PROPOSED BUSINESS COMBINATION YOUR VOTE IS VERY IMPORTANT

Dear AsiaInfo Holdings, Inc. Stockholder:

On December 6, 2009, AsiaInfo Holdings, Inc. announced that it had negotiated and executed a definitive Business Combination Agreement, or the Combination Agreement, to combine our business with the business of Linkage Technologies International Holdings Limited, or Linkage Cayman, through our acquisition of 100% of the outstanding share capital of Linkage Cayman's wholly-owned subsidiary, Linkage Technologies Investment Limited, or Linkage Technologies. Linkage Technologies operates in China through its direct and indirect subsidiaries. Like AsiaInfo, Linkage Technologies is a leading provider of software solutions and IT services for the telecom industry in China. In this letter and in the enclosed Proxy Statement, we refer to our acquisition of Linkage Technologies and its subsidiaries from Linkage Cayman as the Combination. We believe the proposed Combination will allow us to leverage both AsiaInfo's and Linkage Technologies' leading market positions and complementary customer bases to provide a robust, full-service offering to telecom operators in China.

In the proposed Combination, Linkage Cayman will receive US\$60 million, or the Cash Consideration, and 26,832,731 shares of common stock of AsiaInfo, or the Stock Consideration (and together with the Cash Consideration, the Consideration), and will distribute the Consideration to its existing shareholders, which shareholders we refer to as the Legacy Linkage Shareholders. Upon completion of the Combination, AsiaInfo's stockholders will continue to own their existing shares. Upon distribution of the Consideration to the Legacy Linkage Shareholders, the Legacy Linkage Shareholders will own shares representing approximately 35.8% of the outstanding common stock of the combined company, based on the fully-diluted number of shares of AsiaInfo common stock outstanding on December 6, 2009. The value of the Share Consideration to be issued in exchange for 100% of the outstanding share capital of Linkage Technologies will fluctuate with the market price of AsiaInfo's common stock.

Your vote is very important. The Combination cannot be completed unless our stockholders approve the payment of the Consideration and the amendment to our certificate of incorporation to effect the change of our corporate name to AsiaInfo-Linkage, Inc. We are holding a special meeting of our stockholders to vote on the proposals necessary to complete the Combination. Information about this special meeting, the Combination and the other business to be considered by the stockholders is contained in this Proxy Statement. We urge you to read this Proxy Statement carefully. **You should carefully consider the Risk Factors beginning on page 23.**

Whether or not you plan to attend the special meeting of stockholders, please submit your proxy as soon as possible to make sure that your shares are represented at the special meeting.

Our board of directors recommends that you vote FOR the proposal to approve the payment of the Consideration and FOR the proposal to amend to our certificate of incorporation to effect the change of our corporate name to AsiaInfo-Linkage, Inc.

Edgar Filing: ASIAINFO HOLDINGS INC - Form DEFM14A

The AsiaInfo board of directors also considered a number of factors and risks concerning the Combination, which are described in greater detail on pages 23 to 28.

Matters to be Considered at the Special Meeting

The AsiaInfo stockholders will be asked to vote on a proposal, which we refer to as the Consideration Proposal, to approve the payment of the Cash Consideration, and the issuance of the Stock Consideration, to Linkage Cayman, which Consideration will be distributed to the Legacy Linkage Shareholders as consideration for AsiaInfo's purchase of 100% of the outstanding share capital of Linkage Technologies pursuant to the Combination Agreement.

Table of Contents

The AsiaInfo stockholders will also be asked to vote on a proposal, which we refer to as the Name Change Proposal, to approve the change of the name of AsiaInfo following the completion of the Combination to AsiaInfo-Linkage, Inc.

Finally, the AsiaInfo stockholders will be asked to vote to approve the proposal, which we refer to as the Adjournment Proposal, to adjourn or postpone the special meeting, if necessary or appropriate, to solicit additional proxies in the event there are not sufficient votes in favor of the adoption of the Consideration Proposal or the Name Change Proposal at the time of the special meeting. See *Proposal No. 1 The Consideration Proposal* beginning on page 123, *Proposal No. 2 The Name Change* beginning on page 124 and *Proposal No. 3 The Adjournment Proposal* beginning on page 125.

See *Proposal No. 1 The Consideration Proposal* beginning on page 123, *Proposal No. 2 The Name Change* beginning on page 124 and *Proposal No. 3 The Adjournment Proposal* beginning on page 125.

Linkage Cayman's Reasons for the Combination

In reaching a conclusion to approve the Combination, the Linkage Cayman board of directors consulted with its management, as well as financial and legal advisors. The Linkage Cayman board of directors considered a number of factors, including, without limitation, the following:

the strategic fit between the companies, including the companies' product portfolios and the increased operational scale and scope that the combined company will provide, which may result in a more diversified revenue base and enable the combined company to better meet its customers' needs;

that the shareholders of Linkage Cayman will receive a substantial cash payment, while at the same time retaining an equity stake in the combined company, which would provide the shareholders of Linkage Cayman the opportunity, if they so choose, to participate in the future financial performance of the combined company;

the fact that following the completion of the Combination the board of directors of the combined company will include two current non-independent Linkage Cayman directors, which the Linkage Cayman board of directors believed will provide the AsiaInfo board of directors with a greater level of knowledge regarding Linkage Technologies' operations and thereby provide a greater level of stability regarding those operations as they become part of AsiaInfo's business;

the review by the Linkage Cayman board of directors with its legal and financial advisors of the structure of the Combination and the financial and other terms of the Combination Agreement, including the parties' representations, warranties and covenants, the conditions to their respective obligations and the termination provisions, as well as the Linkage Cayman board of directors' evaluation of the likely time period necessary to close the Combination; and

Table of Contents

the potential synergies expected to be derived from the Combination of Linkage Cayman's and AsiaInfo's businesses, including elimination of duplicative corporate costs, decreased research and development costs, and tax benefits.

The Linkage Cayman board of directors also considered a number of factors and risks concerning the Combination. See *The Combination Linkage Cayman's Reasons for the Combination* beginning on page 50.

Opinion of AsiaInfo's Financial Advisor

In connection with the Combination, Merrill Lynch (Asia Pacific) Limited, or BofA Merrill Lynch, AsiaInfo's financial advisor, delivered to AsiaInfo's board of directors a written opinion, dated December 4, 2009, as to the fairness, from a financial point of view and as of the date of the opinion, of the Consideration to be paid in the Combination by AsiaInfo. BofA Merrill Lynch provided its opinion to AsiaInfo's board of directors for the benefit and use of AsiaInfo's board of directors in connection with and for purposes of its evaluation of the Consideration, from a financial point of view. BofA Merrill Lynch's opinion is limited to the fairness, from a financial point of view, to AsiaInfo of the Consideration to be paid in the Combination and does not address any other aspect of the Combination and does not constitute a recommendation as to how any stockholder should vote or act in connection with the Combination. See *The Combination Opinion of AsiaInfo's Financial Advisor* beginning on page 52.

Interests of AsiaInfo's Directors, Executive Officers and Certain Significant Stockholders in the Combination

You should be aware that some of AsiaInfo's directors and executive officers have interests in the Combination that are different from, or are in addition to, the interests of AsiaInfo stockholders generally.

The parties to the Combination Agreement believe that no government regulatory approvals are necessary to complete the Combination. See *The Combination Regulatory Approval Required for the Combination* beginning on page 62.

Conditions to Completion of the Combination

As more fully described in this Proxy Statement and the Combination Agreement, the completion of the Combination depends on a number of mutual conditions being satisfied or waived, including:

the adoption by the AsiaInfo stockholders of the Consideration Proposal and the Name Change Proposal;

the absence of any law or order that would prohibit the Combination or otherwise make the consummation of the Combination illegal; and

the receipt of any required regulatory approvals.

Each of AsiaInfo's and Linkage Cayman's obligations to complete the Combination is also separately subject to the satisfaction or waiver of a number of conditions, including:

the other party's representations and warranties in the Combination Agreement (including, in the case of Linkage Cayman, the representations and warranties of certain key Linkage Cayman shareholders) being true and correct as of the closing of the Combination, without any qualifications as to materiality or material adverse effects, except where the failure of such representations and warranties to be true or correct, individually or in the aggregate, has not had a material adverse effect;

material performance of and compliance by the other party of its agreements and covenants in the Combination Agreement on or prior to the closing of the Combination; and

with respect to each party's obligations, the absence of a material adverse effect of the other party.

AsiaInfo's obligations to complete the Combination are also subject to the satisfaction or waiver of a number of conditions, including:

certain agreements with respect to the voting of and sale of AsiaInfo shares held by Libin Sun will be in full force and effect at the closing of the Combination;

Table of Contents

other than those contemplated in the stockholders' agreement between Libin Sun, Edward Tian, AsiaInfo and Linkage Cayman, there shall be no voting trusts, proxies or other agreements between Linkage Cayman or any of its subsidiaries, or to Linkage Cayman's knowledge, any of the Legacy Linkage Shareholders, with respect to the issuance, holding, acquisition, voting or disposition of any AsiaInfo common stock;

at least 70% of the Linkage Cayman management employees, and at least 70% of the Linkage Cayman employees whose annual salary or other remuneration is at least US\$30,000, shall remain employees of Linkage Technologies, in each case in substantially similar roles as such employees held prior to the execution of the Combination Agreement; and

Linkage Cayman shall have delivered to AsiaInfo reasonable proof that certain fees and expenses related to the Combination have been paid in full by Linkage Cayman and its subsidiaries, and that certain fees and expenses related to Linkage Cayman's proposed initial public offering have been paid in full by Legacy Linkage Shareholders.

The obligations of Linkage Cayman and certain of its key shareholders to complete the Combination are also subject to the satisfaction or waiver of a number of conditions, including:

certain agreements with respect to the voting of and sale of AsiaInfo shares held by Edward Tian will be in full force and effect at the closing of the Combination;

AsiaInfo shall have offered employment agreements to each of Libin Sun, Guoxiang Liu and Xiwei Huang effective upon the closing of the Combination;

AsiaInfo shall have executed and delivered a registration rights agreement to LT International Limited or Libin Sun;

the AsiaInfo common stock to be issued to Linkage Cayman as Stock Consideration shall have been authorized for listing on the NASDAQ Global Market;

one current member of the AsiaInfo board of directors shall have resigned; and

each of Libin Sun, Xiwei Huang and an additional independent director designee of Linkage Cayman shall have been duly appointed to the AsiaInfo board of directors.

Termination of the Combination Agreement

AsiaInfo and Linkage Cayman can agree at any time to terminate the Combination Agreement without completing the Combination, even if the AsiaInfo stockholders have approved the Consideration Proposal. Also, either of AsiaInfo or Linkage Cayman can terminate the Combination Agreement if:

a governmental authority shall have issued a final and non-appealable order that prohibits the consummation of the Combination, or a substantially similar transaction, provided that the party seeking termination has complied in all material respects with its obligations under the Combination Agreement;

the AsiaInfo stockholders fail to approve the Consideration Proposal or the Name Change Proposal at the special meeting; or

the Combination shall not have been consummated by June 4, 2010, which time period will be automatically extended until October 4, 2010 if necessary to complete any antitrust review by any governmental authority.

If Linkage Cayman or certain key Linkage Cayman shareholders materially breach the representations and warranties contained in the Combination Agreement, AsiaInfo shall have the right to terminate the Combination Agreement, subject to the right of the breaching party to cure, if curable, the breach within 30 days of written notice of the breach, and provided AsiaInfo is not then in material breach of the Combination Agreement. Conversely, if AsiaInfo materially breaches the representations and warranties contained in the Combination Agreement, Linkage Cayman or the shareholders' agent shall have the right to terminate the Combination Agreement, subject to the right of the breaching party to cure, if curable, the breach within 30 days of written notice of the breach, and provided neither Linkage Cayman nor certain key Linkage Cayman shareholders are then in material breach of the Combination Agreement. Additionally, Linkage Cayman may terminate the Combination Agreement if the AsiaInfo board of directors, or any committee thereof, shall withdraw, qualify or modify in any manner adverse to Linkage Cayman or certain of its key shareholders the recommendation to the AsiaInfo stockholders that they vote in favor of the Consideration Proposal and the Name Change Proposal. See *The Combination Agreement Termination of the Combination Agreement* beginning on page 72.

Termination Fees

The Combination Agreement contains certain termination rights for both AsiaInfo and Linkage Cayman. Upon a material and uncured breach of representations and warranties or covenants by Linkage Cayman and certain Linkage Cayman shareholders on the one hand, or AsiaInfo on the other hand, the non-breaching party would be entitled to terminate the Combination Agreement and receive a termination fee of \$17.6 million from the other party. In addition, in the event that the AsiaInfo board of directors changes its recommendation that stockholders vote in favor of the proposals to be considered at the special meeting, Linkage Cayman would be entitled to terminate the Combination Agreement and receive a termination fee of \$17.6 million from AsiaInfo, and in the event that the stockholders of AsiaInfo do not vote in favor of the Consideration Proposal and the Name Change Proposal, Linkage Cayman would be entitled to terminate the Combination Agreement and receive a termination fee of \$10.0 million from AsiaInfo. See *The Combination Agreement Termination Fees* beginning on page 73.

Timing of the Combination	AsiaInfo expects to complete the Combination after all of the conditions to the Combination in the Combination Agreement are satisfied or waived, including after receipt of stockholder approval at the AsiaInfo special meeting and the receipt of any required regulatory approvals. **QUESTIONS AND ANSWERS ABOUT THE
SPECIAL MEETING AND THE COMBINATION**

The following questions and answers are intended to address commonly asked questions regarding the special meeting of AsiaInfo stockholders and the Combination. These may not address all questions that may be important to you as a stockholder. We urge you to read carefully the more detailed information contained elsewhere in this Proxy Statement, the annexes to this Proxy Statement and the documents we refer to in this Proxy Statement.

Q: Why am I receiving this Proxy Statement?

A: Our board of directors is furnishing this Proxy Statement in connection with the solicitation of proxies to be voted at a special meeting of stockholders, or at any adjournments or postponements of the special meeting.

Q: What am I being asked to vote on?

A: You are being asked to vote to approve the payment of the Cash Consideration and the issuance of the Stock Consideration to Linkage Cayman, which Consideration will be distributed to the Legacy Linkage Shareholders as consideration for AsiaInfo's purchase of 100% of the outstanding share capital of Linkage Technologies pursuant to Combination Agreement by and among AsiaInfo, Linkage Cayman, certain shareholders of Linkage Cayman, and Libin Sun as agent for the shareholders of Linkage Cayman, dated December 4, 2009. See *Proposal No. 1 The Combination Proposal* beginning on page 123.

In addition, you are being asked to approve the change of the name of AsiaInfo following the completion of the Combination to AsiaInfo-Linkage, Inc. See *Proposal No. 2 The Name Change Proposal* beginning on page 124.

Finally, you are being asked to grant our management discretionary authority to adjourn or postpone the special meeting. If, for example, we do not receive proxies from stockholders holding a sufficient number of shares to adopt the Consideration Proposal or the Name Change Proposal, we could use the additional time to solicit proxies in favor of adoption of such proposals. See *Proposal No. 3 The Adjournment Proposal* beginning on page 125.

Q: Why is AsiaInfo proposing the Combination?

A: The AsiaInfo board of directors, following consultation with its management, as well as its financial and legal advisors, has determined that the Combination and the Combination Agreement are advisable and in the best interests of AsiaInfo and its stockholders. See *The Combination AsiaInfo's Reason for the Combination and Board Recommendation* beginning on page 49.

Q: What effects will the Combination have on our company?

A: Upon completion of the Combination, Linkage Technologies will become our wholly-owned subsidiary. In partial consideration for the purchase of Linkage Technologies, Linkage Cayman will receive shares of AsiaInfo representing approximately 35.8% of the fully-diluted share capital of the combined company and will distribute these shares to the Legacy Linkage Shareholders.

Q: What happens if the Combination is terminated?

- A: If the Consideration Proposal is not adopted by our stockholders, Linkage Cayman would be entitled to terminate the Combination Agreement and receive a termination fee of \$10.0 million from AsiaInfo. Additionally, if our board of directors changes its recommendation that our stockholders vote in favor of the Combination, Linkage Cayman will be entitled to terminate the Combination Agreement and receive a termination fee of \$17.6 million from AsiaInfo.

Table of Contents

The Combination Agreement also provides that upon a material and uncured breach of representations and warranties or covenants by Linkage Cayman and certain Linkage Cayman shareholders on the one hand, or AsiaInfo on the other hand, the non-breaching party would be entitled to terminate the Combination Agreement and receive a termination fee of \$17.6 million. See *The Combination Agreement Termination Fees* beginning on page 73.

Q: Who is entitled to vote at the special meeting?

A: Only stockholders of record as of the close of business on March 11, 2010 are entitled to receive notice of the special meeting and to vote at the special meeting, or at any adjournments or postponements thereof, the shares of our common stock that they held as of the record date.

Q: May I vote in person?

A: Yes. If your shares are registered in your name, you may attend the special meeting and vote your shares in person, rather than signing and returning your proxy card or voting via the Internet or telephone. If your shares are held in street name and you wish to attend and vote in person at the special meeting, then you must obtain a legal proxy issued in your name from the broker, bank or other nominee that holds your shares of record. Even if you plan to attend the special meeting in person, we urge you to complete, sign, date and return the enclosed proxy or vote via the Internet or telephone to ensure that your shares will be represented at the special meeting.

Q: May I vote via the Internet or telephone?

A: If your shares are registered in your name, you may vote by returning a signed proxy card or voting in person at the special meeting. Additionally, you may submit a proxy authorizing the voting of your shares over the Internet at <http://www.eproxy.com/asia> or telephonically by calling the toll-free number (in the United States only) 1-866-540-5760. Proxies submitted over the Internet or by telephone must be received by 11:59 p.m. (Eastern time) on April 28, 2010. You must have the enclosed proxy card available, and follow the instructions on the proxy card, in order to submit a proxy via the Internet or telephone.

If your shares are held in street name through a broker, bank or other nominee, you may vote by completing and returning the voting form provided by your broker, bank or other nominee, or via the Internet or telephone through your broker, bank or other nominee if such a service is provided. To vote via the Internet or telephone through your broker, bank or other nominee, you should follow the instructions on the voting form provided by your broker, bank or other nominee. You cannot vote shares held in street name by returning a proxy card directly to our company or by voting in person at the special meeting. If you hold your shares in street name and wish to vote in person at the special meeting, then you must obtain a legal proxy issued in your name from the broker, bank or other nominee that holds your shares of record.

Q: What happens if I do not return my proxy card, vote via the Internet or telephone or attend the special meeting and vote in person?

A: The adoption of each of the Consideration Proposal, the Name Change Proposal and the Adjournment Proposal requires the affirmative vote of the holders of a majority of the outstanding shares of our common stock present (in person or by proxy) at the special meeting and constituting a quorum for the purpose of voting on such matters. If you do not return your proxy card, vote via the Internet or telephone or attend the special meeting and vote in person, your shares will not be counted for purposes of constituting a quorum or for the purposes of voting on such matters.

Q: May I change my vote after I have mailed my signed proxy card?

A: Yes. You may change your vote at any time before your proxy is voted at the special meeting. You can do this in one of three ways:

You can deliver a written notice to AsiaInfo's Legal Department, at our principal executive offices, bearing a date later than the proxy you delivered to us stating that you would like to revoke your proxy, provided the notice is received before the vote is taken at the

special meeting.

Table of Contents

You can complete, execute and deliver to AsiaInfo's Legal Department a later-dated proxy for the same shares. If you originally submitted via the Internet or telephone the proxy you are seeking to revoke, you may submit this later-dated new proxy using the same method of transmission (Internet or telephone) as the proxy being revoked, provided the new proxy is received by 11:59 p.m. (Eastern time in the U.S.) on April 28, 2010.

You can attend the meeting and vote in person. Your attendance at the special meeting alone will not revoke your proxy. Any written notice of revocation or subsequent proxy should be delivered to AsiaInfo's Legal Department, at our principal executive offices, at or before the taking of the vote at the special meeting.

If you have instructed a broker, bank or other nominee to vote your shares, you must follow directions received from your broker, bank or other nominee to change those instructions.

Q: If my broker holds my shares in street name, will my broker vote my shares for me?

A: Your broker will not be able to vote your shares without instructions from you. You should instruct your broker to vote your shares following the procedure provided by your broker. Without instructions, your shares will not be voted.

Q: What should I do if I receive more than one set of voting materials?

A: You may receive more than one set of voting materials, including multiple copies of this Proxy Statement and multiple proxy cards or voting instruction cards. For example, if you hold your shares in more than one brokerage account, you will receive a separate voting instruction card for each brokerage account in which you hold shares. If you are a stockholder of record and your shares are registered in more than one name, you will receive more than one proxy card. Please complete, sign, date and return (or vote via the Internet or telephone with respect to) each proxy card and voting instruction card that you receive.

Q: What happens if I sell my shares of common stock before the special meeting?

A: The record date for the special meeting is earlier than the date of the special meeting and the date the Combination is expected to be completed. If you transfer your shares of our common stock after the record date but before the special meeting, you will retain your right to vote at the special meeting.

Q: What regulatory approvals and filings are needed to complete the Combination?

A: The parties to the Combination Agreement believe that no government regulatory approvals are necessary to complete the Combination. See *The Combination Regulatory Approvals Required for the Combination* beginning on page 62.

Q: When do you expect the Combination to be completed?

A: We expect to complete the Combination after all of the conditions to the Combination in the Combination Agreement are satisfied or waived, and currently expect to complete the Combination early in the second calendar quarter of 2010.

Q: Do I have appraisal rights?

A: The holders of AsiaInfo common stock will not be entitled to exercise any appraisal rights in connection with the Combination.

Table of Contents

Q: Should I send in my stock certificates?

A: No. AsiaInfo stockholders will not be exchanging their stock certificates in connection with the Combination. Accordingly, AsiaInfo stockholders holding stock certificates should keep their stock certificates both now and after the Combination is completed.

Q: Who can help answer my questions?

A: If you have questions about the Combination, including the procedures for voting your shares, you should contact:

SUMMARY UNAUDITED PRO FORMA CONDENSED COMBINED FINANCIAL DATA

The following summary unaudited pro forma condensed combined financial data is designed to show how the Combination might have affected certain historical financial statement information of AsiaInfo if the Combination had been completed at an earlier time and was prepared based on the historical consolidated financial statements of AsiaInfo and Linkage Technologies. The following should be read in connection with the *Unaudited Pro Forma Condensed Combined Financial Information* beginning on page 117, the historical consolidated financial statements of Linkage Technologies included elsewhere in this Proxy Statement, and the historical consolidated financial statements of AsiaInfo incorporated by reference into this Proxy Statement.

The unaudited pro forma balance sheet data at September 30, 2009 combines the historical consolidated balance sheets of AsiaInfo and Linkage Technologies as of September 30, 2009, giving effect to the Combination as if it had been completed on September 30, 2009. The unaudited pro forma statements of operations data for the year ended December 31, 2008 and the nine months ended September 30, 2009 combines the historical consolidated statements of operations of AsiaInfo and Linkage Technologies for such periods, giving effect to the Combination as if it had been completed on January 1, 2008.

The unaudited pro forma balance sheet data does not allocate the Consideration to be paid by AsiaInfo to complete the Combination to Linkage Technologies assets and liabilities based upon their estimated fair values as of the date of completion of the Combination, because such an allocation depends upon certain valuations and other studies that have not progressed to a stage where there is sufficient information to make meaningful estimations. Additionally, a final determination of the fair value of Linkage Technologies' assets and liabilities, which cannot be made prior to the completion of the Combination, will be based upon their actual fair values as of the date of completion of the Combination. AsiaInfo expects that a completed purchase price allocation would likely result in recognizing intangible assets in addition to those reflected in the historical consolidated balance sheets of Linkage Technologies, the amortization of which would result in expense in future periods after the consummation of the Combination. AsiaInfo also expects that a completed purchase price allocation would likely increase the carrying value of certain recorded assets and liabilities of Linkage Technologies from their historical book value to their fair value, which would reduce net income in periods following the Combination from those reflected in the historical financial statements of Linkage Technologies.

In addition to the potential adjustments discussed above, AsiaInfo believes there are certain differences in the accounting policies applied by AsiaInfo and Linkage Technologies, including differences in the application of the percentage of completion method to account for certain contracts for software development, the recognition of hardware revenue in bundled products, whether to record certain revenues on a gross or net basis, whether to defer pre-contract costs, and how PRC business tax is recorded. The unaudited pro forma condensed combined financial information makes no adjustments to reflect the effect of such differences in accounting policies, which would require an extensive review of individual Linkage Technologies contracts that is impracticable to complete without unreasonable effort and expense prior to completing the Combination.

RISK FACTORS

In addition to the other information contained or incorporated by reference into this Proxy Statement, you should carefully consider the following risk factors in deciding how to vote on the proposals to be considered at the AsiaInfo special meeting. In addition, you should read and consider the risks associated with the business of AsiaInfo because these risks will also relate to AsiaInfo following completion of the Combination. Certain of these risks can be found in the documents incorporated by reference into this Proxy Statement.

Risks Related to the Combination

The issuance of shares of AsiaInfo common stock to Linkage Cayman in the Combination will substantially dilute the interest in AsiaInfo held by AsiaInfo stockholders prior to the Combination.

If the Combination is completed, AsiaInfo will issue 26,832,731 shares of AsiaInfo common stock in the Combination. Based on the number of shares of AsiaInfo common stock outstanding on December 6, 2009, Linkage Cayman and the Legacy Linkage Shareholders will own approximately 35.8%, on a fully-diluted basis, of the outstanding common stock of the combined company following the closing of the Combination. The issuance of shares of AsiaInfo common stock to Linkage Cayman in connection with the Combination will cause a significant reduction in the relative percentage interest of current AsiaInfo stockholders in the combined company's earnings, voting, liquidation value and book and market value.

The principal stockholders, officers and directors of the combined company will own a large percentage of the combined company's voting stock and could exert significant influence over matters requiring stockholder approval.

It is anticipated that following the closing of the Combination, certain of the combined company's officers and directors, including Libin Sun, Edward Tian, James Ding and Steve Zhang, will together beneficially own more than 30% of the combined company's common stock. Of that amount, it is anticipated that Mr. Sun will beneficially own 16.6% and Mr. Tian will beneficially own 9.8% of the combined company's common stock. Accordingly, these stockholders will be able to exert significant influence over matters requiring approval by the combined company's stockholders, including the election of directors and the approval of mergers or other business combinations. This concentration could have the effect of delaying or preventing a change in control of the combined company.

Uncertainty about the completion of the Combination and diversion of management attention before the completion of the Combination could harm AsiaInfo or Linkage Technologies, whether or not the Combination is completed.

In response to the announcement of the Combination, existing or prospective customers of AsiaInfo or Linkage Technologies may delay or defer their purchasing or other decisions concerning AsiaInfo or Linkage Technologies, or they may seek to change their existing business relationship. In addition, as a result of the announcement, current and prospective employees could experience uncertainty about their future with the combined company, and either AsiaInfo or Linkage Technologies could lose key employees as a result. In addition to retention, these uncertainties may also impair each company's ability to recruit or motivate key personnel. Completing the Combination will also require a significant amount of time and attention from management. The diversion of management attention away from ongoing operations could adversely affect ongoing operations and business relationships.

Failure to complete the Combination could adversely affect AsiaInfo's stock price and its future business and financial results.

Completion of the Combination is conditioned upon, among other things, the receipt of any required regulatory approvals and approval of AsiaInfo's stockholders of the Consideration Proposal and the Name Change Proposal. The parties may not receive the necessary approvals or satisfy the other conditions to the

Table of Contents

completion of the Combination. Failure to complete the proposed Combination would prevent AsiaInfo from realizing the anticipated benefits of the Combination. AsiaInfo will also remain liable for significant transaction costs, including legal, accounting and financial advisory fees. In addition, the market price of AsiaInfo's common stock may reflect various market assumptions as to whether the Combination will occur. Consequently, the completion of, or failure to complete, the Combination could result in a significant change in the market price of AsiaInfo's common stock.

Any delay in completion of the Combination may significantly reduce the benefits expected to be obtained from the Combination.

In addition to any required regulatory approvals, the Combination is subject to a number of other conditions beyond the control of AsiaInfo and Linkage Cayman that may prevent, delay or otherwise materially adversely affect completion of the Combination. These conditions may not be satisfied on a timely basis, if at all. Further, obtaining any required clearances or approvals could delay the completion of the Combination for a significant period of time or prevent it from occurring. Any delay in completing the Combination may significantly reduce the benefits that AsiaInfo expects to achieve if it successfully completes the Combination with Linkage Technologies within the expected timeframe and integrates the businesses of AsiaInfo and Linkage Technologies.

Integrating the combined company will divert management's attention and resources, and the anticipated benefits of the Combination, including anticipated cost savings, may not be realized fully or at all or may take longer to realize than expected.

The Combination involves the integration of two companies that have previously operated independently with principal offices in two distinct locations. AsiaInfo will be required to devote significant management attention and resources to integrating the two companies. In the process of integration, the combined company may face difficulties in retaining customers and personnel. If AsiaInfo fails to successfully integrate Linkage Technologies, its revenue growth and business could be negatively affected.

Moreover, even if AsiaInfo is able to integrate Linkage Technologies' business operations successfully, this integration may not result in the realization of the full benefits of synergies, cost savings, innovation and operational efficiencies that may be possible from this integration. Moreover, these benefits may not be achieved within a reasonable period of time, if at all.

Additionally, as a condition to their approval of the Combination, regulatory agencies may impose requirements, limitations or costs or require divestitures or place restrictions on the conduct of the combined company's business. If AsiaInfo and Linkage Cayman were to agree to these requirements, limitations, costs, divestitures or restrictions, the ability to realize the anticipated benefits of the Combination may be impaired.

If AsiaInfo is unable to maintain an effective system of internal controls in light of Linkage Technologies' material weaknesses in internal controls, AsiaInfo may be unable to accurately report its financial results or prevent fraud.

Linkage Technologies has been a private company with limited numbers of accounting personnel and other resources with which to address internal controls and procedures. In connection with the audit of Linkage Technologies' consolidated financial statements for 2006, 2007 and 2008, Linkage Technologies' auditors, an independent registered public accounting firm, identified and communicated to Linkage Technologies a number of material weaknesses for the periods and a number of significant deficiencies in its internal controls over financial reporting as defined in the standards established by the U.S. Public Company Accounting Oversight Board, or PCAOB, that could result in more than a remote likelihood that a material misstatement of its consolidated financial statement that is more than inconsequential will not be prevented or detected. The material weaknesses identified by Linkage Technologies' auditors related to (i) insufficient resources with an appropriate level of accounting knowledge, experience and training in the application of SEC and US GAAP reporting requirements and the rules and regulations promulgated by the PCAOB, (ii) inadequate documentation of formal

Table of Contents

accounting policies and procedures, including processes to ensure that all relevant agreements are provided on a timely basis to those responsible for financial reporting and maintenance of the books and records, and (iii) insufficient corporate governance procedures, including the lack of internal audit function, audit committee and independent directors. Neither Linkage Technologies nor its independent registered public accounting firm undertook a comprehensive assessment for purposes of identifying and reporting material weakness and other control deficiencies in the internal control over financial reporting of Linkage Technologies.

AsiaInfo has not assessed the impact that Linkage Technologies' material weaknesses will have on the combined company's disclosure controls and procedures or internal control over financial reporting. The process of integrating the accounting systems, records and procedures of Linkage Technologies and designing and implementing an effective financial reporting system for the combined company may entail significant time and expense and may not be effective in preventing material weaknesses or significant deficiencies in internal control over financial reporting. If the combined company or its independent registered public accounting firm identify a material weakness in the combined company's internal controls in the future, the combined company may experience a loss of public confidence, which could have an adverse effect on its business and stock price.

Approvals may be required in connection with the Combination under certain PRC M&A regulations, and, if required, AsiaInfo may not be able to obtain such approvals.

On August 8, 2006, six PRC regulatory agencies, including the PRC Ministry of Commerce, or MOFCOM, the State Assets Supervision and Administration Commission, or SASAC, the State Administration for Taxation, the State Administration for Industry and Commerce, the China Securities Regulatory Commission, or CSRC, and the State Administration of Foreign Exchange, or SAFE, jointly adopted the Regulations on Mergers and Acquisitions of Domestic Enterprises by Foreign Investors, or the M&A Rules, which became effective on September 8, 2006 and were subsequently amended on June 22, 2009 by MOFCOM. Among other things, the M&A Rules require offshore special purpose vehicles, or SPVs, that are controlled by PRC companies or residents and that have been formed for the purpose of seeking a public listing on an overseas stock exchange through acquisitions of PRC domestic companies or assets to obtain CSRC approval prior to publicly listing their securities on an overseas stock exchange. On September 21, 2006, the CSRC published a notice on its website specifying the documents and materials that SPVs are required to submit when seeking CSRC approval for their listings outside of China. To date, the CSRC has not issued any definitive rule or interpretation concerning whether the transactions contemplated by this Proxy Statement are subject to this new procedure.

In the opinion of Linkage Technologies' PRC counsel, Global Law Office, and AsiaInfo's PRC counsel, Han Kun Law Office, based on their informal advice from MOFCOM, unless there are new PRC laws and regulations or clear requirements from the CSRC in any form providing otherwise, CSRC approval is not required for the Combination. In addition, according to Global Law Office and Han Kun Law Office, the acquisition by foreign investors of PRC domestic companies under the M&A Rules only refer to the acquisition by foreign companies of equity interests or assets of domestic PRC companies that are defined as non-foreign-invested enterprises, whereas the transactions involved in the Combination are between offshore companies; therefore, the Combination does not require approval by MOFCOM or any local commerce authority under the M&A Rules. Accordingly, the parties to the Combination Agreement have not taken steps to obtain approval from MOFCOM or any local commerce authority, the CSRC or any other regulatory agency in the PRC, for the Combination. However, the interpretation and application of the M&A Rules remain unclear, and PRC government authorities have the sole discretion to determine whether the Combination is subject to the approval of MOFCOM, the CSRC or other PRC regulatory agencies. If PRC government authorities subsequently determine that MOFCOM, the CSRC or other regulatory agency approval is required for the Combination, or if implementing rules or guidance are issued prior to the completion of the Combination which consequently conclude approval is required for the Combination, such approval may not be obtained on a timely basis, if at all. Additionally, if governmental approval is required for the Combination, AsiaInfo's and Linkage Technologies' failure to obtain or delay in obtaining approval for the Combination could subject AsiaInfo and/or Linkage Technologies to sanctions imposed by PRC regulatory agencies, which could include fines and penalties on AsiaInfo's and/or Linkage Technologies' operations in China, preventing the completion of the Combination,

Table of Contents

requiring that the Combination be unwound, and other forms of sanctions that may materially and adversely affect the business, results of operations and financial condition of AsiaInfo and/or Linkage Technologies.

The M&A Rules also established additional regulatory procedures and requirements that are expected to make merger and acquisition activities in China by foreign investors more time-consuming and complex, including requirements in some instances that the MOFCOM be notified in advance of any change-of-control transaction in which a foreign investor takes control of a PRC domestic enterprise and any of the following situations exist: (i) the transaction involves an important industry in China; (ii) the transaction may affect national economic security; or (iii) the PRC domestic enterprise has a well-known trademark or historical Chinese trade name in China. In addition, the M&A Rules require that the approval from the MOFCOM be obtained in circumstances where overseas companies established or controlled by PRC enterprises or residents acquire affiliated domestic companies. Complying with the requirements of the above regulations to complete such transactions could be time-consuming, and any required approval processes, including approval from MOFCOM, may delay or inhibit the completion of the Combination. See *The Combination Regulatory Approvals Required for the Combination* beginning on page 62 and *The Combination Agreement Conditions to Completion of the Combination* beginning on page 71.

The Combination may require approval of the PRC government under the PRC Anti-Monopoly Law, and, if required, AsiaInfo cannot currently predict whether it will be able to obtain such approval.

China's Anti-Monopoly Law, or the AML, was approved by the National People's Congress on August 30, 2007, and became effective on August 1, 2008. While certain aspects of the AML are unclear and are subject to subsequent interpretation by China's State Council, Anti-Monopoly Commission and Anti-Monopoly Enforcement Agency, the AML prohibits certain conduct, referred to as monopolistic acts, and requires checks on mergers and acquisitions of foreign and Chinese enterprises to ascertain whether they will have the effect of eliminating or restricting competition on the domestic market of China and whether they affect national security in China. The law also provides the Anti-Monopoly Commission with authority to make competition policy, publish guidelines, coordinate anti-monopoly enforcement work and conduct investigations and impose penalties on business operators that commit certain monopolistic acts within or outside of China that have the effect of eliminating or restricting competition in the China market.

In the opinion of Linkage Technologies' PRC counsel, Global Law Office, and AsiaInfo's PRC counsel, Han Kun Law Offices, unless there are new PRC laws and regulations or clear requirements in any form that require the approval under the AML for the Combination, PRC government approval under the AML is not required for the Combination because the historical revenues of AsiaInfo and Linkage Technologies fall below certain thresholds set forth in the AML. Accordingly, the parties to the Combination Agreement have not taken steps to obtain approval under the AML for the Combination. However, there are still many ambiguities under the AML and uncertainty as to the scope of the regulations. If the PRC government authorities subsequently determine that AML approval is required for the Combination, or if implementing rules or guidance are issued prior to the completion of the Combination which conclude that AML approval is required for the Combination, the parties to the Combination Agreement cannot predict how long it would take to obtain such approval.

The Combination Agreement contains provisions that could discourage a potential acquirer that may otherwise wish to acquire AsiaInfo, as well as discouraging AsiaInfo's entry into other merger or similar transactions with another party.

The Combination Agreement contains no shop provisions that restrict AsiaInfo's ability to solicit or facilitate proposals regarding a merger or similar transaction with another party, with limited exceptions for certain small acquisitions by AsiaInfo. Although AsiaInfo's board of directors could terminate the Combination Agreement in response to such a merger proposal, doing so would entitle Linkage Cayman to collect a \$17.6 million termination fee. See *The Combination Agreement Termination of the Combination Agreement* beginning on page 72 and *The Combination Agreement Termination Fees* beginning on page 73.

Table of Contents

Resales of shares of AsiaInfo common stock by Legacy Linkage Shareholders following the expiration of the lock-up periods after the Combination may cause the market price of AsiaInfo common stock to fluctuate.

As of March 11, 2010, AsiaInfo had approximately 47,291,519 million shares of common stock outstanding. AsiaInfo expects to issue 26,832,731 shares of its common stock to Linkage Cayman, which shares will be distributed to the Legacy Linkage Shareholders in connection with the Combination. Legacy Linkage Shareholders holding at least 95% of Linkage Cayman's shares will be required to enter into lock-up agreements at the closing of the Combination, which agreements will prohibit such Legacy Linkage Shareholders from transferring the AsiaInfo shares issued in connection with the Combination for specified periods of time. The sale of these shares of AsiaInfo common stock from time to time following the termination of the relevant lock-up periods could have the effect of depressing the market price for shares of AsiaInfo common stock.

We expect the integration of AsiaInfo and Linkage will result in significant expenditures and accounting charges that may have an adverse effect on the results and financial condition of the combined company, which are not reflected in the pro forma condensed combined financial information contained in this Proxy Statement.

The financial results of the combined company may be adversely affected by cash expenditures and non-cash charges incurred in connection with the Combination. The cash expenditures include the payment of professional service fees in connection with the Combination incurred after September 30, 2009, as well as costs expected to be incurred following the completion of the Combination, such as restructuring and integration activities and, possibly, retention bonuses or other changes in employee compensation. In addition to cash expenditures, we expect significant non-cash charges, including those associated with the amortization of intangible assets and stock-based compensation. We anticipate that a disproportionate amount of these cash expenditures will occur in the 12 months following the completion of the Combination. These expenditures and charges are not reflected in the unaudited pro forma condensed combined financial information contained in this Proxy Statement, which may not be indicative of the actual results of the combined company following the Combination. In addition, the unaudited pro forma condensed combined financial information does not allocate the purchase price to the fair value of the assets to be acquired and liabilities to be assumed from Linkage Technologies, which is expected to reduce net income in periods following the Combination from the amounts reflected in the historical financial statements of Linkage Technologies. The unaudited pro forma condensed combined financial information also do not make adjustments to certain revenue recognition practices of Linkage Technologies to conform to the practices of AsiaInfo, including differences in the application of the percentage of completion method to account for certain contracts for software development, the recognition of hardware revenue in bundled products, whether to record certain revenues on a gross or net basis, whether to defer pre-contract costs, and how PRC business tax is recorded. These differences may result in materially different revenues than those presented in the unaudited pro forma condensed combined financial information, which may result in timing differences in the recognition of revenues or expenses, inaccurate period to period comparisons, or distorted trends regarding operating results. As a result of these expenditures, charges, and revenue recognition practices, the operating results and financial condition of the combined company may be adversely affected after the completion of the Combination, particularly in the first year following the Combination.

The opinion obtained by AsiaInfo from its financial advisor does not and will not reflect changes in circumstances subsequent to the date of the Combination Agreement.

On December 4, 2009, BofA Merrill Lynch issued its written opinion to the AsiaInfo board of directors regarding the fairness, from a financial point of view and as of the date of the opinion, of the Consideration to be paid in the Combination by AsiaInfo. AsiaInfo has not obtained, and will not obtain, an updated opinion.

Although AsiaInfo believes there have been no material changes in the matters and conditions considered by BofA Merrill Lynch in rendering its fairness opinion and no material changes are anticipated to occur prior to the special meeting of AsiaInfo's stockholders, changes in the operations and prospects of AsiaInfo or Linkage Technologies, general market and economic conditions and other factors that may be beyond the control of

Table of Contents

AsiaInfo and Linkage Technologies, and on which the opinion was based, may alter the value of Linkage Technologies by the time the Combination is completed. The opinion rendered by BofA Merrill Lynch does not speak to the time when the Combination will be completed or to any other date other than the date of such opinion. As a result, the opinion rendered by BofA Merrill Lynch does not and will not address the fairness, from a financial point of view of the Consideration to be paid in the Combination by AsiaInfo at the time the Combination is completed. For a more complete description of the opinion rendered by BofA Merrill Lynch, see *The Combination Opinion of AsiaInfo's Financial Advisor* beginning on page 52 and the full text of the opinion contained in *Annex H* to this Proxy Statement.

Certain directors and executive officers of AsiaInfo and Linkage Technologies may have potential conflicts of interest in recommending that you vote in favor of the Combination.

The directors and executive officers of each of AsiaInfo and Linkage Cayman may have interests in the Combination as individuals that may be in addition to, or different from, the interests of AsiaInfo's stockholders. See *The Combination Interests of AsiaInfo's Directors, Executive Officers and Certain Significant Stockholders in the Combination* beginning on page 60 and *The Combination Interests of Linkage Technologies Directors, Executive Officers and Certain Significant Stockholders in the Combination* beginning on page 61.

Risks Related to Linkage Technologies

Linkage Technologies' current business, like AsiaInfo's business, depends almost entirely on demand for IT solutions and services from customers in China's telecom industry. If the growth of China's telecom industry or the demand for IT solutions and services does not continue, the combined company's results of operation could suffer.

