## **Section 1 Conflict Minerals Disclosure**

### **Item 1.01 Conflict Minerals Disclosure and Report**

This Form SD of Destination Maternity Corporation is filed in accordance with Rule 13p-1 under the Securities Exchange Act of 1934, as amended ( Rule 13p-1 ) for the reporting period from January 1, 2017 to December 31, 2017. Rule 13p-1 requires disclosure of certain information when a company manufactures or contracts to manufacture products for which the minerals specified in Rule 13p-1 are necessary to the production or functionality of those products. The specified minerals are gold, columbite-tantalite (coltan), cassiterite and wolframite, including their derivatives, which are limited to tantalum, tin and tungsten ( Conflict Minerals ). The Covered Countries for the purposes of Rule 13p-1 are the Democratic Republic of the Congo, Angola, Burundi, Central African Republic, the Republic of the Congo, Rwanda, South Sudan, Tanzania, Uganda and Zambia.

Destination Maternity Corporation is the world's largest designer and retailer of maternity apparel. As of October 28, 2017, Destination Maternity operates 1,147 retail locations in the United States, Canada and Puerto Rico, including 501 stores, predominantly under the trade names Motherhood Maternity®, A Pea in the Pod® and Destination Maternity®, and 646 leased department locations. The Company also sells merchandise on the web primarily through its brand-specific websites, motherhood.com and apeainthepod.com, as well as through its destinationmaternity.com website. Destination Maternity has international store franchise and product supply relationships in the Middle East, South Korea, Mexico and Israel. As of October 28, 2017, Destination Maternity has 208 international franchised locations, including 16 standalone stores operated under one of the Company's nameplates and 192 shop-in-shop locations. Throughout this report, Destination Maternity, DMC, we, us or our means Destination Maternity Corporation and its consolidated subsidiaries and their predecessors.

We design and contract for the production of over 90% of the products we sell using factories located throughout the world, predominantly outside of the United States. A majority of our products are purchased as finished product made to our design specifications ( Company Branded Products ). We sometimes arrange for the purchase of certain components of Company Branded Products, which we refer to as Trim, which are then included on such final finished product. Trim includes, without limitation, the following types of products: buttons, zippers, underwire for bras, hooks and eyes, snaps, rivets, buckles and flat hooks. We purchase such Trim from the inventory made available by our suppliers.

As part of our preparation of this report, we conducted a review of all Company Branded Products manufactured in 2017 to determine which, if any, of those products may contain Conflict Minerals. We concluded that, as a retail apparel company, the only component of our products that could potentially contain Conflict Minerals would be Trim. As part of our Conflict Minerals Compliance Program, we requested our Trim vendors provide information concerning Conflict Minerals contained in their products. The Company received responses from 84% of its vendors.
