Wells Fargo Advantage Funds

The U.S. high-yield market provided relatively strong fixed-income returns during the period while U.S. utilities stocks generated positive investment value.

Dear Valued Shareholder:

We are pleased to offer you this semi-annual report for the Wells Fargo Advantage Utilities and High Income Fund for the six-month period that ended February 28, 2014. The U.S. high-yield market (measured by the Barclays U.S. High Yield Bond Index¹) provided relatively strong fixed-income returns during the period while U.S. utilities stocks (measured by the Utilities sector of S&P 500 Index) generated positive investment value. Equity markets (measured by the S&P 500 Index²) vacillated between price rallies and subsequent price corrections, which stirred up volatility across equity and fixed-income markets (measured by the Barclays U.S. Aggregate Bond Index³) alike. U.S. Treasury yields correspondingly fluctuated with the shifts in equity market exuberance, as strengthening economic confidence pushed yields higher and weakened confidence drove them lower.

On the whole, the investment-grade (measured by the Barclays U.S. Aggregate Bond Index) and high-yield markets generated positive returns during the period, notably benefiting from the strong price improvement and declining U.S. Treasury yields that occurred during the opening months of 2014. The high-yield market is often correlated with U.S. equity performance; however, over the period, the high-yield market generally performed well both when equities were improving and U.S. Treasury yields were declining as well as when equity markets were in decline and fixed-income markets rallied. The lower-rated corporate bond credit tiers outperformed each respectively higher-rated credit tier during the quarter. Meanwhile, the utilities equity sector lagged the returns of the S&P 500 Index but, nonetheless, generated relatively strong total returns compared with U.S. Treasuries and investment-grade bonds.

A decline in bond prices was halted by the Fed's postponement of tapering its bond-buying program.

Before the six-month period began, equity markets rallied, most notably in May and June of 2013. This led to a sharp increase in U.S. Treasury yields and declining valuations for much of the fixed-income markets. However, in July and August of 2013, that equity exuberance quieted a bit, and fixed-income markets stabilized. Returns across the fixed-income markets were largely negative in investment-grade and high-yield markets but modest in comparison with the declines in May and June of 2013.

But, by September and October of 2013, investment-grade and high-yield markets began generating positive returns yet again, as the U.S. Federal Reserve (Fed) backtracked on its intentions to taper its quantitative easing program, postponing it until 2014, at the earliest. This created a temporary rally in bonds that lasted until around November 20, 2013, when notes were released from the Fed's October 2013 meeting indicating that tapering of the bond-buying programs would not be postponed beyond January 2014. In response, long-term U.S. Treasury yields and mortgage rates ratcheted higher on expectations for an unwinding of monetary accommodation in the upcoming months. This led to declines in pricing across much of the core fixed-income markets (measured by the Barclays U.S. Aggregate Bond Index); however, U.S. high-yield markets were better able to absorb the shift in U.S. Treasury yields and continued to provide positive returns along with rallies in the equity markets. The utilities equity sector rallied in October of 2013 and then declined through much of November and December of 2013.

1. The Barclays U.S. High Yield Bond Index is an index consisting of all domestic and Yankee bonds, rated below investment grade, with a minimum outstanding amount of \$100 million and maturing over one year. You cannot invest directly in an index.
2. The S&P 500 Index consists of 500 stocks chosen for market size, liquidity, and industry group representation. It is a market-value-weighted index with each stock's weight in the index proportionate to its market value. You cannot invest directly in an index.
3. The Barclays U.S. Aggregate Bond Index is a broad-based benchmark that measures the investment-grade, U.S. dollar-denominated, fixed-rate taxable bond market, including Treasuries, government-related and corporate securities, MBS (agency fixed-rate and hybrid ARM passthroughs), ABS, and CMBS. You cannot invest directly in an index.

Letter to shareholders (unaudited)	Wells Fargo Advantage Utilities and High Income Fund	3
------------------------------------	--	---

Favorable conditions for fixed-income markets were restored in January and February of 2014.

