UNITED STATES
SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-K

(Mark One)

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2012

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number 1-2116

ARMSTRONG WORLD INDUSTRIES, INC.

(Exact name of registrant as specified in its charter)

Pennsylvania
(State or other jurisdiction of
incorporation or organization)

23-0366390
(I.R.S. Employer
Identification No.)

2500 Columbia Avenue, Lancaster, Pennsylvania
(Address of principal executive offices)

17603
(Zip Code)

Registrant's telephone number, including area code (717) 397-0611

Securities registered pursuant to Section 12(b) of the Act: None

Securities registered pursuant to Section 12(g) of the Act:

Title of each class

Common Stock (\$0.01 par value)

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act.

Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months, and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter time period that the registrant was required to submit and post such files). Yes No

Table of Contents

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act (Check one):

Large accelerated filer Accelerated filer
Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act).

Yes No

The aggregate market value of the Common Stock of Armstrong World Industries, Inc. held by non-affiliates based on the closing price (\$49.16 per share) on the New York Stock Exchange (trading symbol AWI) on June 29, 2012 was approximately \$651 million. As of February 19, 2013, the number of shares outstanding of registrant's Common Stock was 59,062,661.

Documents Incorporated by Reference

Certain sections of Armstrong World Industries, Inc.'s definitive Proxy Statement for use in connection with its 2013 annual meeting of shareholders, to be filed no later than April 30, 2013 (the first business day after the day that is 120 days after the last day of our 2012 fiscal year), are incorporated by reference into Part III of this Form 10-K Report where indicated.

CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

Certain statements in this Annual Report on Form 10-K and the documents incorporated by reference may constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Those forward-looking statements are subject to various risks and uncertainties and include all statements that are not historical statements of fact and those regarding our intent, belief or expectations, including, but not limited to, our expectations concerning our residential and commercial markets and their effect on our operating results; our expectations regarding the payment of dividends, and our ability to increase revenues, earnings and EBITDA (as such terms are defined by documents incorporated by reference herein). Words such as anticipate, expect, intend, plan, target, project, predict, believe, may, will, should, seek, estimate and similar expressions are intended to identify such forward-looking statements. These statements are based on management's current expectations and beliefs and are subject to a number of factors that could lead to actual results materially different from those described in the forward-looking statements. Although we believe that the assumptions underlying the forward-looking statements are reasonable, we can give no assurance that our expectations will be attained. Factors that could have a material adverse effect on our operations and future prospects or which could cause actual results to differ materially from our expectations include, but are not limited to:

global economic conditions including inflation, deflation, interest rates, availability of capital, consumer spending rates, energy availability and costs, and the effects of governmental initiatives to manage economic conditions;

the risk that downturns in construction activity could adversely affect our business and results of operations;

the risk that our indebtedness and degree of leverage could adversely affect our cash flow and our ability to operate our business, make payments on our indebtedness and declare dividends on our capital stock;

the possibility that a number of covenants contained in the agreements that govern our indebtedness, impose significant operating and financial restrictions on our business;

the possibility that our indebtedness may increase our vulnerability to negative unforeseen events;

the effect of our indebtedness on our liquidity;

our ability to generate sufficient cash flow from operations to fund our needs and remain in compliance with our debt covenants;

the risk that the availability of raw materials and energy decreases or that the costs of these materials increase and we are unable to pass along the increased costs;

the possibility that competition can reduce demand for our products or cause us to lower prices;

the risk that we may lose sales to one of our major customers;

the risk that the costs of construction and operation of our new manufacturing plants may exceed our projections;

Edgar Filing: ARMSTRONG WORLD INDUSTRIES INC - Form 10-K

the risk that adverse judgments in regulatory actions, product claims, environmental claims and other litigation may not be covered by insurance in all circumstances;

the risk that our intellectual property rights may not provide meaningful commercial protection for our products or brands;

Table of Contents

integration obstacles or costs associated with the pursuit or consummation of strategic transactions;

the risk that our restructuring actions and LEAN initiatives may not achieve expected savings in our operating costs or improve operating results;

the risk of changes in foreign currency exchange rates, interest rates and commodity prices;

changes in the political, regulatory and business environments of our international markets, including changes in trade regulations;

the risk that increased costs of labor, labor disputes, work stoppages or union organizing activity could delay or impede production and reduce sales and profits;

the risk that our decision to outsource our information technology infrastructure and certain finance and accounting functions will make us more dependent upon third parties;

the risk that our principal shareholders could significantly influence our management and our affairs;

the cost and difficulty of complying with increasing and evolving regulation; and

other risks detailed from time to time in our filings with the Securities and Exchange Commission (the "SEC"), press releases and other communications, including those set forth under "Risk Factors" included elsewhere in this Annual Report on Form 10-K and in the documents incorporated by reference.

Such forward-looking statements speak only as of the date they are made. We expressly disclaim any obligation to release publicly any updates or revisions to any forward-looking statements to reflect any change in our expectations with regard thereto or change in events, conditions or circumstances on which any statement is based.

Table of Contents

PART I

ITEM 1. BUSINESS

Armstrong World Industries, Inc. (*AWI* or the *Company*) is a Pennsylvania corporation incorporated in 1891. When we refer to *we*, *our* and *us* in this report, we are referring to *AWI* and its subsidiaries. We are a leading global producer of flooring products and ceiling systems for use primarily in the construction and renovation of residential, commercial and institutional buildings. We design, manufacture and sell flooring products (primarily resilient and wood) and ceiling systems (primarily mineral fiber, fiberglass and metal) around the world.

The Armstrong World Industries, Inc. Asbestos Personal Injury Settlement Trust (*Asbestos PI Trust*) and Armor TPG Holdings LLC (*TPG*) together hold more than 50% of *AWI*'s outstanding shares and have a shareholders' agreement pursuant to which they agree to vote their shares together on certain matters. During the fourth quarter of 2012, the Asbestos PI Trust and TPG together sold 5,980,000 of their shares in a secondary public offering. The Company itself did not sell any shares and did not receive any proceeds from the offering, and the total number of common shares outstanding did not change as a result of the offering.

Reportable Segments

We operate four business segments: Building Products, Resilient Flooring, Wood Flooring and Unallocated Corporate. See Note 3 to the Consolidated Financial Statements and Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations of this Form 10-K for additional financial information on our reportable segments.

Markets

We are well positioned in the industry segments and markets in which we operate, often holding a leadership or significant market share position. The major markets in which we compete are:

North American Residential. Our Building Products, Resilient Flooring and Wood Flooring segments sell products for use in the home. Our ceiling products compete against mineral fiber and fiberglass products from other manufacturers, as well as drywall. Homeowners can choose from our vinyl and wood flooring products, for which we are North America's largest provider, or from our laminate flooring products. We compete directly with other domestic and international suppliers of these products. Our flooring products also compete with carpet and ceramic products, which we do not offer.

Our products are used in new home construction and existing home renovation work. Industry analysts estimate that existing home renovation (also known as replacement / remodel) work represents approximately two-thirds of the total North American residential market opportunity. Key U.S. statistics that indicate market opportunity include existing home sales (a key indicator for renovation opportunity), housing starts, housing completions, home prices, interest rates and consumer confidence. For our Resilient Flooring and Wood Flooring products, we believe there is some longer-term correlation between these statistics and our revenue after reflecting a lag period between change in construction activity and our operating results of several months. However, we believe that consumers' preferences for product type, style, color, availability and affordability also significantly affect our revenue. Further, changes in inventory levels and/or product focus at national home centers and our building materials distributors can significantly affect our revenue. Sales of our ceiling products for residential use appear to follow the trend of existing home sales, with a several month lag period between the change in existing home sales and our related operating results.

North American Commercial. Many of our products, primarily ceilings and Resilient Flooring, are used in commercial and institutional buildings. Our revenue opportunities come from new construction as well as renovation of existing buildings. Renovation work is estimated to represent approximately two-thirds of the total North American commercial market opportunity. Most of our revenue comes from four major segments of commercial building: office, education, retail and healthcare. We monitor U.S. construction starts and follow new projects. Our revenue from new construction can lag behind construction starts by as much as one year. We also monitor office vacancy rates, gross domestic product (*GDP*) and general employment levels, which can indicate movement in renovation and new construction opportunities. We

Table of Contents

believe that these statistics, taking into account the time-lag effect, provide a reasonable indication of our future revenue opportunity from commercial renovation and new construction.

Outside of North America. Most of our revenues generated outside of North America are in Europe and almost all are commercial in nature. For the countries in which we have significant revenue, we monitor various national statistics (such as GDP) as well as known new projects. Revenues come primarily from new construction and renovation work.

The following table provides an estimate of our segments' 2012 net sales, by major markets.

(Estimated percentages of

individual segment's sales)	North American Residential		North American Commercial		Outside of North America		Total
	New	Renovation	New	Renovation	New	Renovation	
Building Products		5%	10%	45%	25%	15%	100%
Resilient Flooring	5%	30%	5%	30%	15%	15%	100%
Wood Flooring	35%	65%					100%

Management has used estimates in creating the table above because the end-use of our products is not easily determinable.

Geographic Areas

See Note 3 to the Consolidated Financial Statements and Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations of this Form 10-K for additional financial information by geographic areas.

Customers

We use our reputation, capabilities, service and brand recognition to develop long-standing relationships with our customers. We principally sell products through building materials distributors, who re-sell our products to retailers, builders, contractors, installers and others. In the commercial sector, we also sell to several contractors and to subcontractors' alliances. In the North American retail channel, which sells to end-users in the residential and light commercial segments, we have important relationships with national home centers such as The Home Depot, Inc. and Lowe's Companies, Inc. In the North American residential sector, we have important relationships with major home builders and buying groups.

Approximately two-thirds of our consolidated net sales are to distributors. Sales to large home centers account for approximately 15% of our sales in the Americas. Our remaining sales are to contractors and retailers.

No customer accounted for 10% or more of our total consolidated net sales during the last three years.

Working Capital

We produce goods for inventory and sell on credit to our customers. Generally, our distributors carry inventory as needed to meet local or rapid delivery requirements. We sell the vast majority of our products to select, pre-approved customers using customary trade terms that allow for payment in the future. These practices are typical within the industry.

Competition

We face strong competition in all of our businesses. Principal attributes of competition include product performance, product styling, service and price. Competition in North America comes from both domestic and international manufacturers. Additionally, some of our products compete with alternative products or finishing solutions. Our resilient, laminate and wood flooring products compete with carpet and ceramic products, and our ceiling products compete with drywall and exposed structure (also known as open plenum). There is excess industry capacity for certain products in some geographies, which tends to increase price competition. The following companies are our primary competitors:

Table of Contents

Building Products CertainTeed Corporation (a subsidiary of Saint-Gobain), Chicago Metallic Corporation, Georgia-Pacific Corporation, Knauf AMF GmbH & Co. KG, Lafarge SA, Odenwald Faserplattenwerk GmbH, Rockfon A/S, Saint-Gobain and USG Corporation.

Flooring segments Beaulieu International Group, N.V., Boa-Franc, Inc., Congoleum Corporation, Faus, Inc., Forbo Holding AG, Gerflor Group, Interface, Inc., IVC Group, Krono Holding AG, LG Floors, Mannington Mills, Inc., Metroflor Corporation, Mohawk Industries, Inc., Mullican Flooring, L.P., Nora Systems GmbH, Pfeleiderer AG, Shaw Industries, Inc., Somerset Hardwood Flooring, and Tarkett AG.

Raw Materials

We purchase raw materials from numerous suppliers worldwide in the ordinary course of business. The principal raw materials used in each business include the following:

Business	Principal Raw Materials
Building Products	Mineral fibers, fiberglass, perlite, waste paper, pigments, clays, starches, and steel used in the production of metal ceilings and for our WAVE joint venture's manufacturing of ceiling grid
Resilient Flooring	Polyvinylchloride (PVC) resins and films, plasticizers, backings, limestone, pigments, linseed oil, inks and stabilizers
Wood Flooring	Hardwood lumber, veneer, coatings and stains

We also purchase significant amounts of packaging materials and consume substantial amounts of energy, such as electricity and natural gas, and water.

In general, adequate supplies of raw materials are available to all of our businesses. However, availability can change for a number of reasons, including environmental conditions, laws and regulations, shifts in demand by other industries competing for the same materials, transportation disruptions and/or business decisions made by, or events that affect, our suppliers. There is no assurance that these raw materials will remain in adequate supply to us.

Prices for certain high usage raw materials can fluctuate dramatically. Cost increases for these materials can have a significant adverse impact on our manufacturing costs. Given the competitiveness of our markets, we may not be able to recover the increased manufacturing costs through increasing selling prices to our customers.

Sourced Products

Some of the products that we sell are sourced from third parties. Our primary sourced products include various flooring products (laminated, wood, vinyl sheet and tile), specialized ceiling products, and installation-related products and accessories for some of our manufactured products. We purchase some of our sourced products from suppliers that are located outside of the U.S., primarily from Asia and Europe. Sales of sourced products represented approximately 15% of our total consolidated revenue in each of 2012, 2011, and 2010.

In general, we believe we have adequate supplies of sourced products. However, we cannot guarantee that the supply will remain adequate.

Seasonality

Generally our sales tend to be stronger in the second and third quarters of our fiscal year following the timing of renovation, home sales and new construction.

Patent and Intellectual Property Rights

Patent protection is important to our business. Our competitive position has been enhanced by U.S. and foreign patents on products and processes developed or perfected within AWI or obtained through

Table of Contents

acquisitions and licenses. In addition, we benefit from our trade secrets for certain products and processes.

Patent protection extends for varying periods according to the date of patent filing or grant and the legal term of a patent in the various countries where patent protection is obtained. The actual protection afforded by a patent, which can vary from country to country, depends upon the type of patent, the scope of its coverage and the availability of legal remedies. Although we consider that, in the aggregate, our patents, licenses and trade secrets constitute a valuable asset of material importance to our business, we do not regard any of our businesses as being materially dependent upon any single patent or trade secret, or any group of related patents or trade secrets.

Certain of our trademarks, including without limitation, , Armstrong®, Alterna , American Scrape ,Arteffe®,Bruce®, Cirrus®, Cortega®, Dundee , DLW , Dune , Exc@l@nt Fine Fissured , FireGuard , ImperfaInitiator , Laurel , Lock & FofdLuxe Plank , Manchest®, Marmorette , Medintech®, Medintone®, Memories , MetalWorks , Natural CreationsNaturCote , Optima®, Plano , Scafa®, SoundSoak®, Stonetex®, Station Square , StrataMa®, Timberline®, ToughGuard®, Ultima®, and WoodWorks®, are important to our business because of their significant brand name recognition. Trademark protection continues in some countries as long as the mark is used, and continues in other countries as long as the mark is registered. Registrations are generally for fixed, but renewable, terms.

We review the carrying value of trademarks annually for potential impairment. See the Critical Accounting Estimates section of Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations of this Form 10-K for further information.

Employees

As of December 31, 2012, we had approximately 8,500 full-time and part-time employees worldwide. Approximately 54% of the production and maintenance employees in the U.S. are represented by labor unions. This percentage includes all production and maintenance employees at our plants and warehouses where labor unions exist. Outside the U.S., most of our production employees are covered by either industry-sponsored and/or state-sponsored collective bargaining mechanisms. We believe that our relations with our employees are satisfactory.

Research & Development

Research and development (R&D) activities are important and necessary in helping us improve our products competitiveness. Principal R&D functions include the development and improvement of products and manufacturing processes. We spent \$30.3 million in 2012, \$29.2 million in 2011 and \$32.9 million in 2010 on R&D activities worldwide.

Sustainability and Environmental Matters

The adoption of environmentally responsible building codes and standards such as the Leadership in Energy and Environmental Design, or LEED, rating system established by the U.S. Green Building Council, has the potential to increase demand for products, systems and services that contribute to building sustainable spaces. Many of our products meet the requirements for the award of LEED credits, and we are continuing to develop new products, systems and services to address market demand for products that enable construction of buildings that require fewer natural resources to build, operate and maintain. Our competitors also have developed and introduced to the market more environmentally responsible products.

We expect that there will be increased demand over time for products, systems and services that meet regulatory and customer sustainability standards and preferences and decreased demand for products that produce significant greenhouse gas emissions. We also believe that our ability to continue to provide these products, systems and services to our customers will be necessary to maintain our competitive position in the marketplace.

We are committed to complying with all environmental laws and regulations that are applicable to our operations. Regulatory activities of particular importance to our operations include proceedings under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), and state or international Superfund and similar type environmental laws governing several domestically- and

Table of Contents

internationally-owned, formerly owned and non-owned locations allegedly resulting from past industrial activity. In a few cases, we are one of several potentially responsible parties (PRPs) and have agreed to jointly fund the required investigation and remediation, while preserving our defenses to the liability. We may also have rights of contribution or reimbursement from other parties or coverage under applicable insurance policies. Most of our manufacturing and certain of our research facilities are affected by various federal, state and local environmental requirements relating to the discharge of materials or the protection of the environment. We make expenditures necessary for compliance with applicable environmental requirements at each of our operating facilities.

We have not experienced a material adverse effect upon our capital expenditures or competitive position as a result of environmental control legislation and regulations. Liabilities of \$10.7 million and \$7.3 million at December 31, 2012 and December 31, 2011, respectively, were recorded for potential environmental liabilities, on a global basis, that we consider probable and for which a reasonable estimate of the probable liability could be made. See Note 31 to the Consolidated Financial Statements and Item 1A. Risk Factors of this Form 10-K, for information regarding the possible effects that compliance with environmental laws and regulations may have on our businesses and operating results.

Website

We maintain a website at <http://www.armstrong.com>. Information contained on our website is not incorporated into this document. These materials are also available from the SEC's website at www.sec.gov.

Table of Contents

ITEM 1A. RISK FACTORS

Worldwide economic conditions and credit tightening could have a material adverse impact on our business.

Our business may be adversely impacted by changes in United States or global economic conditions, including inflation, deflation, interest rates, availability of capital, consumer spending rates, energy availability and costs, and the effects of governmental initiatives to manage economic conditions. Volatility in financial markets and the deterioration of national and global economic conditions could materially adversely impact our operations, financial results and/or liquidity including as follows:

the financial stability of our customers or suppliers may be compromised, which could result in additional bad debts for us or non-performance by suppliers;

one or more of the lenders under our senior secured credit facility may cease to be able to fulfill their funding obligations, which could adversely impact our liquidity;

it may become more costly or difficult to obtain financing or refinance our debt in the future;

the value of our assets held in pension plans may decline; and/or

our assets may be impaired or subject to write down or write off.

Uncertainty about global economic conditions may cause commercial and residential consumers of our products to postpone spending in response to tighter credit, negative financial news and/or declines in income or asset values. This could have a material adverse impact on the demand for our products and on our financial condition and operating results. A deterioration of economic conditions would likely exacerbate and prolong these adverse effects.

Our business is dependent on construction activity. Downturns in construction activity could adversely affect our business and results of operations.

Our businesses have greater sales opportunities when construction activity is strong and, conversely, have fewer opportunities when such activity declines. The cyclical nature of commercial and residential construction activity, including construction activity funded by the public sector, tends to be influenced by prevailing economic conditions, including favorable interest rates, strong government spending, consumer confidence and other factors beyond our control. Prolonged downturns in construction activity could have an adverse effect on our business, profitability, and the carrying value of assets.

Our indebtedness may adversely affect our cash flow and our ability to operate our business, make payments on our indebtedness and declare dividends on our capital stock.

Our level of indebtedness and degree of leverage could:

make it more difficult for us to satisfy our obligations with respect to our indebtedness;

make us more vulnerable to adverse changes in general economic, industry and competitive conditions and adverse changes in government regulation;

Edgar Filing: ARMSTRONG WORLD INDUSTRIES INC - Form 10-K

limit our flexibility in planning for, or reacting to, changes in our business and the industry in which we operate;

place us at a competitive disadvantage compared to our competitors that are less leveraged and therefore more able to take advantage of opportunities that our leverage prevents us from exploiting;

Table of Contents

limit our ability to refinance existing indebtedness or borrow additional amounts for working capital, capital expenditures, acquisitions, debt service requirements, execution of our business strategy or other purposes;

restrict our ability to pay dividends on our capital stock; and

adversely affect our credit ratings.

We may also incur additional indebtedness, which could exacerbate the risks described above. In addition, to the extent that our indebtedness bears interest at floating rates, our sensitivity to interest rate fluctuations will increase.

Any of the above listed factors could materially adversely affect our business, financial condition and results of operations.

The agreements that govern our indebtedness contain a number of covenants that impose significant operating and financial restrictions, including restrictions on our ability to engage in acts that may be in our best long-term interests.

The agreements that govern our indebtedness include covenants that, among other things, may restrict our ability to:

incur additional debt;

pay dividends on or make other distributions in respect of our capital stock or redeem, repurchase or retire our capital stock or subordinated debt or make certain other restricted payments;

make certain acquisitions;

sell certain assets;

consolidate, merge, sell or otherwise dispose of all or substantially all of our assets; and

create liens on certain assets to secure debt.

Under the terms of our senior secured credit facility, we are required to maintain specified leverage and interest coverage ratios. Our ability to meet such ratios could be affected by events beyond our control, and we cannot assure that we will meet such ratios. A breach of any of the restrictive covenants or leverage ratio would result in a default under the senior secured credit facility. If any such default occurs, the lenders under the senior secured credit facility may be able to elect to declare all outstanding borrowings under such facilities, together with accrued interest and other fees, to be immediately due and payable, or enforce their security interest, any of which would result in an event of default under the notes. The lenders may also have the right in these circumstances to terminate any commitments they have to provide further borrowings.

We require a significant amount of liquidity to fund our operations, and borrowing has increased our vulnerability to negative unforeseen events.

Our liquidity needs vary throughout the year. If our business experiences materially negative unforeseen events, we may be unable to generate sufficient cash flow from operations to fund our needs or maintain sufficient liquidity to operate and remain in compliance with our debt covenants, which could result in reduced or delayed planned capital expenditures and other investments and adversely affect our future revenue prospects.

Table of Contents

If the availability of raw materials or energy decreases, or the costs increase, and we are unable to pass along increased costs, our operating results could be adversely affected.

The cost and availability of raw materials, packaging materials, energy and sourced products are critical to our operations. For example, we use substantial quantities of natural gas, petroleum-based raw materials, and hardwood lumber in our manufacturing operations. The cost of some of these items has been volatile in recent years and availability has been limited at times. We source some materials from a limited number of suppliers, which, among other things, increases the risk of unavailability. Limited availability could cause us to reformulate products or limit our production. Decreased access to raw materials and energy or significant increased production cost differentials and any corresponding inability to pass along such costs through price increases could have a material adverse effect on our business, financial condition and operating results.

Our markets are highly competitive. Competition can reduce demand for our products or cause us to lower prices. Failure to compete effectively by meeting consumer preferences and maintaining market share would adversely affect our results.

Our customers consider our products' performance, product styling, customer service and price when deciding whether to purchase our products. Shifting consumer preference in our highly competitive markets, from residential vinyl products to other flooring products, for example, styling preferences or inability to offer new competitive performance features could have an adverse effect on our sales. In addition, excess industry capacity exists for certain products in several geographic markets, which tends to increase price competition, as does competition from overseas competitors with lower cost structures.

Sales fluctuations to key customers could have a material adverse effect on our revenues and profits.

Some of our businesses are dependent on a few key customers. The loss of sales to one of these major customers, or any adverse change in our business relationship with any one of them, could have an adverse affect on both our revenues and profits.

Our plant construction projects may adversely impact our results.

We are in various stages of building new manufacturing plants. There can be no assurance that the actual cost of these facilities will not exceed our projections. In addition, we may experience delays in the construction of these facilities for many reasons, including unavailability of materials, labor or equipment, regulatory matters or inclement weather. Economic and competitive advantages expected from these projects may not fully materialize as a result of delays, cost overruns or changes in market conditions.

Adverse judgments in regulatory actions, product claims, environmental claims and other litigation could be costly. Insurance coverage may not be available or adequate in all circumstances.

While we strive to ensure that our products comply with applicable government regulatory standards and internal requirements, and that our products perform effectively and safely, customers from time to time could claim that our products do not meet warranty or contractual requirements, and users could claim to be harmed by use or misuse of our products. These claims could give rise to breach of contract, warranty or recall claims, or claims for negligence, product liability, strict liability, personal injury or property damage. They could also result in negative publicity that could harm our sales and operating results.

The building materials industry has been subject to claims relating to raw materials such as silicates, PCBs, PVC, formaldehyde, fire-retardants and claims relating to other issues such as mold and toxic fumes, as well as claims for incidents of catastrophic loss, such as building fires. We have not received any significant claims involving our raw materials or our product performance, however, product liability insurance coverage may not be available or adequate in all circumstances to cover any such claims that may arise in the future.

Table of Contents

We are parties to several legal proceedings involving environmental matters (see Note 31 to the consolidated financial statements included in this Form 10-K), and we have incurred, and will continue to incur, capital and operating expenditures and other costs necessary to comply with environmental laws and regulations. It is possible that we could become subject to additional environmental liabilities in the future.

We are also subject to regulatory requirements regarding protection of the environment. Current and future environmental laws and regulations, including those proposed concerning climate change, could increase our cost of compliance, cost of energy, or otherwise materially adversely affect our business, results of operations and financial condition.

In addition, claims and investigations may arise related to patent infringement, distributor relationships, commercial contracts, antitrust or competition law requirements, employment and employee benefits issues, and other compliance and regulatory matters. While we have processes and policies designed to mitigate these risks and to investigate and address such claims as they arise, we cannot predict or, in some cases, control the costs to defend or resolve such claims.

Income taxes can have an unanticipated effect on our financial results.

Our business is subject to income taxes in the United States and many foreign jurisdictions. Because our income tax expense for any period depends heavily on the mix of income derived from the various taxing jurisdictions, our income tax expense and reported net income may fluctuate significantly, and may be materially different than forecasted or experienced in the past.

Moreover, changes in, or interpretations of, tax laws and regulations (including laws related to the remittance of foreign earnings), could also have a significant adverse effect on our profitability and financial condition.

Under provision of the Internal Revenue Code, the utilization of a U.S. corporation's deferred tax assets may be limited following a change in ownership, as defined in the Internal Revenue Code. There have been no ownership changes as defined in the Internal Revenue Code subsequent to our bankruptcy emergence. Future ownership changes could have an impact on our ability to utilize the deferred tax assets.

Our intellectual property rights may not provide meaningful commercial protection for our products or brands, which could adversely impact our business.

We rely on our proprietary intellectual property, including numerous patents and registered trademarks, as well as our licensed intellectual property. We monitor and protect against activities that might infringe, dilute, or otherwise harm our patents, trademarks and other intellectual property and rely on the patent, trademark and other laws of the United States and other countries. However, we may be unable to prevent third parties from using our intellectual property without our authorization. In addition, the laws of some non-United States jurisdictions, particularly those of certain emerging markets, provide less protection for our proprietary rights than the laws of the United States. To the extent we cannot protect our intellectual property, unauthorized use and misuse of our intellectual property could harm our competitive position and have a material adverse impact on our business, financial condition and results of operations.

We may pursue strategic transactions that could create risks and present unforeseen integration obstacles or costs, any of which could materially adversely affect our business.

We have evaluated, and expect to continue to evaluate, potential strategic transactions from time to time as those opportunities arise. We routinely engage in discussions with third parties regarding potential acquisitions that could be significant. Any such strategic transactions involve a number of risks, including potential disruption of our ongoing business and distraction of management, difficulty with integrating personnel and operating infrastructure, and increasing the scope, geographic diversity and complexity of our operations. Strategic transactions could involve payment by us of a substantial amount of cash, incurrence of a substantial amount of debt or issuance of a substantial amount of equity. Certain acquisition opportunities may not result in the consummation of a transaction or may fail to realize the intended

Table of Contents

benefits and synergies. If we fail to consummate and integrate our acquisitions in a timely and cost-effective manner, our business could be materially and adversely affected.

