Securities registered pursuant to Section 12(g) of the Act:

Edgar Filing: SAIA INC - Form 10-K

None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Exchange Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§229.405 of this chapter) is not contained herein, and will not be contained, to the best of the registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of June 30, 2014, the aggregate market value of the registrant's common stock held by non-affiliates of the registrant was \$1,066,074,449 based on the last reported sales price of the common stock as reported on the National Association of Securities Dealers Automated Quotation System National Market System. The number of shares of Common Stock outstanding as of February 26, 2015 was 25,089,833.

Documents Incorporated by Reference

Portions of the definitive Proxy Statement to be filed within 120 days of December 31, 2014, pursuant to Regulation 14A under the Securities Exchange Act of 1934 for the Annual Meeting of Stockholders to be held April 27, 2015 have been incorporated by reference into Part III of this Form 10-K.

PART I.

**Item 1. *Business*
Overview**

Saia, Inc., through its wholly-owned subsidiaries, is a transportation company headquartered in Johns Creek, Georgia providing a wide range of less-than-truckload, non-asset truckload, expedited and logistics services across the United States.

We are a single segment company with four operating subsidiaries, Saia Motor Freight Line, LLC (Saia LTL Freight), Saia TL Plus, LLC (Saia TL Plus), Saia Sales, LLC (Saia Sales) and Saia Logistics Services, LLC (Saia Logistics Services) (Saia, Inc. together with its subsidiaries, the Company or Saia). We serve a wide variety of customers by offering regional and interregional LTL, truckload, guaranteed, expedited and logistics services. None of our approximately 8,900 employees is represented by a union. In 2014, Saia generated revenue of \$1.27 billion and operating income of \$85.7 million. In 2013, Saia generated revenue of \$1.14 billion and operating income of \$74.4 million.

Saia LTL Freight

Founded in 1924, Saia LTL Freight is a leading multi-regional LTL carrier that serves 34 states in the South, Southwest, Midwest, Pacific Northwest and West. Saia LTL Freight specializes in offering its customers a range of regional and interregional LTL services including time-definite and expedited options. Saia LTL Freight primarily provides its customers with solutions for shipments between 100 and 10,000 pounds, but also provides selected guaranteed, expedited and truckload services.

Saia LTL Freight has invested substantially in technology, training and business processes to enhance its ability to monitor and manage customer service, operations and profitability. These data capabilities enable Saia LTL Freight to provide its trademarked Customer Service Indicators® (CSI) program, allowing customers to monitor service performance on a wide array of metrics most important to them. Customers can access the information via the Internet (www.saia.com) to help manage their shipments. The CSIs measure the following: on-time pickup; on-time delivery; claim-free shipments; claims settled within 30 days; exception free delivery; and invoicing accuracy. The CSIs provide both Saia LTL Freight and the customer with a report card of overall service levels.

As of December 31, 2014, Saia LTL Freight operated a network comprised of 150 locations. In 2014, the average Saia LTL Freight shipment weighed approximately 1,405 pounds and traveled an average distance of approximately 763 miles.

Industry

The trucking industry consists of three segments including private fleets and two for-hire carrier groups. The private carrier segment consists of fleets owned and operated by shippers who move their own goods. The two for-hire carrier groups, truckload and LTL, are based on the typical shipment sizes handled by transportation service companies. Truckload refers to providers generally transporting shipments greater than 10,000 pounds and less than truckload, or LTL, refers to providers generally transporting shipments less than 10,000 pounds. Saia LTL Freight is primarily an LTL carrier.

LTL transportation providers consolidate numerous orders, generally ranging from 100 to 10,000 pounds, from businesses in different locations. Orders are consolidated from individual locations at carrier-operated service facilities within a certain radius and then typically transported from the origin location to the destination location and then to the ultimate destination. As a result, LTL carriers require expansive networks of pickup and

Table of Contents

delivery operations around local service facilities and shipments are moved between origin and destination often through an intermediate distribution or breakbulk facility. Depending on the distance shipped, the LTL segment historically was classified into three subgroups:

Regional Average distance is typically less than 1,200 miles with a focus on one- and two-day markets. Regional transportation companies can move shipments directly to their respective destination location which increases service reliability and avoids costs associated with intermediate handling.

Interregional Average distance is usually between 1,200 and 1,500 miles with a focus on serving two- and three-day markets.

National Average distance is typically in excess of 1,500 miles with a focus on service in three- to five-day markets. National providers rely on intermediate shipment handling through hub and spoke networks, which require numerous satellite service facilities, multiple distribution facilities and a relay network. To gain service and cost advantages, they occasionally ship directly between service facilities reducing intermediate handling or utilize the rail system.

Over the last several years, there has been a blurring of the above subgroups as individual companies are increasingly serving multiple markets. For example, a number of companies are focusing on serving one- and two-day lanes, as well as serving three and more day markets between adjacent regions. Saia LTL Freight operates as a traditional LTL carrier with ability to focus in all three areas.

The truckload segment is the largest portion of the for-hire truck transportation market. Truckload carriers primarily transport large shipments from origin to destination with no intermediate handling. Although a full truckload can weigh over 40,000 pounds, it is common for carriers to haul two or three shipments exceeding 10,000 pounds each at one time making multiple delivery stops.

Because truckload carriers do not require an expansive network to provide point-to-point service, the overall cost structure of truckload participants is typically lower and more variable relative to LTL service providers. However, the lack of a network subjects their drivers to extended periods away from home thus resulting in high driver turnover and periodic shortages. The truckload segment is comprised of several major carriers and numerous small entrepreneurial players. At the most basic level, a truckload company can be started with capital for rolling stock (a tractor and a trailer), insurance, a driver and little else. As size becomes a factor, capital is needed for technology infrastructure and some limited facilities. Saia LTL Freight participates in the truckload market as a means to fill empty miles in lanes that are not at capacity. Saia Sales sales representatives also sell truckload and expedited offerings of Saia TL Plus.

Capital requirements are significantly different in the traditional LTL segment versus the truckload segment. In the LTL sector, substantial amounts of capital are required for a network of service facilities, shipment handling equipment and revenue equipment (both for city pick-up, delivery and linehaul). In addition, investment in effective technology has become increasingly important in the LTL segment largely due to the number of transactions and number of customers served on a daily basis. Saia LTL Freight picks up approximately 25,000 shipments per day, each of which has a shipper and consignee, and occasionally a third party, all of whom need access to information in a timely manner. More importantly, technology plays a key role in improving customer service, operations efficiency and compliance, safety and yield management. As a result of the significant infrastructure required to operate an LTL carrier, the LTL segment is more concentrated than the truckload segment with the largest players in the national and regional markets. Driver turnover in the LTL sector is low relative to the TL sector. Midsize niche carriers serve the regional markets.

Business Strategy

Saia has grown historically through a combination of organic growth and geographic integration or tuck-in of smaller trucking and logistics companies. Saia integrated WestEx and Action Express in 2001, Clark Bros. in 2004, The Connection in 2006 and Madison Freight Systems in 2007. In 2012, Saia acquired Robart

Table of Contents

Transportation, Inc. and its subsidiary, The RL Services Group, LLC (the Robart Companies) which provide customers with non-asset truckload full service and logistics solutions. Effective October 1, 2012, the Company rebranded Robart Transportation, Inc. as Saia TL Plus and The RL Services Group, LLC as Saia Logistics Services, LLC. See Note 11 of the accompanying audited consolidated financial statements for further information on the acquisition of the Robart Companies.

In February 2015, Saia acquired LinkEx, Inc., a diversified, asset-light, third party logistics provider based in Dallas, Texas, for approximately \$25 million, subject, in part, to meeting profit targets. The acquisition of LinkEx is intended to grow the Company's existing portfolio of asset-light services.

Key elements of our business strategy include:

Continue to focus on operating safely.

Our most valuable resource is our employees. It is a corporate priority to continually emphasize the importance of safe operations and to reduce both the frequency and severity of injuries and accidents. This emphasis is not only appropriate to protect our employees and our communities but with the continued escalation of commercial insurance and health care costs, it is important to maintain and improve stockholder returns. Management expects governmental safety regulations and related enforcement initiatives to increase in the future.

Manage yields and business mix.

This element of our business strategy involves managing both the pricing process and the mix of customers' freight in ways that allow our network to operate more profitably. Improvements in the economy coupled with the tightening of available capacity in the industry over the last several years allowed the Company to implement numerous pricing initiatives to increase yield significantly.

Increase density in existing geographies.

We gain operating leverage by growing volume and density within existing geography. Depending on pricing and the specific lanes, we estimate the potential incremental profitability on growth in current markets can be 20 percent or even higher. This improves margins, asset turnover and return on capital. We actively monitor opportunities to add service facilities where we have sufficient density. We see potential for future volume growth at Saia from improvements in the general economy, industry consolidation and strategic acquisitions, as well as specific sales and marketing initiatives.

Continue focus on delivering best-in-class service.

The foundation of Saia's growth strategy is consistent delivery of high-quality service. Commitment to service quality is valued by customers and allows us to gain fair compensation for our services and positions us to improve market share.

Continue focus on improving operating efficiencies.

Saia has operating initiatives focused on continuing to improve efficiency. These initiatives help offset a variety of structural cost increases like healthcare benefits, workers compensation claims, parts and maintenance expense as well as casualty insurance. We believe Saia continues to be well positioned to manage costs and utilize assets. We believe we will continue to see new opportunities for cost savings.

Prepare the organization for future growth.

Our primary focus within organizational development is maintaining strong relationships with our employees. We invest in our employees through internal communication, training programs, recognition programs and providing competitive wages and benefits.

Table of Contents

We believe it is also important to invest in technology capabilities and strategic real estate which are designed to position our Company for future growth to meet the increasing demands of the marketplace. We also believe it is important to invest in our tractor and trailer fleet to improve brand image, gain access to new technologies, lower maintenance expenses, achieve improved fuel economy and gain other operating efficiencies.

Expand portfolio of services in the asset-light market

While our immediate priority is to improve profitability in our existing portfolio of services, we plan to pursue additional services in the asset-light market because it promotes profitability growth and improves our customer value proposition over time.

Expand geographic footprint.

While our immediate priority is to improve profitability in existing geography, we plan to evaluate additional geographic expansion because it promotes profitability growth and improves our customer value proposition over time.

In addition to potential direct expansion through opening of new facilities, management may consider acquisitions from time to time to help expand geographic reach and density while gaining the business base of the acquired entity. Management believes integration of acquisitions is a core competency and it has developed a repeatable process from its successful experience, including Saia's 2001 integration of WestEx and Action Express, its 2004 integration of Clark Bros., its 2006 acquisition of the Connection and subsequent integration thereof, and its 2007 integration of Madison Freight. Collectively, these integrations increased Saia's footprint from 12 to 34 states.

Seasonality

Our revenues are subject to seasonal variations. Customers tend to reduce shipments after the winter holiday season and operating expenses tend to be higher as a percent of revenue in the winter months primarily due to lower capacity utilization and weather effects. Generally, the first quarter is the weakest quarter while the second and third quarters are the strongest quarters in terms of revenue and profit. Quarterly profitability is also impacted by the timing of salary and wage increases and general rate increases which have varied over the years.

Labor

Most LTL companies, including Saia, and virtually all truckload companies are not subject to collective bargaining agreements.

In recent years, due to competition for quality employees, the compensation divide between union and non-union carriers has closed dramatically. However, there are still significant differences in benefit costs and work rule flexibility. Benefit costs for union carriers remain significantly above those paid by non-union carriers and union carriers may be subject to certain contingent multi-employer pension liabilities. In addition, non-union carriers have more work rule flexibility with respect to work schedules, routes and other similar items. Work rule flexibility is a major consideration in the regional LTL sector as flexibility is important to meet the service levels required by customers.

Our employees are not represented by a collective bargaining unit. We believe this provides for better communications and employee relations, stronger future growth prospects, improved efficiencies and customer service capabilities.

Competition

Although there has been some tightening of capacity and some industry consolidation, shippers continue to have a wide range of choices. We believe that service quality, price, variety of services offered, geographic coverage, responsiveness and flexibility are the important competitive differentiators.

Table of Contents

Saia focuses primarily on regional and interregional business and operates in a highly competitive environment against a wide range of transportation service providers. These competitors include a small number of large, national transportation service providers in the long haul and two-day markets and a larger number of shorter-haul or regional transportation companies in the two-day and overnight markets. Saia also competes in and against several modes of transportation, including LTL, truckload and private fleets. The larger the service area, the greater the barriers to entry into the LTL trucking segment due to the need for additional equipment and operational facilities associated with this coverage. The level of technology investment required and density needed to provide adequate labor and asset utilization make larger-scale entry into the LTL market difficult. To a lesser extent, Saia also competes with small package carriers, railroads and air freight carriers.

Regulation

Over the past 35 years, the trucking industry has been substantially deregulated and rates and services are largely free of regulatory controls. Nevertheless, the trucking industry remains subject to regulation by many federal and state governmental agencies, and these authorities have broad powers over matters ranging from the authority to engage in motor carrier operations, motor carrier registration, driver hours of service, safety and fitness of transportation equipment and drivers, insurance requirements, fuel efficiency and emissions standards, and the transportation and handling of hazardous materials.

Key areas of regulatory activity include:

Department of Homeland Security.

The trucking industry is working closely with government agencies to define and implement improved security processes. The Transportation Security Administration continues to focus on trailer security, driver identification, security clearance and border-crossing procedures. These and other safety and security measures, such as rules for transportation of hazardous materials, could increase the cost of operations, reduce the number of qualified drivers and disrupt or impede the timing of our deliveries to customers.

Department of Transportation.

Motor carrier and freight brokerage operations are subject to safety, insurance and bonding requirements prescribed by the U.S. Department of Transportation (DOT) and various state agencies.

Within the DOT, the Federal Motor Carrier Safety Administration (FMCSA) has issued rules including hours of service regulations that limit the maximum number of hours a driver may be on duty between mandatory off-duty hours. These rules could impact our operations, further tighten the market for qualified drivers and put additional upward pressure on driver wages and purchased transportation costs.

Additionally, the FMCSA's Compliance Safety Accountability Program (CSA) could adversely affect our results and ability to maintain or grow our fleet. CSA is an enforcement and compliance model that involves assessments of a motor carrier's on-road performance and investigation results for a 24-month period using roadside stops and inspections, resulting in safety and performance ratings in the following categories: unsafe driving; hours-of-service compliance; driver fitness; controlled substances/alcohol; vehicle maintenance; hazardous material compliance; and crash indicators. The evaluations are used to rank carriers and individual drivers and to select carriers for audit and other interventions. While the ultimate impact of CSA is not yet known, it is possible that these measurements could adversely impact our ability to attract and retain drivers which would adversely affect our results and cash flows.

