NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS

NOTE 1 – CONDENSED FOOTNOTES

As contemplated by the Securities and Exchange Commission (the “Commission”) instructions to Form 10-Q, the following footnotes have been condensed and, therefore, do not contain all disclosures required in connection with annual financial statements. Reference should be made to the Company’s year-end audited consolidated financial statements and notes thereto contained in its Annual Report on Form 10-K for the fiscal year ended December 28, 2014, as filed with the Commission.

The financial information included in this report has been prepared by the Company, without audit. In the opinion of management, the financial information included in this report contains all adjustments (all of which are normal and recurring) necessary for a fair presentation of the results for the interim periods. Nevertheless, the results shown for interim periods are not necessarily indicative of results to be expected for the full year. The December 28, 2014, consolidated condensed balance sheet data was derived from audited financial statements, but does not include all disclosures required by accounting principles generally accepted in the United States. The first quarter of 2015 was comprised of 14 weeks, while the first quarter of 2014 was comprised of 13 weeks. Each of the second quarters of 2015 and 2014 was comprised of 13 weeks.

Certain prior period amounts have been reclassified to conform to the current period presentation.

NOTE 2 – INVENTORIES

Inventories are summarized as follows:

	July 5, 2015	December 28, 2014
	(In thousands)	
Finished Goods	\$ 105,756	\$ 89,688
Work in Process	10,915	9,898

\$164,205 \$142,167

NOTE 3 – EARNINGS PER SHARE

The Company computes basic earnings per share (“EPS”) by dividing net income by the weighted average common shares outstanding, including participating securities outstanding, during the period as discussed below. Diluted EPS reflects the potential dilution beyond shares for basic EPS that could occur if securities or other contracts to issue common stock were exercised, converted into common stock or resulted in the issuance of common stock that would have shared in the Company’s earnings.

Table Of Contents

The Company includes all unvested stock awards which contain non-forfeitable rights to dividends or dividend equivalents, whether paid or unpaid, in the number of shares outstanding in our basic and diluted EPS calculations when the inclusion of these shares would be dilutive. Unvested share-based awards of restricted stock are paid dividends equally with all other shares of common stock. As a result, the Company includes all outstanding restricted stock awards in the calculation of basic and diluted EPS. Distributed earnings include common stock dividends and dividends earned on unvested share-based payment awards. Undistributed earnings represent earnings that were available for distribution but were not distributed. The following tables show distributed and undistributed earnings:

	Three Months Ended		Six Months Ended	
	July 5, 2015	June 29, 2014	July 5, 2015	June 29, 2014

For all periods presented, there were no options or participating securities excluded from the computation of diluted EPS.

NOTE 4 – LONG-TERM DEBT

7.625% Senior Notes

As of June 29, 2014, the Company had outstanding \$247.5 million in 7.625% Senior Notes due 2018 (the “7.625% Senior Notes”). These notes were redeemed in their entirety in the fourth quarter of 2014. The estimated fair value of the 7.625% Senior Notes as of June 29, 2014, based on then current market prices, was \$259.9 million.

Syndicated Credit Facility

The Company has a syndicated credit facility (the “Facility”) pursuant to which the lenders provide to the Company and certain of its subsidiaries a multicurrency revolving credit facility and provide to the Company a term loan. The facility matures in October of 2019. Interest on base rate loans is charged at varying rates computed by applying a margin depending on the Company’s consolidated net leverage ratio as of the most recently completed fiscal quarter. Interest on LIBOR-based loans and fees for letters of credit are charged at varying rates computed by applying a margin over the applicable LIBOR rate, depending on the Company’s consolidated net leverage ratio as of the most recently completed fiscal quarter. In addition, the Company pays a commitment fee per annum (depending on the Company’s consolidated net leverage ratio as of the most recently completed fiscal quarter) on the unused portion of the Facility.

Table Of Contents

As of July 5, 2015, the Company had \$200 million of term loan borrowing and \$59.1 million of revolving loan borrowings outstanding under the Facility, and had \$3.1 million in letters of credit outstanding under the Facility. As of July 5, 2015, the weighted average interest rate on borrowings outstanding under the Facility was 1.9%.

The Company is required to make amortization payments of the term loan borrowing. The amortization payments are due on the last day of the calendar quarter, commencing with an initial amortization payment of \$2.5 million on December 31, 2015. The quarterly amortization payment amount increases to \$3.75 million on December 31, 2016.

The Company is currently in compliance with all covenants under the Facility and anticipates that it will remain in compliance with the covenants for the foreseeable future.

Other Lines of Credit

Subsidiaries of the Company have an aggregate of the equivalent of \$19.0 million of other lines of credit available at interest rates ranging from 2% to 6%. As of July 5, 2015, there were no borrowings outstanding under these lines of credit.

NOTE 5 – STOCK-BASED COMPENSATION

Stock Option Awards

In accordance with accounting standards, the Company measures the cost of employee services received in exchange for an award of equity instruments based on the grant date fair value of the award. That cost will be recognized over the period in which the employee is required to provide the services – the requisite service period (usually the vesting period) – in exchange for the award.