Our restructuring actions and LEAN initiatives may not achieve expected savings in our operating costs or improved operating results.

We aggressively look for ways to make our operations more efficient and effective. We reduce, move and expand our plants and operations as needed. Such actions involve substantial planning, often require capital investments and may result in charges for fixed asset impairments or obsolescence and substantial severance costs. We are committed to augmenting margin expansion through further productivity enhancements and cost elimination. However, there can be no assurance that we will be able to achieve our desired level of profit improvement. Even if we achieve our targeted goals, there is no assurance that our net operating results in the future will improve by the desired amount. Planning and executing delays or challenges could adversely affect our customer service and result in unplanned costs.

We are subject to risks associated with our international operations in both established and emerging markets. Legislative, political, regulatory and economic volatility, as well as vulnerability to infrastructure and labor disruptions, could have an adverse effect on our business.

A significant portion of our products move in international trade, particularly among the U.S., Canada, Europe and Asia markets. Approximately 30% of our revenues were from operations outside the U.S. and Canada in 2012 (see Note 3 to the Consolidated Financial Statements included in this Form 10-K). Our international trade is subject to currency exchange fluctuations, trade regulations, import duties, logistics costs, delays and other related risks. Our international operations are also subject to variable tax rates, credit risks in emerging markets, political risks, uncertain legal systems, high costs in repatriating profits to the U.S. from some countries, and loss of sales to local competitors following currency devaluations in countries where we import products for sale. In addition, our international growth strategy depends in part on our ability to expand our operations in certain emerging markets. However, some emerging markets have greater political and economic volatility and greater vulnerability to infrastructure and labor disruptions than established markets. In many countries outside of the U.S., particularly in those with developing economies, it may be common for others to engage in business practices prohibited by laws and regulations applicable to us, such as the Foreign Corrupt Practices Act or similar local anti-bribery laws. These laws generally prohibit companies and their employees, contractors or agents from making improper payments to government officials for the purpose of obtaining or retaining business. Failure to comply with these laws could subject us to civil and criminal penalties. As we continue to expand our business globally, including in emerging markets, we may have difficulty anticipating and effectively managing these and other risks that our international operations may face, which may adversely impact our business outside the United States and our financial condition and results of operations.

Increased costs of labor, labor disputes, work stoppages or union organizing activity could delay or impede production and reduce sales and profits.

Increased costs of U.S. and international labor, including the costs of employee benefits plans, could adversely affect our financial results and operations. As the majority of our manufacturing employees are represented by unions and covered by collective bargaining or similar agreements, there are also costs attributable to our periodic renegotiation of those agreements. We are also subject to the risk that strikes or other types of conflicts with organized personnel may arise or that we may become the subject of union organizing activity at our facilities that do not have union representation. Prolonged negotiations, conflicts or related activities could lead to increased costs and work stoppages, which could adversely affect production, revenues, profits and customer relations.

Table of Contents

We outsource our information technology infrastructure and certain finance and accounting functions, which makes us more dependent upon third parties.

In an effort to make our IT, finance and accounting functions more efficient, increase related capabilities, as well as generate cost savings, we outsource a significant portion of our IT infrastructure and certain finance and accounting functions to separate third party service providers. As a result, we rely on third parties to ensure that our related needs are sufficiently met. This reliance subjects us to risks arising from the loss of control over certain processes, changes in pricing that may affect our operating results, and potentially, termination of provisions of these services by our suppliers. A failure of our service providers to perform may have a significant adverse effect on our business.

Concentration of ownership among our principal shareholders may prevent new investors from influencing significant corporate decisions.

The Asbestos PI Trust and TPG together own a majority of our common shares. Pursuant to a shareholders' agreement entered into by the Asbestos PI Trust and TPG, as amended effective as of November 5, 2012, the Asbestos PI Trust and TPG have agreed to vote their shares together on certain matters, including the nomination and election of twelve directors to our board of directors. Of the twelve directors, the Asbestos PI Trust has the right to designate two directors and TPG also has the right, subject to certain share ownership thresholds, to designate two directors.

Furthermore, the Asbestos PI Trust and TPG together are able to exercise influence over all matters requiring shareholder approval, including approval of significant corporate transactions and amendment of our amended and restated articles of incorporation, or the Articles, and amended bylaws, or the Bylaws, and have significant control over our management and policies. The interests of these shareholders may not be consistent with the interests of other shareholders. The existence of significant shareholders may also have the effect of deterring hostile takeovers, delaying or preventing changes in control or changes in management or limiting the ability of our other shareholders to approve transactions that they may deem to be in the best interests of our company. In addition, our Articles provide that Subchapter 25F of the Business Corporation Law of 1998 of the Commonwealth of Pennsylvania, or PBCL, which relate to business combinations with interested shareholders, does not apply to us.

Anti-takeover provisions of our organizational documents could prevent or delay a change in control of our company.

Certain provisions of our Articles and Bylaws may have the effect of discouraging, delaying or preventing a change in control of our company. A change of control could be proposed in the form of a tender offer or takeover proposal that might result in a premium over the market price for our common shares. In addition, these provisions could make it more difficult to bring about a change in the composition of our board of directors, which could result in entrenchment of current management. For example, our Articles and Bylaws:

permit special meetings of shareholders to be called only by shareholders holding at least 20% of voting shares;

establish advance notice procedures with respect to shareholder proposals and the nomination of candidates for election of directors, other than nominations made by, or at the direction of, our board of directors or by Asbestos PI Trust;

do not provide for cumulative voting in the election of directors;

require affirmative vote or written consent of the holders of at least 80% of our common shares to amend, alter or repeal certain provisions of our Articles regarding the number, terms of office and removal of directors, special meetings of shareholders, shareholder action by written consent and the rights of Asbestos PI Trust under the Articles;

Table of Contents

until no shareholder beneficially owns at least 20% of our common shares, require the affirmative vote of at least 80% of shareholders for changes to certain provisions of the Bylaws, including provisions concerning director independence, shareholder voting at special meetings and action by written consent, board size and appointments to our nominating and governance committee; and

authorize the issuance of undesignated preferred shares, or blank check preferred shares, by our board of directors without shareholder approval.

The existence of these provisions and other provisions of our organizational documents could limit the price that investors might be willing to pay in the future for our common shares. They could also deter potential acquirers of our company, thereby reducing the likelihood that shareholders could receive a premium for their common shares in any acquisition.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

Our world headquarters are in Lancaster, Pennsylvania. We own a 100-acre, multi-building campus comprising the site of our corporate headquarters, most of our operational headquarters, our U.S. R&D operations and marketing, and customer service headquarters.

We produce and market Armstrong products and services throughout the world, operating 32 manufacturing plants in eight countries as of December 31, 2012. Four of our plants are leased and the remaining 28 are owned. We operate 20 plants located throughout the United States. In addition, we have an interest through our WAVE joint venture in eight additional plants in six countries.

Business Segment	Number of Plants	Location of Principal Facilities
Building Products	13	U.S. (Florida, Georgia, Ohio, Oregon, Pennsylvania, and West Virginia), Austria, Canada, China, France, Germany and the U.K.
Resilient Flooring	10	U.S. (California, Illinois, Mississippi, Oklahoma, and Pennsylvania), Australia and Germany
Wood Flooring	9	U.S. (Arkansas, Kentucky, Mississippi, Missouri, Pennsylvania, Tennessee, and West Virginia) and China
Sales and administrative offices are leased and/or owned worldwide, and leased facilities are utilized to supplement our owned warehousing facilities.		

Production capacity and the extent of utilization of our facilities are difficult to quantify with certainty. In any one facility, utilization of our capacity varies periodically depending upon demand for the product that is being manufactured. We believe our facilities are adequate and suitable to support the business. Additional incremental investments in plant facilities are made as appropriate to balance capacity with anticipated demand, improve quality and service, and reduce costs.

ITEM 3. LEGAL PROCEEDINGS

See the Specific Material Events section of the Environmental Matters section of Note 31 to the Consolidated Financial Statements, which is incorporated herein by reference, for a description of our significant legal proceedings.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

Table of Contents**PART II****ITEM 5. MARKET FOR THE REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES**

AWI's common shares trade on the New York Stock Exchange under the ticker symbol AWI. As of February 19, 2013, there were approximately 400 holders of record of AWI's common stock.

	First	Second	Third	Fourth	Total Year
<u>2012</u>					
Price range of common stock high	\$ 59.78	\$ 49.97	\$ 50.00	\$ 54.98	\$ 59.78
Price range of common stock low	\$ 44.60	\$ 42.57	\$ 38.08	\$ 45.83	\$ 38.08
<u>2011</u>					
Price range of common stock high	\$ 47.53	\$ 48.37	\$ 48.68	\$ 45.96	\$ 48.68
Price range of common stock low	\$ 39.41	\$ 42.50	\$ 32.47	\$ 32.82	\$ 32.47

The above figures represent the high and low intra-day sale prices for our common stock as reported by the New York Stock Exchange.

On March 23, 2012, our Board of Directors declared a special cash dividend of \$8.55 per common share, or \$508 million in the aggregate, of which \$502.9 million was paid on April 10, 2012 to shareholders of record as of April 3, 2012. Payment of an additional \$1.5 million was made during the remainder of 2012. The unpaid portion of the dividend relates to unvested employee shares and units, and is reflected in current liabilities (\$1.6 million) and other long term liabilities (\$2.2 million) and will be paid when the underlying employee shares and units vest. There were no dividends declared during 2011.

Dividends are paid as and when declared by our Board of Directors and in accordance with restrictions set forth in our debt agreements. In general, our debt agreements allow us to make restricted payments, which include dividends and stock repurchases, subject to certain limitations and other restrictions and provided that we are in compliance with the financial and other covenants of our debt agreements and meet certain liquidity requirements after giving effect to the restricted payment. For further discussion of the debt agreements, see the financial condition and liquidity section of Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations and Item 1A. Risk Factors in this Form 10-K.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Armstrong World Industries, Inc. (AWI) is a Pennsylvania corporation incorporated in 1891.

This discussion should be read in conjunction with the financial statements, the accompanying notes, the cautionary note regarding forward-looking statements and risk factors included in this Form 10-K.

Overview

We are a leading global producer of flooring products and ceiling systems for use primarily in the construction and renovation of residential, commercial and institutional buildings. We design, manufacture and sell flooring products (primarily resilient and wood) and ceiling systems (primarily mineral fiber, fiberglass and metal) around the world.

In response to economic conditions during 2012, we closed two previously idled facilities: an engineered wood production facility in Statesville, NC, and a Building Products plant in Mobile, AL. Additionally, during the third quarter of 2012, we sold the assets of our wood flooring distribution (Patriot) and cabinets businesses. As of December 31, 2012, we operated 32 manufacturing plants in eight countries, including 20 plants located throughout the U.S.

Through Worthington Armstrong Venture (WAVE), our joint venture with Worthington Industries, Inc., we also have an interest in eight additional plants in six countries that produce suspension system (grid) products for our ceiling systems.

We report our financial results through the following segments: Building Products, Resilient Flooring, Wood Flooring, and Unallocated Corporate. See Results of Operations and Reportable Segment Results for additional financial information on our consolidated company and our segments.

Factors Affecting Revenues

For information on our segments' 2012 net sales by geography, see Note 3 to the Consolidated Financial Statements included in this Form 10-K.

Markets. We compete in building material markets around the world. The majority of our sales are in North America and Europe. We closely monitor macroeconomic trends that affect our business, including Gross Domestic Product, the Architecture Billings Index and the Consumer Confidence Index. During 2012, these macroeconomic benchmarks showed mixed results. In addition, we noted several factors and trends within our markets that directly affected our business performance during 2012, including:

North America

We noted softness in commercial markets, particularly education and healthcare as public spending remained constrained. In addition, we saw some regional weakness in the office market. These trends impacted both our Building Products and Resilient Flooring businesses, but with greater impact on Resilient Flooring as the majority of our commercial sales in Resilient Flooring originate from the education and healthcare markets.

We experienced mixed results in our residential markets as we saw continued improvements in builder activity while renovation activity remained soft. These trends impacted our Resilient and Wood Flooring businesses.

Europe

The overwhelming majority of our sales in Europe are to commercial markets in sectors dependent on public spending. Continued softness in commercial sectors, such as education and healthcare, and weak currency contributed significantly to sharp declines in Central and Western Europe, while Eastern European markets grew.

Table of Contents

Management's Discussion and Analysis of Financial Condition and Results of Operations

Pacific Rim

Our markets in China experienced mixed results. The office sector remained soft while the education and healthcare markets grew. A continued soft commercial construction market impacted our Resilient Flooring and Building Products businesses in Australia.

Pricing Initiatives. We periodically modify prices in each of our business segments in response to changes in costs for raw materials and energy, and to market conditions and the competitive environment. In certain cases, realized price increases are less than the announced price increases because of competitive reactions and changing market conditions. We estimate that pricing actions increased our 2012 total consolidated net sales by approximately \$27 million compared to 2011.

We have announced price increases in our ceilings and grid businesses in the Americas and in Europe that are effective in the first quarter of 2013. In response to rising lumber costs, we have also announced a price increase in our wood flooring business that is also effective in the first quarter of 2013. If raw material prices continue at, or rise from, current levels, additional pricing actions may be implemented.

Mix. Each of our businesses offers a wide assortment of products that are differentiated by style, design and performance attributes. Pricing and margins for products within the assortment vary. Changes in the relative quantity of products purchased at the different price points can impact year-to-year comparisons of net sales and operating income. We estimate that mix improvements increased our total consolidated net sales by approximately \$15 million in 2012, compared to 2011.

Factors Affecting Operating Costs

Operating Expenses. Our operating expenses are comprised of direct production costs (principally raw materials, labor and energy), manufacturing overhead costs, freight, costs to purchase sourced products and selling, general and administrative (SG&A) expenses.

Our largest individual raw material expenditures are for lumber and veneers, PVC resins and plasticizers. Natural gas is also a significant input cost. Fluctuations in the prices of these inputs are generally beyond our control and have a direct impact on our financial results. In 2012, the costs for raw materials, sourced products and energy negatively impacted operating income by approximately \$1 million, compared to 2011.

During 2011, we incurred approximately \$15 million of net costs related to the renegotiation of seven expiring collective bargaining agreements covering six plants (Beverly, WV, Oneida, TN, Marietta, PA, Lancaster, PA, Pensacola, FL, and Macon, GA) and the related lockout of our unionized employees at our Marietta, PA plant. We also incurred approximately \$4 million of additional net costs in the first quarter of 2012 related to the contract settlement with our employees at the Marietta, PA plant.

We are committed to augmenting margin expansion through cost elimination. Through manufacturing footprint reductions and aggressive application of projects designed to standardize, simplify and eliminate SG&A programs and policies, we undertook an effort to remove at least \$200 million of manufacturing and SG&A costs by the end of 2012. Toward this end, we achieved \$35 million of cost savings in 2010, \$115 million in savings in 2011, and delivered another \$63 million of cost savings during 2012. We recorded expenses of approximately \$28 million for these initiatives in 2012 and \$36 million in 2011. During the first quarter of 2012, we decided to close our previously idled Building Products plant in Mobile, AL. We also decided in the fourth quarter of 2012 to close our previously idled engineered wood plant in Statesville, NC. We will continue to evaluate the efficiency of our manufacturing footprint and may take additional actions in support of our cost and standardization initiatives. The charges associated with our cost reduction initiatives may include severance and related termination benefits, fixed asset write-downs, asset impairments and accelerated depreciation and could be material to our financial statements.

Intangible Asset Impairments. During the fourth quarter of 2010, we recorded non-cash impairment charges of \$22.4 million to reduce the carrying amount of our Wood Flooring trademarks to their estimated fair value. There were no impairment charges recorded related to these trademarks in 2012 or 2011. See Note 12 to the Consolidated Financial Statements for more information.

Table of Contents

Management's Discussion and Analysis of Financial Condition and Results of Operations

See also Results of Operations for further discussion of other significant items affecting operating costs.

Employees

As of December 31, 2012, we had approximately 8,500 full-time and part-time employees worldwide, compared to approximately 9,100 employees as of December 31, 2011. The decrease is primarily due to the divestiture of our cabinets business (approximately 800 employees), partially offset by crews added in our wood flooring plants and in our China plants under construction. During 2012, we negotiated a collective bargaining agreement covering approximately 100 employees at a resilient flooring plant.

CRITICAL ACCOUNTING ESTIMATES

In preparing our consolidated financial statements in accordance with U.S. generally accepted accounting principles (GAAP), we are required to make certain estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. We evaluate our estimates and assumptions on an on-going basis, using relevant internal and external information. We believe that our estimates and assumptions are reasonable. However, actual results may differ from what was estimated and could have a significant impact on the financial statements.

We have identified the following as our critical accounting estimates. We have discussed these critical accounting estimates with our Audit Committee.

U.S. Pension Credit and Postretirement Benefit Costs We maintain pension and postretirement plans throughout the world, with the most significant plans located in the U.S. Our defined benefit pension and postretirement benefit costs are developed from actuarial valuations. These valuations are calculated using a number of assumptions. Each assumption represents management's best estimate of the future. The assumptions that have the most significant impact on reported results are the discount rate, the estimated long-term return on plan assets and the estimated inflation in health care costs. These assumptions are generally updated annually.

The discount rate is used to determine retirement plan liabilities and to determine the interest cost component of net periodic pension and postretirement cost. Management utilizes the Aon Hewitt AA only above median yield curve, which is a hypothetical AA yield curve comprised of a series of annualized individual discount rates, as the primary basis for determining the discount rate. As of December 31, 2012 and 2011, we assumed discount rates of 3.95% and 4.85%, respectively, for the U.S. defined benefit pension plans. As of December 31, 2012, we assumed a discount rate of 3.75% compared with a discount rate of 4.75% as of December 31, 2011 for the U.S. postretirement plans. The effects of the change in discount rate will be amortized into earnings as described below. Absent any other changes, a one-quarter percentage point decrease in the discount rates for the U.S. pension and postretirement plans would decrease 2013 operating income by \$5.4 million and a one-quarter percentage point increase in the discount rates would increase 2013 operating income by \$5.2 million.

We have two U.S. defined benefit pension plans, a qualified funded plan and a nonqualified unfunded plan. For the qualified funded plan, the expected long-term return on plan assets represents a long-term view of the future estimated investment return on plan assets. This estimate is determined based on the target allocation of plan assets among asset classes and input from investment professionals on the expected performance of the asset classes over 10 to 20 years. Historical asset returns are monitored and considered when we develop our expected long-term return on plan assets. An incremental component is added for the expected return from active management based both on the plan's experience and on historical information obtained from the plan's investment consultants. These forecasted gross returns are reduced by estimated management fees and expenses, yielding a long-term rate of return of 6.25% per annum for 2013. The expected asset return assumption is based upon a long-term view; therefore, we do not expect to see frequent changes from year to year based on positive or negative actual performance in a single year. Over the 10 year period ended December 31, 2012, the annualized return was approximately 9.2% compared to an average expected return of 7.8%. The actual return on plan assets achieved for 2012 was 15.0%. The difference between the actual and expected rate of return on plan assets will be amortized into earnings as described below.

Table of Contents**Management's Discussion and Analysis of Financial Condition and Results of Operations**

The expected long-term return on plan assets used in determining our 2012 U.S. pension credit was 6.50%. We have assumed a return on plan assets during 2013 of 6.25%. The decrease reflects a planned change in our asset allocations. The 2013 expected return on assets was calculated in a manner consistent with 2012. A one-quarter percentage point increase or decrease in this assumption would increase or decrease 2013 operating income by approximately \$5.5 million.

Contributions to the unfunded plan were \$4.0 million in 2012 and were made on a monthly basis to fund benefit payments. We estimate the 2013 contributions will be approximately \$3.8 million. See Note 19 to the Consolidated Financial Statements for more information.

The estimated inflation in health care costs represents a long-term view (5-10 years) of the expected inflation in our postretirement health care costs. We separately estimate expected health care cost increases for pre-65 retirees and post-65 retirees due to the influence of Medicare coverage at age 65, as illustrated below:

	Assumptions			Actual		
	Post 65	Pre 65	Overall	Post 65	Pre 65	Overall
2011	8.5%	8.6%	8.5%	11%	2%	8%
2012	8.1%	8.1%	8.1%	(13%)	(1%)	(9%)
2013	7.8%	7.6%	7.7%			

The difference between the actual and expected health care costs is amortized into earnings as described below. As of December 31, 2012, health care cost increases are estimated to decrease ratably until 2019, after which they are estimated to be constant at 5%. A one percentage point increase in the assumed health care cost trend rate would reduce 2013 operating income by \$1.5 million, while a one percentage point decrease in the assumed health care cost trend rate would increase 2013 operating income by \$1.4 million. See Note 19 to the Consolidated Financial Statements for more information.

Actual results that differ from our various pension and postretirement plan estimates are captured as actuarial gains/losses. When certain thresholds are met, the gains and losses are amortized into future earnings over the expected remaining service period of plan participants, which is approximately eight years for our U.S. pension plans and our U.S. postretirement plans. Changes in assumptions could have significant effects on earnings in future years.

We recognized an increase in net actuarial losses related to our U.S. pension benefit plans of \$43.1 million in 2012. Our accumulated losses increased primarily due to changes in actuarial assumptions (most significantly a 90 basis point decline in the discount rate), partially offset by gains due to better than expected asset performance. The \$43.1 million actuarial loss due to our U.S. pension plans is reflected as a component of other comprehensive income in our Consolidated Statement of Earnings and Comprehensive Income along with actuarial losses from our foreign pension plans and actuarial gains from our U.S. postretirement benefit plans.

Impairments of Long-Lived Tangible and Intangible Assets Our indefinite-lived intangibles are primarily trademarks and brand names, which are integral to our corporate identity and expected to contribute indefinitely to our corporate cash flows. Accordingly, they have been assigned an indefinite life. We conduct our annual impairment test for non-amortizable intangible assets during the fourth quarter, although we conduct interim impairment tests if events or circumstances indicate the asset might be impaired. We conduct impairment tests for tangible assets and amortizable intangible assets when indicators of impairment exist, such as operating losses and/or negative cash flows. If an indication of impairment exists, we compare the carrying amount of the asset group to the estimated undiscounted future cash flows expected to be generated by the assets. The estimate of an asset group's fair value is based on discounted future cash flows expected to be generated by the asset group, or based on management's estimated exit price assuming the assets could be sold in an orderly transaction between

Table of Contents**Management's Discussion and Analysis of Financial Condition and Results of Operations**

market participants or estimated salvage value if no sale is assumed. If the fair value is less than the carrying value of the asset group, we record an impairment charge equal to the difference between the fair value and carrying value of the asset group.

The principal assumptions utilized in our impairment tests for definite-lived intangible assets include operating profit adjusted for depreciation and amortization. The principal assumptions utilized in our impairment tests for indefinite-lived intangible assets include revenue growth rate, discount rate and royalty rate. Revenue growth rate and operating profit assumptions are derived from those utilized in our operating plan and strategic planning processes. The discount rate assumption is calculated based upon an estimated weighted average cost of equity which reflects the overall level of inherent risk and the rate of return a market participant would expect to achieve. Methodologies used for valuing our intangible assets did not change from prior periods.

The cash flow estimates used in applying our impairment tests are based on management's analysis of information available at the time of the impairment test. Actual cash flows lower than the estimate could lead to significant future impairments. If subsequent testing indicates that fair values have declined, the carrying values would be reduced and our future statements of income would be affected.

There was no impairment charge in 2012 or 2011 related to intangible assets. During the fourth quarter of 2010 we recorded non-cash impairment charges of \$22.4 million to reduce the carrying value of our Wood Flooring trademarks to their estimated fair value based on the results of our annual impairment test. The remaining carrying value of the Wood Flooring trademarks at December 31, 2012 and 2011 was \$41.8 million and \$42.0 million, respectively.

We tested the tangible assets within the following reporting units for impairment:

Reporting Unit	2012	2011
ABP Americas	X	X
Resilient Flooring Europe	X	X
Wood Flooring	X	X

Based upon the impairment testing, the carrying value of the tangible assets for each of these asset groups was determined to be recoverable (except as discussed below) because the related undiscounted cash flows and/or fair value exceeded the carrying value of assets.

During the first quarter of 2012, we made the decision to permanently close a previously idled ceiling tile plant in Mobile, AL. As a result, we recorded a \$4.6 million impairment charge for the buildings in cost of goods sold. The preliminary fair values were determined by management estimates and an independent valuation based on information available at that time (considered Level 2 inputs in the fair value hierarchy).

During the third quarter of 2012, we recorded a \$17.5 million impairment charge to the value of the cabinets assets to reflect the expected proceeds from the sale of the cabinets business, which was accounted for as a discontinued operation.

During the fourth quarter of 2012, we made the decision to permanently close a previously idled engineered wood flooring production facility in Statesville, NC. As a result, we recorded a \$0.6 million impairment charge for the buildings in cost of goods sold. The preliminary fair values were determined by management estimates and an independent valuation based on information available at that time (considered Level 2 inputs in the fair value hierarchy).

We recorded an asset impairment charge of \$2.2 million in the third quarter of 2011 in SG&A expense for a European Resilient Flooring office building. The fair value was determined by management estimates of market prices based upon information available at that time, including offers received from potential buyers of the property (considered Level 3 inputs in the fair value hierarchy).

The remaining carrying value of tangible assets within the European Resilient Flooring business was \$90.6 million as of December 31, 2012, with land and buildings representing the significant majority. Material

Table of Contents

Management's Discussion and Analysis of Financial Condition and Results of Operations

uncertainties that could lead to a future material impairment charge include the level of European commercial construction and renovation activity.

During the fourth quarter of 2011, we recorded asset impairment charges of \$1.1 million in SG&A expense for two previously occupied manufacturing facilities. We have been actively pursuing a sale of both facilities. The fair values were determined by management estimates and independent market valuations based on information available at that time. The valuation information included sales of similar facilities and estimates of market prices (considered Level 2 inputs in the fair value hierarchy) for these assets.

During the second quarter of 2010, we recorded an asset impairment charge of \$2.1 million in SG&A expense for a European Resilient Flooring warehouse facility due to the decline in the commercial property sector. The fair value was determined by management estimates of market prices available at that time. This data included sales and leases of comparable properties within similar real estate markets (considered Level 3 inputs in the fair value hierarchy). We sold the warehouse in the first quarter of 2011.

During 2010, management decided to exit our corporate flight operations. As a result, we recorded a \$6.1 million impairment charge in SG&A expense for corporate aircraft in 2010. The fair values were determined by management estimates and an independent valuation based on information available at that time. The valuation information included sales of similar equipment and estimates of market prices (considered Level 2 inputs in the fair value hierarchy) for these assets. We sold the corporate aircraft in the fourth quarter of 2010.

We cannot predict the occurrence of certain events that might lead to material impairment charges in the future. Such events may include, but are not limited to, the impact of economic environments, particularly related to the commercial and residential construction industries, material adverse changes in relationships with significant customers, or strategic decisions made in response to economic and competitive conditions.

See Notes 3 and 12 to the Consolidated Financial Statements for further information.