In February 2014, President Obama announced that the U.S. Environmental Protection Agency (EPA) and the DOT have been ordered to propose additional regulations to reduce exhaust emissions and increase fuel

Table of Contents

efficiency. The agencies are expected to issue a Notice of Proposed Rulemaking by March 2015 and to implement final rules by March 2016. While the impact of these regulations cannot be ascertained at this time, such regulations could increase the cost of capital equipment and maintenance expenses, which could have a material adverse effect on our financial condition and results of operation.

Environmental Protection Agency.

The EPA has issued regulations reducing sulfur content of diesel fuel and reducing engine emissions. These regulations increased the cost of replacing and maintaining trucks. Future environmental laws in this area could further increase our costs and impact our operations.

Our motor carrier operations are also subject to environmental laws and regulations, including laws and regulations dealing with underground fuel storage tanks, the handling, disposal, release and transportation of hazardous materials and other environmental matters. We maintain bulk fuel storage and fuel islands at several of our facilities. Our operations involve the risks of fuel spillage or seepage, environmental damage and hazardous waste disposal, among others. If hazardous materials are released into the environment while being transported by us, we may have liability for response costs and the remediation of such a release. We have established programs designed to monitor and control environmental risks and to comply with all applicable environmental regulations. As part of our safety and risk management program, we periodically perform environmental reviews to maintain environmental compliance and avoid environmental risk. We believe that we are currently in substantial compliance with applicable environmental laws and regulations and that the cost of compliance has not materially affected results of operations.

Food and Drug Administration.

As a transportation provider of foodstuffs, we are subject to rules issued by the Food and Drug Administration (FDA) to provide for the security of food and foodstuffs throughout the supply chain. The Sanitary Food Transportation Act of 2005 (SFTA) shifted responsibility for the regulation of food transportation from the U.S. Department of Transportation to the FDA. In February 2014, the FDA published a proposed rule to establish requirements under SFTA for vehicles and transportation equipment, transportation operations, training, record keeping and waivers. The proposed rule aims to continue the use of best practices in the industry concerning cleaning, inspection, maintenance, loading and unloading of, and operation of vehicles. For example, the proposed rule will require carriers to demonstrate to shippers and, upon request, to receivers that they have maintained appropriate temperature control and to provide information about previous cargoes hauled in bulk vehicles offered for the transportation of food and the intervening cleaning of such vehicles. Carriers would also be required to develop and implement written procedures subject to recordkeeping that specify its practices for cleaning, sanitizing, and inspecting vehicles and transportation equipment. Although we already strive to adhere to such best practices, the impact of the final rule is uncertain and compliance may incur additional expenses and affect our operations.

Trademarks and Patents

We have registered several service marks and trademarks in the United States Patent and Trademark Office, including Saia Guaranteed Select[®], Saia Customer Service Indicators[®] and Saia Xtreme Guarantee[®]. We believe these service marks and trademarks are important components of our marketing strategy.

Additional Information

Saia has an internet website that is located at www.saiacorp.com. Saia makes available, free of charge through its internet website, all filings with the Securities and Exchange Commission (SEC) as soon as reasonably practicable after making such filings with the SEC.

Table of Contents**Executive Officers**

Information regarding executive officers of Saia is as follows (included herein pursuant to Instruction 3 to Item 401(b) of Regulation S-K and General Instruction G(3) of Form 10-K):

Name	Age	Positions Held
Richard D. O Dell	53	President and Chief Executive Officer, Saia, Inc. since January 1, 2007, having served as President of Saia, Inc. since July 2006. Previously, Mr. O Dell served as President and Chief Executive Officer of Saia LTL Freight since November 1999. Mr. O Dell has been a member of the Board of Directors of Saia, Inc. since July 2006.
Frederick J. Holzgreffe, III	47	Vice President of Finance and Chief Financial Officer of Saia, Inc. since September 10, 2014. Prior to joining Saia, Mr. Holzgreffe was Vice President of Business Development since July 2012 for Golden Peanut Company, and Vice President and Chief Financial Officer for the same Company since 2006.
Mark H. Robinson	56	Vice President and Chief Information Officer of Saia, Inc. since August 2005 having served as Vice President of Information Technology for Saia LTL Freight since 1999.
Brian A. Balius	53	Vice President of Transportation and Engineering of Saia LTL Freight since 2007.
Sally R. Buchholz	58	Vice President of Marketing and Customer Service of Saia LTL Freight since 1999.
Stephanie R. Maschmeier	42	Controller, Saia, Inc. since October 2007. Mrs. Maschmeier, a certified public accountant, joined Saia, Inc. in July 2002 as Corporate Financial Reporting Manager.

Officers are elected by the Board of Directors of Saia, Inc. (the Board) and serve at the discretion of the Board. With the exception of Mr. O Dell, none of the officers of the Company are subject to an employment agreement with the Company. There are no family relationships between any executive officer and any other executive officer or director of Saia or its subsidiaries.

Item 1A. Risk Factors

Saia stockholders should be aware of certain risks, including those described below and elsewhere in this Form 10-K, which could adversely affect the value of their holdings and could cause our actual results to differ materially from those projected in any forward looking statements.

We are subject to general economic factors that are largely out of our control, any of which could have a material adverse effect on the results of our operations.

Our business is subject to a number of general economic factors that may have a material adverse effect on the results of our operations, many of which are largely out of our control. These include recessionary economic cycles and downturns in customer business cycles. Economic conditions may adversely affect the business levels of our customers, the amount of transportation services they need and their ability to pay for our services.

Weakness or a loss of confidence in financial markets could adversely impact demand for our services.

Weakness or a loss of confidence in the financial markets could cause broader economic downturns and impact the ability of our customers to access the capital or credit markets which may lead to lower demand for our services, increased incidence of customers inability to pay their accounts, or insolvency of our customers, any of which could adversely affect our results of operations, liquidity, cash flows and financial condition.

Table of Contents

Potential disruptions in the credit markets may adversely affect our business, including the availability and cost of short-term funds for liquidity and letter of credit requirements and our ability to meet long-term commitments which could adversely impact our financial condition and results of operations, liquidity and cash flows.

If internal funds are not available from our operations, we may be required to rely on the capital and credit markets to meet our financial commitments and short-term liquidity needs. Disruptions in the capital and credit markets could adversely affect our ability to draw on our bank revolving credit facility. Our access to funds under that credit facility is dependent on the ability of the banks that are parties to the facility to meet their funding commitments. Those banks may not be able to meet their funding commitments to us if they experience shortages of capital and liquidity or if they experience excessive volumes of borrowing requests from other borrowers within a short period of time.

Longer term disruptions in the capital and credit markets as a result of uncertainty, changing or increased regulation, reduced alternatives or failures of significant financial institutions could adversely affect our access to liquidity needed for our business. Any disruption could require us to take measures to conserve cash until the markets stabilize or until alternative credit arrangements or other funding for our business needs can be arranged.

We are dependent on cost and availability of qualified drivers and purchased transportation.

There is significant competition for qualified drivers within the trucking industry and attracting and retaining drivers has become more challenging. We may periodically experience shortages of qualified drivers that could result in us not meeting customer demands, upward pressure on driver wages, underutilization of our truck fleet and/or use of higher cost purchased transportation which could have a material adverse effect on our operating results. There is also significant competition for quality purchased transportation within the trucking industry. We may periodically experience shortages of quality purchased transportation that could result in higher costs for these services or prevent us from meeting customer demands which could have a material adverse effect on our operating results.

We are dependent on cost and availability of fuel.

Fuel is a significant operating expense and its availability is vital to daily operations. We do not hedge against the risk of fuel price increases. Global political events, acts of terrorism, federal, state and local regulations, natural disasters and other external factors could influence the cost and availability of fuel. Historically, we have been able to obtain fuel from various sources and in the desired quantities, but there can be no assurance that this will continue to be the case in the future and any shortage or interruption in the supply or distribution of fuel could have a material adverse effect on operating results. Volatility in fuel prices to the extent not offset by fuel surcharges or other customer price changes could also have a material adverse effect on operating results. Historically, we have been able to offset significant fuel price volatility through fuel surcharges and other pricing adjustments but we cannot be certain that we will be able to do so in the future. In recent years, given the significance of fuel surcharges, the negotiation of customer price increases has become commingled with fuel surcharges. We have experienced cost increases in other operating costs as a result of volatility in fuel prices; however, the total impact of volatility in energy prices on other non-fuel related expenses is difficult to determine. A rapid and significant volatility in diesel fuel prices would reduce our profitability until we make the appropriate adjustments to our pricing strategy.

Limited supply and increased prices of new revenue equipment and real estate may adversely impact financial results and cash flows.

Investment in new revenue equipment is a significant part of our annual capital expenditures. We may have difficulty in purchasing new trucks due to decreased supply, restrictions on the availability of capital and the price of such equipment may increase as a result of future regulations on newly manufactured diesel engines. Our business model is also dependent on cost and availability of terminal facilities in key metropolitan areas. Shortages in the availability of real estate or delays in construction due to difficulties in obtaining permits may

Table of Contents

require significant additional investment in leasing, purchasing or building facilities, increase our operating expenses and/or prevent us from efficiently serving certain markets. In addition, we may not realize sufficient revenues or profits from our infrastructure investments.

The engines in our newer tractors are subject to new emissions-control regulations which could substantially increase operating expenses and future regulations concerning emissions or fuel-efficiency may adversely impact financial results.

Tractor engines that comply with the EPA emission-control design requirements have been generally less fuel-efficient in the past and have increased maintenance costs compared to engines in tractors manufactured before these requirements became effective. If we are unable to offset resulting increases in fuel expenses or maintenance costs with higher freight rates, our financial condition and results of operations could be adversely affected.

Future strengthening of EPA or other regulatory requirements regarding fuel-efficiency of tractors could also result in increases in the cost of capital equipment and maintenance. While savings on fuel costs resulting from the use of more fuel-efficient equipment could mitigate these additional expenses in part, the impact of future regulations cannot be projected at this time.

Our Company-specific performance improvement initiatives may not be effective.

Operating performance improvement at Saia is dependent on the implementation and/or the continuation of various performance improvement initiatives. There can be no assurance that Saia will be successful in implementing these performance improvement initiatives or that Saia's historical performance trend will be representative of future performance. Failure to achieve performance improvement initiatives could have a material adverse impact on our financial condition and results of operations.

We operate in a highly regulated and highly taxed industry. Costs of compliance with or liability for violation of existing or future regulations could have a material adverse effect on our business.

The U.S. Department of Transportation and various state agencies exercise broad powers over our business, generally governing such activities as authorization to engage in motor carrier operations, safety and financial reporting. We may also become subject to new or more restrictive regulations imposed by the Department of Transportation, the Occupational Safety and Health Administration or other authorities relating to engine exhaust emissions, driver hours of service, security, ergonomics, as well as other unforeseen matters. Compliance with such regulations could substantially impair equipment productivity and increase our costs. Various federal and state authorities impose significant operating taxes on the transportation industry, including fuel taxes, tolls, excise and other taxes. There can be no assurance such taxes will not substantially increase or that new forms of operating taxes will not be imposed on the industry.

The FMCSA has amended rules on motor carrier driver hours of service which limit the maximum number of hours a driver may be on duty between mandatory off-duty hours. Our operations were adjusted to comply with these rules, and while our base operations were not materially affected, we did experience deterioration in the cost, availability and reliability of purchased transportation. Revisions to these rules, as a result of pending or future legal challenges or any future requirements for on-board recorders, could further impact our operations, further tighten the market for qualified drivers and put additional pressure on driver wages and purchased transportation costs.

The Transportation Security Administration continues to focus on trailer security, driver identification and security clearance and border crossing procedures. These and other safety and security measures, such as rules for transportation of hazardous materials could increase the cost of operations, reduce the number of qualified drivers and disrupt or impede the timing of our deliveries for our customers.

Table of Contents

The Food and Drug Administration (FDA) issues rules for carriers of foodstuffs like us to provide for the security of food and foodstuffs throughout the supply chain. The SFTA shifted responsibility for the regulation of food transportation from the U.S. Department of Transportation to the FDA. In February 2014, the FDA published a proposed rule to establish requirements under SFTA for vehicles and transportation equipment, transportation operations, training, record keeping and waivers. The proposed rule aims to continue the use of best practices in the industry concerning cleaning, inspection, maintenance, loading and unloading of, and operation of vehicles. For example, the proposed rule will require carriers to demonstrate to shippers and, upon request, to receivers that they have maintained appropriate temperature control and to provide information about previous cargoes hauled in bulk vehicles offered for the transportation of food and the intervening cleaning of such vehicles. Carriers would also be required to develop and implement written procedures subject to recordkeeping that specify its practices for cleaning, sanitizing, and inspecting vehicles and transportation equipment. Although we already strive to adhere to such best practices, the impact of the final rule is uncertain and compliance may incur additional expenses and affect our operations.

Historically, the EPA has issued regulations that require progressive reductions in exhaust emissions from diesel engines. These regulations increased the cost of replacing and maintaining trucks and increased fuel costs by reducing miles per gallon. These regulations have the potential to reduce availability of fuel and reduce productivity which could have a material adverse effect on our financial condition and results of operation.

In February 2014, President Obama announced that the EPA and the U.S. Department of Transportation have been ordered to propose additional regulations to reduce exhaust emissions and increase fuel efficiency. The agencies are expected to issue a Notice of Proposed Rulemaking by March 2015 and to implement final rules by March 2016. While the impact of these regulations cannot be ascertained at this time, such regulations could increase the cost of capital equipment and maintenance expenses, which could have a material adverse effect on our financial condition and results of operation.

We are subject to various environmental laws and regulations. Costs of compliance with or liabilities for violations of existing or future regulations could have a material adverse effect on our business. We are also subject to increasing customer sensitivity to sustainability issues.

Our operations are subject to environmental laws and regulations dealing with the handling of hazardous materials, underground fuel storage tanks and discharge and retention of storm water. We operate in industrial areas where truck terminals and other industrial activities are located and where groundwater or other forms of environmental contamination may have occurred. Our operations involve the risks of fuel spillage or seepage, environmental damage and hazardous waste disposal, among others. If we are involved in a spill or other accident involving hazardous substances or if we are found to be in violation of applicable laws or regulations, it could have a material adverse effect on our business and operating results. If we fail to comply with applicable environmental regulations, we could be subject to substantial fines or penalties and to civil and criminal liability.

In addition, as climate change concerns become more prevalent, federal and local governments and our customers are increasingly sensitive to these issues. This increased focus on sustainability may result in new regulations and customer requirements that could negatively affect us. This could cause us to incur additional direct costs or to make changes to our operations in order to comply with any new regulations and customer requirements. We could also lose revenue if our customers divert business from us because we have not complied with their sustainability requirements. These costs, changes and loss of revenue could have a material adverse effect on our business, financial condition and results of operations.

