161, *Disclosures about Derivative Instruments and Hedging Activities an amendment of FASB Statement No. 133* (FASB No. 161). FASB No. 161 requires enhanced disclosures about how and why an entity uses derivative instruments, how derivative instruments and related hedged items are accounted for, and how such derivative instruments affect an entity's financial position, financial performance and cash flows. FASB No. 161 became effective for us on November 15, 2008 and did not have a material effect on our results of operations, financial position or cash flows.

FASB No. 159. In February 2007, the FASB issued Statement No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities Including an amendment of FASB Statement No. 115* (FASB No. 159), which permits an entity to choose to measure financial instruments and certain other items similar to financial instruments at fair value. All subsequent changes to fair value for the financial instrument would be reported in earnings. FASB No. 159 was effective June 1, 2008. We did not adopt the fair value option permitted under this statement.

FASB No. 157. In September 2006, the FASB issued Statement No. 157, *Fair Value Measurements* (FASB No. 157). This statement defines fair value, establishes a framework for measuring fair value in GAAP and expands disclosures about fair value measurements for financial assets and liabilities, as well as any other assets and liabilities that are carried at fair value on a recurring basis in financial statements. It applies under other accounting pronouncements that require or permit fair value measurements, and does not require any new fair value measurements. The application of FASB No. 157, however, may change current practice within an organization. FASB No. 157 was effective January 1, 2008, applied prospectively. In February 2008, the FASB issued FASB Staff Position No. 157- 2, *Effective Date of FASB Statement No. 157*, which provided a one-year deferral for the implementation of FASB No. 157 for certain non-financial assets and liabilities measured on a nonrecurring basis. Effective June 1, 2008, we adopted the provisions of FASB No. 157 relating to financial assets and liabilities. The adoption of FASB No. 157 with respect to financial assets and liabilities did not have a material financial impact on our consolidated results of operations, financial condition or cash flows. We are

Table of Contents**Index to Financial Statements**

currently evaluating the impact of implementation with respect to non-financial assets and liabilities measured on a nonrecurring basis on our consolidated financial statements, which will be primarily limited to asset impairments including goodwill, intangible assets and other long-lived assets, assets acquired and liabilities assumed in a business combination.

FSP FAS 157-3. In October 2008, the FASB issued FSP FAS 157-3, *Determining the Fair Value of a Financial Asset When the Market for That Asset Is Not Active* (FSP FAS 157-3). This FSP clarifies the application of SFAS No. 157 in a market that is not active and provides an example to illustrate key considerations in determining the fair value of a financial asset when the market for that financial asset is not active. This FSP was effective upon issuance, including prior periods for which financial statements have not been issued. The adoption of FSP FAS 157-3 had no effect on our results of operations, financial position or cash flows.

EITF 06-3. In June 2006, the FASB's Emerging Issues Task Force (the Task Force) issued consensus 06-3, *How Taxes Collected from Customers and Remitted to Governmental Authorities Should Be Presented in the Income Statement (That Is, Gross versus Net Presentation)* (EITF 06-3). In EITF 06-3, the Task Force reached a consensus that the presentation of tax assessed by a governmental authority that is both imposed on and concurrent with a specific revenue-producing transaction between a seller and a customer and disclosed on either a gross basis (included in revenues and costs) or a net basis (excluded from revenues) is an accounting policy decision that should be disclosed. In addition, for any such taxes that are reported on a gross basis, an entity should disclose the amounts of those taxes in interim and annual financial statements for each period for which an income statement is presented if those amounts are significant. EITF 06-3 is effective for reporting periods beginning after December 15, 2006. The adoption of EITF 06-3 on June 1, 2007 did not have a material effect on our results of operations, financial position or cash flows.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We have operations in foreign countries with a functional currency that is not the U.S. Dollar. We are exposed to market risk, primarily related to foreign currency fluctuations related to these operations. A significant part of these assets relate to our operations in Europe and Canada. During the year ended May 31, 2009, the exchange rate with the Euro decreased from \$1.55 per Euro to \$1.41 per Euro, a decrease of 9%. During the same period, the exchange rate with the Canadian Dollar decreased from near parity with the U.S. Dollar to \$0.91 per Canadian Dollar, a decrease of 9%. For foreign subsidiaries whose functional currency is not the U.S. Dollar, such as our operations in Europe and Canada, assets and liabilities are translated at period ending rates of exchange. Translation adjustments for the assets and liability accounts are included as a separate component of accumulated other comprehensive income in stockholders' equity. We had \$9.5 million of foreign currency translation losses in other comprehensive income for the year ended May 31, 2009.

We carry Euro based debt to serve as an economic hedge of our net investment in our European operations as fluctuations in the fair value of the borrowing attributable to the U.S. Dollar/Euro spot rate will offset translation gains or losses attributable to our investment in our European operations. We are exposed to market risk, primarily related to foreign currency fluctuations related to the unhedged portion of our investment in our European operations.

We carry Canadian Dollar based debt on our Canadian Line of Credit. The Canadian Line of Credit supports the operating and investing activities of our Canadian operations. We are exposed to market risk, primarily related to foreign currency fluctuations related to our Canadian Line of Credit and our investment in our Canadian operations.

Table of Contents

Index to Financial Statements

We hold certain floating-rate obligations. We are exposed to market risk primarily related to potential increases in interest rates related to our debt.