Income Taxes Our effective tax rate is primarily determined based on our pre-tax income and the statutory income tax rates in the jurisdictions in which we operate. The effective tax rate also reflects the tax impacts of items treated differently for tax purposes than for financial reporting purposes. Some of these differences are permanent, such as expenses that are not deductible in our tax returns, and some differences are temporary, reversing over time, such as depreciation expense. These temporary differences create deferred income tax assets and liabilities. Deferred income tax assets are also recorded for operating loss, capital loss, alternative minimum tax credit and foreign tax credit carryforwards.

Deferred income tax assets and liabilities are recognized by applying enacted tax rates to temporary differences that exist as of the balance sheet date. We reduce the carrying amounts of deferred tax assets by a valuation allowance if, based on the available evidence, it is more likely than not that such assets will not be realized. The need to establish valuation allowances for deferred tax assets is assessed quarterly. In assessing the requirement for, and amount of, a valuation allowance in accordance with the more likely than not standard, we give appropriate consideration to all positive and negative evidence related to the realization of the deferred tax assets. This assessment considers, among other matters, the nature, frequency and severity of current and cumulative losses, forecasts of future profitability and foreign source income, the duration of statutory carryforward periods, and our experience with operating loss and tax credit carryforward expirations. A history of cumulative losses is a significant piece of negative evidence used in our assessment. If a history of cumulative losses is incurred for a tax jurisdiction, forecasts of future profitability are not used as positive evidence related to the realization of the deferred tax assets in the assessment.

As of December 31, 2012, we have recorded valuation allowances totaling \$205.5 million for various federal, state and foreign deferred tax assets. While we have considered future taxable income in assessing the need for the valuation allowances based on our best available projections, if these estimates

Table of Contents

Management's Discussion and Analysis of Financial Condition and Results of Operations

and assumptions change in the future or if actual results differ from our projections, we may be required to adjust our valuation allowances accordingly. Such adjustments could be material to our Consolidated Financial Statements.

As further described in Note 17 to the Consolidated Financial Statements, our Consolidated Balance Sheet as of December 31, 2012 includes net deferred income tax assets of \$373 million. Included in this amount are deferred federal income tax assets for foreign tax credit carryforwards of \$119.1 million, state net operating loss deferred income tax assets of \$51.7 million, and foreign net operating loss deferred tax assets of \$166.9 million. We have established valuation allowances in the amount of \$205.5 million consisting of \$16.0 million for federal capital loss carryovers and statutorily limited operating loss carryovers, \$16.2 million for state deferred tax assets, primarily operating loss carryovers, and \$173.3 million for foreign deferred tax assets, primarily foreign operating loss carryovers.

The federal foreign tax credits carryforwards arose primarily as a result of the payment of intercompany dividends from our foreign affiliates from earnings which were previously not considered as permanently reinvested. The state net operating losses arose primarily as a result of the amounts paid to the Asbestos PI Trust in 2006.

Inherent in determining our effective tax rate are judgments regarding business plans and expectations about future operations. These judgments include the amount and geographic mix of future taxable income, the amount of foreign source income, limitations on usage of net operating loss carryforwards, the impact of ongoing or potential tax audits, earnings repatriation plans, and other future tax consequences.

We estimate we will need to generate future federal taxable income of \$340.4 million, including foreign source income of \$53 million, to fully realize the foreign tax credits before they expire in 2022. We estimate we will need to generate future taxable income of approximately \$1,230.8 million for state income tax purposes during the respective realization periods in order to fully realize the net deferred income tax assets.

The Internal Revenue Code imposes limitations on a corporation's ability to utilize federal tax attributes, including foreign tax credits, if it experiences an ownership change. In general terms, an ownership change may result from transactions increasing the ownership of certain stockholders in the stock of a corporation by more than 50 percentage points over a three-year period. There have been no ownership changes as defined in the Internal Revenue Code subsequent to our bankruptcy emergence. Future ownership changes could have an impact on our ability to utilize the deferred tax assets.

We recognize the tax benefits of an uncertain tax position if those benefits are more likely than not to be sustained based on existing tax law. Additionally, we establish a reserve for tax positions that are more likely than not to be sustained based on existing tax law, but uncertain in the ultimate benefit to be sustained upon examination by the relevant taxing authorities. Unrecognized tax benefits are subsequently recognized at the time the more likely than not recognition threshold is met, the tax matter is effectively settled or the statute of limitations for the relevant taxing authority to examine and challenge the tax position has expired, whichever is earlier.

ACCOUNTING PRONOUNCEMENTS EFFECTIVE IN FUTURE PERIODS

There were no new accounting pronouncements issued or effective during the fiscal year which have had or are expected to have a material impact on the Consolidated Financial Statements. For a discussion of new accounting pronouncements, see Note 2 to our Consolidated Financial Statements.

RESULTS OF OPERATIONS

Unless otherwise indicated, net sales in these results of operations are reported based upon the location where the sale was made. Please refer to Notes 3 and 6 to the Consolidated Financial Statements for a reconciliation of segment operating income to consolidated earnings from continuing operations before income taxes and additional financial information related to discontinued operations.

Table of Contents**Management's Discussion and Analysis of Financial Condition and Results of Operations****2012 COMPARED TO 2011****CONSOLIDATED RESULTS FROM CONTINUING OPERATIONS**

(dollar amounts in millions)

	2012	2011	Change is Favorable/ (Unfavorable)
Net sales:			
Americas	\$ 1,873.9	\$ 1,903.9	(1.6)%
Europe	523.9	597.3	(12.3)%
Pacific Rim	221.1	221.9	(0.4)%
Total consolidated net sales	\$ 2,618.9	\$ 2,723.1	(3.8)%
Operating income	\$ 271.2	\$ 239.8	13.1%

The decline in consolidated net sales was driven by \$93 million of lower volume and \$48 million of unfavorable foreign exchange impact which were only partially offset with favorable price and mix of \$47 million. Sales were also negatively impacted by our sale of the Patriot wood flooring distribution business which occurred in the third quarter of 2012 and negatively impacted sales for the full year 2012 by \$11 million when compared to the prior year.

Net sales in the Americas decreased driven primarily by volume declines, which were only partially offset by improvements in price and mix.

Excluding unfavorable foreign exchange impact of \$39 million, net sales in the European markets decreased 6%, driven by continued volume declines which were only partially offset by improvements in price.

Excluding unfavorable foreign exchange impact of \$6 million, net sales in the Pacific Rim increased 2% as improvements in mix were partially offset by lower volumes.

Cost of goods sold was 75.8% of net sales in 2012, compared to 76.2% for the same period in 2011. The decrease of \$90 million was driven by lower sales in 2012 and manufacturing cost reductions of \$30 million. The comparison was impacted by \$21 million of costs associated with the closure of our Mobile, AL Building Products facility in 2012, \$13 million of costs associated with the closure of our Beaver Falls, PA Building Products facility in 2011 and \$9 million of costs associated with European Flooring cost reduction actions taken in 2011.

SG&A expenses in 2012 were \$418.3 million, or 16% of net sales, compared to \$454.0 million, or 17% of net sales, in 2011. The decreases were primarily due to reductions in core SG&A expense of \$32 million.

Restructuring charges for severance and related costs of \$(0.4) million were recorded in 2012, compared to \$9.0 million in 2011. See Note 15 to the Consolidated Financial Statements for further information.

Equity earnings from our WAVE joint venture were \$55.9 million in 2012 compared to \$54.9 million in 2011. See Note 16 to the Consolidated Financial Statements for further information.

Interest expense was \$53.7 million in 2012 compared to \$48.5 million in 2011. The increase in interest expense when compared to the prior year, was driven by additional borrowings of \$250 million under our senior credit facility in March 2012 (see Liquidity section for further information).

Income tax expense was \$76.1 million and \$81.0 million in 2012 and 2011, respectively. The effective tax rate for 2012 was 34.5% as compared to a rate of 41.8% for 2011. The effective tax rate for 2012 was lower than 2011 primarily due to the release of foreign tax credit valuation allowance and changes in mix of geographic income and losses.

Table of Contents**Management's Discussion and Analysis of Financial Condition and Results of Operations****REPORTABLE SEGMENT RESULTS****Building Products**

(dollar amounts in millions)

	2012	2011	Change is Favorable/ (Unfavorable)
Net sales:			
Americas	\$ 757.1	\$ 749.3	1.0%
Europe	333.6	356.8	(6.5)%
Pacific Rim	128.2	131.4	(2.4)%
Total segment net sales	\$ 1,218.9	\$ 1,237.5	(1.5)%
Operating income	\$ 230.4	\$ 226.1	1.9%

The decline in Building Products net sales was driven by \$31 million of lower volume due to unfavorable market conditions in key geographies and \$25 million of unfavorable foreign exchange impact, which were only partially offset with favorable price and mix of \$37 million.

Net sales in the Americas increased due to improved price realization and positive mix which more than offset lower volumes.

Excluding unfavorable foreign exchange impact of \$20 million, net sales in the European markets decreased 1%, as improvements in price were unable to offset volume declines.

Excluding unfavorable foreign exchange impact of \$4 million, net sales in the Pacific Rim increased 1% as improvements in mix were partially offset by lower volumes.

The increase in operating income was primarily driven by improvements in gross profit, partially offset by an increase in facility closure costs. Gross profit increased primarily from the benefits of price and mix of \$26 million and reductions in manufacturing and input costs of \$10 million, which more than offset volume declines of \$17 million. Operating income was negatively impacted by \$25 million of severance, impairment, and other charges associated with cost reduction actions in 2012 related to the closure of our Mobile, AL facility and European headcount reductions; and \$13 million of severance and other charges associated with cost reduction actions related to the closure of our Beaver Falls, PA facility in 2011.

Resilient Flooring

(dollar amounts in millions)

	2012	2011	Change is Favorable/ (Unfavorable)
Net sales:			
Americas	\$ 656.2	\$ 671.3	(2.2)%
Europe	190.3	240.5	(20.9)%
Pacific Rim	92.9	90.5	2.7%
Total segment net sales	\$ 939.4	\$ 1,002.3	(6.3)%
Operating income	\$ 56.9	\$ 15.7	Favorable

The decline in Resilient Flooring net sales was driven by \$67 million of lower volume and \$23 million of unfavorable foreign exchange impact; which were only partially offset with favorable price and mix of \$21 million.

Edgar Filing: ARMSTRONG WORLD INDUSTRIES INC - Form 10-K

Net sales in the Americas decreased as improvements in mix and price gains were unable to offset volume declines driven by lower sales to our national home center channel.

Excluding unfavorable foreign exchange impact of \$20 million, net sales in the European markets decreased 14%, as improvements in price were unable to offset market driven volume declines, especially in the public sector.

Table of Contents**Management's Discussion and Analysis of Financial Condition and Results of Operations**

Excluding unfavorable foreign exchange impact of \$2 million, net sales in the Pacific Rim increased 5% as increased sales in China offset market driven sales declines in Australia.

The increase in operating income was driven by improvements in price and mix of \$14 million and reductions in manufacturing and input costs and SG&A expenses of \$16 million and \$23 million, respectively; which more than offset the impact of volume declines of \$31 million. The comparison was also impacted by \$2 million and \$21 million of severance, impairment, restructuring and other charges associated with our cost reduction actions in the European Flooring business in 2012 and 2011, respectively.

Wood Flooring

(dollar amounts in millions)

	2012	2011	Change is (Unfavorable)
Total segment net sales	\$ 460.6	\$ 483.3	(4.7)%
Operating income	\$ 37.3	\$ 43.4	(14.1)%

The decline in Wood Flooring net sales was driven by lower price and mix of \$11 million while the divestiture of our Patriot wood flooring distribution business, negatively impacted sales by \$11 million when compared to the prior year. Lower sales to our national home center channel were offset by increased sales to independent distributors.

The decrease in operating income was driven by unfavorable price and mix of \$14 million, partially offset by improvements in manufacturing and input costs of \$8 million. The operating income impact of the higher sales volume and Patriot divestiture offset each other.

Unallocated Corporate

Unallocated corporate expense of \$53.4 million increased from \$45.4 million in the prior year. 2012 included a \$14 million lower pension credit as compared to 2011. SG&A reductions only partially offset the impact of the pension credit reduction.

FINANCIAL CONDITION AND LIQUIDITY**Cash Flow**

Operating activities for 2012 provided \$220.0 million of cash, compared to \$199.7 million of cash provided in 2011. The increase was primarily due to higher earnings partially offset by changes in working capital.

Net cash used for investing activities was \$91.9 million for 2012, compared to \$9.5 million in 2011. This change was primarily due to increased purchases of property, plant and equipment associated with the construction of three manufacturing plants in China and decreased distributions from WAVE.

Net cash used for financing activities was \$273.7 million for 2012, compared to \$28.8 million during 2011. The increase was primarily due to dividend payments of \$507.1 million, partially offset by proceeds from the issuance of long-term debt of \$250.0.

Liquidity

Our liquidity needs for operations vary throughout the year. We retain lines of credit to facilitate our seasonal cash flow needs, since cash flow is generally lower during the first and fourth quarters of our fiscal year. On November 23, 2010, we executed a \$1.05 billion senior credit facility arranged by Merrill Lynch, Pierce, Fenner & Smith, Inc., J.P. Morgan Securities, Inc. and Barclays Capital. This facility consisted of a \$250 million revolving credit facility (with a \$150 million sublimit for letters of credit), a \$250 million Term Loan A and a \$550 million Term Loan B. The facility was secured by U.S. personal property, the capital stock of material U.S. subsidiaries and a pledge of 65% of the stock of our

material first tier foreign subsidiaries.

Table of Contents

Management's Discussion and Analysis of Financial Condition and Results of Operations

On March 10, 2011, we entered into an amendment pursuant to which the following changes were effected with respect to Term Loan B:

The applicable margin for borrowings under Term Loan B was reduced (i) to 2.00% from 2.50% with respect to base rate borrowings, and (ii) to 3.00% from 3.50% with respect to LIBOR borrowings;

The minimum interest rate for borrowings under Term Loan B was reduced from 1.50% to 1.00%; and

The maturity date for Term Loan B was extended from May 23, 2017 to March 10, 2018. Until maturity, quarterly amortization payments on Term Loan B will continue in an amount equal to 0.25% of the original principal amount of Term Loan B.

In connection with the amendment to Term Loan B, we paid a \$5.5 million prepayment premium, which represented one percent of the principal amount of Term Loan B and which was capitalized and is being amortized into interest expense over the life of the loan. We also paid approximately \$1.6 million of fees to third parties.

On March 22, 2012, we again amended our facility. We added \$250 million to our existing Term Loan B facility. This amended facility is composed of a \$250 million revolving credit facility (with a \$150 million sublimit for letters of credit), a \$250 million Term Loan A and an \$800 million Term Loan B. This \$1.3 billion senior credit facility is secured by U.S. personal property, the capital stock of material U.S. subsidiaries, and a pledge of 65% of the stock of our material first tier foreign subsidiaries. The only significant change to existing terms, conditions and covenants pertained to the consolidated leverage ratio covenant, which is described below.

In connection with the additional \$250 million Term Loan B borrowings, we paid \$8.1 million for bank fees. This amount was capitalized and is being amortized into interest expense over the life of the loan.

The senior credit facility includes two financial covenants that require the ratio of consolidated earnings before interest, taxes, depreciation and amortization (EBITDA) to consolidated cash interest expense minus cash consolidated interest income (consolidated interest coverage ratio) to be greater than or equal to 3.0 to 1.0 and require the ratio of consolidated funded indebtedness minus AWI and domestic subsidiary unrestricted cash and cash equivalents up to \$100 million to consolidated EBITDA (consolidated leverage ratio) to be less than or equal to 4.5 to 1.0 through December 31, 2013, 4.0 to 1.0 after December 31, 2013 through March 31, 2015 and 3.75 to 1.0 after March 31, 2015. We currently believe that default under these covenants is unlikely. Fully borrowing under our revolving credit facility would not violate these covenants. During 2012, we were in compliance with all covenants of the credit agreement.

The Revolving Credit and Term Loan A portions are currently priced at a spread of 3.00% over LIBOR and the Term Loan B portion (as amended) is priced at 3.00% over LIBOR with a 1.00% LIBOR floor for its entire term. The Term Loan A and Term Loan B were both fully drawn and are currently priced on a variable interest rate basis. On March 31, 2011, we entered into two interest rate swaps, on our Term Loan A and Term Loan B, with notional amounts of \$100 million and \$200 million, respectively, which mature in November 2015. Under the terms of the Term Loan A swap, we receive 3-month LIBOR and pay a fixed rate over the hedged period. Under the terms of the Term Loan B swap, we receive the greater of 3-month LIBOR or the 1% LIBOR Floor and pay a fixed rate over the hedged period. On March 27, 2012 we entered into an additional interest rate swap agreement with a notional amount of \$250 million, maturing in March 2018, where we pay a fixed rate of 1.9275% over the hedged period. We also entered into a forward starting interest rate swap of \$200 million from November 2015 to March 2018, where we pay a fixed rate of 2.810% over the hedged period. These swaps are designated as cash flow hedges against changes in LIBOR for a portion of our variable rate debt. The unpaid balances of Term Loan A, the Revolving Credit and Term Loan B of the credit facility may be prepaid without penalty at the maturity of their respective interest reset periods. Any amounts prepaid on the Term Loan A or Term Loan B may not be re-borrowed.

Table of ContentsManagement's Discussion and Analysis of Financial Condition and Results of Operations

Under the senior credit facility, beginning December 31, 2013, we are subject to year-end leverage tests that may trigger mandatory prepayments. If our consolidated leverage ratio is greater than 2.0 to 1.0, but less than 2.5 to 1.0 as of December 31, 2013, we would be required to make a prepayment of 25% of fiscal year Consolidated Excess Cash Flow, as defined by the credit agreement. If our consolidated leverage ratio is greater than 2.5 to 1.0, the prepayment amount would be 50% of fiscal year Consolidated Excess Cash Flow. These annual payments would be made beginning in the first quarter of 2014.

As of December 31, 2012, we had \$336.4 million of cash and cash equivalents, \$239.8 million in the U.S. and \$96.6 million in various foreign jurisdictions.

Our January 31, 2013 debt rating from S&P was BB- (stable) and from Moody's was B1 (stable).

On March 23, 2012, our Board of Directors declared a special cash dividend in the amount of \$8.55 per share, or \$508 million in the aggregate, of which \$502.9 million was paid on April 10, 2012. Payment of an additional \$1.5 million was made during the remainder of 2012, and the remaining \$3.8 million of the dividend is expected to be made when the underlying shares vest. The dividend was funded in part by surplus cash on our balance sheet, and in part by the proceeds of additional debt issued under our Term Loan B.

On November 23, 2010 our Board of Directors declared a special cash dividend in the amount of \$13.74 per share, or \$803 million in the aggregate. The special cash dividend of \$798.6 million was paid on December 10, 2010 to shareholders of record as of December 3, 2010. Approximately \$3 million was paid during 2012 when employee shares and units vested. The unpaid portion of the dividend, \$1.4 million as of December 31, 2012, will be paid when the underlying shares and units vest. The dividend was funded in part by the proceeds of the term loans remaining after repayment of previous debt and in part with existing cash.

We have a \$100 million Accounts Receivable Securitization Facility with the Bank of Nova Scotia. AWI and its subsidiary, Armstrong Hardwood Flooring Company, sell their U.S. receivables to Armstrong Receivables Company LLC (ARC), a Delaware entity that is consolidated in these financial statements. Under the terms of the program, the Bank of Nova Scotia could also issue letters of credit at the request of ARC. The purchase and letter of credit commitments under the program are set to expire in December 2014.

On December 16, 2010, we issued \$35.0 million of Recovery Zone Facility bonds through Jackson County, WV, to finance the construction of our new mineral wool plant. These tax exempt bonds are seven day variable rate demand notes backed by a letter of credit. These bonds mature in 2041.

On December 31, 2012, we had outstanding letters of credit totaling \$71.7 million, of which \$14.7 million was issued under the revolving credit facility, \$56.7 million was issued under the securitization facility and \$0.3 million was issued by other banks of international subsidiaries. Letters of credit are issued to third party suppliers, insurance and financial institutions and typically can only be drawn upon in the event of AWI's failure to pay its obligations to the beneficiary.

Foreign Financing Arrangements	As of December 31, 2012		
	Limit	Used	Available
Lines of Credit Available for Borrowing	\$ 15.6		\$ 15.6
Lines of Credit Available for Letters of Credit	1.7	\$ 0.8	0.9
Total	\$ 17.3	\$ 0.8	\$ 16.5

These lines of credit are uncommitted, and poor operating results or credit concerns at the related foreign subsidiaries could result in the lines being withdrawn by the lenders. We have historically been able to maintain and, as needed, replace credit facilities to support our foreign operations.

Since 2009, our Board of Directors has approved the construction of five manufacturing plants. These include a U.S. mineral wool plant to supply our Building Products plants, mineral fiber ceiling plants in Russia and China, and two flooring plants in China. Total capital spending

for these projects is currently

Table of Contents**Management's Discussion and Analysis of Financial Condition and Results of Operations**

projected to be approximately \$310 million. Through December 31, 2012, we have incurred approximately \$175 million related to these projects. Capital spending for these projects will be incurred through 2015 with the majority of the remaining spending expected to occur in 2013.

We believe that cash on hand and cash generated from operations, together with lines of credit, availability under our securitization program and the availability under our \$250 million revolving credit facility, will be adequate to address our foreseeable liquidity needs based on current expectations of our business operations, capital expenditures and scheduled payments of debt obligations.

2011 COMPARED TO 2010**CONSOLIDATED RESULTS FROM CONTINUING OPERATIONS**

(dollar amounts in millions)

	2011	2010	Change is Favorable/ (Unfavorable)
Net sales:			
Americas	\$ 1,903.9	\$ 1,828.1	4.1%
Europe	597.3	600.9	(0.6)%
Pacific Rim	221.9	198.8	11.6%
Total consolidated net sales	\$ 2,723.1	\$ 2,627.8	3.6%
Operating income	\$ 239.8	\$ 87.5	Favorable

Consolidated net sales increased on favorable foreign exchange of approximately \$61 million combined with favorable price and mix of \$87 million, which were partially offset by volume declines of \$54 million.

Net sales in the Americas increased driven by price and mix which overcame volume declines in the Resilient Flooring business.

Net sales in the European markets remained flat for the year, as favorable foreign exchange impact of \$37 million and modest price improvements were offset by volume declines largely due to the restructuring of our European flooring business.

Net sales in the Pacific Rim increased on higher volume and favorable foreign exchange impact of \$14 million, which was partially offset by less favorable mix.

Cost of goods sold was 76% of net sales in 2011, compared to 78% for the same period in 2010. The decrease was driven by positive pricing actions, reduced manufacturing costs that were partially offset by increases in input costs.

SG&A expenses in 2011 were \$454.0 million, or 17% of net sales, compared to \$499.2 million, or 19% of net sales, in 2010. The decreases were due to reductions in core SG&A expenses. In addition, 2010 was impacted by \$15 million of CEO transition costs, a \$6 million asset impairment charge related to the termination of our flight operations, a loss of \$6 million related to the sale of our European metal ceilings contract installation business, a gain of \$2 million on the collection of a non-current note receivable, and an asset impairment charge of \$2 million for a European warehouse facility.

Restructuring charges for severance and related costs of \$9.0 million were recorded in 2011, compared to \$22.0 million in 2010. See Note 16 to the Consolidated Financial Statements for further information.

Equity earnings from our WAVE joint venture were \$54.9 million in 2011 compared to \$45.0 million in 2010. See Note 11 to the Consolidated Financial Statements for further information.

Edgar Filing: ARMSTRONG WORLD INDUSTRIES INC - Form 10-K

Interest expense was \$48.5 million in 2011 compared to \$21.2 million in 2010. The increase was primarily due to the fourth quarter 2010 debt refinancing which increased outstanding debt balances and interest rates compared to our previous credit facility.

Table of Contents**Management's Discussion and Analysis of Financial Condition and Results of Operations**

Income tax expense was \$81.0 million and \$58.0 million in 2011 and 2010, respectively. The effective tax rate for 2011 was 41.8% as compared to a rate of 79.3% for 2010. The effective tax rate for 2011 was lower than 2010 due to the enactment of the federal health care reform legislation in March 2010.

REPORTABLE SEGMENT RESULTS**Building Products**

(dollar amounts in millions)

	2011	2010	Change is Favorable
Net sales:			
Americas	\$ 749.3	\$ 696.0	7.7%
Europe	356.8	324.4	10.0%
Pacific Rim	131.4	115.1	14.2%
Total segment net sales	\$ 1,237.5	\$ 1,135.5	9.0%
Operating income	\$ 226.1	\$ 171.0	32.2%

The increase in Building Products net sales was driven by improved price and mix of \$52 million, favorable foreign exchange of \$32 million and higher volume of \$18 million.

Net sales in the Americas increased due to improved price realization, positive mix and volume improvement.

Net sales in Europe increased on favorable foreign exchange of \$20 million combined with positive price and mix, offset partially by reduced volume.

Net sales in the Pacific Rim increased as higher volume and favorable foreign exchange of \$7 million were partially offset by less favorable mix.

The improvement in operating income was driven by better price and mix of \$53 million, \$10 million of higher earnings from WAVE, decreased SG&A costs of \$7 million and the impact from higher sales volume of \$5 million, partially offset by higher manufacturing and input costs of \$37 million (which included \$15 million related to the renegotiation of collective bargaining agreements). 2011 and 2010 results were each impacted by \$13 million of accelerated depreciation, severance and restructuring related costs associated with the closure of our Beaver Falls, PA manufacturing facility. 2010 results were also impacted by a loss of \$6 million related to the sale of our European metal ceilings contract installation business and \$8 million of restructuring and severance accruals for headcount reductions.

Resilient Flooring

(dollar amounts in millions)

	2011	2010	Change is Favorable/ (Unfavorable)
Net sales:			
Americas	\$ 671.3	\$ 653.0	2.8%
Europe	240.5	276.5	(13.0)%
Pacific Rim	90.5	83.7	8.1%
Total segment net sales	\$ 1,002.3	\$ 1,013.2	(1.1)%
Operating income	\$ 15.7	\$ 13.1	19.8%

The decline in Resilient Flooring net sales was primarily driven by \$77 million of lower volume (which included \$45 million related to the restructuring of our European flooring business) which was mostly offset by \$27 million of favorable foreign exchange impact and increased price and mix of \$39 million.

Table of Contents**Management's Discussion and Analysis of Financial Condition and Results of Operations**

Net sales in the Americas increased as mix improvements and price gains more than offset volume declines.

Net sales in Europe decreased primarily due to volume declines related to the restructuring of our European flooring business, which included the exit of the residential flooring business, and the simplification of our country and product offerings. Excluding the impact of these actions sales were impacted by favorable foreign exchange of \$16 million and positive price realization, which were partially offset by unfavorable mix.

Net sales in the Pacific Rim increased on favorable foreign exchange of \$7 million combined with higher volume and favorable mix.

Operating income improved as improved price and mix of \$21 million and reductions in SG&A expenses of \$14 million offset the impact of volume declines of \$31 million. 2010 results were impacted by \$7 million of costs related to the closure of our Montreal, Canada facility and \$7 million of income due to laminate duty refunds.

Operating income includes losses related to European Resilient Flooring as outlined in the table below (dollar amount in millions):

	2011	2010
Resilient Flooring Europe operating loss	\$ (29.2)	\$ (36.1)

The operating losses for Resilient Flooring Europe in 2011 and 2010 included \$18 million and \$17 million, respectively, for severance and restructuring related costs of the European business. In addition to those charges, the losses include fixed asset impairment charges of \$2 million recorded in both 2011 and 2010.

Wood Flooring

(dollar amounts in millions)

	2011	2010	Change is Favorable
Total segment net sales	\$ 483.3	\$ 479.1	0.9%
Operating income	\$ 43.4	\$ (45.8)	Favorable

Net sales increased as higher volume of \$4 million and favorable foreign exchange of approximately \$2 million, were partially offset by unfavorable price and mix of \$2 million.