Linkage Technologies focuses exclusively on the telecom industry in China and depends almost entirely on demand from the telecom industry in China for its solutions and services. Most of AsiaInfo's revenues are also derived from China's telecom industry. Linkage Technologies' past growth, like AsiaInfo's past growth, has been driven by substantial growth in the telecom industry in China and related growth in IT spending by telecom operators. This growth may not continue at the same rate or at all. Any economic downturn, inflation, contraction in subscriber base, decline in the stock price of telecom operators or any other adverse changes in market conditions could adversely affect the telecom operators. Other developments in the telecom industry, such as industry consolidation, entry of new market participants, competition from the Internet or any other changes that affect the overall competition in the telecom market could also have a material adverse effect on telecom operators. As external factors favor less growth in the telecom industry or for individual operators, telecom operators may reduce their IT expenditures. They may also delay purchases or put downward pressure on pricing. Linkage Technologies' results of operation, and the combined company's results of operation, could be adversely affected as a result.

As the telecom industry in China is heavily regulated by the Chinese government, the business strategies, capital expenditure budgets and spending plans of the telecom operators are significantly affected by government policies. As a result, the growth of Linkage Technologies business, like the growth of AsiaInfo's business, is heavily dependent on these government policies. Insufficient future funding allocated to China's telecom industry by the government could directly reduce the demand for Linkage Technologies' solutions and services. Government initiatives directed at the market could also significantly affect the market conditions for telecom operators and influence the level of spending on IT solutions and services. While some of these initiatives, such as the convergence of mobile and fixed-line markets in the telecom industry, may increase market competition and generate more demand for Linkage Technologies' solutions and services, the anticipated increase in demand may not materialize. Some operators may not adapt well to the market conditions under the new regulatory environment and may reduce their demand for Linkage Technologies' solutions and services as a result. The telecom industry may also become less competitive over time, either as a result of market propelled consolidations or as a result of government efforts to curtail competition. A less competitive market may create

Table of Contents

fewer incentives for IT spending on innovations and upgrades, which may directly affect Linkage Technologies' and the combined company's results of operation.

The global financial and economic crisis, particularly the slowdown in the Chinese economy, may adversely affect Linkage Technologies results of operations.

The global financial markets have experienced significant disruptions recently, and most of the world's major economies have entered into recession. The Chinese economy has also slowed down significantly since the second half of 2008 and this trend may continue for the rest of 2010 and beyond. Linkage Technologies' operations, like AsiaInfo's operations, are located in China and, like AsiaInfo, Linkage Technologies derives most of its revenues from the telecom industry in China. Any prolonged slowdown in the Chinese economy, in particular the telecom industry, could have a negative impact on Linkage Technologies' business, operating results and financial condition in a number of ways. For example, Linkage Technologies' customers may decrease or delay spending on Linkage Technologies' solutions and services, while it may have difficulty expanding its customer base fast enough, or at all, to offset the impact of decreased spending by its existing customers.

Linkage Technologies depends on a few customers for a significant portion of its revenues and this dependence is likely to continue. If Linkage Technologies fails to obtain business from these key existing customers, its revenues will decline.

Like AsiaInfo, Linkage Technologies markets its telecom-related solutions to, and signs contracts with, individual provincial subsidiaries of the three telecom operators as well as the headquarters of these three telecom operators. Of the 97 provincial subsidiaries and headquarters of these three telecom operators within China, Linkage Technologies had contracts with 69 of them as of September 30, 2009. For the years ended December 31, 2006, 2007 and 2008, and in the nine months ended September 30, 2009, three, one, one and one, respectively, of these provincial subsidiaries accounted for more than 10% of Linkage Technologies' revenues, although no single contract accounted for more than 10% of Linkage Technologies' revenues during any of those periods. However, in aggregate, China Mobile, China Telecom and China Unicom (including results from China Netcom that merged with China Unicom on October 15, 2008) accounted for 98.6%, 98.2%, 98.9% and 99.8% of Linkage Technologies' software development revenues in 2006, 2007 and 2008, and in the nine months ended September 30, 2009, respectively. Linkage Technologies expects revenues from these operators will continue to account for the majority of its revenues, in particular, for its software development revenues.

Linkage Technologies does not have long-term contracts with its customers. It believes that its revenue growth will depend to a significant extent on its ability to develop and maintain long-term relationships with these operators at the headquarter and provincial levels. The decision to purchase Linkage Technologies' products and services is in some cases made by operators at the headquarter level and in most cases at the provincial levels. Linkage Technologies has dedicated significant resources over the past few years to maintaining its relationships with these operators at both the provincial and the headquarter levels. However, IT spending authority may become more centralized. For instance, China Unicom recently adopted the practice of requiring contracts to be entered into with the headquarters for solutions provided to its provincial subsidiaries, although the provincial subsidiaries will remain as the main decision-makers of the purchases. If telecom operators begin to centralize purchasing decisions or otherwise change the level within the telecom operator at which the purchase decision is made or replace a key decision-maker at any decision-making level, Linkage Technologies' customer relationship may be disrupted and Linkage Technologies may be unable to effectively and timely restore these relationships. Any failure to maintain close relationships with customers, due to unsuccessful sales and marketing efforts, lack of suitable solutions, unsatisfactory customer support and services or any other reason, could result in its losing customers and their businesses. If Linkage Technologies loses a key customer, if a key customer significantly reduces its purchasing levels or delays a major purchase or if Linkage Technologies fails to attract additional major customers, its results of operations could be materially and adversely affected.

Table of Contents

Linkage Technologies has transferred intellectual property rights to a number of its customized software solutions to its customers in the past and may not own all these intellectual property rights. Linkage Technologies may be subject to intellectual property infringement claims from these customers and others, which may force it to incur substantial legal expenses and, if determined adversely against us, may disrupt its business and materially and adversely affect its results of operation.

Linkage Technologies' business involves the development and customization of software solutions for customers. While Linkage Technologies retains ownership in the intellectual property rights underlying the core technologies required to develop its customized finished software solutions, in most cases, its contracts for custom-designed projects provided that Linkage Technologies' customers own, or share with it, intellectual property rights to the finished software solutions developed under such contracts. Under these circumstances, Linkage Technologies may not have the right to reuse the related finished software in projects involving other customers, nor can Linkage Technologies unilaterally apply for copyright registrations, patents or other intellectual property rights for these software solutions. To the extent that Linkage Technologies is unable to reuse the software and to the extent that the use of such software is important to the growth of its business with other customers, the inability to reuse such software could hinder the growth of its business. Furthermore, a portion of these contracts provide that its customers have ownership rights to any substantial improvements Linkage Technologies subsequently makes to the software solutions developed under these contracts. As a result, Linkage Technologies may be subject to intellectual property infringement or profit sharing claims in the future from these customers. Any such claims could subject Linkage Technologies to costly litigation and may require it to pay damages and develop non-infringing intellectual property or acquire licenses to the intellectual property that is the subject of the alleged infringement. These could harm its reputation and materially and adversely affect its results of operation.

Failure to obtain the required assignment registration for patents and patent applications or failure to renew the trademark license from Lianchuang Technology Company Limited, or Lianchuang, and/or complications arising from the assignment or license could disrupt Linkage Technologies' operations and materially and adversely affect Linkage Technologies' operating results.

Linkage Technologies currently licenses certain core technologies it uses in its solutions from an affiliate, Lianchuang, controlled by Libin Sun, Linkage Technologies' chairman and chief executive officer, and certain other members of Linkage Technologies' senior management. Linkage Nanjing has entered into an assignment agreement with Lianchuang whereby Lianchuang has assigned to Linkage Nanjing the rights in the patents or patent applications underlying these technologies. However, the transfer of ownership of the patents and patent applications is conditioned on the successful registration of the assignment agreement with the China State Patent Office. Linkage Nanjing has submitted a request for the registration of the assignment agreement, but it does not know when it will successfully obtain such registration, if at all. Prior to the effective transfer of the patents and patent applications, Linkage Technologies will continue to rely on its license arrangement with Lianchuang. Linkage Nanjing does not pay license fees under the license arrangement, and the arrangement will be in effect until approval has been obtained for the transfer of all of the patents and patent applications or, alternatively, their expiration. Although Lianchuang has issued a non-competition commitment letter to Linkage Nanjing and Linkage Suzhou, the enforcement of the non-competition commitment letter is uncertain under U.S. and PRC laws.

Linkage Technologies also licenses its trademarks from Lianchuang. Under the recently executed supplemental agreement, the license is extended for a term of 20 years. However, this is not automatically renewable and further extension will be subject to negotiation at the end of the current term, which negotiation may not be successful. Additionally, Linkage Technologies currently shares the same trademark with Lianchuang for its offshore operating entity and, in the past, shared the same website as Lianchuang. Any allegations of misconduct worded ambiguously against Lianchuang could be confused or misinterpreted by Linkage Technologies' competitors, customers, suppliers, governmental authorities and/or the general public as allegations of misconduct against Linkage Technologies, which could materially and adversely affect Linkage Technologies' reputation, share price and results of operations. Furthermore, Linkage Technologies' usage of a

Table of Contents

common name and Linkage Technologies' past sharing of website with Lianchuang could be confusing to its customers and potential investors, which would lead to unwanted brand dilution and cause its brand awareness and reputation to be tied to those of Lianchuang, and vice-versa.

Any act of infringement, whether alleged or committed by or against Lianchuang, or any other defect, with respect to either the technologies or the trademarks licensed from Lianchuang, would be materially adverse to Linkage Technologies' interests, and Linkage Technologies would have no control over any acts committed or omitted by Lianchuang or claims, actions, lawsuits or other proceedings by or against Lianchuang. Changes to or transactions involving Lianchuang's corporate or capital structure may require the amendment or termination of Linkage Technologies' licenses from Lianchuang, which could be time-consuming and costly. If Linkage Technologies is unable to retain intellectual property rights to certain of Linkage Technologies' technologies and trademarks or if it suffers from the adverse consequences from the lack of the ownership to the technologies or the sharing of the trademarks, its business and results of operations could be materially and adversely affected.

If Linkage Technologies does not continually enhance its solution and service offerings, it may have difficulty in retaining existing customers and attracting new customers.

Linkage Technologies believes that its future success will depend, to a significant extent, upon its ability to enhance its existing solutions and to introduce new solutions and features to meet the requirements of its customers in a rapidly developing and evolving market. Linkage Technologies currently devotes significant resources to refining and expanding its base software modules and to developing solutions that operate in accordance with its customers' networks and systems. Unexpected technical, operational, distribution or other problems could delay or prevent the introduction of one or more of these products or services or any products or services that Linkage Technologies may plan to introduce in the future. Linkage Technologies' present or future products may not satisfy the evolving needs of the telecom industry, and these solutions and services may not achieve anticipated market acceptance or generate incremental revenue. If Linkage Technologies is unable to anticipate or respond adequately to the need for solutions and services enhancements due to resource, technological or other constraints, its results of operations could be materially and adversely affected.

Linkage Technologies may lose its customers and its financial results would suffer if its customers merge with or are acquired by other telecom operators as a result of the recent and any future restructuring in the telecom industry or otherwise, or if they develop their own in-house capabilities.

Linkage Technologies' business may be negatively impacted if its business with a significant number of Linkage Technologies' customers is reduced. This may occur if its customers are consolidated or if a customer is acquired by, or merges with, another operator that has a more established relationship with other IT solutions providers. Specifically, pursuant to the restructuring plan of China's telecom industry announced in May 2008, the number of operators has been reduced from six to three through mergers and acquisitions. As a result of the recent and any future restructuring, Linkage Technologies may lose customers. Furthermore, as China's telecom industry grows larger in size and smaller in the number of operators, more IT solutions providers will be competing for projects and operators may be able to exact lower prices for Linkage Technologies' solutions and services. If Linkage Technologies cannot effectively compete with its competitors, Linkage Technologies may lose business and its results of operations may be materially and adversely affected. Furthermore, telecom operators may also find it more cost-effective to set up their own IT divisions to meet their IT needs, instead of outsourcing to third-party providers. If the current trend favoring the outsourcing of such services is reduced or reversed, Linkage Technologies' results of operations may be materially and adversely affected.

In addition, as restrictions against foreign ownership in the telecom industry ease, more foreign investors may acquire stakes in, or form strategic alliances with, Chinese telecom operators, and may direct or influence management to use IT solutions providers they recommend or favor, which may lead to lost or reduced business and revenues with these existing customers.

Table of Contents

Changes in technology could adversely affect Linkage Technologies' business by increasing its costs, reducing its profit margins and causing a decline in its competitiveness.

China's telecom industry, in which Linkage Technologies operates, is characterized by rapidly changing technology, evolving industry standards, frequent new services and solutions introductions and enhancements as well as changing customer demands. New solutions and new technologies often render existing solutions and services obsolete, excessively costly or otherwise unmarketable. As a result, Linkage Technologies' success depends on its ability to adapt to the latest technological progress, such as the 3G standard and technologies, and to develop or acquire and integrate new technologies into its software solutions and IT-related services. Advances in technology also require Linkage Technologies to commit substantial resources to developing or acquiring and then deploying new technologies for use in its operations. Linkage Technologies must continuously train personnel in new technologies and in how to integrate existing hardware and software systems with these new technologies. Linkage Technologies may not be able to adapt quickly to new technologies or commit sufficient resources to compete successfully against existing or new competitors in bringing to market solutions and services that incorporate these new technologies. If Linkage Technologies fails to adapt to changes in technologies and compete successfully against established or new competitors, its results of operations could be adversely affected.

Returns on Linkage Technologies' investment in new technologies, such as 3G technology, and new solutions may not materialize as expected.

Linkage Technologies has invested and will invest in the future substantial amount of capital, manpower and other resources to develop new solutions and acquire technologies in preparation for the adoption by the telecom industry in China of new standards and technologies, such as the 3G standard and technologies. However, Linkage Technologies' abilities to successfully develop and commercialize these new solutions and technologies are subject to a number of risks and uncertainties, including uncertainty surrounding the timing of the adoption of these new standards and technologies by China's telecom industry and the receptiveness to these new technologies by their customer base, as well as Linkage Technologies' abilities to develop and market these new solutions cost-effectively and to deliver these solutions ahead of its competitors. Any of the above risks and uncertainties could jeopardize Linkage Technologies' ability to successfully realize a significant return on its investment in the 3G and other new technologies and solutions, if at all.

The markets in which Linkage Technologies sells its solutions and services are highly competitive and it may not be able to compete effectively.

The market for telecom IT solutions is highly competitive, and Linkage Technologies expects competition to continue to intensify in the future. Linkage Technologies faces competition from international telecom software solutions providers such as Amdocs, Convergys, HP and IBM, domestic companies such as Boco, Neusoft and Digital China, and if the Combination is not consummated, AsiaInfo. It also faces competition from the software development divisions of some telecom equipment manufacturers such as Huawei and ZTE. Some of these competitors have long operating histories, large customer bases, substantial financial, technical, sales, marketing and other resources, and strong name recognition. In addition, Linkage Technologies' competitors have acquired, and may continue to acquire in the future, companies that may enhance their market offerings. Accordingly, new competitors or alliances among competitors may emerge and rapidly acquire significant market share. As a result, Linkage Technologies' competitors may be able to adapt more quickly to new or emerging technologies and changes in customer requirements, and may be able to devote greater resources to the promotion and sale of their solutions and services. Linkage Technologies may not be able to compete successfully against existing or new competitors, and it may face challenges in maintaining and expanding its customer base and in pricing of its solutions and services, which could have a material adverse effect on its results of operations.

Table of Contents

Problems with the quality or performance of Linkage Technologies' solutions may cause delays in the introduction of new solutions or result in the loss of customers and revenues, which could have a material and adverse effect on Linkage Technologies' business and results of operations.

Linkage Technologies' software solutions are complex and may contain defects, errors or bugs when first introduced to the market or to a particular customer, or as new versions are released. Because Linkage Technologies cannot test for all possible scenarios, its solutions may contain errors which are not discovered until after they have been installed, and it may not be able to timely correct these problems. These defects, errors or bugs could interrupt or delay completion of projects or sales to its customers. In addition, Linkage Technologies' reputation may be damaged and Linkage Technologies may fail to acquire new projects from existing customers or new customers. Errors may occur when Linkage Technologies provides systems integration and maintenance services. Some of the contracts with its customers do not have provisions setting forth limitations on liability for consequential damages. Even in cases where Linkage Technologies has agreements with its customers that contain provisions designed to limit its exposure to potential claims and liabilities arising from customer problems, these provisions may not effectively protect it against such claims in all cases and in all jurisdictions. In addition, as a result of business and other considerations, Linkage Technologies may undertake to compensate its customers for damages arising from the use of its solutions, even if its liability is limited by these provisions. Moreover, claims and liabilities arising from customer problems could also result in adverse publicity and materially and adversely affect its business, results of operations and financial condition. Linkage Technologies currently does not carry any product or service liability insurance and any imposition of liability on it may materially and adversely affect its business and results of operations.

Linkage Technologies may be subject to infringement, misappropriation and indemnity claims in the future, which may cause Linkage Technologies to incur significant expenses, pay substantial damages and be prevented from providing its services or technologies.

Linkage Technologies' continued growth depends, in part, on its ability to carry out its business without infringing the intellectual property rights of third parties. Patent and copyright law covering software-related technologies and IT marketing is evolving rapidly and is subject to a great deal of uncertainty. Linkage Technologies' self-developed or licensed technologies, processes or methods may be covered by third-party patents or copyrights, either now existing or to be issued in the future. Any potential litigation may cause Linkage Technologies to incur significant expenses. Third-party claims, if successfully asserted against it or its licensor, may cause it to pay substantial damages, seek licenses from third parties, pay ongoing royalties, redesign its services or technologies, or prevent it from providing services or technologies subject to these claims. Even if Linkage Technologies was to prevail, any litigation would likely be costly and time-consuming and divert the attention of its management and key personnel from its business operations.

Additionally, most of Linkage Technologies' software development contracts signed with its customers contain indemnity clauses whereby Linkage Technologies will indemnify its customers for any loss or damages suffered as a result of any third-party claims against them for any infringement of intellectual property rights in connection with the installation and use of the customized software solutions Linkage Technologies develops for them. Although Linkage Technologies has obtained similar indemnities from Lianchuang under the license agreement and the assignment agreement, it may still be exposed to significant liabilities under these indemnity clauses agreed with its customers.

Linkage Technologies' failure to protect its intellectual property rights may subject Linkage Technologies to costly litigation to protect its intellectual property rights.

Any misappropriation of Linkage Technologies' technology or the development of competitive technology could seriously harm its business. Linkage Technologies regards a substantial portion of its software solutions and systems as proprietary and relies on statutory copyright, trademark, patent, trade secret laws, customer license agreements, employee and third-party non-disclosure agreements and other methods to protect its proprietary rights. Nevertheless, these resources afford only limited protection and the actions Linkage

Table of Contents

Technologies takes to protect its intellectual property rights may not be adequate. In particular, third parties may infringe or misappropriate Linkage Technologies' proprietary technologies or other intellectual property rights, which could have a material adverse effect on the business and results of operations of Linkage Technologies. In addition, intellectual property rights and confidentiality protection in China may not be as effective as in the United States, and policing unauthorized use of proprietary technology can be difficult and expensive. In addition, litigation may be necessary to enforce its intellectual property rights, protect its trade secrets or determine the validity and scope of the proprietary rights of others. The outcome of any such litigation may not be in Linkage Technologies' favor. Furthermore, any such litigation may be costly and may divert management attention as well as Linkage Technologies' other resources away from its business. An adverse determination in any such litigation will impair Linkage Technologies' intellectual property rights and may harm the business, prospects and reputation of Linkage Technologies.

Linkage Technologies may be liable to its customers for damages caused by unauthorized disclosure of sensitive and confidential information, whether through its employees or otherwise.

Linkage Technologies has access to confidential customer data in connection with the solutions and services it provides. Under the terms of contracts with its customers, Linkage Technologies is required to keep such information strictly confidential. Linkage Technologies seeks to implement specific measures to protect sensitive and confidential customer data. Linkage Technologies requires its employees and subcontractors to enter into non-disclosure arrangements to limit access to and distribution of its customers' sensitive and confidential information as well as Linkage Technologies' own trade secrets. The steps taken by Linkage Technologies in this regard may not be adequate to protect its customers' confidential information. Linkage Technologies has in the past experienced unauthorized disclosure by an employee of confidential information on the systems of one of its customers. If its customers' proprietary rights are misappropriated by Linkage Technologies employees or Linkage Technologies' subcontractors or their employees, in violation of any applicable confidentiality agreements or otherwise, Linkage Technologies' customers may consider Linkage Technologies liable for that act and seek damages and compensation from Linkage Technologies. However, Linkage Technologies currently does not have any insurance coverage for mismanagement or misappropriation of such information by its subcontractors or employees. Any litigation with respect to unauthorized disclosure of sensitive and confidential information might result in substantial costs and diversion of resources and management attention.

Linkage Technologies' business depends substantially on the continuing efforts of its management and other key personnel. If Linkage Technologies loses their services, it could incur significant costs in finding suitable replacements and its business may be severely disrupted.

Linkage Technologies' revenue growth heavily depends upon the continued services of its management and other key personnel. If one or more of Linkage Technologies' senior management or key personnel were unable or unwilling to continue in their present positions, Linkage Technologies might not be able to replace them easily or at all. Linkage Technologies' business may be severely disrupted, its financial condition and results of operations may be materially and adversely affected, and Linkage Technologies may incur additional expenses to recruit, train and retain personnel.

Linkage Technologies' business could suffer if its key personnel compete against Linkage Technologies and Linkage Technologies non-competition agreements with them cannot be enforced.

If any of Linkage Technologies' key personnel joins a competitor or forms a competing company, Linkage Technologies may lose customers, suppliers, know-how and key professionals and staff members. Each of Linkage Technologies' key personnel has entered into employment agreements and confidentiality and non-competition agreements with Linkage Technologies. However, if any dispute arises between its key personnel and Linkage Technologies, the non-competition provisions contained in their confidentiality and non-competition agreements may not be enforceable, especially in China, where most of these key employees reside, on the ground that Linkage Technologies has not provided adequate compensation to these key employees.

The beneficial owners of Lianchuang may have potential conflicts of interest with Linkage Technologies and they may not act in Linkage Technologies' best interest.

Libin Sun, Linkage Technologies' chairman and chief executive officer, Guoxiang Liu, Linkage Technologies' president, and Xiwei Huang, Linkage Technologies' chief operating officer and chief accounting officer, who are expected to become executive officers and directors of the combined company following consummation of the Combination, currently hold majority equity interests in Lianchuang. In addition, Mr. Sun serves as the chairman of the board of Lianchuang and is involved in the operations of Lianchuang. Conflicts of interests between their dual roles as beneficial owners/management of both Lianchuang Technologies and Linkage Technologies may arise. If conflicts of interest arise, these individuals may not act in the best interests of Linkage Technologies and may not resolve any conflict of interest in Linkage Technologies favor. Linkage Technologies also licenses its technologies from Lianchuang and has entered into other agreements with Lianchuang. See

Information about Linkage Technologies' Related Party Transactions on page 91 and *Risk Factors Risks Related to Linkage Technologies Failure to obtain the required assignment registration for patents and patent applications or failure to renew the trademark license from Lianchuang, and/or complications arising from the assignment or license could disrupt Linkage Technologies' operations and materially and adversely affect Linkage Technologies' operating results* on page 30. Mr. Sun, as the chairman of Lianchuang, may have interests adverse to, or not aligned with, Linkage Technologies' interests.

A significant portion of the software development, ongoing system support and enhancement service revenues Linkage Technologies generates are fixed amounts according to its sales contracts. If Linkage Technologies fails to accurately estimate costs and determine resource requirements in relation to its projects, its margins and profitability could be materially and adversely affected.

A significant portion of the software development, ongoing system support and enhancement service revenues Linkage Technologies generates are fixed amounts according to its sales contracts or bids it submits. Linkage Technologies' projects often involve complex technologies and must often be completed within compressed timeframes and meet increasingly sophisticated customer requirements. Linkage Technologies may be unable to accurately assess the time and resources required for completing projects and price its projects accordingly. If Linkage Technologies underestimates the time or resources required, it may experience cost overruns and mismatches in project staffing. Conversely, if Linkage Technologies over-estimates requirements, its bids may become uncompetitive and it may lose business as a result. Furthermore, any failure to complete a project within the stipulated timeframe could expose Linkage Technologies to contractual and other liabilities and damage its reputation.

Linkage Technologies extends warranties to its customers, which exposes Linkage Technologies to potential liabilities.

For third-party hardware and software products, Linkage Technologies typically provides its customers with one to three years of warranties, under which Linkage Technologies agrees to maintain third-party hardware and software products for a fee or at no additional cost to its customers. Although Linkage Technologies seeks to arrange back-to-back warranties with hardware and software vendors, it is nevertheless obligated to perform the terms of warranties issued by it regardless of whether its back-to-back warranties are honored. In addition, Linkage Technologies does not currently maintain any insurance policies with respect to its exposure to warranty claims.

Linkage Technologies' customized software contracts typically provide for a six-month warranty period starting from when preliminary acceptance is received from the customer. Linkage Technologies is contractually obligated to fix bugs and defects in the software during the warranty period. Linkage Technologies' assumptions

Table of Contents

regarding the durability and reliability of its solutions may not be accurate, and the amount of accrued warranty expenses that it has allowed for its solutions may not be sufficient to meet its actual warranty costs. If Linkage Technologies experiences a significant increase in warranty claims, particularly from its large telecom operator customers, it may incur significant repair and replacement costs associated with such claims, which could have a material adverse effect on its financial condition and results of operations. Furthermore, widespread product failure will damage its reputation and customer relationships and may cause its sales to decline, which in turn could have a material adverse effect on its results of operations. Under a small portion of Linkage Technologies' software development contracts involving its solutions and services and those of other service providers, Linkage Technologies is also held jointly and severally liable to the customers for defects relating to solutions or services provided by other service providers.

Linkage Technologies' computer networks may be vulnerable to security risks that could disrupt its services and adversely affect its results of operations.

Linkage Technologies' computer networks may be vulnerable to unauthorized access, computer hackers, computer viruses and other security problems caused by unauthorized access to, or improper use of, systems by third parties or employees. A hacker who circumvents security measures could misappropriate proprietary information or cause interruptions or malfunctions in operations. Computer attacks or disruptions may jeopardize the security of information stored in and transmitted through computer systems of its customers. Actual or perceived concerns that Linkage Technologies' systems may be vulnerable to such attacks or disruptions may deter telecom operators and consumers from using Linkage Technologies' solutions or services. As a result, Linkage Technologies may be required to expend significant resources to protect against the threat of these security breaches or to alleviate problems caused by these breaches, which could adversely affect its results of operations.

Linkage Technologies' solutions incorporate a portion of and work in conjunction with third-party hardware and software solutions. If these third-party hardware or software solutions are not available to Linkage Technologies at reasonable costs or at all, its results of operations could be adversely impacted.

Although Linkage Technologies' solutions primarily rely on core technologies licensed and assigned to it by its affiliate, some of Linkage Technologies' solutions incorporate a small portion of third-party hardware and software solutions. In addition, Linkage Technologies' solutions are designed to work in conjunction with the third-party hardware and software in its customers' existing systems. If any third party were to discontinue making their solutions available to Linkage Technologies or Linkage Technologies' customers on a timely basis, or increase materially the cost of their solutions, or if Linkage Technologies' solutions failed to properly function or interoperate with replacement hardware or software solutions, Linkage Technologies may need to incur costs in finding replacement third-party solutions and/or redesigning its solutions to replace or function with or on replacement third-party solutions. Replacement solutions may not be available on terms acceptable to Linkage Technologies or at all, and it may be unable to develop alternative solutions or redesign its solutions on a timely basis or at a reasonable cost. If any of these were to occur, Linkage Technologies' results of operations could be adversely impacted.

Linkage Technologies has very limited insurance coverage which could expose it to significant costs and business disruption.

Linkage Technologies does not maintain any insurance coverage for its leased properties. Should any natural catastrophes such as earthquakes, floods, typhoons or any acts of terrorism occur in Nanjing, where its head office is located and most of its employees are based, or elsewhere in China, Linkage Technologies might suffer not only significant property damages, but also loss of revenues due to interruptions in its business operations, which could have a material adverse effect on its business, operating results or financial condition.

Table of Contents

The insurance industry in China is still at an early stage of development. Insurance companies in China offer limited business insurance products, and do not, to Linkage Technologies' knowledge, offer business liability insurance. As a result, Linkage Technologies does not have any business liability insurance coverage for its operations. Moreover, while business disruption insurance is available, Linkage Technologies has determined that the risks of disruption and cost of the insurance are such that Linkage Technologies does not require it at this time. Any business disruption, litigation or natural disaster might result in substantial costs and diversion of resources, particularly if it affects Linkage Technologies' technology platforms which Linkage Technologies depends on for delivery of its software and services, and could have a material adverse effect on its results of operations.

Linkage Technologies' cash flow and results of operations would be negatively impacted if Linkage Technologies continues to maintain a high accounts receivable balance.

As of December 31, 2007 and 2008 and September 30, 2009, Linkage Technologies' accounts receivable balance was \$36.0 million, \$52.4 million and \$84.8 million, respectively. The number of customers with accounts receivable due representing more than 10% of its total outstanding accounts receivable balance for the years ended 2007 and 2008 and for the nine months ended September 30, 2009 was three, nil and one, respectively. Although two-thirds of its billed accounts receivables were collected within the three month credit terms Linkage Technologies extends under its contracts, the remaining were collected over a longer period of time. Linkage Technologies believes this is a result of industry practice and contract negotiations. Linkage Technologies does not expect the age of its receivables to significantly improve in the foreseeable future. As its business expands and current industry payment and collection practices as well as its own billing practices continue, Linkage Technologies may continue to maintain high accounts receivable balances, which could negatively affect its cash flows, and in particular its short-term cash flows. As the age of its receivables increases, its exposure to the credit risk of its customers increases as well. If Linkage Technologies incurs bad debt expenses as a result, its results of operations would be negatively impacted.

Seasonality and fluctuations in customers' annual IT budget and spending cycle and other factors can cause Linkage Technologies' revenues and operating results to vary significantly from quarter to quarter and from year to year.

Linkage Technologies' revenues and operating results will vary significantly from quarter to quarter and from year to year due to a number of factors, many of which are outside of its control. A large number of Linkage Technologies' engineers take leave around the Chinese New Year holiday, which typically falls between late January and February of each year. The lack of man-hours during this holiday period usually leads to relatively lower revenues during the first calendar quarter. Linkage Technologies typically experiences higher revenues during the fourth quarter of the year as more of its software solutions are delivered and installed close to the year-end, the timing of which delivery and installation is influenced by the calendar-year-based IT budget and spending cycle of many of its customers. Due to the annual budget cycles of most of its customers, Linkage Technologies also may be unable to accurately estimate the demand for its solutions and services beyond the immediate calendar year, which could adversely affect its business planning. Moreover, Linkage Technologies' results will vary depending on its customers' business needs from year to year. Due to these and other factors, Linkage Technologies' operating results have fluctuated significantly from quarter to quarter and from year to year. These fluctuations are likely to continue in the future, and operating results for any period may not be indicative of its future performance in any future period.

Adverse changes in economic and political policies of the PRC government could have a material adverse effect on the overall economic growth of China, which could adversely affect Linkage Technologies' business.

Substantially all of Linkage Technologies' business operations are conducted in China. Accordingly, its business, results of operations, financial condition and prospects are subject to a significant degree to economic, political and legal developments in China. Although the Chinese economy is no longer a planned economy, the

Table of Contents

PRC government continues to exercise significant control over China's economic growth through direct allocation of resources, monetary and tax policies, and a host of other government policies such as those that encourage or restrict investment in certain industries by foreign investors, control the exchange between RMB and foreign currencies, and regulate the growth of the general or specific market. These government involvements have been instrumental in China's significant growth in the past 30 years. The reorganization of the telecommunications industry encouraged by the PRC government has directly affected Linkage Technologies' industry and its growth prospects. If the PRC government's current or future policies fail to help the Chinese economy achieve further growth or if any aspect of the PRC government's policies limits the growth of the telecommunications industry in China or Linkage Technologies' industry or otherwise negatively affects its business, its growth rate, Linkage Technologies' results of operations could be adversely affected as a result.

Linkage Technologies' business benefits from certain government tax incentives. Expiration, reduction or discontinuation of, or changes to, these incentives will increase its tax burden and reduce its net income.

Under the PRC Corporate Income Tax Law passed in 2007, or the New CIT Law, a unified enterprise income tax rate of 25% and unified tax deduction standard is applied equally to both domestic-invested enterprises and foreign-invested enterprises, or FIEs. Enterprises established prior to March 16, 2007 eligible for preferential tax treatment in accordance with the then tax laws and administrative regulations shall gradually become subject to the New CIT Law rate over a five-year transition period starting from the date of effectiveness of the New CIT Law. However, certain qualifying high-technology enterprises may still benefit from a preferential tax rate of 15% if they own their core intellectual properties and they are enterprises in certain State-supported high-tech industries to be later specified by the government. As a result, if Linkage Technologies' PRC subsidiaries qualify as high-technology enterprises, they will continue to benefit from the preferential tax rate of 15%, subject to transitional rules implemented from January 1, 2008. Furthermore, if its PRC subsidiaries qualify as key software enterprises, they will enjoy a further reduction to their preferential tax rate to 10%. Otherwise, the applicable tax rate of its PRC subsidiaries may gradually increase to the unified tax rate of 25% by January 1, 2013 under the New CIT Law and the Implementing Rules. Currently, the value-added taxes Linkage Technologies pays on its software products are refunded to it by the tax authorities as part of the PRC state policies to encourage the development of the PRC software industry. If its PRC subsidiaries cease to qualify as high-technology enterprises or key software enterprises, or if the refund of the value-added taxes ceases to apply, Linkage Technologies' financial condition and results of operations could be materially and adversely affected.

If Linkage Technologies were deemed a resident enterprise by PRC tax authorities, it could be subject to tax on its global income at the rate of 25% under the New CIT Law and its non-PRC shareholders could be subject to certain PRC taxes.

Under the New CIT Law, effective January 1, 2008, an enterprise established outside of the PRC with de facto management bodies within the PRC is considered a resident enterprise and will be subject to the CIT at the rate of 25% on its global income. The implementing rules of the New CIT Law define de facto management as substantial and overall management and control over the production and operations, personnel, accounting, and properties of the enterprise. If Linkage Technologies were to be considered a resident enterprise by the PRC tax authorities, its global income would be subject to tax under the New CIT Law at the rate of 25% and, to the extent Linkage Technologies were to generate substantial amount of income outside of PRC in the future, Linkage Technologies would be subject to additional taxes. In addition, if Linkage Technologies were to be considered a resident enterprise, the dividends it pays to its non-PRC enterprise shareholders would be subject to withholding tax and its non-PRC enterprise shareholders would be subject to a 10% income tax on any gains they would realize from the transfer of their shares, if such income were sourced from within the PRC. A substantial majority of the members of Linkage Technologies' management team as well as properties are located in the PRC. However, according to Linkage Technologies' PRC counsel, as of the date of this Proxy Statement, no final interpretations on the implementation of the resident enterprise designation are available. Moreover, any such designation, when made by PRC tax authorities, will be determined based on

the facts and circumstances of individual cases. As a result, Linkage Technologies, after consulting its PRC counsel, cannot determine the likelihood of Linkage Technologies being designated a resident enterprise as of the date of this Proxy Statement.

Uncertainties with respect to the PRC legal system could adversely affect Linkage Technologies.

Linkage Technologies conducts its business primarily through its subsidiaries in China. Linkage Technologies' operations in China are governed by PRC laws and regulations. Linkage Technologies' PRC subsidiaries are generally subject to laws and regulations applicable to foreign investments in China and, in particular, laws and regulations applicable to wholly foreign-owned enterprises. The PRC legal system is based on statutes. Prior court decisions may be cited for reference but have limited precedential value.

Since 1979, PRC legislation and regulations have significantly enhanced the protections afforded to various forms of foreign investments in China. However, China has not developed a fully integrated legal system and recently enacted laws and regulations may not sufficiently cover all aspects of economic activities in China. In particular, because these laws and regulations are relatively new, and because of the limited volume of published decisions and their nonbinding nature, the interpretation and enforcement of these laws and regulations involve uncertainties. In addition, the PRC legal system is based in part on government policies and internal rules (some of which are not published on a timely basis or at all) that may have a retroactive effect. As a result, Linkage Technologies may not be aware of its violation of these policies and rules until some time after the violation. In addition, any litigation in China may be protracted and result in substantial costs and diversion of resources and management attention.

PRC regulation of loans and direct investment by offshore holding companies to PRC entities may delay or prevent Linkage Technologies from making loans or additional capital contributions to its PRC operating subsidiaries, which could materially and adversely affect its liquidity and its ability to fund and expand its business.

As an offshore holding company of its PRC operating subsidiaries, Linkage Technologies may make loans to its PRC subsidiaries, or Linkage Technologies may make additional capital contributions to its PRC subsidiaries. Any loans to its PRC subsidiaries are subject to PRC regulations. For example, loans by Linkage Technologies to its subsidiaries in China, which are FIEs, to finance their activities cannot exceed statutory limits and must be registered with the SAFE. On August 29, 2008, SAFE promulgated Circular 142, a notice regulating the conversion by a foreign-invested company of foreign currency into RMB by restricting how the converted RMB may be used. The notice requires that RMB converted from the foreign currency-denominated capital of a foreign-invested company may only be used for purposes within the business scope approved by the applicable governmental authority and may not be used for equity investments within the PRC unless specifically provided for otherwise. The foreign currency-denominated capital shall be verified by accounting firm before converting into RMB. In addition, SAFE strengthened its oversight over the flow and use of RMB funds converted from the foreign currency-denominated capital of a foreign-invested company. To convert such capital into RMB, the foreign-invested company must report the use of such RMB to the bank, and the RMB must be used to the reported purposes. According to Circular 142, change of the use of such RMB without approval is prohibited. In addition, such RMB may not be used to repay RMB loans if the proceeds of such loans have not yet been used. Violations of Circular 142 may result in severe penalties, including substantial fines as set forth in the Foreign Exchange Administration Rules.

Linkage Technologies may also decide to finance its subsidiaries by means of capital contributions. These capital contributions must be approved by the MOFCOM, or its local counterpart. Linkage Technologies may not be able to obtain these government approvals on a timely basis, if at all, with respect to future capital contributions by it to its PRC subsidiaries. If Linkage Technologies fails to receive such approvals, its ability to capitalize its PRC operations may be negatively affected, which could adversely affect its liquidity and its ability to expand its business.

Table of Contents

Governmental control of currency conversion may affect Linkage Technologies' ability to pay dividends in foreign currencies.

The PRC government imposes controls on the convertibility of the RMB into foreign currencies and, in certain cases, the remittance of currency out of China. Linkage Technologies receives substantially all of its revenues in RMB. Under its current corporate structure, its income is primarily derived from dividend payments from its PRC subsidiaries. Shortages in the availability of foreign currency may restrict the ability of its PRC subsidiaries to remit sufficient foreign currency to pay dividends or other payments to Linkage Technologies, or otherwise satisfy their foreign currency denominated obligations. Under existing PRC foreign exchange regulations, payments of current account items, including profit distributions, interest payments and expenditures from trade-related transactions, can be made in foreign currencies without prior approval from SAFE by complying with certain procedural requirements. However, approval from appropriate government authorities is required where RMB is to be converted into foreign currency and remitted out of China to pay capital expenses such as the repayment of loans denominated in foreign currencies. The PRC government may also at its discretion restrict access in the future to foreign currencies for current account transactions. If the foreign exchange control system prevents Linkage Technologies from obtaining sufficient foreign currency to satisfy its currency demands, it may not be able to pay dividends in foreign currencies to shareholders.

PRC regulations relating to the establishment of offshore special purpose vehicles by PRC residents may subject Linkage Technologies' PRC resident shareholders or Linkage Technologies to penalties and limit its ability to inject capital into its PRC subsidiaries, limit its PRC subsidiaries' ability to distribute profits to Linkage Technologies, or otherwise adversely affect Linkage Technologies.

SAFE issued a public notice in October 2005 requiring PRC residents to register with the local SAFE branch before establishing or controlling any company outside of China for the purpose of capital financing with assets or equities of PRC companies, referred to in the notice as an offshore special purpose vehicle. PRC residents that are shareholders and/or beneficial owners of offshore special purpose companies established before November 1, 2005 are required to register with the local SAFE branch. In addition, any PRC resident that is a shareholder of an offshore special purpose vehicle is required to amend its SAFE registration with respect to that offshore special purpose company in connection with any increase or decrease of capital, transfer of shares, merger, division, equity investment or creation of any security interest over any assets located in China or other material changes in share capital. In May 2007, SAFE issued relevant guidance to its local branches with respect to the operational process for SAFE registration, which standardized more specific and stringent supervision on the registration relating to the SAFE notice. Linkage Technologies has requested its current shareholders and/or beneficial owners to disclose whether they or their shareholders or beneficial owners fall within the ambit of the SAFE notice and urge those who are PRC residents to register with the local SAFE branch as required under the SAFE notice. As of the date of this Proxy Statement, Messrs. Libin Sun, Guoxiang Liu, Dr. Xiwei Huang and Haidong Pang, Linkage Technologies' directors, executive officers and/or principal shareholders that are PRC residents, have complied with the registration requirements under the SAFE notice with respect to their interests in us. Linkage Technologies has not kept record, however, of the extent of compliance with the requirements under the SAFE notice by other shareholders and/or beneficial owners of its ordinary shares. The failure of these shareholders and/or beneficial owners to timely amend their SAFE registrations pursuant to the SAFE notice or the failure of future shareholders and/or beneficial owners of Linkage Technologies who are PRC residents to comply with the registration procedures set forth in the SAFE notice may subject such shareholders, beneficial owners and/or its PRC subsidiaries to fines and legal sanctions and may also limit its ability to contribute additional capital into its PRC subsidiaries, limit its PRC subsidiaries' ability to distribute dividends to Linkage Technologies or otherwise adversely affect its business.

Linkage Technologies may be subject to currency exchange rate risk due to fluctuations in the exchange rate between the U.S. dollars and the RMB.

The value of the RMB against the U.S. dollar and other currencies may fluctuate and is affected by, among other things, changes in political and economic conditions. On July 21, 2005, the PRC government changed its

Table of Contents

decade-old policy of pegging the value of the RMB to the U.S. dollar. Under the new policy, the RMB is permitted to fluctuate within a narrow and managed band against a basket of certain foreign currencies. This change in policy has resulted in an approximately 21.2% appreciation of the RMB against the U.S. dollar between July 21, 2005 and January 21, 2010. Provisions on Administration of Foreign Exchange, as amended in August 2008, further changed China's exchange regime to a managed floating exchange rate regime based on market supply and demand. Since reaching a high against the U.S. dollar in July 2008, however, the Renminbi has traded within a narrow band against the U.S. dollar, remaining within 1% of its July 2008 high but never exceeding it. As a consequence, the Renminbi has fluctuated sharply since July 2008 against other freely traded currencies, in tandem with the U.S. dollar. It is difficult to predict how long the current situation may continue and when and how it may change again. Substantially all of Linkage Technologies' revenues and costs are denominated in the RMB, and a significant portion of its financial assets are also denominated in RMB. Linkage Technologies principally relies on dividends and other distributions paid to it by its subsidiaries in China. Any significant revaluation of the RMB may materially and adversely affect Linkage Technologies' cash flows, revenues, earnings and financial position. Any fluctuations of the exchange rate between the RMB and the U.S. dollar could also result in foreign currency translation losses for financial reporting purposes.