Seemingly much to the surprise of many everyday investors and seasoned investment professionals alike, fixed-income markets largely outperformed U.S. equity markets during the opening months of 2014. A pullback in equity exuberance in January 2014 and reassurances from the Fed that a highly accommodative monetary policy would continue throughout 2014 inspired price rallies across both the investment-grade and high-yield markets. U.S. Treasury yields declined in January 2014 while corporate high-yield bonds (measured by the Barclays U.S. High Yield Bond Index) performed notably well. Initially, U.S. high-yield securities generated positive returns in January 2014 but lagged the rally across the investment-grade bond markets. This theme reversed in February 2014, as high-yield sectors rallied and investment-grade sectors performed well but not to the extent of the lowest-rated credit tiers. The S&P 500 Index declined significantly in January, but the utilities sector did a better job of protecting against the price corrections and only declined modestly by comparison. In February 2014, the utilities sector rallied strongly along with the broad domestic equity market and generated compelling total returns to finish off a relatively generous six-month return compared with returns from the investment-grade fixed-income market.

Don't let short-term uncertainty derail long-term investment goals.

Periods of investment uncertainty can present challenges, but experience has taught us that maintaining long-term investment goals can be an effective way to plan for the future. Although diversification cannot guarantee an investment profit or prevent losses, we believe it can be an effective way to manage investment risk and potentially smooth out overall portfolio performance. We encourage investors to know their investments and to understand that appropriate levels of risk-taking may unlock opportunities.

Thank you for choosing to invest with *Wells Fargo Advantage Funds*. We appreciate your confidence in us and remain committed to helping you meet your financial needs. For current information about your fund investments, contact your investment professional, visit our website at **wellsfargoadvantagefunds.com**, or call us directly at **1-800-222-8222**. We are available 24 hours a day, 7 days a week.

Sincerely,

Karla M. Rabusch

President

Wells Fargo Advantage Funds

Reassurances from the Fed that a highly accommodative monetary policy would continue throughout 2014 inspired price rallies across both the investment-grade and high-yield markets.

Average annual total return¹ (%) as of February 28, 2014

	1 year	5 year	Since inception
Based on market value	14.06	15.54	7.43
Based on net asset value (NAV) per share	18.49	16.27	8.74

Figures quoted represent past performance, which is no guarantee of future results, and do not reflect taxes that a shareholder may pay on fund distributions or the sales of fund shares. Investment return and principal value of an investment will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted, which assumes the reinvestment of dividends and capital gains. Performance figures of the Fund do not reflect brokerage commissions that a shareholder would pay on the purchase and sale of shares. If taxes and such brokerage commissions had been reflected, performance would have been lower. To obtain performance information current to the most recent month-end, please call 1-800-222-8222.

The Fund's gross and net expense ratios for the six months ended February 28, 2014, were 1.11% and 1.11%, respectively, which includes 0.19% of interest expense.

Comparison of NAV vs. market value since inception²

High-yield, lower-rated bonds may contain more risk due to the increased possibility of default. Foreign investments may contain more risk due to the inherent risks associated with changing political climates, foreign market instability, and foreign currency fluctuations. Risks of international investing are magnified in emerging or developing markets. Funds that concentrate their investments in a single industry or sector may face increased risk of price fluctuation over more diversified funds due to adverse developments within that industry or sector. Non-diversified funds may face increased risk of price fluctuation over more diversified funds due to adverse developments within certain sectors. Small- and mid-cap securities may be subject to special risks associated with narrower product lines and limited financial resources compared with their large-cap counterparts. The use of leverage results in certain risks including, among others, the likelihood of greater volatility of net asset value and the market price of common shares. Derivatives involve additional risks, including interest-rate risk, credit risk, the risk of improper valuation, and the risk of noncorrelation to the relevant instruments they are designed to hedge or to closely track. There are numerous risks associated with transactions in options on securities. Illiquid securities may be subject to wide fluctuations in market value and may be difficult to sell.