From time to time, we have utilized, and expect to utilize, derivative financial instruments with respect to a portion of our interest rate risks to achieve a more predictable cash flow by reducing our exposure to interest rate fluctuations. These transactions generally are interest rate swap agreements and are entered into with major financial institutions. Derivative financial instruments related to our interest rate risks are intended to reduce our exposure to increases in the LIBOR-based interest rates underlying our floating rate Credit Facility. We do not enter into derivative financial instrument transactions for speculative purposes.

At May 31, 2007 we entered into an interest rate swap agreement with a fixed pay rate of 4.97% that has a notional value of \$30.0 million beginning on June 1, 2007 and decreasing to \$16.3 million by March 1, 2010. The interest rate swap agreement is designated as a cash flow hedge, with the changes in fair value, to the extent the swap agreement is effective, recognized in other comprehensive income until the hedged interest expense is recognized in earnings. At May 31, 2009, the notional amount of our swap was \$21.3 million.

ITEM 8. CONSOLIDATED FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

Our financial statements and financial statement schedules, found at the end of this annual report on Form 10-K, and are incorporated herein by reference.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

There have been no disagreements concerning accounting and financial disclosures with our independent accountants during any of the periods presented.

ITEM 9A. CONTROLS AND PROCEDURES

Limitations on Effectiveness of Control. Our management, including the principal executive and financial officers, does not expect that our disclosure controls and procedures or our internal control over financial reporting will prevent or detect all errors and all fraud. A control system, no matter how well designed or operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. The design of our control system reflects the fact that there are resource constraints and the benefits of such controls must be considered relative to their costs. Further, because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control failures and instances of fraud, if any, have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty and that breakdowns can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the controls. The design of any system of controls is also based in part on certain assumptions about the likelihood of future events and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Projections of management's assessments of the current effectiveness of our disclosure controls and procedures and its internal control over financial reporting are subject to risks. However, our disclosure controls and procedures are designed to provide reasonable assurance that the objectives of our control system are met.

Evaluation of Disclosure Controls and Procedures. As of the end of the period covered by this report, an evaluation was carried out under the supervision and with the participation of our management, including our Chief Executive Officer (CEO) and our Chief Financial Officer (CFO), of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act). This evaluation included consideration of the various processes carried out under the direction of our disclosure committee in an effort to ensure that information required to be disclosed in our SEC reports is

Table of Contents

Index to Financial Statements

recorded, processed, summarized and reported within the time periods specified by the SEC. This evaluation also considered the work completed relating to our compliance with Section 404 of the Sarbanes-Oxley Act of 2002, which is further described below.

Based on this evaluation, our CEO and CFO concluded that, as of May 31, 2009, our disclosure controls and procedures were operating effectively to ensure that the information required to be disclosed in our SEC reports is recorded, processed, summarized and reported within the requisite time periods and that such information is accumulated and communicated to management, including our CEO and CFO, as appropriate, to allow timely decisions regarding required disclosure.

Changes in Internal Control Over Financial Reporting. There were no changes in our internal control over financial reporting (as defined in Rules 13a-13(f) and 15d-15(f) of the Exchange Act) that have materially affected or are reasonably likely to materially affect our internal control over financial reporting during the fourth quarter of fiscal 2009.

ITEM 9B. OTHER INFORMATION

None

Table of Contents

Index to Financial Statements

Management's Annual Report on Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Exchange Act Rule 13a-15(f). Our internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of our consolidated financial statements for external purposes in accordance with U.S. generally accepted accounting principles.

Internal control over financial reporting cannot provide absolute assurance of achieving financial objectives because of its inherent limitations. Internal control over financial reporting is a process that involves human diligence and compliance and is subject to lapses in judgment and breakdowns resulting from human failures. Internal control over financial reporting can also be circumvented by collusion or improper management override. Because of such limitations, there is a risk that material misstatements may not be prevented or detected on a timely basis by internal control over financial reporting. However, these inherent limitations are known features of the financial reporting process. Therefore, it is possible to design into the process safeguards to reduce, though not eliminate, this risk.

We have used the framework set forth in the report entitled *Internal Control Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission to evaluate the effectiveness of our internal control over financial reporting. We have concluded that our internal control over financial reporting was effective as of May 31, 2009.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders

Team, Inc. and Subsidiaries:

We have audited Team, Inc. and Subsidiaries' internal control over financial reporting as of May 31, 2009, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Team, Inc. and Subsidiaries management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Annual Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Team, Inc. and Subsidiaries maintained, in all material respects, effective internal control over financial reporting as of May 31, 2009, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Team, Inc. and Subsidiaries as of May 31, 2009 and 2008, and the related consolidated statements of operations, comprehensive income, stockholders' equity, and cash flows for each of the years in the three-year period ended May 31, 2009, and our report dated August 11, 2009 expressed an unqualified opinion on those consolidated financial statements.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders

Team, Inc. and Subsidiaries:

We have audited the accompanying consolidated balance sheets of Team, Inc. and Subsidiaries as of May 31, 2009 and 2008, and the related consolidated statements of operations, comprehensive income, stockholders' equity, and cash flows for each of the years in the three-year period ended May 31, 2009. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Team, Inc. and Subsidiaries as of May 31, 2009 and 2008, and the results of their operations and their cash flows for each of the years in the three-year period ended May 31, 2009, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Team, Inc. and Subsidiaries' internal control over financial reporting as of May 31, 2009, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated August 11, 2009 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.