Any health epidemics and other outbreaks, war, acts of terrorism or other man-made or natural disasters could severely disrupt Linkage Technologies' business operations.

Linkage Technologies' business could be materially and adversely affected by the outbreak of H1N1 Flu, avian influenza, severe acute respiratory syndrome, or SARS, or another epidemic. A recent outbreak of swine influenza in Mexico could widely spread to China and there have been hundreds of confirmed cases of H1N1 Flu in China. In 2006 and 2007, there were reports on the occurrences of avian influenza in various parts of China, including a few confirmed human cases and deaths. Any prolonged recurrence of H1N1 Flu, avian influenza, SARS or other adverse public health developments in China could require the temporary closure of Linkage Technologies' offices or prevent its staff from traveling to its customers' offices to sell its services or provide on-site services. Such closures could severely disrupt its business operations and adversely affect its results of operations.

Linkage Technologies' operations are vulnerable to interruption and damage from man-made or natural disasters, including wars, acts of terrorism, snowstorms, earthquakes, fire, floods, environmental accidents, power loss, communications failures and similar events. In January and February of 2008, large portions of Southern and Central China were hit with a series of snowstorms, which caused extensive damage and transportation disruption. On May 12, 2008, a severe earthquake measuring approximately 8.0 on the Richter scale occurred in Sichuan province of China, resulting in huge casualties and property damage. If any similar man-made or natural disaster were to occur in the future, Linkage Technologies' ability to operate its business could be seriously impaired.

If you do not choose to vote by telephone or the Internet, you may still return your proxy card, properly signed, and the shares represented will be voted in accordance with your directions. You can specify your choices by marking the appropriate boxes on the proxy card. If you vote by telephone or the Internet, it is not necessary to return your proxy card.

Your vote is important. Accordingly, regardless of whether you plan to attend the special meeting, you are urged to vote by telephone, by the Internet, or by signing and returning the accompanying proxy card. If your shares are held in street name by your broker or bank, you should instruct your broker or bank how to vote your shares using the instructions provided by your broker or bank. If you have not received such voting instructions or require further information regarding such voting instructions, contact your broker or bank and they can give you instructions on how to vote your shares. If an executed proxy card returned by a broker or bank indicates that the broker or bank does not have discretionary authority to vote on a particular matter, the shares will be considered present at the meeting for purposes of determining the presence of a quorum, but will not be voted. This is called a broker non-vote. Your broker or bank will vote your shares over which it does not have discretionary authority only if you provide instructions on how to vote by following the instructions provided to you by your broker or bank. AsiaInfo common shares held by persons attending the special meeting but not voting, or shares for which AsiaInfo has received proxies with respect to which holders have abstained from

voting, will be considered abstentions. Abstentions and properly executed broker non-votes, if any, will be treated as shares that are present and entitled to vote at the special meeting for purposes of determining whether a quorum exists.

Revocation of Proxies

THE COMBINATION

The following is a discussion of the Combination and the material terms of the Combination Agreement between AsiaInfo and Linkage Cayman. You are urged to read carefully the Combination Agreement in its entirety, a copy of which is attached as Annex A to this Proxy Statement and is incorporated by reference herein.

The Companies

AsiaInfo

AsiaInfo is a leading provider of software solutions and IT services for the telecom industry in China. In the telecommunications market, our software and services enable our customers to build, maintain, operate, manage and continuously improve their communications infrastructure. Our largest customers are the major telecommunications carriers in China and their provincial subsidiaries. In addition to providing customized software solutions to China's telecommunications carriers, we also offer sophisticated IT security products and services to many small- and medium-sized companies and government agencies in China.

We commenced our operations in the United States in 1993 and moved our major operations from the United States to China in 1995. We conduct the bulk of our business through our operating subsidiaries, most of which are Chinese companies.

Linkage Technologies

Like AsiaInfo, Linkage Technologies is a leading provider of software solutions and IT services for the telecom industry in China. Linkage Technologies develops and implements core operating systems for all three telecom operators in China, namely, China Mobile, China Telecom and China Unicom.

Linkage Technologies was organized under the laws of the British Virgin Islands in July 2003. Linkage Technologies conducts its operations through its direct and indirect subsidiaries, including Linkage HK, Linkage Nanjing and Linkage Suzhou. For more information on Linkage Technologies' corporate history and structure, see *Information about Linkage Technologies' Corporate History and Structure* on page 76.

Background of the Combination

AsiaInfo has periodically reviewed and assessed trends and conditions impacting AsiaInfo, including those in the information technology industries generally, and in China's telecommunications software industry in particular. From time to time, AsiaInfo's board of directors has reviewed the strategic options potentially available to achieve AsiaInfo's desired scale, including internal growth through customer and product initiatives, investing in its business, and acquisitions of other businesses. As a result of increased competition in AsiaInfo's industry and ongoing consolidation within the global software and telecommunications industries generally, AsiaInfo has considered the possibility of various strategic combinations and commercial arrangements and, in the past, has had discussions from time to time with potential strategic partners.

Discussions regarding a business combination transaction between AsiaInfo and Linkage Technologies began in April 2009, when representatives of AsiaInfo engaged in discussions with representatives of Linkage Technologies and its parent company, Linkage Cayman. The parties discussed the synergies that could potentially be realized as a result of a combination of the two companies. While AsiaInfo continued to evaluate Linkage Technologies and Linkage Cayman internally at this time, the discussions between AsiaInfo and Linkage Technologies did not lead to a firm proposal by AsiaInfo or otherwise progress to more advanced negotiations at this time.

Table of Contents

From April to September 2009, representatives of AsiaInfo and Linkage Cayman, with their respective financial advisors, continued their discussions from time to time regarding the merits of a business combination.

On September 17, 2009, AsiaInfo and Linkage Cayman entered into a confidentiality agreement in furtherance of a potential business combination transaction. The respective parties commenced limited due diligence on each other with respect to a business combination in the last week of September 2009.

On September 29, 2009, the AsiaInfo board of directors held a special meeting, which was attended by representatives of management, DLA Piper, outside legal counsel to AsiaInfo, and BofA Merrill Lynch and The Hina Group Holdings, or Hina, together with BofA Merrill Lynch, the financial advisors to AsiaInfo. The AsiaInfo board of directors considered AsiaInfo's strategic alternatives, the business of Linkage Technologies, the strategic rationale for AsiaInfo's proposed acquisition of Linkage Technologies, the valuation of Linkage Technologies, and certain legal issues. The AsiaInfo board of directors also considered the key provisions of a preliminary terms sheet prepared by AsiaInfo management upon consultation with its legal and financial advisors and the status of discussions with Linkage Cayman. The AsiaInfo board of directors determined that a business combination with Linkage Technologies would present strategic advantages to AsiaInfo, that AsiaInfo should enter into further negotiations with Linkage Cayman, and that AsiaInfo should present a preliminary term sheet to Linkage Cayman.

On September 29, 2009, AsiaInfo delivered a preliminary non-binding term sheet to Linkage Cayman proposing the acquisition of all of the share capital of Linkage Technologies in exchange for a combination of cash and AsiaInfo common stock. The term sheet proposed that the parties agree to exclusive negotiations with respect to the proposed transaction, subject to certain exceptions.

On September 30, 2009, in response to the term sheet AsiaInfo had provided, AsiaInfo received a counterproposal in the form of a non-binding term sheet from Linkage Cayman. In addition to proposing an increased purchase price for Linkage Technologies, Linkage Cayman proposed that the combined company change its Chinese name to Linkage-AsiaInfo. The term sheet proposed that the parties agree to exclusive negotiations with respect to the proposed transaction, subject to certain exceptions.

During October 2009, representatives of AsiaInfo, Linkage Cayman, and their respective legal and financial advisors continued their discussions regarding the structure of transaction, the valuation of Linkage Technologies, the consideration, and other material terms regarding a proposed transaction. Representatives of Linkage Cayman indicated that the aggregate consideration would need to be increased above the amount AsiaInfo had initially offered in its proposed term sheet in order to be acceptable to Linkage Cayman. The parties also discussed the synergies that could potentially be realized as a result of a combination of the two companies. In addition, during October 2009, management and the board of directors of AsiaInfo conferred with BofA Merrill Lynch and Hina regarding the valuation of Linkage Technologies.

On November 11, 2009, the AsiaInfo board of directors held a special meeting, which was attended by representatives of management, DLA Piper and BofA Merrill Lynch, to consider the combination transaction with Linkage Technologies. The AsiaInfo board of directors considered the status of the negotiations, the structure of the transaction, the strategic rationale for the transaction, the proposed valuation, the recent increase in the trading price of AsiaInfo's common stock and its valuation implications, the impact of the transaction on AsiaInfo's customers, and other key business and legal issues. Representatives of AsiaInfo's management, DLA Piper, and BofA Merrill Lynch responded to questions regarding the transaction and the proposed terms. The AsiaInfo board of directors authorized and directed management to negotiate, finalize and execute a term sheet for the acquisition of Linkage Technologies. The AsiaInfo board of directors authorized and directed management to work with AsiaInfo's legal counsel to prepare and negotiate a definitive agreement and related ancillary agreements for final approval by the AsiaInfo board of directors.

Table of Contents

On November 12, 2009, AsiaInfo delivered a new term sheet to Linkage Cayman for the acquisition of all of the share capital of Linkage Technologies for US\$50 million in cash and shares of AsiaInfo common stock equal to 37.5% of the outstanding equity of the combined company on a fully diluted basis. Under the new term sheet, the English and Chinese names of the combined company would be

AsiaInfo-Linkage, although Linkage Technologies' indirect wholly-owned subsidiary, Linkage Nanjing, would be named Linkage-AsiaInfo in Chinese. The term sheet also proposed that the parties agree to exclusive negotiations with respect to the proposed transaction, subject to certain exceptions, including that Linkage Cayman would be permitted to pursue its initial public offering in the U.S. pursuant to its registration statement on Form F-1. AsiaInfo and Linkage Cayman both signed the term sheet.

On November 12, 2009, AsiaInfo sent Linkage Cayman a supplemental due diligence request list requesting various information and documents relating to Linkage Cayman and its subsidiaries. Upon execution of the term sheet and until the execution of the Combination Agreement, representatives of AsiaInfo, with the assistance of representatives from BofA Merrill Lynch, Hina, DLA Piper, and Han Kun Law Offices, PRC counsel to AsiaInfo, conducted extensive due diligence on Linkage Cayman and its subsidiaries covering a broad range of topics, including corporate, commercial, intellectual property, financial, accounting, legal and business matters.

From November 12, 2009 until the execution of the Combination Agreement, representatives of AsiaInfo, BofA Merrill Lynch, Hina, DLA Piper, Linkage Cayman, and Linkage Cayman's financial and legal advisors continued to discuss, in Beijing and via conference calls, drafting of definitive agreements, due diligence, and the terms of the transaction. During this timeframe, the parties also held extensive discussions regarding the Linkage Cayman representations and warranties, restrictions on Linkage Cayman's and AsiaInfo's conduct during the period between the signing of the Combination Agreement and the closing of the Combination, regulatory reviews of the Combination, post-Combination governance matters, termination fees, the ability of AsiaInfo's board of directors to change its recommendations to AsiaInfo's stockholders and the balancing of restrictions against fiduciary obligations to stockholders, adjustments to the purchase price, indemnification and the size, duration and recourse to an escrow account to secure indemnification and other obligations to AsiaInfo.

From November 16, 2009 until the execution of the Combination Agreement, AsiaInfo, Linkage Cayman, and their respective legal and financial advisors exchanged drafts of the Combination Agreement and held extensive negotiations relating to its terms and conditions.

On November 18, 2009, Linkage Cayman publicly filed its registration statement on Form F-1 with the SEC, which sought to register an unspecified number of American Depositary Shares, or ADSs. On November 19, 2009, Linkage Cayman publicly filed its registration statement on Form F-6 in connection with its proposed offering of ADSs. On November 20, 2009, Linkage Cayman publicly filed its Form 8-A registration statement in connection with its ordinary shares underlying its ADSs, which the New York Stock Exchange certified on November 25, 2009.

On November 25, 2009, Linkage Cayman filed Amendment No. 1 to its registration statement on Form F-1 with the SEC, which sought to register 10,200,000 ADSs, each representing the right to receive ten Linkage Cayman ordinary shares, with an estimated price range of between \$13.00 and \$15.00 per ADS. AsiaInfo was informed that Linkage Cayman would commence a road show in Asia for its proposed public offering on November 26, 2009, which would then move to Europe and the U.S.

On November 28, 2009, the AsiaInfo board of directors held a special meeting, which was attended by representatives of management, DLA Piper, BofA Merrill Lynch, and Hina. The AsiaInfo board of directors considered the status of AsiaInfo's negotiations with Linkage Cayman. Management of AsiaInfo reviewed with BofA Merrill Lynch and DLA Piper open business issues in the Combination Agreement, the status of negotiations, the revised transaction terms, the business integration outlook and management issues for the combined company. Management and representatives of BofA Merrill Lynch and DLA Piper updated the AsiaInfo board of directors regarding financial and legal due diligence that had been conducted on Linkage

Cayman and its subsidiaries. Thereafter, the AsiaInfo board of directors directed management and AsiaInfo's advisors to proceed with negotiations regarding the Combination, with a view toward finalizing a definitive agreement for the further consideration of the AsiaInfo board of directors. The AsiaInfo board of directors also proposed to hold an informal teleconference with Mr. Libin Sun, Chairman and Chief Executive Officer of Linkage Cayman.

On November 29, 2009, certain members of AsiaInfo's board of directors and management held an informal teleconference with Libin Sun. The parties discussed several open business issues and transaction terms, focusing on business integration and post-Combination management issues.

On December 4, 2009, the AsiaInfo board of directors again convened a special meeting to review the status of AsiaInfo's negotiations with Linkage Cayman and the definitive agreements. Management of AsiaInfo and representatives of DLA Piper, BofA Merrill Lynch and Hina were present at the meeting. Management of AsiaInfo reviewed and summarized the status of the Combination Agreement. Representatives of BofA Merrill Lynch and DLA Piper summarized the structure and terms of the transaction, including changes from the terms discussed at the prior meeting and changes from the terms reflected in the non-binding term sheet. Also at this meeting, BofA Merrill Lynch reviewed with AsiaInfo's board of directors its financial analysis of the Consideration and delivered to AsiaInfo's board of directors an oral opinion which was confirmed by delivery of a written opinion dated December 4, 2009, to the effect that, as of that date, and based on and subject to various assumptions and limitations described in its opinion, the Consideration to be paid in the Combination by AsiaInfo is fair, from a financial point of view, to AsiaInfo. The full text of BofA Merrill Lynch's written opinion dated December 4, 2009, which sets forth the assumptions made, procedures followed, matters considered and limitations on the review undertaken in connection with the opinion, is attached to this Proxy Statement as *Annex H*. DLA Piper then presented a due diligence report regarding various legal, financial and business issues that had been analyzed during due diligence of Linkage Cayman and its subsidiaries. The AsiaInfo board of directors posed numerous questions of management regarding business terms, integration issues, the timetable for closing the transaction, and regulatory matters relating to the transaction. Following the discussion, the AsiaInfo board of directors unanimously approved the Combination and the related transactions, approved the Combination Agreement and the ancillary agreements, and recommended that the stockholders of AsiaInfo approve the Combination and the related transactions.

On December 4, 2009, representatives of AsiaInfo and Linkage Cayman finalized the Combination Agreement. As of that date, AsiaInfo and Linkage Cayman entered into the Combination Agreement. Under the Combination Agreement, AsiaInfo would acquire all of the share capital of Linkage Technologies for US\$60 million in cash and 26,832,731 shares of AsiaInfo common stock which is expected to represent approximately 35.8% of the outstanding equity of the combined company on a fully diluted basis. The estimated aggregate market value of the Consideration was approximately \$734 million as of December 4, 2009, and was approximately \$689 million as of February 22, 2010. The name of the combined company will be, and the combined company will be referred to and branded in Chinese as, AsiaInfo-Linkage, although the Linkage Technologies subsidiary in Nanjing would be referred to and branded as Linkage-AsiaInfo. Following signing, certain restrictions would apply to the parties regarding alternative transactions, including a restriction on Linkage Cayman from selling securities under or related to its registration statement on Form F-1 or in any similar public offering or private placement. The terms of the Combination Agreement are summarized under *The Combination Agreement* beginning on page 65.

Concurrently with entering into the Combination Agreement, Edward Tian and James Ding, AsiaInfo directors and significant stockholders, executed a voting agreement with Linkage Cayman; AsiaInfo, Linkage Cayman and Messrs. Tian and Mr. Sun entered into a stockholders agreement; and LT International and Messrs. Sun, Guoxiang Liu, Haidong Pang, Xiwei Huang and Edward Tian entered into lock-up agreements.

On December 6, 2009, AsiaInfo and Linkage Cayman issued a joint press release announcing the Combination, the execution of the Combination Agreement, and related matters.

AsiaInfo's Reasons for the Combination

In the course of determining that the Combination and the Combination Agreement are advisable and in the best interests of AsiaInfo and its stockholders, the AsiaInfo board of directors consulted with its management, as well as its financial and legal advisors. The AsiaInfo board of directors concluded that the Combination could enhance stockholder value through:

the complementary nature of the technology, products and services of AsiaInfo and Linkage Technologies, which may allow the combined company to better service its customers and accelerate the development of new technology;

the ability to broaden and integrate the companies' products and services, which may enable the combined company to meet the needs of its customer more effectively and efficiently;

combined technological resources of AsiaInfo and Linkage Technologies, which may allow the combined company to compete more effectively by providing it with enhanced abilities to develop new products and greater functionality for existing products;

the creation of larger sales and services organizations, greater marketing resources, and financial strength, which may present improved opportunities for marketing the products and services of the combined company;

the combined experience, financial resources, size and breadth of product and service offerings of AsiaInfo and Linkage Technologies, which may allow the combined company to respond more quickly and effectively to technological change, increased competition and shifting market demands;

the opportunity to utilize the skills and resources of the combined management teams;

the potential for the Combination to provide an improved platform for future growth; and

scale and cost synergies, which may enhance AsiaInfo's ability to effectively meet the demands for its products and services. The AsiaInfo board of directors considered a number of factors and risks relating to the Combination, including the following:

its strategic benefits;

historical information regarding AsiaInfo's and Linkage Technologies' respective businesses, prospects, financial performance and condition, operations, technology, management and competitive position;

management's view of the financial condition, results of operations and businesses of AsiaInfo and Linkage Technologies before and after giving effect to the Combination;

current financial and market conditions;

the relationship between the market value of AsiaInfo's common stock and the consideration to be paid to the shareholders of Linkage Technologies;

management's view of the prospects of AsiaInfo and Linkage Cayman as separate, independent entities should the Combination not occur;

other strategic alternatives of AsiaInfo;

the opinion of BofA Merrill Lynch dated December 4, 2009, to AsiaInfo's board of directors as to the fairness, from a financial point of view and as of the date of the opinion, of the Consideration to be paid in the Combination by AsiaInfo as more fully discussed in the section entitled *The Combination Opinion of AsiaInfo's Financial Advisor* beginning on page 52;

reports from management and AsiaInfo's legal, accounting and financial advisors regarding the results of the due diligence investigation of Linkage Cayman and its subsidiaries;

the risk that the potential benefits of the Combination may not be fully realized;

the possibility that the Combination may not be consummated or may be unduly delayed;

the effect that the Combination may have on sales, operating results, and key personnel;

the ability to attract and retain management and key personnel;

the potential for diversion of management and employee attention from other strategic priorities;

the substantial challenges and costs to be incurred in connection with the Combination, including integration costs and transaction expenses;

the risks associated with a fixed number of shares payable to the shareholders of Linkage Cayman under the Combination Agreement, which subjects the parties to market risk if AsiaInfo's stock price fluctuates significantly prior to the Combination;

the \$17.6 million termination fee payable to Linkage Cayman if the Combination Agreement is terminated as a result of a material and uncured breach of the representations and warranties or covenants of AsiaInfo, or a change by the board of directors of AsiaInfo of its recommendation that the stockholders vote in favor of the proposals to be considered at the special meeting; and

the \$10.0 million termination fee payable to Linkage Cayman if the Combination Agreement is terminated due to the failure of the AsiaInfo stockholders to approve the Consideration Proposal or the Name Change Proposal.

The foregoing discussion of the factors considered by AsiaInfo's board of directors is not intended to be exhaustive but summarizes the material factors and risks considered in making its recommendation. In view of the wide variety of factors considered in connection with its evaluation of the Combination and the complexity of these matters, the AsiaInfo board of directors did not find it useful, and did not attempt, to quantify, rank or otherwise assign relative weights to these factors. In considering the factors described above, individual members of the AsiaInfo board of directors may have given different weight to different factors.

In addition, the AsiaInfo board of directors did not undertake to make any specific determination as to whether any particular factor, or any aspect of any particular factor, was favorable or unfavorable to its ultimate determination, but rather conducted an overall analysis of the factors described above, including thorough discussions with, and questioning of, AsiaInfo's management team and AsiaInfo's legal and financial advisors. Based on the totality of the information presented, AsiaInfo's board of directors determined that AsiaInfo should proceed with the Combination and the Combination Agreement, and recommends that AsiaInfo's stockholders approve the Consideration Proposal, the Name Change Proposal and the Adjournment Proposal. As of the date of this Proxy Statement, there have been no material changes in the operations or performance of AsiaInfo or Linkage Cayman or in the financial projections by AsiaInfo's management provided to BofA Merrill Lynch since the delivery of its opinion dated December 4, 2009, and AsiaInfo does not anticipate such changes to occur prior to the special meeting of AsiaInfo's stockholders.

Linkage Cayman's Reasons for the Combination

In reaching a conclusion to approve the Combination, the Linkage Cayman board of directors consulted with its management, as well as its financial and legal advisors. The board of directors considered a number of factors, including, without limitation, the following:

The strategic fit between the companies, including the companies' product portfolios and the increased operational scale and scope that the combined company will provide, which may result in a more diversified revenue base and enable the combined company to better meet its customers' needs;

Table of Contents

The potential synergies expected to be derived from the Combination of Linkage Technologies and AsiaInfo's businesses, including elimination of duplicative corporate costs, decreased research and development costs, and tax benefits;

Linkage Cayman's and Linkage Technologies' management's support of the proposed Combination;

That the shareholders of Linkage Cayman will receive a substantial cash payment, while at the same time retaining an equity stake in the combined company, which would provide the shareholders of Linkage Cayman the opportunity, if they so choose, to participate in the future financial performance of the combined company. In that regard, Linkage Cayman's board of directors understood that general stock market conditions and other factors will cause the value of the portion of the Combination consideration payable in AsiaInfo's common stock to fluctuate, perhaps significantly, but was of the view that on a long-term basis it would be desirable for shareholders to have an opportunity, if they so choose, to retain a continuing investment in the combined company;

The fact that following the completion of the Combination the board of directors of the combined company would include two current non-independent Linkage Cayman directors, which the Linkage Cayman board of directors believed would provide the AsiaInfo board of directors with a greater level of knowledge regarding Linkage Technologies' operations and thereby provide a greater level of stability regarding those operations as they become part of AsiaInfo's business;

The review by the Linkage Cayman board of directors with its legal and financial advisors of the structure of the Combination and the financial and other terms of the Combination Agreement, including the parties' representations, warranties and covenants, the conditions to their respective obligations and the termination provisions, as well as the Linkage Cayman board of directors evaluation of the likely time period necessary to close the Combination;

The fact that the Combination Agreement provides for a fixed number of shares of AsiaInfo common stock to be issued in the Combination regardless of any change in the value of Linkage Technologies ordinary shares or AsiaInfo common stock between the execution of the Combination Agreement and closing of the Combination. The Linkage Cayman board of directors understood that the shareholders of Linkage Cayman will not receive additional consideration if the value per share of AsiaInfo common stock is lower at the time of closing than prior to the execution of the Combination Agreement, but was of the view that it is desirable for the shareholders of Linkage Cayman to receive the benefit of any increase in value of AsiaInfo common stock during that time period;

the \$17.6 million termination fee payable to Linkage Cayman if the Combination Agreement is terminated as a result of a material and uncured breach of the representations and warranties or covenants of AsiaInfo, or a change by the board of directors of AsiaInfo of its recommendation that the stockholders vote in favor of the proposals to be considered at the special meeting; and

the \$10.0 million termination fee payable to Linkage Cayman if the Combination Agreement is terminated due to the failure of the AsiaInfo stockholders to approve the Consideration Proposal or the Name Change Proposal.

In the course of its deliberations, the Linkage Cayman board of directors also considered the following factors and risks concerning the Combination:

the possibility that the Combination might not be completed in a timely manner or at all;

the possibility that the expected cost savings and synergies will not be achieved. Achieving the expected cost savings and synergies is subject to a number of risks and uncertainties and may not occur in full or at all. For more information, see the discussion provided under the section titled *Risk Factors Risks Relating to the Combination Integrating the combined company will divert management's attention and resources, and the anticipated benefits of the Combination, including anticipated cost savings, may not*

be realized fully or at all or may take longer to realize than expected. beginning on page 24.

the risk that AsiaInfo may terminate the Combination Agreement;

the risks associated with obtaining the AsiaInfo stockholder votes; and

the cost of foregoing Linkage Cayman's initial public offering and other strategic alternatives.

The foregoing information and factors considered by Linkage Cayman's board of directors are not intended to be exhaustive but are believed to summarize the material factors and risks considered by Linkage Cayman's board of directors. In view of the wide variety of factors considered in connection with its evaluation of the Combination and the complexity of these matters, Linkage Cayman's board of directors did not find it useful, and did not attempt, to quantify, rank or otherwise assign relative weights to these factors. In considering the factors described above, individual members of Linkage Cayman's board of directors may have given different weight to different factors. Linkage Cayman's board of directors conducted an overall analysis of the factors described above, including thorough discussions with, and questioning of, Linkage Cayman's management and Linkage Cayman's legal and financial advisors, and considered the factors overall to be favorable to, and to support, its determination.

Linkage Cayman's board of directors determined that the Combination Agreement and the Combination are advisable, fair to and in the best interest of the shareholders of Linkage Cayman and approved the Combination. Linkage Cayman is incorporated as an exempted limited company under the laws of the Cayman Islands. In the opinion of Linkage Cayman's Cayman Islands legal counsel, Conyers Dill & Pearman, under Cayman Islands law, and under Linkage Cayman's articles of association, no vote of Linkage Cayman shareholders is necessary for the completion of the Combination.

Miscellaneous

As noted above, the discussion set forth above is a summary of the material financial analyses presented by BofA Merrill Lynch to AsiaInfo's board of directors in connection with its opinion and is not a comprehensive description of all analyses undertaken by BofA Merrill Lynch in connection with its opinion. The preparation of a financial opinion is a complex analytical process involving various determinations as to the most appropriate and relevant methods of financial analysis and the application of those methods to the particular circumstances and, therefore, a financial opinion is not readily susceptible to partial analysis or summary description. BofA Merrill Lynch believes that its analyses summarized above must be considered as a whole. BofA Merrill Lynch further believes that selecting portions of its analyses and the factors considered or focusing on information presented in tabular format, without considering all analyses and factors or the narrative description of the analyses, could create a misleading or incomplete view of the processes underlying BofA Merrill Lynch's

Table of Contents

analyses and opinion. The fact that any specific analysis has been referred to in the summary above is not meant to indicate that such analysis was given greater weight than any other analysis referred to in the summary.

In performing its analyses, BofA Merrill Lynch considered industry performance, general business and economic conditions and other matters, many of which are beyond the control of AsiaInfo and Linkage Technologies. The estimates of the future performance of AsiaInfo and Linkage Technologies in or underlying BofA Merrill Lynch's analyses are not necessarily indicative of actual values or actual future results, which may be significantly more or less favorable than those estimates or those suggested by BofA Merrill Lynch's analyses. These analyses were prepared solely as part of BofA Merrill Lynch's analysis of the fairness, from a financial point of view, to AsiaInfo of the Consideration to be paid in the Combination by AsiaInfo and were provided to AsiaInfo's board of directors in connection with the delivery of BofA Merrill Lynch's opinion. The analyses do not purport to be appraisals or to reflect the prices at which a company might actually be sold or the prices at which any securities have traded or may trade at any time in the future. Accordingly, the estimates used in, and the ranges of valuations resulting from, any particular analysis described above are inherently subject to substantial uncertainty and should not be taken to be BofA Merrill Lynch's view of the actual values of AsiaInfo or Linkage Technologies.

The type and amount of consideration payable in the Combination was determined through negotiations between AsiaInfo and Linkage Cayman, and was not determined by BofA Merrill Lynch or by any other financial advisor, and were approved by AsiaInfo's board of directors. The decision to enter into the Combination Agreement by AsiaInfo was solely that of AsiaInfo's board of directors. As described above, BofA Merrill Lynch's opinion and analyses were only one of many factors considered by AsiaInfo's board of directors in its evaluation of the proposed Combination and should not be viewed as determinative of the views of AsiaInfo's board of directors or the management of AsiaInfo with respect to the Combination or the Consideration.

AsiaInfo has agreed to pay BofA Merrill Lynch for its services in connection with the Combination an aggregate fee currently estimated to be approximately \$1.5 million, \$500,000 of which was payable in connection with its opinion and the remaining portion of which is contingent upon the completion of the Combination. AsiaInfo also has agreed to reimburse BofA Merrill Lynch for its expenses incurred in connection with BofA Merrill Lynch's engagement and to indemnify BofA Merrill Lynch, any controlling person of BofA Merrill Lynch and each of their respective directors, officers, employees, agents and affiliates against specified liabilities, including liabilities under the federal securities laws.

BofA Merrill Lynch and its affiliates comprise a full service securities firm and commercial bank engaged in securities, commodities and derivatives trading, foreign exchange and other brokerage activities, and principal investing as well as providing investment, corporate and private banking, asset and investment management, financing and financial advisory services and other commercial services and products to a wide range of companies, governments and individuals. In the ordinary course of their businesses, BofA Merrill Lynch and its affiliates may invest on a principal basis or on behalf of customers or manage funds that invest, make or hold long or short positions, finance positions or trade or otherwise effect transactions in the equity, debt or other securities or financial instruments (including derivatives, bank loans or other obligations) of AsiaInfo and certain of its respective affiliates and any other company that may be involved in the transaction contemplated hereby.

BofA Merrill Lynch and its affiliates have not in the past two years provided investment banking, commercial banking or other financial services or had any material relationship with AsiaInfo. However, BofA Merrill Lynch and its affiliates in the future may provide such services to AsiaInfo and may receive compensation for the rendering of these services, including acting as lead manager or sole bookrunner in connection with any financing transaction by AsiaInfo in the connection with the Combination.

Interests of AsiaInfo's Directors, Executive Officers and Certain Significant Stockholders in the Combination

You should be aware that some of AsiaInfo's directors and executive officers have interests in the Combination that are different from, or are in addition to, the interests of AsiaInfo stockholders generally.

Table of Contents

At the closing of the Combination, Steve Zhang will continue to be the Chief Executive Officer and President of the combined company, Wei Li will continue to be the Chief Financial Officer of the combined company, and James Ding will continue to serve as a Co-Chairman of the board of directors. Additionally, Steve Zhang, James Ding, Edward Tian, Tom Manning, Yungang Lu and Davin Mackenzie, each of whom currently serve on the AsiaInfo board of directors, are expected to continue to be members of the board of directors of the combined company.

Steve Zhang, Wei Li, Jie Li, the Vice President and General Manager of Human Resources and Administration of AsiaInfo, Jian Qi, the President and Chief Executive Officer of the Lenovo-AsiaInfo Division of AsiaInfo, and Feng Liu, the Vice President and General Manager of Research and Development of the AsiaInfo Technologies Division of AsiaInfo, hold 247,500, 60,000, 20,000, 35,000 and 44,500 performance stock units of AsiaInfo, respectively. These performance stock units vest based upon achievement of targeted increases in the Company's operating profit. If this Combination is completed, the combined company's results of operations could result in the vesting of some or all of these performance stock units.

Interests of Linkage Technologies' Directors, Executive Officers and Certain Significant Shareholders in the Combination

You should be aware that Linkage Technologies' executive officers and directors, some of whom will become executive officers and directors of AsiaInfo-Linkage following consummation of the Combination, have interests in the transaction that are different from, or in addition to, your interests as a shareholder. These interests include, among other things:

AsiaInfo will offer employment agreements (including related change of control severance agreements) to each of Libin Sun, Guoxiang Liu and Xiwei Huang, to be effective upon the closing of the Combination. Such employment agreements with each of Mr. Sun, Mr. Liu and Dr. Huang will be in substantially the same form as those forms that have been publicly filed as exhibits to AsiaInfo's SEC filings prior to the date of the Combination Agreement between AsiaInfo and AsiaInfo's executive officers. Although the amount of compensation to be paid to each of Mr. Sun, Mr. Liu and Dr. Huang under the terms of these employment agreements has not yet been finalized by the parties, we currently expect that each individual will receive an initial base salary consistent with the base salary such individual received from Linkage Cayman for the 12 months prior to December 4, 2009.

At the closing of the Combination, the initial AsiaInfo-Linkage board of directors will consist of nine directors, of which AsiaInfo will designate six directors and Linkage Cayman will designate three directors. Mr. Sun will be the Executive Co-Chairman of the board of directors of AsiaInfo-Linkage.

Upon the closing of the Combination, affiliates or immediate relatives of certain directors and officers of Linkage Technologies (including Mr. Sun, Mr. Liu and Dr. Huang), who currently beneficially own shares in Linkage Technologies, are expected to, in aggregate, beneficially own 12,068,756 shares of common stock of the combined company.

All such persons are also expected to be subject to a 24-month lock-up agreement with respect to such shares of AsiaInfo common stock as described in *The Combination Agreement Lock-Up Agreements* beginning on page 74. AsiaInfo, Linkage Cayman and Mr. Sun have entered into a stockholders' agreement as described in *The Combination Agreement Stockholders' Agreement* beginning on page 74. AsiaInfo and LT International Limited (a company incorporated in the British Virgin Islands and wholly-owned by Mr. Sun) will also enter into a registration rights agreement with respect to the shares of AsiaInfo common stock to be received by LT International Limited in connection with the Combination. See *The Combination Agreement Registration Rights Agreements* beginning on page 74.

Accounting Treatment of the Combination

The Combination will be accounted for as an acquisition by AsiaInfo of Linkage Technologies, as that term is used under US GAAP, for accounting and financial reporting purposes. In identifying AsiaInfo as the acquiring entity, AsiaInfo took into account the relative outstanding share ownership, the composition of the governing body

Table of Contents

of the combined company and the designation of certain senior management positions of the combined company. The assets (including identifiable intangible assets) and liabilities (including executory contracts and other commitments) of Linkage Technologies will be recorded at their respective fair values and added to those of AsiaInfo, including an amount for goodwill representing the difference between the purchase price and the fair value of the identifiable net assets. Excess of fair value of Linkage Technologies' net assets over the purchase price, if any, will be recorded as a gain in earnings on the date the transactions are completed. The financial statements of the combined company issued after the closing under the Combination Agreement will reflect such fair values and will not be restated retroactively to reflect the historical financial position or results of operations of Linkage Technologies. The results of operations of Linkage Technologies will be included in the results of operations of combined company following the closing under the Combination Agreement, and thereafter the combined company will report its historical financial results and condition using AsiaInfo's historical financial statements.

All unaudited pro forma condensed combined financial information contained in this Proxy Statement were prepared using the purchase method of accounting. The allocation of the purchase price has not been determined and will be determined after the Combination is completed and after completion of an analysis to determine the fair value of Linkage Technologies' assets and liabilities. Accordingly, the final purchase accounting adjustments may be materially different from the unaudited pro forma adjustments. Any decrease in the fair value of the assets or increase in the fair value of the liabilities of Linkage Technologies as compared to the unaudited pro forma information included in this Proxy Statement will have the effect of increasing the amount of the purchase price allocable to goodwill.

Regulatory Approvals Required for the Combination

PRC M&A Rules

On August 8, 2006, six PRC regulatory agencies, including MOFCOM, SASAC, the State Administration for Taxation, the State Administration for Industry and Commerce, CSRC, and SAFE, jointly adopted the M&A Rules, which became effective on September 8, 2006 and were subsequently amended on June 22, 2009 by MOFCOM. Among other things, the M&A Rules require offshore special purpose vehicles, or SPVs, that are controlled by PRC companies or residents and that have been formed for the purpose of seeking a public listing on an overseas stock exchange through acquisitions of PRC domestic companies or assets to obtain CSRC approval prior to publicly listing their securities on an overseas stock exchange. On September 21, 2006, the CSRC published a notice on its website specifying the documents and materials that SPVs are required to submit when seeking CSRC approval for their listings outside of China. To date, the CSRC has not issued any definitive rule or interpretation concerning whether the transactions contemplated by this Proxy Statement are subject to this new procedure.

In the opinion of Linkage Technologies' PRC counsel, Global Law Office, and AsiaInfo's PRC counsel, Han Kun Law Office, based on their informal advice from MOFCOM unless there are new PRC laws and regulations or clear requirements from the CSRC in any form providing otherwise, CSRC approval is not required for the Combination. In addition, according to Global Law Office and Han Kun Law Office, the acquisition by foreign investors of PRC domestic companies under the M&A Rules only refer to the acquisition by foreign companies of equity interests or assets of domestic PRC companies that are defined as non-foreign-invested enterprises, whereas the transactions involved in the Combination are between offshore companies; therefore, the Combination does not require approval by MOFCOM or any local commerce authority under the M&A Rules. Accordingly, the parties to the Combination Agreement have not taken steps to obtain approval from MOFCOM, any local commerce authority, CSRC or any other regulatory agency in the PRC, for the Combination. However, the interpretation and application of the M&A Rules remain unclear, and PRC government authorities have the sole discretion to determine whether the Combination is subject to the approval of MOFCOM, CSRC or other PRC regulatory agencies. If PRC government authorities subsequently determine that MOFCOM, CSRC or other regulatory agency approval is required for the Combination, or if implementing rules or guidance are issued prior to the completion of the Combination which consequently conclude approval is required for the Combination, the parties to the Combination Agreement cannot predict how long it would take to obtain such approval. Additionally, if governmental approval is required for this transaction, AsiaInfo's and

Table of Contents

Linkage Technologies' failure to obtain or delay in obtaining approval for the Combination could subject AsiaInfo and/or Linkage Technologies to sanctions imposed by PRC regulatory agencies, which could include fines and penalties on AsiaInfo's and/or Linkage Technologies' operations in China, preventing the completion of the Combination, requiring that the Combination be unwound, and other forms of sanctions that may materially and adversely affect the business, results of operations and financial condition of AsiaInfo and/or Linkage Technologies.

The M&A Rules also established additional regulatory procedures and requirements that are expected to make merger and acquisition activities in China by foreign investors more time-consuming and complex, including requirements in some instances that MOFCOM be notified in advance of any change-of-control transaction in which a foreign investor takes control of a PRC domestic enterprise and any of the following situations exist (i) the transaction involves an important industry in China; (ii) the transaction may affect national economic security; or (iii) the PRC domestic enterprise has a well-known trademark or historical Chinese trade name in China. The M&A Rules also require that the approval from the MOFCOM be obtained in circumstances where overseas companies established or controlled by PRC enterprises or residents acquire affiliated domestic companies. Complying with the requirements of the above regulations to complete such transactions could be time-consuming, and any required approval processes, including approval from MOFCOM, may delay or inhibit the completion of the Combination.

PRC Anti-Monopoly Law

China's AML was approved by the National People's Congress on August 30, 2007, and became effective date on August 1, 2008. While certain aspects of the AML are unclear and are subject to subsequent interpretation by China's State Council, Anti-Monopoly Commission and Anti-Monopoly Enforcement Agency, the AML prohibits certain conduct, referred to as monopolistic acts, and requires checks on mergers and acquisitions of foreign and Chinese enterprises to ascertain whether they will have the effect of eliminating or restricting competition on the domestic market of China and whether they affect national security in China. The law also provides the Anti-Monopoly Commission with authority to make competition policy, publish guidelines, coordinate anti-monopoly enforcement work and conduct investigations and impose penalties on business operators that commit certain monopolistic acts within or outside of China that have the effect of eliminating or restricting competition in the China market.

In the opinion of Linkage Technologies' PRC counsel, Global Law Office, and AsiaInfo's PRC counsel, Han Kun Law Offices, unless there are new PRC laws and regulations or clear requirements in any form that require the approval under the AML for the Combination, PRC government approval under the AML is not required for the Combination because the historical revenues of AsiaInfo and Linkage Technologies fall below certain thresholds set forth in the AML. Accordingly, the parties to the Combination Agreement have not taken steps to obtain approval under the AML for the Combination. However, there are still many ambiguities under the AML and uncertainty as to the scope of the regulations. If the PRC government authorities subsequently determine that AML approval is required for the Combination, or if implementing rules or guidance are issued prior to the completion of the Combination which conclude that AML approval is required for the Combination, the parties to the Combination Agreement cannot predict how long it would take to obtain such approval.

No Appraisal Rights

Under Section 262 of the General Corporation Law of the State of Delaware, the holders of AsiaInfo common stock will have no appraisal rights in connection with the Combination.

Guoxiang Liu, a director and President of Linkage Cayman, Xiwei Huang, a director and Chief Operating Officer and Chief Accounting Officer of Linkage Cayman, Haidong Pang, a shareholder of Linkage Cayman, and Edward Tian, a director of AsiaInfo, entered into lock-up agreements. By the date of closing of the Combination Agreement, shareholders collectively owning at least 95% of Linkage Cayman's shares must also enter into lock-up agreements. The lock-up agreements prohibit transfers of AsiaInfo's shares received pursuant to the Combination Agreement until they are released from lock-up, subject to certain exceptions. At each 6-month anniversary of the closing under the Combination Agreement, 25% of the shares held by each of the parties will be released from lock-up.

The foregoing description of the lock-up agreement does not purport to be complete and is qualified in its entirety by reference to the lock-up agreement, a form of which is attached as *Annex D* hereto. We encourage you to read the lock-up agreement in its entirety.

This summary is not complete and is qualified in its entirety by reference to the complete text of the Combination Agreement. *The representations and warranties described below and included in the Combination Agreement were made by AsiaInfo, on the one hand, and Linkage Cayman and certain key Linkage Cayman shareholders, on the other hand, to each other as of specific dates. The assertions embodied in those representations and warranties were made for purposes of the Combination Agreement and were subject to important qualifications and limitations agreed to by AsiaInfo, Linkage Cayman and certain key Linkage Cayman shareholders in connection with negotiating its terms. Moreover, the representations and warranties were subject to a contractual standard of materiality that may be different from what may be viewed as material to stockholders, or may have been used for the purpose of allocating risk between AsiaInfo, Linkage Cayman and certain key Linkage Cayman shareholders rather than establishing matters as facts. You should read the information provided elsewhere in this Proxy Statement and in the documents incorporated by reference into this Proxy Statement for information regarding AsiaInfo and Linkage Technologies, and their respective businesses. See *Where You Can Find More Information* beginning on page 128 of this Proxy Statement.*

Directors and Executive Management Following the Combination

Upon the consummation of the Combination, the combined company's board of directors will be comprised of four non-independent directors and five independent directors. Linkage Cayman will be entitled to designate for appointment two non-independent directors who held management positions with Linkage Cayman prior to the consummation of the Combination, which directors shall initially be Libin Sun and Xiwei Huang, as well as one independent director. The two remaining non-independent directors shall be directors who served on AsiaInfo's board of directors immediately prior to the closing of the Combination, and are expected to be Steve Zhang and Tom Manning. Additionally, the remaining four independent directors shall be appointed by the current AsiaInfo board of directors immediately prior to the closing of the Combination, and are expected to be James Ding, Edward Tian, Yungang Lu and Davin Mackenzie. Mr. Sun will be appointed Executive Co-Chairman of the board of directors, and Mr. Ding will serve as a Co-Chairman of the board of directors.