CSA could adversely affect our results and ability to maintain or grow our business.

CSA is an enforcement and compliance model that involves assessments of a motor carrier's on-road performance and investigation results for a 24-month period using roadside stops and inspections, resulting in safety and performance ratings in the following categories: unsafe driving; hours-of-service compliance; driver fitness; controlled substances/alcohol; vehicle maintenance; hazardous material compliance; and crash indicators.

Table of Contents

The evaluations are used to rank carriers and individual drivers and to select carriers for audit and other interventions. While the ultimate impact of CSA is not yet known, it is possible that these measurements could adversely impact our ability to attract and retain drivers which would adversely affect our results and cash flows.

Anti-terrorism measures may disrupt our business.

Federal, state and municipal authorities have implemented and are continuing to implement various anti-terrorism measures, including checkpoints and travel restrictions on large trucks. If additional security measures disrupt or impede the timing of our deliveries, we may fail to meet the requirement of our customers or incur increased expenses to do so. There can be no assurance that new anti-terrorism measures will not be implemented and that such measures will not have a material adverse effect on our operations.

We operate in a highly competitive industry and our business will be adversely impacted if we are unable to adequately address potential downward pricing pressures and other factors that may adversely affect our operations and profitability.

Numerous competitive factors could impair our ability to maintain our current profitability. These factors include the following:

competition with many other transportation service providers of varying types including non-asset based logistics and freight brokerage companies, some of which have more equipment, a broader coverage network, a wider range of services and greater capital resources than we do or have other competitive advantages;

transportation companies periodically reduce their prices to gain business, especially during economic recessions or times of reduced growth rates in the economy which may limit our ability to maintain or increase prices or achieve significant growth in our business;

many customers reduce the number of carriers they use by selecting approved transportation service providers or periodically accept bids from multiple carriers for their shipping needs, and these practices may depress prices or result in the loss of business;

the trend towards consolidation in the surface transportation industry may create other large carriers with greater financial resources than us and other competitive advantages due to their size; and

advances in technology require increased investments to remain competitive and our customers may not be willing to accept higher prices to cover the cost of these investments.

Our logistics and brokerage business faces risk from customer concentration and the loss of certain primary customers may have a material adverse effect on those operations.

Our subsidiaries, Saia TL Plus, LLC and LinkEx, Inc., are subject to the risk of customer concentration because of the relative importance of their largest customers and the ability of those customers to negotiate aggressive pricing and other customer-favorable terms, including termination for convenience. Many of our competitors in the logistics industry are subject to the same risk. Although we aim to broaden and diversify the customer base of our logistics and brokerage business, a significant portion of our revenue from these subsidiaries is derived from a small number of large and sophisticated customers and a loss of business from, the bankruptcy or insolvency of, or adverse performance by, these major customers may have a material adverse effect on our financial condition, results of operation and cash flows. Similarly, the renegotiation of these customer contracts may also have an adverse effect on us.

The transportation industry is affected by business risks that are largely out of our control, any of which could have a material adverse effect on the results of our operations.

Businesses operating in the transportation industry are affected by risks that are largely out of their control, any of which could have a material adverse effect on the results of our operations. These factors include health of

Table of Contents

the economy, weather, excess capacity in the transportation industry, interest rates, fuel costs, fuel taxes, license and registration fees, health care costs and insurance premiums. Our results of operations may also be affected by seasonal factors. In particular, harsh weather can affect our operations by increasing operational costs, introducing infrastructure instability and disrupting advance route and load planning.

We have significant ongoing cash requirements that could limit our growth and affect profitability if we are unable to generate sufficient cash from operations or obtain sufficient financing on favorable terms.

Our business is highly capital intensive. Our net capital expenditures for 2014 were approximately \$112 million inclusive of equipment acquired with capital leases. Additionally, we anticipate net capital expenditures in 2015 of approximately \$125 million. We depend on cash flows from operations, borrowings under our credit facilities and operating and capital leases. If we are unable to generate sufficient cash from operations and obtain sufficient financing on favorable terms in the future, we may have to limit our growth, enter into less favorable financing arrangements or operate our trucks and trailers for longer periods. Any of these could have a material adverse effect on our financial condition and results of operations.

Under our current credit facilities, we are subject to certain debt covenants and prepayment penalties. Those debt covenants prohibit the payment of dividends and require maintenance of certain maximum leverage and minimum fixed charge coverage ratios, minimum tangible net worth and a borrowing base, among other restrictions, that could limit availability of capital to meet our future growth.

Our ability to repay or refinance our indebtedness will depend upon our future operating performance which will be affected by general economic, financial, competitive, legislative, regulatory and other factors beyond our control.

Our credit and debt agreements contain financial and other restrictive covenants and we may be unable to comply with these covenants. A default could cause a material adverse effect on our liquidity, financial condition and results of operations.

We must maintain certain financial and other restrictive covenants under our credit and debt agreements, including among others, a fixed charge coverage ratio, leverage ratio, minimum tangible net worth and a borrowing base. If we fail to comply with any of these covenants, we will be in default under the relevant agreement which could cause cross-defaults under other financial arrangements. In the event of any such default, if we fail to obtain replacement financing, amendments to or waivers under the applicable financing arrangements, our financing sources could cease making further advances or declare our debt to be immediately due and payable. If acceleration occurs, we may have difficulty in borrowing sufficient additional funds to refinance the accelerated debt or we may have to issue securities which would dilute stock ownership. Even if new financing is made available to us, it may not be available on acceptable terms. A default under our credit and debt agreements could cause a material adverse effect on our liquidity, financial condition and results of operations.

Ongoing insurance and claims expenses could significantly reduce and cause volatility to our earnings.

We are exposed to claims resulting from cargo loss, personal injury, property damage, group health care and workers' compensation in amounts ranging from \$250,000 to \$2.0 million per claim. We also maintain insurance with licensed insurance companies above these large deductible amounts. If the number or severity of future claims increases, insurance claim expenses might exceed historical levels which could significantly reduce our earnings. A deterioration in safety experience could cause customers to switch business to competitors. Significant increases in insurance premiums could also impact financial results or cause us to raise our self-insured retentions.

Furthermore, insurance companies, as well as certain states, require collateral in the form of letters of credit or surety bonds for the estimated exposure of claims within our self-insured retentions. Their estimate of our future exposure as well as external market conditions could influence the amount and costs of additional letters of credit required under our insurance programs and thereby reduce capital available for future growth.

Table of Contents

Employees of Saia are non-union. The ability of Saia to compete could be impaired if operations were to become unionized.

None of our employees are currently subject to a collective bargaining agreement. We have in the past been the subject of unionization efforts which have been defeated. However, the U.S. Congress could pass labor legislation, such as the formerly proposed Employee Free Choice Act, which could make it significantly easier for unionization efforts to be successful. If this bill or a variation of it is enacted in the future or if federal regulations regarding labor relations are changed, it could have an adverse impact on our business. While Saia believes its current relationship with its employees is good, there can be no assurance that further unionization efforts will not occur in the future and that such efforts will be defeated. The non-union status of Saia is an important factor in our ability to compete in our markets.

If we are unable to retain our key employees, our business, financial condition and results of operation could be adversely impacted.

We depend on the efforts and abilities of our senior management. The future success of our business will continue to depend in part, on our ability to retain our current management team and to attract and retain qualified personnel in the future. Competition for senior management is intense, and, with the exception of Mr. O Dell, our senior management do not have employment agreements. The loss of a member of senior management would require our remaining executive officers to divert immediate and substantial attention to fulfilling the duties of the departing executive and to seeking a replacement. The inability to adequately fill vacancies in our senior management positions on a timely basis could negatively affect our ability to implement our business strategy and thus impact our results of operations.

Changes to our compensation and benefits could adversely affect our ability to attract and retain employees.

Like other companies, we implemented certain salary and wage cost initiatives in 2009 in response to macro-economic challenges. Such initiatives have been reversed as our financial performance improved. If our salary and wages are not competitive, we may find it difficult to attract, retain and motivate employees and any such difficulty could materially adversely affect our business.

An increase in the cost of healthcare benefits could have a negative impact on our profitability.

We maintain and sponsor health insurance for our employees and their dependents and offer a competitive healthcare program to attract and retain our employees. It is possible that healthcare costs could become increasingly cost prohibitive, either forcing us to make changes to our benefits program or negatively impacting our future profitability.

The legislation on healthcare reform and related regulations could affect the healthcare benefits required to be provided by the Company and cause our compensation costs to increase, adversely affecting our results and cash flows.

The Patient Protection and Affordable Care Act and regulations that interpret the law contain provisions which could materially impact the future healthcare costs of the Company. While the legislation's ultimate impact is not yet known, it is possible that these changes could significantly increase our employee benefits costs which would adversely affect our results and cash flows. Expanded coverage for dependents and elimination of caps on individual maximum expenditures increased the Company's costs starting in 2011 and in each year since.

We rely heavily on technology to operate our business and any disruption to our technology infrastructure could harm our operations.

Our ability to attract and retain customers and compete effectively depends in part upon reliability of our technology network including our ability to provide services that are important to our customers. Any disruption to our technology infrastructure (including services provided to us for use in our business by outside providers),

Table of Contents

including those impacting our computer systems and web site, could adversely impact our customer service and revenues and result in increased costs. While we have invested and continue to invest in technology security initiatives and disaster recovery plans, these measures cannot fully protect us from technology disruptions that could have a material adverse effect on us.

Our dependence on electronic data storage, automated systems and technology gives rise to cyber-security risks. Although we and our third-party providers have preventive systems and processes in place designed to protect against the risk of system failure and cyber-attacks, a security breach of our systems or those of our third-party providers may cause a disruption of our business or the loss of information and could have a material adverse effect on our financial condition, reputation and results of operations.

Increased usage of social media poses reputational risks.

As use of social media becomes more prevalent, our susceptibility to risks related to social media increases. While we have implemented a social media policy to provide our employees with guidance for sharing information over social media in a way that is beneficial to us, the immediacy of social media precludes us from having real-time control over postings made regarding us via social media, whether matters of fact or opinion. Information distributed via social media could result in immediate unfavorable publicity for which we, like our competitors, do not have the ability to reverse. This unfavorable publicity could result in damage to our reputation and therefore negatively impact our operations and profitability.

Certain provisions of our governing documents and Delaware law could have anti-takeover effects.

As a Delaware corporation, we are also subject to certain Delaware anti-takeover provisions. Under Delaware law, a corporation may not engage in a business combination with any holder of 15% or more of its capital stock unless the holder has held the stock for three years or, among other things, the Board of Directors has approved the transaction. Our Board of Directors could rely on Delaware law to prevent or delay an acquisition of us.

Our Restated Certificate of Incorporation and By-laws contain certain provisions which may have the effect of delaying, deferring or preventing a change of control of the Company. Such provisions include, for example, provisions classifying our Board of Directors, a prohibition on shareholder action by written consent, authorization of the Board of Directors to issue preferred stock in series with the terms of each series to be fixed by the Board of Directors and an advance notice procedure for shareholder proposals and nominations to the Board of Directors. These provisions may inhibit fluctuations in the market price of our common stock that could result from takeover attempts.

We may not make future acquisitions or, if we do, we may not realize the anticipated benefits of future acquisitions and integration of these acquisitions may disrupt our business and management.

We may make additional acquisitions in the future. However, there is no assurance that we will be successful in identifying, negotiating or consummating any future acquisitions. Additionally, we may not realize the anticipated benefits of any future acquisitions. Each acquisition has numerous risks including:

difficulty in integrating the operations and personnel of the acquired company or unanticipated costs to support new business lines or separate legal entities;

disruption of our ongoing business, distraction of our management and employees from other opportunities and challenges due to integration issues;

additional indebtedness or the issuance of additional equity to finance future acquisitions, which could be dilutive to our shareholders;

potential loss of key customers or employees of acquired companies;

Table of Contents

temporary depression in prices we charge certain customers in order to match existing customer pricing in the acquired company's markets;

inability to achieve the financial and strategic goals for the acquired and combined businesses; and

potential failure of the due diligence processes to identify significant issues with legal and financial contingencies, among other things. In the event that the integrations are not successfully completed, there could be a material adverse effect on us.

We face litigation risks that could have a material adverse effect on the operation of our business.

We face litigation regarding a variety of issues, including without limitation, alleged violations of federal and state labor and employment laws and accidents involving our trucks and employees. These proceedings may be time-consuming, expensive and disruptive to normal business operations. The defense of such lawsuits could result in significant expense and the diversion of our management's time and attention from the operation of our business. Some or all of the amount we may be required to pay to defend or to satisfy a judgment or settlement of any or all of these proceedings may not be covered by insurance and could have a material adverse effect on us.

The market value of our common stock may fluctuate and could be substantially affected by various factors.

The price of our common stock on the NASDAQ Global Select Market constantly changes. We expect that the market price of our common stock will continue to fluctuate and the fluctuations may be unrelated to our financial performance. Our share price may fluctuate as a result of a variety of factors, many of which are beyond our control. These factors include, but are not limited to, the following:

Actual or anticipated variations in our earnings, financial or operating performance or liquidity, or those of other companies in our industry;

Changes in recommendations or projections of research analysts who follow our stock or the stock of other companies in our industry;

Failure to meet the earnings projections of research analysts who follow our stock;

Changes in general economic and capital market conditions, including general market price declines or market volatility;

Reactions to our regulatory filings and announcements related to our business;

Operating and stock performance of other companies in our industry;

Actions by government regulators;

Litigation involving our company, our general industry or both;

News reports or trends, concerns and other issues related to us or our industry, including changes in regulations; and

Other factors described in this Risk Factors section.

Our results of operations and financial condition could be adversely affected by an unfavorable outcome resulting from these risks and uncertainties.

Item 1B. *Unresolved Staff Comments*

None.

Table of Contents**Item 2. Properties**

Saia is headquartered in Johns Creek, Georgia and has general offices in Houma, Louisiana and Boise, Idaho. At December 31, 2014, Saia owned 62 service facilities, including the Houma, Louisiana general office and leased 88 service facilities, including the Johns Creek, Georgia corporate office and the Boise, Idaho general office. Although Saia owns only 40 percent of its service facility locations, these locations account for 54 percent of its door capacity. This follows Saia's strategy of owning strategically-located facilities that are integral to its operations and leasing service facilities in smaller markets to allow for more flexibility. As of December 31, 2014, Saia owned approximately 3,780 tractors and 11,530 trailers.

The Company has pledged certain real property, tractors and trailers and personal property owned by the Company to secure the Company's obligations under its revolving credit agreement and long-term note agreement. All service facilities listed in the table below denoted as owned by the Company are subject to liens pursuant to the agreements. See Financial Condition under Item 7: Management's Discussion and Analysis of Financial Condition and Results of Operations for more information about the revolving credit agreement and long-term note agreement.