Operating income increased primarily due to reduced manufacturing and input costs of \$35 million due to the closure of two manufacturing facilities in 2010 as well as lower SG&A costs of \$17 million, which were somewhat offset by unfavorable mix of \$5 million. Additionally, operating income in 2010 was negatively impacted by \$16 million of fixed asset write downs and restructuring charges related to the closure of two manufacturing facilities and \$22 million of non-cash impairment charges related to our Wood Flooring trademarks.

Unallocated Corporate

Unallocated corporate expense of \$45 million decreased from \$51 million in 2010. 2011 included a \$25 million lower pension credit as compared to 2010. In addition, 2010 included \$15 million for CEO transition costs, \$6 million of asset impairment charges related to the termination of our flight operations, \$4 million of restructuring charges, and a gain of \$2 million on the collection of a non-current note receivable. After consideration of these items, corporate expenses declined in 2011 due to lower core spending and reduced headcount.

OFF-BALANCE SHEET ARRANGEMENTS

No disclosures are required pursuant to Item 303(a)(4) of Regulation S-K.

Table of ContentsManagement's Discussion and Analysis of Financial Condition and Results of Operations**CONTRACTUAL OBLIGATIONS**

As part of our normal operations, we enter into numerous contractual obligations that require specific payments during the term of the various agreements. The following table includes amounts ongoing under contractual obligations existing as of December 31, 2012. Only known payments that are dependent solely on the passage of time are included. Obligations under contracts that contain minimum payment amounts are shown at the minimum payment amount. Contracts that have variable payment structures without minimum payments are excluded. Purchase orders that are entered into in the normal course of business are also excluded because they are generally cancelable and not legally binding. Amounts are presented below based upon the currently scheduled payment terms. Actual future payments may differ from the amounts presented below due to changes in payment terms or events affecting the payments.

(dollar amounts in millions)	2013	2014	2015	2016	2017	Thereafter	Total
Long-term debt	\$ 33.0	\$ 45.5	\$ 183.0	\$ 8.0	\$ 8.1	\$ 793.4	\$ 1,071.0
Scheduled interest payments ⁽¹⁾	48.2	46.7	45.8	38.5	39.9	47.7	266.8
Operating lease obligations, net of sublease income ⁽²⁾	6.9	5.6	4.7	2.2	1.0	3.1	23.5
Unconditional purchase obligations ⁽³⁾	37.9	13.8	6.4	1.2	0.1		59.4
Pension contributions ⁽⁴⁾	19.3						19.3
Other obligations ^{(5), (6)}	1.4	0.2					1.6
Total contractual obligations	\$ 146.7	\$ 111.8	\$ 239.9	\$ 49.9	\$ 49.1	\$ 844.2	\$ 1,441.6

- (1) For debt with variable interest rates and interest rate swaps, we projected future interest payments based on market-based interest rate swap curves.
- (2) Lease obligations include the minimum payments due under existing agreements with non-cancelable lease terms in excess of one year.
- (3) Unconditional purchase obligations include (a) purchase contracts whereby we must make guaranteed minimum payments of a specified amount regardless of how little material is actually purchased (take or pay contracts) and (b) service agreements. Unconditional purchase obligations exclude contracts entered into during the normal course of business that are non-cancelable and have fixed per unit fees, but where the monthly commitment varies based upon usage. Cellular phone contracts are an example.
- (4) Pension contributions include estimated contributions for our defined benefit pension plans. We are not presenting estimated payments in the table above beyond 2013 as funding can vary significantly from year to year based upon changes in the fair value of plan assets, funding regulations and actuarial assumptions.
- (5) Other obligations include payments under severance agreements.
- (6) Other obligations, does not include \$138.4 million of liabilities under ASC 740 *Income Taxes*. Due to the uncertainty relating to these positions, we are unable to reasonably estimate the ultimate amount or timing of the settlement of these issues. See Note 17 to the Consolidated Financial Statements for more information.

This table excludes obligations related to postretirement benefits (retiree health care and life insurance) since we voluntarily provide these benefits. The amount of benefit payments we made in 2012 was \$22.0 million. See Note 19 to the Consolidated Financial Statements for additional information regarding future expected cash payments for postretirement benefits.

We have issued financial guarantees to assure payment on behalf of our subsidiaries in the event of default on various debt and lease obligations in the table above. We have not issued any guarantees on behalf of joint-venture or unrelated businesses.

We are party to supply agreements, some of which require the purchase of inventory remaining at the supplier upon termination of the agreement. The last such agreement will expire in 2013. Had these agreements terminated at December 31, 2012, Armstrong would have been obligated to purchase approximately \$14.1 million of inventory. Historically, due to production planning, we have not had to purchase material amounts of product at the end of similar contracts. Accordingly, no liability has been recorded for these guarantees.

Table of ContentsManagement's Discussion and Analysis of Financial Condition and Results of Operations

We utilize lines of credit and other commercial commitments in order to ensure that adequate funds are available to meet operating requirements. Letters of credit are issued to third-party suppliers, insurance and financial institutions and typically can only be drawn upon in the event of our failure to pay our obligations to the beneficiary. This table summarizes the commitments we have available in the U.S. for use as of December 31, 2012. Letters of credit are currently arranged through our revolving credit facility or our securitization facility.

Other Commercial

Commitments	Total	Less			
	Amounts	Than 1	1 3	4 5	Over 5
(dollar amounts in millions)	Committed	Year	Years	Years	Years
Letters of credit	\$ 71.7	\$ 71.7			

In addition, our foreign subsidiaries had available lines of credit totaling \$17.3 million of which \$1.7 million was available only for letters of credit and guarantees. There were \$0.8 million of letters of credit and guarantees issued under these credit lines as of December 31, 2012, leaving an additional letter of credit availability of \$0.9 million. There were no borrowings under these lines of credit as of December 31, 2012 leaving \$15.6 million of unused lines of credit available for foreign borrowings.

On December 31, 2012, we had a \$250 million revolving credit facility with a \$150 million sublimit for letters of credit, of which \$14.7 million was outstanding. There were no borrowings under the revolving credit facility. Availability under this facility totaled \$253.5 million as of December 31, 2012. We also have the \$100 million securitization facility which as of December 31, 2012 had letters of credit outstanding of \$56.7 million and no borrowings against it. Maximum capacity under this facility was \$59.8 million (of which \$3.1 million was available), subject to accounts receivable balances and other collateral adjustments.

In connection with our disposition of certain assets through a variety of unrelated transactions, we have entered into contracts that included various indemnity provisions, some of which are customary for such transactions, while others hold the acquirer of the assets harmless with respect to liabilities relating to such matters as taxes, environmental and other litigation. Some of these provisions include exposure limits, but many do not. Due to the nature of the indemnities, it is not possible to estimate the potential maximum exposure under these contractual provisions. For contracts under which an indemnity claim has been received, a liability of \$3.6 million has been recorded as of December 31, 2012, which is included in environmental liabilities as disclosed in Note 31 to the Consolidated Financial Statements.

Table of Contents

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Market Risk

We are exposed to market risk from changes in foreign currency exchange rates, interest rates and commodity prices that could impact our results of operations, cash flows and financial condition. We use forward swaps and option contracts to hedge these exposures. Forward swap and option contracts are entered into for periods consistent with underlying exposure and do not constitute positions independent of those exposures. We use derivative financial instruments as risk management tools and not for speculative trading purposes. In addition, derivative financial instruments are entered into with a diversified group of major financial institutions in order to manage our exposure to potential nonperformance on such instruments. We regularly monitor developments in the capital markets.

Counterparty Risk

We only enter into derivative transactions with established counterparties having a credit rating of BBB or better. We monitor counterparty credit default swap levels and credit ratings on a regular basis. All of our derivative transactions with counterparties are governed by master International Swap and Derivatives Association agreements (ISDAs) with netting arrangements. These agreements can limit our exposure in situations where we have gain and loss positions outstanding with a single counterparty. We do not post nor receive cash collateral with any counterparty for our derivative transactions. As of December 31, 2012 we had no cash collateral posted or received for any of our derivative transactions. These ISDAs do not contain any credit contingent features other than those contained in our bank credit facility. Exposure to individual counterparties is controlled, and thus we consider the risk of counterparty default to be negligible.

Interest Rate Sensitivity

We are subject to interest rate variability on our Term Loan A, Term Loan B, revolving credit facility and other borrowings. A hypothetical increase of one-quarter percentage point in LIBOR interest rates from December 31, 2012 levels would increase 2013 interest expense by approximately \$0.4 million. A significant portion of our debt has a 1% LIBOR floor which would not be affected by a one-quarter percentage point move in LIBOR given the current interest rate environment. We also have \$550 million of interest rate swaps outstanding, which fix a portion of our debt. The effects of the interest rate swaps are included in this calculation.

As of December 31, 2012, we had interest rate swaps outstanding on Term Loan A and on Term Loan B, with notional amounts of \$100 million and \$450 million, respectively. We utilize interest rate swaps to minimize the fluctuations in earnings caused by interest rate volatility. Interest expense on variable-rate liabilities increases or decreases as a result of interest rate fluctuations. Under the terms of Term Loan A swap, we receive 3-month LIBOR and pay a fixed rate over the hedged period. Under the terms of the Term Loan B swaps, we received the greater of 3-month LIBOR or the 1% LIBOR Floor and pay a fixed rate over the hedged period. The Term Loan A swap of \$100 million, under the terms of which we pay a fixed rate of 2.3030% over the hedged period, matures in November 2015. The first Term Loan B swap of \$200 million, under the terms of which we pay a fixed rate of 2.5525% over the hedged period, also matures in November 2015. On March 27, 2012, we extended this swap by entering into a forward starting swap of \$200 million from November 2015 to March 2018, under the terms of which we pay a fixed rate of 2.8105% over the hedged period. On March 27, 2012, we also entered into the second Term Loan B swap of \$250 million, under the terms of which we pay a fixed rate of 1.9275% over the hedged period, which matures in March 2018. This second Term Loan B swap is used to hedge the additional \$250 million of debt added to our Term Loan B facility on March 22, 2012.

These swaps are designated as cash flow hedges against changes in LIBOR for a portion of our variable rate debt. The mark-to-market loss was \$25.7 million at December 31, 2012.

The table below provides information about our long-term debt obligations as of December 31, 2012, including payment requirements and related weighted-average interest rates by scheduled maturity dates. Weighted average variable rates are based on implied forward rates in the yield curve and are exclusive of our interest rate swaps.

Table of Contents

Scheduled maturity date

(dollar amounts in millions)	2013	2014	2015	2016	2017	After 2017	Total
Variable rate	\$ 33.0	\$ 45.5	\$ 183.0	\$ 8.0	\$ 8.1	\$ 793.4	\$ 1,071.0
Avg. interest rate	3.48%	3.51%	3.67%	4.15%	4.67%	5.19%	4.80%

Exchange Rate Sensitivity

We manufacture and sell our products in a number of countries throughout the world and, as a result, are exposed to movements in foreign currency exchange rates. To a large extent, our global manufacturing and sales provide a natural hedge of foreign currency exchange rate movement. We use foreign currency forward exchange contracts to reduce our remaining exposure. At December 31, 2012, our major, pre-hedging foreign currency exposures are to the Canadian Dollar, Australian Dollar, and Euro. A 10% strengthening of all currencies against the U.S. dollar compared to December 31, 2012 levels would increase our 2013 earnings before income taxes by approximately \$5 million, including the impact of current foreign currency forward exchange contracts.

We also use foreign currency forward exchange contracts to hedge exposures created by cross-currency intercompany loans.

The table below details our outstanding currency instruments as of December 31, 2012.

On balance sheet foreign exchange related derivatives

(dollar amounts in millions)	Maturing in 2013	Maturing in 2014	Total
Notional amounts	\$ 104.7	\$ 25.0	\$ 129.7
Liabilities at fair value	(1.6)	(0.2)	(1.8)

Natural Gas Price Sensitivity

We purchase natural gas for use in the manufacture of ceiling tiles and other products, as well as to heat many of our facilities. As a result, we are exposed to fluctuations in the price of natural gas. We have a policy of reducing North American natural gas volatility through derivative instruments, including forward swap contracts, purchased call options and zero-cost collars. As of December 31, 2012, we had contracts to hedge approximately \$21.5 million (notional amounts) of natural gas. All of these contracts mature by December 2013. A 10% increase in North American natural gas prices compared to December 31, 2012 prices would increase our 2013 expenses by approximately \$1 million including the impact of current hedging contracts. At December 31, 2012 we had recorded liabilities of \$2.7 million related to these contracts.

Price range of common stock low	\$ 39.41	\$ 42.50	\$ 32.47	\$ 32.82
Dividend paid per share				

Note: The net sales and gross profit amounts reported above are reported on a continuing operations basis. The sum of the quarterly earnings per share data may not equal the total year amounts due to changes in the average shares outstanding and, for diluted data, the exclusion of the anti-dilutive effect in certain quarters.

Table of Contents

Fourth Quarter 2012 Compared With Fourth Quarter 2011 - Continuing Operations

Net sales of \$612.8 million in the fourth quarter of 2012 decreased from net sales of \$623.0 million in the fourth quarter of 2011. Excluding the unfavorable effects of foreign exchange rates of approximately \$4 million, the decrease in sales was due to the divestiture of our Patriot wood flooring distribution business which negatively impacted sales by \$7 million. Net sales decreased \$1 million in the Americas. Excluding the unfavorable impact of foreign exchange of \$4 million, net sales in Europe declined by \$8 million or 6%. Pacific Rim sales increased \$3 million or 5%.

Building Products net sales increased by \$3 million or 1%, due to better price realization and favorable mix. Resilient Flooring net sales decreased by \$10 million or 4%, primarily due to lower volumes in Europe and the Americas. Wood Flooring net sales decreased \$4 million or 3% as higher sales volume was offset by the impact of the divestiture of our Patriot wood flooring distribution business.

For the fourth quarter of 2012, cost of goods sold was 78% of net sales, compared to 80% in 2011. The decrease was primarily due to 2011 costs related to the renegotiation of collective bargaining agreements.

Selling, general and administrative (SG&A) expenses for the fourth quarter of 2012 were \$105.7 million, or 17% of net sales compared to \$111.3 million, or 18% of net sales, for the fourth quarter of 2011. Reductions in SG&A expenses in 2011 were primarily due to lower core spending and reduced headcount.

Equity earnings in the fourth quarter of 2012 and 2011 were \$11.9 million and \$10.5 million, respectively.

Operating income of \$42.3 million in the fourth quarter of 2012 compared to \$23.9 million in the fourth quarter of 2011 primarily resulted from the items discussed above.

Interest expense was \$14.0 million compared to \$10.9 million in 2011 due to additional borrowings of \$250 million in March 2012.

Income tax expense for the fourth quarter of 2012 was \$20.5 million on pre-tax income of \$29.7 million versus a tax expense of \$3.7 million on a pre-tax income of \$13.6 million in 2011. The effective tax rate for the fourth quarter of 2012 was higher primarily due to foreign tax credit benefits recorded in 2011. Unbenefitted foreign losses negatively impacted both periods.

Management's Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934, as amended. Our internal control over financial reporting was designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of our financial statements for external purposes in accordance with generally accepted accounting principles.

Because of inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Our management, with the participation of our Chief Executive Officer and Chief Financial Officer, conducted an evaluation of the effectiveness of our internal control over financial reporting based on the framework in *Internal Control-Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on this evaluation and the criteria in the COSO framework, our management concluded that our internal control over financial reporting was effective as of December 31, 2012.

KPMG LLP, an independent registered public accounting firm, audited our internal control over financial reporting as of December 31, 2012. Their audit report can be found on page 44.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders

Armstrong World Industries, Inc.:

We have audited Armstrong World Industries, Inc. and subsidiaries (the Company) internal control over financial reporting as of December 31, 2012, based on criteria established in *Internal Control-Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Armstrong World Industries, Inc. and subsidiaries maintained, in all material respects, effective internal control over financial reporting as of December 31, 2012, based on criteria established in *Internal Control-Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of the Company as of December 31, 2012 and 2011, and the related consolidated statements of earnings and comprehensive income, equity, and cash flows for each of the years in the three-year period ended December 31, 2012, and our report dated February 27, 2013 expressed an unqualified opinion on those consolidated financial statements.

Philadelphia, Pennsylvania

February 27, 2013

Table of Contents

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders

Armstrong World Industries, Inc.:

We have audited the accompanying consolidated balance sheets of Armstrong World Industries, Inc. and subsidiaries (the Company) as of December 31, 2012 and 2011, and the related consolidated statements of earnings and comprehensive income, equity and cash flows for each of the years in the three-year period ended December 31, 2012. In connection with our audits of the consolidated financial statements, we also have audited the financial statement schedule as listed in the accompanying index on page 40. These consolidated financial statements and financial statement schedule are the responsibility of the Company s management. Our responsibility is to express an opinion on these consolidated financial statements and financial statement schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Armstrong World Industries, Inc. and subsidiaries as of December 31, 2012 and 2011, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2012, in conformity with U.S. generally accepted accounting principles. Also in our opinion, the related financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company s internal control over financial reporting as of December 31, 2012, based on criteria established in *Internal Control-Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated February 27, 2013 expressed an unqualified opinion on the effectiveness of the Company s internal control over financial reporting.

Armstrong World Industries, Inc., and Subsidiaries

Notes to Consolidated Financial Statements

(dollar amounts in millions)

NOTE 1. BUSINESS AND CHAPTER 11 REORGANIZATION

Armstrong World Industries, Inc. (AWI) is a Pennsylvania corporation incorporated in 1891. When we refer to we, our and us in these notes, we are referring to AWI and its subsidiaries. We use the term AWI when we are referring solely to Armstrong World Industries, Inc.

In December 2000, AWI filed a voluntary petition for relief (the Filing) under Chapter 11 of the U.S. Bankruptcy Code (the Bankruptcy Code) in the United States Bankruptcy Court for the District of Delaware (the Bankruptcy Court) in order to use the court-supervised reorganization process to achieve a resolution of AWI s asbestos-related liability. On October 2, 2006, AWI s court-approved plan of reorganization (POR) became effective and AWI emerged from Chapter 11. All claims in AWI s Chapter 11 case have been resolved and closed.

On October 2, 2006, the Armstrong World Industries, Inc. Asbestos Personal Injury Settlement Trust (Asbestos PI Trust) was created to address AWI s personal injury (including wrongful death) asbestos-related liability. All present and future asbestos-related personal injury claims against AWI, including contribution claims of co-defendants but excluding certain foreign claims against subsidiaries, arising directly or indirectly out of AWI s pre-Filing use of, or other activities involving, asbestos are channeled to the Asbestos PI Trust.

In August 2009, Armor TPG Holdings LLC (TPG) and the Asbestos PI Trust entered into agreements whereby TPG purchased 7,000,000 shares of AWI common stock from the Asbestos PI Trust and acquired an economic interest in an additional 1,039,777 shares from the Asbestos PI Trust. The Asbestos PI Trust and TPG together hold more than 50% of AWI s outstanding shares and have a shareholders agreement, pursuant to which they agree to vote their shares together on certain matters. During the fourth quarter of 2012, the Asbestos PI Trust and TPG together sold 5,980,000 of their shares in a secondary public offering. The Company itself did not sell any shares and did not receive any proceeds from the offering, and the total number of common shares outstanding did not change as a result of the offering.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Consolidation Policy. The consolidated financial statements and accompanying data in this report include the accounts of AWI and its majority-owned subsidiaries. All significant intercompany transactions have been eliminated from the consolidated financial statements.

Use of Estimates. We prepare our financial statements in conformity with U.S. generally accepted accounting principles, which requires management to make estimates and assumptions. These estimates and assumptions affect the reported amounts of assets, liabilities, revenues and expenses. When preparing an estimate, management determines the amount based upon the consideration of relevant information. Management may confer with outside parties, including outside counsel. Actual results may differ from these estimates.

Reclassifications. Certain amounts in the prior year s Consolidated Financial Statements and related notes thereto have been recast to conform to the 2012 presentation.

The December 31, 2011 consolidated statement of cash flows has been revised to reflect a reclassification of \$12.5 million from operating activities to investing activities (\$8.9 million) and to financing activities (\$3.6 million). The December 31, 2010 consolidated statement of cash flows has been revised to reflect a reclassification of \$1.4 million from operating activities to investing activities. The revisions are related to the correction of the classification of premium payments on company-owned life insurance policies, proceeds received on those policies and loans under those policies. This revision did not affect the consolidated statement of earnings and comprehensive income for the years ended December 31, 2011 or 2010.

Revenue Recognition. We recognize revenue from the sale of products when persuasive evidence of an arrangement exists, title and risk of loss transfers to the customers, prices are fixed and determinable, and it is reasonably assured the related accounts receivable is collectible. Our sales terms primarily are FOB shipping point. We have some sales terms that are FOB destination. Our products are sold with normal and customary return provisions. Sales discounts are deducted immediately from the sales invoice. Provisions, which are recorded as a reduction of revenue, are made for the estimated cost of rebates, promotional programs and warranties. We defer recognizing revenue if special sales agreements, established at the time of sale, warrant this treatment.

Table of Contents

Armstrong World Industries, Inc., and Subsidiaries

Notes to Consolidated Financial Statements

(dollar amounts in millions)

Sales Incentives. Sales incentives are reflected as a reduction of net sales.

Shipping and Handling Costs. Shipping and handling costs are reflected in cost of goods sold.

Advertising Costs. We recognize advertising expenses as they are incurred.

Research and Development Costs. We recognize research and development costs as they are incurred.

Pension and Postretirement Benefits. We have benefit plans that provide for pension, medical and life insurance benefits to certain eligible employees when they retire from active service. See Note 19 to the Consolidated Financial Statements for disclosures on pension and postretirement benefits.

Taxes. The provision for income taxes has been determined using the asset and liability approach of accounting for income taxes to reflect the expected future tax consequences of events recognized in the financial statements. Deferred income tax assets and liabilities are recognized by applying enacted tax rates to temporary differences that exist as of the balance sheet date which result from differences in the timing of reported taxable income between tax and financial reporting.

We reduce the carrying amounts of deferred tax assets by a valuation allowance if, based on the available evidence, it is more likely than not that such assets will not be realized. The need to establish valuation allowances for deferred tax assets is assessed quarterly. In assessing the requirement for, and amount of, a valuation allowance in accordance with the more likely than not standard, we give appropriate consideration to all positive and negative evidence related to the realization of the deferred tax assets. This assessment considers, among other matters, the nature, frequency and severity of current and cumulative losses, forecasts of future profitability and foreign source income, the duration of statutory carryforward periods, and our experience with operating loss and tax credit carryforward expirations. A history of cumulative losses is a significant piece of negative evidence used in our assessment. If a history of cumulative losses is incurred for a tax jurisdiction, forecasts of future profitability are not used as positive evidence related to the realization of the deferred tax assets in the assessment.

We recognize the tax benefits of an uncertain tax position if those benefits are more likely than not to be sustained based on existing tax law. Additionally, we establish a reserve for tax positions that are more likely than not to be sustained based on existing tax law, but uncertain in the ultimate benefit to be sustained upon examination by the relevant taxing authorities. Unrecognized tax benefits are subsequently recognized at the time the more likely than not recognition threshold is met, the tax matter is effectively settled or the statute of limitations for the relevant taxing authority to examine and challenge the tax position has expired, whichever is earlier.

Taxes collected from customers and remitted to governmental authorities are reported on a net basis.

Earnings per Common Share. Basic earnings per share is computed by dividing the earnings from continuing operations attributable to common shares by the weighted average number of shares of common stock outstanding during the period. Diluted earnings per common share reflects the potential dilution of securities that could share in the earnings.

Cash and Cash Equivalents. Cash and cash equivalents include cash on hand and short-term investments that have maturities of three months or less when purchased.

Concentration of Credit. We principally sell products to customers in the building products industries in various geographic regions. No one customer accounted for 10% or more of our total consolidated net sales in the years 2012, 2011, and 2010. We monitor the creditworthiness of our customers and generally do not require collateral.

Receivables. We sell the vast majority of our products to select, pre-approved customers using customary trade terms that allow for payment in the future. Customer trade receivables, customer notes receivable and miscellaneous receivables (which include supply related rebates and

claims to be received, unpaid insurance claims from litigation and other), net of allowances for doubtful accounts, customer credits and warranties are

Table of Contents

Armstrong World Industries, Inc., and Subsidiaries

Notes to Consolidated Financial Statements

(dollar amounts in millions)

reported in accounts and notes receivable, net. Notes receivable from divesting certain businesses are included in other current assets and other non-current assets based upon the payment terms. Cash flows from the collection of current receivables are classified as operating cash flows on the consolidated statements of cash flows.

We establish credit-worthiness prior to extending credit. We estimate the recoverability of receivables each period. This estimate is based upon triggering events and new information in the period, which can include the review of any available financial statements and forecasts, as well as discussions with legal counsel and the management of the debtor company. As events occur, which impact the collectability of the receivable, all or a portion of the receivable is reserved. Account balances are charged off against the allowance when the potential for recovery is considered remote. We do not have any off-balance-sheet credit exposure related to our customers.

Inventories. Inventories are valued at the lower of cost or market. Inventories also include certain samples used in ongoing sales and marketing activities. See Note 8 to the Consolidated Financial Statements for further information on our accounting for inventories.

Property and Depreciation. Depreciation charges for financial reporting purposes are determined on a straight-line basis at rates calculated to provide for the full depreciation of assets at the end of their useful lives. Machinery and equipment includes manufacturing equipment (depreciated over 3 to 15 years), computer equipment (3 to 5 years) and office furniture and equipment (5 to 7 years). Within manufacturing equipment, assets that are subject to quick obsolescence or wear out quickly, such as tooling and engraving equipment, are depreciated over shorter periods (3 to 7 years). Heavy production equipment, such as conveyors and production presses, are depreciated over longer periods (15 years). Buildings are depreciated over 15 to 30 years, depending on factors such as type of construction and use. Computer software is depreciated over 3 to 7 years.

Property, plant and equipment are tested for impairment when indicators of impairment are present, such as operating losses and/or negative cash flows. If an indication of impairment exists, we compare the carrying amount of the asset group to the estimated undiscounted future cash flows expected to be generated by the assets. The estimate of an asset group's fair value is based on discounted future cash flows expected to be generated by the asset group, or based on management's estimated exit price assuming the assets could be sold in an orderly transaction between market participants, or estimated salvage value if no sale is assumed. If the fair value is less than the carrying value of the asset group, we record an impairment charge equal to the difference between the fair value and carrying value of the asset group. Impairments of assets related to our manufacturing operations are recorded in cost of goods sold. When assets are disposed of or retired, their costs and related depreciation are removed from the financial statements, and any resulting gains or losses normally are reflected in cost of goods sold or selling, general and administrative (SG&A) expenses.

Asset Retirement Obligations. We recognize the fair value of obligations associated with the retirement of tangible long-lived assets in the period in which they are incurred. Upon initial recognition of a liability, the discounted cost is capitalized as part of the related long-lived asset and depreciated over the corresponding asset's useful life. Over time, accretion of the liability is recognized as an operating expense to reflect the change in the liability's present value.

Intangible Assets. We periodically review significant definite-lived intangible assets for impairment when indicators of impairment exist. We review our businesses for indicators of impairment such as operating losses and/or negative cash flows. If an indication of impairment exists, we compare the carrying amount of the asset group to the estimated undiscounted future cash flows expected to be generated by the assets. The estimate of an asset group's fair value is based on discounted future cash flows expected to be generated by the asset group, or based on management's estimated exit price assuming the assets could be sold in an orderly transaction between market participants. If the fair value is less than the carrying value of the asset group, we record an impairment charge equal to the difference between the fair value and carrying value of the asset group.