Steve Zhang will be the Chief Executive Officer and President of the combined company, Wei Li will be the Chief Financial Officer of the combined company, and Xiwei Huang will be the Chief Operating Officer of the combined company.

Consideration to be Issued in the Combination

Upon the closing of the Combination, AsiaInfo will purchase 100% of the outstanding share capital of Linkage Technologies in exchange for the payment of US\$60 million and the issuance of 26,832,731 shares of common stock of AsiaInfo, or the Consideration. The estimated aggregate market value of the Consideration was approximately \$734 million as of December 4, 2009, and was approximately \$689 million as of February 22, 2010. The Consideration will be subject to certain pre-closing and post-closing adjustments, as described in more detail below. Linkage Cayman has agreed to distribute the Consideration promptly following the closing of the Combination to the Legacy Linkage Shareholders (each of whom is not a U.S. person) in a non-public offering in accordance with Regulation S promulgated under the Securities Act.

Of the aggregate Consideration to be delivered to Linkage Cayman, 10% (consisting of US\$6 million in cash and 2,683,273 shares of AsiaInfo common stock) will instead be deposited into an escrow account for a period of 18 months as security for the indemnification obligations of Linkage Cayman and certain key Linkage Cayman shareholders described in more detail below.

The aggregate Consideration to be delivered to Linkage Cayman at the closing of the Combination may be reduced if Linkage Cayman has not met certain threshold requirements with respect to its customer orders as of January 18, 2010, which thresholds the parties currently believe have been satisfied. Additionally, to the extent that Linkage Cayman's actual working capital and actual net debt at the time of the closing of the Combination do not meet certain threshold requirements, the amounts of any such deficiencies will be released from the escrowed funds to AsiaInfo.

Representations and Warranties

The Combination Agreement contains generally customary representations and warranties of AsiaInfo, Linkage Cayman and certain key Linkage Cayman shareholders relating to their respective businesses, or in the case of the key Linkage Cayman shareholders, their qualification and authority to enter into the Combination Agreement. For purposes of determining the satisfaction of the closing conditions relating to each party's representations and warranties as described under *The Combination Agreement Conditions to Completion of the Combination* beginning on page 71, subject to limited exceptions, each representation and warranty, when read without any qualifications relating to materiality or material adverse effect, will be deemed to be true and correct in all respects unless the failure or failures of such representations and warranties to be true and correct, individually or in the aggregate, results in a material adverse effect with respect to the party making the representations and warranties. As used in the Combination Agreement, material adverse effect means with respect to AsiaInfo or Linkage Cayman, as the case may be, any event, change or effect that, individually or together with all other events, changes or effects has had or would reasonably be expected to have a materially adverse effect on the financial condition, properties, assets, liabilities, business, operations or results of operations of such party and its subsidiaries (taken as a whole). However, in determining whether a material adverse effect has occurred, there will be excluded any event, change or effect on the referenced party which resulted from or is attributable to:

general economic conditions (provided such party and its subsidiaries (taken as a whole) are not disproportionately impacted by such conditions);

general industry conditions (provided such party and its subsidiaries (taken as a whole) are not disproportionately impacted by such conditions);

the announcement or pendency of the Combination;

any action or inaction by such party taken or omitted to be taken with the other party's prior written consent, at the other party's request, or required by the Combination Agreement;

any modifications of or to law applicable to such party or any generally accepted accounting principles or the interpretation or application thereof;

any act of terrorism, war, calamity or act of God, to the extent that such act does not have a materially disproportionate effect on such party; or

with respect to AsiaInfo only, any decrease in the trading price of AsiaInfo common stock due to the failure to meet any projections or budgets (provided that the underlying cause for such failure may still qualify as a material adverse effect if it satisfies one of the foregoing tests).

Each of AsiaInfo, on the one hand, and Linkage Cayman, on the other hand, has made representations and warranties to the other in the Combination Agreement that are subject, in some cases, to specified exceptions and qualifications. These representations and warranties relate to, among other things:

Each of Linkage Cayman and AsiaInfo has agreed that prior to the earlier of the termination of the Combination Agreement or the consummation of the Combination, it, its subsidiaries, and with respect to Linkage Cayman only, certain of its key shareholders, and any of their respective officers, directors, employees, advisors, consultants, representatives or agents, will not, directly or indirectly:

IT Services and Third-Party Hardware and Software

Linkage Technologies offers value-added services to address its customers' IT requirements apart from software development. Its IT service revenues include revenues from system integration and other value-added IT consulting and planning services. Linkage Technologies also generates revenues from the implementation of third-party hardware and software in its customized software solutions.

Value-added IT consulting and planning services. Linkage Technologies leverages its industry knowledge, research capabilities and development expertise to offer its customers stand-alone, value-added consulting services for all aspects of their information systems, including system evaluation, reconfiguration, security and risk management.

System integration services. Since inception, Linkage Technologies has provided system integration services to its customers to assist them in the procurement and installation of hardware and software solutions that best suit their system requirements. While system integration is not the main focus of its business, Linkage Technologies provides these services as part of its effort to build relationships with customers and provide comprehensive one-stop services.

Linkage Technologies' Customers

Linkage Technologies' customers are the three Chinese telecom operators, namely, China Mobile, China Telecom and China Unicom, and their provincial subsidiaries. Each major telecom operator in China has approximately 30 provincial subsidiaries. The provincial subsidiaries and the headquarters generally make independent decisions on IT-related procurement, including the implementation of telecom software solutions and the selection of the software provider for the entire core operating systems, functional modules, related services and upgrades. As a result, Linkage Technologies separately negotiates and contracts with each individual provincial subsidiary and the headquarters of the respective telecom operators to provide telecom software solutions and IT services. The decision to purchase Linkage Technologies' products and services is, in certain cases, made by operators at the headquarter level and, in other cases, at provincial levels. In some cases, Linkage Technologies' customers require that the headquarters act as the contracting party to contracts negotiated by their provincial subsidiaries. As of September 30, 2009, Linkage Technologies had contracted with an aggregate of 69 provincial subsidiaries and the headquarters of the three operators, representing approximately two-thirds of the total number of their provincial subsidiaries and headquarters.

Linkage Technologies believes its long and trusted relationships with the provincial subsidiaries, as well as the headquarters of these operators, have enabled it to actively participate in their strategic planning for IT spending and position it at the forefront of the technological development of the Chinese telecom information systems.

China Mobile. Linkage Technologies first offered its telecom software solutions and services to China Mobile in Xinjiang province in 1999. Since then, Linkage Technologies has completed full scale telecom software solutions and specific modules for 18 provincial subsidiaries and the headquarters of China Mobile, including billing, customer relationship management, settlement, network management systems, accounts and business intelligence modules.

China Telecom. Linkage Technologies first offered its telecom software solutions and services to China Telecom in Jiangsu province in 1997. Sales and Marketing

Sales

Linkage Technologies sells its solutions primarily through its sales division, which had 57 employees as of September 30, 2009. Linkage Technologies has set up one account team for each of the three major Chinese telecom operators, and four regional teams, covering the entire PRC (other than the Hong Kong Special Administrative Region). Account teams are based in Beijing, where the three Chinese telecom operators are headquartered, and are responsible for obtaining an understanding of the development of its customers' strategic plans and coordinating the implementation of such strategic plans with its regional teams. Headed by a senior vice president or a vice president, each regional team covers a number of major provinces and a few areas with relatively underdeveloped customer bases. They work closely with the customers' local operational units to implement the headquarters' strategic plans. In addition, all teams coordinate with Linkage Technologies' technology division and customer service department to provide comprehensive customer support. Linkage Technologies' management reinforces its sales efforts by maintaining close contact with the customers' decision-makers for IT solutions.

Marketing

Linkage Technologies' marketing organization focuses on defining product requirements, educating its customers, media and analysts on its technology, building brand awareness and supporting the efforts of the sales teams. Linkage Technologies promotes its solutions and services through annual conferences hosted by telecom operators, product launch news conferences, trade advertising and industry conferences, a company website and marketing media.

Customer Service

Linkage Technologies strives to provide high quality customer service based on the standards promulgated under ISO 9000, and Level III of the Capability Maturity Model. Linkage Technologies provides customer services via its contract execution management, customer service and technical support teams. Linkage Technologies' contract execution management team plans and coordinates the execution process of its commercial contracts to manage the timing of its projects, which, in turn, facilitates its collection management. Linkage Technologies' customer service team, operating out of its 37 service centers across 23 provinces throughout China, is available for customer inquiries and requests. Linkage Technologies maintains both a 24 hours service hotline and customer support email system. Linkage Technologies' technical support team provides remote maintenance and on-site support to ensure customers receive localized technical service. Linkage Technologies' local technical teams also work closely with its customers' information technology department to provide regular on-going services such as scheduled system check-up and troubleshooting.

To further enhance its customers' experience, Linkage Technologies surveys its customers regularly through a system of First Contact Responsibility, which requires all its employees to take responsibility in properly logging customer requests with its customer service department.

Table of Contents

Technology

Linkage Technologies' solutions are developed based on unified software development platforms, which contain scalable modules and standardized interfaces. The graphic below illustrates the functions of Linkage Technologies' proprietary technologies underlying its solutions:

BUDE and WADE are Linkage Technologies' two major proprietary software development platforms. BUDE is a Unix-based technical platform, while WADE is based on Java 2nd Enterprise Edition technologies. WADE is widely used as the development framework for browser/server architecture in conjunction with BUDE, which supports database management systems and provides interfaces for WADE. These platforms allow Linkage Technologies' solutions to work in various environments, including:

Operating Systems: Windows, Linux, HP-Unix, Solaris, AIX, etc.

Application Server: WebSphere, Weblogic, Jboss, Tomcat, etc.

Middleware: Tuxedo, CICS, Tong, etc.

Below are some notable features of Linkage Technologies' technologies:

Unified software development platform. Linkage Technologies' BUDE and WADE development platforms are designed to standardize and simplify its development processes. They are module-based platforms that hide lower-level platforms and technical details from higher-level applications so that Linkage Technologies' engineers can focus on the development in their assigned areas. Leveraging BUDE and WADE, Linkage Technologies has developed many of its solutions that are easily adapted to the change of business needs. For example, Linkage Technologies' integrated settlement systems are capable of accommodating complex new business models by simply changing system configurations and thereby avoids the otherwise required modification of the underlying source code.

Scalable modules. Each of Linkage Technologies' individual functional modules can be installed on an individual stand-alone basis or as part of an integrated telecom software system. Linkage Technologies' modules have incorporated many industry best practices and can be expanded with the

Table of Contents

customer's evolving needs. The modular approach also preserves the customer's initial investment in individual solutions, while minimizing future disruptions and the overall cost of system implementation.

Standardized interface. Linkage Technologies' standardized interface is designed to centrally manage information exchanges between its functional modules and external networks and applications. These external networks and applications may be based on different technical standards and industry specifications. In order to support stable, flexible and real-time exchange of information, Linkage Technologies' proprietary information exchange interface follows generally accepted protocols for information exchange.

Other advanced technologies. Linkage Technologies incorporates other proprietary advanced technologies in its functional modules. For example, Linkage Technologies employs various security technologies, including back-up, monitoring, auditing, and emergency reporting functions, in its CRM solutions. Linkage Technologies also incorporates powerful integration capabilities in its BI systems to allow for seamless integration with various database platforms, multi-tier analysis engines, data mining engines and foreground presentation tools.

Research and Development

Linkage Technologies attributes its past success to its research and development efforts. Linkage Technologies believes it was among the first software providers to introduce and implement the concept of developing core versions of BSS, OSS and BI, with modular add-ons. Linkage Technologies' sustained success and future growth depend on continued investment of resources in research and development.

As of September 30, 2009, 1,251 of Linkage Technologies' employees were involved in specific research projects aside from their regular development and implementation work for customers. Linkage Technologies' research and development are currently carried out in six research and development centers located in Nanjing, Changsha, Tianjin, Fuzhou, Chengdu and Beijing. In October 2004, Linkage Technologies obtained Level III of the Capability Maturity Model, an industry-recognized rating system for evaluating the quality of a company's management and software engineering practices, developed by the Software Engineering Institute at Carnegie Mellon University.

Linkage Technologies has set up a strategic planning department that is dedicated to tracking, researching and studying the development of new technology in order to predict new technology trends and timing of market adoption of these technologies with greater accuracy.

Linkage Technologies is an active participant in industry forums and standards organizations for BSS, OSS, BI and other telecom solutions. Linkage Technologies also collaborates with partners in complementary markets in order to leverage its complementary resources and expertise. These partnerships include the Nanjing University of Post and Telecommunications, HP, IBM, Microsoft, Oracle, Sun Microsystems and Sybase.

Intellectual Property

Linkage Technologies relies on copyright, patent, trademark, trade secret and other intellectual property law, as well as non-competition and confidentiality agreements with its employees, business partners and others, to protect its intellectual property rights.

Linkage Technologies owns copyrights to the core software solutions it develops, which serve as the basis for its customized solutions. As of September 30, 2009, Linkage Technologies had registered a total of 65 copyrights for its proprietary software solutions with the State Copyright Administration of the PRC. Its solutions also use technologies that are exclusively licensed to it by Lianchuang, an affiliate of Linkage Technologies, and are the subject of nine patents and 12 pending patent applications in China and one patent and

two pending patent applications in the United States. On June 23, 2009, Linkage Nanjing entered into an assignment agreement with Lianchuang for the transfer of these patents and pending patent applications to it and the exclusive rights to these technologies during the time period that the registration of the assignment agreement is being approved by relevant government authorities.

Linkage Technologies owns or licenses from Lianchuang all the technologies underlying the core versions of its solutions. In most cases, Linkage Technologies' contracts for custom-designed projects provide that its customers own intellectual property rights to software solutions and services developed under these contracts, while Linkage Technologies expressly retains ownership to the core intellectual property rights underlying the customized products and solutions. As a result of this practice, Linkage Technologies may not have rights to re-use the related software in projects involving other customers. Furthermore, a portion of these contracts provide that Linkage Technologies and its customers have joint ownership rights to certain technologies or improvements Linkage Technologies developed specifically for these customers when Linkage Technologies customizes the core versions of its solutions or when Linkage Technologies performs maintenance and enhancement design services. As a result of these sharing or co-ownership arrangements, Linkage Technologies cannot unilaterally apply for copyright registration, patent license or other intellectual property rights for the relevant technologies. In addition, its customers can use or modify these technologies or, where Linkage Technologies does not limit the transfer rights of these technologies, transfer them to third parties without its consent. Since the ability to develop and use these technologies requires know-how and expertise that is hard to duplicate, and since the solutions subject to sharing or co-ownership arrangements are highly customized, Linkage Technologies does not believe that these arrangements would have a significant negative impact on its applying its know-how or core technologies to other solutions or development processes.

Linkage Technologies relies on confidentiality and non-competition agreements to protect its proprietary information and know-how. Each of its management and its key research and development personnel have entered into a standard confidentiality and non-compete agreement, which includes confidentiality undertakings and an acknowledgement and agreement that all copyrights and patents generated during their services with Linkage Technologies are its property, and assigns to Linkage Technologies any ownership rights that they may claim in those works. The enforceability of these confidentiality and non-competition agreements may be uncertain. See *Risk Factors Linkage Technologies' business depends substantially on the continuing efforts of its management and other key personnel. If Linkage Technologies loses their services, it could incur significant costs in finding suitable replacements and its business may be severely disrupted* beginning on page 34.

Competition

The telecom software solutions market in China is highly competitive. Competition in this market depends largely on industry experience, quality of solutions and services offered, reputation and price. Prior to entering into the Combination Agreement, Linkage Technologies faced competition from AsiaInfo, and continues to face competition from other domestic telecom software solutions providers such as Boco, Neusoft and Digital China, and international telecom software solutions providers such as Amdocs, Convergys, HP and IBM. Linkage Technologies also faces competition from the software development divisions of some telecom equipment manufacturers such as Huawei and ZTE.

Employees

Linkage Technologies had 1,328, 1,603 and 2,277 employees as of December 31, 2006, 2007 and 2008, respectively. As of September 30, 2009, Linkage Technologies had 3,465 employees, including 3,308 in research, development and implementation, 57 in sales and marketing, and 100 in administration. Its employees are not covered by any collective bargaining agreement. Linkage Technologies generally has good relations with its employees.

PRC Government Regulations

This section sets forth a summary of the most significant regulations or requirements that affect Linkage Technologies' business activities in China.

Regulation of the Software Industry

Software Copyright

China's State Council promulgated the Regulations on the Protection of Computer Software, or the Software Protection Regulations, on December 20, 2001, which became effective on January 1, 2002. The Software Protection Regulations were promulgated, among other things, to protect the copyright of computer software in China. According to the Software Protection Regulations, computer software that is independently developed and exists in a physical form or is attached to physical goods will be protected. However, such protection does not apply to any ideas, mathematical concepts, processing and operation methods used in the development of software solutions.

Under the Software Protection Regulations, PRC citizens, legal persons and organizations may enjoy copyright protection over computer software that they have developed, regardless of whether the software has been published. Foreigners or any person without a nationality may enjoy copyright protection over computer software that they have developed, as long as such computer software was first distributed in China. Software of foreigners or any person without a nationality may enjoy copyright protection in China under these regulations in accordance with a bilateral agreement signed between China and the country to which the developer is a citizen of or in which the developer habitually resides, or in accordance with an international treaty to which China is a party.

Under the Software Protection Regulations, owners of software copyright may enjoy the rights of publication, authorship, modification, duplication, issuance, lease, transmission on the information network, translation, licensing and transfer. Software copyright protection takes effect on the day of completion of the software's development.

The protection period for software developed by legal persons and other organizations is 50 years and ends on the thirty-first day of December of the fiftieth year from the date the software solution was first published. However, the Software Protection Regulations does not protect the software if it is not published within 50 years of the completion of its development. A contract of licensing may be made to license others to exploit the software copyright, and if the licensing of exploitation of software copyright is exclusive, a written contract must be made. A written contract also must be made for the transfer of any software copyright.

Table of Contents

Civil remedies available under the Software Protection Regulations against infringements of copyright include cessation of the infringement, elimination of the effects, apology and compensation for losses. The administrative department of copyright may order the infringer of software copyright to stop all infringing acts, confiscate illegal gains, confiscate and destroy infringing copies, and may impose a fine on the offender under certain circumstances. Disputes regarding infringements of software copyright may be settled through mediation. In addition, the parties involved in the disputes may apply for arbitration in accordance with any effective arbitration provisions set forth in the copyright contract or arbitration agreement otherwise entered into between or among the parties. If the parties neither have an arbitration provision in the copyright contract, nor an arbitration agreement, they may resolve their dispute through the PRC courts directly.

Software Copyright Registration

On February 20, 2002, the State Copyright Administration of the PRC promulgated and enforced the Measures Concerning Registration of Computer Software Copyright Procedures, or the Registration Procedures, to implement the Software Protection Regulations and to promote the development of China's software industry. The Registration Procedures apply to the registration of software copyrights and software copyright exclusive licensing contracts and assignment contracts. The registrant of a software copyright will either be the copyright owner, or another person (whether a natural person, legal person or an organization) in whom the software copyright becomes vested through succession, assignment or inheritance.

Pursuant to the Registration Procedures, the software to be registered must (i) have been independently developed or (ii) significantly improve in its function or performance after modification from the original software with the permission of the original copyright owner. If the software being registered is developed by more than one person, the copyright owners may nominate one person to handle the copyright registration process on behalf of the other copyright owners. If the copyright owners fail to reach an agreement with respect to the registration, any of the copyright owners may apply for registration but the names of the other copyright owners must be recorded on the application.

The registrant of a software copyright and the parties to a software copyright assignment contract or exclusive licensing contract may apply to the Copyright Protection Center of the PRC for registration of such software copyright and contracts. To register a software copyright, the following documents must be submitted: (i) a completed software copyright registration application form in accordance with relevant requirements; (ii) identification materials of the software; and (iii) relevant documentation demonstrating ownership. To register a software copyright assignment contract or exclusive licensing contract, the following materials must be submitted: (i) a completed contract registration form in accordance with relevant requirements; (ii) a copy of the contract; and (iii) the applicant's identification documents. The Copyright Protection Center of the PRC will complete its examination of an accepted application within 60 days of the date of acceptance. If an application complies with the requirements of the Software Protection Regulations and the Registration Procedures, a registration will be granted, a corresponding registration certificate will be issued and the registration will be publicly announced.

Software Products Administration

On October 27, 2000, China's Ministry of Industry and Information Technology, or the MIIT, issued the Measures Concerning Software Products Administration, to regulate and administer software products and to promote the development of the software industry in China. Pursuant to the Measures Concerning Software Products Administration, all software products operated or sold in China must be duly registered and recorded with the relevant authorities, and no entity or individual is allowed to sell or distribute any unregistered and unrecorded software products.

In order to produce software products in China, a software producer is required to meet the following requirements: (i) it possesses the status of an enterprise legal person, and its scope of operations includes the

Table of Contents

computer software business (including technology development of software or production of software products); (ii) it has a fixed production site; (iii) it possesses necessary conditions and technologies for producing software products; and (iv) it possesses quality control measures and capabilities for the production of software products. Software developers or producers are allowed to sell their registered and recorded software products independently or through agents, or by way of licensing. Software products developed in China must be registered with the local provincial governmental authorities in charge of information industry and then filed with the taxation authority at the same level and MIIT. Imported software products (i.e., software developed overseas and sold or distributed into China) must be registered with the MIIT. Upon registration, the software products shall be granted registration certificates. Each registration certificate is valid for five years from the issuance date and may be renewed upon expiry. The MIIT and other relevant departments may carry out supervision and inspection over the development, production, operation and import/export activities of software products in China.

On March 1, 2009, the MIIT promulgated the Measures Concerning Software Products Administration, or the 2009 Measures, which became effective on April 10, 2009. Under the 2009 Measures, software products operated or sold in China are not required to be registered or recorded by relevant authorities, and software products developed in China (including those developed in China on the basis of imported software) can enjoy certain favorable policies when they have been registered and recorded. The 2009 Measures also eliminated the previous requirements set forth above.

Policies to Encourage the Development of Software and Integrated Circuit Industries

On June 24, 2000, China's State Council issued Certain Policies to Encourage the Development of Software and Integrated Circuit Industries, or the 2000 Policies, to encourage the development of the software and integrated circuit industries in China and to enhance the competitiveness of the PRC information technology industry in the international market. The 2000 Policies encourage the development of the software and integrated circuit industries in China through various methods, including:

Encouraging venture capital investment in the software industry and providing or assisting software enterprises to raise capital overseas;

Providing tax incentives, including an immediate tax rebate for taxpayers who sell self-developed software products, before 2010, of the amount of the statutory value-added tax that exceeds 3% and a number of exemptions and reduced enterprise income tax rates;

Providing government support, such as government funding in the development of software technology;

Providing preferential treatment, such as credit facilities with low interest rates to enterprises that export software products;

Taking various strategies to ensure that the software industry has sufficient expertise; and

Implementing measures to enhance intellectual property protection in China.

To qualify for preferential treatment, an enterprise must be recognized as a software enterprise by governmental authorities. A software enterprise is subject to annual inspection, failure of which in a given year shall cause the enterprise not to be able to enjoy the relevant benefits.

Regulation of the Telecommunications Industry

China's telecom industry, where AsiaInfo's and Linkage Technologies' customers operate, is subject to extensive government regulation and control. Currently, all major telecom and Internet service providers in China are primarily state-owned or state-controlled and their business decisions and strategies are affected by the government's budgeting and spending plans. In addition, they are required to comply with regulations and rules promulgated from time to time by the MIIT and other ministries and government departments.

Table of Contents

On September 25, 2000, the State Council issued the Telecommunications Regulations of the PRC, or the Telecommunications Regulations. The Telecommunications Regulations set out in clear terms the framework for operational licensing, network interconnection, the setting of telecom charges and standards of telecom services in China. On the same day, the State Council issued the Administrative Measures on Internet Information Services, which provide for control and censorship of information on the Internet.

The Provisions on the Administration of Foreign-Invested Telecommunications Enterprises, or the 2002 Provisions, became effective on January 1, 2002. Under the 2002 Provisions, foreign investors are permitted to invest in China's telecom industry through Sino-foreign joint ventures. The ultimate proportion of contribution of the foreign investors of a foreign-funded telecom enterprise that is engaged in the basic telecom services (except radio paging services) may not be more than 49%. The ultimate proportion of contribution of the foreign investors of a foreign-funded telecom enterprise that is engaged in the value-added services (including radio paging services) may not be more than 50%.

In November 2001, the MIIT promulgated the Administrative Measures for Telecommunications Business Operating Licenses, or the License Measures, which became effective on January 1, 2002. The License Measures provide for two types of telecom operating licenses for operators in China, namely licenses for basic services and licenses for value-added services. According to the Catalogue of Classification of Telecommunication Services, which is auxiliary to the Telecommunications Regulations and the new classification edition adjusted by MIIT on June 11, 2001, basic services include, among others, fixed-line local and domestic long distance telephone services, international telecom services, mobile communications services (such as 900/1800MHz GSM, 800MHz CDMA and 3G mobile communication services), satellite communications services, paging services, data communications services (such as Internet data transmission services), trunking services, network access services and the domestic and international telecom facility services. Value-added telecom services include, among others, value-added services provided over fixed-line telephone network (e.g., telephone information, call center, voice mail and video conferencing services), value-added services provided over mobile networks, value-added services provided over Internet networks (e.g., Internet data center and Internet access and content services) and value-added services provided over other data networks (e.g., computer information, e-mail and electronic data interchange services). On February 21, 2003, the MIIT issued a new Catalogue of Classification of Telecommunication Services, which was enforced on April 1, 2003. The revised classification maintains the general distinction between basic telecom services and value-added telecom services and attempts to define the scope of each service. In particular, the 2003 classification delineated the differences between Type 1 and Type 2 value-added services. Type 1 includes online data and transaction processing, domestic multi-party communication services, domestic Internet virtual private network services and Internet data center services. Type 2 includes storage and retransmission (X.400 e-mail, voice mail, facsimile), call centers, Internet access and information services.

Tax

Foreign Currency Exchange

Foreign currency exchange in China is primarily governed by the following regulations:

Foreign Exchange Administration Rules (1996), as amended; and

Regulations of Settlement, Sale and Payment of Foreign Exchange (1996).

According to these regulations, China's currency, the Renminbi is convertible for current account items, including distribution of dividends, payment of interest, trade and service-related foreign exchange transactions. Conversion of Renminbi for capital account items, including direct investment, loans, securities investment and

repatriation of investment, however, is still subject to the approval of SAFE or its local counterpart. FIEs may settle and buy foreign currencies at banks designated to conduct foreign exchange business after providing valid commercial documents and can also buy and sell foreign currencies at Foreign Currencies Adjusting Centers. Capital investments by FIEs outside of China are also subject to limitations, which include approvals by the MOFCOM, SAFE and the National Development and Reform Commission.

Dividend Distribution

The principal regulations in China governing distribution of dividends paid by wholly foreign-owned enterprises include:

Wholly Foreign-Owned Enterprise Law (1986), as amended; and

Implementation Rules on Wholly Foreign-Owned Enterprise Law (1990), as amended.

Under these regulations, wholly foreign-owned enterprises in China may pay dividends only out of their accumulated profits, if any, determined in accordance with PRC accounting standards and regulations. In addition, wholly foreign-owned enterprises in China are required to set aside at least 10% of their after-tax profit based on PRC accounting standards each year to their general reserves until the accumulative amount of such reserves reach 50% of their registered capital. These reserves are not distributable as cash dividends. The board of directors of a FIE has the discretion to allocate a portion of its after-tax profits to staff welfare and bonus funds, which may not be distributed to equity owners except in the event of liquidation.

Regulation of Foreign Exchange in Certain Onshore and Offshore Transactions

In October 2005, the SAFE issued the Notice on Issues Relating to the Administration of Foreign Exchange in Fund-raising and Return Investment Activities of Domestic Residents Conducted via Offshore Special Purpose Companies, or SAFE Notice 75, which became effective as of November 1, 2005. SAFE Notice 75 was further supplemented by two implementation notices issued by the SAFE on November 24, 2005 and May 29, 2007, respectively. SAFE Notice 75 states that PRC residents, whether natural or legal persons, must register with the relevant local SAFE branch prior to establishing or taking control of an offshore entity established for the purpose of overseas equity financing involving onshore assets or equity interests held by them. The term "PRC legal person residents" as used in SAFE Notice 75 refers to those entities with legal person status or other economic organizations established within the territory of the PRC. The term "PRC natural person residents" as used in SAFE Notice 75 includes all PRC citizens and all other natural persons, including foreigners, who habitually reside in the PRC for economic benefit. The SAFE implementation notice of November 24, 2005 further clarifies that the term "PRC natural person residents" as used under SAFE Notice 75 refers to those "PRC natural person residents" defined under the relevant PRC tax laws and those natural persons who hold any interests in domestic entities that are classified as "domestic-funding" interests.

PRC residents are required to complete amended registrations with the local SAFE branch upon: (i) injection of equity interests or assets of an onshore enterprise to the offshore entity, or (ii) subsequent overseas equity financing by such offshore entity. PRC residents are also required to complete amended registrations or filing with the local SAFE branch within 30 days of any material change in the shareholding or capital of the offshore entity, such as changes in share capital, share transfers and long-term equity or debt investments or, providing security, and these changes do not relate to return investment activities. PRC residents who have already organized or gained control of offshore entities that have made onshore investments in the PRC before SAFE Notice 75 was promulgated must register their shareholdings in the offshore entities with the local SAFE branch on or before March 31, 2006.

Under SAFE Notice 75, PRC residents are further required to repatriate into the PRC all of their dividends, profits or capital gains obtained from their shareholdings in the offshore entity within 180 days of their receipt of such dividends, profits or capital gains. The registration and filing procedures under SAFE Notice 75 are

prerequisites for other approval and registration procedures necessary for capital inflow from the offshore entity, such as inbound investments or shareholders loans, or capital outflow to the offshore entity, such as the payment of profits or dividends, liquidating distributions, equity sale proceeds, or the return of funds upon a capital reduction.

In July 2009, Lianchuang issued an irrevocable non-competition commitment letter to Linkage Nanjing and Linkage Suzhou whereby Lianchuang agreed to refrain from competing with Linkage Nanjing or its affiliates in the business of providing software solutions and related IT services to telecom operators within and outside of China.

In September 2009, Linkage Nanjing signed a memorandum of understanding with Lianchuang to clarify that, prior to the effective dates of their trademark, patent and technology license agreements in October 2008 and June 2009, all intellectual properties owned by Lianchuang and used by Linkage Nanjing shall be deemed to have been validly licensed to Linkage Nanjing free of charge.

LINKAGE TECHNOLOGIES MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

You should read the following discussion and analysis of the financial condition and results of operations of Linkage Technologies in conjunction with Linkage Technologies' audited consolidated financial statements and the related notes included elsewhere in this Proxy Statement. This discussion contains forward-looking statements that involve risks and uncertainties. Linkage Technologies' audited consolidated financial statements have been prepared in accordance with US GAAP. In addition, Linkage Technologies' consolidated financial statements and the financial data included in this Proxy Statement reflect its restructuring and have been prepared as if its current structure had been in place throughout the relevant periods presented. Linkage Technologies' actual results and the timing of selected events could differ materially from those anticipated in these forward-looking statements as a result of various factors, including those set forth under "Risk Factors" and elsewhere in this Proxy Statement.

Overview

Linkage Technologies is a leading provider of software solutions and IT services for the telecom industry in China. Linkage Technologies develops and implements core operating systems for all of the three telecom operators in China, namely, China Mobile, China Telecom and China Unicom.

Linkage Technologies markets its telecom software solutions as an integrated system or as individual functions. Linkage Technologies' telecom software solutions address essential categories of telecom operators' software requirements, and include primarily the following: *BSS*, which support customer-oriented account, billing and customer service functions; *OSS*, which manage network systems; and *BI*, which facilitate decision analysis processes.

Linkage Technologies negotiates and contracts separately with each provincial subsidiary of the telecom operators. As of September 30, 2009, 69 out of the 97 provincial subsidiaries and headquarters of China Mobile, China Telecom and China Unicom were customers of Linkage Technologies' software solutions and services.

Linkage Technologies' total revenues grew from \$46.8 million in 2006 to \$88.3 million in 2008 and its net income grew from \$9.2 million in 2006 to \$17.1 million in 2008. For the nine months ended September 30, 2009, Linkage Technologies generated total revenues of \$112.5 million and net income of \$25.3 million. In addition to software development, Linkage Technologies generates revenues from offering telecom operators IT services, such as consulting and system integration, and implementation of third-party hardware and software to address their other IT needs. Revenues from software development, IT services and third-party hardware and software constituted 88.3%, 5.9% and 5.8%, respectively, of its total revenues in 2008, and 89.7%, 2.1% and 8.2%, respectively, of its total revenues for the nine months ended September 30, 2009.

Factors Affecting Linkage Technologies' Results of Operations

Linkage Technologies' operating results in any period are subject to general conditions typically affecting the development and operating environment for China's telecom industry, including:

Size and growth of the telecom industry in China. The size and growth of the telecom industry in China is affected by the state of the Chinese economy in general, the potential impact of new government policies, growth of telecom subscriber base and market demand for telecom and value-added services.

Size and growth of IT spending by telecom operators in China. The size and growth of IT spending by telecom operators in the near future are affected by the scale and complexity of telecom services provided by operators and the impact the recent restructuring of China's telecom industry and adoption of 3G technologies had, and will have, on the market. The convergence of services provided is expected to lead to increased competition among the telecom operators and increased IT spending, as a result of pressures on them to provide higher and more advanced levels of telecom service as they compete in the converged markets.

Table of Contents

Size and growth of the telecom software solutions market. In addition to the demand for telecom software solutions generated from the growth of the telecom industry and the level of IT spending by the telecom operators, the size and growth of the telecom software solutions market also depends on factors such as the degree to which customers outsource software development to telecom software solutions providers rather than develop solutions in-house, the corporate level at which purchase decisions are made, the rate of innovation that telecom software solutions providers are able to sustain and the amount of new solutions and service offerings introduced in the telecom software solutions market.

Level of competition in China's telecom software solutions market. The level of competition in China's telecom software solutions market is dependent on a number of factors, including but not limited to the number of telecom software solutions providers active in the market, the financial resources of those competitors, and the amount of investments by competitors in the telecom software solutions market. Intensified levels of competition may lead to pressure to provide a greater level of services at lower prices.

Fluctuations of telecom software solutions spending by the Chinese telecom operators. The time and duration of the budget cycles of Chinese telecom operators may lead to fluctuations in telecom software solutions spending.

Unfavorable changes in any of these general conditions could negatively affect the number and size of contracts for Linkage Technologies solutions and services and adversely affect its results of operations.

Linkage Technologies' operating results in any period are more directly affected by company-specific factors including:

Linkage Technologies' ability to anticipate market demand for and to successfully develop new solutions and services to China's telecom industry;

Linkage Technologies' ability to identify and incorporate emerging technologies that would enhance its software solutions;

Linkage Technologies' ability to provide customer service and support;

Linkage Technologies' ability to attract, train and retain qualified software engineers;

Linkage Technologies' ability to effectively manage its operating costs and expenses; and

The seasonality in Linkage Technologies' operating results. See *Risk Factors Seasonality and fluctuations in customers' annual IT budget and spending cycle and other factors can cause Linkage Technologies' revenues and operating results to vary significantly from quarter to quarter and from year to year* on page 37.

Table of Contents**Revenues**

Linkage Technologies derives revenues from three primary sources: (i) software development, (ii) IT services and (iii) third-party hardware and software. In recent years, Linkage Technologies has experienced rapid growth and significantly expanded its business. Linkage Technologies total revenues grew to \$88.3 million in 2008 from \$53.8 million in 2007 and \$46.8 million in 2006. Linkage Technologies total revenues grew to \$112.5 million in the nine months ended September 30, 2009 from \$52.7 million in the nine months ended September 30, 2008. The following table summarizes the breakdown of Linkage Technologies revenues by these three primary sources.

	2006		Year Ended December 31, 2007		2008		Nine Months Ended September 30, 2008		2009

Software Development

Software development accounted for 70.0%, 83.2%, 88.3% and 89.7% of Linkage Technologies total revenues for 2006, 2007, 2008 and the nine months ended September 30, 2009, respectively.

Revenues from software development represent fees in recognition of Linkage Technologies customized software development services. Generally, Linkage Technologies contracts for software development are for project development periods ranging from six to twelve months and include the design and implementation of new solutions or significant customization of its software to meet its customers needs. Linkage Technologies typically receives a fixed fee payable according to pre-negotiated payment schedules. Depending on the contract, the fee could cover customization, modification, implementation, integration, training, bundled post-contract customer support, or PCS, and third-party hardware and software and their maintenance. After the software development is completed, Linkage Technologies stays involved with the customer to enhance the solution and provide customer support. Furthermore, Linkage Technologies software development contracts typically include PCS, normally for one year or less, free of charge.

Table of Contents

Linkage Technologies' revenue growth in software development is affected by the growth in the number of its customers and growth in their revenue contributions from software development. The table below lists the number of customers classified by telecom operators and the aggregate revenue contributions from software development classified by telecom operators:

	For the Year Ended December 31,			For the Nine Months Ended September 30,

- (1) Customers with respect to a telecom operator include each of the provincial subsidiaries and headquarters of the telecom operator, as a stand-alone legal entity, that have active contracts with Linkage Technologies during the relevant period.
- (2) The aggregate of these revenues constituted 98.6%, 98.2%, 98.9% and 99.8% of Linkage Technologies' total software development revenues for 2006, 2007, 2008 and the nine months ended September 30, 2009, respectively.

The growth in Linkage Technologies' customer base and revenue contribution from each of its customers is affected by the following:

Linkage Technologies' ability to take advantage of changes in China's telecom industry. The restructuring of telecom operators in recent years disrupted existing customer relationships between IT solutions providers and telecom operators and created opportunities for Linkage Technologies to establish new customer relationships. As the restructuring led to the convergence of fixed-line, mobile and broadband operations, Linkage Technologies was able to leverage its prior experience that encompassed all of these areas of operations.

Linkage Technologies' ability to develop innovative solutions and services. The addition of new customers and the retention of existing customers, as well as the amount of customer spending on Linkage Technologies' telecom software solutions, functional modules, upgrades and related services, are all affected by its ability to develop innovative solutions and services that meet and generate market demand. These include solutions that adopt next-generation technologies, provide reliable core systems while accommodating an expanding subscriber base and array of services and functions.

Linkage Technologies' ability to effectively sell its solutions and services. Linkage Technologies' ability to leverage its knowledge of the telecom operators and PRC telecom industry to determine the most effective sales methods and its emphasis on identifying selling and cross-selling opportunities directly impacts its sales results.

Linkage Technologies' ability to offer customers value-added, one-stop services. Linkage Technologies' ability to attract customers and maintain customer loyalty also depends on its ability to afford them the convenience, system integrity, industry expertise and quality services that are associated with comprehensive, one-stop services and value-added consulting services.

Table of Contents**IT Services**

IT services accounted for 13.6%, 8.7%, 5.9% and 2.1% of Linkage Technologies' total revenues for the years ended December 31, 2006, 2007, 2008 and the nine months ended September 30, 2009, respectively. Revenues from IT services represent fees from the provision of IT consulting and research services, maintenance and support services and system integration services. Revenues from IT services is comprised of revenues from these three components:

IT consulting and research services. Revenues from IT consulting and planning services mainly represent fees from Linkage Technologies' consulting services independent from its software development services.

Maintenance and support services. Linkage Technologies enters into third-party hardware maintenance and software support contracts with customers generally on a yearly basis. In most cases, Linkage Technologies enters into back-to-back arrangements with similar terms with third-party hardware and software vendors.

System integration services. Linkage Technologies' revenues from system integration services include fees for its system procurement and implementation services, and network and software maintenance services.

Third-Party Hardware and Software

Third-party hardware and software accounted for 16.4%, 8.1%, 5.8% and 8.2% of Linkage Technologies' total revenues for the years ended December 31, 2006, 2007, 2008 and the nine months ended September 30, 2009, respectively. Revenues from third-party hardware and software represent sales proceeds from the third-party hardware or software Linkage Technologies incorporates into its customized software solutions, primarily servers and database software, and third-party products sold under system integration contracts.

The following table sets forth the components of Linkage Technologies' cost of revenues and operating expenses, both as an absolute amount and as a percentage of total revenues for the period indicated.

Linkage Technologies' cost of revenues includes costs directly attributable to its software development, IT services and third-party hardware and software sales. Linkage Technologies expects its cost of revenues to increase as it increases its sales.

Software Development

Cost of revenues related to software development consist primarily of compensation, including bonuses and share-based compensation, and travel expenses of Linkage Technologies' engineers while they are involved in the design, modification, or installation of its software solutions or involved in providing consultation, training, maintenance and ongoing support services.

IT Services

Costs associated with IT services consist primarily of compensation and travel expenses of Linkage Technologies' engineers while they are involved in the provision of system integration services, third-party hardware maintenance, third-party software support, network support and consulting services.

Third-Party Hardware and Software

Costs associated with third-party hardware and software consist primarily of the following:

software license fees paid to third-party software providers, primarily database software providers, for the right to sublicense their products and solutions to Linkage Technologies' customers as part of its solution offerings;

hardware purchase costs for hardware required to be installed in connection with Linkage Technologies' software solutions, typically computer servers; and

procurement costs for third-party hardware and software installed in connection with system integration services where, in limited instances, Linkage Technologies is primarily responsible for the performance of hardware and software installed. Linkage Technologies generally provides warranties and maintenance for the hardware it procures and, in most instances, obtains back-to-back warranties from third-party vendors.

Operating Expenses

Operating expenses consist of sales and marketing expenses, general and administrative expenses, and research and development expenses.

Sales and Marketing Expenses

Sales and marketing expenses represented 9.3%, 10.5%, 8.4% and 5.9% of Linkage Technologies' total revenues for the years ended December 31, 2006, 2007, 2008 and the nine months ended September 30, 2009, respectively. Sales and marketing expenses primarily consist of costs related to Linkage Technologies' sales and marketing team, including compensation and benefits, performance-based bonus and share-based compensation, travel and entertainment expenses, advertising or promotion expenses, telecom expenses and sales and marketing-related office expenses.

General and Administrative Expenses

General and administrative expenses represented 15.4%, 18.0%, 17.7% and 13.0% of Linkage Technologies' total revenues for the years ended December 31, 2006, 2007, 2008 and the nine months ended

Table of Contents

September 30, 2009, respectively. These include compensation and benefits (including performance-based bonus and share-based compensation), travel and entertainment of its accounting, human resource, management and other general and administrative personnel, as well as engineers that are not assigned to any customer-related or any internal research and development projects. These also include professional fees and overhead, such as rent, depreciation and other expenses allocated to the general and administrative functions.