Item 3. Legal Proceedings

The Company is subject to legal proceedings that arise in the ordinary course of its business. The Company believes that adequate provisions for resolution of all contingencies, claims and pending litigation have been made for probable and estimable losses and that the ultimate outcome of these actions will not have a material adverse effect on its financial condition but could have a material adverse effect on its results of operations in a given quarter or annual period.

Item 4. Mine Safety Disclosures

Not applicable.

Table of Contents**PART II.****Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities**
Stock Price Information

The Company effected a three-for-two common stock split in the form of a 50 percent stock dividend on June 13, 2013. All references in this report to common stock outstanding, weighted common shares outstanding, earnings per share amounts, and historical stock prices have been retroactively restated to reflect this stock split.

Saia's common stock is listed under the symbol SAIA on the NASDAQ Global Select Market (NASDAQ). The following table sets forth, for the periods indicated, the high and low sale prices per share for the common stock as reported on NASDAQ.

	Low	High
Year Ended December 31, 2014		
First Quarter	\$ 29.32	\$ 40.68
Second Quarter	\$ 35.19	\$ 46.74
Third Quarter	\$ 42.25	\$ 54.10
Fourth Quarter	\$ 44.59	\$ 57.60
Year Ended December 31, 2013		
First Quarter	\$ 15.17	\$ 24.57
Second Quarter	\$ 21.91	\$ 33.31
Third Quarter	\$ 27.95	\$ 34.98
Fourth Quarter	\$ 29.85	\$ 35.31

Stockholders

As of January 31, 2015, there were 1,301 holders of record of our common stock.

Dividends

We have not paid a cash dividend on our common stock. Any payment of dividends in the future is dependent upon our financial condition, capital requirements, earnings, cash flow and other factors.

The payment of dividends is prohibited under our current debt agreements. However, there are no material restrictions on the ability of our subsidiaries to transfer funds to Saia, Inc. in the form of cash dividends, loans or advances. See Note 2 of the accompanying audited consolidated financial statements for more information on the debt agreements.

(3) The operating ratio is the calculation of operating expenses divided by operating revenue.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations
Forward-Looking Statements

The Securities and Exchange Commission (the SEC) encourages companies to disclose forward-looking information so that investors can better understand the future prospects of a company and make informed investment decisions. This Annual Report on Form 10-K, including

Management's Discussion and Analysis of Financial Condition and Results of Operations, contains these types of statements, which are forward-looking within the meaning of the Private Securities Litigation Reform Act of 1995. Words such as anticipate, estimate, expect, project, intend, may, plan, predict, believe, should and similar words or expressions are intended to identify forward-looking statements. Investors should not place undue reliance on forward-looking statements, and the Company undertakes no obligation to publicly update or revise any forward-looking statements. All forward-looking statements reflect the present expectation of future events of our management as of the date of this Annual Report on Form 10-K and are subject to a number of important factors, risks, uncertainties and assumptions that could cause actual results to differ materially from those described in any forward-looking statements. These factors, risks, assumptions and uncertainties include, but are not limited to, general economic conditions including downturns in the business cycle; the creditworthiness of our customers and their ability to pay for services; loss of a key customer; failure to achieve acquisition synergies; competitive initiatives and pricing pressures, including in connection with fuel surcharge; the Company's need for capital and

Table of Contents

uncertainty of the current credit markets; the possibility of defaults under the Company's debt agreements (including violation of financial covenants); possible issuance of equity which would dilute stock ownership; integration risks; the effect of litigation including class action lawsuits; cost and availability of qualified drivers, fuel, purchased transportation, real property, revenue equipment and other assets; governmental regulations, including but not limited to Hours of Service, engine emissions, the Compliance, Safety, Accountability (CSA) initiative, compliance with legislation requiring companies to evaluate their internal control over financial reporting, Homeland Security, environmental regulations and the FDA; changes in interpretation of accounting principles; dependence on key employees; inclement weather; labor relations, including the adverse impact should a portion of the Company's workforce become unionized; effectiveness of Company-specific performance improvement initiatives; terrorism risks; self-insurance claims and other expense volatility; increased costs as a result of recently-enacted healthcare reform legislation; social media risk; cyber security risk and other financial, operational and legal risks and uncertainties detailed from time to time in the Company's SEC filings. These factors and risks are described in Part II, Item 1A. Risk Factors of this Annual Report on Form 10-K.

As a result of these and other factors, no assurance can be given as to our future results and achievements. Accordingly, a forward-looking statement is neither a prediction nor a guarantee of future events or circumstances and those future events or circumstances may not occur. You should not place undue reliance on the forward-looking statements, which speak only as of the date of this Form 10-K. We are under no obligation, and we expressly disclaim any obligation, to update or alter any forward-looking statements, whether as a result of new information, future events or otherwise.

Executive Overview

The Company's business is highly correlated to non-service sectors of the general economy. The Company's strategy is to improve profitability by increasing yield while also increasing volumes to build density in existing geography. The Company's business is labor intensive, capital intensive and service sensitive. The Company looks for opportunities to improve cost effectiveness, safety and asset utilization (primarily tractors and trailers). The pricing initiatives that were implemented in 2010 and continued since then have had a positive impact on yield and profitability. The Company continues to execute targeted sales and marketing programs along with initiatives to align costs with volumes and improve customer satisfaction. Technology continues to be an important investment that is facilitating operational efficiencies and improving Company image.

The Company's operating revenue increased by 11.7 percent in 2014 over 2013. The increase resulted primarily from improved yield from pricing actions.

Consolidated operating income was \$85.7 million for 2014 compared to consolidated operating income of \$74.4 million in 2013. The 2014 operating income increase resulted primarily from improved yield from pricing and business mix actions along with savings in expenses realized from company initiatives.

The Company generated \$102.2 million in cash provided by operating activities in 2014 versus \$101.3 million in 2013. The Company used \$94.8 million of net cash in investing activities during 2014 compared to \$122.0 million during 2013.

On November 30, 2011, the Company entered into a Fourth Amended and Restated Credit Agreement with its banking group. The November 2011 amendment provides for a LIBOR rate margin from 200 basis points to 300 basis points, base rate margin from zero to 75 basis points, letter of credit fees from 212.5 basis points to 312.5 basis points and unused portion fees from 25 basis points to 35 basis points. The facility increases the revolving credit facility to \$150 million in availability, subject to a borrowing base and extends the term to November 2016. On June 28, 2013, the Company entered into a First Amendment To Fourth Amended and Restated Credit Agreement with its banking group and a Third Amendment to Amended and Restated Master Shelf Agreement with its long-term note holders. The June 2013 amendment increases the revolving credit

Table of Contents

facility to \$200 million expiring in June 2018. The facility also has an accordion feature that allows for an additional \$40 million availability, subject to lender approval. The facility provides for a LIBOR rate margin range from 125 basis points to 250 basis points, base rate margins from minus 12.5 to plus 50 basis points, letter of credit fee range from 137.5 basis points to 262.5 basis points and an unused portion fee from 20 basis points to 32.5 basis points in each case based on the Company's leverage ratio.

The Company's cash used in financing activities during 2014 was \$3.1 million compared to cash provided by financing activities during 2013 of \$20.5 million. The Company had a \$3.3 million decrease in net cash borrowings under its revolving credit agreement during 2014 and made scheduled principal payments of Senior Notes of \$7.1 million during 2014. Outstanding letters of credit were \$49.1 million and the cash and cash equivalents balance was \$4.4 million as of December 31, 2014. The Company was in compliance with the debt covenants under its debt agreements at December 31, 2014. See "Financial Condition" for a more complete discussion of these agreements.

General

The following Management's Discussion and Analysis describes the principal factors affecting the results of operations, liquidity and capital resources, as well as the critical accounting policies of Saia, Inc. and Subsidiaries (also referred to as Saia or the Company). This discussion should be read in conjunction with the accompanying audited consolidated financial statements which include additional information about our significant accounting policies, practices and the transactions that underlie our financial results.

The Company is a transportation company headquartered in Johns Creek, Georgia providing a wide range of less-than-truckload, non-asset truckload, expedited and logistics services across the United States.

Our business is highly correlated to non-service sectors of the general economy. It also is impacted by a number of other factors as discussed under "Forward Looking Statements" and Part II, Item 1A. "Risk Factors." The key factors that affect our operating results are the volumes of shipments transported through our network, as measured by our average daily shipments and tonnage; the prices we obtain for our services, as measured by revenue per hundredweight (a measure of yield) and revenue per shipment; our ability to manage our cost structure for capital expenditures and operating expenses such as salaries, wages and benefits; purchased transportation; claims and insurance expense; fuel and maintenance; and our ability to match operating costs to shifting volume levels.

Table of Contents**Results of Operations****Saia, Inc. and Subsidiaries****Selected Results of Continuing Operations and Operating Statistics****For the years ended December 31, 2014, 2013 and 2012****(in thousands, except ratios and revenue per hundredweight)**

Continuing Operations**Year ended December 31, 2014 as compared to year ended December 31, 2013****Revenue and volume**

Consolidated revenue increased 11.7 percent to \$1.3 billion as a result of increased yield due to measured pricing and mix management actions and increased tonnage. Improvements in the economic environment over the last couple of years permitted the Company to implement measured pricing actions to improve yield. Saia's LTL revenue per hundredweight (a measure of yield) increased 4.4 percent to \$14.96 per hundredweight for 2014 primarily as a result of increased rates. Saia's LTL tonnage increased 6.3 percent to 3.9 million tons and LTL shipments increased 6.2 percent to 6.6 million shipments. For 2014, approximately 75 percent of Saia's operating revenue was subject to specific customer price adjustment negotiations that occur throughout the year. The remaining 25 percent of operating revenue was subject to a general rate increase which is based on market conditions. For customers subject to an annual general rate increase, on April 1, 2014, Saia implemented a 4.5 percent general rate increase. On July 1, 2013, Saia implemented a 5.9 percent general rate increase. Competitive factors, customer turnover and mix changes, among other things, impact the extent to which customer rate increases are retained over time.

Operating revenue includes fuel surcharge revenue from the Company's fuel surcharge program. That program is designed to reduce the Company's exposure to fluctuations in fuel prices by adjusting total freight charges to account for changes in the price of fuel. The Company's fuel surcharge is generally based on the average national price for diesel fuel and is reset weekly. Fuel surcharges have remained in effect for several years, are widely accepted in the industry and are a significant component of revenue and pricing. Fuel

Table of Contents

surcharges are an integral part of annual customer contract renewals which blur the distinction between base price increases and recoveries under the fuel surcharge program. Fuel surcharges represent only one portion of overall competitive price negotiations as customers may negotiate increases in base rates instead of increases in fuel surcharges or vice versa. Fuel surcharge revenue decreased to 16.6% of operating revenue for the year ended December 31, 2014 compared to 16.8% for the year ended December 31, 2013.

Operating expenses and margin

Consolidated operating income was \$85.7 million in 2014 compared to operating income of \$74.4 million in 2013. In summary, the operations were favorably impacted in 2014 by higher yield and volume combined with continued cost optimization initiatives throughout our network, which more than offset compensation, purchased transportation, accident expense increases and other inflationary costs. The 2014 operating ratio (operating expenses divided by operating revenue) was 93.3 percent as compared to 93.5 percent for 2013.

Salaries, wages and benefit expense increased \$67.1 million largely due to wage increases of approximately 3.0 percent in July 2014, higher wages associated with the increased tonnage, increased headcount and higher health care costs. Claims and insurance in 2014 was \$12.1 million higher than 2013 largely due to increased accident severity in 2014. The Company can experience volatility in accident expense as a result of its self-insurance structure and \$2.0 million retention limits per occurrence. Depreciation expense increased \$7.5 million in 2014 compared to 2013 primarily due to revenue equipment and technology investments in late 2013 and 2014. Purchased transportation expense increased \$26.6 million primarily due to increased demand, customer service needs and industry driver shortages causing increased rates for such services.

Other

Substantially all non-operating expenses represent interest expense. Interest expense in 2014 was lower due to lower borrowings and lower interest rates. The effective tax rate was 36.0 percent for the year ended December 31, 2014 and 2013. The 2013 effective tax rate included approximately \$1.0 million in alternative fuel tax credits enacted during 2013 that were retroactive to 2012. The notes to the consolidated financial statements provide an analysis of the income tax provision and the effective tax rate.

Working capital/capital expenditures

Working capital at December 31, 2014 was \$59.2 million which increased from working capital at December 31, 2013 of \$29.4 million primarily due to an increase in accounts receivable and a higher income tax receivable. Cash flows from operating activities were \$102.2 million for 2014 versus \$101.3 million for 2013. For 2014, cash used in investing activities was \$94.8 million versus \$122.0 million in the prior year primarily due to \$16.6 million in revenue equipment purchases financed through capital leases in 2014. Cash used in financing activities was \$3.1 million in 2014 versus cash provided by financing activities of \$20.5 million for the prior year due to funding of portion of the capital expenditures with capital leases in 2014.

Year ended December 31, 2013 as compared to year ended December 31, 2012
Revenue and volume

Consolidated revenue increased 3.7 percent to \$1.14 billion as a result of increased yield due to measured pricing and mix management actions. Improvements in the economic environment permitted the Company to implement measured pricing actions to improve yield. Saia's LTL revenue per hundredweight (a measure of yield) increased 3.7 percent to \$14.33 per hundredweight for 2013 primarily as a result of increased rates. Saia's LTL tonnage decreased 0.3 percent to 3.7 million tons and LTL shipments decreased 0.5 percent to 6.3 million shipments. For 2012 and 2013, approximately 70 percent of Saia's operating revenue was subject to specific customer price adjustment negotiations that occur throughout the year. The remaining 30 percent of operating revenue was subject to a general rate increase which is typically taken once a year. On July 1, 2013, Saia

Table of Contents

implemented a 5.9 percent general rate increase for customers comprising this 30 percent of operating revenue. On July 9, 2012, Saia implemented a 6.9 percent general rate increase for customers comprising this 30 percent of operating revenue. Competitive factors, customer turnover and mix changes, among other things, impact the extent to which customer rate increases are retained over time.

Operating revenue includes fuel surcharge revenue from the Company's fuel surcharge program. That program is designed to reduce the Company's exposure to fluctuations in fuel prices by adjusting total freight charges to account for changes in the price of fuel. The Company's fuel surcharge is generally based on the average national price for diesel fuel and is reset weekly. Fuel surcharges have remained in effect for several years, are widely accepted in the industry and are a significant component of revenue and pricing. Fuel surcharges are an integral part of annual customer contract renewals which blur the distinction between base price increases and recoveries under the fuel surcharge program. Fuel surcharges represent only one portion of overall competitive price negotiations as customers may negotiate increases in base rates instead of increases in fuel surcharges or vice versa. Fuel surcharge revenue decreased to 16.8% of operating revenue for the year ended December 31, 2013 compared to 17.3% for the year ended December 31, 2012.