1. Total returns based on market value are calculated assuming a purchase of common stock on the first day and sale on the last day of the period reported. Total returns based on NAV are calculated based on the NAV at the beginning of the period and end of period. Dividends and distributions, if any, are assumed for the purposes of these calculations to be reinvested at prices obtained under the Fund's Automatic Dividend Reinvestment Plan.
2. This chart does not reflect any brokerage commissions charged on the Fund's common stock. Dividends and distributions have the effect of reducing the Fund's NAV.

MANAGER'S DISCUSSION

The Fund's return based on market value was 6.71% during the six months ended February 28, 2014. During the same period, the Fund's return based on NAV was 12.69%.

Overview

For the six-month period that ended February 28, 2014, high-yield bonds continued to benefit from rising stock prices (as high-yield bonds often trade in sympathy with stocks), rising U.S. Treasury prices, relatively low volatility, and strong investor interest due to a scarcity of attractive income opportunities. High-yield companies continued to add debt as companies took advantage of the strong investor demand for high-yield debt and low borrowing costs. While leverage levels are not at record highs, they have been creeping higher over the past several years as, among other reasons, companies gain more and more confidence in their outlooks. On the other hand, historically low interest rates and a wave of refinancings have kept companies' interest costs low and pushed out near-term maturities.

In the utilities stock allocation, the Fund was positioned somewhat more aggressively compared with the prior six months. Interest-rate-sensitive stocks had declined sharply beginning in June 2013 following the U.S. Federal Reserve's announcement of its intention to taper off the pace of bond purchases. Thus, by the end of August 2013, we added a number of issues that we viewed as attractively priced after the price declines. For example, we added to an existing position in Vodafone and initiated positions in Energen and Veresen.

Contributors to performance

In the high-yield allocation, the Fund benefited from the strong appreciation of the high-yield bond market generally and more particularly from the Fund's longer-duration assets. Fixed-income holdings of pipeline and wireless companies also helped performance. In the equity allocation, the Fund maintained a modestly higher exposure to European utilities and telecommunication services names in anticipation of a nascent recovery in Europe. On balance, the Fund's European names contributed to performance, with Deutsche Post AG, Suez Environnement Company SA, and Veolia Environnement SA, particularly standing out. A modest increase in the euro/dollar exchange rate also helped. In the domestic utilities space, ITC Holdings Corporation, American Electric Power Company Incorporated, Great Plains Energy Incorporated, The Williams Companies Incorporated, and NextEra Energy Incorporated were significant performance contributors.

Ten largest holdings³ (%) as of February 28, 2014

Deutsche Post AG	4.59
Suez Environnement Company SA	4.48
American Electric Power Company Incorporated	4.09
ITC Holdings Corporation	3.76
Great Plains Energy Incorporated	3.75
NextEra Energy Incorporated	3.73
The Williams Companies Incorporated	3.37
Northeast Utilities	3.26

Telefonica Brasil ADR	3.23
Edison International	3.20

Credit quality⁴ as of February 28, 2014

Detractors from performance

Holding relatively shorter average-life bonds and higher-quality, higher-rated bonds restrained performance in a market that rewarded risk. The portfolio's overall lower risk profile, as a result, had a detracting impact on performance. In the equity allocation, foreign companies that detracted included Telefonica Brasil and Vimpelcom Limited, while detracting domestic laggards included Verizon Communications Incorporated and Energen Corporation.

Management outlook

Our high-yield fixed-income outlook has not changed materially since the fiscal year that ended August 31, 2013, except that yields have continued to grind lower, which has both reduced the return of high yield bonds and increased the risk of a fall in prices of high yield bonds. Our base case is that high-yield bonds are relatively stable and could potentially outperform other fixed-income asset classes such as the Barclays U.S. Aggregate Bond Index⁵, the 10-year U.S. Treasury, and the investment-grade corporate markets (which may be more vulnerable to yield increases).

Please see footnotes on page 6.

6 Wells Fargo Advantage Utilities and High Income Fund

Performance highlights (unaudited)

Country allocation⁶ as of February 28, 2014

In the long run, we expect that the relative performance of high yield bonds will be primarily driven by corporate fundamentals and defaults. In the near term, our default outlook remains benign and supportive of the high yield markets. Over a full cycle, we believe the best way to protect the Fund from periodic bouts of systemic fears and rebalancing will be our continued focus on a bottom-up approach that attempts to minimize downside risk while capturing the return potential of high-yield issuers.