Research and Development Expenses

Research and development expenses represented 1.5%, 2.0%, 2.8% and 4.8% of Linkage Technologies' total revenues for the years ended December 31, 2006, 2007, 2008 and for the nine months ended September 30, 2009, respectively. These include expenses related to Linkage Technologies' research and development projects that are not otherwise attributed to customized software development. These expenses are primarily compensation and benefits, travel expenses and training expenses of its research and development staff that are involved in these internal research and development projects.

Share-Based Compensation Expenses

Linkage Technologies' share-based compensation expenses for the years ended December 31, 2006, 2007, 2008 and for the nine months ended September 30, 2009 were nil, \$0.6 million, \$2.3 million and \$1.9 million, respectively. Linkage Technologies generally recognizes share-based compensation as an expense based on the fair value of the award on the grant date. These expenses related to options to purchase Linkage Cayman ordinary shares granted by Linkage Cayman to its directors, officers, and employees. Since Linkage Technologies has determined that the services associated with this share-based compensation benefited Linkage Technologies and its subsidiaries, Linkage Technologies has allocated these share-based compensation expenses to Linkage Technologies and its subsidiaries.

In July 2009, Linkage Cayman adopted its 2009 Share Incentive Plan, or the 2009 Plan, which is expected to be terminated in connection with the Combination. Linkage Cayman has reserved 61,979,069 shares for the issuance of share-based compensation under the 2009 Plan. As of the date of this Proxy Statement, no awards have been granted under the 2009 Plan.

Linkage Technologies is responsible for estimating the fair value of the awards granted to its employees and service providers, and other share-related transactions. The determination of fair value requires Linkage Technologies to make complex and subjective judgments about projected financial and operating results. It also requires making certain assumptions, such as cost of capital, general market and macroeconomic conditions, industry trends, comparable companies, price volatility of its shares, and discount rates. These judgments and assumptions are inherently uncertain. Changes in these judgments and assumptions could significantly affect the amount of share-based compensation expense recognized in Linkage Technologies' consolidated financial statements.

For the awards previously granted, Linkage Technologies determined the fair value of its ordinary shares using the discounted cash flow method under the income approach. Under the discounted cash flow method, the projected cash flow estimate included, among other things, an analysis of projected revenue growth, gross margins, effective tax rates, capital expenditures and working capital requirements. The discount rates reflect the risks Linkage Technologies' management perceived as being associated with achieving the forecasts and are based on its estimated cost of capital after taking into account systemic risks and company-specific risks. Discount rates applied were between 17.5% and 21%. Linkage Technologies also applied a discount for lack of marketability, or DLOM, to reflect the fact that Linkage Technologies is a closely-held company and there is no public market for its ordinary shares. Linkage Technologies used the Black-Scholes option pricing model in assessing the DLOM. DLOM rates applied were between 10% and 18%. Linkage Technologies checked the results obtained under the discounted cash flow method against the results obtained from the guideline companies method under the market approach and found no material discrepancies.

Table of Contents

July 31, 2007. On July 31, 2007, Libin Sun, the chairman and chief executive officer of Linkage Technologies, sold 146 ordinary shares in LT International Limited, or LT International, to three employees for RMB1.3 million (\$0.2 million). LT International was then one of Linkage Technologies' shareholders and controlled by Libin Sun. These ordinary shares of LT International represented an interest in Linkage Technologies, which in turn resulted in three employees beneficially owning 80 ordinary shares of Linkage Technologies.

March 31, 2008. On March 31, 2008, Libin Sun sold 1,543 ordinary shares of HF International Limited, or HF International, to 549 employees for \$4.7 million. HF International was then one of Linkage Technologies' shareholders and was controlled by Libin Sun and a group of Linkage Technologies' employees. These ordinary shares of HF International represented an interest in Linkage Technologies, which in turn resulted in these employees beneficially owning 500 ordinary shares of Linkage Technologies. The increase in the fair value of Linkage Technologies' ordinary shares from \$9,351 per share on July 31, 2007 to \$13,940 per share on March 31, 2008 was primarily attributable to an increase of its sales revenue and market share.

July 27, 2009. On July 27, 2009, Linkage Cayman granted an option to purchase 6,197,907 ordinary shares of Linkage Cayman at the price of RMB0.25 (\$0.04) per share to an executive officer. The option was subject to vesting over three years, starting from July 31, 2009, and was valued at the estimated fair market value on the date of the award. In July 2009, the first tranche of the option was exercised with respect to 1,652,775 ordinary shares of Linkage Cayman. As of the date of this Proxy Statement, the remaining options have been forfeited upon the resignation of the executive officer from Linkage Cayman and Linkage Technologies. Linkage Technologies characterized the share grant as compensation for the executive officer's services to it and recorded share-based compensation expenses of \$1.9 million for the nine months ended September 30, 2009. Linkage Technologies used the discounted cash flow method in the determination of the fair market value of the shares transferred, applying a discount rate of 17.5% and DLOM of 10% in the determination.

The increase in the fair value of Linkage Technologies' ordinary shares from \$13,940 per share on March 31, 2008 to \$38,717.8 per share on July 27, 2009 was primarily attributable to an increase in projected revenues due to strong growth in demand, new solutions, and market developments. Since July 27, 2009, Linkage Technologies believes that the fair value of its ordinary shares has further increased as a result of entering into several significant contracts, increases in its projected revenues based on increased demand for next generation projects, market developments, and increased cost efficiency.

Taxes

British Virgin Islands

Under the current laws of the British Virgin Islands, Linkage Technologies is not subject to tax on its income or capital gains. In addition, no British Virgin Islands withholding tax is imposed upon any payment of dividends.

Hong Kong

Linkage Technologies' subsidiary in Hong Kong was subject to income tax at the statutory rates of 17.5%, 17.5%, 16.5% and 16.5% for 2006, 2007, 2008 and the nine months ended on September 30, 2009, respectively.

China

Linkage Technologies' subsidiaries in the PRC were governed by China's Income Tax Law concerning FIEs and foreign enterprises, or the FIE Income Tax Law, and local income tax laws in 2006 and 2007. The statutory rate for a FIE was 33%, including 30% national income tax and 3% local income tax. A qualified high and new technology enterprise, or HNTE, that operates in a state-level high and new technology development zone, was entitled to a preferential tax rate of 15%. Furthermore, a profitable HNTE was entitled to an exemption, or a tax

Table of Contents

holiday, from all income taxes for two years beginning with the first profitable year, and a 50% reduction of income tax rate for the subsequent three years. Local income tax was fully exempted during the tax holiday. As Linkage Nanjing was qualified as an HNTE operating in a high and new technology development zone, it was subject to an income tax rate at 7.5% during the years ended December 31, 2006 and 2007. Linkage Suzhou, recognized as a newly established software company, was entitled to two years' tax exemption followed by three years of 50% tax reduction, starting from 2004, its first profitable year. As a result, for the years ended December 31, 2006 and 2007, Linkage Suzhou was entitled to a preferential tax rate of 15%. The 3% local tax was fully exempted during the tax holiday.

On March 16, 2007, the PRC government promulgated the PRC Corporate Income Tax Law, or the New CIT Law, which became effective from January 1, 2008. All enterprises, including both domestic enterprises and FIEs, would be taxed at a statutory rate of 25%. However, certain HNTEs continue to be entitled to a preferential tax rate of 15% and enjoy the previously granted tax holidays. Linkage Nanjing was certified as such an HNTE on December 9, 2008, which certification will be effective for three years from 2008 to 2010. At the same time, Linkage Nanjing continued to be eligible for a preferential tax rate of 12.5% for 2008 under the existing tax holiday scheme. On December 31, 2008, Linkage Nanjing was certified as a Key Software Enterprise for 2008 and was therefore eligible for a 10% tax rate for income earned during 2008. As companies may select the most preferential tax rate to apply, Linkage Technologies applied the 10% rate to Linkage Nanjing in 2008. However, due to the significant uncertainty as to whether similar preferential tax rates can be obtained for future years, Linkage Technologies did not assume Linkage Nanjing would continue to enjoy the 10% preferential tax rate after 2008 and applied a 15% tax rate in the calculation of applicable tax rate and deferred taxes for Linkage Nanjing for 2009. Linkage Suzhou was subject to a uniform tax rate of 25% for 2008 according to the New CIT Law.

Under the New CIT Law, enterprises established in China and enterprises established outside China whose de facto management bodies are located in China are considered resident enterprises. The New CIT Law also imposes a 10% withholding income tax for interest and dividends distributed by a resident enterprise to its immediate holding company outside the PRC that is not considered a resident enterprise, which interest and dividends distributions were previously exempt. A lower withholding tax rate will be applied if there is a tax treaty arrangement between mainland China and the jurisdiction of the foreign holding company. For the year ended December 31, 2008 and the nine months ended September 30, 2009, Linkage Technologies has accrued dividend withholding tax of \$1.8 million and \$nil, respectively, at the rate of 10% in deferred tax liabilities for undistributed earnings of its PRC subsidiaries. Linkage Technologies expects its withholding obligations to decrease as it becomes eligible for the lower withholding tax applicable to companies with a Hong Kong holding or intermediate holding company, provided, among other things, that the Hong Kong holding company will have held 25% or more of the equity interest of Linkage Nanjing at all times within the 12-month period prior to any dividends distribution.

Critical Accounting Policies

Linkage Technologies' discussion and analysis of its financial condition and results of operations are based upon its consolidated financial statements, which have been prepared in accordance with the US GAAP, appearing elsewhere in this Proxy Statement. The preparation of these financial statements requires Linkage Technologies to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. On an on-going basis, Linkage Technologies evaluates its estimates based on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

An accounting policy is considered critical if it requires an accounting estimate to be made based on assumptions about matters that are highly uncertain at the time such estimate is made, and if different accounting

estimates that reasonably could have been used, or changes in the accounting estimates that are reasonably likely to occur periodically, could materially impact the consolidated financial statements. Linkage Technologies believes that the following accounting policies involve a higher degree of judgment and complexity in their application and require it to make significant accounting estimates. The following descriptions of critical accounting policies, judgments and estimates should be read in conjunction with Linkage Technologies' consolidated financial statements and other disclosures included in this Proxy Statement.

When reviewing Linkage Technologies' financial statements, you should consider (i) its selection of critical accounting policies, (ii) the judgment and other uncertainties affecting the application of such policies, and (iii) the sensitivity of reported results to changes in conditions and assumptions.

Revenue Recognition

Linkage Technologies derives its revenues from three sources: (i) software development, which includes development and licensing of software, provision of customization, modification, implementation, integration, training and PCS, as well as recurring revenues from ongoing system support and enhancement services, (ii) IT services, which includes system integration, third-party hardware maintenance, third-party software support, network support, and IT consulting and research services, and (iii) resale of third-party hardware and software.

Linkage Technologies' software development arrangements contain multiple deliverables. The deliverables include licenses of custom software which consist of a combination of self-developed core software and third-party software, and related services such as customization, modification, implementation and integration services, training, and PCS. Such arrangements may also include third-party hardware and hardware installation and maintenance to the extent hardware is sold as part of the arrangement. As these arrangements require significant modification or customization of the software, revenues for the combined arrangement is recognized over the service period based on the percentage-of-completion method of accounting. Because PCS has never been sold separately, Linkage Technologies does not have vendor specific objective evidence of fair value of PCS. The percentage-of-completion method of revenue recognition is therefore applied through the date the last element is required to be delivered, which is typically the end of the bundled PCS period. Progress toward completion is measured by dividing the actual direct labor costs incurred into total estimated direct labor costs for the project. Revenue with respect to a project is computed by multiplying total estimated contract revenue by the percentage of completion. Cost of revenue is computed in a similar manner by multiplying total estimated contract cost by the percentage of completion. Gross profit with respect to the project for a period is the excess of revenue over the cost of revenue. Any revisions to existing estimated contract profits, if necessary, are made in the period in which the circumstances requiring the revisions become known. Provisions for expected losses on uncompleted contracts are recorded in the period in which such losses become probable.

The process of estimation inherent in the application of the percentage-of-completion method of accounting for revenue is subject to judgments and uncertainties and may affect the amount of software development revenue and related expenses reported in Linkage Technologies' consolidated financial statements. A number of internal and external factors can affect Linkage Technologies' estimates to complete customer engagements, including skill level and experience of project managers, staff assigned to engagements and continuity and attrition level of professional services staff. Changes in the estimated stage of completion of a particular project could create variability in Linkage Technologies' revenue and results of operations if it is required to increase or decrease previously recognized revenue related to a particular project or if it expects to incur a loss on the project.

Certain of Linkage Technologies' software development arrangements include ongoing system support and enhancement services. These services consist of designing and implementing enhancements to existing software, providing overall system support and performing operational tasks in the customer's IT function on behalf of the customer. These services are generally provided over a specified period of time, typically ranging from a few months to two years. The cost of providing such services cannot be reliably estimated as the workload varies with

Table of Contents

the customer's service requests during the service period. Under these arrangements, the entire arrangement fee and accumulated contract costs are deferred and recognized ratably over the longer of the PCS and the system support and enhancement service period, commencing subsequent to delivery of the customized software and when PCS, system support and enhancement services are the only remaining deliverables.

Revenue from ongoing system support and enhancement arrangements that are not combined with other elements are recognized ratably over the service period and when persuasive evidence of an arrangement exists, the fee is fixed or determinable, and collectability is reasonably assured.

Subsequent sales of upgrades and enhancements are accounted for separately from the initial sales of customized software as upgrades and enhancements are not negotiated within a short time frame of the initial sale, the software from the initial sale is not dependent on the delivery of the upgrades or enhancements, neither the fees for the initial or subsequent sale are subject to refund if one or the other contracts is not fulfilled nor are payment terms for either sale tied to the performance of the other.

Linkage Technologies' system integration arrangements also include multiple deliverables, such as third-party hardware and software, installation, integration, training, maintenance, and support. Linkage Technologies evaluated the deliverables for separation and determined that the delivered items should not be considered a separate unit of account because not all undelivered elements have objective and reliable evidence of fair value. Revenues are recognized when Linkage Technologies has substantially met its performance obligations under the contract and received final acceptance from the customer. Generally revenues are recognized net of the amounts paid to suppliers of the third-party hardware and software as Linkage Technologies is considered to be an agent in these arrangements.

Linkage Technologies enters into third-party hardware maintenance and software support contracts with end customers and generally enter into back-to-back arrangements of similar key terms with the third-party hardware and software vendors to cover its risks in the customer contracts. Revenues are recognized ratably over the term of the maintenance or support agreement when all other revenue recognition criteria are met. Under such arrangements, Linkage Technologies recognizes revenues net of the back-to-back contracts as it is considered an agent in these arrangements. In a limited number of arrangements where Linkage Technologies is contracted to provide network support services and no back-to-back arrangements exist with third-party hardware and software vendors, Linkage Technologies reports revenues at gross amounts billed to the customer because it is the primary obligor in those arrangements.

Linkage Technologies' research findings under IT consulting and research arrangements are evaluated by the customer based on the customer's specific criteria. Revenues are recognized when Linkage Technologies receives final acceptance from the customer, assuming all other revenue recognition criteria have been met.

Revenue from resale of third party hardware and software, if not bundled with other deliverables, is recognized upon delivery and acceptance.

The determination of whether Linkage Technologies serves as a principal or agent in an arrangement is based on an evaluation of the terms of the arrangement and is judgmental. Most of Linkage Technologies' system integration and third-party hardware maintenance and software support arrangements are reported on a net basis because it does not take general inventory risk, has little or no latitude in setting sales prices, does not make changes to third-party products, has no discretion in supplier selection, has limited physical loss inventory risk, and the third party product suppliers are the primary obligors.

Billings are rendered based on agreed upon contract milestones. Revenues recognized in excess of billings is recorded as unbilled receivables and is included in trade accounts receivable. Unbilled receivables also include costs that are incurred when performing system integration services as an agent and will be billed based on contractual billing milestones. These costs typically relate to hardware, software and spare parts that have been acquired by Linkage Technologies and have been delivered to the customer. Billings in excess of revenues recognized are recorded as deferred revenue.

Allowance for Doubtful Accounts

Linkage Technologies provides allowances for doubtful accounts for its trade accounts receivable based on an analysis of the history of bad debts, the creditworthiness of its customers, aging of the accounts receivable, changes in its customers' payment terms, economic conditions, and other specific circumstances related to the accounts. Linkage Technologies performs ongoing credit evaluations of its customers' financial condition and, generally, requires no collateral from its customers.

Linkage Technologies' accounts receivable balances on December 31, 2007 and 2008 and September 30, 2009 were \$36.0 million, \$52.4 million and \$84.8 million, respectively, net of allowance for doubtful accounts of \$81,000, \$144,000 and \$144,000, respectively. If the financial condition of its customers were to deteriorate, resulting in their failure to make payments, an additional allowance might be required.

Share-Based Compensation

Linkage Technologies is responsible for estimating the fair value of its share-related transactions, which have been the result of the issuance of ordinary shares at a discount from fair value. The determination of fair value requires Linkage Technologies to make complex and subjective judgments about projected financial and operating results. It also requires making certain assumptions such as cost of capital, general market and macroeconomic conditions, industry trends, comparable companies and its share price volatility, expected lives of options and discount rates. These assumptions are inherently uncertain. Changes in these assumptions could significantly affect the amount of employee share-based compensation expense Linkage Technologies recognizes in its consolidated financial statements.

Linkage Technologies recognized total share-based compensation expense of \$nil, \$0.6 million, \$2.3 million and \$1.9 million for the years ended December 31, 2006, 2007, and 2008 and the nine months ended September 30, 2009, respectively.

Determination of the fair value of share-based compensation is further discussed in *Factors Affecting Linkage Technologies' Results of Operations - Share-Based Compensation Expenses* beginning on page 99.

Income Taxes

Deferred income taxes are recognized for temporary differences between the tax basis of assets and liabilities and their reported amounts in the financial statements, net operating loss carryforwards and credits by applying enacted statutory tax rates applicable to future years. Deferred tax assets are reduced by a valuation allowance when, in the opinion of Linkage Technologies, it is more likely than not that some portion or all of the deferred tax assets will not be realized. Current income taxes are provided for in accordance with the laws of the relevant taxing authorities. The components of the deferred tax assets and liabilities are individually classified as current and non-current based on the characteristics of the underlying assets and liabilities, or the expected timing of their use when they do not relate to a specific asset or liability. As of December 31, 2007 and 2008, Linkage Technologies had not recorded a valuation allowance as Linkage Technologies believes it is more likely than not that its deferred tax assets will be realized. Current income taxes are provided for in accordance with the laws of the relevant tax authorities.

On January 1, 2007, Linkage Technologies adopted authoritative accounting guidance providing that the impact of an uncertain income tax position on the income tax return must be recognized at the largest amount that is more-likely-than-not to be sustained upon audit by the relevant tax authority. An uncertain income tax position will not be recognized if it has less than a 50% likelihood of being sustained. Additionally, the guidance addresses de-recognition, classification, interest and penalties, accounting in interim periods, disclosure and transition issues. The total amount of unrecognized tax benefits as of the date of adopting the guidance was nil. Interest and penalties on income taxes will be classified as a component of the provisions for income taxes.

Nine Months Ended September 30, 2009 Compared to Nine Months Ended September 30, 2008

Revenues. Linkage Technologies' revenues increased by \$59.8 million, or 113.5%, from \$52.7 million in the nine months ended September 30, 2008 to \$112.5 million in the nine months ended September 30, 2009. The increase was primarily attributable to the increase in the number of its customers from 63 as of September 30, 2008 to 69 as of September 30, 2009, and to an increase in revenue contributions from China Telecom, which almost doubled during the period, and from China Unicom, which almost tripled during the period.

Cost of Revenues. Linkage Technologies' cost of revenues increased by \$30.2 million, or 117.6%, from \$25.7 million in the nine months ended September 30, 2008 to \$55.9 million in the nine months ended September 30, 2009. This increase was primarily attributable to an increase in personnel expenses as a result of the increase in the number of Linkage Technologies' engineers allocated to active software development projects from approximately 1,800 in the nine months ended September 30, 2008 to approximately 3,200 in the nine months ended September 30, 2009 in order to meet increasing customer demand relating to 3G and other new technologies, which increase was partially offset by a decrease in share-based compensation from \$1.8 million in the nine months ended September 30, 2008 to nil in the nine months ended September 30, 2009.

Operating Expenses. Linkage Technologies' operating expenses increased by \$13.6 million, or 103.5%, from \$13.1 million in the nine months ended September 30, 2008 to \$26.7 million in the nine months ended September 30, 2009. Operating expenses as a percentage of total revenues decreased by 1% from 25% to 24%. The increase in operating expenses was attributable to:

Sales and marketing expenses. Sales and marketing expenses increased by \$1.7 million, or 33.6% from \$5.0 million in the nine months ended September 30, 2008 to \$6.7 million in the nine months ended September 30, 2009. This increase was primarily attributable to the increase in compensation and benefit costs associated with sales and marketing personnel and the increase in marketing and promotional expenses in connection with Linkage Technologies' operational expansion;

General and administrative expenses. General and administrative expenses increased by \$8.1 million, or 125.0%, from \$6.5 million in the nine months ended September 30, 2008 to \$14.6 million in the nine months ended September 30, 2009. This increase was primarily attributable to \$1.9 million share-based compensation expense related to options issued to an executive officer and an increase in the accruals of performance-based bonus and increases in rental expenses and office decoration expenditures; and

Research and development expenses. Research and development expenses increased by \$3.8 million, or 231.6%, from \$1.6 million in the nine months ended September 30, 2008 to \$5.4 million in the nine months ended September 30, 2009. This increase was primarily attributable to an increase in the number of Linkage Technologies' engineers allocated to research and development projects in anticipation of the introduction of 3G technologies by telecom operators.

Income Tax Expense. Linkage Technologies' income tax expense increased by \$1.7 million, or 45.3%, from \$3.8 million in the nine months ended September 30, 2008 to \$5.5 million in the nine months ended September 30, 2009. This increase was primarily attributable to an increase in taxable income and a decrease in

Table of Contents

the effective tax rate from 27.3% for the nine months ended September 30, 2008 to 17.8% for the nine months ended September 30, 2009. The decrease in the effective tax rate was mainly was attributable to \$1.9 million in share-based compensation expenses and no withholding tax on dividends declared by Linkage Nanjing in the nine months ended September 30, 2009, compared to \$2.3 million share-based compensation expenses and \$1.2 million withholding tax in the nine months ended September 30, 2008.

Net Income. As a result of the foregoing, Linkage Technologies' net income increased by \$15.3 million, or 152.2%, from \$10.0 million in the nine months ended September 30, 2008 to \$25.3 million in the nine months ended September 30, 2009.

Year Ended December 31, 2008 Compared to Year Ended December 31, 2007

Revenues. Linkage Technologies' revenues increased by \$34.5 million, or 64.1%, from \$53.8 million in 2007 to \$88.3 million in 2008. The increase was primarily attributable to the increase in the number of its customers from 57 in 2007 to 65 in 2008 and an increase in demand for its solutions partly as a result of its ability to take advantage of the restructuring of China's telecom industry in 2008, to establish new customer relationships, to offer solutions that addressed the fixed-line, mobile and broadband operations convergence faced by the telecom operators post-restructuring and the advent of 3G technologies, and to cross-sell to its expanded customer base.

Cost of Revenues. Linkage Technologies' cost of revenues increased by \$17.5 million, or 73.8%, from \$23.7 million in 2007 to \$41.2 million in 2008. This increase was primarily attributable to an increase in personnel expenses as a result of the increase in the number of Linkage Technologies' engineers allocated to active software development projects from approximately 1,400 in 2007 to approximately 2,000 in 2008 and an increase in share-based compensation from nil in 2007 to \$1.8 million as a result of a transfer of an indirect interest in Linkage Technologies to 549 employees in 2008.

Operating Expenses. Linkage Technologies' operating expenses increased by \$9.1 million, or 55.5%, from \$16.4 million in 2007 to \$25.5 million in 2008. Operating expenses as a percentage of total revenues decreased by 1.6% from 30.5% to 28.9%. The increase in operating expenses was attributable to:

Sales and marketing expenses. Sales and marketing expenses increased by \$1.7 million, or 30.7% from \$5.7 million in 2007 to \$7.4 million in 2008. This increase was primarily attributable to the increase in marketing and promotional expenses in connection with Linkage Technologies' operational expansion;

General and administrative expenses. General and administrative expenses increased by \$6.0 million, or 61.6%, from \$9.7 million in 2007 to \$15.6 million in 2008. This increase was primarily attributable to an increase in general and administrative headcount from 68 in 2007 to 90 in 2008 and the additional compensation and benefits costs associated with this headcount increase and to increases in rental expense and entertainment expenditures; and

Research and development expenses. Research and development expenses increased by \$1.4 million, or 129.7%, from \$1.1 million in 2007 to \$2.5 million in 2008. This increase was primarily attributable to Linkage Technologies' investment of more resources in research and development in anticipation of the introduction of 3G technologies by telecom operators.

Income Tax Expense. Linkage Technologies' income tax expense grew by \$3.7 million, or 452.7%, from \$0.8 million in 2007 to \$4.5 million in 2008. This was primarily attributable to an increase in taxable income and an increase in effective tax rate from 6.0% in 2007 to 20.8% in 2008 as a result of the adoption of the New CIT Law.

Net Income. As a result of the foregoing, Linkage Technologies' net income increased by \$4.5 million, or 35.9%, from \$12.6 million in 2007 to \$17.1 million in 2008.

Year Ended December 31, 2007 Compared to Year Ended December 31, 2006

Revenues. Linkage Technologies' revenues increased by \$7.0 million, or 15.0%, from \$46.8 million in 2006 to \$53.8 million in 2007. The increase was primarily attributable to the increase in the number of Linkage Technologies' customers from 54 in 2006 to 57 in 2007, an increase in its offerings, and an increase in demand for its solutions as a result of growth in China's telecom operators' IT spending and Linkage Technologies' ability to develop and cross-sell solutions that address the anticipated fixed-line, mobile and broadband operations convergence.

Cost of Revenues. Linkage Technologies' cost of revenues decreased by \$0.3 million, or 1.3%, from \$24.0 million in 2006 to \$23.7 million in 2007. This decrease was primarily attributable to a decrease in implementation costs for customers, partially offset by an increase in personnel expenses as a result of the increase in the number of Linkage Technologies' engineers allocated to active software development projects from approximately 1,100 in 2006 to approximately 1,400 in 2007.

Operating Expenses. Linkage Technologies' operating expense increased by \$4.2 million, or 34.3%, from \$12.2 million in 2006 to \$16.4 million in 2007. Operating expenses as a percentage of total revenues increased by 4.3% from 26.2% to 30.5%. The increase in operating expenses was attributable to:

Sales and marketing expenses. Sales and marketing expenses increased by \$1.3 million, or 30.4%, from \$4.3 million in 2006 to \$5.7 million in 2007. This increase was primarily attributable to the increase in marketing and promotional expenses in connection with Linkage Technologies' operational expansion and an increase in compensation and benefits costs associated with sales and marketing personnel;

General and administrative expenses. General and administrative expenses increased by \$2.5 million, or 34.4%, from \$7.2 million in 2006 to \$9.7 million in 2007. This increase was primarily attributable to an increase in compensation and benefits costs associated with general and administrative personnel and an increase in legal and audit fees in connection with Linkage Technologies' business expansion; and

Research and development expenses. Research and development expenses increased by \$0.4 million, or 56.0%, from \$0.7 million in 2006 to \$1.1 million in 2007. This represented 1.5% and 2.0% of total revenues for 2006 and 2007, respectively. The increase was primarily attributable to an increase in compensation and benefits costs associated with personnel allocated to research and development.

Income Tax Expense. Linkage Technologies' income tax expense decreased by \$0.1 million, or 14.1%, from \$0.9 million in 2006 to \$0.8 million in 2007. This decrease was primarily attributable to a decrease in Linkage Technologies' effective tax rate from 9.3% in 2006 to 6.0% in 2007, caused primarily by an increase in tax holiday benefits, offset by an increase in taxable income.

Net Income. As a result of the foregoing, Linkage Technologies' net income increased by \$3.4 million, or 37.2%, from \$9.2 million in 2006 to \$12.6 million in 2007.

As of December 31, 2008, Linkage Technologies had \$18.0 million in cash and cash equivalents, compared to \$17.7 million as of December 31, 2007. The relatively stable level of cash and cash equivalents was primarily attributable to net cash from its operations less the payment of a dividend of \$18.2 million in 2008. As of September 30, 2009, Linkage Technologies had \$9.7 million in cash and cash equivalents, compared to \$18.0 million as of December 31, 2008. The decrease in its cash and cash equivalents from December 31, 2008 to September 30, 2009 was primarily attributable to a decrease in net cash from its operations. In January 2009, Linkage Technologies declared dividends to holders of its ordinary shares in the amount of \$14.7 million and during the period from January 1, 2009 to the date of this Proxy Statement, Linkage Technologies made dividend distributions to its shareholders totaling approximately \$13.3 million in cash.

Linkage Technologies' working capital as of December 31, 2006, 2007, 2008 and September 30, 2009 was \$15.0 million, \$26.1 million, \$31.4 million and \$43.2 million, respectively. Linkage Technologies had \$6.5 million, \$8.2 million, \$5.1 million and \$22.0 million in outstanding short-term bank borrowings as of such dates. In addition, Linkage Technologies currently has a \$13.0 million credit facility that consists of short-term revolving loans and letters of credit. As of September 30, 2009, unused portions of the credit facility were \$13.0 million.

Linkage Technologies has financed its business primarily through cash generated from its operations and short-term borrowings from commercial banks.

Operating Activities

Net cash used in operating activities amounted to \$11.0 million for the nine months ended September 30, 2009, primarily attributable to growth in Linkage Technologies' business activities, which caused (i) an increase in trade accounts receivable of \$32.4 million, and (ii) an increase of \$7.8 million in inventories and contracts in progress, partly offset by net income of \$25.3 million and an increase of \$5.9 million in accrued expense and other payables.

Net cash provided by operating activities amounted to \$22.9 million in 2008, primarily attributable to (i) net income of \$17.1 million, (ii) a decrease of \$8.6 million in inventories and contracts in progress as a result of a decrease in hardware purchases, and (iii) an increase in accrued payroll and welfare of \$3.3 million as a result of an increase in headcount, offset by an increase in trade accounts receivable of \$13.9 million as a result of an increase in sales, primarily attributable to unbilled receivables.

Net cash provided by operating activities amounted to \$11.7 million in 2007 primarily attributable to (i) net income of \$12.6 million, (ii) an increase of \$7.1 million in trade accounts payable as a result of purchases made

in the last quarter of 2007, and (iii) an increase of \$6.1 million in deferred revenue as a result of an increase in the number of newly entered contracts and the resulting increase in projects in progress, partly offset by an increase in trade accounts receivable of \$5.7 million as a result of an increase in total revenues and an increase of \$10.3 million in inventories and contracts in progress.

Net cash provided by operating activities amounted to \$2.9 million in 2006 primarily attributable to (i) net income of \$9.2 million, (ii) a decrease of \$3.7 million in inventories and contracts in progress due to a decrease in hardware purchases, and (iii) an increase in accrued payroll and welfare of \$2.7 million, partly offset by an increase in trade accounts receivable of \$5.8 million as a result of an increase in total revenues and by a decrease of \$7.8 million in trade accounts payable as a result of a decrease in hardware purchases.

Investing Activities

Linkage Technologies investing activities primarily relate to purchases and disposals of property and equipment and loans made to related parties.

Net cash used in investing activities was \$0.9 million for the nine months ended September 30, 2009 primarily attributable to \$1.7 million of purchases of computer and equipment for office use and \$6.1 million of loans made to related parties, partly offset by repayment of loans from related parties of \$6.1 million and a decrease of \$0.8 million in restricted cash. Net cash used in investing activities was \$1.0 million in 2008 primarily due to purchases of computer and electronic equipment and leasehold improvements at Linkage Technologies office premises and \$15.6 million of loans made to related parties, partly offset by repayment of loans from related parties of \$15.6 million and a decrease of \$37,000 in restricted cash. Net cash used in investing activities was \$0.4 million in 2007 primarily attributable to purchases of property and equipment and \$5.2 million of loans made to related parties, partially offset by repayment of loans from related parties of \$5.3 million and a decrease of \$0.1 million in restricted cash. Net cash used in investing activities was \$1.5 million in 2006 primarily attributable to purchases of property and equipment and an increase of \$0.3 million in restricted cash and \$10.5 million loans made to related parties, partly offset by repayment of loans from related parties of \$10.4 million.

Financing Activities

Linkage Technologies financing activities primarily consist of borrowings from commercial banks and related parties and dividends paid to its ordinary shareholders.

Net cash provided by financing activities was \$3.6 million for the nine months ended September 30, 2009 primarily attributable to proceeds from its short-term borrowings of \$35.1 million, partly offset by the \$13.3 million dividends paid to its shareholders and repayment of its short-term bank borrowings of \$18.3 million. Net cash used in financing activities was \$21.8 million in 2008 primarily attributable to the \$18.2 million dividends paid to Linkage Technologies shareholders and repayment of Linkage Technologies short-term bank borrowings of \$29.5 million, offset in part by proceeds from its short-term borrowings of \$25.9 million. Net cash used in financing activities was \$6.1 million in 2007 primarily attributable to the \$1.2 million of dividends paid to its shareholders, repayment of its short-term borrowings with commercial banks of \$24.1 million, repayment of its borrowing from related parties of 1.3 million, offset in part by proceeds from its short-term bank borrowings of \$20.4 million. Net cash used in financing activities was \$0.5 million in 2006 primarily attributable to the \$1.7 million dividends paid to its shareholders, repayment of its short-term bank borrowings of \$25.8 million, offset in part by proceeds from its short-term borrowings of \$27.0 million.

Accounts Receivable

As of December 31, 2007, December 31, 2008 and September 30, 2009, Linkage Technologies trade accounts receivable amounted to \$36.0 million, \$52.4 million and \$84.8 million, respectively, and consisted of unbilled receivables and billed receivables, less allowance for doubtful accounts.

Table of Contents***Billed Receivables***

Linkage Technologies' billed receivables correspond to the period between billing and collection, and represent the amount billed based on agreed-upon contract milestones and that remain uncollected. As of December 31, 2007, December 31, 2008 and September 30, 2009, its billed receivables were \$22.6 million, \$25.2 million and \$32.8 million, respectively. The collection period is affected by the credit term under a contract. Linkage Technologies typically grants credit terms of 30 to 90 days to its customers.

The following table sets forth the aging of Linkage Technologies' billed receivables as a percentage of the total billed receivables as of the dates below:

	As of December 31,		As of
	2007	2008	September 30,
	(%)	(%)	2009
	(%)	(%)	(%)
One month or less	68.0	77.1	27.5
Three months or less	84.0	93.5	56.6
Six months or less	94.3	95.3	94.8
One year or less	98.8	97.4	99.4

The number of customers that represented over 10% of its billed receivables was three in 2007, nil in 2008 and one in the nine months ended September 30, 2009. There are currently no billed receivables that are in dispute. Linkage Technologies' allowance for doubtful accounts of \$81,000, \$144,000 and \$144,000, respectively, accounted for 0.2%, 0.3% and 0.1%, respectively, of its accounts receivable balances on December 31, 2007, 2008 and September 30, 2009, respectively. Linkage Technologies does not foresee incurring a significant amount of bad debt expenses in the near future, in part because its customers are large telecom operators with significant resources and because its solutions are critical to their business. As of November 30, 2009, all of Linkage Technologies' billed receivables outstanding as of December 31, 2007 had been collected, approximately 97% of its billed receivables outstanding as of December 31, 2008 had been collected and approximately 61% of its billed receivables outstanding as of September 30, 2009 had been collected.

Unbilled Receivables

The majority of Linkage Technologies' unbilled receivables correspond to the period between revenue recognition and invoicing, and represent the excess of recognized revenues over billings. Linkage Technologies' contracts allow it to invoice its customers upon performing the entire contract or completion of milestones such as delivery, installation, preliminary testing and final testing. However, Linkage Technologies recognizes revenues under most of these contracts on a percentage-of-completion basis that tracks the amount of man-hours spent on a project. Linkage Technologies generally incurs man-hours prior to reaching the milestones prescribed in its contracts that allow it to invoice its customers, which gives rise to its unbilled receivables. The remainder of its unbilled receivables represent hardware, software and spare parts Linkage Technologies purchased in connection with its system integration services as an agent for its customers. Such costs are not billed until certain agreed-upon contract milestones. Linkage Technologies' unbilled receivables increased from \$13.5 million as of December 31, 2007 to \$27.4 million as of December 31, 2008, primarily due to an increase in the aggregate number of software development contracts Linkage Technologies entered into. Its unbilled receivables as of September 30, 2009 were \$52.1 million. As of November 30, 2009, all of its unbilled receivables in the year ended December 31, 2007 were subsequently billed, and 94% and 25% of its unbilled receivables in the year ended December 31, 2008 and the nine months ended September 30, 2009 were billed, respectively.

Linkage Technologies' relatively high receivables balances are a result of telecom operator practices in China. While Linkage Technologies does not foresee a significant reduction in such balances or the collection

Table of Contents

period of receivables in the near future, it intends to better manage its receivables and cash flows through better monitoring of its accounts receivable and collection and better control over invoicing and credit terms.

Restricted Net Assets

Relevant PRC laws and regulations permit payments of dividends by Linkage Technologies' subsidiaries in the PRC only out of their retained earnings, if any, as determined in accordance with PRC accounting standards and regulations. In addition, Linkage Technologies' PRC subsidiaries are required to annually appropriate 10% of net after-tax income to the statutory surplus reserve fund prior to payment of any dividends, unless such reserve funds have reached 50% of the subsidiaries' respective registered capital. Linkage Technologies' PRC subsidiaries had statutory reserve balances of \$3.0 million, \$5.2 million and \$5.2 million as of December 31, 2007, December 31, 2008 and September 30, 2009, respectively. As a result of these and other restrictions under PRC laws and regulations, Linkage Technologies' PRC subsidiaries are restricted in their ability to transfer a portion of their net assets to Linkage Technologies either in the form of dividends, loans or advances. The PRC subsidiaries' registered capital of \$12.2 million, \$12.2 million and \$12.2 million as of December 31, 2007, December 31, 2008 and September 30, 2009, respectively, was considered restricted due to restrictions on the distribution of share capital to Linkage Technologies by its PRC subsidiaries. As of December 31, 2007, December 31, 2008 and September 30, 2009, total restricted net assets held by Linkage Technologies' PRC subsidiaries was \$15.2 million, \$17.4 million and \$17.4 million, respectively.

Contractual Obligations

The following table sets forth Linkage Technologies' contractual obligations as of December 31, 2008:

	Total	Payments due by period			more than 5 years
		less than 1 year	1-3 years (\$ in thousands)	3-5 years	
Short-term debt obligations (including interest)	5,228	5,228			
Operating lease obligations	1,163	860	303		
Total	6,391	6,088	303		

As of December 31, 2008, Linkage Technologies' short-term debt obligations consisted of loans due to commercial banks aggregating \$5.1 million, with interest rates ranging from 5.58% to 8.22% per annum and a weighted-average interest rate of 7.44% for the year ended December 31, 2008. As of September 30, 2009, Linkage Technologies' short-term debt obligations consisted of loans due to commercial banks aggregating \$22.0 million, with interest rates ranging from 4.86% to 5.04% per annum and a weighted-average interest rate of 4.61% for the nine months ended September 30, 2009. Linkage Technologies' operating lease obligations related to lease agreements for its corporate offices.

Linkage Technologies' revolving credit facilities renewed on September 4, 2009, providing for letters of credit and letters of guarantee up to an aggregate of \$13.0 million. As of September 30, 2009, there was no amount used under the facilities and the unused credit facilities totaled \$13.0 million. The credit facilities are not secured by any collateral.

Off-Balance Sheet Commitments and Arrangements

Linkage Technologies has not entered into any financial guarantees or other commitments to guarantee the payment obligations of any third parties. Linkage Technologies has not entered into any derivative contracts that are indexed to its shares and classified as shareholder's equity, or that are not reflected in its consolidated financial statements. Furthermore, Linkage Technologies does not have any retained or contingent interest in

assets transferred to an unconsolidated entity that serves as credit, liquidity or market risk support to such entity. Linkage Technologies does not have any variable interest in any unconsolidated entity that provides financing, liquidity, market risk or credit support to it or engages in leasing, hedging or research and development services with it.

Quantitative and Qualitative Disclosure about Market Risk

Foreign Currency Exchange Risk

Substantially all of Linkage Technologies' revenues and expenses are denominated in RMB. Linkage Technologies does not believe that it currently has any significant direct foreign exchange risk and has not hedged exposures denominated in foreign currencies or any other derivative financial instruments.

The value of the RMB against the U.S. dollar and other currencies may fluctuate and is affected by, among other things, changes in China's political and economic conditions. The conversion of RMB into foreign currencies, including U.S. dollars, has been based on rates set by the People's Bank of China. On July 21, 2005, the PRC government changed its decade-old policy of pegging the value of the RMB to the U.S. dollar. Under the new policy, the RMB is permitted to fluctuate within a narrow and managed band against a basket of certain foreign currencies. This change in policy caused the RMB to appreciate approximately 21.2% against the U.S. dollar between July 21, 2005 and September 30, 2009. Provisions on Administration of Foreign Exchange, as amended in August 2008, further changed China's exchange regime to a managed floating exchange rate regime based on market supply and demand. Since reaching a high against the U.S. dollar in July 2008, however, the RMB has traded within a narrow band against the U.S. dollar, remaining within 1% of its July 2008 high but never exceeding it. As a consequence, the RMB has fluctuated sharply since July 2008 against other freely traded currencies, in tandem with the U.S. dollar. It is difficult to predict how long the current situation may last and when and how it may change again. To the extent that Linkage Technologies needs to convert U.S. dollars into RMB for its operations, appreciation of the RMB against the U.S. dollar would have an adverse effect on the RMB amount Linkage Technologies receives from the conversion. Assuming Linkage Technologies had converted the U.S. dollar denominated cash balance of \$9.7 million as of September 30, 2009 into RMB at the exchange rate of \$1.00 for RMB6.8262 as of September 30, 2009, this cash balance would have been RMB65.9 million. If the exchange rate of RMB against the U.S. dollar is 10% higher than those Linkage Technologies used in its financial statements, this cash balance would have decreased to RMB59.9 million as of September 30, 2009. Linkage Technologies has not used any forward contracts or currency borrowings to hedge its exposure to foreign currency exchange risk.

Inflation Rate Risk

According to the National Bureau of Statistics of China, the change in the consumer price index in China was 1.5%, 4.8% and 5.9% in 2006, 2007 and 2008, respectively. If inflation continues to rise, it may materially and adversely affect Linkage Technologies' business.

Interest Rate Risk

Linkage Technologies' exposure to interest rate risk primarily relates to the interest rates for its outstanding debt and the interest income generated by excess cash invested in liquid investments with original maturities of three months or less. Such interest-earning instruments carry a degree of interest rate risk. Linkage Technologies has not used any derivative financial instruments to manage its interest risk exposure. Linkage Technologies has not been exposed to material risks due to changes in interest rates. However, its future interest income may be lower than expected due to changes in market interest rates.