Our indefinite-lived intangibles are primarily trademarks and brand names, which are integral to our corporate identity and expected to contribute indefinitely to our cash flows. Accordingly, they have been assigned an indefinite life. We perform annual impairment tests during the fourth quarter on these indefinite-lived intangibles. These assets undergo more frequent tests if an indication of possible impairment exists.

Table of Contents

Armstrong World Industries, Inc., and Subsidiaries

Notes to Consolidated Financial Statements

(dollar amounts in millions)

The principal assumptions utilized in our impairment tests for definite-lived intangible assets include operating profit adjusted for depreciation and amortization. The principal assumptions utilized in our impairment tests for indefinite-lived intangible assets include revenue growth rate, discount rate and royalty rate. Revenue growth rate and operating profit assumptions are derived from those utilized in our operating plan and strategic planning processes. The discount rate assumption is calculated based upon an estimated weighted average cost of equity which reflects the overall level of inherent risk and the rate of return a market participant would expect to achieve. Methodologies used for valuing our intangible assets did not change from prior periods.

See Note 12 to the Consolidated Financial Statements for disclosure on intangible assets.

Foreign Currency Transactions. Assets and liabilities of our subsidiaries operating outside the United States which account in a functional currency other than U.S. dollars are translated using the period end exchange rate. Revenues and expenses are translated at exchange rates effective during each month. Foreign currency translation gains or losses are included as a component of accumulated other comprehensive (loss) within shareholders' equity. Gains or losses on foreign currency transactions are recognized through the statement of earnings.

Financial Instruments and Derivatives. From time to time, we use derivatives and other financial instruments to offset the effect of currency, interest rate and commodity price variability. See Notes 20 and 21 to the Consolidated Financial Statements for further discussion.

Share-based Employee Compensation. For awards with only service and performance conditions that have a graded vesting schedule, we recognize compensation expense on a straight-line basis over the vesting period for the entire award. For awards with market conditions, we recognize compensation expense over the derived service period. See Note 25 to the Consolidated Financial Statements for additional information on share-based employee compensation.

Subsequent Events. We have evaluated subsequent events for potential recognition and disclosure through the date the consolidated financial statements included in the Annual Report on Form 10-K were issued.

Recently Adopted Accounting Standards

During 2011, we adopted guidance that is now part of Accounting Standards Codification (ASC) 350: *Intangibles - Goodwill and Other*. The guidance permits an entity to first assess qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount as a basis for determining whether it is necessary to perform the two-step goodwill impairment test. There was no impact on our financial statements from the adoption of this guidance.

During 2012, we adopted guidance which is now part of ASC 220: *Presentation of Comprehensive Income*. The guidance requires companies to present the components of net income and other comprehensive income either as one continuous statement or as two consecutive statements. It eliminated the option to present components of other comprehensive income as part of the statement of changes in stockholders' equity. There was no impact on our financial condition, results of operations or cash flows as a result of this presentation.

During 2012, we adopted guidance which is now part of ASC 820: *Fair Value Measurement*. The guidance changes several aspects of the fair value measurement guidance including items such as the concepts of highest and best use and incorporation of premiums and discounts in fair value measurement. The guidance also requires companies to present more disclosures surrounding valuation techniques and unobservable inputs used in Level 3 fair value measurement including a narrative description of Level 3 measurements' sensitivity to changes in unobservable inputs. There was no impact on our financial condition, results of operations or cash flows as a result of this guidance.

(dollar amounts in millions)

Recently Issued Accounting Standards

In December 2011, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2011-11: *Balance Sheet Disclosures about Offsetting Assets and Liabilities* in conjunction with the International Accounting Standards Board's issuance of amendments to International Financial Reporting Standard (IFRS) 7: *Disclosures - Offsetting Financial Assets and Financial Liabilities*. The new standard requires disclosures to allow investors to better compare financial statements prepared under U.S. generally accepted accounting principles (GAAP) with financial statements prepared under IFRS. The guidance is to be applied retrospectively and will be effective for us beginning January 1, 2013. Since this guidance impacts presentation only, it will have no effect on our financial condition, results of operations or cash flows.

In July 2012, the FASB issued new guidance that is now part of ASC 350: *Intangibles - Goodwill and Other*. The new guidance permits an entity to first assess qualitative factors to determine whether it is more likely than not that an indefinite-lived intangible asset is impaired as a basis for determining whether it is necessary to perform a quantitative impairment test on indefinite-lived intangible assets. Because the objective of this new guidance is to simplify how entities test for indefinite-lived intangible asset impairment, it will not have a material impact on our financial condition, results of operations or cash flows.

NOTE 3. NATURE OF OPERATIONS

Building Products produces suspended mineral fiber, soft fiber and metal ceiling systems for use in commercial, institutional and residential settings. In addition, our Building Products segment sources complementary ceiling products. Our products, which are sold worldwide, are available in numerous colors, performance characteristics and designs, and offer attributes such as acoustical control, rated fire protection and aesthetic appeal. Commercial ceiling materials and accessories are sold to ceiling systems contractors and to resale distributors. Residential ceiling products are sold in North America primarily to wholesalers and retailers (including large home centers). Suspension system (grid) products manufactured by Worthington Armstrong Venture (WAVE) are sold by both us and WAVE.

Resilient Flooring produces and sources a broad range of floor coverings primarily for homes and commercial and institutional buildings. Manufactured products in this segment include vinyl sheet, vinyl tile and linoleum flooring. In addition, our Resilient Flooring segment sources and sells laminate flooring products, vinyl tile products, vinyl sheet products, adhesives, and installation and maintenance materials and accessories. Resilient Flooring products are offered in a wide variety of types, designs, and colors. We sell these products worldwide to wholesalers, large home centers, retailers, contractors and to the manufactured homes industry.

Wood Flooring produces and sources wood flooring products for use in new residential construction and renovation, with some commercial applications in stores, restaurants and high-end offices. The product offering includes pre-finished solid and engineered wood floors in various wood species, and related accessories. Virtually all of our Wood Flooring sales are in North America. Our Wood Flooring products are generally sold to independent wholesale flooring distributors and large home centers.

Unallocated Corporate includes assets, liabilities, income and expenses that have not been allocated to the business units. Balance sheet items classified as Unallocated Corporate are primarily income tax related accounts, cash and cash equivalents, the Armstrong brand name, the U.S. prepaid pension cost and long-term debt. Expenses for our corporate departments and certain benefit plans are allocated to the reportable segments based on known metrics, such as specific activity, headcount, or net sales. The remaining items, which cannot be attributed to the reportable segments without a high degree of generalization, are reported in Unallocated Corporate.

Impairment testing of our tangible assets occurs whenever events or changes in circumstances indicate that the carrying amount of the assets may not be recoverable.

During the first quarter of 2012, we made the decision to permanently close a previously idled ceiling tile plant in Mobile, AL. As a result, in the first quarter we recorded accelerated depreciation of \$9.3 million for machinery and equipment and a \$4.6 million impairment charge for the buildings in cost of goods sold. We also recorded an additional \$1.7 million in accelerated depreciation related to the machinery and equipment during the remainder of 2012. The fair values were determined by management estimates and an independent valuation based on

Table of Contents

Armstrong World Industries, Inc., and Subsidiaries

Notes to Consolidated Financial Statements

(dollar amounts in millions)

information available at that time (considered Level 2 inputs in the fair value hierarchy as described in Note 19 to the Consolidated Financial Statements).

During the fourth quarter of 2012, we made the decision to permanently close a previously idled engineered wood flooring production facility in Statesville, NC. As a result, we recorded accelerated depreciation of \$0.6 million for machinery and equipment and a \$0.6 million impairment charge for the buildings in cost of goods sold. The preliminary fair values were determined by management estimates and an independent valuation based on information available at that time (considered Level 2 inputs in the fair value hierarchy).

During the third quarter of 2011, we recorded an asset impairment charge of \$2.2 million in SG&A expense for a European Resilient Flooring office building. The fair value was determined by management estimates of market prices based upon information available, including offers received from potential buyers of the property (considered Level 3 inputs in the fair value hierarchy).

During the fourth quarter of 2011, we recorded asset impairment charges of \$1.1 million in cost of goods sold for two previously occupied manufacturing facilities. The fair values were determined by management estimates and independent market valuations based on information available at that time. The valuation information included sales of similar facilities and estimates of market prices (considered Level 2 inputs in the fair value hierarchy) for these assets. We sold one of the facilities in the fourth quarter of 2012 and the other in the first quarter of 2013.

NOTE 4 ACQUISITIONS

In the fourth quarter of 2011, we acquired Canada-based Intalite, Inc., which operated under the name Simplex, for \$4.2 million. The acquisition, which was financed from existing cash balances, expands our technical capabilities, broadens our specialty ceilings portfolio and improves our service and lead times for customers in North America. The acquisition was accounted for under the purchase method of accounting.

As of December 31, 2009, we owned 80% of our Shanghai, China ceiling operations. During the fourth quarter of 2009, we made deposits of \$3.3 million to initiate the purchase of the remaining 20% interest. During the first quarter of 2010, we completed the acquisition with additional cash payments of \$7.8 million. We recorded the difference between the purchase price and the net book value of the net equity acquired within capital in excess of par value.

NOTE 5. DIVESTITURES

See Note 6 to the Consolidated Financial Statements for a discussion of the 2012 divestiture of our cabinets business, which was accounted for as a discontinued operation.

In the fourth quarter of 2010, the sale of our European metal ceilings contract installation business resulted in a loss of \$5.8 million which was recorded in SG&A expenses.

NOTE 6. DISCONTINUED OPERATIONS

In September 2012, we entered into a definitive agreement to sell our cabinets business to American Industrial Partners (AIP) for \$27 million in cash. During the third quarter, we recorded an impairment charge of \$17.5 million to the cabinets' assets to reflect the expected proceeds from the sale. The sale was completed in October 2012. The transaction is subject to working capital adjustments which are expected to be completed in the first quarter of 2013.

The financial results of the cabinets business have been reclassified as discontinued operations for all periods presented. The Consolidated Statement of Cash Flows does not separately report the cash flows of the discontinued operation.

Edgar Filing: ARMSTRONG WORLD INDUSTRIES INC - Form 10-K

The following is a summary of the operating results of the cabinets business (previously shown as the Cabinets reporting segment), which are included in discontinued operations.

	2012	2011	2010
Net sales	\$ 115.7	\$ 136.4	\$ 138.6
(Loss) before income tax	(20.8)	(0.6)	(6.4)
Income tax benefit	7.7	0.2	2.3
Net (loss) from discontinued operations	(\$ 13.1)	(\$ 0.4)	(\$ 4.1)

The following is a summary of the assets and liabilities of the discontinued operations as of December 31, 2011.

	December 31, 2011
Accounts and notes receivable, net	\$ 11.1
Inventories, net	12.8
Other assets	0.5
Current assets of discontinued operations	\$ 24.4

	December 31, 2011
Property, plant and equipment, net	15.0
Other assets	3.7
Noncurrent assets of discontinued operations	\$ 18.7

	December 31, 2011
Accounts payable and accrued expenses	\$ 6.4
Liabilities of discontinued operations	\$ 6.4

NOTE 7. ACCOUNTS AND NOTES RECEIVABLE

	December 31, 2012	December 31, 2011
Customer receivables	\$ 228.1	\$ 251.1
Customer notes	4.5	1.7
Miscellaneous receivables	7.6	7.9
Less allowance for warranties, discounts and losses	(35.6)	(39.3)

Edgar Filing: ARMSTRONG WORLD INDUSTRIES INC - Form 10-K

Accounts and notes receivable, net	\$ 204.6	\$ 221.4
------------------------------------	----------	----------

Generally, we sell our products to select, pre-approved customers whose businesses are affected by changes in economic and market conditions. We consider these factors and the financial condition of each customer when establishing our allowance for losses from doubtful accounts.

NOTE 8. INVENTORIES

	December 31, 2012	December 31, 2011
Finished goods	\$ 265.9	\$ 266.0
Goods in process	27.6	25.1
Raw materials and supplies	107.8	110.8
Less LIFO and other reserves	(31.5)	(25.8)
Total inventories, net	\$ 369.8	\$ 376.1

Table of Contents

Armstrong World Industries, Inc., and Subsidiaries

Notes to Consolidated Financial Statements

(dollar amounts in millions)

Approximately 63% and 66% of our total inventory in 2012 and 2011, respectively, was valued on a LIFO (last-in, first-out) basis. Inventory values were lower than would have been reported on a total FIFO (first-in, first-out) basis by \$18.1 million and \$15.6 million in 2012 and 2011, respectively.

The distinction between the use of different methods of inventory valuation is primarily based on geographical locations and/or legal entities rather than types of inventory. The following table summarizes the amount of inventory that is not accounted for under the LIFO method.

	December 31, 2012	December 31, 2011
International locations	\$ 132.3	\$ 126.2
U.S. sourced products	3.6	3.1
Total	\$ 135.9	\$ 129.3

Substantially all of our international locations use the FIFO method of inventory valuation (or other methods which closely approximate the FIFO method) primarily because either the LIFO method is not permitted for local tax and/or statutory reporting purposes, or the entities were part of various acquisitions that had adopted the FIFO method prior to our acquisition. In these situations, a conversion to LIFO would be highly complex and involve excessive cost and effort to achieve under local tax and/or statutory reporting requirements.

The sourced products represent certain finished goods sourced from third party manufacturers, primarily from foreign suppliers.

NOTE 9. OTHER CURRENT ASSETS

	December 31, 2012	December 31, 2011
Prepaid expenses	\$ 39.0	\$ 27.2
Assets held for sale	1.8	6.2
Fair value of derivative assets	0.3	2.4
Other	1.2	2.3
Total other current assets	\$ 42.3	\$ 38.1

NOTE 10. PROPERTY, PLANT AND EQUIPMENT

	December 31, 2012	December 31, 2011
Land	\$ 111.6	\$ 111.3
Buildings	318.4	297.3
Machinery and equipment	940.7	827.2
Computer software	11.5	16.1
Construction in progress	206.6	134.8

Edgar Filing: ARMSTRONG WORLD INDUSTRIES INC - Form 10-K

Less accumulated depreciation and amortization	(583.8)	(498.8)
Net property, plant and equipment	\$ 1,005.0	\$ 887.9

Since 2009, our Board of Directors has approved the construction of five manufacturing plants. These include a U.S. mineral wool plant to supply our Building Products plants, mineral fiber ceiling plants in Russia and China, and two flooring plants in China. Total capital spending for these projects is currently projected to be approximately \$310 million. Through December 31, 2012, we have incurred approximately \$175 million related to these projects. The spending will be incurred through 2015 with the majority of the remaining spending expected to occur in 2013.

Notes to Consolidated Financial Statements

(dollar amounts in millions)

See Note 2 to the Consolidated Financial Statements for discussion of policies related to property and depreciation and asset retirement obligations.

NOTE 11. EQUITY INVESTMENTS

Investment in joint venture at December 31, 2012 reflected the equity interest in our 50% investment in our Worthington Armstrong Venture (WAVE) joint venture.

We use the equity in earnings method to determine the appropriate classification of distributions from WAVE within our cash flow statement. During 2012, 2011 and 2010, WAVE distributed amounts in excess of our capital contributions and proportionate share of retained earnings. Accordingly, the distributions in these years were reflected as a return of investment in cash flows from investing activity in our Consolidated Statement of Cash Flows. Distributions from WAVE in 2012, 2011 and 2010 were \$63.5 million, \$102.4 million (including a special distribution of \$50.1 million in December 2011), and \$51.0 million, respectively.

The WAVE joint venture is reflected in our consolidated financial statements using the equity method of accounting. In certain markets, we sell WAVE products directly to customers pursuant to specific terms of sale. In those circumstances, we record the sales and associated costs within our consolidated financial statements. The total sales associated with these transactions were \$114.3 million, \$119.0 million and \$102.5 million for the years ended 2012, 2011 and 2010, respectively.

Our recorded investment in WAVE was higher than our 50% share of the carrying values reported in WAVE s consolidated financial statements by \$188.9 million as of December 31, 2012 and \$194.7 million as of December 31, 2011. These differences are due to our adoption of fresh-start reporting upon emergence from Chapter 11, while WAVE s consolidated financial statements do not reflect fresh-start reporting. The differences are composed of the following fair value adjustments to assets:

	December 31, 2012	December 31, 2011
Property, plant and equipment	\$ 0.7	\$ 1.0
Other intangibles	157.8	163.3
Goodwill	30.4	30.4
Total	\$ 188.9	\$ 194.7

Other intangibles include customer relationships, trademarks and developed technology. Customer relationships are amortized over 20 years and developed technology is amortized over 15 years. Trademarks have an indefinite life.

See Exhibit 99.1 for WAVE s consolidated financial statements. Condensed financial data for WAVE is summarized below:

	December 31, 2012	December 31, 2011
Current assets	\$ 113.3	\$ 115.0
Non-current assets	38.5	36.2
Current liabilities	24.9	23.8
Other non-current liabilities	243.2	242.0

	2012	2011	2010
Net sales	\$ 368.0	\$ 367.2	\$ 332.2
Gross profit	163.7	155.7	137.5
Net earnings	125.5	123.7	105.8

See discussion in Note 30 to the Consolidated Financial Statements for additional information on this related party.

(dollar amounts in millions)

NOTE 12. INTANGIBLE ASSETS

We conduct our annual impairment testing of non-amortizable intangible assets during the fourth quarter. In 2010 our impairment analysis determined that the carrying value of our Wood Flooring trademarks was in excess of the fair value. We determined the fair value of these intangible assets by utilizing relief from royalty analysis that incorporated projections of revenue and cash flows. The initial fair value for these intangible assets was determined in 2006 as part of fresh start reporting. The fair values were negatively affected by lower expected future sales in the U.S. residential housing market. Based on the result of the analysis, we recorded non-cash impairment charges of \$22.4 million in the fourth quarter of 2010. See Note 2 to the Consolidated Financial Statements for a discussion of our accounting policy for intangible assets.

The following table details amounts related to our intangible assets as of December 31, 2012 and 2011:

	Estimated Useful Life	December 31, 2012		December 31, 2011	
		Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
Amortizing intangible assets					
Customer relationships	20 years	\$ 165.4	\$ 51.9	\$ 166.0	\$ 43.6
Developed technology	15 years	81.9	33.8	81.1	28.3
Other	Various	15.0	1.3	14.6	1.0
Total		\$ 262.3	\$ 87.0	\$ 261.7	\$ 72.9
Non-amortizing intangible assets					
Trademarks and brand names	Indefinite	352.4		352.8	
Total intangible assets		\$ 614.7		\$ 614.5	

	2012	2011	2010
Amortization expense	\$ 14.1	\$ 14.0	\$ 13.9
Intangible asset impairment			22.4
Total amortization expense and impairment charges	\$ 14.1	\$ 14.0	\$ 36.3

The expected annual amortization expense for the years 2013 through 2017 is approximately \$14 million.

NOTE 13. OTHER NON-CURRENT ASSETS

NOTE 14. ACCOUNTS PAYABLE AND ACCRUED EXPENSES

	December 31, 2012	December 31, 2011
Payables, trade and other	\$ 216.7	\$ 209.0
Employment costs	81.6	91.9
Other	48.0	52.4
 Total accounts payable and accrued expenses	 \$ 346.3	 \$ 353.3

NOTE 15. SEVERANCE AND RELATED COSTS

See Note 16 to the Consolidated Financial Statements for a discussion of severance charges associated with restructuring actions.

In the second quarter of 2012, we recorded \$3.4 million for severance and related costs in SG&A expense (\$3.2M) and cost of goods sold (\$0.2M) to reflect approximately 35 position eliminations in our European Building Products business, primarily as a result of streamlining SG&A functions.

In the first quarter of 2011, we recorded \$3.0 million in cost of goods sold for severance and related costs to reflect position eliminations in our European Resilient Flooring business as a result of improved manufacturing productivity. In addition, we recorded \$0.5 million in SG&A expense for severance and related costs to reflect the separation costs for our former Senior Vice President, General Counsel and Secretary.

In 2010, we recorded \$11.2 million in SG&A expense for severance and related costs to reflect the separation costs for our former Chairman and Chief Executive Officer.

During 2010, we announced the shutdown of finished goods production at two Wood Flooring plants, the restarting of certain operations at a previously idled Wood Flooring plant, the closure of a European metal ceilings manufacturing facility and a crew reduction in a European Building Products plant. We recorded \$5.7 million of severance and related expenses in 2010 for approximately 500 employees affected by these actions. The charges were recorded in cost of goods sold.

In addition to the charges described above, in 2010 we also recorded \$6.3 million of severance and related expenses for employees affected by the elimination of approximately 160 other manufacturing and SG&A positions around the world. The charges were recorded in SG&A expense (\$4.5 million) and cost of goods sold (\$1.8 million).

NOTE 16. RESTRUCTURING ACTIONS

During the third quarter of 2010, management made several significant decisions to address our cost structure. Given the materiality to our financial statements and impact to our operations, we decided to classify charges related to these actions as restructuring charges. The following table summarizes the restructuring charges recorded in 2012, 2011 and 2010:

Action Title	2012	2011	2010	Segment
Floor Products Europe	(\$ 0.4)	\$ 6.4	\$ 11.8	Resilient Flooring

Edgar Filing: ARMSTRONG WORLD INDUSTRIES INC - Form 10-K

North America SG&A

Unallocated Corporate, Resilient

		1.4	5.8	Flooring, Building Products
Beaver Falls plant		1.4	2.3	Building Products
Montreal			1.2	Resilient Flooring
Wood products		(0.2)	0.9	Wood Flooring
Total	(\$ 0.4)	\$ 9.0	\$ 22.0	

Table of Contents

Armstrong World Industries, Inc., and Subsidiaries

Notes to Consolidated Financial Statements

(dollar amounts in millions)

Floor Products Europe: In the third quarter of 2010, we announced our intent to focus our European flooring strategy on products and regions in which we believe we can be a market leader, and to streamline our product range and sales organization accordingly. During the fourth quarter of 2010, we withdrew from the residential market and, as a result, we sold our Teesside, UK manufacturing facility. In addition, during the second quarter of 2011, we ceased production at our heterogeneous vinyl flooring plant in Holmsund, Sweden. This facility was sold in December 2012.

In addition to the restructuring costs reflected in the above table, we recorded \$6.7 million in 2011 of other related costs in cost of goods sold (\$5.2 million) and SG&A expense (\$1.5 million). We also recorded other related costs of \$3.5 million in cost of goods sold and \$1.5 million in SG&A in 2010. Other related costs are primarily related to inventory and samples obsolescence, accelerated depreciation and plant closure costs.

Through December 31, 2012, we have incurred expense of \$29.5 million related to this initiative. We do not expect to incur further material restructuring costs related to this initiative.

North America SG&A: We are committed to augmenting margin expansion through the aggressive adoption of projects to standardize, simplify or eliminate SG&A activities. As a result, in the third quarter of 2010, we began to restructure our North American SG&A operations. The 2011 restructuring expense related to this initiative was recorded in the Unallocated Corporate (\$0.9 million), Resilient Flooring (\$0.4 million) and Building Products (\$0.1 million) segments. The 2010 restructuring expense related to this initiative was recorded in the Unallocated Corporate (\$4.0 million), Resilient Flooring (\$0.9 million) and Building Products (\$0.9 million) segments.

Through December 31, 2012, we have incurred restructuring expense of \$7.2 million related to this initiative. We do not expect to incur further material restructuring costs related to this initiative.

Beaver Falls Plant: In the third quarter of 2010, we announced that the Beaver Falls, PA, plant was scheduled to close in 2011. Production at the facility ended March 31, 2011, and production requirements have been transitioned to other facilities. The decision to close the plant was driven by the location and layout of the plant, technology limitations and the continued limited demand for the products we made at the plant.

In addition to the restructuring costs reflected in the table above, we also recorded \$6.6 million of accelerated depreciation and \$4.8 million of closure-related costs in 2011 in cost of goods sold. We also recorded \$10.0 million of accelerated depreciation in cost of goods sold in 2010.

Through December 31, 2012, we have incurred expense of \$25.1 million related to this initiative. We do not expect to incur additional costs in the future as the plant was sold in 2011. The sale resulted in a net gain of \$0.7 million which was recorded in SG&A in 2011.

Montreal: In the third quarter of 2010, we announced the closing of our warehouse and previously idled plant in Montreal, Canada. The facility closed in the fourth quarter of 2010. The decision to close this facility was driven by our ability to service the demand for our resilient tile products from our other manufacturing locations.

In addition to the restructuring costs reflected in the previous table, we also recorded \$6.5 million of fixed asset write-downs in cost of goods sold in 2010.

We do not expect to incur further restructuring costs related to this initiative.

Wood Products: In the third quarter of 2010, we announced the closing of our previously idled Center, TX plant and a portion of our previously idled Oneida, TN plant. Operations at Center and the strip mill operations at Oneida ceased in the fourth quarter of 2010. The decision to close these facilities was driven by our ability to service the demand for our wood products from our other manufacturing locations.

In addition to the restructuring costs reflected in the previous table, we also recorded \$14.9 million of fixed asset write-downs and lease termination costs in cost of goods sold in 2010.

We do not expect to incur further restructuring costs related to these locations.

Cash payments	(2.3)	(0.5)				(2.8)
Other	0.2					0.2
December 31, 2012	\$ 0.7		\$ 0.1			\$ 0.8

The amounts in Other are related to the effects of foreign currency translation.

Most of the accrual balance as of December 31, 2012 is expected to be paid in 2013.

NOTE 17. INCOME TAXES

The tax effects of principal temporary differences between the carrying amounts of assets and liabilities and their tax bases are summarized in the following table. Management believes it is more likely than not that the results of future operations will generate sufficient taxable income and foreign source income to realize deferred tax assets, net of valuation allowances. In arriving at this conclusion, we considered the profit before tax generated for the years 2010 through 2012, as well as future reversals of existing taxable temporary differences and projections of future profit before tax and foreign source income.

We reduce the carrying amounts of deferred tax assets by a valuation allowance if, based on the available evidence, it is more likely than not that such assets will not be realized. The need to establish valuation allowances for deferred tax assets is assessed quarterly. In assessing the requirement for, and amount of, a valuation allowance in accordance with the more likely than not standard for all periods, we give appropriate consideration to all positive and negative evidence related to the realization of the deferred tax assets. This assessment considers, among other matters, the nature, frequency and severity of current and cumulative losses, forecasts of future profitability and foreign source income, the duration of statutory carryforward periods, and our experience with operating loss and tax credit carryforward expirations. A history of cumulative losses is a significant piece of negative evidence used in our assessment. If a history of cumulative losses is incurred for a tax jurisdiction, forecasts of future profitability are not used as positive evidence related to the realization of the deferred tax assets in the assessment.

We have established a valuation allowance in the amount of \$205.5 million consisting of \$16.0 million for federal capital loss carryovers and statutorily limited operating loss carryovers, \$16.2 million for state deferred tax assets, primarily operating loss carryovers, and \$173.3 million for foreign deferred tax assets, primarily foreign operating loss carryovers.

Edgar Filing: ARMSTRONG WORLD INDUSTRIES INC - Form 10-K

We have \$1,145.6 million of state net operating loss (NOL) carryforwards with expirations between 2013 and 2032. In addition, we have \$587.6 million of foreign NOL carryforwards, of which \$540.2 million are available for carryforward indefinitely and \$47.4 million expire between 2013 and 2027. We also have U.S. foreign tax credit carryforwards of \$119.1 million expiring between 2013 and 2022, and federal alternative minimum tax credit carryforwards of \$13.8 million with no expiration date.