Operating expenses and margin

Consolidated operating income was \$74.4 million in 2013 compared to operating income of \$58.7 million in 2012. Overall, the operations were favorably impacted in 2013 by higher yield combined with continued cost optimization initiatives throughout our network. The 2013 operating ratio (operating expenses divided by operating revenue) was 93.5 percent as compared to 94.7 percent for 2012.

Salaries, wages and benefit expense increased \$25.7 million largely due to wage increases of approximately 3.0 percent in July 2013 and 2012, and higher health care costs. Claims and insurance in 2013 was \$0.8 million higher than 2012 reflecting increased accident severity in 2013. The Company can experience volatility in accident expense as a result of its self-insurance structure and \$2.0 million retention limits per occurrence. Depreciation expense increased \$3.6 million in 2013 compared to 2012 largely due to revenue equipment and technology investments in late 2012 and 2013. Purchased transportation expense decreased \$1.5 million primarily due to network optimization.

Other

Substantially all non-operating expenses represent interest expense. Interest expense in 2013 was lower due to lower borrowings and lower interest rates. The effective tax rate was 36.0 percent for the year ended December 31, 2013 compared to 37.3 percent in 2012 reflecting changes in the timing of recognition of certain income tax credits. The 2013 effective tax rate included approximately \$1.0 million in alternative fuel tax credits enacted during 2013 that were retroactive to 2012. The notes to the consolidated financial statements provide an analysis of the income tax provision and the effective tax rate.

Working capital/capital expenditures

Working capital at December 31, 2013 was \$29.4 million which increased from working capital at December 31, 2012 of \$2.9 million primarily due to increased accounts receivable and a higher income tax receivable. Cash flows from operating activities were \$101.3 million for 2013 versus \$100.7 million for 2012. For 2013, cash used in investing activities was \$122.0 million versus \$90.4 million in the prior year primarily due to higher revenue equipment purchases. Cash provided by financing activities was \$20.5 million in 2013 versus \$11.2 million for the prior year due to cash needed to fund the increased level of capital expenditures.

Outlook

Our business remains highly correlated to the general economy and competitive pricing pressures, as well as the success of Company-specific improvement initiatives. While improved through 2013 and 2014, there remains

Table of Contents

uncertainty as to the timing and strength of economic recovery. We are continuing initiatives to increase yield, to reduce costs and improve productivity. We focus on providing top quality service and improving safety performance. If significant competitors were to cease operations and their capacity leave the market, current industry capacity conditions would likely improve. However, there can be no assurance that any industry consolidation will indeed happen or if such consolidation occurs that it will materially improve the excess industry capacity. The Company continues to pursue revenue and cost initiatives to improve profitability. Planned revenue initiatives include, but are not limited to, building density in our current geography, targeted marketing initiatives to grow revenue in more profitable segments, as well as pricing and yield management. On January 5, 2015, Saia implemented a 4.9 percent general rate increase impacting customers comprising approximately 25 percent of Saia's operating revenue. Saia revised its fuel surcharge program effective February 2, 2015. The extent of success of these revenue initiatives is impacted by what proves to be the underlying economic trends, competitor initiatives and other factors discussed under [Forward-Looking Statements](#) and Part II, Item 1A. [Risk Factors](#).

Effective July 1, 2014, the Company implemented a salary and wage increase for all of its employees. The impact of the July 2014 compensation increase of approximately three percent is expected to be approximately \$14 million annually. The Company anticipates the impact of the July 2014 compensation increase to be partially offset by further productivity and efficiency gains. The Company also anticipates market competitive wage increases in 2015.

If the Company builds market share, there are numerous operating leverage cost benefits. Conversely, should the economy soften from present levels, the Company plans to attempt to match resources and capacity to shifting volume levels to lessen unfavorable operating leverage. The success of cost improvement initiatives is also impacted by the cost and availability of drivers and purchased transportation, fuel, insurance claims, regulatory changes, successful implementation of profit improvement initiatives and other factors discussed under [Forward-Looking Statements](#) and Part II, Item 1A. [Risk Factors](#).

See [Forward-Looking Statements](#) and Part II, Item 1A. [Risk Factors](#) for a more complete discussion of potential risks and uncertainties that could materially affect our future performance.

New Accounting Pronouncements

On May 28, 2014, the FASB issued ASU No. 2014-09, *Revenue from Contracts with Customers*, which requires an entity to recognize the amount of revenue to which it expects to be entitled for the transfer of promised goods or services. The ASU will replace most existing revenue recognition guidance in U.S. generally accepted accounting principles when it becomes effective. The new standard is effective for us on January 1, 2017. Early application is not permitted. The standard permits the use of either the retrospective or cumulative effect transition method. The Company is evaluating the effect that ASU 2014-09 will have on its consolidated financial statements and related disclosures. The Company has not yet selected a transition method nor has it completed its evaluation of the effect of the standard on its ongoing financial reporting.

Financial Condition

The Company's liquidity needs arise primarily from capital investment in new equipment, land and structures, information technology and letters of credit required under insurance programs, as well as funding working capital requirements.

The Company is party to a revolving credit agreement (the Restated Credit Agreement) with a group of banks to fund capital investments, letters of credit and working capital needs. The facility provides up to \$200 million in availability, subject to a borrowing base and expires in June 2018. The Company is also a party to a long-term note agreement (the Restated Master Shelf Agreement). The Company has pledged certain real estate and facilities, tractors and trailers, accounts receivable and other assets to secure indebtedness under both agreements.

Table of Contents

Restated Credit Agreement

The Restated Credit Agreement is a revolving credit facility for up to \$200 million expiring in June 2018. The Restated Credit Agreement also has an accordion feature that allows for an additional \$40 million availability, subject to lender approval. The Restated Credit Agreement provides for a LIBOR rate margin range from 125 basis points to 250 basis points, base rate margins from minus 12.5 to plus 50 basis points, letter of credit fee range from 137.5 basis points to 262.5 basis points and an unused portion fee from 20 basis points to 32.5 basis points in each case based on the Company's leverage ratio.

Under the Restated Credit Agreement, the Company must maintain certain financial covenants including a minimum fixed charge coverage ratio, a maximum leverage ratio and a minimum tangible net worth, among others. The Restated Credit Agreement also provides for a pledge by the Company of certain land and structures, certain tractors, trailers and other personal property and accounts receivable, as defined in the Restated Credit Agreement. Total bank commitments under the Restated Credit Agreement are \$200 million. If the Company's leverage ratio exceeds a 3-to-1 ratio, the bank commitments become subject to a borrowing base calculated utilizing certain pledged property, equipment and accounts receivable as defined in the Restated Credit Agreement.

At December 31, 2014, the Company had borrowings of \$45.0 million and outstanding letters of credit of \$47.3 million under the Restated Credit Agreement. At December 31, 2013, the Company had borrowings of \$48.3 million and outstanding letters of credit of \$59.1 million under the Restated Credit Agreement. The available portion of the Restated Credit Agreement may be used for general corporate purposes, including future capital expenditures, working capital and letter of credit requirements as needed.

Restated Master Shelf Agreement

On September 20, 2002, the Company issued \$100 million in Senior Notes under a \$125 million (amended to \$150 million in April 2005) Master Shelf Agreement with Prudential Investment Management, Inc. and certain of its affiliates. The Company issued another \$25 million in Senior Notes on November 30, 2007 and \$25 million in Senior Notes on January 31, 2008 under the same Master Shelf Agreement.

The initial \$100 million Senior Notes had a fixed interest rate of 7.38 percent. Payments due under the \$100 million Senior Notes were interest only until June 30, 2006 and at that time semi-annual principal payments began with the final payment made December 2013. The November 2007 issuance of \$25 million Senior Notes has a fixed interest rate of 6.14 percent. The January 2008 issuance of \$25 million Senior Notes has a fixed interest rate of 6.17 percent. Payments due for both \$25 million issuances were interest only until June 30, 2011 and at that time semi-annual principal payments began with the final payments due January 1, 2018. Under the terms of the Senior Notes, the Company must maintain certain financial covenants including a minimum fixed charge coverage ratio, a maximum leverage ratio and a minimum tangible net worth, among others.

Capital Leases

The Company is obligated under capital leases which include obligations covering revenue equipment totaling \$16.6 million that expire in seven years. Amortization of assets held under the capital leases is included in depreciation expense. The weighted average interest rate for the capital leases at December 31, 2014 is 2.92%.

Other

At December 31, 2014, YRC Worldwide Inc., formerly Yellow Corporation (Yellow), provided guarantees on behalf of Saia primarily for open workers' compensation claims and casualty claims incurred prior to March 1, 2000. Under the Master Separation and Distribution Agreement entered into in connection with the 100

Table of Contents

percent tax-free distribution of Saia shares to Yellow stockholders in 2002, Saia pays Yellow's actual cost plus 125 basis points for any collateral it provides to insurance underwriters in support of these claims. At December 31, 2014, the portion of collateral allocated by Yellow to Saia in support of these claims was \$1.8 million.

Projected net capital expenditures for 2015 are approximately \$125 million. This represents an approximately \$13 million increase from 2014 net capital expenditures of \$112 million for property and equipment inclusive of equipment acquired using capital leases. Net capital expenditures pertain primarily to investments in tractors and trailers and other revenue equipment, information technology, land and structures. Projected 2015 expenditures for revenue equipment include a normal annual level of replacement and continued investment in technology.

The Company has historically generated cash flows from operations that have funded its capital expenditure requirements. The timing of capital expenditures can largely be managed around the seasonal working capital requirements of the Company. The Company believes it has adequate sources of capital to meet short-term liquidity needs through its operating cash flows and availability under the Restated Credit Agreement, which was \$107.7 million at December 31, 2014, subject to the Company's borrowing base and satisfaction of existing debt covenants. Future operating cash flows are primarily dependent upon the Company's profitability and its ability to manage its working capital requirements, primarily accounts receivable, accounts payable and wage and benefit accruals. The Company was in compliance with its debt covenants at December 31, 2014.

See [Forward-Looking Statements](#) and [Item 1A. Risk Factors](#) for a more complete discussion of potential risks and uncertainties that could materially affect our future performance.

Actual net capital expenditures, inclusive of equipment acquired using capital leases, are summarized in the following table (millions):

	Years ended		
	2014	2013	2012
Land and structures:			
Additions	\$ 27.9	\$ 5.3	\$ 2.2
Sales	(1.7)		
Revenue equipment, net	78.8	109.6	71.1
Technology and other	6.6	7.1	9.5
Total	\$ 111.6	\$ 122.0	\$ 82.8

In addition to the amounts disclosed in the table above, the Company had an additional \$0.2 million in capital expenditures for revenue equipment that was received but not paid for prior to December 31, 2014. Included in the revenue equipment expenditures are capital leases totaling \$16.6 million.

Common Stock Split

On May 16, 2013, the Company announced a three-for-two stock split which was effected in the form of a 50 percent stock dividend. The shares were distributed on June 13, 2013 to shareholders of record as of the close of business on the record date of May 31, 2013. In lieu of fractional shares, shareholders received a cash payment based on the closing share price of the Company's common stock on the record date. All references in this report to common shares outstanding, weighted average common shares and earnings per share amounts have been retroactively restated to reflect this stock split.

Table of Contents**Off Balance Sheet Arrangements**

In accordance with U.S. generally accepted accounting principles, our operating leases are not recorded in our consolidated balance sheet; however, the future minimum lease payments are included in the Contractual Obligations table below. See the notes to our audited consolidated financial statements included in this Form 10-K for additional information. In addition to the principal amounts disclosed in the tables below, the Company has interest obligations of approximately \$1.8 million for 2015 and decreasing for each year thereafter, based on long-term debt and capital leases outstanding at December 31, 2014.

Contractual Obligations

The following tables set forth a summary of our contractual obligations and other commercial commitments as of December 31, 2014 (in millions):

	2015	2016	Payments due by year			Thereafter	Total
			2017	2018	2019		
Contractual obligations:							
Long-term debt obligations:							
Revolving line of credit(1)	\$	\$	\$	\$ 45.0	\$	\$	\$ 45.0
Long-term debt(1)	7.1	7.1	7.2				21.4
Leases:							
Capital Leases(1)	1.9	2.1	2.1	2.2	2.2	6.1	16.6
Operating leases(2)	14.1	11.2	9.8	7.4	5.3	12.8	60.6
Purchase obligations(3)	78.0						78.0
Total contractual obligations	\$ 101.1	\$ 20.4	\$ 19.1	\$ 54.6	\$ 7.5	\$ 18.9	\$ 221.6

(1) See Note 2 to the accompanying audited consolidated financial statements in this Form 10-K.

(2) See Note 3 to the accompanying audited consolidated financial statements in this Form 10-K.

(3) Includes \$74.4 million of commitments for capital expenditures.

	2015	Amount of commitment expiration by year					Total
		2016	2017	2018	2019	Thereafter	
Other commercial commitments:							
Available line of credit(1)				\$ 107.7			\$ 107.7
Letters of credit	49.1						49.1
Surety bonds	22.7						22.7
Total commercial commitments	\$ 71.8	\$	\$	\$ 107.7	\$	\$	\$ 179.5

(1) Subject to the satisfaction of existing debt covenants.

The Company has unrecognized tax benefits of approximately \$1.2 million and accrued interest and penalties of \$1.3 million related to the unrecognized tax benefits as of December 31, 2014. The Company cannot reasonably estimate the timing of cash settlement with respective taxing authorities beyond one year and accordingly has not included the amounts within the above contractual cash obligation and other

commercial commitment tables.

Table of Contents

Critical Accounting Policies and Estimates

The Company makes estimates and assumptions in preparing the consolidated financial statements that affect reported amounts and disclosures therein. In the opinion of management, the accounting policies that generally have the most significant impact on the financial position and results of operations of the Company include:

Claims and Insurance Accruals. The Company has self-insured retention limits generally ranging from \$250,000 to \$2.0 million per claim for medical, workers' compensation, auto liability, casualty and cargo claims. The liabilities associated with the risk retained by the Company are estimated in part based on historical experience, third-party actuarial analysis with respect to workers' compensation claims, demographics, nature and severity, and other assumptions. The liabilities for self-funded retention are included in claims and insurance reserves based on claims incurred with liabilities for unsettled claims and claims incurred but not yet reported being actuarially determined with respect to workers' compensation claims and with respect to all other liabilities, estimated based on management's evaluation of the nature and severity of individual claims and historical experience. However, these estimated accruals could be significantly affected if the actual costs of the Company differ from these assumptions. A significant number of these claims typically take several years to develop and even longer to ultimately settle. These estimates tend to be reasonably accurate over time; however, assumptions regarding severity of claims, medical cost inflation, as well as specific case facts can create short-term volatility in estimates.

