Cautionary Statement

Regarding Forward-Looking Statements

This presentation contains forward-looking statements in which FCX discusses its potential future performance. Forward-look all statements other than statements of historical facts, such as those statements regarding projected ore grades and milling rate production and sales volumes, projected unit net cash costs, projected operating cash flows, projected capital expenditures, exp and results, mine production and development plans, the impact of deferred intercompany profits on earnings, liquidity, other f commitments and tax rates, the impact of copper, gold, molybdenum and cobalt price changes, reserve estimates, future divide potential share purchases, and estimated EBITDA for 2013 assuming completion of the pending acquisitions. The words anti intends, likely, can, plans, estimates, expects, projects, will, should, to be, and any si intended to identify those assertions as forward-looking statements. The declaration of dividends is at the discretion of FCX's I depend on FCX's financial results, cash requirements, future prospects, and other factors deemed relevant by the Board.

This presentation also includes forward-looking statements regarding mineralized material not included in reserves. The miner described in this presentation will not qualify as reserves until comprehensive engineering studies establish their economic feat no assurance can be given that the estimated mineralized material not included in reserves will become proven and probable re FCX cautions readers that forward-looking statements are not guarantees of future performance and its actual results may differ those anticipated, projected or assumed in the forward-looking statements. Important factors that can cause FCX's actual results materially from those anticipated in the forward-looking statements include commodity prices, mine sequencing, production raregulatory changes, political risks, the outcome of ongoing discussions with the Indonesian government, the potential effects of Indonesia, the resolution of administrative disputes in the Democratic Republic of Congo, weather-and climate-related risks, latenvironmental risks, litigation results, currency translation risks, risks associated with completion of the pending acquisitions at described in more detail under the heading Risk Factors in FCX's Annual Report on Form 10-K for the year ended December the U.S. Securities and Exchange Commission (SEC) as updated by our subsequent filings with the SEC.

Investors are cautioned that many of the assumptions on which FCX's forward-looking statements are based are likely to change forward-looking statements are made, including for example commodity prices, which FCX cannot control, and production vo some aspects of which FCX may or may not be able to control. Further, FCX may make changes to its business plans that coul results. FCX cautions investors that it does not intend to update forward-looking statements more frequently than quarterly not changes in FCX's assumptions, changes in business plans, actual experience or other changes, and FCX undertakes no obligating forward-looking statements.

This presentation also contains certain financial measures such as unit net cash costs per pound of copper and per pound of mo required by SEC Regulation G, reconciliations of these measures to amounts reported in FCX's consolidated financial statemer supplemental schedule, Product Revenues and Production Costs, beginning on page VII, which is also available on FCX's www.fcx.com.