Our valuation allowances at December 31, 2012, increased from December 31, 2011 by a net amount of \$10.6 million. This includes a net increase for certain foreign deferred tax assets of \$23.9 million and net decreases of \$10.8 million for federal deferred tax assets and \$2.5 million for certain deferred state income tax assets. The

Table of Contents

Armstrong World Industries, Inc., and Subsidiaries

Notes to Consolidated Financial Statements

(dollar amounts in millions)

increase in the valuation allowance for deferred foreign income tax assets was primarily due to additional foreign losses and other deferred tax assets, partially offset by the impact of current year income and carryforward expirations. The decrease in the valuation allowance for deferred federal income tax assets of \$10.8 million was primarily due to the release of the valuation allowance against foreign tax credits of \$15.7 million offset by an increase in a valuation allowance for certain statutorily limited federal losses of \$4.9 million. The decrease in the valuation allowance for certain deferred state income tax assets of \$2.5 million was primarily due to expirations and changes in deferred tax assets. We estimate we will need to generate future federal taxable income of \$340.4 million, including foreign source income of \$53.0 million, to fully realize the foreign tax credits before they expire in 2022. We estimate we will need to generate future taxable income of approximately \$1,230.8 million for state income tax purposes during the respective realization periods in order to fully realize the net deferred income tax assets discussed above.

The Internal Revenue Code imposes limitations on a corporation's ability to utilize federal tax attributes, including foreign tax credits, if it experiences an ownership change. In general terms, an ownership change may result from transactions increasing the ownership of certain stockholders in the stock of a corporation by more than 50 percentage points over a three-year period. There have been no ownership changes as defined in the Internal Revenue Code subsequent to our bankruptcy emergence. Future ownership changes could have an impact on our ability to utilize the deferred tax assets discussed above.

We are currently expanding international operations by constructing three new plants in China and one in Russia.

During 2011, we reevaluated our position with regards to foreign unremitted earnings and as part of this review it was determined that unremitted earnings would be permanently reinvested. We continue to permanently reinvest unremitted earnings. Accordingly we have not recorded U.S. income or foreign withholding taxes on approximately \$234 million of undistributed earnings of foreign subsidiaries that could be subject to taxation if remitted to the U.S. because we currently plan to keep these amounts permanently invested overseas. It is not practical to calculate the residual income tax which would result if these basis differences reversed due to the complexities of the tax law and the hypothetical nature of the calculations.

During 2010 and 2011, we recorded \$169.6 million of dividends from our foreign subsidiaries related to unremitted foreign earnings for which we previously recorded a net deferred tax liability as the earnings were not considered

Table of Contents

Armstrong World Industries, Inc., and Subsidiaries

Notes to Consolidated Financial Statements

(dollar amounts in millions)

permanently reinvested. The receipt of the foreign dividends in 2011 provided an opportunity to elect to credit foreign taxes that were previously deducted. In 2011, we increased the deferred tax assets by \$21.1 million offset by a valuation allowance of \$15.7 million, for a net tax benefit of \$5.4 million to reflect the net impact of the foreign tax credit over the tax deduction for the foreign taxes. When establishing the valuation allowance, we considered the levels of historical and forecasted taxable and foreign source income, the duration of statutory carryforward periods, and our experience with net operating losses and tax credit carryforwards. Based on that analysis and the expiration period of the foreign tax credit carryforward, we recorded the valuation allowance discussed above.

In 2012, we released the valuation allowance with respect to the foreign tax credits of \$15.7 million. The release was a result of increased foreign source income due to changes to certain supply contracts resulting in additional foreign source income and positive recent trending of other foreign source income, primarily from our export sales and reduced expense allocations. These items changed the mix of income by recharacterizing domestic source income to foreign source income; thus increasing our ability to utilize the foreign tax credits.

During March 2010, President Obama signed into law comprehensive health care reform legislation under the Patient Protection and Affordable Care Act and the Health Care and Education Reconciliation Act of 2010 (together, the Act). The federal government currently provides a partial subsidy, on a tax-free basis, to companies that provide certain retiree prescription drug benefits (the Medicare Part D subsidy). The Act reduces the tax deductibility of retiree health care costs to the extent of any Medicare Part D subsidy received beginning in 2013. As a result of this change in tax treatment, a non-cash income tax charge of approximately \$22 million was recorded in the first quarter of 2010.

We recognize the tax benefits of an uncertain tax position only if those benefits are more likely than not to be sustained based on existing tax law. Additionally, we establish a reserve for tax positions that are more likely than not to be sustained based on existing tax law, but uncertain in the ultimate benefit to be sustained upon examination by the relevant taxing authorities. Unrecognized tax benefits are subsequently recognized at the time the more likely than not recognition threshold is met, the tax matter is effectively settled or the statute of limitations for the relevant taxing authority to examine and challenge the tax position has expired, whichever is earlier.

We have \$138.4 million of Unrecognized Tax Benefits (UTB) as of December 31, 2012, \$90.6 million (\$88.1 million, net of federal benefit) of this amount, if recognized in future periods, would impact the reported effective tax rate.

It is reasonably possible that certain UTB s may increase or decrease within the next twelve months due to tax examination changes, settlement activities, expirations of statute of limitations, or the impact on recognition and measurement considerations related to the results of published tax cases or other similar activities. Over the next twelve months, we estimate that UTB s may decrease by \$0.7 million due to statutes expiring and increase by \$6.9 million due to uncertain tax positions expected to be taken on tax returns.

We account for all interest and penalties on uncertain income tax positions as income tax expense. We reported \$1.9 million of interest and penalty exposure as accrued income tax in the Consolidated Balance Sheet as of December 31, 2012.

We conduct business globally, and as a result, we file income tax returns in the U.S., various states and international jurisdictions. In the normal course of business, we are subject to examination by taxing authorities throughout the world in such major jurisdictions as Australia, Canada, Germany, India, the Netherlands, the United Kingdom and the United States. Generally, we have open tax years subject to tax audit on average of between three years and six years. Our U.S. income tax returns from 2007 to 2009 are currently under review by the IRS. With respect to these years, we have extended the statute of limitations to June 30, 2014. All tax years prior to 2007 have been settled with the IRS. With few exceptions, the statute of limitations is no longer open for state or non-U.S. income tax examinations for the years before 2007. Other than the U.S., we have not significantly extended any open statutes of limitation for any major jurisdiction and have reviewed and accrued for, where necessary, tax liabilities for open periods. The tax years 2007 through 2011 are subject to future potential tax adjustments.

Total long-term debt, less current portion	\$ 1,038.0	3.76%	\$ 822.9	3.80%

On November 23, 2010, we refinanced our \$1.1 billion credit facility and executed a \$1.05 billion senior credit facility. This facility consisted of a \$250 million revolving credit facility (with a \$150 million sublimit for letters of credit), a \$250 million Term Loan A and a \$550 million Term Loan B. This \$1.05 billion senior credit facility was secured by U.S. personal property, the capital stock of material U.S. subsidiaries, and a pledge of 65% of the stock of our material first tier foreign subsidiaries. In 2010, in connection with the refinancing, we repaid amounts owed under the previous credit facility and wrote off \$3.8 million of unamortized debt financing costs related to our previous credit facility to interest expense.

On March 10, 2011, we amended our \$1.05 billion senior credit facility. The amended terms of Term Loan B resulted in a lower LIBOR floor (1.0% vs. 1.5%) and interest rate spread (3.0% vs. 3.5%). We also extended its maturity from May 2017 to March 2018. All other terms, conditions and covenants were unchanged from the November 23, 2010 agreement. In connection with the amendment to Term Loan B, we paid

Edgar Filing: ARMSTRONG WORLD INDUSTRIES INC - Form 10-K

a \$5.5 million prepayment premium (representing one percent of the principal amount of Term Loan B). The premium was capitalized and is being amortized into interest expense over the life of the loan. Additionally, we paid approximately \$1.6 million of fees to third parties which was reflected in interest expense.

On March 22, 2012, we amended our \$1.05 billion senior credit facility. We added \$250 million to our existing Term Loan B facility. The amended \$1.3 billion facility is made up of a \$250 million revolving credit facility (with a \$150 million sublimit for letters of credit), a \$250 million Term Loan A and an \$800 million Term Loan B. The facility is secured by U.S. personal property, the capital stock of material U.S. subsidiaries, and a pledge of 65% of the stock of our material first tier foreign subsidiaries. In connection with the additional \$250 million Term Loan B borrowings, we paid \$8.1 million for bank fees. This amount was capitalized and is being amortized into interest expense over the life of the loan.

Table of Contents

Armstrong World Industries, Inc., and Subsidiaries

Notes to Consolidated Financial Statements

(dollar amounts in millions)

The senior credit facility includes two financial covenants which require the ratio of consolidated earnings before interest, taxes, depreciation and amortization (EBITDA) to consolidated cash interest expense minus cash consolidated interest income (consolidated interest coverage ratio) to be greater than or equal to 3.0 to 1.0 and require the ratio of consolidated funded indebtedness minus AWI and domestic subsidiary unrestricted cash and cash equivalents up to \$100 million to consolidated EBITDA (consolidated leverage ratio) to be less than or equal to 4.5 to 1.0 through December 31, 2013, 4.0 to 1.0 through March 31, 2015, and 3.75 to 1.0 thereafter. Our debt agreements include other restrictions, including restrictions pertaining to the acquisition of additional debt, the redemption, repurchase or retirement of our capital stock, payment of dividends, and certain financial transactions as it relates to specified assets. We currently believe that default under these covenants is unlikely. Fully borrowing under our revolving credit facility would not violate these covenants. As of December 31, 2012 we were in compliance with all covenants of the credit agreement.

The Revolving Credit and Term Loan A portions are currently priced at a spread of 3.0% over LIBOR and the Term Loan B portion is priced at 3.0% over LIBOR with a 1.0% LIBOR floor for its entire term. The Term Loan A and Term Loan B were both fully drawn and are currently priced on a variable interest rate basis. The unpaid balances of Term Loan A (\$237.5 million), Revolving Credit (\$0 million) and Term Loan B (\$788.5 million) of the credit facility may be prepaid without penalty at the maturity of their respective interest reset periods. Any amounts prepaid on the Term Loan A or Term Loan B may not be re-borrowed.

Under the senior credit facility beginning December 31, 2013, we are subject to year-end leverage tests that may trigger mandatory prepayments. If our consolidated leverage ratio is greater than 2.0 to 1.0 but less than 2.5 to 1.0 as of December 31, 2013, we would be required to make a prepayment of 25% of fiscal year Consolidated Excess Cash Flow as defined by the credit agreement. If our Consolidated Leverage Ratio is greater than 2.5 to 1.0, the prepayment amount would be 50% of fiscal year Consolidated Excess Cash Flow. These annual payments would be made beginning in the first quarter of 2014.

We have a \$100 million Accounts Receivable Securitization Facility with the Bank of Nova Scotia (the funding entity). The purchase and letter of credit commitments under the program are due to expire in December 2014. Under this agreement Armstrong World Industries and Armstrong Hardwood Flooring Company (the Originators) sell their accounts receivables to Armstrong Receivables Company, LLC (ARC), a Delaware entity that is consolidated in these financial statements. ARC is a 100% wholly owned single member LLC special purpose entity created specifically for this transaction, therefore any receivables sold to ARC are not available to the general creditors of AWI. ARC then sells an undivided interest in the purchased accounts receivables to the funding entity. This undivided interest acts as collateral for drawings on the facility. Any borrowings under this facility are obligations of ARC and not AWI. ARC contracts with and pays a servicing fee to Armstrong World Industries to manage, collect and service the purchased accounts receivables.

All new receivables under the program generated by the originators are continuously purchased by ARC with the proceeds from collections of receivables previously purchased. Ongoing changes in the amount of funding under the program, through changes in the amount of undivided interests sold by ARC, reflect seasonal variations in the level of accounts receivable, changes in collection trends and other factors such as changes in sales prices and volumes. ARC has issued subordinated notes payable to the originators for the difference between the face amount of uncollected accounts receivable purchased, less a discount, and cash paid to the originators that was funded by the sale of the undivided interests. The subordinated notes issued by ARC are subordinated to the undivided interests of the funding entity in the purchased receivables. The balance of the subordinated notes payable, which are eliminated in consolidation, totaled \$100.6 million and \$98.3 million as of December 31, 2012 and December 31, 2011, respectively. As of December 31, 2012 we had no borrowings under this facility but had \$56.7 million of letters of credit issued under the facility.

On December 16, 2010 we issued \$35.0 million of Recovery Zone Facility bonds through Jackson County, West Virginia to finance the construction of our new mineral wool plant. These tax exempt bonds are seven day variable rate demand notes backed by a letter of credit. These bonds mature in 2041.

None of the remaining outstanding debt as of December 31, 2012 was secured with buildings and other assets. The credit lines at our foreign subsidiaries are subject to immaterial annual commitment fees.

Table of Contents

Armstrong World Industries, Inc., and Subsidiaries

Notes to Consolidated Financial Statements

(dollar amounts in millions)

Scheduled payments of long-term debt:

2013	\$ 33.0
2014	45.5
2015	183.0
2016	8.0
2017	8.1
2018 and later	793.4

We utilize lines of credit and other commercial commitments in order to ensure that adequate funds are available to meet operating requirements. On December 31, 2012, we had a \$250 million revolving credit facility with a \$150 million sublimit for letters of credit, of which \$14.7 million was outstanding. There were no borrowings under the revolving credit facility. Availability under this facility totaled \$235.3 million as of December 31, 2012. We also have the \$100 million securitization facility which as of December 31, 2012 had letters of credit outstanding of \$56.7 million and no borrowings against it. Maximum capacity under this facility was \$59.8 million (of which \$3.1 million was available), subject to accounts receivable balances and other collateral adjustments, as of December 31, 2012. As of December 31, 2012, our foreign subsidiaries had available lines of credit totaling \$17.3 million of which \$1.7 million was available only for letters of credit and guarantees. There were \$0.8 million of letters of credit and guarantees issued under these credit lines as of December 31, 2012, leaving an additional letter of credit availability of \$0.9 million. There were no borrowings under these lines of credit as of December 31, 2012 leaving \$15.6 million of unused lines of credit available for foreign borrowings.

On December 31, 2012, we had outstanding letters of credit totaling \$71.7 million, of which \$14.7 million was issued under the revolving credit facility, \$56.7 million was issued under the securitization facility and \$0.3 million of international subsidiary letters of credit were issued by other banks. Letters of credit are issued to third party suppliers, insurance and financial institutions and typically can only be drawn upon in the event of AWI's failure to pay its obligations to the beneficiary.

NOTE 19. PENSION AND OTHER BENEFIT PROGRAMS

We have defined benefit pension plans and postretirement medical and insurance benefit plans covering eligible employees worldwide. We also have defined-contribution pension plans for eligible employees. Benefits from defined benefit pension plans, which cover most employees worldwide, are based primarily on an employee's compensation and years of service. We fund our pension plans when appropriate. We fund postretirement benefits on a pay-as-you-go basis, with the retiree paying a portion of the cost for health care benefits by means of deductibles and contributions.

UNITED STATES PLANS

The following tables summarize the balance sheet impact of the pension and postretirement benefit plans, as well as the related benefit obligations, assets, funded status and rate assumptions. The pension benefits disclosures include both the qualified, funded Retirement Income Plan (RIP) and the Retirement Benefit Equity Plan, which is a nonqualified, unfunded plan designed to provide pension benefits in excess of the limits defined under Sections 415 and 401(a)(17) of the Internal Revenue Code.

We use a December 31 measurement date for our U.S. defined benefit plans.

Interest cost on projected benefit obligation	90.7	92.3	96.4
Expected return on plan assets	(140.0)	(152.5)	(167.0)
Amortization of prior service cost	1.9	1.9	1.8
Recognized net actuarial loss	23.4	19.2	4.3
Net periodic pension credit	(\$ 8.3)	(\$ 23.5)	(\$ 48.1)

Investment Policies

The RIP's primary investment objective is to maintain the funded status of the plan such that the likelihood that we will be required to make significant contributions to the plan is limited. This objective is to be achieved by:

Investing a substantial portion of the plan assets in high quality corporate bonds whose duration is at least equal to that of the plan's liabilities such that there is a relatively high correlation between the movements of the plan's liability and asset values.

Investing in publicly traded equities in order to increase the ratio of plan assets to liabilities over time.

Table of Contents

Armstrong World Industries, Inc., and Subsidiaries

Notes to Consolidated Financial Statements

(dollar amounts in millions)

Limiting investment return volatility by diversifying among additional asset classes with differing expected rates of return and return correlations.

Using derivatives to either implement investment positions efficiently or to hedge risk but not to create investment leverage. Each asset class utilized by the RIP has a defined asset allocation target and allowable range. The table below shows the asset allocation target and the December 31, 2012 and 2011 position for each asset class:

Asset Class	Target Weight	Position at December 31,	
	at December 31, 2012	2012	2011
Domestic equity	11%	12%	17%
International equity	13%	12%	18%
Global equity	6%	7%	
High yield bonds	5%	5%	5%
Long duration bonds	59%	57%	53%
Real estate	5%	5%	6%
Other fixed income	1%	2%	1%

The change in position from December 31, 2011 to December 31, 2012 reflects a planned change in our allocation targets.

Pension plan assets are required to be reported and disclosed at fair value in the financial statements. Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. Three levels of inputs may be used to measure fair value:

Level 1 Quoted prices in active markets for identical assets or liabilities.

Level 2 Observable inputs other than quoted prices included in Level 1, such as quoted prices for similar assets and liabilities in active markets; quoted prices for identical or similar assets and liabilities in markets that are not active; or other inputs that are observable or can be corroborated by observable market data.

Level 3 Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities. This includes certain pricing models, discounted cash flow methodologies and similar techniques that use significant unobservable inputs.

The asset's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

The following table sets forth by level within the fair value hierarchy a summary of the RIP's assets measured at fair value on a recurring basis:

Description	Value at December 31, 2012			Total
	Level 1	Level 2	Level 3	
Long duration bonds		\$ 1,166.1	\$ 0.9	\$ 1,167.0
Domestic equity	\$ 147.0	99.9		246.9

Edgar Filing: ARMSTRONG WORLD INDUSTRIES INC - Form 10-K

International equity	53.1	201.8		254.9
Global equity	128.6			128.6

Balance, December 31, 2012	\$ 103.3	\$ 5.5	\$ 0.9	\$ 109.7

Following is a description of the valuation methodologies used for assets measured at fair value.

There have been no changes in the methodologies used at December 31, 2012 and 2011.

Long Duration Bonds: Consists of investments in individual corporate bonds as well as investments in registered investment funds and common and collective trust funds investing in fixed income securities tailored to institutional investors. Certain corporate bonds are valued based on a compilation of primarily observable market information or a broker quote in a non-active market. There are no readily available market quotations for registered investment company funds or common collective trust funds. The fair value is based on the underlying securities in the fund's portfolio which is typically the amount which the fund might reasonably expect to receive for the security upon a current sale.

Domestic, International and Global equity securities: Consists of investments in common and preferred stocks as well as investments in registered investment funds investing in equities tailored to institutional investors. Common and preferred stocks are valued at the closing price reported on the active market on which the individual securities are traded. There are no readily available market quotations for registered

Edgar Filing: ARMSTRONG WORLD INDUSTRIES INC - Form 10-K

investment company funds. The fair value is based on the underlying securities in the fund's portfolio which is typically the amount which the fund might reasonably expect to receive for the security upon a current sale.

High Yield Bonds: Consists of investments in individual corporate bonds as well as an investment in a registered investment fund investing in fixed income securities tailored to institutional investors. Certain corporate bonds are

Table of Contents

Armstrong World Industries, Inc., and Subsidiaries

Notes to Consolidated Financial Statements

(dollar amounts in millions)

valued based on a compilation of primarily observable market information or a broker quote in a non-active market. There are no readily available market quotations for registered investment company funds. The fair value is based on the underlying securities in the fund's portfolio which is typically the amount which the fund might reasonably expect to receive for the security upon a current sale.

Real Estate: The RIP's real estate investments are comprised of both open-end and closed-end funds. There are no readily available market quotations for these real estate funds. The fund's fair value is based on the underlying real estate assets held by the fund. Underlying real estate assets are valued on the basis of a discounted cash flow approach, which includes the future rental receipts, expenses and residual values as the highest and best use of the real estate from a market participant view. Independent appraisals may also be used to determine fair value for the underlying assets of these funds.

Other Investments: Consists of investments in a group insurance annuity contract and a limited partnership. The fair value for the group insurance annuity contract was determined by discounting the related cash flows based on current yields of similar instruments with comparable durations considering the credit-worthiness of the issuer. For our investment in the limited partnership, the majority of the partnership's underlying securities are invested in publicly traded securities which are valued at the closing price reported on the active market on which the individual securities are traded. The remaining other investments within the partnership are valued based on available inputs, including recent financing rounds, comparable company valuations, and other available data. The investment in the limited partnership is non-redeemable until the expiration of the term of the agreement.

Money Market Investments: The money market investment consists of an institutional investor mutual fund, valued at the fund's net asset value (NAV) which is normally calculated at the close of business daily.

Short Term Investments and other, net: Cash and short term investments consist of cash and cash equivalents and other payables and receivables (net). The carrying amounts of cash and cash equivalents approximate fair value due to the short-term maturity of these instruments. Other payables and receivables consist primarily of margin on account for a fund, accrued fees and receivables related to investment positions liquidated for which proceeds had not been received at December 31. The carrying amounts of payables and receivables approximate fair value due to the short-term nature of these instruments.

The RIP has \$1,102.8 million and \$1,012.1 million of investments in alternative investment funds at December 31, 2012 and December 31, 2011, respectively, which are reported at fair value, and we have concluded that the net asset value reported by the underlying fund approximates the fair value of the investment. These investments are redeemable at NAV under agreements with the underlying funds. However, it is possible that these redemption rights may be restricted or eliminated by the funds in the future in accordance with the underlying fund agreements. Due to the nature of the investments held by the funds, changes in market conditions and the economic environment may significantly impact the NAV of the funds and, consequently, the fair value of the RIP's interest in the funds. Furthermore, changes to the liquidity provisions of the funds may significantly impact the fair value of the RIP's interest in the funds.

Basis of Rate-of-Return Assumption

Long-term asset class return assumptions are determined based on input from investment professionals on the expected performance of the asset classes over 10 to 20 years. The forecasts were averaged to come up with consensus passive return forecasts for each asset class. An incremental component was added for the expected return from active management based both on the RIP's experience and on historical information obtained from the RIP's investment consultants. These forecast gross returns were reduced by estimated management fees and expenses, yielding a long-term return forecast of 6.5% per annum for 2012.

Plan amendments		(3.0)
Effect of curtailments		(8.4)
Actuarial (gain) loss	(17.4)	9.8
Benefits paid, gross	(28.9)	(29.8)
Medicare subsidy receipts	0.9	2.5
Benefit obligation as of end of period	\$ 271.8	\$ 297.7

	2012	2011
Change in plan assets:		
Fair value of plan assets as of beginning of period		
Employer contribution	\$ 22.0	\$ 21.3
Plan participants' contributions	6.0	6.0
Benefits paid, gross	(28.9)	(29.8)
Medicare subsidy receipts	0.9	2.5
Fair value of plan assets as of end of period	\$	\$
Funded status of the plans	(\$ 271.8)	(\$ 297.7)

	2012	2011
<u>U.S. defined-benefit retiree health and life insurance plans</u>		
Weighted-average discount rate used to determine benefit obligations at end of period	3.75%	4.75%
Weighted-average discount rate used to determine net periodic benefit cost for the period	4.75%	4.90%

The components of postretirement benefits costs are as follows:

	2012	2011	2010
<u>U.S. defined-benefit retiree health and life insurance plans</u>			
Service cost of benefits earned during the period	\$ 1.2	\$ 2.1	\$ 2.4
Interest cost on accumulated postretirement benefit obligation	12.3	14.1	14.8
Amortization of prior service cost	(0.6)	(0.1)	
Amortization of net actuarial gain	(7.5)	(2.1)	(6.3)

Edgar Filing: ARMSTRONG WORLD INDUSTRIES INC - Form 10-K

Net periodic postretirement benefit cost	\$ 5.4	\$ 14.0	\$ 10.9
--	--------	---------	---------

As a result of the elimination of future benefits for certain employees, we recorded a curtailment gain of \$8.4 million in 2011 in cost of goods sold. This gain is not reflected in the table above.

For measurement purposes, an average rate of annual increase in the per capita cost of covered health care benefits of 7.6% for pre-65 retirees and 7.8% for post-65 retirees was assumed for 2012, decreasing ratably to an ultimate rate of 5% in 2019. Assumed health care cost trend rates have a significant effect on the amounts

Table of Contents

Armstrong World Industries, Inc., and Subsidiaries

Notes to Consolidated Financial Statements

(dollar amounts in millions)

reported for the health care plans. A one-percentage-point change in assumed health care cost trend rates would have the following effects:

	One percentage point	
	Increase	Decrease
<u>U.S. retiree health and life insurance benefits plans</u>		
Effect on total service and interest cost components	\$ 3.7	(\$ 2.8)
Effect on postretirement benefit obligation	9.3	(8.4)

Amounts recognized in assets and (liabilities) at year end consist of:

	Pension Benefits		Retiree Health and Life Insurance Benefits	
	2012	2011	2012	2011
Prepaid pension costs	\$ 39.6	\$ 58.0		
Accounts payable and accrued expenses	(3.8)	(3.7)	(\$ 23.3)	(\$ 25.5)
Postretirement benefit liabilities			(248.5)	(272.2)
Pension benefit liabilities	(56.1)	(45.7)		
Net amount recognized	(\$ 20.3)	\$ 8.6	(\$ 271.8)	(\$ 297.7)

Pre-tax amounts recognized in accumulated other comprehensive income (loss) at year end consist of:

	Pension Benefits		Retiree Health and Life Insurance Benefits	
	2012	2011	2012	2011
Net actuarial (loss) gain	(\$ 737.2)	(\$ 694.1)	\$ 56.0	\$ 45.9
Prior service (cost) credit	(9.5)	(11.4)	2.2	2.8
Accumulated other comprehensive (loss) income	(\$ 746.7)	(\$ 705.5)	\$ 58.2	\$ 48.7

We expect to amortize \$41.8 million of previously unrecognized prior service cost and net actuarial losses into the pension credit in 2013. We expect to amortize \$4.1 million of previously unrecognized net actuarial gains and prior service credits into postretirement benefit cost in 2013.

We expect to contribute \$3.8 million to our U.S. defined benefit pension plans and \$23.3 million to our U.S. postretirement benefit plans in 2013.

The following benefit payments, which reflect expected future service, as appropriate, are expected to be paid over the next ten years for our U.S. plans:

Edgar Filing: ARMSTRONG WORLD INDUSTRIES INC - Form 10-K

	Pension Benefits	Retiree Health and Life Insurance Benefits, Gross	Retiree Health Medicare Subsidy Receipts
2013	\$ 129.9	\$ 24.4	(\$ 1.1)
2014	130.8	24.3	(1.2)
2015	130.5	24.2	(1.3)
2016	131.5	22.7	(1.3)
2017	132.0	22.0	(1.5)
2018 - 2022	673.1	97.9	(9.0)

These estimated benefit payments are based on assumptions about future events. Actual benefit payments may vary significantly from these estimates.

NON-U.S. PLANS

We have defined benefit pension plans covering employees in a number of foreign countries that utilize assumptions which are consistent with, but not identical to, those of the U.S. plans. The following tables summarize the balance sheet impact of foreign pension benefit plans, as well as the related benefit obligations, assets, funded status and rate assumptions.