Revenue Recognition and Related Allowances. Revenue is recognized on a percentage-of-completion basis for shipments in transit while expenses are recognized as incurred. In addition, estimates included in the recognition of revenue and accounts receivable include estimates of shipments in transit and estimates of future adjustments to revenue and accounts receivable for billing adjustments and collectability.

Revenue is recognized in a systematic process whereby estimates of shipments in transit are based upon actual shipments picked up, scheduled day of delivery and current trend in average rates charged to customers. Since the cycle for pickup and delivery of shipments is generally 1-3 days, typically less than 5 percent of a total month's revenue is in transit at the end of any month. Estimates for credit losses and billing adjustments are based upon historical experience of credit losses, adjustments processed and trends of collections. Billing adjustments are primarily made for discounts and billing corrections. These estimates are continuously evaluated and updated; however, changes in economic conditions, pricing arrangements and other factors can significantly impact these estimates.

Depreciation and Capitalization of Assets. Under the Company's accounting policy for property and equipment, management establishes appropriate depreciable lives and salvage values for the Company's revenue equipment (tractors and trailers) based on their estimated useful lives and estimated fair values to be received when the equipment is sold or traded in. These estimates are routinely evaluated and updated when circumstances warrant. However, actual depreciation and salvage values could differ from these assumptions based on market conditions and other factors.

Long-lived assets, such as property, plant and equipment, and purchased intangible assets subject to amortization, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. If circumstances require a long-lived asset or asset group be tested for possible impairment, the Company compares undiscounted cash flows expected to be generated by that asset or asset group to its carrying value. If the carrying value of the long-lived asset or asset group is not recoverable on an undiscounted cash flow basis, impairment is recognized to the extent that the carrying value exceeds its fair value. Fair value is determined through various valuation techniques including discounted cash flow models, quoted market values and third-party independent appraisals, as deemed necessary.

Accounting for income taxes. Significant management judgment is required to determine (i) the provision for income taxes, (ii) whether deferred income taxes will be realized in full or in part and (iii) the liability for unrecognized tax benefits related to uncertain tax positions. Income tax expense is

Table of Contents

equal to the current year's liability for income taxes and a provision for deferred income taxes. Deferred tax assets and liabilities are recorded for the future tax effects attributable to temporary differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using the enacted tax rates expected to be applied to taxable income in the years in which those temporary differences are expected to be recovered or settled. When it is more likely that all or some portion of specific deferred income tax assets will not be realized, a valuation allowance must be established for the amount of deferred income tax assets that are determined not to be realizable. A valuation allowance for deferred income tax assets has not been deemed necessary due to our profitable operations. Accordingly, if facts or financial circumstances change and consequently impact the likelihood of realizing the deferred income tax assets, we would need to apply management's judgment to determine the amount of valuation allowance required in any given period.

These accounting policies and others are described in further detail in the notes to our audited consolidated financial statements included in this Form 10-K.

The preparation of financial statements in accordance with U.S. generally accepted accounting principles requires management to adopt accounting policies and make significant judgments and estimates to develop amounts reflected and disclosed in the consolidated financial statements. In many cases, there are alternative policies or estimation techniques that could be used. We maintain a thorough process to review the application of our accounting policies and to evaluate the appropriateness of the many estimates that are required to prepare the consolidated financial statements. However, even under optimal circumstances, estimates routinely require adjustment based on changing circumstances and the receipt of new or better information.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

The Company is exposed to a variety of market risks including the effects of interest rates and fuel prices. The detail of the Company's debt structure is more fully described in the notes to the consolidated financial statements set forth in this Form 10-K for the year ended December 31, 2014. To help mitigate our risk to rising fuel prices, the Company has implemented a fuel surcharge program. This program is well established within the industry and customer acceptance of fuel surcharges remains high. Since the amount of fuel surcharge is based on average national fuel prices and is reset weekly, exposure of the Company to fuel price volatility is significantly reduced. However, the fuel surcharge may not fully offset fuel price fluctuations during periods of rapid increases or decreases in the price of fuel and is also subject to overall competitive pricing negotiations.

The following table provides information about the Company's third-party financial instruments as of December 31, 2014 with comparative information for December 31, 2013. The table presents principal cash flows (in millions) and related weighted average interest rates by contractual maturity dates. The fair value of the fixed rate debt (in millions) was estimated based upon level two in the fair value hierarchy. The fair value of these senior notes is based on undiscounted cash flows at market interest rates for similar issuances of private debt.

	Expected maturity date						2014	2013		
	2015	2016	2017	2018	2019	Thereafter	Total	Fair Value	Total	Fair Value
Fixed rate debt	\$ 9.0	\$ 9.2	\$ 9.3	\$ 2.2	\$ 2.2	\$ 6.1	\$ 38.0	\$ 38.7	\$ 28.6	\$ 29.7
Average interest rate	4.7%	4.7%	4.7%	4.7%	2.9%	2.9%				
Variable rate debt				\$ 45.0			\$ 45.0	\$ 45.0	\$ 48.3	\$ 48.3
Average interest rate				1.7%

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders

Saia, Inc.:

We have audited the accompanying consolidated balance sheets of Saia, Inc. and Subsidiaries (the Company) as of December 31, 2014 and 2013, and the related consolidated statements of operations, stockholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2014. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Saia, Inc. and Subsidiaries as of December 31, 2014 and 2013, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2014, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Saia, Inc.'s internal control over financial reporting as of December 31, 2014, based on criteria established in *Internal Control - Integrated Framework (1992)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated February 27, 2015 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders

Saia, Inc.:

We have audited Saia, Inc.'s (the Company) internal control over financial reporting as of December 31, 2014, based on criteria established in *Internal Control – Integrated Framework (1992)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Saia, Inc.'s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting as set forth in Item 9A. of Saia, Inc.'s Annual Report on Form 10-K for the year ended December 31, 2014. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Saia, Inc. maintained, in all material respects, effective internal control over financial reporting as of December 31, 2014, based on criteria established in *Internal Control – Integrated Framework (1992)* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Saia, Inc. and Subsidiaries as of December 31, 2014 and 2013, and the related consolidated statements of operations, stockholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2014, and our report dated February 27, 2015 expressed an unqualified opinion on those consolidated financial statements.

Saia, Inc. and Subsidiaries

Notes to Consolidated Financial Statements

December 31, 2014, 2013, and 2012

1. Description of Business and Summary of Accounting Policies

Description of Business

Saia, Inc. and its subsidiaries (Saia or the Company) are headquartered in Johns Creek, Georgia. The Company offers customers a wide range of less-than-truckload, non-asset truckload, expedited and logistics services across the United States through its wholly-owned subsidiaries. Effective December 31, 2014, the Company's subsidiaries were as follows: Saia Motor Freight Line, LLC, doing business as Saia LTL Freight; Saia TL Plus, LLC, formerly Robart Transportation, Inc., Saia Sales, LLC, and Saia Logistics Services, LLC, formerly The RL Services Group, LLC.

Basis of Presentation

The accompanying consolidated financial statements include the accounts of Saia, Inc. and its wholly-owned subsidiaries. All significant intercompany accounts and transactions have been eliminated in the consolidated financial statements.

Common Stock Split

On May 16, 2013, the Company announced a three-for-two stock split which was effected in the form of a 50 percent stock dividend. The shares were distributed on June 13, 2013 to shareholders of record as of the close of business on the record date of May 31, 2013. In lieu of fractional shares, shareholders received a cash payment based on the closing share price of the Company's common stock on the record date. All references in this report to common shares outstanding, weighted average common shares and earnings per share amounts have been retroactively restated to reflect this stock split.

Use of Estimates

Management makes estimates and assumptions when preparing the consolidated financial statements in conformity with U.S. generally accepted accounting principles. These estimates and assumptions affect the amounts reported in the consolidated financial statements and footnotes. Actual results could differ from those estimates.

New Accounting Pronouncements

On May 28, 2014, the FASB issued ASU No. 2014-09, *Revenue from Contracts with Customers*, which requires an entity to recognize the amount of revenue to which it expects to be entitled for the transfer of promised goods or services. The ASU will replace most existing revenue recognition guidance in U.S. generally accepted accounting principles when it becomes effective. The new standard is effective for us on January 1, 2017. Early application is not permitted. The standard permits the use of either the retrospective or cumulative effect transition method. The Company is evaluating the effect that ASU 2014-09 will have on its consolidated financial statements and related disclosures. The Company has not yet selected a transition method nor has it completed its evaluation of the effect of the standard on its ongoing financial reporting.

Summary of Accounting Policies

Major accounting policies and practices used in the preparation of the accompanying consolidated financial statements not covered in other notes to the consolidated financial statements are as follows:

Cash and Cash Equivalents and Checks Outstanding: Cash and cash equivalents in excess of current operating requirements are invested in short-term interest bearing instruments purchased with original maturities

Table of Contents

of three months or less and are stated at cost, which approximates market. Checks outstanding in excess of cash on deposit are classified in accounts payable on the accompanying consolidated balance sheets and in operating activities in the accompanying consolidated statements of cash flows.

Inventories, fuel and operating supplies: Inventories are carried at average cost and included in other current assets. To mitigate the Company's risk to rising fuel prices, the Company has implemented fuel surcharge programs and considers effects of these fuel surcharge programs in customer pricing negotiations.

Property and Equipment Including Repairs and Maintenance: Property and equipment are carried at cost less accumulated depreciation. Depreciation is computed using the straight-line method based on the following service lives:

	Years
Structures	20 to 25
Tractors	8 to 10
Trailers	10 to 14
Other revenue equipment	10 to 14
Technology equipment and software	3 to 5
Other	3 to 10

At December 31, property and equipment consisted of the following (in thousands):

	2014	2013
Land	\$ 53,632	\$ 52,745
Structures	140,206	115,874
Tractors	290,717	273,129
Trailers	237,262	202,173
Other revenue equipment	37,220	34,616
Technology equipment and software	63,773	58,957
Other	68,334	60,033
 Total property and equipment, at cost	 \$ 891,145	 \$ 797,527

Maintenance and repairs are charged to operations while replacements and improvements that extend the asset's life are capitalized. The Company's investment in technology equipment and software consists primarily of systems to support customer service and freight management. Depreciation was \$58.4 million, \$51.0 million and \$47.5 million for the years ended December 31, 2014, 2013 and 2012, respectively. Depreciation and amortization expense includes amortization of assets under capital lease.

Computer Software Developed or Obtained for Internal Use: The Company capitalizes certain costs associated with developing or obtaining internal-use software. Capitalizable costs include external direct costs of materials and services utilized in developing or obtaining the software and payroll and payroll-related costs for employees directly associated with the development of the project. For the years ended December 31, 2014, 2013, and 2012, the Company capitalized \$1.0 million, \$2.1 million, and \$1.0 million, respectively, of primarily payroll-related costs.

Claims and Insurance Accruals: Claims and insurance accruals, both current and long-term, reflect the estimated cost of claims for workers compensation (discounted to present value), cargo loss and damage, and bodily injury and property damage not covered by insurance. These costs are included in claims and insurance expense, except for workers' compensation, which is included in employees' benefits expense. The liabilities for self-funded retention are included in claims and insurance reserves based on claims incurred. Liabilities for

Table of Contents

unsettled claims and claims incurred but not yet reported are actuarially determined with respect to workers' compensation claims and with respect to all other liabilities, estimated based on management's evaluation of the nature and severity of individual claims and past experience. The former parent of Saia provides guarantees for claims in certain self-insured states that arose prior to September 30, 2002 (See Note 12 for more information regarding the guarantees).

Risk retention amounts per occurrence during the three years ended December 31, 2014, were as follows:

Workers' compensation	\$ 1,000,000
Bodily injury and property damage	2,000,000
Employee medical and hospitalization	350,000
Cargo loss and damage	250,000

The Company's insurance accruals are presented net of amounts receivable from insurance companies that provide coverage above the Company's retention.

Income Taxes: Income taxes are accounted for under the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carry forwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. As required by the income taxes Topic of Financial Accounting Standards Board (FASB) Account Standards Codification ASC 740, the Company follows this guidance which defines the threshold for recognizing the benefits of tax-filing positions in the financial statements as "more-likely-than-not" to be sustained by the tax authority. ASC 740 *Income Taxes* also prescribes a method for computing the tax benefit of such tax positions to be recognized in the financial statements. In addition, it provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure and transition.

Revenue Recognition: Revenue is recognized on a percentage-of-completion basis for shipments in transit while expenses are recognized as incurred.

Stock-Based Compensation: The Company accounts for its employee stock-based compensation awards in accordance with ASC 718, *Compensation-Stock Compensation*. ASC 718 requires that all employee stock-based compensation is recognized as an expense in the financial statements and that for equity-classified awards such expenses are measured at the grant date fair value of the award.

Stock options are accounted for in accordance with ASC 718 with the expense amortized over the three-year vesting period using a Black-Scholes-Merton model to estimate the fair value of stock options granted to employees.

Stock-based performance unit awards are accounted for in accordance with ASC 718 with the expense amortized over the three-year vesting period using a Monte Carlo model to estimate fair value at the date the awards are granted.

Credit Risk: The Company routinely grants credit to its customers. The risk of significant loss in trade receivables is substantially mitigated by the Company's credit evaluation process, short collection terms, low revenue per transaction and services performed for a large number of customers with no single customer representing more than 6.0 percent of consolidated operating revenue. Allowances for potential credit losses are based on historical loss experience, current economic environment, expected trends and customer specific factors.

Table of Contents

Impairment of Long-Lived Assets: As required by ASC 360, *Property, Plant, and Equipment*, long-lived assets, such as property, plant and equipment, and purchased intangible assets subject to amortization, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. If circumstances require a long-lived asset or asset group be tested for possible impairment, the Company first compares undiscounted cash flows expected to be generated by that asset or asset group to its carrying value. If the carrying value of the long-lived asset or asset group is not recoverable on an undiscounted cash flow basis, impairment is recognized to the extent that the carrying value exceeds its fair value. Fair value is determined through various valuation techniques including discounted cash flow models, quoted market values and third-party independent appraisals, as deemed necessary.

The Company has adopted Accounting Standards Update (ASU) 2011-08, *Testing Goodwill for Impairment*. In accordance with this ASU, codified in the *Intangibles, Goodwill, and Other* topic of the FASB Accounting Standards Codification, the Company first performs a qualitative assessment to determine whether it is necessary to perform the two-step goodwill impairment test required by the previous standard. The Company is not required to estimate the fair value of a reporting unit unless the Company determines, based on qualitative assessment, that it is more likely than not that its fair value is less than its carrying amount.

Advertising: The costs of advertising are expensed as incurred. Advertising costs charged to expense were \$1.9 million, \$0.8 million, and \$0.7 million in 2014, 2013 and 2012, respectively.