Recent Accounting Pronouncements

The following accounting pronouncements were adopted during the year ended December 31, 2009:

In July 2009, the Financial Accounting Standards Board, or the FASB, adopted the Accounting Standards Codification, or ASC, which became the recognized source of authoritative US GAAP. Rules and interpretive releases of the SEC under the authority of federal securities law are also sources of authoritative US GAAP for SEC registrants. All other accounting literature is considered non-authoritative. The ASC was effective prospectively for reporting periods ended after September 15, 2009 and, accordingly, Linkage Technologies adopted the ASC during the third quarter of its 2009 fiscal year. The adoption of the ASC did not have an effect on Linkage Technologies' consolidated financial position, results of operations or cash flows.

In December 2007, the FASB issued authoritative guidance that expands the definition of a business combination and requires the fair value of the purchase price of an acquisition, including the issuance of equity securities, to be determined on the acquisition date. The guidance also requires that all assets, liabilities, contingent considerations and contingencies of an acquired business be recorded at fair value as of the acquisition date. In addition, the guidance requires, with certain exceptions, that acquisition costs should be expensed as incurred (rather than capitalized as part of the purchase price), restructuring costs should be expensed in periods subsequent to the acquisition date (rather than recognized as a liability in purchase accounting) and that changes after the measurement period in deferred tax asset valuation allowances and acquired income tax uncertainties should impact income tax expense. The guidance requires certain financial statement disclosures to enable users to evaluate and understand the nature and financial effects of the business combination. The guidance is effective for business combinations whose acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008. Linkage Technologies adopted the guidance on January 1, 2009 and intends to account for any subsequent business combination accordingly.

In April 2009, the FASB issued authoritative guidance to establish a model for pre-acquisition contingencies that requires an acquirer to recognize at fair value an asset acquired or a liability assumed in a business combination that arises from a contingency if the acquisition-date fair value of that asset or liability can be determined during the measurement period. If the acquisition-date fair value cannot be determined, then the acquirer follows recognition criteria to determine whether the contingency should be recognized as of the acquisition date or after it. The guidance is effective for business combinations whose acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008. Linkage Technologies adopted the guidance on January 1, 2009 and intends to account for any subsequent business combination accordingly.

In December 2007, the FASB issued authoritative guidance establishing accounting and reporting standards for the noncontrolling interest in a subsidiary and for the deconsolidation of a subsidiary. The guidance clarifies that a noncontrolling interest in a subsidiary is an ownership interest in the consolidated entity that should be reported as equity in the consolidated financial statements. Moreover, the guidance eliminates the diversity that currently exists in accounting for transactions between an entity and noncontrolling interests by requiring they be treated as equity transactions. The guidance is effective for fiscal years, and interim periods within those fiscal years, beginning on or after December 15, 2008. The adoption of the guidance on January 1, 2009 did not have a material impact on Linkage Technologies' financial position, results of operations or cash flows as Linkage Technologies has no noncontrolling interest in a subsidiary.

In February 2008, the FASB issued authoritative guidance that delays the effective date for fair-valuing non-financial assets and non-financial liabilities, except for items that are recognized or disclosed at fair value in the financial statements on a recurring basis, until fiscal years beginning after November 15, 2008. Linkage Technologies adopted this guidance for its non-financial assets and non-financial liabilities in the first quarter of 2009. The adoption of the guidance did not have a material impact on Linkage Technologies' financial position, results of operations or cash flows.

Table of Contents

In October 2008, the FASB issued authoritative guidance to clarify the application of fair value accounting principles in a market that is not active and certain application issues, such as the use of internal assumptions when relevant observable data does not exist, the use of observable market information when the market is not active, and the use of market quotes when assessing the relevance of observable and unobservable data. Linkage Technologies adopted this guidance in the third quarter of 2008. The adoption of the guidance did not have a material impact on Linkage Technologies' consolidated financial statements or the fair value of its financial assets and liabilities.

In April 2009, the FASB issued authoritative guidance that addresses estimating fair value when the volume and level of activity for the asset or liability have significantly decreased. This guidance also addresses how to identify circumstances that indicate a transaction is not orderly. The adoption of the guidance on April 1, 2009 did not have a material impact on Linkage Technologies' consolidated financial statements or the fair value of its financial assets and liabilities.

In April 2008, the FASB issued authoritative guidance to improve the consistency between the useful life of a recognized intangible asset and the period of expected cash flows used to measure the fair value of the asset under applicable accounting standards. In determining the useful life of acquired intangible assets, the guidance removes the requirement to consider whether an intangible asset can be renewed without substantial cost or material modifications to the existing terms and conditions and, instead, requires an entity to consider its own historical experience in renewing similar arrangements. The guidance also requires expanded disclosure related to the determination of intangible asset useful lives. The guidance is effective for financial statements issued for fiscal years beginning after December 15, 2008. The adoption of the guidance on January 1, 2009 did not have a material impact on Linkage Technologies' consolidated financial statements.

In April 2009, the FASB issued authoritative guidance amending the other-than-temporary impairment guidance in US GAAP for debt securities to make the guidance more operational and to improve the presentation and disclosure of other-than-temporary impairments on debt and equity securities in the financial statements. The guidance does not amend existing recognition and measurement guidance related to other-than-temporary impairments of equity securities. The adoption of the guidance on April 1, 2009 did not have a material impact on Linkage Technologies' consolidated financial statements.

In November 2008, the FASB issued authoritative guidance requiring entities that will acquire a defensive intangible asset to account for the acquired intangible asset as a separate unit of accounting and amortize the acquired intangible asset over the period during which the asset would diminish in value. The guidance is effective for defensive intangible assets acquired in fiscal years beginning on or after December 15, 2008. The adoption of the guidance on January 1, 2009 did not have a material impact on Linkage Technologies' consolidated financial statements.

In May 2009, the FASB issued authoritative guidance establishing general standards of accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued or are available to be issued. Specifically, the guidance provides (i) the period after the balance sheet date during which management of a reporting entity should evaluate events or transactions that may occur for potential recognition or disclosure in the financial statements; (ii) the circumstances under which an entity should recognize events or transactions occurring after the balance sheet date in its financial statements; and (iii) the disclosures that an entity should make about events or transactions that occurred after the balance sheet date. The guidance is effective prospectively for interim or annual financial periods ending after June 15, 2009. The adoption of the guidance on April 1, 2009 did not have a material impact on Linkage Technologies' consolidated financial statements.

Future Adoption of Accounting Standards:

In June 2009, the FASB issued authoritative guidance that eliminates the concept of a qualifying special-purpose entity, creates more stringent conditions for reporting a transfer of a portion of a financial asset as a sale, clarifies other sale-accounting criteria, and changes the initial measurement of a transferor's interest in

Table of Contents

transferred financial assets. The guidance will be effective for its fiscal year beginning January 1, 2010. Linkage Technologies is currently evaluating the impact of the adoption of the guidance on its consolidated financial statements.

In June 2009, the FASB issued authoritative guidance that eliminates exceptions to consolidating qualifying special-purpose entities, contains new criteria for determining the primary beneficiary, and increases the frequency of required reassessments to determine whether a company is the primary beneficiary of a variable interest entity. The guidance also contains a new requirement that any term, transaction, or arrangement that does not have a substantive effect on an entity's status as a variable interest entity, a company's power over a variable interest entity, or a company's obligation to absorb losses or its right to receive benefits of an entity must be disregarded in applying the guidance. The guidance will be effective for fiscal year beginning January 1, 2010. Linkage Technologies is currently evaluating the impact of the adoption of the guidance on its consolidated financial statements.

In October 2009, the FASB issued authoritative guidance that addresses accounting for multiple-deliverable arrangements to enable vendors to account for products or services (deliverables) separately rather than as a combined unit. Specifically, this guidance amends the criteria for separating consideration in multiple-deliverable arrangements. This guidance establishes a selling price hierarchy for determining the selling price of a deliverable, which is based on: (a) vendor-specific objective evidence; (b) third-party evidence; or (c) estimates. This guidance also eliminates the residual method of allocation and requires that arrangement consideration be allocated at the inception of the arrangement to all deliverables using the relative selling price method. In addition, this guidance significantly expands required disclosures related to a vendor's multiple-deliverable revenue arrangements. The guidance will be effective prospectively for revenue arrangements entered into or materially modified in fiscal years beginning on or after June 15, 2010. Early adoption is permitted. Linkage Technologies is currently evaluating the impact of the adoption of the guidance on its consolidated financial statements.

In October 2009, the FASB issued authoritative guidance that changes the accounting model for revenue arrangements that include both tangible products and software elements. Under this guidance, tangible products containing software components and non-software components that function together to deliver the tangible product's essential functionality are excluded from software revenue accounting guidance. In addition, hardware components of a tangible product containing software components are always excluded from software revenue accounting guidance. The guidance will be effective prospectively for revenue arrangements entered into or materially modified in fiscal years beginning on or after June 15, 2010. Early adoption is permitted. Linkage Technologies is currently evaluating the impact of the adoption of the guidance on its consolidated financial statements.

In January 2010, the FASB issued authoritative guidance that adds new requirements for fair value disclosures about (1) the different classes of assets and liabilities measured at fair value, (2) the valuation techniques and inputs used, (3) the activity in Level 3 fair value measurements, and (4) the transfers between Levels 1, 2, and 3. This guidance is effective for the first reporting period beginning after December 15, 2009, except for the requirement to provide the Level 3 activity of purchases, sales, issuances, and settlements on a gross basis, which will be effective for fiscal years beginning after December 15, 2010, and for interim periods within those fiscal years. In the period of initial adoption, entities will not be required to provide the amended disclosures for any previous periods presented for comparative purposes. However, those disclosures are required for periods ending after initial adoption. Early adoption is permitted. Linkage Technologies is currently evaluating the impact of the adoption of the guidance on its consolidated financial statements.

UNAUDITED PRO FORMA CONDENSED COMBINED FINANCIAL INFORMATION

The unaudited pro forma condensed combined balance sheet at September 30, 2009 combines the historical consolidated balance sheets of AsiaInfo and Linkage Technologies, giving effect to the Combination as if it had been completed on September 30, 2009. The unaudited pro forma condensed combined statements of operations for the year ended December 31, 2008 and the nine months ended September 30, 2009 combine the historical consolidated statements of operations of AsiaInfo and Linkage Technologies for such periods, giving effect to the Combination as if it had been completed on January 1, 2008. The historical consolidated financial information has been adjusted to give effect to pro forma events that are (i) directly attributable to the Combination, (ii) factually supportable, and (iii) with respect to the statement of operations, expected to have a continuing impact on the combined results.

The unaudited pro forma condensed combined financial information should be read in conjunction with the historical consolidated financial statements and accompanying notes of AsiaInfo incorporated by reference in this Proxy Statement, the historical consolidated financial statements and accompanying notes of Linkage Technologies included elsewhere in this Proxy Statement. The unaudited pro forma condensed combined financial information is for informational purposes only and should not be considered indicative of the operating results or financial position that would have occurred if the Combination had been completed on the dates indicated or that may occur as of any future date or for any future period.

The unaudited pro forma condensed combined financial information was prepared using the purchase method of accounting with AsiaInfo treated as the acquiring entity. Accordingly, the Consideration to be paid by AsiaInfo to complete the Combination will be allocated to Linkage Technologies assets and liabilities based upon their estimated fair values as of the date of completion of the Combination. The allocation depends upon certain valuations and other studies that have not progressed to a stage where there is sufficient information to make meaningful estimations. Additionally, a final determination of the fair value of Linkage Technologies' assets and liabilities, which cannot be made prior to the completion of the Combination, will be based upon their actual fair values as of the date of completion of the Combination. AsiaInfo expects that a completed purchase price allocation would likely result in recognizing intangible assets in addition to those reflected in the historical consolidated balance sheets of Linkage Technologies, such as customer relationships, internally developed technology and patents, contract backlog, non-compete agreements, and brand names. The amortization of such additional intangible assets would result in expense in future periods after the consummation of the Combination, in addition to the amortization expenses reflected in Linkage Technologies' historical consolidated financial statements. AsiaInfo also expects that a completed purchase price allocation would likely increase the carrying value of certain recorded assets and liabilities of Linkage Technologies, principally inventories and contracts in progress and deferred revenue, from their historical book value to their fair value. The increase to fair value of such assets and liabilities would reduce net income in periods following the Combination from those reflected in the historical financial statements of Linkage Technologies.

In addition to the potential adjustments discussed above, AsiaInfo believes there are certain differences in the accounting policies applied by AsiaInfo and Linkage Technologies, including the following:

Both entities use the percentage of completion method to account for certain of their contracts for software development, whereby revenue is measured based on the relationship of costs already incurred to the total estimated costs to be incurred. However, AsiaInfo considers total project costs (labor costs and other related costs) in calculating the percentage of completion and recognizes cost of sales on an actual basis with no deferral of project costs. Linkage Technologies considers direct labor costs in calculating the percentage of completion and recognizes cost of revenues based on the percentage of completion multiplied by total estimated contract costs. The difference between project costs recognized in the cost of revenues and actual costs are reflected in inventories and contracts in progress.

Table of Contents

For third-party hardware bundled with a software development contract, AsiaInfo generally bifurcates the third-party hardware from AsiaInfo's software development services and recognizes the hardware revenue upon customer acceptance. Linkage Technologies generally applies the percentage of completion method to the contract as a whole, including both the third-party hardware and Linkage Technologies' software development services.

AsiaInfo generally records the gross amount of revenues billed to customers, including hardware acquisition costs, rather than the net amount earned after deducting hardware costs paid to the hardware supplier. Third-party hardware and software included in Linkage Technologies' System integration revenues that are subject to centralized bidding and negotiation between telecom operators and Linkage Technologies' vendors are reported on a net basis.

AsiaInfo does not defer pre-contract costs while Linkage Technologies defers certain pre-contract costs.

Linkage Technologies records PRC business tax as cost of revenues while AsiaInfo presents revenues net of business taxes incurred. The unaudited pro forma condensed combined financial information makes no adjustments to reflect the effect of such differences in accounting policies, which would require an extensive review of individual Linkage Technologies contracts that is impracticable to complete without unreasonable effort and expense prior to completing the Combination.

AsiaInfo expects to incur significant costs associated with integrating the businesses of AsiaInfo and Linkage Technologies. The unaudited pro forma condensed combined financial information does not reflect the cost of any integration activities or the benefits that may result from potential synergies that may be derived from any integration activities, including elimination of duplicative corporate costs, decreased research and development costs, and tax benefits.

- (3) To eliminate the equity of Linkage Technologies and to recognize the goodwill and Cash Consideration to be paid and Stock Consideration to be issued by AsiaInfo.

With respect to the \$628,691 in Stock Consideration, authoritative accounting guidance requires that stock issued in a business combination be valued using the acquisition date fair value of the stock. Consequently, for the purpose of preparing the unaudited pro forma condensed combined financial statements, AsiaInfo has estimated the fair value of the shares of its common stock to be issued to Linkage Technologies as the Stock Consideration using the closing price per share of AsiaInfo's common stock on February 22, 2010 as reported on the NASDAQ Global Market. The following table summarizes the total estimated Consideration to be paid by AsiaInfo in the Combination:

Number of AsiaInfo shares to be issued as Stock Consideration	26,832,731
Closing price per share on February 22, 2010	\$ 23.43
Stock Consideration (consists of \$268 par value and \$628,423 additional paid-in capital for the Stock Consideration)	\$ 628,691
Cash Consideration	\$ 60,000
Total estimated Consideration	\$ 688,691
Less: Net assets of Linkage Technologies	\$ (46,224)
Estimated goodwill	\$ 642,467

For the purpose of preparing the unaudited pro forma condensed combined financial information, AsiaInfo has calculated the estimated goodwill of \$642,467 using the difference between the total estimated Consideration and the book value of the net assets of Linkage Technologies presented in its unaudited condensed consolidated balance sheet as of September 30, 2009.

The \$582,467 adjustment to equity consists of a (\$46,224) adjustment to eliminate the net assets of Linkage Technologies and a \$628,691 adjustment for the Stock Consideration issued to the shareholder of Linkage Technologies.

- (4) Represents a receivable from Linkage Cayman for the expenses related to Linkage Cayman's proposed initial public offering that will either be paid in full by Legacy Linkage Shareholders or be deducted from the Cash Consideration associated with the Combination. THE PROPOSALS

PROPOSAL NO. 1 THE CONSIDERATION PROPOSAL

The Payment of the Cash Consideration and Issuance of the Stock Consideration Under the Combination Agreement

Under the terms of the Combination Agreement, AsiaInfo will pay \$60 million and will issue 26,832,731 new shares of AsiaInfo common stock to Linkage Cayman, which Consideration will be distributed to the Legacy Linkage Shareholders, as consideration for AsiaInfo's purchase of 100% of the outstanding share capital of Linkage Technologies. Immediately following completion of the Combination, and upon the distribution of the Consideration to the Legacy Linkage Shareholders, the Legacy Linkage Shareholders will own shares representing approximately 35.8% of the outstanding common stock of the combined company, based on the fully-diluted number of shares of AsiaInfo common stock outstanding on December 6, 2009. The estimated aggregate market value of the Consideration was approximately \$734 million as of December 4, 2009, the date the parties entered into the Combination Agreement, and was approximately \$689 million as of February 22, 2010.

Under NASDAQ Marketplace Rule 4350(i), a company listed on NASDAQ is required to obtain stockholder approval prior to the issuance of common stock, among other things, (a) if the issuance will result in a change of control of the company, or (b) in connection with the acquisition of another company's stock, if the number of shares of common stock to be issued is in excess of 20% of the number of shares of common stock then outstanding. The 26,832,731 newly issued shares of AsiaInfo common stock to be issued in the Combination exceed the 20% threshold under the NASDAQ Marketplace Rules and are expected to represent approximately 35.8% of the issued and outstanding shares of the combined company's common stock on a fully diluted basis. Additionally, the Combination Agreement requires that AsiaInfo obtain the approval of the AsiaInfo stockholders for the payment of the Cash Consideration and the issuance of the Stock Consideration. Accordingly, in order to ensure compliance with NASDAQ Marketplace Rule 4350(i), and the terms of the Combination Agreement, AsiaInfo must obtain the approval of AsiaInfo's stockholders for the issuance of the Stock Consideration and the payment of the Cash Consideration in the Combination.

Vote Required and Board of Directors Recommendation

Approval of the Consideration Proposal requires the affirmative vote of the holders of a majority of the outstanding shares of our common stock present (in person or by proxy) at the Special Meeting and constituting a quorum for the purpose of voting on such matters. Given that the vote that is required to approve this proposal is based upon the number of shares present at the meeting, a stockholder's failure to vote on this proposal will have the same effect as a vote against the proposal.

The board of directors of AsiaInfo has unanimously approved the payment of the Cash Consideration and issuance of the Stock Consideration in connection with the Combination and recommends that you vote **FOR the Consideration Proposal.**

For a more detailed description of the Combination Agreement and the Combination, see *The Combination Agreement* beginning on page 65 and *The Combination* beginning on page 45. See also *Annex A* to this Proxy Statement.

PROPOSAL NO. 2 THE NAME CHANGE PROPOSAL

Proposal No. 2 is conditional on stockholder approval of Proposal No. 1. If the stockholders do not approve Proposal No. 1, then Proposal No. 2 will be abandoned.

The board of directors of AsiaInfo has approved an amendment to the Company's Certificate of Incorporation to change the name of the Company to AsiaInfo-Linkage, Inc. As approved by the board of directors, the name change will not become effective until (a) stockholder approval is received for the Certificate of Amendment and (b) the closing of the Combination. It is currently anticipated that the Certificate of Amendment will be filed as soon as practicable after stockholder approval is received and the closing of the Combination has occurred. A copy of the proposed Certificate of Amendment is attached as *Annex I* to this Proxy Statement.

We believe that the Company's current name, AsiaInfo Holdings, Inc., will not sufficiently reflect the combined company and its business focus following the closing of the Combination. The Company believes that it will improve the combined company's name identification if its corporate name incorporates the names of each of AsiaInfo and Linkage Technologies. It is anticipated that this change will improve awareness of the combined company in the minds of stockholders and customers by better identifying the business of the combined company.

Adoption of the Name Change Proposal requires the affirmative vote of the holders of a majority of the outstanding shares of our common stock present (in person or by proxy) at the special meeting and constituting a quorum for the purpose of voting on such matters. As of March 11, 2010, the record date for determining who is entitled to vote at the special meeting, there were 47,291,519 shares of our common stock issued and outstanding.

Vote Required and Board of Directors Recommendation

In accordance with Section 242 of the Delaware General Corporation Law, approval of the Name Change Proposal requires the affirmative vote of the holders of a majority of the outstanding shares of our common stock present (in person or by proxy) at the special meeting and constituting a quorum for the purpose of voting on such matters. Given that the vote required to approve this proposal is based upon the number of shares present at the meeting, a stockholder's failure to vote on this proposal will have the same effect as a vote against the proposal.

The board of directors of AsiaInfo has unanimously approved the change of AsiaInfo's name to AsiaInfo-Linkage, Inc. following completion of the Combination, and recommends that you vote FOR the Name Change Proposal.

PROPOSAL NO. 3 THE ADJOURNMENT PROPOSAL

If AsiaInfo fails to receive a sufficient number of votes to approve the Consideration Proposal and/or the Name Change Proposal, AsiaInfo may propose to adjourn the special meeting to a later date or dates to solicit additional proxies. If the proposal to adjourn the AsiaInfo special meeting is submitted to stockholders for approval, such approval will require the affirmative vote of a majority of the AsiaInfo common shares represented and voting at the special meeting.

Vote Required and Board of Directors Recommendation

Approval of the Adjournment Proposal requires the affirmative vote of the holders of a majority of the outstanding shares of our common stock present (in person or by proxy) at the special meeting and constituting a quorum for the purpose of voting on such matters. Given that the vote required to approve this proposal is based upon the number of shares present at the meeting, a stockholder's failure to vote on this proposal will have the same effect as a vote against the proposal.

The board of directors of AsiaInfo unanimously recommends that you vote ~~FOR~~ the Name Change Proposal.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholder of

Linkage Technologies Investment Limited:

We have audited the accompanying consolidated balance sheets of Linkage Technologies Investment Limited and subsidiaries (the "Company") as of December 31, 2007 and 2008, and the related consolidated statements of operations, shareholders' equity and comprehensive income, and cash flows for each of the three years in the period ended December 31, 2008. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of Linkage Technologies Investment Limited and subsidiaries as of December 31, 2007 and 2008, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2008, in conformity with accounting principles generally accepted in the United States of America.

This transaction has been accounted for as a transfer of assets between entities under common control as the shareholder structures of Linkage BVI and Lianchuang Technology were the same.

Linkage BVI, together with its subsidiaries (collectively, the Company), is principally engaged in the provision of customized software development and IT services, including system integration and IT consulting services, to telecommunication carriers and their provincial subsidiaries in the PRC.

Linkage BVI became a wholly-owned subsidiary of Linkage Technologies International Holdings Limited (Linkage Cayman) on December 16, 2008. Linkage Cayman was incorporated in the Cayman Islands on February 24, 2004. As of December 31, 2008, the Company's subsidiaries were as follows:

2. Summary of Significant Accounting Policies

Basis of presentation The consolidated financial statements of the Company are prepared in accordance with accounting principles generally accepted in the United States of America (US GAAP).

Principles of consolidation The consolidated financial statements include the financial statements of the Company and its subsidiaries. All significant inter-company balances and transactions have been eliminated on consolidation.

Use of estimates The preparation of financial statements in conformity with US GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the dates of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Significant estimates reflected in the Company's consolidated financial statements include time and cost required to complete projects for purposes of revenue recognition, future expected cash flow estimates for purposes of determining the fair value of the ordinary shares, assumptions used in calculating share-based compensation, valuation allowance for deferred tax assets and adequacy of unrecognized tax benefits, and collectability of accounts receivable and other receivables.

Cash and cash equivalents Cash and cash equivalents consist of cash on hand and demand deposits, which are unrestricted as to withdrawal or use, and which have original maturities of three months or less when purchased.

Table of Contents**LINKAGE TECHNOLOGIES INVESTMENT LIMITED AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(In thousands US\$, except share and per share amounts)**

Restricted cash Restricted cash is related to amounts which are not available for the Company's use in its operations and are held by banks as security for issuance of letters of credit, bankers' acceptance drafts, and performance bonds to certain customers.

Trade accounts receivable, net Accounts receivable are stated at the amount the Company expects to collect and is comprised of both billed and unbilled receivables. Billed receivables represent outstanding amounts invoiced in accordance with agreed-upon contract milestones. Unbilled receivables represent revenue recognized in excess of billings as of the balance sheet date, as well as third-party hardware and software delivered when performing system integration services as an agent which will be invoiced at a later date in accordance with agreed-upon contract milestones. Accounts receivable are presented net of allowances for doubtful accounts. Allowances for doubtful accounts are provided based on the credibility of the clients, aging of the accounts receivable, economic conditions and other specific circumstances related to the accounts.

Inventories and contracts in progress Inventories represent computer hardware, software and spare parts that are purchased from third-party vendors on behalf of customers and are generally in transit to the customers' premise. Such items are generally in the Company's possession for a short period of time.

Contracts in progress consist of (i) the difference between total cost incurred to date and cost of revenue earned to date on customized software development arrangements under which revenue is recognized using the percentage-of-completion method, and (ii) accumulated contract costs on certain customized software development arrangements that are deferred and are recognized ratably over the longer of the post-contract customer support (PCS) or the system support and enhancement service period.

Property and equipment, net Property and equipment is stated at cost, net of accumulated depreciation. Depreciation on property and equipment is calculated using the straight-line method over the following estimated useful lives of the assets

Computers	3 years
Furniture, fixture and office equipment	5 years
Motor vehicles	5 years

Impairment of long-lived assets Long-lived assets and finite-lived intangible assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. The Company measures impairment by comparing the carrying amount of the assets to future undiscounted net cash flows expected to result from the use of the assets and their eventual disposition. If the sum of the expected undiscounted cash flow is less than the carrying amount of the assets, the Company would recognize an impairment loss equal to the excess of the carrying amount over the fair value of the assets. No impairment charges were recognized during the years ended December 31, 2006, 2007 and 2008.

Fair value The Company adopted Statement of Financial Accounting Standards (SFAS) No. 157, Fair Value Measurements (SFAS 157) on January 1, 2008 for all financial assets and liabilities that are recognized or disclosed at fair value in the consolidated financial statements on a recurring basis (at least annually). The Company's adoption of SFAS 157 was limited to its financial assets and financial liabilities, as permitted by FSP FAS 157-2 Effective Date of FASB Statement No. 157 (FSP FAS 157-2). SFAS 157 defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements.

Table of Contents

LINKAGE TECHNOLOGIES INVESTMENT LIMITED AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(In thousands US\$, except share and per share amounts)

SFAS 157 defines fair value as the price that would be received from selling an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. When determining the fair value measurements for assets and liabilities required or permitted to be recorded at fair value, the Company considers the principal or most advantageous market in which it would transact and it considers assumptions that market participants would use when pricing the asset or liability.

SFAS 157 establishes a fair value hierarchy that requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. A financial instrument's categorization within the fair value hierarchy is based upon the lowest level of input that is significant to the fair value measurement. SFAS 157 establishes three levels of inputs that may be used to measure fair value:

Level 1 applies to assets or liabilities for which there are quoted prices in active markets for identical assets or liabilities.

Level 2 applies to assets or liabilities for which there are inputs other than quoted prices included within Level 1 that are observable for the asset or liability such as quoted prices for similar assets or liabilities in active markets; quoted prices for identical assets or liabilities in markets with insufficient volume or infrequent transactions (less active markets); or model-derived valuations in which significant inputs are observable or can be derived principally from, or corroborated by, observable market data.

Level 3 applies to assets or liabilities for which there are unobservable inputs to the valuation methodology that are significant to the measurement of the fair value of the assets or liabilities.

The Company did not have any financial instruments that were required to be measured at fair value on a recurring basis as of December 31, 2008.

The carrying values of financial instruments, which consist of cash, restricted cash, accounts receivable, accounts payable, and short-term bank borrowings, are recorded at cost which approximates their fair value due to the short-term nature of these instruments. The Company does not use derivative instruments to manage risks.

Revenue recognition The Company derives its revenues from three sources: (i) software development, which includes development and licensing of software, provision of customization, modification, implementation, integration, training, and PCS, as well as recurring revenue from ongoing system support and enhancement services, (ii) IT services, which includes system integration, third-party hardware maintenance, third-party software support, network support, and IT consulting and research services, and (iii) resale of third-party hardware and software.

The Company's software development arrangements contain multiple deliverables. The deliverables include licenses of custom software which consist of a combination of self-developed core software and third-party software, and related services such as customization, modification, implementation and integration services, training, and PCS. Such arrangements may also include third-party hardware and hardware installation and maintenance to the extent hardware is sold as part of the arrangement. As these arrangements require significant modification or customization of the software, revenue for the combined arrangement is recognized over the service period based on the percentage-of-completion method of accounting. Because PCS has never been sold separately, the Company does not have vendor specific objective evidence of fair value of PCS. The percentage-of-completion method of revenue recognition is therefore applied through the date the last element is delivered, which is typically the end of the bundled PCS period. Progress toward completion is measured by dividing the actual direct labor costs incurred into total estimated direct labor costs for the project. Revenue on a

Table of Contents

LINKAGE TECHNOLOGIES INVESTMENT LIMITED AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(In thousands US\$, except share and per share amounts)

project is computed by multiplying total estimated contract revenue by the percentage of completion. Cost of revenue is computed in a similar manner by multiplying total estimated contract cost by the percentage of completion. Gross profit on the project for a period is the excess of revenue over the cost of revenue. Any revisions to existing estimated contract profits, if necessary, are made in the period in which the circumstances requiring the revisions become known. Provisions for expected losses on uncompleted contracts are recorded in the period in which such losses become probable.

Certain of the Company's software development arrangements include ongoing system support and enhancement services. These services consist of designing and implementing enhancements to existing software and providing overall system support and performing operational tasks in the customer's IT function on behalf of the customer. These services are generally provided over a specified period of time, typically ranging from a few months to two years. The cost of providing such services cannot be reliably estimated as the workload varies with the customer's service requests during the service period. Under these arrangements, the entire arrangement fee and accumulated contract costs are deferred and recognized ratably over the longer of the PCS and the system support and enhancement service period, commencing subsequent to delivery of the customized software and when PCS, system support and enhancement services are the only remaining deliverables.

Revenue from ongoing support and enhancement arrangements that are not combined with other elements are recognized ratably over the service period and when persuasive evidence of an arrangement exists, the fee is fixed or determinable, and collectability is reasonably assured.

Subsequent sales of upgrades and enhancements are accounted for separately from the initial sales of customized software as upgrades and enhancements are not negotiated within a short time frame of the initial sale, the software from the initial sale is not dependent on the delivery of the upgrades or enhancements, neither the fees for the initial or subsequent sale are subject to refund if one or the other contracts is not fulfilled nor are payment terms for either sale tied to the performance of the other.

The Company's system integration arrangements also include multiple deliverables, such as third-party hardware and software, installation, integration, training, maintenance, and support. The Company evaluated the deliverables for separation and determined that the delivered items should not be considered a separate unit of account because not all undelivered elements have objective and reliable evidence of fair value. Revenue is recognized when the Company has substantially met its performance obligations under the contract and received final acceptance from the customer. Generally revenue is recognized net of the amounts paid to suppliers of the third-party hardware and software as the Company is considered to be an agent in these arrangements.

The Company enters into third-party hardware maintenance and software support contracts with end customers and generally enters into back-to-back arrangements of similar key terms with the third-party hardware and software vendors to cover its risks in the customer contracts. Revenue is recognized ratably over the term of the maintenance or support agreement when all other revenue recognition criteria are met. Under such arrangements, the Company recognizes revenue net of the back-to-back contracts as the Company is considered to be an agent in these arrangements. Limited to a few arrangements where the Company is contracted to provide network support services and no back-to-back arrangements exist with third-party hardware and software vendors, the Company reports revenue at gross amounts billed to the customer because the Company is the primary obligor in those arrangements.

The Company's research findings under IT consulting and research arrangements are evaluated by the customer based on the customer's specific criteria. Revenue is recognized when the Company receives final acceptance from the customer, assuming all other revenue recognition criteria have been met.

Revenue from resale of third party hardware and software, if not bundled with other deliverables, is recognized upon delivery and acceptance.

The Company reports revenue from third-party hardware net of sales returns. Revenues from customized software and system integration arrangements include value added tax rebates received from the Chinese tax authorities. Such rebates are granted to the Company as part of the PRC government's policy to encourage software development in the PRC, and are recorded as a component of revenue when the relevant compliance requirements are met, there are no further obligations, and are not subject to future returns or reimbursements. Total value added tax rebates recorded in revenues were \$467, \$800 and \$787 in 2006, 2007 and 2008, respectively.

Billings are rendered based on agreed upon contract milestones. Revenue recognized in excess of billings is recorded as unbilled receivables and is included in trade accounts receivable. Unbilled receivables also include costs incurred when performing system integration services as an agent and will be billed based on contractual billing milestones. These costs typically relate to hardware, software and spare parts that have been acquired by the Company and have been delivered to the customer. Amounts billed but not yet collected are recorded as billed receivables and are included in trade accounts receivable. Most of the billed and unbilled receivables are expected to be collected within one year. Billings in excess of revenue recognized are recorded as deferred revenue.

Research and development Research and development costs consist of expenditures incurred in the development of new software modules and products, either as part of the internally used software or in conjunction with anticipated customer projects. Technological feasibility for the Company's software products is reached shortly before the products are released for sale. To date, costs incurred after technological feasibility was established and prior to completion of software development have not been material and accordingly, the Company has expensed all research and development costs when incurred.

Operating leases Payments made under operating leases are charged to the consolidated statements of operations on a straight-line basis over the respective lease terms, including any periods of free rent.

Foreign currency translation and foreign currency risk The Company uses the United States dollar (USD) as its reporting currency. The functional currency of Linkage BVI and Linkage Hong Kong is USD. Monetary assets and liabilities denominated in currencies other than USD are translated into USD at the rates of exchange ruling at the balance sheet date. Transactions in currencies other than USD during the year are converted into USD at the rates of exchange ruling at the transaction dates.

The financial records of the Company's PRC subsidiaries are maintained in Renminbi (RMB), which is their functional currency. Assets and liabilities are translated into USD based on the rates of exchange existing on the balance sheet date. Equity accounts are translated at historical exchange rates. Their statements of operations are translated using a weighted average rate for the period. Translation adjustments are reflected as accumulated other comprehensive income (loss) in shareholders' equity.

The RMB is not freely convertible into USD or other currencies. The State Administration for Foreign Exchange, under the authority of the People's Bank of China (PBOC), controls the conversion of RMB into foreign currencies. The value of RMB is subject to changes in central government policies and to international economic and political developments affecting supply and demand in the China Foreign Exchange Trading System market. The rate of exchange quoted by PBOC on December 31, 2007 and 2008 was USD\$1 = RMB7.3046 and USD\$1 = RMB6.8346, respectively. As of December 31, 2007 and 2008, the Company had

RMB bank balances located in the PRC of \$16,662 and \$17,438 of its total cash and bank balances, respectively. The Company's cash and cash equivalents and restricted cash denominated in RMB amounted to \$17,651 and \$18,541 as of December 31, 2007 and 2008, respectively.

Concentration of credit risk Financial instruments that potentially expose the Company to concentration of credit risk consist primarily of cash and cash equivalents, restricted cash and trade accounts receivable. All of the Company's cash and cash equivalents are held with financial institutions that Company management believes to be high credit quality.

The Company conducts credit evaluations of customers and generally does not require collateral or other security from its customers. The Company periodically evaluates the creditworthiness of the existing customers in determining an allowance for doubtful accounts primarily based upon the age of the receivables and factors surrounding the credit risk of specific customers. The Company primarily sells its products and services to the top telecommunication carriers in China and their provincial subsidiaries and has historically incurred insignificant bad debt expense.

Income taxes Deferred income taxes are recognized for temporary differences between the tax basis of assets and liabilities and their reported amounts in the financial statements, net operating loss carryforwards and credits by applying enacted statutory tax rates applicable to future years. Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it is more likely than not that some portion or all of the deferred tax assets will not be realized. Current income taxes are provided for in accordance with the laws of the relevant taxing authorities. The components of the deferred tax assets and liabilities are individually classified as current and non-current based on the characteristics of the underlying assets and liabilities, or the expected timing of their use when they do not relate to a specific asset or liability.

Value added taxes The Company's PRC subsidiaries are subject to value added tax (VAT) at a rate of 17% on proceeds received from system integration arrangements and customized software arrangements (software sales), less any VAT already paid or borne by the taxpayer on the goods or services purchased by it and utilized in the production of goods or provisions of services that have generated the gross sales proceeds. For revenues on software sales, if the net amount of VAT payable exceeds 3% of software sales, the excess portion of VAT tax can be refunded immediately. As such, the Company is entitled to an effective net VAT tax burden of 3% from software sales. This government policy is effective until 2010. The net VAT balance is recorded either in accrued expenses and other payables or prepaid expenses and other current assets on the face of consolidated balance sheets.

Business taxes The Company's PRC subsidiaries are subject to business tax at the rate of 5% on certain types of service transactions. Business taxes are presented on a gross basis and included in revenues and cost of revenues. Business tax incurred during 2006, 2007 and 2008 was \$352, \$354 and \$715, respectively.

Share-based compensation The Company's share-based payment transactions with employees are measured based on the grant-date fair value of the equity instrument issued. The fair value of the award is recognized as compensation expense, net of estimated forfeitures, over the period during which an employee is required to provide service in exchange for the award, which is generally the vesting period.

Comprehensive income Comprehensive income includes all changes in equity except those resulting from investments by owners and distributions to owners. For the years presented, total comprehensive income included net income and foreign currency translation adjustments.

Recent accounting pronouncements In December 2007, the FASB issued SFAS No. 141 (revised 2007), *Business Combinations* (SFAS 141R). SFAS 141R expands the definition of a business combination and requires the fair value of the purchase price of an acquisition, including the issuance of equity securities, to be determined on the acquisition date. SFAS 141R also requires that all assets, liabilities, contingent consideration and contingencies of an acquired business be recorded at fair value as of the acquisition date. In addition, SFAS 141R requires, with certain exceptions, that acquisition costs should be expensed as incurred (rather than capitalized as part of the purchase price), restructuring costs should be expensed in periods subsequent to the acquisition date (rather than recognized as a liability in purchase accounting) and that changes after the measurement period in deferred tax asset valuation allowances and acquired income tax uncertainties should impact income tax expense. SFAS 141R requires certain financial statement disclosures to enable users to evaluate and understand the nature and financial effects of the business combination. SFAS 141R is effective for business combinations whose acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008. The adoption of SFAS 141R will change the Company's accounting treatment for business combinations on a prospective basis, beginning January 1, 2009.

In April 2009, the FASB issued FASB Staff Position (FSP) No. 141(R)-1, *Accounting for Assets Acquired and Liabilities Assumed in a Business Combination That Arise from Contingencies* (FSP 141(R)-1), which amends the guidance in SFAS 141R to establish a model for pre-acquisition contingencies that is similar to the one entities used under SFAS 141. Under the FSP, an acquirer is required to recognize at fair value an asset acquired or a liability assumed in a business combination that arises from a contingency if the acquisition-date fair value of that asset or liability can be determined during the measurement period. If the acquisition-date fair value cannot be determined, then the acquirer follows the recognition criteria in SFAS 5 and FIN 14 to determine whether the contingency should be recognized as of the acquisition date or after it. The FSP is effective for business combinations whose acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008. The adoption of FSP 141(R)-1 will change the Company's accounting treatment for business combinations on a prospective basis, beginning January 1, 2009.

In December 2007, the FASB issued SFAS No. 160, *Noncontrolling Interests in Consolidated Financial Statements* an amendment of ARB No. 51 (SFAS 160). This statement amends Accounting Research Bulletin (ARB) 51, *Consolidated Financial Statements*, to establish accounting and reporting standards for the noncontrolling interest in a subsidiary and for the deconsolidation of a subsidiary. The statement clarifies that a noncontrolling interest in a subsidiary is an ownership interest in the consolidated entity that should be reported as equity in the consolidated financial statements. Moreover, SFAS 160 eliminates the diversity that currently exists in accounting for transactions between an entity and noncontrolling interests by requiring they be treated as equity transactions. SFAS 160 is effective for fiscal years, and interim periods within those fiscal years, beginning on or after December 15, 2008. Earlier adoption is prohibited. The statement will be applied prospectively, except for the presentation and disclosure requirements, which will be applied retrospectively. The Company does not expect that the adoption of SFAS 160 will have an impact on its financial position or results of operations.

In February 2008, the FASB issued FSP FAS 157-2, *Effective Date of FASB Statement No. 157* (FSP 157-2). FSP 157-2 delays the effective date of SFAS 157 for nonfinancial assets and nonfinancial liabilities, except for items that are recognized or disclosed at fair value in the financial statements on a recurring basis, until fiscal years beginning after November 15, 2008. As a result of FSP 157-2, the Company will adopt SFAS 157 for its nonfinancial assets and nonfinancial liabilities beginning with the first interim period of its fiscal year 2009. The Company does not expect that the adoption of FAS 157 for its nonfinancial assets and nonfinancial liabilities will have a material impact on its financial position, results of operations or cash flows.

In October 2008, the FASB issued FSP FAS 157-3, *Determining the Fair Value of a Financial Asset When the Market for That Asset Is Not Active* (FSP 157-3). FSP 157-3 clarifies the application of SFAS 157 in a market that is not active, and addresses application issues such as the use of internal assumptions when relevant observable data does not exist, the use of observable market information when the market is not active, and the use of market quotes when assessing the relevance of observable and unobservable data. FSP 157-3 is effective for all periods presented in accordance with FAS 157. The Company does not expect the adoption of FSP 157-3 to have a material impact on the Company's consolidated financial statements or the fair values of its financial assets and liabilities.

In April 2009, the FASB issued FSP FAS 157-4, *Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly* (FSP 157-4). FSP 157-4 provides additional guidance for estimating fair value in accordance with FASB 157 when the volume and level of activity for the asset or liability have significantly decreased. This FSP also includes guidance on identifying circumstances that indicate a transaction is not orderly. The Company does not expect the adoption of FSP 157-4 to have a material impact on the Company's consolidated financial statements or the fair values of its financial assets and liabilities.

In April 2008, the FASB issued FASB Staff Position FAS 142-3, *Determination of the Useful Life of Intangible Assets* (FSP FAS 142-3). The stated intent of the FSP is to improve the consistency between the useful life of a recognized intangible asset under SFAS No. 142 and the period of expected cash flows used to measure the fair value of the asset under SFAS No. 141(R) and other GAAP. In determining the useful life of acquired intangible assets, FSP FAS 142-3 removes the requirement to consider whether an intangible asset can be renewed without substantial cost or material modifications to the existing terms and conditions and, instead, requires an entity to consider its own historical experience in renewing similar arrangements. FSP FAS 142-3 also requires expanded disclosure related to the determination of intangible asset useful lives. The FSP is effective for financial statements issued for fiscal years beginning after December 15, 2008. Early adoption is prohibited. The Company is currently evaluating the potential impact of FSP 142-3 on its consolidated financial statements.

In April 2009, the FASB issued FSP FAS 115-2 and 124-2, *Recognition and Presentation of Other-Than-Temporary Impairments* (FSP FAS 115-2 and FAS 124-2). The FSP amends the other-than-temporary impairment guidance in US GAAP for debt securities to make the guidance more operational and to improve the presentation and disclosure of other-than-temporary impairments on debt and equity securities in the financial statements. This FSP does not amend existing recognition and measurement guidance related to other-than-temporary impairments of equity securities. The Company does not expect the adoption of FSP FAS 115-2 and FAS 124-2 to have a material impact on the Company's consolidated financial statements.