In the equity allocation, we are watching what appears to be a modest economic recovery in the U.S. While stronger economic growth can be positive for utilities that are suffering from weak revenues, it can also eventually lead to rising interest rates as monetary stimulus is withdrawn. This could be a near-term headwind for utilities stocks. Longer-term, fundamentals for regulated network operators remain robust, in our view, while the outlook for utilities with significant commodity price exposure remains challenging.

3. The ten largest holdings are calculated based on the value of the securities divided by total net assets of the Fund. Holdings are subject to change and may have changed since the date specified.

4. The credit quality of portfolio holdings reflected in the chart is based on ratings from Standard & Poor's, Moody's Investors Service, and/or Fitch Ratings Ltd. Credit quality ratings apply to the underlying holdings of the Fund and not to the Fund itself. The percentages of the Fund's portfolio with the ratings depicted in the chart are calculated based on the total market value of fixed income securities held by the Fund. If a security was rated by all three rating agencies, the middle rating was utilized. If rated by two of three rating agencies, the lower rating was utilized, and if rated by one of the rating agencies, that rating was utilized. Standard & Poor's rates the creditworthiness of

bonds, ranging from AAA (highest) to D (lowest). Ratings from A to CCC may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the rating categories. Standard & Poor's rates the creditworthiness of short-term notes from SP-1 (highest) to SP-3 (lowest). Moody's rates the creditworthiness of bonds, ranging from Aaa (highest) to C (lowest). Ratings Aa to B may be modified by the addition of a number 1 (highest) to 3 (lowest) to show relative standing within the ratings categories. Moody's rates the creditworthiness of short-term U.S. tax-exempt municipal securities from MIG 1/VMIG 1 (highest) to SG (lowest). Fitch rates the creditworthiness of bonds, ranging from AAA (highest) to D (lowest). Credit quality, and credit quality ratings, are subject to change.

5. The Barclays U.S. Aggregate Bond Index is a broad-based benchmark that measures the investment-grade, U.S. dollar-denominated, fixed-rate taxable bond market, including Treasuries, government-related and corporate securities, MBS (agency fixed-rate and hybrid ARM passthroughs), ABS, and CMBS. You cannot invest directly in an index.
6. Country allocation is subject to change and is calculated based on the total long-term investments of the Fund.

1. Calculated based upon average shares outstanding

2. Total return is calculated assuming a purchase of common stock on the first day and a sale on the last day of the period reported. Dividends and distributions, if any, are assumed for purposes of these calculations to be reinvested at prices obtained under the Fund's Automatic Dividend Reinvestment Plan. Total return does not reflect brokerage commissions that a shareholder would pay on the purchase and sale of shares.

3. Ratios include interest expense relating to interest associated with borrowings and/or leverage transactions as follows:

Six months ended February 28, 2014 (unaudited)	0.19%
Year ended August 31, 2013	0.21%
Year ended August 31, 2012	0.25%

Year ended August 31, 2009	0.70%

The accompanying notes are an integral part of these financial statements.

Table of Contents

Notes to financial statements (unaudited)	Wells Fargo Advantage Utilities and High Income Fund	19
---	--	----

1. ORGANIZATION

The *Wells Fargo Advantage Utilities and High Income Fund* (the Fund) was organized as a statutory trust under the laws of the state of Delaware on February 4, 2004 and is registered as a non-diversified closed-end management investment company under the Investment Company Act of 1940, as amended.

2. SIGNIFICANT ACCOUNTING POLICIES

The following significant accounting policies, which are consistently followed in the preparation of the financial statements of the Fund, are in conformity with U.S. generally accepted accounting principles which require management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Securities valuation

All investments are valued each business day as of the close of regular trading on the New York Stock Exchange (generally 4 p.m. Eastern Time).