Financial Instruments

The carrying amounts of financial instruments including cash and cash equivalents, accounts receivable, accounts payable and short-term debt approximated fair value as of December 31, 2014 and 2013, because of the relatively short maturity of these instruments. See Note 2 for fair value disclosures related to long-term debt.

2. Debt and Financing Arrangements

At December 31, debt consisted of the following (in thousands):

	December 31, 2014	December 31, 2013
Credit Agreement with Banks, described below	\$ 45,000	\$ 48,312
Senior Notes under a Master Shelf Agreement, described below	21,429	28,571
Capital Leases, described below	16,606	
Total debt	83,035	76,883
Less: current portion of long-term debt	9,138	7,143
Long-term debt, less current portion	\$ 73,897	\$ 69,740

The Company's liquidity needs arise primarily from capital investment in new equipment, land and structures, information technology and letters of credit required under insurance programs, as well as funding working capital requirements.

The Company is party to a revolving credit agreement (the Restated Credit Agreement) with a group of banks to fund capital investments, letters of credit and working capital needs. The facility provides up to \$200 million in availability, subject to a borrowing base and expires in June 2018. The Company is also a party to a long-term note agreement (the Restated Master Shelf Agreement). The Company has pledged certain real estate and facilities, tractors and trailers, accounts receivable and other assets to secure indebtedness under both agreements.

Table of Contents

Restated Credit Agreement

The Restated Credit Agreement is a revolving credit facility for up to \$200 million expiring in June 2018. The Restated Credit Agreement also has an accordion feature that allows for an additional \$40 million of availability, subject to lender approval. The Restated Credit Agreement provides for a LIBOR rate margin range from 125 basis points to 250 basis points, base rate margins from minus 12.5 to plus 50 basis points, letter of credit fee range from 137.5 basis points to 262.5 basis points and an unused portion fee from 20 basis points to 32.5 basis points in each case based on the Company's leverage ratio.

Under the Restated Credit Agreement, the Company must maintain certain financial covenants including a minimum fixed charge coverage ratio, a maximum leverage ratio and a minimum tangible net worth, among others. The Restated Credit Agreement also provides for a pledge by the Company of certain land and structures, certain tractors, trailers and other personal property and accounts receivable, as defined in the Restated Credit Agreement. Total bank commitments under the Restated Credit Agreement are \$200 million subject to a borrowing base calculated utilizing certain pledged property, equipment and accounts receivable as defined in the Restated Credit Agreement.

At December 31, 2014, the Company had borrowings of \$45.0 million and outstanding letters of credit of \$47.3 million under the Restated Credit Agreement. At December 31, 2013, the Company had borrowings of \$48.3 million and outstanding letters of credit of \$59.1 million under the Restated Credit Agreement. The available portion of the Restated Credit Agreement may be used for general corporate purposes, including future capital expenditures, working capital and letter of credit requirements as needed.

Restated Master Shelf Agreement

On September 20, 2002, the Company issued \$100 million in Senior Notes under a \$125 million (amended to \$150 million in April 2005) Master Shelf Agreement with Prudential Investment Management, Inc. and certain of its affiliates. The Company issued another \$25 million in Senior Notes on November 30, 2007 and \$25 million in Senior Notes on January 31, 2008 under the same Master Shelf Agreement.

The initial \$100 million Senior Notes had a fixed interest rate of 7.38 percent. Payments due under the \$100 million Senior Notes were interest only until June 30, 2006 and at that time semi-annual principal payments began with the final payment made in December 2013. The November 2007 issuance of \$25 million Senior Notes has a fixed interest rate of 6.14 percent. The January 2008 issuance of \$25 million Senior Notes has a fixed interest rate of 6.17 percent. Payments due for both \$25 million issuances were interest only until June 30, 2011 and at that time semi-annual principal payments began with the final payments due January 1, 2018. Under the terms of the Senior Notes, the Company must maintain certain financial covenants including a minimum fixed charge coverage ratio, a maximum leverage ratio and a minimum tangible net worth, among others.

Capital Leases

The Company is obligated under capital leases which include obligations covering revenue equipment totaling \$16.6 million that expire in seven years. Amortization of assets held under the capital leases is included in depreciation expense. The weighted average interest rate for the capital leases at December 31, 2014 is 2.92%.

Other

The Company paid cash for interest of \$4.5 million, \$6.1 million, and \$7.3 million for the years ended December 31, 2014, 2013 and 2012, respectively.

The estimated fair value of total debt at December 31, 2014 and 2013 is \$83.7 million and \$78.0 million, respectively, based upon level two in the fair value hierarchy. The fair value of these senior notes is based on undiscounted cash flows at market interest rates for similar issuances of private debt.

Table of Contents

The principal maturities of long-term debt for the next five years (in thousands) are as follows:

	Amount
2015	\$ 9,504
2016	9,596
2017	9,596
2018	47,453
2019	2,453
Thereafter	6,330
Total	\$ 84,932
Less: Amounts Representing Interest on Capital Leases	1,897
Total	\$ 83,035

3. Commitments, Contingencies and Uncertainties

The Company leases certain service facilities and equipment. Rent expense was \$17.1 million, \$17.9 million, and \$17.7 million for the years ended December 31, 2014, 2013 and 2012, respectively.

At December 31, 2014, the Company was committed under non-cancellable operating lease agreements requiring minimum annual rentals payable as follows (in thousands):

	Amount
2015	\$ 14,051
2016	11,215
2017	9,780
2018	7,460
2019	5,291
Thereafter	12,778
Total	\$ 60,575

Management expects that in the normal course of business, leases will be renewed or replaced as they expire.

Capital expenditures committed were \$74.4 million at December 31, 2014. As of December 31, 2014 and 2013, the Company had \$1.8 million and \$1.6 million, respectively, of capital expenditures in accounts payable.

Other. The Company is subject to legal proceedings that arise in the ordinary course of its business. The Company believes that adequate provisions for resolution of all contingencies, claims and pending litigation have been made for probable and estimable losses and that the ultimate outcome of these actions will not have a material adverse effect on its financial condition but could have a material adverse effect on its results of operations in a given quarter or annual period.

4. Goodwill and Other Intangible Assets

The changes in gross carrying amounts of goodwill are as follows (in thousands):

Edgar Filing: SAIA INC - Form 10-K

	Goodwill
December 31, 2012	\$ 5,231
No Activity	
December 31, 2013	5,231
No Activity	
December 31, 2014	\$ 5,231

Table of Contents

The Company assesses goodwill for impairment on an annual basis in the fourth quarter, or more frequently if events or changes in circumstances indicate that the asset might be impaired.

The Company reviews other intangible assets, including customer relationships and non-compete agreements, for impairment whenever events or changes in circumstances indicate that the carrying amount of such assets may not be recoverable. Recoverability of long-lived assets is measured by a comparison of the carrying amount of the asset group to the future undiscounted net cash flows expected to be generated by those assets. If such assets are considered to be impaired, the impairment charge recognized is the amount by which the carrying amounts of the assets exceeds the fair value of the assets.

The gross amounts and accumulated amortization of identifiable intangible assets are as follows (in thousands):

	December 31, 2014		December 31, 2013	
	Gross Amount	Accumulated Amortization	Gross Amount	Accumulated Amortization
Amortizable intangible assets:				
Customer relationships (useful life of 6-10 years)	\$ 7,700	\$ 4,795	\$ 7,700	\$ 4,195
Covenants not-to-compete (useful life of 4-6 years)	3,625	3,587	3,625	3,572
	\$ 11,325	\$ 8,382	\$ 11,325	\$ 7,767

Amortization expense for intangible assets was \$0.6 million for 2014, \$0.6 million for 2013, and \$0.5 million for 2012. Estimated amortization expense for the five succeeding years follows (in thousands):

	Amount
2015	\$ 615
2016	615
2017	317
2018	310
2019	310
Total	\$ 2,167

5. Computation of Earnings Per Share

The calculation of basic earnings per common share and diluted earnings per common share is as follows (in thousands except per share amounts):

	Years Ended December 31,		
	2014	2013	2012
Numerator:			
Net income	\$ 51,991	\$ 43,627	\$ 32,048
Denominator:			
Denominator for basic earnings per share weighted average common shares	24,505	24,154	23,823
Effect of dilutive stock options	239	297	180
Effect of other common stock equivalents	719	754	812
Denominator for diluted earnings per share adjusted weighted average common shares	25,463	25,205	24,815

Edgar Filing: SAIA INC - Form 10-K

Basic Earnings Per Share	\$ 2.12	\$ 1.81	\$ 1.35
Diluted Earnings Per Share	\$ 2.04	\$ 1.73	\$ 1.29

Table of Contents

In 2014 and 2013, options and restricted stock for 7,936, and 143,640 shares of common stock were excluded from the calculation of diluted earnings per share because their effect was anti-dilutive.

6. Stockholders Equity

Share and per share amounts have been retroactively restated to reflect the three-for-two common stock split effected in 2013.

Deferred Compensation Trust

The Saia Executive Capital Accumulation Plan (the Capital Accumulation Plan) allows plan participants to make an irrevocable election to invest in the Company's common stock. Upon distribution, the funds invested in the Company's common stock will be paid out in Company stock rather than cash.

The following table summarizes the shares of the Company's common stock that were purchased and sold by the Company's Rabbi Trust, which holds the investments for the Capital Accumulation Plan:

	Years ended December 31,		
	2014	2013	2012
Shares of common stock purchased	1,400	5,900	13,650
Aggregate purchase price of shares purchased	\$ 52,961	\$ 158,060	\$ 158,883
Shares of common stock sold	9,729	11,719	14,882
Aggregate sale price of shares sold	\$ 53,962	\$ 158,060	\$ 206,794

Since the Capital Accumulation Plan provides for the obligation to be settled only in Company stock, the deferred compensation obligation is classified as an equity instrument with no adjustments to operating results based on changes in fair value.

Directors' Deferred Compensation

Under the Company's Directors' Deferred Fee Plan, non-employee directors may defer all or a portion of their annual fees and retainers which are otherwise payable. Such deferrals are converted into units equivalent to the value of the Company's stock. Upon the director's termination, death or disability, accumulated deferrals are distributed in the form of Company common stock. The Company has 244,835 and 228,546 shares reserved for issuance under the Directors' Deferred Fee Plan at December 31, 2014 and 2013, respectively. The shares reserved for issuance under the Directors' Deferred Fee Plan are treated as common stock equivalents in computing diluted earnings per share.

7. Stock-Based Compensation

The Company accounts for its employee stock-based compensation awards in accordance with ASC 718. ASC 718 requires that all employee stock-based compensation is recognized as a cost in the financial statements and that for equity-classified awards such costs are measured at the grant date fair value of the award. The Company uses a Black-Scholes-Merton model to estimate the fair value of stock options granted to employees and expects to continue to use this option valuation model under ASC 718.

ASC 718 also requires the benefits of tax deductions in excess of recognized compensation cost to be reported as a financing cash flow, rather than as an operating cash flow. This requirement reduces net operating cash flows and increases net financing cash flows. For the years ended December 31, 2014, 2013 and 2012, cash flows from financing activities were increased by \$4.0 million, \$2.1 million, and \$0.1 million, respectively, for such excess tax deductions.

The stockholders of the Company approved the First Amended and Restated 2011 Omnibus Incentive Plan (the 2011 Omnibus Plan) and Amended and Restated 2003 Omnibus Incentive Plan (the 2003 Omnibus Plan) to

Table of Contents

allow the Company to issue equity based compensation to help attract and retain executive, managerial, supervisory or professional employees and non-employee directors. The 2011 Omnibus Plan has a total of 2,025,000 shares reserved. The Company had reserved 1,236,000 shares of its common stock under the 2003 Omnibus Plan. Following stockholder approval of the 2011 Omnibus Plan, no additional grants have been made under the 2003 Omnibus Plan and by the terms of the Plan, no new grants may be made after January 22, 2013.

The 2011 Omnibus Plan and the 2003 Omnibus Plan provide for the grant or award of stock options; stock appreciation rights; restricted and unrestricted stock; and performance unit awards. Stock option awards are granted with an exercise price equal to the market price of the Company's stock at the date of grant; stock option awards granted to employees under the plans to date have cliff vesting at the end of three years of continuous service and have a seven-year contractual term. The non-employee director stock options issued under the 2003 Omnibus Plan expire ten years from the date of grant; are exercisable six months after the date of grant; and have an exercise price equal to the fair market value of the Company's common stock on the date of grant. No stock options have been granted to non-employee directors under the 2011 Omnibus Plan.

The 2011 Omnibus Plan provides for an annual grant to each non-employee director of no more than 12,000 shares with the exact number of shares granted each year determined by the Compensation Committee of the Board. These share awards vest over three years subject to acceleration of vesting upon leaving the Board (other than for cause) or a change in control. Shares issued to each non-employee director under this provision were 1,905, 2,199, and 4,063 for the years ended December 31, 2014, 2013 and 2012, respectively. Non-employee directors were also issued 16,561, 24,191 and 40,398 units equivalent to shares in the Company's common stock under the Directors' Deferred Fee Plan during the years ended December 31, 2014, 2013 and 2012, respectively.

At December 31, 2014 and 2013, zero and 158,700 shares remain reserved and unissued under the provisions of the 2003 Omnibus Plan, all of which are allocated to outstanding Performance Unit Awards and outstanding stock options described below. At December 31, 2014, 1,257,996 shares remain reserved and unissued under the provisions of the 2011 Omnibus Plan, a portion of which are allocated to outstanding Performance Unit Awards and outstanding stock options and restricted stock described below. The Company has historically issued new shares to satisfy stock option exercises or other awards issued under the 2011 Omnibus Plan and 2003 Omnibus Plan.

The years ended December 31, 2014, 2013 and 2012 had stock option and restricted stock compensation expense of \$2.2 million, \$1.2 million and \$1.1 million, respectively, included in salaries, wages and employees' benefits. The Company recognized a tax benefit consistent with the appropriate tax rates for each of the respective periods. As of December 31, 2014, there is unrecognized compensation expense of \$2.2 million related to unvested stock options and restricted stock, which is expected to be recognized over a weighted average period of 2.1 years.

The following table summarizes the activity of stock options for the year ended December 31, 2014 for both employees and non-employee directors:

	Options	Weighted average exercise price	Weighted Average Remaining Contractual Life (years)	Aggregate Intrinsic Value (000 \$)
Outstanding at December 31, 2013	588,510	\$ 14.76		
Granted	116,240			
Exercised	(320,625)			
Forfeited	(24,750)			
Expired				
Outstanding at December 31, 2014	359,375	\$ 22.03	5.1	\$ 11,975
Exercisable at December 31, 2014		\$		\$

Table of Contents

The total intrinsic value of options exercised during the years ended December 31, 2014, 2013 and 2012 was \$9.9 million, \$4.7 million, and \$0.4 million, respectively. The weighted-average grant-date fair value per share of options granted during the years ended December 31, 2014, 2013 and 2012 was \$12.12, \$12.95, and \$5.57, respectively. The weighted-average grant-date fair value per share of shares vested during the years ended December 31, 2014, 2013 and 2012 was \$6.75, \$4.15, and \$4.25, respectively.