We use a December 31 measurement date for all of our non-U.S. defined benefit plans.

	2012	2011
<u>Non-U.S. defined-benefit pension plans</u>		
Change in benefit obligation:		
Benefit obligation as of beginning of period	\$ 355.9	\$ 354.6
Service cost	2.1	3.6
Interest cost	15.7	17.9
Plan participants' contributions	0.2	0.8
Foreign currency translation adjustment	12.3	(1.6)
Effects of plan settlements and curtailments		(1.0)
Actuarial loss	42.8	15.8
Benefits paid	(23.8)	(34.2)
Benefit obligation as of end of period	\$ 405.2	\$ 355.9

	2012	2011
Change in plan assets:		
Fair value of plan assets as of beginning of period	\$ 184.0	\$ 188.7
Actual return on plan assets	16.7	10.7
Employer contribution	17.9	17.5
Plan participants' contributions	0.2	0.8
Foreign currency translation adjustment	7.5	0.5
Benefits paid	(23.8)	(34.2)
Fair value of plan assets as of end of period	\$ 202.5	\$ 184.0
Funded status of the plans	(\$ 202.7)	(\$ 171.9)

	2012	2011
<u>Non-U.S. defined-benefit pension plans</u>		
Weighted-average assumptions used to determine benefit obligations at end of period:		
Discount rate	3.50%	4.50%
Rate of compensation increase	2.60%	3.10%

Edgar Filing: ARMSTRONG WORLD INDUSTRIES INC - Form 10-K

Weighted-average assumptions used to determine net periodic benefit cost for the period:		
Discount rate	4.50%	5.00%
Expected return on plan assets	5.40%	6.60%
Rate of compensation increase	3.10%	3.10%
	2012	2011
<u>Non-U.S. pension plans with benefit obligations in excess of assets</u>		
Projected benefit obligation, December 31	\$ 405.2	\$ 354.8
Accumulated benefit obligation, December 31	396.3	347.6
Fair value of plan assets, December 31	202.5	182.9

Table of Contents

Armstrong World Industries, Inc., and Subsidiaries

Notes to Consolidated Financial Statements

(dollar amounts in millions)

The components of the pension cost are as follows:

	2012	2011	2010
<u>Non-U.S. defined-benefit pension plans</u>			
Service cost of benefits earned during the period	\$ 2.1	\$ 3.6	\$ 5.4
Interest cost on projected benefit obligation	15.7	17.9	18.3
Expected return on plan assets	(10.3)	(13.2)	(13.4)
Amortization of net actuarial loss	1.4	0.3	0.3
Net periodic pension cost	\$ 8.9	\$ 8.6	\$ 10.6

Investment Policies

Each of the funded non-U.S. pension plans primary investment objectives is to earn sufficient long-term returns on investments both to increase the ratio of the assets to liabilities in order for the plans to meet their benefits obligations and to minimize required cash contributions to the plans. This is to be achieved by (a) investing primarily in publicly-traded equities, (b) limiting return volatility by diversifying investments among additional asset classes with differing expected rates of return and return correlations, and (c) utilizing long duration bonds to limit the volatility of the plans asset/liability ratios.

Each of the plans has a targeted asset allocation for each asset class. The table below shows, for each asset class, the weighted average of the several plans asset allocation targets and positions at December 31, 2012 and 2011:

Asset Class	Target Weight	Position at December 31,	
	at December 31, 2012	2012	2011
Equities	41%	42%	41%
Long duration bonds	49%	49%	49%
Other fixed income	1%	1%	1%
Real estate	9%	8%	9%

The following table sets forth by level within the fair value hierarchy a summary of our non-U.S. plan assets measured at fair value on a recurring basis:

Description	Value at December 31, 2012		
	Level 1	Level 2	Total
Bonds		\$ 100.6	\$ 100.6
Equities		84.7	84.7
Real estate		15.6	15.6
Cash and other short term investments	\$ 1.6		1.6
Net assets	\$ 1.6	\$ 200.9	\$ 202.5

Edgar Filing: ARMSTRONG WORLD INDUSTRIES INC - Form 10-K

Description	Value at December 31, 2011		
	Level 1	Level 2	Total
Bonds		\$ 93.0	\$ 93.0
Equities		74.4	74.4
Real estate		15.3	15.3
Cash and other short term investments	\$ 1.3		1.3
Net assets	\$ 1.3	\$ 182.7	\$ 184.0

Following is a description of the valuation methodologies used for non-U.S. plan assets measured at fair value. There have been no changes in the methodologies used at December 31, 2012 and 2011.

Table of Contents

Armstrong World Industries, Inc., and Subsidiaries

Notes to Consolidated Financial Statements

(dollar amounts in millions)

Bonds: Consists of investments in individual corporate bonds as well as investments in pooled funds investing in fixed income securities tailored to institutional investors. Certain corporate bonds are valued at the closing price reported in the active market in which the bond is traded. There are no readily available market quotations for pooled funds. The fair value is based on the underlying securities in the fund's portfolio which is typically the amount which the fund might reasonably expect to receive for the security upon a current sale.

Equities: Consists of investments in common and preferred stocks as well as investments in pooled funds investing in international equities tailored to institutional investors. Equity securities are valued at the closing price reported on the active market on which the individual securities are traded. There are no readily available market quotations for pooled funds. The fair value is based on the underlying securities in the fund's portfolio which is typically the amount which the fund might reasonably expect to receive for the security upon a current sale.

Real Estate: The plans' real estate investments are comprised of pooled real estate mutual funds valued based on a compilation of primarily observable market information or a broker quote in a non-active market.

Cash and other Short Term Investments: Cash and short term investments consist primarily of cash and cash equivalents, and plan receivables/payables. The carrying amounts of cash and cash equivalents and receivables/payables approximate fair value due to the short-term nature of these instruments.

The non-U.S. pension plans have \$200.4 million and \$182.2 million of investments in alternative investment funds at December 31, 2012 and December 31, 2011, respectively, which are reported at fair value. We have concluded that the net asset value reported by the underlying fund approximates the fair value of the investment. These investments are redeemable at net asset value under agreements with the underlying funds. However, it is possible that these redemption rights may be restricted or eliminated by the funds in the future in accordance with the underlying fund agreements. Due to the nature of the investments held by the funds, changes in market conditions and the economic environment may significantly impact the net asset value of the funds and, consequently, the fair value of the plans' interest in the funds. Furthermore, changes to the liquidity provisions of the funds may significantly impact the fair value of the plans' interest in the funds.

Basis of Rate-of-Return Assumption

Long-term asset class return forecasts were obtained from investment professionals. The forecasts were averaged to come up with consensus passive return forecasts for each asset class. These forecast asset class returns were weighted by the plans' target asset class weights, yielding a long-term return forecast of 5.4% and 6.6% for the years ended December 31, 2012 and 2011, respectively.

Amounts recognized in the consolidated balance sheets consist of:

	2012	2011
Accounts payable and accrued expenses	(\$ 11.0)	(\$ 10.9)
Pension benefit liabilities	(191.7)	(161.0)
Net amount recognized	(\$ 202.7)	(\$ 171.9)

Pre-tax amounts recognized in accumulated other comprehensive income (loss) at year end consist of:

2012	2011
------	------

Edgar Filing: ARMSTRONG WORLD INDUSTRIES INC - Form 10-K

Net actuarial (loss)	(\$ 62.7)	(\$ 25.9)
Accumulated other comprehensive (loss)	(\$ 62.7)	(\$ 25.9)

We expect to amortize \$2.6 million of previously unrecognized net actuarial losses into pension cost in 2013.

The accumulated benefit obligation for the non-U.S. defined benefit pension plans was \$396.3 million and \$348.8 million at December 31, 2012 and 2011, respectively.

We expect to contribute \$15.5 million to our non-U.S. defined benefit pension plans in 2013.

Table of Contents

Armstrong World Industries, Inc., and Subsidiaries

Notes to Consolidated Financial Statements

(dollar amounts in millions)

The following benefit payments, which reflect expected future service, as appropriate, are expected to be paid over the next ten years:

	Pension Benefits
2013	\$ 19.6
2014	19.7
2015	20.9
2016	20.8
2017	21.3
2018 - 2022	115.9

Costs for other worldwide defined contribution benefit plans and multiemployer pension plans were \$13.6 million in 2012, \$12.8 million in 2011 and \$11.7 million in 2010.

NOTE 20. FINANCIAL INSTRUMENTS

We do not hold or issue financial instruments for trading purposes. The estimated fair values of our financial instruments are as follows:

	December 31, 2012		December 31, 2011	
	Carrying amount	Estimated fair value	Carrying amount	Estimated fair value
Assets/(Liabilities), net:				
Total debt, including current portion	(\$ 1,071.0)	(\$ 1,075.9)	(\$ 843.0)	(\$ 835.2)
Foreign currency contract obligations	(1.8)	(1.8)	1.1	1.1
Natural gas contracts	(2.7)	(2.7)	(9.3)	(9.3)
Interest rate swap contracts	(25.7)	(25.7)	(14.0)	(14.0)

The carrying amounts of cash and cash equivalents of \$336.4 million at December 31, 2012 and \$480.6 million at December 31, 2011 (made up of bank deposits), receivables, accounts payable and accrued expenses, short-term debt and current installments of long-term debt approximate fair value because of the short-term maturity of these instruments. The fair value estimates of long-term debt were based upon quotes from a major financial institution of recently observed trading levels of our Term Loan B debt. The fair value estimates of foreign currency contract obligations are estimated from market quotes provided by a well recognized national market data provider. The fair value estimates of natural gas contracts are estimated using internal valuation models with verification by obtaining quotes from major financial institutions. For swap transactions, fair value is calculated using NYMEX market quotes provided by a well recognized national market data provider. For option based strategies, fair value is calculated using an industry standard Black-Scholes model with market based inputs, including but not limited to, underlying asset price, strike price, implied volatility, discounted risk free rate and time to expiration, provided by a well recognized national market data provider. The fair value estimates for interest rate swap contracts are estimated by obtaining quotes from major financial institutions with verification by internal valuation models.

As of December 31, 2012 we had no restricted cash on our balance sheet. As of December 31, 2011, we had \$1.5 million of restricted cash held by a trustee related to the construction of our Millwood, WV mineral wool plant. The trustee had invested the cash in money market investments. The carrying value on our balance sheet approximated the fair value because of the short-term maturity of the instruments.

Refer to Note 19 for a discussion of fair value and the related inputs used to measure fair value.

NOTE 21. DERIVATIVE FINANCIAL INSTRUMENTS

We are exposed to market risk from changes in foreign exchange rates, interest rates and commodity prices that could impact our results of operations, cash flows and financial condition. We use forward swaps and option contracts to hedge these exposures. Exposure to individual counterparties is controlled and derivative financial instruments are entered into with a diversified group of major financial institutions. Forward swaps and option contracts are entered into for periods consistent with underlying exposure and do not constitute positions independent of those exposures. At inception, hedges that we designate as hedging instruments are formally documented as either (1) a hedge of a forecasted transaction or cash flow hedge, or (2) a hedge of the fair value of a recognized liability or asset or fair value hedge. We also formally assess both at inception and at least quarterly thereafter, whether the derivatives that are used in hedging transactions are highly effective in offsetting changes in either the fair value or cash flows of the hedged item. If it is determined that a derivative ceases to be a highly effective hedge, or if the anticipated transaction is no longer probable of occurring, we discontinue hedge accounting, and any future mark-to-market adjustments are recognized in earnings. We use derivative financial instruments as risk management tools and not for speculative trading purposes.

Counterparty Risk

We only enter into derivative transactions with established counterparties having a credit rating of BBB or better. We monitor counterparty credit default swap levels and credit ratings on a regular basis. All of our derivative transactions with counterparties are governed by master International Swap and Derivatives Association agreements (ISDAs) with netting arrangements. These agreements can limit our exposure in situations where we have gain and loss positions outstanding with a single counterparty. We do not post nor do we receive cash collateral with any counterparty for our derivative transactions. As of December 31, 2012, we had no cash collateral posted or received for any of our derivative transactions. These ISDAs do not have any credit contingent features; however, a default under our bank credit facility would trigger a default under these agreements. Exposure to individual counterparties is controlled, and thus we consider the risk of counterparty default to be negligible.

Commodity Price Risk

We purchase natural gas for use in the manufacture of ceiling tiles and other products, and to heat many of our facilities. As a result, we are exposed to fluctuations in the price of natural gas. We have a policy to reduce cost volatility for North American natural gas purchases by purchasing natural gas forward contracts and swaps, purchased call options, and zero-cost collars up to 24 months forward to reduce our overall exposure to natural gas price movements. There is a high correlation between the hedged item and the hedged instrument. The gains and losses on these transactions offset gains and losses on the transactions being hedged. These instruments are designated as cash flow hedges. At

Edgar Filing: ARMSTRONG WORLD INDUSTRIES INC - Form 10-K

December 31, 2012 and December 31, 2011, the notional amount of these hedges was \$21.5 million and \$47.2 million, respectively. The mark-to-market gain or loss on qualifying hedges is included in other comprehensive income to the extent effective, and reclassified into cost of goods sold in the period during which the underlying gas is consumed. The mark-to-market gains or losses on

Table of Contents

Armstrong World Industries, Inc., and Subsidiaries

Notes to Consolidated Financial Statements

(dollar amounts in millions)

ineffective portions of hedges are recognized in cost of goods sold immediately. The earnings impact of the ineffective portion of these hedges was not material for the years ended December 31, 2012 and 2011. The contracts are based on forecasted usage of natural gas measured in mmBtu s.

Currency Rate Risk Sales and Purchases

We manufacture and sell our products in a number of countries throughout the world and, as a result, we are exposed to movements in foreign currency exchange rates. To a large extent, our global manufacturing and sales provide a natural hedge of foreign currency exchange rate movement, as foreign currency expenses generally offset foreign currency revenues. We manage our cash flow exposures on a net basis and use derivatives to hedge the majority of our unmatched foreign currency cash inflows and outflows. As of December 31, 2012, our major, pre-hedging foreign currency exposures are to the Canadian dollar, the Australian dollar and the Euro.

We use foreign currency forward exchange contracts to reduce our exposure to the risk that the eventual net cash inflows and outflows resulting from the sale of products to foreign customers and purchases from foreign suppliers will be adversely affected by changes in exchange rates. These derivative instruments are used for forecasted transactions and are classified as cash flow hedges. Cash flow hedges are executed quarterly, generally up to 15 months forward, and allow us to further reduce our overall exposure to exchange rate movements, since gains and losses on these contracts offset gains and losses on the transactions being hedged. The notional amount of these hedges was \$129.7 million and \$128.3 million at December 31, 2012 and December 31, 2011, respectively. Gains and losses on these instruments are recorded in other comprehensive income, to the extent effective, until the underlying transaction is recognized in earnings. The earnings impact of the ineffective portion of these hedges was not material for the years ended December 31, 2012 and 2011.

Currency Rate Risk Intercompany Loans and Dividends

We also use foreign currency forward exchange contracts to hedge exposures created by cross-currency intercompany loans and dividends. The translation adjustments related to these loans are recorded in other non-operating income or expense. The offsetting gains or losses on the related derivative contracts are also recorded in other non-operating income or expense. These contracts are decreased or increased as repayments are made or additional intercompany loans are extended or adjusted for intercompany dividend activity as necessary. The notional amount of these hedges was \$21.8 million at December 31, 2011. We did not have any open hedges related to intercompany loans and dividends as of December 31, 2012.

Interest Rate Risk

We utilize interest rate swaps to minimize the fluctuations in earnings caused by interest rate volatility. Interest expense on variable-rate liabilities increases or decreases as a result of interest rate fluctuations. On March 31, 2011, we entered into two interest rate swaps, on our Term Loan A and Term Loan B, with notional amounts of \$100 million and \$200 million, respectively, which mature in November 2015. Under the terms of the Term Loan A swap, we receive 3-month LIBOR and pay a fixed rate over the hedged period. Under the terms of the Term Loan B swap, we receive the greater of 3-month LIBOR or the 1% LIBOR Floor and pay a fixed rate over the hedged period. On March 27, 2012 we entered into an additional interest rate swap agreement with a notional amount of \$250 million, maturing in March 2018, under the terms of which we pay a fixed rate of 1.9275% over the hedged period. We also entered into a forward starting interest rate swap of \$200 million from November 2015 to March 2018, under the terms of which we pay a fixed rate of 2.810% over the hedged period. These swaps are designated as cash flow hedges to hedge against changes in LIBOR for a portion of our variable rate debt.

Financial Statement Impacts

The following tables detail amounts related to our derivatives as of December 31, 2012 and December 31, 2011. Our derivative assets and liabilities not designated as hedging instruments were not material as of December 31, 2012 and December 31, 2011.

	Asset Derivatives			Derivative Liabilities		
	Balance Sheet Location	Fair Value		Balance Sheet Location	Fair Value	
		December 31, 2012	December 31, 2011		December 31, 2012	December 31, 2011
Derivatives designated as hedging instruments						
Natural gas commodity contracts				Accounts payable and accrued expenses	\$ 2.7	\$ 7.2
Natural gas commodity contracts	Other non-current assets			Other long-term liabilities		2.1
Foreign exchange contracts				Accounts payable and accrued expenses		
Interest rate swap contracts	Other current assets	\$ 0.3	\$ 2.4	Other long-term liabilities	2.1	1.3
Interest rate swap contracts	Other current assets			Other long-term liabilities	25.7	14.0
Total derivatives designated as hedging instruments		\$ 0.3	\$ 2.4		\$ 30.5	\$ 24.6

	Amount of Gain (Loss) Recognized in Accumulated Other Comprehensive Income (AOCI) (Effective Portion)(a)		Location of (Loss) Reclassified from AOCI into Income (Effective Portion)	(Loss) Reclassified from AOCI into Income (Effective Portion)	
	2012	2011		2012	2011
	Derivatives in Cash Flow Hedging Relationships				
Natural gas commodity contracts	(\$ 2.7)	(\$ 9.1)	Cost of goods sold	(\$ 8.8)	(\$ 6.7)
Foreign exchange contracts purchases and sales	(1.7)	1.0	Cost of goods sold	(1.9)	(3.5)
Interest rate swap contracts	(25.7)	(14.0)	Interest Expense		
Total	(\$ 30.1)	(\$ 22.1)		(\$ 10.7)	(\$ 10.2)

- (a) As of December 31, 2012 the amount of existing losses in Accumulated OCI expected to be recognized in earnings over the next twelve months is \$4.3 million.

	Location of Gain (Loss) Recognized in Income on Derivative (Ineffective Portion) (a)
<u>Derivatives in Cash Flow Hedging Relationships</u>	
Natural gas commodity contracts	Cost of goods sold
Foreign exchange contracts purchases and sales	SG&A expense
Interest rate swap contracts	Interest expense

- (a) The amount recognized in income related to the ineffective portion of the hedging relationships was immaterial in 2012 and 2011. No gains or losses are excluded from the assessment of the hedge effectiveness. The amount of gain recognized in income for derivative instruments not designated as hedging instruments was \$4.7 million for the year ended December 31, 2011. There was no gain or loss recognized in 2012.

Armstrong World Industries, Inc., and Subsidiaries

Notes to Consolidated Financial Statements

(dollar amounts in millions)

NOTE 22. GUARANTEES

In connection with our disposition of certain assets through a variety of unrelated transactions, we have entered into contracts that included various indemnity provisions, some of which are customary for such transactions, while others hold the acquirer of the assets harmless with respect to liabilities relating to such matters as taxes, environmental and other litigation. Some of these provisions include exposure limits, but many do not. Due to the nature of the indemnities, it is not possible to estimate the potential maximum exposure under these contractual provisions. For contracts under which an indemnity claim has been received, a liability of \$3.6 million has been recorded as of December 31, 2012, which is included in environmental liabilities as disclosed in Note 31 to the Consolidated Financial Statements.

NOTE 23. PRODUCT WARRANTIES

We provide direct customer and end-user warranties for our products. These warranties cover manufacturing defects that would prevent the product from performing in line with its intended and marketed use. The terms of these warranties vary by product and generally provide for the repair or replacement of the defective product. We collect and analyze warranty claims data with a focus on the historic amount of claims, the products involved, the amount of time between the warranty claims and their respective sales and the amount of current sales.

The following table summarizes the activity for the accrual of product warranties for December 31, 2012 and 2011:

	2012	2011
Balance at beginning of period	\$ 12.1	\$ 11.9
Reductions for payments	(15.1)	(16.5)
Current year warranty accruals	15.5	17.2
Preexisting warranty accrual changes	(1.0)	(0.4)
Effects of foreign exchange translation		(0.1)
Balance at end of period	\$ 11.5	\$ 12.1

The warranty provision and related reserve are recorded as a reduction of sales and accounts receivable.

NOTE 24. OTHER LONG-TERM LIABILITIES

	December 31, 2012	December 31, 2011
Long-term deferred compensation arrangements	\$ 23.4	\$ 24.7
Long-term portion of derivative liabilities	25.7	16.1
U.S. workers compensation	8.4	10.3
Postemployment benefit liabilities	7.2	8.0
Environmental liabilities	10.7	7.3
Other	11.2	12.4
Total other long-term liabilities	\$ 86.6	\$ 78.8

NOTE 25. SHARE-BASED COMPENSATION PLANS

Edgar Filing: ARMSTRONG WORLD INDUSTRIES INC - Form 10-K

The 2006 Long-Term Incentive Plan (2006 Plan) authorized us to issue stock options, stock appreciation rights, restricted stock awards, stock units, performance-based awards and cash awards to officers and key employees, and was scheduled to terminate on October 2, 2016. On June 24, 2011 our shareholders approved an amendment and restatement of the 2006 Plan, resulting in the 2011 Long-Term Incentive Plan (the LTIP). The 2006 Plan originally authorized up to 5,349,000 shares of common stock for issuance, and the amendment authorized an additional 1,600,000 shares of common stock for issuance, for a total of 6,949,000, which includes all shares that have been issued under the 2006 Plan. The amendment also extended the expiration date of the

Table of Contents

Armstrong World Industries, Inc., and Subsidiaries

Notes to Consolidated Financial Statements

(dollar amounts in millions)

LTIP to June 24, 2021, after which time no further awards may be made. As of December 31, 2012, 2,576,839 shares were available for future grants under the LTIP.

	Year Ended December 31, 2012			
	Number of shares (thousands)	Weighted-average exercise price	Weighted-average remaining contractual term (years)	Aggregate intrinsic value (millions)
Option shares outstanding at beginning of period	2,024.2	\$ 28.30		
Options granted	510.2	49.26		
Option adjustment for dividend	342.9	28.69		
Option shares exercised	(545.6)	(22.34)		\$ 16.3
Options forfeited	(20.7)	(37.83)		
Option shares outstanding at end of period	2,311.0	\$ 30.05	7.2	\$ 47.8
Option shares exercisable at end of period	1,151.5	22.98	5.9	\$ 32.0
Option shares vested and expected to vest	2,149.3	29.41	7.1	\$ 45.8

	Year Ended December 31, 2011			
	Number of shares (thousands)	Weighted-average exercise price	Weighted-average remaining contractual term (years)	Aggregate intrinsic value (millions)
Option shares outstanding at beginning of period	1,978.4	\$ 24.02		
Options granted	476.5	41.64		
Option shares exercised	(359.5)	(21.33)		\$ 8.7
Options forfeited	(66.1)	(34.89)		
Options expired	(5.1)	(22.55)		
Option shares outstanding at end of period	2,024.2	\$ 28.30	7.0	\$ 31.6
Option shares exercisable at end of period	1,149.1	23.08	5.6	\$ 23.9
Option shares vested and expected to vest	1,953.2	27.94	6.9	\$ 31.2

We have reserved sufficient authorized shares to allow us to issue new shares upon exercise of all outstanding options. Options generally become exercisable in two to four years and expire 10 years from the date of grant. When options are actually exercised, we may issue new shares, use treasury shares (if available), acquire shares held by investors, or a combination of these alternatives in order to satisfy the option exercises. The total grant date fair value of options exercised during the year ended December 31, 2012 was \$5.7 million. Cash proceeds received from options exercised for the year ended December 31, 2012 were \$12.2 million.

Table of Contents

Armstrong World Industries, Inc., and Subsidiaries

Notes to Consolidated Financial Statements

(dollar amounts in millions)

The fair value of option grants was estimated on the date of grant using the Black-Scholes option pricing model. The weighted average assumptions for the years 2012, 2011 and 2010 are presented in the table below.

	2012	2011	2010
Weighted-average grant date fair value of options granted (dollars per option)	\$ 20.29	\$ 17.32	\$ 15.44
Assumptions			
Risk free rate of return	1.2%	2.4%	2.8%
Expected volatility	41.4%	39.5%	38.1%
Expected term (in years)	6.1	6.0	6.1
Expected dividend yield	0.0%	0.0%	0.0%

The risk free rate of return is determined based on the implied yield available on zero coupon U.S. Treasury bills at the time of grant with a remaining term equal to the expected term of the option. Because reorganized Armstrong's stock has only been trading since the fourth quarter of 2006, the expected volatility is established based on an average of the actual historical volatilities of the stock prices of a peer group of companies. The expected life is the midpoint of the average vesting period and the contractual life of the grant. For the same reasons mentioned earlier we are using an allowable simplified method to determine an appropriate expected term for our option valuation assumptions. The expected dividend yield is assumed to be zero because, at the time of each grant, we had no plans to declare a dividend. The assumptions outlined above are applicable to all option grants.

Under the terms of the LTIP, the Management Development and Compensation Committee of our Board of Directors is required to make equitable adjustments to stock option grants if there is a change in our capital structure. The special cash dividend in March 2012 qualified as a change to our capital structure under the terms of the LTIP. We used the Black-Scholes option pricing model to determine the fair value of the awards before and after the special cash dividend, using consistent assumptions for the risk free rate of return, expected term, expected volatility and expected dividend yield. The stock prices used in the before and after calculations were \$57.38 (the New York Stock Exchange Volume Weighted Average Price (NYSE VWAP) on March 29, 2012, the day before the ex-dividend date) and \$49.21 (NYSE VWAP on March 30, 2012, the ex-dividend date), respectively. For all option grants, the fair value of the award before and after the dividend remained the same. Therefore there was no incremental cost recognized in our financial statements due to the resulting award adjustments described in the table below.