Equity securities and options that are listed on a foreign or domestic exchange or market are valued at the official closing price or, if none, the last sales price. If no sale occurs on the primary exchange or market for the security that day, the prior day's price will be deemed stale and fair values will be determined in accordance with the Fund's Valuation Procedures.

The values of securities denominated in foreign currencies will be converted to U.S. dollars at rates provided by an independent foreign currency pricing source at a time each business day specified by the Management Valuation Team.

Many securities markets and exchanges outside the U.S. close prior to the close of the New York Stock Exchange and therefore may not fully reflect trading or events that occur after the close of the principal exchange in which the foreign securities are traded, but before the close of the New York Stock Exchange. If such trading or events are expected to materially affect the value of such securities, then fair value pricing procedures approved by the Board of Trustees of the Fund are applied. These procedures take into account multiple factors including movements in U.S. securities markets after foreign exchanges close. Foreign securities that are fair valued under these procedures are categorized as Level 2 and the application of these procedures may result in transfers between Level 1 and Level 2. Depending on market activity, such fair valuations may be frequent. Such fair value pricing may result in NAVs that are higher or lower than NAVs based on the last reported sales price or latest quoted bid price. On February 28, 2014, such fair value pricing was not used in pricing foreign securities.

Fixed income securities acquired with maturities exceeding 60 days are valued based on evaluated bid prices provided by an independent pricing service which may utilize both transaction data and market information such as yield, quality, coupon rate, maturity, type of issue, trading characteristics and other market data. If prices are not available from the independent pricing service or prices received are deemed not representative of market value, prices will be obtained from an independent broker-dealer or otherwise determined based on the Fund's Valuation Procedures.

Short-term securities, with maturities of 60 days or less at time of purchase, generally are valued at amortized cost which approximates fair value. The amortized cost method involves valuing a security at its cost, plus accretion of discount or minus amortization of premium over the period until maturity.

Investments in registered open-end investment companies are valued at net asset value.

Investments which are not valued using any of the methods discussed above are valued at their fair value, as determined in good faith by the Board of Trustees. The Board of Trustees has established a Valuation Committee comprised of the Trustees and has delegated to it the authority to take any actions regarding the valuation of portfolio securities that the Valuation Committee deems necessary or appropriate, including determining the fair value of portfolio securities, unless the determination has been delegated to the Management Valuation Team. The Board of Trustees retains the authority to make or ratify any valuation decisions or approve any changes to the Valuation Procedures as it deems appropriate. On a quarterly basis, the Board of Trustees receives reports on any valuation actions taken by the Valuation Committee or the Management Valuation Team which may include items for ratification.

Valuations of fair valued securities are compared to the next actual sales price when available, or other appropriate market values, to assess the continued appropriateness of the fair valuation methodologies used. These securities are fair valued on a day-to-day basis, taking into consideration changes to appropriate market information and any significant changes to the inputs considered in the valuation process until there is a readily available price provided on an exchange or by an independent pricing service. Valuations received from an independent pricing service or independent broker-dealer quotes

Table of Contents

20 Wells Fargo Advantage Utilities and High Income Fund

Notes to financial statements (unaudited)

are periodically validated by comparisons to most recent trades and valuations provided by other independent pricing services in addition to the review of prices by the adviser and/or subadviser. Unobservable inputs used in determining fair valuations are identified based on the type of security, taking into consideration factors utilized by market participants in valuing the investment, knowledge about the issuer and the current market environment.

Foreign currency translation

The accounting records of the Fund are maintained in U.S. dollars. The values of other assets and liabilities denominated in foreign currencies will be converted to U.S. dollars at rates provided by an independent foreign currency pricing source at a time each business day specified by the Management Valuation Team. Purchases and sales of securities, and income and expenses are converted at the rate of exchange on the respective dates of such transactions. Reported net realized foreign exchange gains or losses arise from sales of foreign currencies, currency gains or losses realized between the trade and settlement dates on securities transactions, and the difference between the amounts of dividends, interest and foreign withholding taxes recorded and the U.S. dollar equivalent of the amounts actually paid or received. Net unrealized foreign exchange gains and losses arise from changes in the fair value of assets and liabilities other than investments in securities resulting from changes in exchange rates.