The following table summarizes the weighted average assumptions used in valuing options for the years ended December 31, 2014, 2013 and 2012:

	2014	2013	2012
Risk free interest rate	1.58%	0.80%	0.84%
Expected life in years	4.5	4.5	5
Expected volatility	44.33%	58.50%	59.82%
Dividend rate			

The risk-free rate for periods within the contractual life of the option is based on the U.S. Treasury yield in effect at the time of grant. The expected life of the options represents the period of time that options granted are expected to be outstanding. Expected volatilities are based on historical volatility of the Company's stock.

The following table summarizes the status of the Company's unvested options as of December 31, 2014 and changes during the year ended December 31, 2014:

	Options	Weighted average Grant-date Fair Value
Unvested at December 31, 2013	429,810	\$ 8.02
Granted	116,240	12.12
Vested	(161,925)	6.75
Forfeited	(24,750)	9.46
Unvested at December 31, 2014	359,375	\$ 9.82

The Company granted shares of restricted stock to certain key executives in February 2013. On September 10, 2014, the Company awarded Frederick J. Holzgrefe, III, 7,936 restricted shares under the 2011 Omnibus Plan, in connection with him joining Saia as Vice President of Finance and Chief Financial Officer. All of the shares of restricted stock issued to executives to date vest 25% after three years, 25% after four years and the remaining 50% after five years assuming the executive has been in continuous service to the Company since the award date. The value of restricted stock is based on the fair market value of the Company's common stock at the date of grant.

The following table summarizes restricted stock activity during the year ended December 31, 2014:

	Shares	Weighted average Grant-date Fair Value
Restricted Stock at December 31, 2013	122,731	\$ 11.00
Granted	7,936	\$ 50.40
Vested	(15,152)	\$ 11.00
Forfeited	(7,576)	\$ 11.00
Restricted Stock at December 31, 2014	107,939	\$ 13.90

Performance Unit Awards

Edgar Filing: SAIA INC - Form 10-K

Under the 2011 Omnibus Plan and the 2003 Omnibus Plan, the Compensation Committee of the Board of Directors approved performance unit awards to a group of less than 20 management and executive employees.

Table of Contents

The criteria for payout of the awards is based on a comparison over the three-year performance period of these awards of the total shareholder return (TSR) of the Company's common stock compared to the TSR of the companies in the peer group established by the Compensation Committee. The stock-based awards are accounted for in accordance with ASC 718 with the expense amortized over the three-year vesting period based on the fair value using the Monte Carlo method at the date the awards are granted. Operating results from continuing operations include expense for the performance unit awards of \$1.2 million in 2014, and \$1.0 million 2013 and 2012. Shares earned under the performance unit awards will be issued in the first quarter of the year following the end of the performance period. There was an issuance of 146,052 shares for the 2012-2014 performance period in February 2015, 106,330 shares for the February 2011-February 2014 performance period in February 2014, and 150,384 shares for the 2010-2012 performance period in February 2013. The issuance of shares related to these awards would range from zero to a maximum of 68,200 shares per year as of December 31, 2014.

8. Employee Benefits
Defined Contribution Plans

The Company sponsors defined contribution plans. The plans principally consist of contributory 401(k) savings plans and noncontributory profit sharing plans. The Company's contributions to the 401(k) savings plans consist of a matching percentage. The Company match has historically been 50 percent of the first six percent of an eligible employee's contributions. The Company elected to temporarily suspend the Company match in February 2009. Effective April 1, 2011, the Company reinstated one-half of the 401(k) match with the remainder of the match reinstated on December 1, 2013. The Company's total contributions included in continuing operations for the years ended December 31, 2014, 2013 and 2012, were \$5.7 million, \$2.5 million, and \$2.1 million, respectively.

Deferred Compensation Plan

The Saia Executive Capital Accumulation Plan (the Capital Accumulation Plan) is a nonqualified deferred compensation plan for Saia executives. The Capital Accumulation Plan allows for the plan participants to invest in the Company's common stock. Elections to invest in the Company's common stock are irrevocable and upon distribution, the funds invested in the Company's common stock will be paid out in Company stock rather than cash. At December 31, 2014 and 2013, the Company's Rabbi Trust, which holds the investments for the Capital Accumulation Plan, held 193,607 and 201,936 shares of the Company's common stock, respectively, all of which were purchased on the open market. The shares held by the Capital Accumulation Plan are treated similar to treasury shares and deducted from basic shares outstanding for purposes of calculating basic earnings per share. However, because the distributions are required to be made in Company stock, these shares are added back to basic shares outstanding for the purposes of calculating diluted earnings per share.

Annual Incentive Awards

The Company provides annual cash performance incentive awards to salaried and clerical employees which are based primarily on actual operating results achieved, compared to targeted operating results. Operating results from continuing operations include performance incentive accruals of \$6.5 million, \$8.8 million, and \$8.4 million in 2014, 2013 and 2012, respectively. Performance incentive awards for a year are primarily paid in the first quarter of the following year.

Employee Stock Purchase Plan

In January 2003, the Company adopted the Employee Stock Purchase Plan of Saia, Inc. (ESPP) allowing all eligible employees to purchase common stock of the Company at current market prices through payroll deductions of up to 10 percent of annual wages. The custodian uses the funds to purchase the Company's common stock at current market prices. The custodian purchased 4,751, 6,711, and 13,830 shares in the open market during 2014, 2013 and 2012, respectively.

Table of Contents**9. Income Taxes**

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. Deferred tax liabilities (assets) are comprised of the following at December 31 (in thousands):

	2014	2013
Depreciation	100,607	\$ 88,522
Other	(559)	3,548
Revenue	0	120
Gross deferred tax liabilities	100,048	92,190
Allowance for doubtful accounts	(1,511)	(1,467)
Equity-based compensation	(3,440)	(3,287)
Employee benefits	(7,024)	(6,996)
Claims and insurance	(22,019)	(19,374)
Other	(7,108)	(11,571)
Gross deferred tax assets	(41,102)	(42,695)
Net deferred tax liability	\$ 58,946	\$ 49,495

The Company has determined that a valuation allowance related to deferred tax assets was not necessary at December 31, 2014 or 2013 since it is more likely than not the deferred tax assets will be realized from future reversals of temporary differences or future taxable income.

The income tax provision for continuing operations consists of the following (in thousands):

	2014	2013	2012
Current:			
U.S. federal	\$ 18,085	\$ 9,924	\$ 16,837
State	1,690	2,496	2,959
Total current income tax provision	19,775	12,420	19,796
Deferred:			
U.S. federal	9,547	11,822	(678)
State	(85)	276	(27)
Total deferred income tax (benefit) provision	9,462	12,098	(705)
Total income tax provision	\$ 29,237	\$ 24,518	\$ 19,091

A reconciliation between income taxes at the federal statutory rate (35 percent) and the effective income tax provision is as follows:

	2014	2013	2012
Provision at federal statutory rate	\$ 28,430	\$ 23,851	\$ 17,899
State income taxes, net	2,426	2,574	2,025

The Company and its subsidiaries file income tax returns in the U.S. federal jurisdiction and various state jurisdictions. For the U.S. federal jurisdiction, tax years 2012-2014 remain open to examination. The expiration

Table of Contents

of the statute of limitations related to the various state income tax returns that the Company files vary by state. In general, tax years 2005-2013 remain open to examination by the various state and local jurisdictions. However, a state could challenge certain tax positions back to the 2001 tax year.

A reconciliation of the beginning and ending total amounts of gross unrecognized tax benefits is as follows:

	2014	2013
Gross unrecognized tax benefits at beginning of year	\$ 1,281	\$ 1,290
Gross decreases in tax positions for prior years		
Gross increases in tax positions for current year	202	
Settlements		
Lapse of statute of limitations	(318)	(9)
Gross unrecognized tax benefits at end of year	\$ 1,165	\$ 1,281

The Company recognizes interest and penalties related to uncertain tax positions as a component of income tax expense. During the years ended December 31, 2014, 2013 and 2012, respectively, the Company recorded interest related to unrecognized tax benefits of approximately \$0.3 million, \$0.1 million, and \$0.1 million, respectively. The Company had approximately \$1.3 million, \$1.6 million, and \$1.4 million of accrued interest and penalties at December 31, 2014, 2013 and 2012, respectively. The total amount of unrecognized tax benefits that would affect the Company's effective tax rate if recognized is \$1.2 million and \$1.3 million as of December 31, 2014 and 2013, respectively. The Company paid cash for income taxes of \$20.8 million, \$20.6 million, and \$19.3 million in 2014, 2013 and 2012, respectively.

The Company does not anticipate total unrecognized tax benefits will significantly change during the next twelve months due to the settlements of audits and the expiration of statutes of limitations.

As a result of legislation enacted in January 2013, the Company recognized tax credits for 2012 alternative fuel usage of approximately \$1.0 million in the first quarter of 2013.

10. Summary of Quarterly Operating Results (unaudited)

(Amounts in thousands, except per share data)

Table of Contents**11. Acquisition**

On July 2, 2012, Saia, Inc. acquired Robart Transportation, Inc. and its subsidiary, The RL Services Group, LLC (the Robart Companies). The acquired Robart Companies provide customers with non-asset truckload full service and logistics solutions. The purchase price of the acquisition was \$7.9 million (\$7.6 million, net of \$0.3 million cash received) plus an earnout subject to performance of the acquired companies in 2013 up to a maximum of \$1.3 million. The maximum earnout of \$1.3 million was paid in February 2014. The Company believes the acquisition supports the strategic goal of diversifying Saia's portfolio of service offerings.

During the third quarter of 2012, the Company allocated the purchase price in excess of net tangible assets between tax deductible goodwill and other identifiable intangible assets related to the acquisition of the Robart Companies. The cash purchase price has been allocated based on independent appraisals and management's estimates as follows (in thousands):

Consideration:	
Cash	\$ (7,934)
Contingent consideration arrangement	(1,162)
Fair value of total consideration transferred	\$ (9,096)
Acquisition related costs included in SG&A	150
Recognized amounts of identifiable assets acquired and liabilities assumed:	
Current assets	\$ 2,082
Property and equipment	44
Customer lists	3,184
Current liabilities	(1,445)
Total identifiable net assets assumed	\$ 3,865
Goodwill	5,231
Total	\$ 9,096

12. Related-Party Transactions

On September 30, 2002, YRC Worldwide, Inc. (Yellow) completed the spin-off of its 100 percent interest in the Company to Yellow stockholders (the Spin-off) in a tax-free distribution under Section 355 of the Internal Revenue Code. Subsequent to the Spin-off, Yellow continues to provide guarantees for certain pre-Spin-off workers' compensation and casualty claims for which the Company is allocated its pro rata share of letters of credit which Yellow must maintain for these insurance programs. Yellow allocated \$1.8 million and \$1.6 million in letters of credit at December 31, 2014 and 2013 respectively, in connection with the Company's insurance programs for which the Company pays quarterly Yellow's cost plus 125 basis points.

Table of Contents**13. Valuation and Qualifying Accounts***For the Years Ended December 31, 2014, 2013 and 2012*

(1) Primarily uncollectible accounts written off net of recoveries.

14. Subsequent Events

On February 2, 2015, subsequent to the end of the fourth quarter of 2014, the Company acquired LinkEx, Inc. The Company believes this acquisition is a future growth opportunity for its portfolio of services in the asset-light market. This acquisition fits into the Company's strategic goal of diversifying Saia's portfolio of service offerings. Pursuant to the terms of the purchase agreement, the Company paid a purchase price of approximately \$25 million, subject, in part, to meeting profit targets.

Item 9. *Changes in and Disagreements with Accountants on Accounting and Financial Disclosure*

None.

Item 9A. *Controls and Procedures*

Annual Controls Evaluation and Related CEO and CFO Certifications

As of the end of the period covered by this Annual Report on Form 10-K, the Company conducted an evaluation of the effectiveness of the design and operation of its disclosure controls and procedures (Disclosure Controls). The Disclosure Controls evaluation was performed under the supervision and with the participation of management, including the Company's Chief Executive Officer (CEO) and Chief Financial Officer (CFO).

Based upon the controls evaluation, the Company's CEO and CFO have concluded that, as of the end of the period covered by this Annual Report on Form 10-K, the Company's Disclosure Controls are effective to ensure that information the Company is required to disclose in reports that the Company files or submits under the Securities Exchange Act of 1934, as amended (the Exchange Act), is recorded, processed, summarized and reported within the time periods specified in SEC rules and forms.

During the fourth quarter of 2014 covered by this Form 10-K, there were no changes in internal control over financial reporting that materially affected, or that are reasonably likely to materially affect, the Company's internal control over financial reporting. Attached as Exhibits 31.1 and 31.2 to this Annual Report are certifications of the CEO and the CFO, which are required in accordance with Rule 13a-14 of the Exchange Act. This Controls and Procedures section includes the information concerning the controls evaluation referred to in the certifications and it should be read in conjunction with the certifications.

Definition of Disclosure Controls

Disclosure Controls are controls and procedures designed to ensure that information required to be disclosed in the Company's reports filed under the Exchange Act is recorded, processed, summarized and reported timely. Disclosure Controls are also designed to ensure that such information is accumulated and communicated to the Company's management, including the CEO and CFO, as appropriate to allow timely decisions regarding required disclosure. The Company's Disclosure Controls include components of its internal control over financial reporting which consists of control processes designed to provide reasonable assurance regarding the reliability of the Company's financial reporting and the preparation of financial statements in accordance with U.S. generally accepted accounting principles.

Limitations on the Effectiveness of Controls

The Company's management, including the CEO and CFO, does not expect that its Disclosure Controls or its internal control over financial reporting will prevent all errors and all fraud. A control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the control system's objectives will be met. Further, the design of a control system must reflect the fact that there are resource constraints and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty and that breakdowns can occur because of simple error or mistake. Controls can also be circumvented by the individual acts of some persons, by collusion of two or more people or by management override of the controls. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

Table of Contents
Management's Report on Internal Control Over Financial Reporting

The management of Saia, Inc. and its subsidiaries is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Rule 13a-15(f) of the Securities Exchange Act of 1934.

All internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

The Company's management assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2014. In making this assessment the Company's management used the criteria established in *Internal Control - Integrated Framework (1992)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on this assessment, management has concluded that as of December 31, 2014, the Company's internal control over financial reporting is effective based on those criteria.

The Company's independent registered public accounting firm, KPMG LLP, has issued an attestation report on the Company's internal control over financial reporting as of December 31, 2014, which report appears on page 31 of this Form 10-K.