Year Granted	Pre-Dividend Grant Terms		Post-Dividend Grant Terms			
	Number of Shares	Exercise Price	Number of Shares	Exercise Price		
2006	262,418	\$22.55	305,992	\$19.34		
2007	83,452	30.62	97,306	26.26		
2008	171,792	21.85	200,318	18.74		
2009	100,209	10.34	116,851	8.87		
2010	608,278	26.21	709,309	22.48	25.07	
2011	434,674	38.65	47.47	506,873	33.15	40.71
2012	403,750	50.38	470,805	43.21		

The special cash dividend in December 2010 also qualified as a change to our capital structure under the terms of the 2006 Plan. We used the Black-Scholes option pricing model to determine the fair value of the awards before and after the special cash dividend, using consistent assumptions for the risk free rate of return, expected term, expected volatility and expected dividend yield. The stock prices used in the before and after calculations were \$52.86 (the NYSE VWAP on December 10, 2010, the day before the ex-dividend date) and \$40.59 (the NYSE VWAP on December 13, 2010, the ex-dividend date), respectively. For all option grants, the fair value of the award before and after the dividend remained the same. Therefore, there was no incremental cost recognized in our financial statements due to these award modifications. The

following changes were made to the options outstanding as a result of this change:

Table of Contents

Armstrong World Industries, Inc., and Subsidiaries

Notes to Consolidated Financial Statements

(dollar amounts in millions)

Year Granted	Pre-Dividend Grant Terms		Post-Dividend Grant Terms	
	Number of Shares	Exercise Price	Number of Shares	Exercise Price
2006	707,535	\$29.37	921,281	\$22.55
2007	64,100	39.88	83,452	30.62
2008	151,904	28.45 36.74	197,834	21.85 28.21
2009	107,779	13.46	140,371	10.34
2010	502,682	34.13 38.06	654,673	26.21 29.23

We have also granted restricted stock and restricted stock units. These awards generally had vesting periods of three to four years at the grant date. A summary of the 2012 and 2011 activity related to these awards follows:

	Non-Vested Stock Awards	
	Number of shares	Weighted-average fair value at grant date
December 31, 2010	72,951	\$ 36.52
Granted	72,104	41.56
Vested	(13,482)	(36.38)
Forfeited	(3,396)	(41.47)
December 31, 2011	128,177	\$ 39.20
Granted	51,470	50.30
Vested	(39,444)	(38.17)
Forfeited	(12,317)	(46.01)
December 31, 2012	127,886	\$ 43.32

In addition to options and restricted stock and restricted stock units, we have also granted performance restricted stock and performance restricted stock units. These awards generally had vesting periods of two to four years at the grant date. A summary of the 2012 and 2011 activity related to these awards follows:

	Non-Vested Performance Stock Awards	
	Number of shares	Weighted-average fair value at grant date
December 31, 2010	272,027	\$ 38.09
Granted	162,756	41.66
Vested	(3,311)	(40.67)
Forfeited	(63,093)	(38.67)
December 31, 2011	368,379	\$ 39.54
Granted	140,400	50.33
Vested	(179,056)	(38.40)
Forfeited	(36,248)	(40.85)

Edgar Filing: ARMSTRONG WORLD INDUSTRIES INC - Form 10-K

December 31, 2012	293,475	\$	45.24
-------------------	---------	----	-------

In 2012 and 2011, we granted both restricted stock awards and performance based awards to the participants in our long term incentive plan. The restricted stock awards entitle the recipient to a specified number of shares of Armstrong's common stock provided the prescribed three year service period is fulfilled. The performance based stock awards entitle the recipient to a specified number of shares of Armstrong's common stock provided the defined financial targets are achieved at the end of 2014 and 2013, respectively. In addition to these awards, in

Table of Contents

Armstrong World Industries, Inc., and Subsidiaries

Notes to Consolidated Financial Statements

(dollar amounts in millions)

2010, we granted our Chief Executive Officer performance restricted stock units vesting equally on December 31, 2012 and 2013, provided that specified stock price targets are achieved. During 2011, the performance target for the grant vesting December 31, 2012 was achieved. Additionally, in January 2013, the performance target for the grant vesting December 31, 2013 was achieved.

In addition to the equity awards described above, as of December 31, 2012 we had 20,616 fully-vested phantom shares outstanding for non-employee directors under the 2006 Phantom Stock Unit Plan. These awards are settled in cash and generally had vesting periods of one to three years. The awards are generally payable six months following the director's separation from service. The total liability recorded for these shares as of December 31, 2012 was \$1.8 million which includes associated dividends. The awards under the 2006 Phantom Stock Unit Plan are not reflected in the Non-Vested Stock Awards tables above. The 2006 Phantom Stock Unit Plan is still in place; however, no additional shares will be granted under the plan.

During 2008, we adopted the 2008 Directors Stock Unit Plan. At December 31, 2012 and 2011, there were 127,689 and 105,427 restricted units, respectively, outstanding under the 2008 Directors Stock Unit Plan. In 2012 and 2011, we granted 22,262 and 22,590 restricted stock units, respectively, to non-employee directors. These awards generally have a vesting period of one year, and as of December 31, 2012 and 2011, 97,427 and 68,879 shares, respectively, were vested but not yet delivered. The awards are generally payable six months following the director's separation from service. During 2011, we released 28,884 shares to five retired directors. Additionally, as a result of these retirements, the directors forfeited 8,042 shares in 2011. The awards granted under the 2008 Directors Stock Unit Plan are not reflected in the Non-Vested Stock Awards table above.

We recognize share-based compensation expense on a straight-line basis over the vesting period. Share-based compensation cost was \$16.2 million (\$11.2 million net of tax benefit) in 2012; \$11.2 million (\$7.5 million net of tax benefit) in 2011, and \$5.6 million (\$3.7 million net of tax benefit) in 2010. Share-based compensation expense is recorded as a component of SG&A expenses. The benefits of tax deductions in excess of grant date fair value from the exercise of stock options and vesting of share-based awards for the years ended December 31, 2012 and 2011 was \$3.7 million and \$3.0 million, respectively. To the extent the vesting date value is greater than the grant date value, the excess tax benefit is a credit to additional paid in capital (APIC), but only if it reduces income tax currently payable. Due to our NOL, the credit to APIC will be suspended until the NOL is fully utilized.

As of December 31, 2012, there was \$16.5 million of total unrecognized compensation cost related to non-vested share-based compensation arrangements. That cost is expected to be recognized over a weighted-average period of 1.8 years.

NOTE 26. EMPLOYEE COMPENSATION

Employee compensation is presented in the table below. Charges for severance costs and early retirement incentives to terminated employees that were otherwise recorded as restructuring charges have been excluded.

	2012	2011	2010
Wages, salaries and incentive compensation	\$ 509.7	\$ 542.0	\$ 587.3
Payroll taxes	55.4	58.3	61.0
Pension expense (credits), net	14.2	(2.1)	(25.8)
Insurance and other benefit costs	43.9	46.8	53.1
Share-based compensation	16.2	11.2	5.6
Total	\$ 639.4	\$ 656.2	\$ 681.2

Edgar Filing: ARMSTRONG WORLD INDUSTRIES INC - Form 10-K

The significant reduction in wages and salaries from 2010 to 2012 is primarily due to our headcount reduction efforts. In addition, 2010 included \$11.2 million for severance and related expenses to reflect the separation costs for our former Chairman and Chief Executive Officer.

From 2010 to 2012 the net pension credit has significantly decreased due to discount rate changes and decreases in the expected return on assets assumptions. See Note 19 to the Consolidated Financial Statements for further information.

(dollar amounts in millions)

NOTE 27. LEASES

We rent certain real estate and equipment. Several leases include options for renewal or purchase, and contain clauses for payment of real estate taxes and insurance. In most cases, management expects that in the normal course of business, leases will be renewed or replaced by other leases.

	2012	2011	2010
Rent expense	\$ 20.1	\$ 18.6	\$ 19.8
Sublease (income)	(2.8)	(1.4)	(3.0)
Net rent expense	\$ 17.3	\$ 17.2	\$ 16.8

Future minimum payments at December 31, 2012 by year and in the aggregate, having non-cancelable lease terms in excess of one year are as follows:

	Total Minimum Lease Payments	Sublease (Income)	Net Minimum Lease Payments
<u>Scheduled minimum lease payments</u>			
2013	\$ 8.9	(\$ 2.0)	\$ 6.9
2014	7.0	(1.4)	5.6
2015	5.7	(1.0)	4.7
2016	2.4	(0.2)	2.2
2017	1.1	(0.1)	1.0

NOTE 30. RELATED PARTIES

We purchase grid products from WAVE, our 50%-owned joint venture with Worthington Industries. The total amount of these purchases was approximately \$89 million in 2012, \$93 million in 2011, and \$79 million in 2010. We also provide certain selling, promotional and administrative processing services to WAVE for which we receive reimbursement. Those services amounted to \$14.6 million in 2012, \$15.0 million in 2011, and \$15.2 million in 2010. The net amounts due from us to WAVE for all of our relationships were \$2.6 million and \$2.0 million at the end of 2012 and 2011, respectively. See Note 11 to the Consolidated Financial Statements for additional information.

During 2012, we incurred approximately \$0.1 million in consulting fees related to services provided by an affiliate of TPG. We also incurred approximately \$3.1 million in consulting fees related to services provided by a TPG affiliate in 2010. The amount due, from us to the TPG affiliates, was \$0.1 million at the end of 2012. There were no consulting services provided by TPG affiliates in 2011. See Note 1 to the Consolidated Financial Statements for additional information.

NOTE 31. LITIGATION AND RELATED MATTERS

ENVIRONMENTAL MATTERS

Environmental Compliance

Our manufacturing and research facilities are affected by various federal, state and local requirements relating to the discharge of materials and the protection of the environment. We make expenditures necessary for compliance with applicable environmental requirements at each of our operating facilities. These regulatory requirements continually change, therefore we cannot predict with certainty future expenditures associated with compliance with environmental requirements.

Environmental Sites

Summary

We are actively involved in the investigation, closure and/or remediation of existing or potential environmental contamination under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), and state or international Superfund and similar type environmental laws at several domestically- and internationally-owned, formerly owned and non-owned locations allegedly resulting from past industrial activity. In a few cases, we are one of several potentially responsible parties (PRPs) and have agreed to jointly fund the required investigation and remediation, while preserving our defenses to the liability. We may also have rights of contribution or reimbursement from other parties or coverage under applicable insurance policies.

Estimates of our future liability at the environmental sites are based on evaluations of currently available facts regarding each individual site. We consider factors such as our activities associated with the site, existing technology, presently enacted laws and regulations and prior company experience in remediating contaminated sites. Although current law imposes joint and several liability on all parties at Superfund sites, our contribution to the remediation of these sites is expected to be limited by the number of other companies potentially liable for site remediation. As a result, our estimated liability reflects only our expected share. In determining the probability of contribution, we consider the solvency of other parties, the site activities of other parties, whether liability is being disputed, the terms of any existing agreements and experience with similar matters, and the effect of our Chapter 11 reorganization upon the validity of the claim.

Specific Material Events

St Helens, OR

Edgar Filing: ARMSTRONG WORLD INDUSTRIES INC - Form 10-K

In August 2010, we entered into a Consent Order (the Consent Order) with the Oregon Department of Environmental Quality (ODEQ), along with Kaiser Gypsum Company, Inc. (Kaiser), and Owens Corning Sales LLC (OC), with respect to our St. Helens, OR Building Products facility, which was previously owned by Kaiser and then OC. The Consent Order, which replaces a previous order of the ODEQ requiring us to investigate and remediate hazardous substances present at the facility, requires that we and Kaiser complete a remedial investigation and feasibility study (RI/FS) on the portion of the site owned by us (Owned Property). The Consent Order further requires us, Kaiser and OC to conduct an RI/FS in the adjacent Scappoose Bay. We are

Table of Contents

Armstrong World Industries, Inc., and Subsidiaries

Notes to Consolidated Financial Statements

(dollar amounts in millions)

currently in an investigation phase for both the Owned Property and the Scappoose Bay and are actively conducting sampling and analysis at these sites. We anticipate submitting a Remedial Investigation Report and Human Health and Ecological Risk Assessments to ODEQ in 2013. At this time, we have determined that it is probable that remedial action for certain portions of the Owned Property will be required. The current estimate of our future liability at the site includes the known investigation work required by the Consent Order and the current projected cost of possible remedies for certain portions of the Owned Property. At this time, we are unable to reasonably estimate any remediation costs that we may ultimately incur with respect to other portions of the Owned Property or the Scappoose Bay, although such costs may be material. If additional investigative or remedial action is required by ODEQ, it could result in additional costs greater than the amounts currently estimated and those costs may be material.

Costs and responsibilities for investigation, including the current RI/FS of the Owned Property continue to be shared with Kaiser pursuant to a cost sharing agreement with Kaiser. Contemporaneously with the execution of the Consent Order, we, Kaiser and OC also entered into a separate cost sharing agreement for both the investigation and possible remediation of the Scappoose Bay. Kaiser's shares under the cost sharing agreements are being funded by certain insurance policies, which comprise substantially all of Kaiser's assets. If Kaiser and OC are unwilling or unable to fulfill their obligations under the cost sharing agreements, or seek to contest or challenge the allocations, or if Kaiser's insurance policies are unable to fund Kaiser's shares, it could result in additional cost to us greater than the amounts currently estimated and those costs may be material.

The principal contaminants at the St. Helens site are arsenic and dioxin compounds from historic operations by prior owners of the plant. As part of the investigation on the site pursuant to the Consent Order, we conducted an analysis of the raw materials used in our manufacturing processes at the St. Helens facility to identify possible sources of these same contaminants. Our testing found low levels of naturally occurring dioxin in sourced clay, known as ball clay, used in the production of some of our fire-retardant products at our St. Helens manufacturing facility. Based on the data from the soil and sediment samples from our St. Helens property and the data from the ball clay, we do not believe that the presence of dioxin in our raw material will have a material impact on our ultimate liability at the site. In addition, consistent with our health and safety policies, we tested employee exposure levels at two facilities representative of our handling procedures at all plants that use this ball clay and, as a result of such testing, do not believe that the ball clay poses a hazard to our employees based on applicable regulatory standards. Based on the manufacturing process and the amount of raw material utilized, we also believe that the dioxin levels in our finished products do not pose a hazard to installers or consumers. While we have not received any claims related to this raw material or our fire-retardant products, there can be no assurance that the raw material or the finished products will not become the subject of legal claims or regulatory actions or that such claims or actions will not have a material adverse effect on our financial condition or results of operations.

Macon, GA

The U.S. Environmental Protection Agency (EPA) has listed two landfills located on a portion of our Building Products facility in Macon, GA, along with the former Macon Naval Ordnance Plant landfill adjacent to our property, and portions of Rocky Creek (collectively, the Macon Site) as a Superfund site on the National Priorities List due to the presence of contaminants, most notably PCBs. In September 2010, we entered into an Administrative Order on Consent for a Removal Action with the EPA to investigate PCB contamination in one of the landfills on our property, the Wastewater Treatment Plant Landfill (the WWTP Landfill) that is a portion of the Superfund Site. We are currently in the process of concluding an investigative phase of the Removal Action for the WWTP Landfill. We submitted our final Engineering Evaluation/Cost Analysis to the EPA in the third quarter of 2012, and we expect the EPA to finalize the remedy later in 2013. Our current estimate of future liability includes costs for remedial work for the WWTP Landfill. Additionally, it is probable that we will incur field investigation, engineering and oversight costs associated with a RI/FS with respect to the remainder of the Superfund site, including Rocky Creek (the Remaining Site). We have not yet entered into an Order with the EPA for the Remaining Site and, as a result, have not yet commenced an investigation of this portion of the site. At this time, we are able to estimate only a small portion of the probable costs that may be associated with the RI/FS for the Remaining Site. It is anticipated that significant investigative work may be required by the EPA for the Remaining Site. Additionally, we, as well as other parties, may ultimately incur costs in remediating any contamination discovered during the RI/FS. At this time, it is not possible to reasonably estimate the total costs associated with the investigation work, or any resulting remediation therefrom, although such amounts may be material.

Armstrong World Industries, Inc., and Subsidiaries

Notes to Consolidated Financial Statements

(dollar amounts in millions)

Mobile, AL

In the second quarter of 2012, we recorded a liability for probable and estimable costs associated with the clean closure of a non-hazardous containment pond located on the property of our previously idled Mobile, AL Building Products plant. We have received approval of the closure plan from the Alabama Department of Environmental Management (ADEM) and have commenced work. As the work progresses, additional closure actions may become known and reasonably estimable. We are unable to anticipate any additional closure actions that may be required by the ADEM, although amounts associated with such actions may be material.

Elizabeth City, NC

This site is a former cabinet manufacturing facility that was operated by Triangle Pacific Corporation, now known as Armstrong Wood Products, Inc. (Triangle Pacific) from 1977 until 1996. The site was formerly owned by the U.S. Navy (Navy) and Westinghouse, now CBS Corporation (CBS). We assumed ownership of the site when we acquired the stock of Triangle Pacific in 1998. Prior to our acquisition, the NC Department of Environment and Natural Resources listed the site as a hazardous waste site. In 1997, Triangle Pacific entered into a cost sharing agreement with Westinghouse whereby the parties agreed to share equally in costs associated with investigation and potential remediation. In 2000, Triangle Pacific and CBS entered into an RI/FS with the EPA for the site. In 2007, we and CBS entered into an agreement with the Navy whereby the Navy agreed to pay one third of defined past and future site costs up to \$1.5 million. Although the parties initially submitted the RI/FS work plan to the EPA in 2004, the EPA did not approve the RI/FS work plan until August 2011. We are currently in an investigation phase with respect to this site. Current estimated liabilities for this site include only our share of the probable costs for investigative work required by the EPA. At this time, it is not possible to reasonably estimate any additional investigative costs or determine whether remediation will be required. If remediation is required, such costs may be material.

Summary of Financial Position

Liabilities of \$10.7 million and \$7.3 million at December 31, 2012 and December 31, 2011, respectively, were recorded for potential environmental liabilities, on a global basis, that we consider probable and for which a reasonable estimate of the probable liability could be made. Where existing data is sufficient to estimate the liability, that estimate has been used; where only a range of probable liabilities is available and no amount within that range is more likely than any other, the lower end of the range has been used. As assessments and remediation activities progress at each site, these liabilities are reviewed to reflect new information as it becomes available. These liabilities are undiscounted.

The estimated liabilities above do not take into account any claims for recoveries from insurance or third parties. It is our policy to record probable recoveries that are either available through settlement or anticipated to be recovered through negotiation or litigation as assets in the Condensed Consolidated Balance Sheets. No amounts were recorded for probable recoveries at December 31, 2012 or December 31, 2011.

Actual costs to be incurred at identified sites may vary from our estimates. Based on our current knowledge of the identified sites, it is not possible to reasonably estimate future costs in excess of amounts already recognized.

MULTI-EMPLOYER PENSION WITHDRAWAL LIABILITY CLAIM

On February 15, 2013, we received a demand notice from the Carpenters Labor-Management Pension Fund (Fund) of a deemed withdrawal relating to the sale of our cabinet business to AIP in 2012. The Fund claims that the sale triggered a withdrawal liability to the Fund relating to unfunded vested plan benefits attributable to our role as a contributing employer under the Employee Retirement Income Security Act of 1974 and the Multiemployer Pension Plan Amendments Act of 1980, notwithstanding the assumption and maintenance by AIP of ongoing contribution obligations under the applicable union bargaining agreement. The claimed amount is \$15.2 million, payable in a lump-sum or over 20 years on a quarterly basis. Pursuant to the notice, we have the opportunity to review the determination with the Fund, identify any inaccuracies in the determination of the claimed amount of unfunded vested plan benefits allocated to us, and to furnish any relevant information to the Fund within 90 days. We intend to pursue these opportunities and are currently evaluating the matter. Accordingly, we do not believe that

Edgar Filing: ARMSTRONG WORLD INDUSTRIES INC - Form 10-K

a withdrawal liability is probable and estimable at this time. If any liability is ultimately determined to exist, an accrual would be recorded within Discontinued Operations due to the

Table of Contents

Armstrong World Industries, Inc., and Subsidiaries

Notes to Consolidated Financial Statements

(dollar amounts in millions)

association with the divestiture of the cabinets business. We do not believe that the ultimate disposition of this matter will have a material adverse effect on our financial condition, liquidity or results of operations.

Prior to the cabinets business divestiture, we made contributions of \$0.8 million to the Fund during 2012.

OTHER CLAIMS

We are involved in various lawsuits, claims, investigations and other legal matters from time to time that arise in the ordinary course of conducting business, including matters involving our products, intellectual property, relationships with suppliers, distributors, relationships with competitors, employees and other matters. While complete assurance cannot be given to the outcome of these proceedings, we do not currently believe that any of these matters, individually or in the aggregate, will have a material adverse effect on our financial condition, liquidity or results of operations.

NOTE 32. EARNINGS PER SHARE

Earnings per share components may not add due to rounding.

The following table is a reconciliation of net earnings to net earnings attributable to common shares used in our basic and diluted EPS calculations for the years ended December 31, 2012, 2011, and 2010:

	2012	2011	2010
Earnings from continuing operations	\$ 144.4	\$ 112.8	\$ 15.1
Earnings allocated to participating non-vested share awards	(1.0)	(0.8)	
Earnings from continuing operations attributable to common shares	\$ 143.4	\$ 112.0	\$ 15.1

The following table is a reconciliation of basic shares outstanding to diluted shares outstanding for the years ended December 31, 2012, 2011, and 2010 (shares in millions):

	2012	2011	2010
Basic shares outstanding	58.9	58.3	57.7
Dilutive effect of stock option awards	0.6	0.5	0.5
Diluted shares outstanding	59.5	58.8	58.2

Options to purchase 26,610, 218,765 and 259,773 shares of common stock were outstanding as of December 31, 2012, 2011, and 2010, respectively, but not included in the computation of diluted earnings per share, because the options were anti-dilutive.

NOTE 33. SPECIAL CASH DIVIDEND

On March 23, 2012, our Board of Directors declared a special cash dividend in the amount of \$8.55 per share, or \$508 million in the aggregate, of which \$502.9 million was paid on April 10, 2012 to the shareholders of record as of April 3, 2012. Payment of an additional \$1.5 million was

Edgar Filing: ARMSTRONG WORLD INDUSTRIES INC - Form 10-K

made during the remainder of 2012. The unpaid portion of the dividend relates to unvested employee shares and units, and is reflected in current liabilities (\$1.6 million) and other long term liabilities (\$2.2 million) and will be paid when the underlying shares and units vest. The dividend was funded in part by existing cash and in part by the proceeds of additional debt issued under our Term Loan B.

Table of Contents

Armstrong World Industries, Inc., and Subsidiaries

Notes to Consolidated Financial Statements

(dollar amounts in millions)

On November 23, 2010 our Board of Directors declared a special cash dividend in the amount of \$13.74 per share, or \$803 million in the aggregate. The special cash dividend of \$798.6 million was paid on December 10, 2010 to shareholders of record as of December 3, 2010. Approximately \$3 million was paid during 2012 when employee shares and units vested. The unpaid portion of the dividend, \$1.4 million as of December 31, 2012, is reflected in current liabilities (\$0.9 million) and other long term liabilities (\$0.5 million) and will be paid when the underlying shares and units vest. The dividend was funded in part by the proceeds of the term loans remaining after repayment of previous debt and in part with existing cash.

The dividends were recorded as a reduction of retained earnings to the extent that retained earnings were available at the dividend declaration dates. Dividends in excess of retained earnings were recorded as a reduction of capital in excess of par value.

Table of Contents

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

Not applicable.

ITEM 9A. CONTROLS AND PROCEDURES

Our management, with the participation of our chief executive officer and our chief financial officer, performed an evaluation of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934 (Exchange Act)) as of December 31, 2012. Our chief executive officer and our chief financial officer have concluded that our disclosure controls and procedures were effective insofar as they are designed to provide reasonable assurance that information required to be disclosed by us in the reports we file or submit under the Exchange Act is (i) recorded, processed, summarized and reported, within the time periods specified in the Commission's rules and forms, and (ii) accumulated and communicated to our management, including our principal executive and principal financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure. We believe that a controls system, no matter how well designed and operated, cannot provide absolute assurance that the objectives of the controls system are met, and no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within a company have been detected.

Except as described below, there have been no changes in our internal control over financial reporting that occurred during the quarter ended December 31, 2012 that have materially affected or are reasonably likely to materially affect our internal control over financial reporting.

In an effort to add consistency to our business systems and processes in the fourth quarter of 2012 we implemented SAP systems in some of our European Building Products facilities. In connection with the SAP implementation, we performed significant pre-implementation planning, design and testing. We continued oversight and testing during the implementation to ensure the effectiveness of internal control over financial reporting. We will continue with our system implementation in some of our European Building Products facilities during 2013.

Management's Report on Internal Control over Financial Reporting and the Report of Independent Registered Public Accounting Firm are incorporated by reference to Item 8.

PART IV

ITEM 15. EXHIBITS AND FINANCIAL STATEMENT SCHEDULES

(a) Listing of Documents

1. The financial statements and schedule of Armstrong World Industries, Inc. filed as a part of this 2012 Annual Report on Form 10-K is listed in the Index to Financial Statements and Schedules on Page 40.

2. The financial statements required to be filed pursuant to Item 15 of Form 10-K are: Worthington Armstrong Venture consolidated financial statements for the years ended December 31, 2012, 2011, and 2010 (filed herewith as Exhibit 99.1).

3. The following exhibits are filed as part of this 2012 Annual Report on Form 10-K:

Exhibit No.	Description
2	Armstrong World Industries, Inc.'s Fourth Amended Plan of Reorganization dated May 23, 2003 (as modified by modifications filed with the Bankruptcy Court on October 17, 2003, November 10, 2003, December 3, 2004 and February 21, 2006) is incorporated by reference from the 2005 Annual Report on Form 10-K, filed on February 24, 2006, wherein it appeared as Exhibit 2.3.
3.1	Amended and Restated Certificate of Incorporation of Armstrong World Industries, Inc. is incorporated by reference from the Current Report on Form 8-K filed on October 2, 2006, wherein it appeared as Exhibit 3.1.
3.2	Bylaws of Armstrong World Industries, Inc. as amended, are incorporated by reference from the Current Report on Form 8-K filed on August 6, 2010, wherein they appeared as Exhibit 3.1.
10.1	Amended and Restated Credit Agreement dated as of November 23, 2010, among the company, the other borrower and guarantors named therein, Bank of America, N.A., as administrative agent and collateral agent, the other lenders party thereto, JP Morgan Chase Bank, N.A., as syndication agent, Barclays Bank PLC, as documentation agent, and Merrill Lynch, Pierce, Fenner & Smith Incorporated, J.P. Morgan Securities, Inc. and Barclays Capital, the investment banking division of Barclays Bank, PLC, as co-lead arrangers and joint book makers, is incorporated by reference from the Current Report on Form 8-K filed on November 24, 2010, wherein it appeared as Exhibit 10.1.
10.2	Amendment No. 1 dated as March 10, 2011, of the Credit Agreement by and among the Company, the other borrower and the guarantors named therein and Bank of America, N.A., as administrative agent, is incorporated by reference from the Current Report on Form 8-K filed on March 11, 2011, wherein it appeared as Exhibit 10.1.
10.3	Amendment No. 2, dated as of March 22, 2012, of the Credit Agreement by and among the Company, and Armstrong Wood Products, Inc., as borrowers, the guarantors identified therein, and Bank of America, N.A., as administrative agent for and on behalf of the lenders party thereto, is incorporated by reference from the Current Report on Form 8-K filed on March 23, 2012, wherein it appeared as Exhibit 10.1.

Table of Contents

- 10.4 Amended and Restated Security Agreement dated as of November 23, 2010, by and among the Company, the grantors named therein and Bank of America, N.A., as collateral agent, is incorporated by reference from the Current Report on Form 8-K filed on November 24, 2010, wherein it appeared as Exhibit 10.2.
- 10.5 Amended and Restated Pledge Agreement dated as of November 23, 2010, by and among the Company, the pledgors named therein and Bank of America, N.A., as collateral agent, is incorporated by reference from the Current Report on Form 8-K filed on November 24, 2010, wherein it appeared as Exhibit 10.3.
- 10.6 Amended and Restated Canadian Pledge Agreement dated as of November 23, 2010, by and among the Company and Bank of America, N.A., as collateral agent, incorporated by reference from the Current Report on Form 8-K filed on November 24, 2010, wherein it appeared as Exhibit 10.4.
- 10.7 Equitable Mortgage of Shares dated February 12, 2007, between the Company and Bank of America, N.A., as administrative agent and collateral agent, is incorporated by reference on from the Current Report on Form 8-K filed on November 24, 2010, wherein it appeared as Exhibit 10.5.