The changes in net assets arising from changes in exchange rates and the changes in net assets resulting from changes in market prices of securities are not separately presented. Such changes are recorded with net realized and unrealized gains or losses from investments. Gains and losses from certain foreign currency transactions are treated as ordinary income for U.S. federal income tax purposes.

When-issued transactions

The Fund may purchase securities on a forward commitment or when-issued basis. The Fund records a when-issued transaction on the trade date and will segregate assets in an amount at least equal in value to the Fund's commitment to purchase when-issued securities. Securities purchased on a when-issued basis are marked-to-market daily and the Fund begins earning interest on the settlement date. Losses may arise due to changes in the market value of the underlying securities or if the counterparty does not perform under the contract.

Term loans

The Fund may invest in term loans. The Fund begins earning interest when the loans are funded. The loans pay interest at rates which are periodically reset by reference to a base lending rate plus a spread. The Fund assumes the credit risk of the borrower and there could be potential loss to the Fund in the event of default by the borrower.

Options

The Fund may be subject to equity price risk in the normal course of pursuing its investment objectives. The Fund may write covered call options or secured put options on individual securities and/or indexes. When the Fund writes an option, an amount equal to the premium received is recorded as a liability and is subsequently adjusted to the current market value of the written option. Premiums received from written options that expire unexercised are recognized as realized gains from investments on the expiration date. For exercised options, the difference between the premium received and the amount paid on effecting a closing purchase transaction, including brokerage

commissions, is treated as a realized gain or loss. If a call option is exercised, the premium is added to the proceeds from the sale of the underlying security in calculating the realized gain or loss on the sale. If a put option is exercised, the premium reduces the cost of the security purchased. The Fund, as a writer of an option, bears the market risk of an unfavorable change in the price of the security and/or index underlying the written option.

The Fund may also purchase call or put options. The premium is included in the Statement of Assets and Liabilities as an investment, the value of which is subsequently adjusted based on the current market value of the option. Premiums paid for purchased options that expire are recognized as realized losses from investments on the expiration date. Premiums paid for purchased options that are exercised or closed are added to the amount paid or offset against the proceeds received for the underlying security to determine the realized gain or loss. The risk of loss associated with purchased options is limited to the premium paid.

Options traded on an exchange are regulated and terms of the options are standardized. Options traded over-the-counter expose the Fund to counterparty risk in the event the counterparty does not perform. This risk is mitigated by having a master netting arrangement between the Fund and the counterparty and by having the counterparty post collateral to cover the Fund's exposure to the counterparty.

---	--	----

Security transactions and income recognition

Securities transactions are recorded on a trade date basis. Realized gains or losses are recorded on the basis of identified cost.

Dividend income is recognized on the ex-dividend date, except for certain dividends from foreign securities, which are recorded as soon as the Fund is informed of the ex-dividend date. Dividend income from foreign securities is recorded net of foreign taxes withheld where recovery of such taxes is not assured.

Interest income is accrued daily and bond discounts are accreted and premiums are amortized daily based on the effective interest method. To the extent debt obligations are placed on non-accrual status, any related interest income may be reduced by writing off interest receivables when the collection of all or a portion of interest has become doubtful based on consistently applied procedures. If the issuer subsequently resumes interest payments or when the collectability of interest is reasonably assured, the debt obligation is removed from non-accrual status.

Distributions to shareholders

Distributions to shareholders from net investment income and net realized gains, if any, are recorded on the ex-dividend date. Such distributions are determined in conformity with federal income tax regulations, which may differ in amount or character from net investment income and realized gains recognized for purposes of U.S. generally accepted accounting principles.

Federal and other taxes

The Fund intends to continue to qualify as a regulated investment company by distributing substantially all of its investment company taxable income and any net realized capital gains (after reduction for capital loss carryforwards) sufficient to relieve it from all, or substantially all, federal income taxes. Accordingly, no provision for federal income taxes was required.