In November 2008, the FASB ratified the consensus in EITF Issue 08-7, *Accounting for Defensive Intangible Assets* (EITF 08-7). EITF 08-7 requires entities that will acquire a defensive intangible asset after the effective date of SFAS 141R, to account for the acquired intangible asset as a separate unit of accounting and amortize the acquired intangible asset over the period during which the asset would diminish in value. EITF 08-7 is effective for defensive intangible assets acquired in fiscal years beginning on or after December 15, 2008. The adoption of EITF 08-7 is not expected to have a material impact on the Company's financial position, results of operations and cash flows.

In May 2009, the FASB issued SFAS No. 165, *Subsequent Events* (SFAS 165). SFAS 165 establishes general standards of accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued or are available to be issued. Specifically, SFAS 165 provides (i) the period after

the balance sheet date during which management of a reporting entity should evaluate events or transactions that may occur for potential recognition or disclosure in the financial statements; (ii) the circumstances under which an entity should recognize events or transactions occurring after the balance sheet date in its financial statements; and (iii) the disclosures that an entity should make about events or transactions that occurred after the balance sheet date. SFAS 165 is effective prospectively for interim or annual financial periods ending after June 15, 2009. The Company believes the adoption will not have a material impact on the Company's consolidated financial position or result of operations.

In June 2009, the FASB issued SFAS No. 166, "Accounting for Transfers of Financial Assets" an amendment of FASB Statement No. 140 (SFAS 166). SFAS 166 eliminates the concept of a qualifying special-purpose entity, creates more stringent conditions for reporting a transfer of a portion of a financial asset as a sale, clarifies other sale-accounting criteria, and changes the initial measurement of a transferor's interest in transferred financial assets. SFAS 166 will be effective for the Company's fiscal year beginning January 1, 2010. The Company is currently evaluating the impact of the adoption of SFAS 166 on its consolidated financial statements.

In June 2009, the FASB issued SFAS No. 167, "Amendments to FASB Interpretation No. 46(R)" (SFAS 167). SFAS 167 eliminates Interpretation 46(R)'s exceptions to consolidating qualifying special-purpose entities, contains new criteria for determining the primary beneficiary, and increases the frequency of required reassessments to determine whether a company is the primary beneficiary of a variable interest entity. SFAS 167 also contains a new requirement that any term, transaction, or arrangement that does not have a substantive effect on an entity's status as a variable interest entity, a company's power over a variable interest entity, or a company's obligation to absorb losses or its right to receive benefits of an entity must be disregarded in applying Interpretation 46(R)'s provisions. SFAS 167 will be effective for the Company's fiscal year beginning January 1, 2010. The Company is currently evaluating the impact of the adoption of SFAS 167 on its consolidated financial statements.

In October 2009, the FASB issued EITF 08-1, "Multiple-Deliverable Revenue Arrangements" (EITF 08-1). EITF 08-1 addresses the accounting for multiple-deliverable arrangements to enable vendors to account for products or services (deliverables) separately rather than as a combined unit. Specifically, this guidance amends the criteria in EITF 00-21 for separating consideration in multiple-deliverable arrangements. This guidance establishes a selling price hierarchy for determining the selling price of a deliverable, which is based on: (a) vendor-specific objective evidence; (b) third party evidence; or (c) estimates. This guidance also eliminates the residual method of allocation and requires that arrangement consideration be allocated at the inception of the arrangement to all deliverables using the relative selling price method. In addition, this guidance significantly expands required disclosures related to a vendor's multiple-deliverable revenue arrangements. EITF 08-1 will be effective prospectively for revenue arrangements entered into or materially modified in fiscal years beginning on or after June 15, 2010. Early adoption is permitted. The Company is currently evaluating the impact of the adoption of EITF 08-1 on its consolidated financial statements.

In October 2009, the FASB issued EITF 09-3, "Certain Revenue Arrangements That Include Software Elements" (EITF 09-3). EITF 09-3 changes the accounting model for revenue arrangements that include both tangible products and software elements. Under this guidance, tangible products containing software components and non-software components that function together to deliver the tangible product's essential functionality are excluded from the software revenue guidance in American Institute of Certified Public Accountants Statement of Policy 97-2, "Software Revenue Recognition." In addition, hardware components of a tangible product containing software components are always excluded from the software revenue guidance. EITF 09-3 will be effective prospectively for revenue arrangements entered into or materially modified in fiscal years beginning on or after June 15, 2010. Early adoption is permitted. The Company is currently evaluating the impact of the adoption of EITF 09-3 on its consolidated financial statements.

Hong Kong

The profits of Linkage Hong Kong are subject to income tax at 17.5% for 2006 and 2007, and 16.5% for 2008.

PRC

The two PRC entities, Linkage Nanjing and Linkage Suzhou, were governed by the Income Tax Law of PRC Concerning Foreign Investment and Foreign Enterprise for the period before January 1, 2008, and the statutory rate was 33% (30% of state income tax plus 3% local income tax) on their respective PRC taxable income. However, as a qualified High and New Technology Enterprise (HNTTE), operating in a State-level High and New Technology Development Zone (HNTDZ), Linkage Nanjing was entitled to a preferential tax rate of 15%. In addition, Linkage Nanjing was granted a five-year tax holiday (i.e. two years tax exemption followed by three years 50% tax deduction (2+3 tax holiday) starting from its first profit making year which was 2004. Furthermore, during the tax holiday, the local income tax was fully exempted. Therefore, Linkage Nanjing was subject to income tax at 7.5% for the years ended December 31, 2006 and 2007.

Linkage Suzhou, recognized as a newly established software company, was entitled to a five-year tax holiday (i.e. two years tax exemption followed by three years 50% tax reduction) from 2004, which was its first profit-making year. As such, for the years ended December 31, 2006 and 2007 Linkage Suzhou was subject to tax at 15%. The 3% local tax was fully exempted during the whole tax holiday.

On March 16, 2007, the PRC government promulgated the Law of the People's Republic of China on Corporate Income Tax (the New CIT Law), which became effective from January 1, 2008. Foreign investment enterprises and domestic companies are subject to a uniform tax rate of 25%. Enterprises which were established and already enjoyed preferential tax treatments before March 16, 2007 were granted transitional relief measures which allowed them to continue to enjoy such preferential tax treatment (i) in the case of preferential tax rates, for a period of five years from January 1, 2008 (the enterprises which previously enjoyed the tax rate of 24% shall be subject to the tax rate of 25% from 2008), and (ii) in the case of preferential tax exemption or reduction for a specified term, until the expiration of such terms but before 2012.

Linkage Nanjing was eligible for a preferential tax rate of 15% for 2008, since it obtained HNTE status on December 9, 2008 with a valid period of three years. At the same time, Linkage Nanjing was also eligible for the reduced tax rate of 12.5% in 2008 which was the fifth year of its 2+3 tax holiday.

On December 31, 2008, the Company received a notification from the National Development and Reform Commission, the Ministry of Industry and Information Technology, the Ministry of Commerce, and the State Administration of Taxation that Linkage Nanjing qualified as a Key Software Enterprise for fiscal year 2008 and was therefore eligible for a 10% tax rate for income earned during 2008.

Under the New CIT Law, where the preferential policies overlap, enterprises may select the most preferential policies and may not enjoy any overlapped policy or change policies upon selection. Linkage Nanjing decided to apply the 10% tax rate for 2008, as a qualified Key Software Enterprise.

As there is significant uncertainty in regard to obtaining similar preferential tax rates in years subsequent to 2008, Linkage Nanjing has applied 15% as the applicable tax rate for the purpose of determining the deferred taxes.

Expenditures incurred for the research and development of new technology, products, and processes (R&D) qualify for deductions at 150% of the actual R&D expenditures for the current period.

Linkage Suzhou was subject to a uniform tax rate of 25% for 2008 according to the New CIT Law.

The new CIT rules impose a 10% withholding tax on dividends distributed by an enterprise to its overseas shareholders. The rate can be reduced to 5% under China's tax arrangement with Hong Kong. The reduced rate is not applicable for undistributed earnings from Linkage Nanjing to Linkage Hong Kong because Linkage Hong Kong did not hold any equity interest in Linkage Nanjing until December 2008. Therefore, the requirement that it must have held more than 25% or more of the equity interest in Linkage Nanjing at all times within the 12-month period immediately prior to receipt of the dividends was not fulfilled as of the end of reviewing period, which was December 31, 2008.

Therefore, in 2008, Linkage Hong Kong has accrued deferred tax liabilities related to potential withholding tax in the amount of \$1,779 at the rate of 10% on the undistributed earnings from its investment in Linkage Nanjing generated in 2008.

Effective on January 1, 2007, the Company adopted the provisions of FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes - an Interpretation of SFAS No. 109* (FIN 48), which clarifies the accounting and disclosure for uncertainty in tax positions. FIN 48 prescribes a more-likely-than-not threshold for financial statement recognition and measurement of tax positions taken or expected to be taken in a tax return. This interpretation also provides guidance on de-recognition of income tax assets and liabilities, classification of current and deferred income tax assets and liabilities, accounting for interest and penalties associated with tax positions, accounting for income taxes in interim periods and income tax disclosures. Based on its FIN 48 analysis documentation, the Company has made its assessment of the level of tax authority for each tax position (including the potential application of interest and penalties) based on its technical merits. The adoption of FIN 48 did not have any impact on the Company's total liabilities or shareholders' equity. The Company has no material uncertain tax position as of December 31, 2008 or unrecognized tax benefits which would favorably affect the effective income tax expense. The Company does not anticipate any significant increases or decreases to its liability for unrecognized tax benefits within the next 12 months. The Company will classify interest and penalties related to income tax matters, if any, in income tax expense.

According to the PRC Tax Administration and Collection Law, the statute of limitations is generally three years if the underpayment of taxes is due to computational errors made by the taxpayer or the withholding agent. The statute of limitations will be extended to five years under special circumstances, which are not clearly defined. 9. Employee Benefit Plan

The Company's subsidiaries in China participate in a government-mandated multi-employer defined contribution plan for its full time employees pursuant to which certain pension benefits, medical care, unemployment insurance, employee housing fund and other welfare benefits are provided to employees. Chinese labor regulations require the Company to contribute an amount based on the monthly basic compensation of qualified employees. The relevant local labor bureau is responsible for meeting all retirement benefit obligations. The Company has no further commitments beyond its contribution. During the years ended December 31, 2006, 2007 and 2008, the Company contributed and recorded expenses of \$1,006, \$1,444, and \$2,523, respectively.

10. Share-based compensation

In July 2007, Sun Libin, the Chief Executive Officer, (the "CEO") of the Company sold 146 shares in LT International ("LT") to three employees of the Company for RMB 1.3 million (approximately \$172) in cash. LT was a shareholder of the Company and was controlled by the CEO and other shareholders of the Company. LT was a shell company whose only function was to hold the Company's shares. As such, the three employees effectively received 80 of the Company's ordinary shares for a purchase price of \$2,143 per share. The shares were fully vested on the date of sale. As a result, the Company recorded share-based compensation of \$577, equal to the excess of the fair value of the Company's ordinary shares of \$9,351 per share over the purchase price.

In March 2008, the CEO sold approximately 1,543 shares in HF International ("HF") to several employees of the Company for \$4,692. Of this amount, two-thirds, or \$3,128, was paid in cash on the date of grant with the remaining one-third, or \$1,564, payable to the CEO with an interest free, recourse loan having no stated maturity. HF was a shareholder of the Company and was controlled by the CEO. HF was a shell company whose only function was to hold the Company's shares. As such, the employees effectively received 500 of the Company's ordinary shares for a purchase price of \$9,374 per share. The shares were fully vested on the date of sale. The Company has accounted for this transaction as the issuance of shares and has recorded compensation expense of \$2,283, representing the difference between the fair value of the shares of \$13,940 per share on the date of sale over the purchase price.

11. Related party transactions

As discussed in Note 1, on June 30, 2004, Linkage BVI acquired the telecommunication business from Lianchuang Technology. Subsequent to the June 30, 2004 transfer date, Lianchuang Technologies continued to conduct activities in various lines of business, including the sales and distribution of computer hardware, taxation software, transportation payment systems, and the provision of roadside emergency services. LINKAGE TECHNOLOGIES INVESTMENT LIMITED AND SUBSIDIARIES

NOTES TO THE UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(In thousands US\$, except share and per share amounts)

1. Principal Activities

Linkage Technologies Investment Limited (Linkage BVI) and its subsidiaries (collectively, the Company) are principally engaged in the provision of customized software development and IT services, including system integration and IT consulting services, to telecommunication carriers and their provincial subsidiaries in the People's Republic of China (the PRC).

2. Summary of Significant Accounting Policies

(a) Basis of Preparation

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with applicable rules and regulations of the Securities and Exchange Commission and the accounting principles generally accepted in the United States of America (US GAAP) for interim financial reporting. Certain information and footnote disclosures normally included in financial statements prepared in accordance with US GAAP have been condensed or omitted pursuant to such rules and regulations. Accordingly, these interim unaudited condensed consolidated financial statements should be read in conjunction with the financial statements, accounting policies and financial notes thereto included in the Company's audited consolidated financial statements as of December 31, 2007 and 2008 and for each of the three years in the period ended December 31, 2008. In the opinion of the management, the accompanying unaudited condensed consolidated financial statements reflect all adjustments (consisting only of normal recurring adjustments) which are necessary for a fair representation of financial results for the interim periods presented.

The preparation of financial statements in conformity with US GAAP requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, and disclosures of contingent assets and liabilities at the dates of the financial statements and the reported amounts of revenues and expenses during the reporting period. While assumptions and estimates are based on the facts and circumstances existing as of September 30, 2009, actual results could differ from such estimates.

(b) Significant Accounting Policies

The accompanying unaudited condensed consolidated financial statements have been prepared using the same accounting policies used in the preparation of the Company's consolidated financial statements for the years ended December 31, 2006, 2007 and 2008. The following accounting policy became significant during the nine months ended September 30, 2009:

Deferred Costs

Deferred costs mainly consist of (i) pre-contract costs that are incurred for specific anticipated software development contracts and whose recoverability from that contract is deemed probable, and (ii) costs of hardware, software and spare parts acquired by the Company and delivered to the customers under system integration arrangement for which the Company acts as the primary obligor and reports revenue on a gross basis. Deferred costs are expensed upon the final acceptance date when revenue is recognized.

(c) Recent Accounting Pronouncements

In June 2009, the FASB issued authoritative guidance that eliminates the concept of a qualifying special-purpose entity, creates more stringent conditions for reporting a transfer of a portion of a financial asset as a sale,

clarifies other sale-accounting criteria, and changes the initial measurement of a transferor's interest in transferred financial assets. The guidance will be effective for its fiscal year beginning January 1, 2010. The Company is currently evaluating the impact of the adoption of the guidance on its consolidated financial statements.

In June 2009, the FASB issued authoritative guidance that eliminates exceptions to consolidating qualifying special-purpose entities, contains new criteria for determining the primary beneficiary, and increases the frequency of required reassessments to determine whether a company is the primary beneficiary of a variable interest entity. The guidance also contains a new requirement that any term, transaction, or arrangement that does not have a substantive effect on an entity's status as a variable interest entity, a company's power over a variable interest entity, or a company's obligation to absorb losses or its right to receive benefits of an entity must be disregarded in applying the guidance. The guidance will be effective for fiscal year beginning January 1, 2010. Linkage Technologies is currently evaluating the impact of the adoption of the guidance on its consolidated financial statements.

In October 2009, the FASB issued authoritative guidance that addresses accounting for multiple-deliverable arrangements to enable vendors to account for products or services (deliverables) separately rather than as a combined unit. Specifically, this guidance amends the criteria for separating consideration in multiple-deliverable arrangements. This guidance establishes a selling price hierarchy for determining the selling price of a deliverable, which is based on: (a) vendor-specific objective evidence; (b) third-party evidence; or (c) estimates. This guidance also eliminates the residual method of allocation and requires that arrangement consideration be allocated at the inception of the arrangement to all deliverables using the relative selling price method. In addition, this guidance significantly expands required disclosures related to a vendor's multiple-deliverable revenue arrangements. The guidance will be effective prospectively for revenue arrangements entered into or materially modified in fiscal years beginning on or after June 15, 2010. Early adoption is permitted. The Company is currently evaluating the impact of the adoption of the guidance on its consolidated financial statements.

In October 2009, the FASB issued authoritative guidance that changes the accounting model for revenue arrangements that include both tangible products and software elements. Under this guidance, tangible products containing software components and non-software components that function together to deliver the tangible product's essential functionality are excluded from software revenue accounting guidance. In addition, hardware components of a tangible product containing software components are always excluded from software revenue accounting guidance. The guidance will be effective prospectively for revenue arrangements entered into or materially modified in fiscal years beginning on or after June 15, 2010. Early adoption is permitted. The Company is currently evaluating the impact of the adoption of the guidance on its consolidated financial statements.

In January 2010, the FASB issued authoritative guidance that adds new requirements for fair value disclosures about (1) the different classes of assets and liabilities measured at fair value, (2) the valuation techniques and inputs used, (3) the activity in Level 3 fair value measurements, and (4) the transfers between Levels 1, 2, and 3. This guidance is effective for the first reporting period beginning after December 15, 2009, except for the requirement to provide the Level 3 activity of purchases, sales, issuances, and settlements on a gross basis, which will be effective for fiscal years beginning after December 15, 2010, and for interim periods within those fiscal years. In the period of initial adoption, entities will not be required to provide the amended disclosures for any previous periods presented for comparative purposes. However, those disclosures are required for periods ending after initial adoption. Early adoption is permitted. The Company is currently evaluating the impact of the adoption of the guidance on its consolidated financial statements.

8. Income taxes***British Virgin Islands***

Under the current laws of the British Virgin Islands, Linkage BVI is not subject to tax on its income or capital gains. In addition, the British Virgin Islands do not impose withholding tax on dividend payments.

Hong Kong

The profits of Hong Kong Linkage Technology Limited (Linkage Hong Kong) are subject to income tax at 16.5% for 2008 and 2009.

PRC

The two PRC entities, Linkage Technology (Nanjing) Co., Ltd. (Linkage Nanjing) and Suzhou United New Service and Technology Corporation (Linkage Suzhou), were governed by the PRC Corporate Income Tax Law (the New CIT Law), which became effective from January 1, 2008. Foreign investment enterprises and domestic companies are subject to a uniform tax rate of 25%.

Linkage Nanjing was eligible for a preferential tax rate of 15% for 2008 and 2009, since it obtained High and New Technology Enterprise (HNTE) status on December 9, 2008 with a valid period of three years. On December 31, 2008, the Company received a notification from the National Development and Reform Commission, the Ministry of Industry and Information Technology, the Ministry of Commerce, and the State Administration of Taxation that Linkage Nanjing qualified as a Key Software Enterprise for fiscal year 2008 and was therefore eligible for a 10% tax rate for income earned during 2008.

Under the New CIT Law, where the preferential policies overlap, enterprises may select the most preferential policies and may not enjoy any overlapped policy or change policies upon selection. Linkage Nanjing decided to apply the 10% tax rate for 2008, as a qualified Key Software Enterprise.

As there is significant uncertainty in regard to obtaining similar preferential tax rates in years subsequent to 2008, Linkage Nanjing has applied 15% as the applicable tax rate for 2009 and for the purpose of determining the deferred taxes for 2008 and 2009.

Expenditures incurred for the research and development of new technology, products, and processes (R&D) qualify for additional deductions at 150% of the actual R&D expenditures for the current period Linkage Suzhou was subject to a uniform tax rate of 25% for 2008 and 2009

according to the New CIT Law.

The new CIT rules impose a 10% withholding tax on dividends distributed by an enterprise to its overseas shareholders. The rate can be reduced to 5% under China's tax arrangement with Hong Kong. The reduced rate is not applicable for undistributed earnings from Linkage Nanjing to Linkage Hong Kong because Linkage Hong Kong did not hold any equity interest in Linkage Nanjing until December 2008. Therefore, the requirement that it must have held more than 25% or more of the equity interest in Linkage Nanjing at all times within the 12-month period immediately prior to receipt of the dividends was not fulfilled as of the end of reviewing period, which was September 30, 2009. Linkage Hong Kong has accrued deferred tax liabilities related to potential withholding tax in the amount of \$1,231 and \$nil for the nine-month periods ended September 30, 2008 and 2009, respectively, at the rate of 10% on the undistributed earnings from its investment in Linkage Nanjing generated in the relevant periods.

The Company has made its assessment of the level of tax authority for each uncertain tax position (including the potential application of interest and penalties) based on its technical merits. The Company has no material uncertain tax position as of September 30, 2009 or material unrecognized tax benefits which would favorably affect the effective income tax rate in future periods. The Company does not anticipate any significant increases or decreases to its liability for unrecognized tax benefits within the next 12 months. The Company classifies interest and penalties related to income tax matters, if any, in income tax expense. As of September 30, 2009, the amount of interest and penalties related to uncertain tax positions was immaterial.

According to the PRC Tax Administration and Collection Law, the statute of limitations is generally three years if the underpayment of taxes is due to computational errors made by the taxpayer or the withholding agent. The statute of limitations will be extended to five years under special circumstances, which are not clearly defined. For any tax exposures related with related party transactions, the statute of limitations is 10 years. There is no statute of limitations in the case of tax evasion. The statute of limitations in Hong Kong is six years.

9. Employee Benefit Plan

The Company's subsidiaries in China participate in a government-mandated multi-employer defined contribution plan for its full time employees pursuant to which certain pension benefits, medical care, unemployment insurance, employee housing fund and other welfare benefits are provided to employees. Chinese labor regulations require the Company to contribute an amount based on the monthly basic compensation of qualified employees. The relevant local labor bureau is responsible for meeting all retirement benefit obligations.

12. Commitments and contingencies***a) Contingencies***

The Company is subject to claims and legal proceedings that arise in the ordinary course of its business. Each of these matters is subject to various uncertainties, and it is possible that some of these matters may be decided unfavorably to the Company. The Company did not have any claims or legal proceedings that have a significant impact on its business, assets or operations.

Certain customized software contracts include indemnification clauses that indemnify the Company's customers against liabilities and damages arising from intellectual property infringement claims relating to the software licensed by the Company. The indemnification obligates the Company to make payments to the guaranteed licensee if an infringement claim against the licensee occurs that results in any liabilities or damages related to the licensed software. The Company has not recorded any liability with respect to the potential infringement and profit sharing claims associated with the Company's intellectual property as it is the Company's assessment that the risk of such claim resulting from the potential infringement is remote.

b) Letters of credit

As of September 30, 2009, there was no amount used under the facilities for Linkage Hong Kong and the unused credit facilities totaled \$13,000. The credit facilities had no collateral.

13. Business and credit concentration

The Company's customers are primarily the headquarters and the provincial subsidiaries of three major telecommunication carriers in the PRC. Currently, all major telecommunication carriers in the PRC are primarily state-owned and are subject to extensive government regulation and control. In aggregate, these three communications carriers accounted for 99% and 100% of the Company's revenues for the nine-month periods ended September 30, 2008 and 2009, respectively.

Despite being state-owned, the headquarters and provincial subsidiaries of the three major telecommunication carriers generally contract on an individual entity basis. The following table summarizes sales to those entities that individually comprise 10% or more of total revenues:

These reserve funds include a (i) general reserve, (ii) enterprise expansion fund, and (iii) staff bonus and welfare fund. Subject to certain cumulative limits, the general reserve fund requires annual appropriations of 10% of after tax profit as determined under PRC GAAP. The other fund appropriations are at the discretion of the respective subsidiaries. These reserve funds can only be used for the specific purposes of enterprise expansion and staff bonus and welfare and are not distributable as cash dividends. The Closing shall take place at the offices of DLA Piper, 20th Floor, South Tower, Beijing Kerry Center, No. 1 Guanghai Road, Chaoyang District, Beijing PRC, or at such other location as the parties hereto agree.

(b) At the Closing, AsiaInfo (directly or through any of its Group Companies) shall deliver to Linkage (i) certificates representing the Stock Consideration, which Stock Consideration shall be free and clear of all Encumbrances, except for Encumbrances under the Escrow Agreement, the Lock-Up Agreements, the Stockholders Agreement, the Securities Act of 1933, as amended (the **Securities Act**) and state securities laws or the securities laws of any applicable non-U.S. jurisdiction, in genuine and unaltered form, to be distributed by Linkage to the Legacy Linkage Shareholders in the proportions set forth as percentages opposite such Legacy Linkage Shareholders names under the heading Number of Shares of AsiaInfo Common Stock to be Received in Exhibit A-2 (the **Stock Consideration Distribution Schedule**) and (ii) the Cash Consideration by wire transfer of immediately available funds to the account of Linkage specified in wire instructions provided to AsiaInfo, for the benefit of the Legacy Linkage Shareholders, in the proportions set forth as percentages opposite such Legacy Linkage Shareholders names under the heading Percentage of Cash Consideration to be Received in Exhibit A-2 (the **Cash Consideration Distribution Schedule**, and together with the Stock Consideration Distribution Schedule, the **Consideration Distribution Schedules**); provided, that 10% of the aggregate Consideration (consisting of US\$6 million in cash and 2,683,273 shares of AsiaInfo Common Stock) (collectively, the **Escrow Amount**) shall be delivered by AsiaInfo to the Escrow Agent under an escrow agreement to be entered into on the Closing Date by AsiaInfo, Linkage, the Shareholders Agent and the Escrow Agent substantially in the form of Exhibit B hereto (with such reasonable modifications as the Escrow Agent may require) (the **Escrow Agreement**). The Escrow Amount shall be adjusted proportionally for any pre-closing adjustment to the Consideration pursuant to Section 1.8. Simultaneously at the Closing, Linkage will assign and transfer to AsiaInfo (or its designated Group Company) all right, title and interest in the Shares, free and clear of all Encumbrances, as evidenced by (y) a duly executed instrument of transfer with respect to the Shares, and (z) a copy of the updated register of members of the Company, certified by the registered agent of the Company in the British Virgin Islands reflecting the conveyance to AsiaInfo (or its designated Group Company) of the Shares being purchased by AsiaInfo (or its designated Group Company) at the Closing. Each Legacy Linkage Shareholder who would otherwise have been entitled to receive a fraction of a share of AsiaInfo Common Stock shall receive, in lieu thereof, cash (without interest) in an amount equal to the product of (i) such fractional part of a share of AsiaInfo Common Stock multiplied by (ii) US\$24.07, and the cash amount to which such Legacy Linkage Shareholder would otherwise have been entitled to receive shall be reduced accordingly.

1.3 Post-Signing Events. The parties acknowledge that, prior to the Closing, (i) Mr. Libin Sun may transfer all of his shares in Linkage to LT International Limited and (ii) Linkage may agree to distribute 100% of the

Consideration payable to Golden Eagle International Retail Group Limited pursuant to the Consideration Distribution Schedules and the Escrow Distribution Schedule, at the Closing. In the event (i) and/or (ii) occur, the parties agree to revise the Consideration Distribution Schedule and the Escrow Distribution Schedule accordingly.

1.4 **Escrow**. The Escrow Amount delivered by AsiaInfo (or its designated Group Company) at Closing pursuant to the Escrow Agreement shall be held in an escrow fund (together with the earnings thereon, the **Escrow Fund**) and shall serve as security for any post-closing adjustments pursuant to Sections 1.9 and the indemnification obligations of the Linkage Parties hereunder. Releases from the Escrow Fund will be permitted only in accordance with the terms and conditions of the Escrow Agreement. If there are no outstanding claims for indemnification by AsiaInfo as of the date that is eighteen (18) months following the Closing Date (the **Escrow Termination Date**), the Escrow Amount shall be distributed by the Escrow Agent on such date to the Legacy Linkage Shareholders in the proportions set forth as percentages opposite such Legacy Linkage Shareholders' names under the heading "Percentage of Escrow Distribution" in **Exhibit A-3** (the **Escrow Distribution Schedule**), representing the pro rata interest of each such Legacy Linkage Shareholder in the Escrow Fund. If there are outstanding claims for indemnification by AsiaInfo on the Escrow Termination Date, the Escrow Amount, less any amount subject to such outstanding claims, shall be distributed by the Escrow Agent on such date, to the Legacy Linkage Shareholders in accordance with the Escrow Distribution Schedule; provided, that the remaining balance of the Escrow Amount shall be distributed to the Legacy Linkage Shareholders in accordance with the Escrow Distribution Schedule upon final satisfaction of such outstanding claims in accordance with Article 8. All fees and expenses of the Escrow Agent shall be deducted and paid from the cash portion of the Escrow Fund. Final distribution of the Escrow Fund shall be made net of any accrued fees and expenses then outstanding. In connection with any such distribution, each Legacy Linkage Shareholder who would otherwise have been entitled to receive a fraction of a share of AsiaInfo Common Stock shall receive, in lieu thereof, cash (without interest) from the Escrow Fund in an amount equal to the product of (i) such fractional part of a share of AsiaInfo Common Stock multiplied by (ii) US\$24.07, and the cash amount to which such Legacy Linkage Shareholder would otherwise have been entitled to receive shall be reduced accordingly. If there is no cash remaining in the Escrow Fund, or if there is insufficient cash to effectuate the foregoing, after consultation with AsiaInfo, the Shareholders' Agent may deliver to the Escrow Agent a modified Escrow Distribution Schedule, which reallocates such fractions of shares as equitably as reasonably practicable amongst the Legacy Linkage Shareholders.

1.5 **Lock-Up Agreements**. In respect of the AsiaInfo Common Stock issued as part of the Stock Consideration, (a) on the date hereof, each Key Linkage Shareholder shall each enter into a lock-up agreement with AsiaInfo substantially in the form of **Exhibit C** (the **Lock-Up Agreement**) simultaneously with the execution of this Agreement to become effective as of the Closing, and (b) on or prior to the Closing Date, other Legacy Linkage Shareholders collectively owning at least 95% of the Linkage Shares held by such other Legacy Linkage Shareholders shall enter into Lock-Up Agreements. Edward Tian shall also enter into a Lock-Up Agreement in respect of the AsiaInfo Common Stock he owns as of the Closing.

1.6 **Registration Rights Agreements**. On the Closing Date, AsiaInfo shall enter into a registration rights agreement substantially in the form of **Exhibit D** with LT International Limited (the **Registration Rights Agreement**).

1.7 **Distribution of Consideration**. The Linkage Parties shall take commercially reasonable steps to distribute all of the Consideration received by Linkage (less any cash required by the Company to meet its outstanding obligations and other than the Escrow Amount) simultaneously with the Closing, or as soon as reasonably practicable thereafter to the Legacy Linkage Shareholders in accordance with their respective entitlements under the Consideration Distribution Schedule. If and to the extent the Linkage Parties are unable to cause the Consideration to be distributed simultaneously with the Closing as contemplated in the foregoing sentence, Linkage will hold the Consideration in trust for the benefit of the Legacy Linkage Shareholders and shall refrain from exercising any voting rights associated with the AsiaInfo Common Stock comprising the Stock

Consideration other than in accordance with the Stockholders' Agreement. Until the Stock Consideration (other than the AsiaInfo Common Stock that is part of the Escrow Amount) is delivered to the shareholders of Linkage, (a) the Linkage Parties acknowledge and agree that such shares of AsiaInfo Common Stock may not be voted, and (b) AsiaInfo shall not be required to recognize any votes cast at any annual or special meeting of AsiaInfo stockholders, or any other stockholder action taken, with respect to any shares of AsiaInfo Common Stock comprising all or any part of the Stock Consideration.

1.8 Pre-Closing Purchase Price Adjustment.

(a) The Consideration to be paid at the Closing shall be subject to adjustment in accordance with this Section 1.8.

(b) For purposes of this Section 1.8, the following terms shall have the meanings ascribed herein:

(i) **Actual New Customer Order Amount** means the aggregate U.S. dollar amount of New Customer Orders as of January 15, 2010 (calculated at an RMB/USD exchange rate of 6.8287), net of (A) third party pass-through costs (including all third party hardware, software, services and other pass-through costs), and (B) any sales tax, VAT, PRC business tax or similar Taxes paid or to be paid in connection with such New Customer Orders.

(ii) **New Customer Orders** means bona fide, written and fully-executed contracts and all exhibits and appendices thereto, bearing the customer's corporate chop and initialed by the designated signatory of the customer on each page, representing customer orders (i) entered into during the period commencing on October 1, 2009 and before 12:00 a.m. (Beijing time) on January 16, 2010, (ii) for goods and services to be performed by the Company and its Subsidiaries on or before December 31, 2010, and (iii) relating to the New Order Statements delivered to AsiaInfo prior to 6:00 p.m. (Beijing time) on January 18, 2010.

(c) If the Actual New Customer Order Amount is less than US\$40 million, the Consideration shall be reduced by US\$4.00 for every US\$1.00 by which the Actual New Customer Order Amount is less than US\$40 million. For example, if the Actual New Customer Order Amount is US\$38 million, the Consideration shall be reduced by US\$8 million. Any adjustment described in this Section 1.8(c) shall be applied to Cash Consideration and Stock Consideration in a proportionate reduction, valuing AsiaInfo Common Stock for the purpose of this Agreement at US\$24.07 per share.

(d) To calculate the Actual New Customer Order Amount, the parties agree:

(i) Linkage shall prepare or cause to be prepared a statement in a form reasonably acceptable to AsiaInfo that includes without limitation information related to each relevant customer, contract ID, contract amount and third party pass-through costs (the **New Order Statement**) which must be (i) delivered to AsiaInfo on or prior to January 18, 2010 at 6:00 p.m. (Beijing Time), (ii) signed by Linkage and its chief executive officer attesting to the Actual New Customer Order Amount, and (iii) supported by fully-executed copies of the corresponding New Customer Orders. Linkage acknowledges that AsiaInfo may, at its election and at its sole expense, designate representatives to Linkage's principal executive offices in Nanjing to verify the New Order Statement on or about January 16, 2010 by examining the original New Customer Orders, and Linkage shall make reasonable accommodations to permit such a review.

(ii) In the event that AsiaInfo objects to any aspect of the New Order Statement or requires further information in order to confirm the New Customer Orders contained therein, then within 20 days after the delivery to AsiaInfo of the New Order Statement (the **Response Period**), AsiaInfo shall deliver to Linkage a written notice (a **Request Notice**) requesting additional information from Linkage that AsiaInfo requires in order to confirm the New Customer Orders and the Actual New Customer Order Amount (which information, to the extent reasonably necessary in order to confirm the Actual New Customer Order Amount, shall be provided by Linkage within 15 days after Linkage's receipt of such request).

Table of Contents

(iii) If AsiaInfo does not deliver a Request Notice to Linkage during the Response Period, then Linkage's calculation of the amounts set forth in the New Order Statement shall be binding and conclusive on Linkage, the Key Linkage Shareholders and AsiaInfo.

(iv) If AsiaInfo delivers a Request Notice to Linkage for additional information as described above during the Response Period, then AsiaInfo shall have an additional 20 days after receiving from Linkage all of the information reasonably requested by AsiaInfo and required in order for AsiaInfo to confirm the information set forth in the New Order Statement (the **Final Response Period**) to deliver to Linkage a written notice (a **Final Objection Notice**) describing in reasonable detail AsiaInfo's objections to Linkage's New Order Statement accompanied by a statement setting forth its view of the New Customer Orders and the Actual New Customer Order Amount determined by AsiaInfo to be correct.

(v) AsiaInfo and Linkage shall use reasonable efforts to resolve any differences in the New Order Statement and the Final Objection Notice between themselves. If AsiaInfo and Linkage do not reach a final resolution within thirty (30) days after Linkage has received the Final Objection Notice, then AsiaInfo and Linkage shall submit such dispute to a Big Four accounting firm other than Deloitte Touche Tohmatsu or its member firms (an **Accounting Referee**) who shall be entitled to request any additional information and use its discretion to determine the New Customer Order and the Actual New Customer Order Amount it believes to be correct. In the event any informational requests are not adequately addressed by Linkage within a reasonable period of time, the Accounting Referee shall be entitled to disallow any related New Customer Order. The findings of the Accounting Referee shall be binding and conclusive on Linkage, the Key Linkage Shareholders and AsiaInfo.

(vi) In the event the parties submit any unresolved objections to an Accounting Referee for resolution as provided in Section 1.8(d)(v) above, AsiaInfo and Linkage shall share responsibility for the fees and expenses of the Accounting Referee equally.

1.9 Post-Closing Adjustments.

(a) Preparation of Closing Date Balance Sheet.

(i) Within ninety (90) days after the Closing Date, members of the legacy AsiaInfo and legacy Linkage finance teams within the AsiaInfo-Linkage finance department will prepare in good faith and deliver to the Shareholders' Agent, on behalf of the Legacy Linkage Shareholders, a draft balance sheet (the **Draft Closing Date Balance Sheet**) for the Company as of the close of business on the Closing Date, upon which AsiaInfo shall include AsiaInfo's calculation of (A) the Working Capital as of the Closing Date (the **Actual Working Capital**) and (B) the Net Debt as of the Closing Date (the **Actual Net Debt**). Members of the legacy AsiaInfo and legacy Linkage finance teams within the AsiaInfo-Linkage finance department will prepare the Draft Closing Date Balance Sheet in accordance with GAAP, applied on a basis consistent with the preparation of the Utah Financial Statements; provided, however, that assets, liabilities, gains, losses, revenues, and expenses in interim periods or as of dates other than year-end (which normally are determined through the application of so-called interim accounting conventions or procedures) shall be determined, for purposes of the Draft Closing Date Balance Sheet, through full application of the procedures used in preparing the most recent reviewed balance sheet included within the Linkage Financial Statements.

(ii) If the Shareholders' Agent has any objections to the Draft Closing Date Balance Sheet, the Shareholders' Agent shall deliver a detailed statement describing such objections to AsiaInfo within thirty (30) days after receiving the Draft Closing Date Balance Sheet. AsiaInfo and the Shareholders' Agent shall use reasonable efforts to resolve any such objections themselves. If AsiaInfo and the Shareholders' Agent do not obtain a final resolution within thirty (30) days after AsiaInfo has received the statement of objections, however, AsiaInfo and the Shareholders' Agent shall submit such dispute to an Accounting Referee. AsiaInfo shall revise the Draft Closing Date Balance Sheet as appropriate to reflect the resolution of any objections thereto pursuant to this Section 1.9(a)(ii). The **Closing Date Balance Sheet** shall mean the Draft Closing Date Balance Sheet together with any revisions thereto pursuant to this Section 1.9(a)(ii).

Table of Contents

(iii) In the event the parties submit any unresolved objections to an Accounting Referee for resolution as provided in Section 1.9(a)(ii) above, AsiaInfo and the Key Linkage Shareholders shall share responsibility for the fees and expenses of the Accounting Referee equally.

(iv) AsiaInfo will make the work papers and back-up materials used in preparing the Draft Closing Date Balance Sheet available to the Shareholders Agent and the Shareholders Agent's accountant and other representatives at reasonable times and upon reasonable notice at any time during (A) the review by the Shareholders Agent of the Draft Closing Date Balance Sheet, and (B) the resolution by the Shareholders Agent and AsiaInfo of any objections thereto.

(b) Purchase Price Adjustment based on Working Capital.

(i) If Actual Working Capital is less than the Target Working Capital, then AsiaInfo shall instruct the Escrow Agent in writing to deliver to AsiaInfo out of the Escrow Fund an amount in cash equal to the amount by which Actual Working Capital is less than the Target Working Capital (the **Working Capital Shortfall**).

(ii) Any payment pursuant to Section 1.9(b)(i) shall be made by wire transfer or delivery of other immediately available funds within three (3) Business Days after the Escrow Agent's receipt of the written instructions from AsiaInfo contemplated in that Section.

(c) Purchase Price Adjustment based on Net Debt.

(i) If Actual Net Debt is greater than Target Net Debt, then AsiaInfo shall instruct the Escrow Agent in writing to deliver to AsiaInfo out of the Escrow Fund an amount equal to the amount by which Actual Net Debt is greater than the Target Net Debt (the **Net Debt Surplus**).

(ii) Any payment pursuant to Section 1.9(c)(i) shall be made by wire transfer or delivery of other immediately available funds within three (3) Business Days after the Escrow Agent's receipt of the written instructions from AsiaInfo contemplated in that Section.

(d) **No Double Recovery.** Notwithstanding anything to the contrary in this Agreement, if a change in any balance sheet item or items causes (x) a Working Capital Shortfall (or increases the amount of a Working Capital Shortfall) and (y) a Net Debt Surplus (or increases the amount of a Net Debt Surplus), AsiaInfo shall only be entitled to a purchase price adjustment based on one, and not both, of subsections (b) and (c) of this Section 1.9.

Each of the Indemnifying Parties other than Linkage shall, severally and not jointly, indemnify the Indemnified Parties in respect of, and hold each of them harmless from and against, any and all Indemnifiable Losses suffered, incurred or sustained by any of them or to which any of them becomes subject, resulting from, arising out of or relating to any breach of or inaccuracy in any representation or warranty of such Key Linkage Shareholder in Article 2A of this Agreement or in any certificate delivered by such Key Linkage Shareholder pursuant to Section 6.2(a) or Section 6.2(b) of this Agreement (with respect to the representations and warranties of the Key Linkage Shareholders contained in Article 2A or the covenants and agreements of the Key Linkage Shareholders in this Agreement).

(c) Limitations on Indemnity. No amounts of indemnity shall be payable as a result of any claim arising under Section 8.2(a)(i) or 8.2(b) in respect of a misrepresentation or breach of warranty by Linkage or the Key Linkage Shareholders unless and until the Indemnified Parties thereunder have suffered, incurred, sustained or become subject to Indemnifiable Losses referred to in such section in excess of US\$300,000 in the aggregate (the **Basket**), in which event the Indemnified Parties shall be entitled to seek indemnity from Linkage or the Key Linkage Shareholders, as applicable, for the full amount of such Indemnifiable Losses, provided, that this paragraph (c) shall not apply to (i) a breach or inaccuracy of any of the representations of Linkage or the Key Linkage Shareholders contained in Sections 2.3, 2.4 and 2.20, (ii) any Working Capital Shortfall or (iii) fraud related to a representation or warranty contained herein, in any schedule hereto, or in any certificate delivered by the Linkage Parties at the Closing pursuant to Section 6.2(a) and Section 6.2(b) of this Agreement.

(d) Additional Limitations on Indemnity.

(i) To the extent Losses are recoverable by insurance, the Indemnified Parties shall take all commercially reasonable efforts to obtain maximum recovery from such insurance. In computing any individual or aggregate amounts of Losses, the amount of such Losses shall be deemed to be an amount net of any insurance proceeds which the Indemnified Parties have a right to receive and any indemnity, contribution or other similar payment payable by any third party to such Indemnified Parties with respect thereto, so long as, in all cases, the timing, receipt or realization of insurance proceeds or recoveries from third parties, the amount of increased costs of insurance arising from the receipt or collection of such insurance proceeds, and the costs of collection shall be taken into account in determining the amount of any reduction in the indemnification claim. In the event that an insurance or other recovery is made by any Indemnified Party with respect to Losses for which any such Person has been indemnified hereunder, then a refund equal to the aggregate amount of the recovery shall be made promptly to the Person or Persons that provided such indemnity payments to such Indemnified Party. The Indemnifying Parties shall be subrogated to all rights of the Indemnified Parties in respect of Losses indemnified by the Indemnifying Parties.