The Fund's income and federal excise tax returns and all financial records supporting those returns for the prior three fiscal years are subject to examination by the federal and Delaware revenue authorities. Management has analyzed the Fund's tax positions taken on federal, state, and foreign tax returns for all open tax years and does not believe that there are any uncertain tax positions that require recognition of a tax liability.

As of August 31 2013, capital loss carryforwards available to offset future net realized capital gains were as follows through the indicated expiration dates:

2017	2018	No expiration Short-term
\$20,548,693	\$27,435,579	\$4,033,372

As of August 31, 2013, the Fund had \$341,205 of current year deferred post-October capital losses, which were recognized on the first day of the current fiscal year.

3. FAIR VALUATION MEASUREMENTS

Fair value measurements of investments are determined within a framework that has established a fair value hierarchy based upon the various data inputs utilized in determining the value of the Fund's investments. The three-level hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to significant unobservable inputs (Level 3). The Fund's investments are classified within the fair value hierarchy based on the lowest level of input that is significant to the fair value measurement. The inputs are summarized into three broad levels as follows:

- n Level 1 quoted prices in active markets for identical securities
- n Level 2 other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, use of amortized cost, etc.)
- n Level 3 significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The inputs or methodologies used for valuing investments in securities are not necessarily an indication of the risk associated with investing in those securities.

Table of Contents**22 Wells Fargo Advantage Utilities and High Income Fund**

Notes to financial statements (unaudited)

As of February 28, 2014, the inputs used in valuing investments in securities were as follows:

	Quoted prices	Other significant	Significant	
		observable inputs	unobservable inputs	
Investments in securities	(Level 1)	(Level 2)	(Level 3)	Total
Equity securities				
<i>Common stocks</i>	\$ 80,187,610	\$ 0	\$ 0	\$ 80,187,610
<i>Preferred stocks</i>	14,509,120	2,358,746	0	16,867,866
<i>Warrants</i>	0	29,600	0	29,600
Corporate bonds and notes	0	35,777,215	0	35,777,215
Term loans	0	3,001,492	736,726	3,738,218
Yankee bonds	0	1,818,839	0	1,818,839
Short-term investments				
<i>Investment companies</i>	3,652,555	0	0	3,652,555
	\$ 98,349,285	\$ 42,985,892	\$ 736,726	\$ 142,071,903

Transfers in and transfers out are recognized at the end of the reporting period. For the six months ended February 28, 2014, the Fund did not have any transfers into/out of Level 1, Level 2, or Level 3.

4. TRANSACTIONS WITH AFFILIATES AND OTHER EXPENSES**Advisory fee**

Funds Management, an indirect wholly owned subsidiary of Wells Fargo & Company (Wells Fargo) is the adviser to the Fund and is entitled to receive a fee at an annual rate of 0.60% of the Fund's average daily total assets. Total assets consist of net assets of the Fund plus borrowings or other leverage for investment purposes to the extent excluded in calculating net assets.

Funds Management has retained the services of certain investment subadvisers to provide daily portfolio management to the Fund. The fees for subadvisory services are borne by Funds Management. Wells Capital Management Incorporated (an affiliate of Funds Management and an indirect, wholly owned subsidiary of Wells Fargo) and Crow Point Partners, LLC are each investment subadvisers to the Fund and are each entitled to receive a fee from Funds Management at an annual rate of 0.20% of the Fund's average daily total assets.

Administration and transfer agent fees

Funds Management also serves as the administrator to the Fund providing the Fund with a wide range of administrative services necessary to the operation of the Fund. Funds Management is entitled to receive an annual administration fee from the Fund equal to 0.05% of the Fund's average daily total assets.

5. CAPITAL SHARE TRANSACTIONS

The Fund has authorized an unlimited number of shares with no par value. For the six months ended February 28, 2014, the Fund did not issue any shares. For the year ended August 31, 2013, the Fund issued 5,359 shares.

6. BORROWINGS

The Fund has borrowed approximately \$22 million through a secured debt financing agreement administered by a major financial institution (the Facility). The Facility has a commitment amount of \$25 million which expires on February 23, 2015, at which point it may be renegotiated and potentially renewed for another one-year term. At February 28, 2014, the Fund had secured borrowings outstanding in the amount of \$22,001,406 (including accrued interest and usage and commitment fees payable).

The Fund's borrowings under the Facility are generally charged interest at a rate determined by the type of loan elected by the Fund. During the six months ended February 28, 2014, an effective interest rate of 1.02% was incurred on the borrowings. Interest expense of \$112,757, representing 0.19% of the Fund's average daily net assets, was incurred during the six months ended February 28, 2014.

The Fund has pledged all of its assets to secure the borrowings and pays a commitment fee at an annual rate equal to 0.15% of average daily unutilized amounts of the \$25 million commitment amount. Secured borrowing fees on the Statement of Operations represents commitment fees.

Table of Contents

Notes to financial statements (unaudited)	Wells Fargo Advantage Utilities and High Income Fund	23
---	--	----

7. INVESTMENT PORTFOLIO TRANSACTIONS

Purchases and sales of investments, excluding U.S. government obligations (if any) and short-term securities, for the six months ended February 28, 2014 were \$24,123,708 and \$22,538,131, respectively.

As of February 28, 2014, the Fund had unfunded term loan commitments of \$119,388.

8. DERIVATIVE TRANSACTIONS

During the six months ended February 28, 2014, the Fund entered into written options for economic hedging purposes.

During the six months ended February 28, 2014, the Fund had written call option activities as follows:

	Number of contracts	Premiums received
Options outstanding at August 31, 2013	0	\$ 0
Options written	100	8,571
Options expired	0	0
Options closed	(100)	(8,571)
Options exercised	0	0
Options outstanding at February 28, 2014	0	\$ 0

As of February 28, 2014, the Fund did not have any open written options but had an average of 5 written option contracts during the six months ended February 28, 2014.

The fair value, realized gains or losses and change in unrealized gains or losses, if any, on derivative instruments are reflected in the appropriate financial statements.

9. CONCENTRATION RISK

The Fund invests a substantial portion of its assets in the utilities sector and, therefore, may be more affected by changes in that sector than would be a fund whose investments are not heavily weighted in any sector.

10. INDEMNIFICATION

Under the Fund's organizational documents, the officers and directors are indemnified against certain liabilities that may arise out of performance of their duties to the Fund. Additionally, in the normal course of business, the Fund may enter into contracts with service providers that contain a variety of indemnification clauses. The Fund's maximum exposure under these arrangements is dependent on future claims that may be made against the Fund and, therefore, cannot be estimated.

11. SUBSEQUENT DISTRIBUTIONS

The Fund declared the following distributions to common shareholders:

Declaration date	Record date	Payable date	Per share amount
February 20, 2014	March 17, 2014	April 1, 2014	\$0.075
March 28, 2014	April 15, 2014	May 1, 2014	\$0.075
April 25, 2014	May 14, 2014	June 2, 2014	\$0.075

These distributions are not reflected in the accompanying financial statements. The final determination of the source of all distributions is subject to change and made after the Fund's tax year-end.

BOARD OF TRUSTEES AND OFFICERS

The following table provides basic information about the Board of Trustees (the Trustees) and Officers of the Fund. Each of the Trustees and Officers listed below acts in identical capacities for each fund in the Wells Fargo Advantage family of funds, which consists of 132 mutual funds comprising the Wells Fargo Funds Trust, Wells Fargo Variable Trust, Wells Fargo Master Trust, and four closed-end funds, including the Fund (collectively the Fund Complex). All of the Trustees are also Members of the Audit and Governance Committees of each Trust in the Fund Complex. The mailing address of each Trustee and Officer is 525 Market Street, 12th Floor, San Francisco, CA 94105. The Board of Trustees is classified into three classes of which one is elected annually. Each Trustee serves a three-year term concurrent with the class from which the Trustee is elected. Each Officer serves an indefinite term.

Independent Trustees

Name and year of birth	Position held and length of service	Principal occupations during past five years	Other directorships during past five years