(ii) The amount of any Indemnifiable Loss subject to indemnification under this Section 8.2 shall be calculated net of (i) any Tax Relief inuring to the Indemnified Parties on account of such Indemnifiable Losses and (ii) any specific reserves set forth in any of the Linkage Financial Statements for such Indemnifiable Losses (to the extent of such reserves). For purposes hereof, **Tax Relief** shall mean any refund of Taxes to be paid or reduction in the amount of Taxes which otherwise would be paid, by the recipient of such benefit. The Indemnified Parties shall take all commercially reasonable efforts to mitigate all Losses upon and after becoming aware of any event which could reasonably be expected to give rise to Losses. For Tax purposes, the Parties agree to treat all payments made under this Article 8 as adjustments to the consideration received for the Shares.

(iii) Notwithstanding anything to the contrary contained in this Agreement, absent fraud or intentional misrepresentation the maximum amount of Indemnifiable Losses which may be recovered from the Indemnifying Parties pursuant to the provisions of Section 8.2(a)(i) and Section 8.2(b) shall be limited to

Table of Contents

US\$176 million, which amount, for the avoidance of doubt, includes the Escrow Amount. Each share of AsiaInfo Common Stock that is distributed from the Escrow Fund to satisfy any Indemnifiable Losses shall be valued at US\$24.07.

(iv) Except with respect to intentional misrepresentation or fraud claims and as set forth in Section 9.5, this Article 8 constitutes the Indemnified Parties' sole and exclusive remedy for any and all monetary claims relating to or arising from the matters set forth in Section 8.2(a) and Section 8.2(b).

8.3 Method of Asserting Claims. All claims for indemnification by any Indemnified Party under Section 8.2 will be asserted and resolved as follows:

(a) In the event any claim or demand in respect of which an Indemnifying Party might seek indemnity under Section 8.2 is asserted against or sought to be collected from such Indemnified Party by a Person other than AsiaInfo or any Affiliate of AsiaInfo (a **Third Party Claim**), the Indemnified Party shall deliver a Claim Notice with reasonable promptness to the Shareholders' Agent on behalf of any Indemnifying Party. If the Indemnified Party fails to provide the Claim Notice with reasonable promptness after the Indemnified Party receives notice of such Third Party Claim, the Indemnifying Party will not be obligated to indemnify the Indemnified Party with respect to such Third Party Claim only to the extent that the Indemnifying Party's ability to defend has been actually and materially prejudiced by such failure of the Indemnified Party. The Indemnifying Party will notify the Indemnified Party as soon as practicable within the Dispute Period whether the Indemnifying Party disputes its liability to the Indemnified Party under Section 8.2 and whether the Indemnifying Party elects to defend the Indemnified Party against such Third Party Claim.

(i) If the Indemnifying Party notifies the Indemnified Party within the Dispute Period that the Indemnifying Party elects to defend the Indemnified Party with respect to the Third Party Claim pursuant to this Section 8.3(a), then the Indemnifying Party will have the right to defend, at the sole cost and expense of the Indemnifying Party with counsel reasonably satisfactory to the Indemnified Party, such Third Party Claim by all appropriate proceedings, which proceedings will be vigorously and diligently prosecuted by the Indemnifying Party to a final conclusion or will be settled at the discretion of the Indemnifying Party (but only with the consent of the Indemnified Party in the case of any settlement that provides for any relief other than the payment of monetary damages or that provides for the payment of monetary damages as to which the Indemnified Party will not be indemnified in full pursuant to Section 8.2). The Indemnifying Party will have full control of such defense and proceedings, including any compromise or settlement thereof; provided, however, that the Indemnified Party may, at the sole cost and expense of the Indemnified Party, at any time prior to the Indemnifying Party's delivery of the notice referred to in the first sentence of this clause (i), file any motion, answer or other pleadings or take any other action that the Indemnified Party reasonably believes to be necessary or appropriate to protect its interests; and provided further, that if requested by the Indemnifying Party, the Indemnified Party will, at the sole cost and expense of the Indemnifying Party, provide reasonable cooperation to the Indemnifying Party in contesting any Third Party Claim that the Indemnifying Party elects to contest. The Indemnified Party may participate in, but not control, any defense or settlement of any Third Party Claim controlled by the Indemnifying Party pursuant to this clause (i), and except as provided in the preceding sentence, the Indemnified Party will bear its own costs and expenses with respect to such participation. Notwithstanding the foregoing, the Indemnified Party may take over the control of the defense or settlement of a Third Party Claim at any time if (a) it irrevocably waives its right to indemnity under Section 8.2 with respect to such Third Party Claim, (b) the amount in controversy exceeds amounts in the Escrow Fund, (c) the Third Party Claim involves relief other than the payment of monetary damages, (d) if a conflict of interest arises between the Indemnifying Party and the Indemnified Party, or (e) events arise (as determined by the Indemnified Party in good faith) that impair the ability of the Indemnifying Party to fully, vigorously and diligently defend the Third Party Claim. In such event, the Indemnifying Party shall have the right, in its sole discretion, to settle any such claim; provided that with respect to the matters set forth in clauses (b), (c) (d) and (e) of this Section 8.3(a)(i) any such settlement shall be subject to the consent of the Indemnifying Party (not to be unreasonably withheld, delayed or conditioned). In the event that the Shareholders' Agent has consented to any such settlement, the

Shareholders Agent shall not object to the amount of any claim by the Indemnified Party against the Escrow Fund for indemnity with respect to such settlement.

(ii) If the Indemnifying Party fails to notify the Indemnified Party within the Dispute Period that the Indemnifying Party elects to defend the Third Party Claim pursuant to Section 8.3(a), or if the Indemnifying Party gives such notice but fails to prosecute vigorously and diligently or settle the Third Party Claim, or if the Indemnifying Party fails to give any notice whatsoever within the Dispute Period, then the Indemnified Party will have the right to defend, at the sole cost and expense of the Indemnifying Party, the Third Party Claim by all appropriate proceedings, which proceedings will be prosecuted by the Indemnified Party in a reasonable manner and in good faith or will be settled at the discretion of the Indemnified Party (with the consent of the Indemnifying Party, which consent will not be unreasonably withheld). The Indemnified Party will have full control of such defense and proceedings, including any compromise or settlement thereof; provided, however, that if requested by the Indemnified Party, the Indemnifying Party will, at the sole cost and expense of the Indemnifying Party, provide reasonable cooperation to the Indemnified Party and its counsel in contesting any Third Party Claim which the Indemnified Party is contesting. Notwithstanding the foregoing provisions of this clause (ii), if the Indemnifying Party has notified the Indemnified Party within the Dispute Period that the Indemnifying Party disputes its liability hereunder to the Indemnified Party with respect to such Third Party Claim and if such dispute is resolved in favor of the Indemnifying Party in the manner provided in clause (iii) below, the Indemnifying Party will not be required to bear the costs and expenses of the Indemnified Party's defense pursuant to this clause (ii) or of the Indemnifying Party's participation therein at the Indemnified Party's request, and the Indemnified Party will reimburse the Indemnifying Party in full for all reasonable costs and expenses incurred by the Indemnifying Party in connection with such litigation. The Indemnifying Party may participate in, but not control, any defense or settlement controlled by the Indemnified Party pursuant to this clause (ii), and the Indemnifying Party will bear its own costs and expenses with respect to such participation.

(iii) If the Indemnifying Party notifies the Indemnified Party that it does not dispute its liability to the Indemnified Party with respect to the Third Party Claim under Section 8.3 or fails to notify the Indemnified Party within the Dispute Period whether the Indemnifying Party disputes its liability to the Indemnified Party with respect to such Third Party Claim, the Indemnifiable Loss in the amount specified in the Claim Notice will be conclusively deemed a liability of the Indemnifying Party under Section 8.2(a) and the Indemnifying Party shall pay the amount of such Indemnifiable Loss to the Indemnified Party on demand. If the Indemnifying Party has timely disputed its liability with respect to such claim, the Indemnifying Party and the Indemnified Party will proceed in good faith to negotiate a resolution of such dispute, and if not resolved through negotiations within 60 days of receipt of the Claim Notice (the **Resolution Period**), such dispute shall be resolved by arbitration in accordance with Section 9.7.

(b) In the event any Indemnified Party should have a claim under Section 8.3 against any Indemnifying Party that does not involve a Third Party Claim, the Indemnified Party shall deliver an Indemnity Notice with reasonable promptness to the Indemnifying Party. The failure by any Indemnified Party to give the Indemnity Notice shall not impair such party's rights hereunder except to the extent that an Indemnifying Party demonstrates that it has been actually and materially prejudiced thereby. If the Indemnifying Party notifies the Indemnified Party that it does not dispute the claim described in such Indemnity Notice or fails to notify the Indemnified Party within the Dispute Period whether the Indemnifying Party disputes the claim described in such Indemnity Notice, the Indemnifiable Loss in the amount specified in the Indemnity Notice will be conclusively deemed a liability of the Indemnifying Party under Section 8.2(a) or Section 8.2(b), as applicable, and the Indemnifying Party shall pay the amount of such Indemnifiable Loss to the Indemnified Party on demand. If the Indemnifying Party has timely disputed its liability with respect to such claim, the Indemnifying Party and the Indemnified Party will proceed in good faith to negotiate a resolution of such dispute, and if not resolved through negotiations within the Resolution Period, such dispute shall be resolved by arbitration in accordance with Section 9.8.

(a) **Appointment of the Shareholders' Agent.** The Shareholders' Agent shall be constituted and appointed as agent for and on behalf of the Legacy Linkage Shareholders to give and receive notices and communications related to this Agreement, to authorize delivery to AsiaInfo of the monies from the Escrow Fund in satisfaction of claims by AsiaInfo, to object to such deliveries, to agree to, negotiate, enter into settlements and compromises of, and demand arbitration and comply with orders of courts and awards of arbitrators with respect to such claims, and to take all actions necessary or appropriate in the judgment of the Shareholders' Agent for the accomplishment of the foregoing. Such agency may be changed by the holders of a majority in interest of the Escrow Fund from time to time upon not less than ten (10) Business Days' prior written notice to AsiaInfo. No bond shall be required of the Shareholders' Agent, and the Shareholders' Agent shall receive no compensation for his services. (c) **Access to Information.** The Shareholders' Agent shall have reasonable access to information about AsiaInfo and the reasonable assistance of AsiaInfo's officers and employees for purposes of performing his duties and exercising his rights hereunder, provided that the Shareholders' Agent shall treat confidentially and not disclose any nonpublic information from or about AsiaInfo to anyone (except on a need to know basis to individuals who agree to treat such information confidentially).

(d) **Conflict of Interest.** AsiaInfo acknowledges that the Shareholders' Agent may have a conflict of interest with respect to his duties as Shareholders' Agent, and in such regard the Shareholders' Agent has informed AsiaInfo that he will act in the best interests of the Legacy Linkage Shareholders.

8.5 Actions of the Shareholders' Agent. A decision, act, consent or instruction of the Shareholders' Agent shall constitute a decision of all Legacy Linkage Shareholders for whom Consideration otherwise issuable to them is deposited in the Escrow Fund, and shall be final, binding and conclusive upon each such Legacy Linkage Shareholder. The Escrow Agent and AsiaInfo may rely upon any decision, act, consent or instruction of the Shareholders' Agent as being the decision, act, consent or instruction of each and every such Legacy Linkage Shareholder. The Escrow Agent and AsiaInfo are hereby relieved from any liability to any Person for any acts done by them in accordance with such decision, act, consent or instruction of the Shareholders' Agent.

Any party to this Agreement may give any notice or other communication hereunder using any other means (including personal delivery, messenger service, telecopy, ordinary mail or electronic mail), but no such notice or other communication shall be deemed to have been duly given unless and until it actually is received by the party for whom it is intended; provided, however, that if such receipt is on a day that is not a Business Day, such notice or other communication shall be deemed to have been duly given on the next Business Day following such receipt.

9.2 Counterparts. This Agreement may be executed and delivered by facsimile or other electronic transmission in .PDF format and in any number of counterparts, all of which shall be considered one and the same agreement and shall become effective when one or more counterparts have been signed by each of the parties and delivered to the other parties, it being understood that all parties need not sign the same counterpart.

9.3 Entire Agreement; Nonassignability; Parties in Interest. This Agreement and the documents and instruments and other agreements specifically referred to herein or delivered pursuant hereto, including, without limitation, the Linkage Disclosure Schedule and the other exhibits and schedules hereto: (a) together constitute the entire agreement among the parties with respect to the subject matter hereof and supersede all prior agreements and understandings, both written and oral, among the parties with respect to the subject matter hereof, except for the Confidentiality Agreement, which shall continue in full force and effect, and shall survive any termination of this Agreement or the Closing, in accordance with its terms; and (b) are not intended to confer upon any Person, other than the parties hereto, any rights or remedies hereunder and shall not be assigned by operation of law or otherwise without the written consent of the other party. For the avoidance of doubt, although AsiaInfo may purchase the Shares through one of its Group Companies, the obligations of AsiaInfo set forth in this Agreement shall at all times remain obligations of AsiaInfo and may not be assigned to any Person (including any of its Group Companies) without the written consent of Linkage (or, if Linkage's corporate existence has ceased, the Shareholders Agent).

9.4 Severability. In the event that any provision of this Agreement, or the application thereof becomes or is declared by a court of competent jurisdiction to be illegal, void or unenforceable, the remainder of this Agreement will continue in full force and effect and the application of such provision to other Persons or circumstances will be interpreted so as reasonably to effect the intent of the parties hereto. The parties further agree to replace such void or unenforceable provision of this Agreement with a valid and enforceable provision that will achieve, to the extent possible, the economic, business and other purposes of such void or unenforceable provision.

9.5 Specific Performance; Remedies. The parties hereto agree that irreparable harm would occur and that there will be no adequate remedy at law in the event that any of the provisions of this Agreement were not performed in accordance with their specific terms or were otherwise breached. It is accordingly agreed that, in addition to any remedies that may be available under Article 8 or otherwise pursuant to this Agreement upon such nonperformance or breach, each party hereto shall have the right to seek injunctive relief to restrain a breach or threatened breach, or otherwise to obtain specific performance, of any provision of this Agreement. For purposes of such injunctive relief or specific performance, the parties hereto consent to submit to the personal jurisdiction of any U.S. federal or State court located in New York County, in the State of New York, and agrees that it shall not attempt to deny or defeat such personal jurisdiction by motion or other request for leave from any such court.

9.6 GOVERNING LAW. THIS AGREEMENT SHALL BE GOVERNED BY AND CONSTRUED IN ACCORDANCE WITH THE LAWS OF THE STATE OF NEW YORK, WITHOUT REGARD FOR THE CONFLICTS OF LAWS PRINCIPLES THEREOF.

9.7 Arbitration.

(a) Except as otherwise provided in this Agreement, any dispute or claim arising out of or in connection with or relating to this Agreement, or the breach, termination or invalidity hereof, shall be finally settled by arbitration at the Hong Kong International Arbitration Centre under the rules of UNCITRAL (the **Rules**) as are in force at the date of the notice of arbitration commencing any such arbitration, but subject to the amendments made to the Rules by the rest of this Section 9.7. For the purpose of such arbitration, there shall be a board of arbitration (the **Board of Arbitration**) consisting of three arbitrators, each of AsiaInfo and the Shareholders. Agent shall select one (1) member and the third member shall be selected by mutual agreement of the other members, or if the other members fail to reach agreement on a third member within twenty (20) days after their selection, such third member shall thereafter be selected by the Hong Kong International Arbitration Centre upon application made to it for such purpose. The place of arbitration shall be in Hong Kong. All arbitration proceedings shall be conducted in the English language. The arbitrators shall decide any such dispute or claim strictly in accordance with the governing law specified in Section 9.6 of this Agreement. Judgment upon any arbitral award rendered hereunder may be entered in any court, and/or application may be made to any such court for a judicial acceptance of the award and/or an order of enforcement, as the case may be.

(b) Each party shall cooperate in good faith to expedite (to the maximum extent practicable) the conduct of any arbitral proceedings commenced under this Agreement.

(c) The costs and expenses of the arbitration, including the fees of the arbitration, including the fees of the Board of Arbitration, shall be borne equally by each party to the dispute or claim, and each party shall pay its own fees, disbursements and other charges of its counsel.

(d) Any award made by the Board of Arbitration shall be final and binding on each of the parties that were parties to the dispute. The parties expressly agree to waive the applicability of any laws and regulations that would otherwise give the right to appeal the decisions of the Board of Arbitration so that there shall be no appeal to any court of law from the award of the Board of Arbitration, and a party shall not challenge or resist the enforcement action taken by any other party in whose favor an award of the Board of Arbitration was given.

(e) Notwithstanding this Section 9.7 or any other provision to the contrary in this Agreement, no party shall be obligated to follow the foregoing arbitration procedures where that party intends to apply to any court of competent jurisdiction for an interim injunction or similar equitable relief against the other, provided there is no unreasonable delay in the prosecution of that application.

(f) This Agreement and the rights and obligations of AsiaInfo, Linkage and the Key Linkage Shareholders shall remain in full force and effect pending the award in any arbitration proceeding hereunder.

(g) Any party will have the right of specific performance and injunctive relief giving effect to its rights under this Agreement, in addition to any and all other rights and remedies under applicable law or in equity.

9.8 Rules of Construction. The parties hereto agree that they have been represented by counsel during the negotiation, preparation and execution of this Agreement and, therefore, waive the application of any law, regulation, holding or rule of construction providing that ambiguities in an agreement or other document will be construed against the party drafting such agreement or document.

9.9 Amendment; Waiver. Any amendment or waiver of any of the terms or conditions of this Agreement must be in writing, specifying such amendment or waiver, and must be duly executed by or on behalf of the party

to be charged with such waiver. The failure of a party to exercise any of its rights hereunder or to insist upon strict adherence to any term or condition hereof on any one occasion shall not be construed as a waiver or deprive that party of the right thereafter to insist upon strict adherence to the terms and conditions of this Agreement at a later date. Further, no waiver of any of the terms and conditions of this Agreement shall be deemed to or shall constitute a waiver of any other term of condition hereof (whether or not similar).

9.10 No Third Party Beneficiary Rights. No provisions of this Agreement are intended, nor shall be interpreted, to provide or create any third party beneficiary rights or any other rights of any kind in any client, customer, affiliate, shareholder or partner of any party hereto or any other Person or entity unless specifically provided otherwise herein, and, except as so provided, all provisions hereof shall be solely between the parties to this Agreement.

(iii) Limitations on Demand Registration. Notwithstanding anything herein to the contrary, the Company shall not be required to honor a request for a Demand Registration if:

(A) such request is received with respect to Registrable Securities that may immediately be sold under Rule 144 during any ninety (90) day period and in compliance with the volume limitations of Rule 144;

(B) such request is received by the Company less than sixty (60) days following the effectiveness of any previous registration statement filed by the Company (other than a Registration Statement on Form S-4 or S-8 or any successor or similar form that may be adopted by the Commission), regardless of whether the Majority Holders exercised their rights under this Agreement with respect to such registration; provided, however, that the foregoing limitation is subject to the Company's compliance with its obligations pursuant to Section 2.1(b) to provide the Majority Holders with the Notice of Piggyback Registration, and further, provided, that in connection with the relevant Notice of Piggyback Registration the Company shall have included in such registration not less than 20% of the number of Registrable Securities proposed by the Majority Holders to be included in such registration; or

the Company may elect to effect an underwritten primary registration in lieu of the Demand Registration if the Company's Board of Directors determines that such primary registration would be in the best interests of the Company or if the managing underwriter for a Demand Registration advises the Company in writing that in its opinion, in order to sell the Registrable Securities to be sold, the Company should include its own securities. If the Company so determines to effect a primary registration, the Company shall give prompt written notice to those Holders participating in the registration hereunder of its intention to effect such a registration and shall afford those Holders participating in the registration hereunder the rights contained in Section 2.1(b) with respect to Piggyback Registrations. In the event that the Company so elects to effect a primary registration after receiving a request for a Demand Registration, the requests for a Demand Registration shall be deemed to have been withdrawn and such primary registration shall not be deemed to be a Demand Registration.

(b) Piggyback Registrations

(i) Right to Include Registrable Securities. Notwithstanding any limitations contained in Section 2.1(a)(iii), and subject to Section 2.1(e) below, if the Company at any time after the Registration Rights Date proposes to file a Registration Statement under the Securities Act (other than a Registration Statement on Form S-4, Form F-4 or Form S-8 or any successor or similar form that may be adopted by the Commission) registering shares of its Common Shares, whether for sale for the account of the Company or for the account of any holder of securities of the Company (other than Registrable Securities) (a **Piggyback Registration**), it will each such time give written notice (a **Notice of Piggyback Registration**) at least fifteen (15) Business Days prior to the anticipated filing date, to each of the Holders, of its intention to do so and of such Holder's rights under this Section 2.1(b), which Notice of Piggyback Registration shall include a description of the intended method of disposition of such securities. Upon the written request of the Holders made within fifteen (15) Business Days after receipt of a Notice of Piggyback Registration (which request shall specify the Registrable Securities intended to be disposed of by the Holders and the intended method of disposition thereof), the Company will use its commercially reasonable best efforts to include in the Registration Statement relating to such Piggyback Registration all Registrable Securities which the Company has been so requested to register. Notwithstanding the foregoing, if, at any time after giving a Notice of Piggyback Registration and prior to the effective date of the Registration Statement filed in connection with such registration, the Company shall determine for any reason not to register or to delay registration of such securities, the Company may, at its election, give written notice of such determination to those Holders participating in the registration hereunder and, thereupon, (i) in the case of a determination not to register, shall be relieved of its obligation to register any Registrable Securities in connection with such registration (but not from its obligation to pay the Registration Expense in connection therewith) without prejudice, however, to the rights of the Holder to request that such registration be effected as the Demand Registration under Section 2.1(a), and (ii) in the case of a determination to delay registering, shall be permitted to delay registering any Registrable Securities for the same period as the delay in registering such other securities. No registration effected under this Section 2.1(b) shall relieve the Company of its obligations to effect a Demand Registration under Section 2.1(a).

(ii) Priority in Cutbacks. If a Piggyback Registration is to be effected by way of an underwritten public offering and the managing underwriter advises the Company and the Holders in writing that, in its opinion, the number of securities requested to be included in such registration (including securities of the Company that are not Registrable Securities) exceeds the number that can be sold in such offering, the Company shall include in such registration to the extent of the amount of the securities that the managing underwriter advises the Company can be sold in such offering:

(A) if such registration as initially proposed by the Company was solely a primary registration of its securities, (x) first, the securities proposed by the Company to be sold for its own account, (y) second, securities requested to be included in such registration by the Holders

and the Other Registration Rights Holders pro rata on the basis of the number of securities requested to be included by such Persons, and (z) third, any other securities of the Company proposed to be included in such registration, allocated among the holders thereof in accordance with the priorities then existing among the Company and such holders.

(B) if such registration as initially proposed by the Company was in whole or in part requested by holders of securities of the Company, other than the Majority Holders in their capacity as such pursuant to the Demand Registration, (x) first, such securities held by the holders initiating such registration and, if applicable, any securities proposed by the Company to be sold for its account, allocated in accordance with the priorities then existing among the Company and such holders, (y) second, securities requested to be included in such registration by Persons contractually entitled to registration (including the Holders), pro rata, on the basis of the number of securities requested to be included by such Persons, and (z) third, any other securities of the Company proposed to be included in such registration, allocated among the holders thereof in accordance with the priorities then existing among the Company and the holders of such securities.

Any securities so excluded shall be withdrawn from and shall not be included in such Piggyback Registration.

(c) Registration Procedures.

(i) If the Majority Holders have requested inclusion of their Registrable Securities in a Registration Statement, those Holders participating in such registration agree to provide in a timely manner information regarding the proposed distribution by the Holders of the Registrable Securities and such other information reasonably requested by the Company in connection with the preparation of and for inclusion in the Registration Statement.

(ii) If and whenever the Company is required to effect the registration of any Registrable Securities under the Securities Act pursuant to Section 2.1(a) and 2.1(b), the Company will use its reasonable best efforts to effect the registration and sale of such Registrable Securities in accordance with the intended methods of disposition thereof specified by the Majority Holders. Without limiting the foregoing, the Company in each such case shall, as expeditiously as possible, use its reasonable best efforts to keep the Registration Statement effective (subject to Section 2.3(d) hereof) and free of material misstatements or omissions (including the preparation and filing of any amendments and supplements necessary for that purposes) until the earlier of:

(A) the first date on which those Holders participating in the registration hereunder have consummated the sale of all or their Registrable Securities registered under the Registration Statement;

(B) the date on which all of the Registrable Securities registered under the Registration Statement are eligible for sale pursuant to Rule 144 (or any successor provision) without limitations under the Securities Act; or

(C) one hundred twenty (120) days after such Registration Statement becomes effective.

(iii) The Company agrees to provide to those Holders participating in the registration hereunder a reasonable number of copies of the final Registration Statement and the related prospectus (including any preliminary prospectus) and any amendments or supplements thereto. The Company further agrees that it will use reasonable best efforts to obtain the withdrawal of any order suspending the effectiveness of any Registration Statement as soon as reasonably practicable.

(d) Offers and Sales.

All offers and sales by the Holders under any Registration Statement referred to in Section 2.1(a) or 2.1(b), if any, shall be completed within the period during which such Registration Statement is required to remain effective pursuant to Section 2.1(c)(ii), and, upon expiration of such period, each such Holder will not offer or

sell any Registrable Securities under such Registration Statement. If directed by the Company, those Holders participating in the registration hereunder will return all undistributed copies of any prospectus in such Holder's possession upon the expiration of such period. Each Holder shall promptly, but in any event no later than five (5) Business Days after a sale by it of Registrable Securities, notify the Company of any sale or other transfer by such Holder of Registrable Securities and include in such notice the number of Registrable Securities sold or transferred by such Holder.

(e) Suspension of Offering.

If the Company's Board of Directors determines in its good faith judgment that the filing of the Registration Statement under Section 2.1(a) or 2.1(b) hereof or the use of any prospectus would (i) materially impede, delay or interfere with any pending material financing, acquisition or corporate reorganization or other material corporate development involving the Company or any of its subsidiaries, or (ii) require the disclosure of important information that the Company has a material business purpose for preserving as confidential or the disclosure of which would materially impede the Company's ability to consummate a significant transaction, then, upon the Holders' receipt of written certification from the Company's Chief Executive Officer of such determination by the Company's Board of Directors, the rights of the Holders to offer, sell, or distribute any Registrable Securities pursuant to a Registration Statement or to require the Company to take action with respect to the registration or sale of any Registrable Securities pursuant to a Registration Statement (including any action contemplated by Section 2.1(c) hereof) shall be suspended until the date (which shall be no later than the 90th day following the date of the notice of suspension) upon which the Company notifies the Holders in writing that suspension of such rights for the grounds set forth in this Section 2.1(e) is no longer necessary; provided, however, that the Company shall not exercise the right to suspend an offering pursuant to this Section 2.1(e) more than once in any twelve (12) month period.

Section 2.2 Expenses. Except as set forth in this Section 2.2, all Registration Expenses incurred in connection with any registration pursuant to Sections 2.1(a) or 2.1(b) (but excluding Selling Expenses) shall be borne by the Company. Each Holder participating in a registration pursuant to Sections 2.1(a) or 2.1(b) shall bear such Holder's proportionate share (based on the total number of shares sold in such registration other than for the account of the Company) of all Selling Expenses or other amounts payable to underwriter(s) or brokers, in connection with such offering by the Holders.

Section 2.3 Obligations of the Company. Whenever required under Section 2.1 to effect the registration of any Registrable Securities, the Company shall as expeditiously as reasonably practicable:

(a) Filing of Amendments and Supplements. Prepare and file with the Commission such amendments (including post-effective amendments) and supplements to the Registration Statement and the prospectus used in connection with the Registration Statement as may be necessary to keep the Registration Statement effective and to comply with the provisions of the Securities Act with respect to the disposition of all Registrable Securities and other securities of the Company covered by the Registration Statement at all times during the period for which the Company is required to maintain the effectiveness of such Registration Statement pursuant to the terms of this Agreement.

(b) Correction and Updating of Registration Statement and Prospectus. Upon the occurrence of any event or passage of time that makes the financial statements included in a Registration Statement ineligible for inclusion therein or any statement made in such Registration Statement or Prospectus or any document incorporated or deemed to be incorporated therein by reference untrue in any material respect or that requires any revisions to such Registration Statement, Prospectus or other documents so that, in the case of such Registration Statement or the Prospectus, as the case may be, it will not contain any untrue statement of a material fact or omit to state any material fact required to be stated therein or necessary to make the statements therein, in light of the circumstances under which they were made, not misleading, as promptly as reasonably possible, prepare a supplement or amendment, including a post-effective amendment, to the affected Registration Statement or a supplement to the related Prospectus or any document incorporated or deemed to be incorporated therein by reference, and file any other required document so that, as thereafter

delivered, no Registration Statement or any Prospectus will contain an untrue statement of a material fact or omit to state a material fact required to be stated therein or necessary to make the statements therein, in light of the circumstances under which they were made, not misleading.

(c) **Copies of Documents**. Furnish to each selling Holder, without charge, such number of conformed copies of the Registration Statement and of each such amendment and supplement thereto (in each case including all exhibits), such number of copies of the prospectus included in such Registration Statement (including each preliminary prospectus and any summary prospectus), in conformity with the requirements of the Securities Act, such documents incorporated by reference in such Registration Statement or prospectus, and such other documents, as such selling Holders may reasonably request.

(d) **Opinion and Comfort Letter**. Furnish to any applicable underwriter on behalf of any selling Holders (i) an opinion of the counsel representing the Company for purposes of such registration, dated the effective date of such Registration Statement (or, if such registration includes an underwritten public offering, dated the date of the closing under the underwriting agreement with respect to both the effective date of the Registration Statement and the date of the closing under the underwriting agreement), in form and substance as is customarily given by counsel for the issuer to underwriters in an underwritten public offering, addressed to the underwriters, if any, and (ii) a cold comfort letter, dated the effective date of such Registration Statement (and, if such Registration Statement includes an underwritten public offering, dated the date of the closing under the underwriting agreement) signed by the independent certified public accountants who have certified the Company's financial statements included in such Registration Statement, in form and substance as is customarily given by independent certified public accountants to underwriters in an underwritten public offering, addressed to the underwriters.

(e) **Blue Sky Qualification**. Use commercially reasonable efforts to register or qualify all Registrable Securities and other securities covered by such Registration Statement under the securities or blue sky laws of such jurisdictions as the applicable selling Holders (or in an underwritten offering, the managing underwriter) shall reasonably request, and do any and all other acts and things which may be necessary or advisable to enable such Selling Holders to consummate the disposition in such jurisdictions of the Registrable Securities covered by such Registration Statement, except that the Company shall not for any such purpose be required to qualify generally to do business as a foreign corporation in any jurisdiction wherein it is not so qualified, or to subject itself to taxation in any such jurisdiction, or to consent to general service of process in any such jurisdiction.

(f) **Notification of Certain Events**. As promptly as practicable after becoming aware thereof, notify the applicable selling Holders of the happening of any event of which the Company has knowledge, as a result of which the prospectus included in the Registration Statement, as then in effect, includes an untrue statement of a material fact or omits to state a material fact required to be stated therein or necessary to make the statements therein, in light of the circumstances under which they were made, not misleading, and promptly prepare and file with the Commission a supplement or amendment to the Registration Statement or other appropriate filing with the Commission to correct such untrue statement or omission, and deliver a number of copies of such supplement or amendment to such selling Holders as such selling Holders may reasonably request.

(g) **SEC Stop Orders**. As promptly as practicable after becoming aware thereof, notify the applicable selling Holders (and, in the event of an underwritten offering, the managing underwriters) of the issuance by the Commission of any notice of effectiveness or any stop order or other suspension of the effectiveness of the Registration Statement at the earliest possible time.

(h) **Listing Requirements**. Cause the Registrable Securities to be listed on each securities exchange on which similar securities issued by the Company are then listed.

(i) **Underwriting Agreement**. In the event of any underwritten public offering, enter into and perform its obligations under an underwriting agreement, in usual and customary form and complying with the provisions of Section 2.5, with the managing underwriter of such offering.

(j) Section 11 Information. Make available to its shareholders an earnings statement which shall satisfy the provisions of Section 11(a) of the Securities Act, provided that the Company shall be deemed to have complied with this Section 2.3(j) if it has complied with Rule 158 under the Securities Act.

(k) Other Actions. Take all other reasonable actions necessary to expedite and facilitate disposition by the applicable selling Holders of the Registrable Securities pursuant to the Registration Statement.

Section 2.4 Obligations of Holders. It shall be a condition precedent to the obligations of the Company to register the Registrable Securities of any Holder pursuant to this Section 2 that the selling Holder shall furnish to the Company such information regarding itself, the Registrable Securities held thereby and the intended method of disposition of such securities as shall be required to timely effect the registration of such Holder's Registrable Securities.

Section 2.5 Indemnification. In the event any Registrable Securities are included in a Registration Statement under this Section 2:

(a) Company Indemnity. To the extent permitted by law, the Company will indemnify and hold harmless each Holder, its partners, officers, directors, agents, any underwriter (as defined in the Securities Act) for such Holder and each Person, if any, who controls (as defined in the Securities Act) such Holder or underwriter against any losses, claims, damages, or liabilities (joint or several) to which they may become subject under laws which are applicable in connection with any registration, qualification, or compliance, of the Company's securities insofar as such losses, claims, damages, or liabilities (or actions in respect thereof) arise out of or are based upon any of the following statements, omissions or violations (collectively a **Violation**):

(i) any untrue statement or alleged untrue statement of a material fact contained in such Registration Statement, including any preliminary prospectus or final prospectus contained therein or any amendments or supplements thereto; or

(ii) the omission or alleged omission to state in the Registration Statement, including any preliminary prospectus or final prospectus contained therein or any amendments or supplements thereto, a material fact required to be stated therein, or necessary to make the statements therein not misleading;

and the Company will reimburse each such Holder, its partners, officers, directors, agents, underwriters or controlling Person for any legal or other expenses reasonably incurred by them, as incurred, in connection with investigating or defending any such loss, claim, damage, liability or action; provided, however, that the indemnity agreement contained in this Section 2.5(a) shall not apply to amounts paid in settlement of any such loss, claim, damage, liability or action if such settlement is effected without the consent of the Company (which consent shall not be unreasonably withheld), nor shall the Company be liable in any such case for any such loss, claim, damage, liability or action to the extent that it arises out of or is based upon a Violation that occurs in reliance upon and in conformity with written information furnished expressly for use in connection with such registration by such Holder, underwriter or controlling Person of such Holder.

(b) Holder Indemnity. To the extent permitted by law, in connection with any Registration Statement filed pursuant hereto, each Holder of Registrable Securities to be covered thereby will, severally and not jointly with any other Holders, indemnify and hold harmless the Company, its partners, officers, directors, agents, any underwriter (as defined in the Securities Act) for the Company and each Person, if any, who controls (as defined in the Securities Act) the Company or underwriter against any losses, claims, damages, or liabilities (joint or several) to which they may become subject under laws which are applicable in connection with any registration, qualification, or compliance, of the Company's securities insofar as such losses, claims, damages, or liabilities (or actions in respect thereof) arise out of or are based upon any Violation to the extent that such Violation occurs in reliance upon and in conformity with written information furnished expressly for use in connection with such registration by such Holder, and such

Holder will reimburse each of the Company, its partners, officers, directors, agents, underwriters or controlling Persons for any legal or other expenses reasonably incurred by them, as incurred, in connection with investigating or defending any such loss, claim, damage, liability or action; provided, however, that the indemnity agreement contained in this Section 2.5(b) shall not apply to amounts paid in settlement of any such loss, claim, damage, liability or action if such settlement is effected without the consent of such Holder (which consent shall not be unreasonably withheld); and provided further, however, that no Holder shall be required to indemnify the Company or any other indemnified party under this Section 2.5(b) with respect to any amount in excess of the amount of the total net proceeds received by such Holder from sales of the Registrable Securities of such Holder under such Registration Statement.

(c) Notice. Promptly after receipt by an indemnified party under this Section 2.5 of notice of the commencement of any action (including any governmental action), such indemnified party will, if a claim in respect thereof is to be made against any indemnifying party under this Section 2.5, deliver to the indemnifying party a written notice of the commencement thereof and the indemnifying party shall have the right to participate in, and, to the extent the indemnifying party so desires, jointly with any other indemnifying party similarly noticed, to assume the defense thereof with counsel mutually satisfactory to the parties; provided, however, that an indemnified party shall have the right to retain its own counsel, with the fees and expenses to be paid by the indemnifying party, if representation of such indemnified party by the counsel retained by the indemnifying party would be inappropriate due to a material conflict of interest between such indemnified party and any other party represented by such counsel in such proceeding. The failure to deliver written notice to the indemnifying party within a reasonable time of the commencement of any such action shall relieve such indemnifying party of liability to the indemnified party under this Section 2.5 to the extent the indemnifying party is prejudiced as a result thereof, but the omission to so deliver written notice to the indemnifying party will not otherwise relieve it of any liability that it may have to any indemnified party under this Section 2.5.

(d) Contribution. If any indemnification provided for in this Section 2.5 is held by a court of competent jurisdiction to be unavailable to an indemnified party with respect to any loss, liability, claim, damage or expense referred to herein, the indemnifying party, in lieu of indemnifying such indemnified party hereunder, shall contribute to the amount paid or payable by such indemnified party as a result of such loss, liability, claim, damage or expense in such proportion as is appropriate to reflect the relative fault of the indemnifying party, on the one hand, and of the indemnified party, on the other, in connection with the statements or omissions that resulted in such loss, liability, claim, damage or expense, as well as any other relevant equitable considerations. The relative fault of the indemnifying party and of the indemnified party shall be determined by reference to, among other things, whether the untrue or alleged untrue statement of a material fact or the omission to state a material fact relates to information supplied by the indemnifying party or by the indemnified party and the parties' relative intent, knowledge, access to information, and opportunity to correct or prevent such statement or omission.

Section 2.6 Termination of the Company's Obligations. The registration rights granted under this Section 2 shall automatically terminate with respect to each Holder as of the date and time at which such Holder no longer beneficially owns any Registrable Securities; provided, however, that Section 2.6 and the provisions of Article III shall survive such termination.

Section 2.7 Rule 144 Reporting. With a view to making available the benefits of Rule 144 promulgated under the Securities Act and any comparable provision of Applicable Securities Law that may at any time permit the sale of the Registrable Securities to the public without registration, the Company agrees to:

- (a) make and keep public information available, as those terms are understood and defined in Rule 144 under the Securities Act; and
- (b) use reasonable best efforts to file with the Commission in a timely manner all reports and other documents required of the Company under Applicable Securities Law, and to furnish to any Holder, upon request by such Holder, a written statement by the Company as to whether it has complied with the current public information requirements of Rule 144 under the Securities Act.

Section 2.8 **Lock-Up Agreements**. In connection with the registration pursuant to this Agreement of any of the Holders' Registrable Securities in an underwritten public offering (other than a registration that counts as a Demand Registration), if the managing underwriter advises the Company and the Holders participating in the registration hereunder in writing that, in its good faith judgment, the Holders need to enter into a lock up agreement with respect to securities held by the Holders of the Company (other than the Registrable Securities covered by such Registration Statement), the Holders agree to enter into a customary lock up agreement with respect to the securities held by the Holders of the Company (other than the Registrable Securities covered by such Registration Statement).

Section 3.4 **Waiver**. Any of the terms or conditions of this Agreement which may be lawfully waived may be waived in writing at any time by each party entitled to the benefits thereof. Any waiver of any of the provisions of this Agreement by any party hereto shall be binding only if set forth in an instrument in writing signed on behalf of such party. No failure to enforce any provision of this Agreement shall be deemed to or shall constitute a waiver of such provision and no waiver of any of the provisions of this Agreement shall be deemed to or shall constitute a waiver of any other provision hereof (whether or not similar) nor shall such waiver constitute a continuing waiver.

4. COVENANT TO VOTE

(a) During the Voting Period, at every meeting of the stockholders of the Company called, and at every adjournment or postponement thereof, and on every action or approval by written consent of the stockholders of the Company, each Stockholder (in such Stockholder's capacity as such) shall appear at the meeting or otherwise cause the Voting Shares held beneficially or of record by such Stockholder to be present thereat for purposes of establishing a quorum to the fullest extent not inconsistent with all of the voting requirements set forth in Section 3. (b) Each Stockholder acknowledges and agrees that if such Stockholder attempts to vote or cause the voting of any of the Voting Shares other than in compliance with this Agreement, the Company shall not, and each Stockholder hereby unconditionally and irrevocably instructs the Company not to, record such vote, in each case unless and until such Stockholder shall have complied with the terms of this Agreement.

(c) Except as otherwise permitted by this Agreement or by order of a court of competent jurisdiction, during the Voting Period each Stockholder will not commit any act that prevents such Stockholder from voting all of the Voting Shares then owned of record or beneficially by such Stockholder in accordance with this Agreement or otherwise prevents or disables such Stockholder from performing any of such Stockholders obligations under this Agreement; provided, that Mr. Sun may pledge, assign or transfer up to 50% of his Voting Shares in connection with bona fide margin loans or other secured financing transactions provided such Voting Shares otherwise remain subject to the restrictions herein in all respects. Without limiting the generality of the foregoing, except for this Agreement and as otherwise permitted or required by this Agreement, during the Voting Period no Stockholder may enter into any voting agreement with any person or entity with respect to any of the Voting Shares, grant any person or entity any proxy (revocable or irrevocable) or power of attorney with respect to any of the Voting Shares, deposit any of the Voting Shares in a voting trust, or otherwise enter into any similar agreement or arrangement with any person or entity limiting or affecting such Stockholder's legal power,

(b) Each Stockholder represents to the other Stockholders and to the Grantee that any proxies heretofore given in respect of the Voting Shares that may still be in effect are revocable, and such proxies are hereby revoked.

(c) Each Grantor hereby affirms that the irrevocable proxy set forth in this Section 5 is given in connection with the execution of the Combination Agreement, and that such irrevocable proxy is given to secure the performance of the duties of each Grantor under this Agreement. Each Grantor hereby further affirms that the irrevocable proxy is coupled with an interest and may under no circumstances be revoked. Each Grantor hereby ratifies and confirms all that such irrevocable proxy may lawfully do or cause to be done by virtue hereof. Such irrevocable proxy is executed and intended to be irrevocable in accordance with the provisions of Section 212 of the Delaware General Corporation Law. Notwithstanding this Section 5(c), the proxy granted by each Grantor shall be revoked upon the Termination Date without any further action of the Grantor or the Grantee.

(d) The Grantees may not exercise this irrevocable proxy on any other matter except as provided above. The Company may terminate the proxy held by it or any of its officers with respect to a Grantor at any time at its sole election by written notice provided to the Grantor.

(3) The arbitrators shall decide any dispute submitted by the parties to the arbitration strictly in accordance with the substantive laws of New York and shall not apply any other substantive law.

(4) Each party hereto shall cooperate with the other in making full disclosure of and providing complete access to all information and documents requested by the others in connection with such arbitration proceedings, subject only to any confidentiality obligations binding on such party.

(5) The award of the arbitration tribunal shall be final and binding upon the disputing parties, and the prevailing party or parties may apply to a court of competent jurisdiction for enforcement of such award.