All outstanding stock options vested prior to the end of 2013, and therefore there was no stock option compensation expense in 2014 or 2015.

Edgar Filing: INTERFACE INC - Form 10-Q

There were no stock options granted in 2014 or 2015. The following table summarizes stock options outstanding as of July 5, 2015, as well as activity during the six months then ended:

	Shares	Weighted Average Exercise Price
Outstanding at December 28, 2014	126,000	\$ 9.23
Granted	0	0
Exercised	38,500	9.27
Forfeited or canceled	0	0
Outstanding at July 5, 2015	87,500	8.75
Exercisable at July 5, 2015	87,500	\$ 8.75

At July 5, 2015, the aggregate intrinsic value of both in-the-money options outstanding and options exercisable was \$1.4 million (the intrinsic value of a stock option is the amount by which the market value of the underlying stock exceeds the exercise price of the option).

Cash proceeds and intrinsic value related to total stock options exercised during the first six months of 2015 and 2014 are provided in the table below. The Company did not recognize any significant tax benefit with regard to stock options in either period presented.

	Six Months Ended	
	July 5, 2015	June 29, 2014
	(In thousands)	
Proceeds from stock options exercised	\$ 359	\$ 159
Intrinsic value of stock options exercised	421	299

Table Of Contents*Restricted Stock Awards*

During the six months ended July 5, 2015, and June 29, 2014, the Company granted restricted stock awards for 597,000 and 490,000 shares, respectively, of common stock. Restricted stock awards (or a portion thereof) vest with respect to each recipient over a two to five year period from the date of grant, provided the individual remains in the employment or service of the Company as of the vesting date. Additionally, awards (or a portion thereof) could vest earlier upon the attainment of certain performance criteria, in the event of a change in control of the Company, or upon involuntary termination without cause.

Compensation expense related to restricted stock grants was \$9.1 million and \$2.7 million for the six months ended July 5, 2015, and June 29, 2014, respectively. Accounting standards require that the Company estimate forfeitures for restricted stock and reduce compensation expense accordingly. The Company has reduced its expense by the assumed forfeiture rate and will evaluate experience against this forfeiture rate going forward.

The following table summarizes restricted stock activity as of July 5, 2015, and during the six months then ended:

	Shares	Weighted Average Grant Date Fair Value
Outstanding at December 28, 2014	1,391,000	\$ 17.12
Granted	597,000	16.43
Vested	290,500	13.99
Forfeited or canceled	199,500	13.58
Outstanding at July 5, 2015	1,498,000	\$ 17.92

As of July 5, 2015, the unrecognized total compensation cost related to unvested restricted stock was approximately \$14.3 million. That cost is expected to be recognized by the end of 2019.

For the six months ended July 5, 2015, and June 29, 2014, the Company recognized tax benefits with regard to restricted stock of \$3.5 million and \$0.7 million, respectively.

Table Of Contents

NOTE 7 – SEGMENT INFORMATION

Based on applicable accounting standards, the Company has determined that it has three operating segments – namely, the Americas, Europe and Asia-Pacific geographic regions. Pursuant to accounting standards, the Company has aggregated the three operating segments into one reporting segment because they have similar economic characteristics, and the operating segments are similar in all of the following areas: (a) the nature of the products and services; (b) the nature of the production processes; (c) the type or class of customer for their products and services; (d) the methods used to distribute their products or provide their services; and (e) the nature of the regulatory environment.

NOTE 8 – SUPPLEMENTAL CASH FLOW INFORMATION

Cash payments for interest amounted to \$3.3 million and \$9.9 million for the six months ended July 5, 2015, and June 29, 2014, respectively. Income tax payments amounted to \$3.5 million and \$4.0 million for the six months ended July 5, 2015, and June 29, 2014, respectively.

NOTE 9 – RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS

In January 2015, the Financial Accounting Standards Board (“FASB”) issued an accounting standard which eliminates the concept of extraordinary items from generally accepted accounting principles. The standard does not affect disclosure guidance for events or transactions that are unusual in nature or infrequent in their occurrence. The standard is effective for interim and annual periods in fiscal years beginning after December 15, 2015. The standard allows prospective or retrospective application. Early adoption is permitted if applied from the beginning of the fiscal year of adoption. We do not believe the adoption of this standard will have any significant effect on our ongoing financial reporting.

In February 2015, the FASB issued an accounting standard which changes the way reporting enterprises evaluate whether (a) they should consolidate limited partnerships and similar entities, (b) fees paid to a decision maker or service provider are variable interests in a variable interest entity (“VIE”), and (c) variable interests in a VIE held by related parties of the reporting enterprise require the reporting enterprise to consolidate the VIE. The new accounting standard is effective for annual and interim periods in fiscal years beginning after December 15, 2015. We are currently evaluating the impact, if any, this standard will have on our ongoing financial reporting, but we do not believe the adoption of this standard will have any significant effect on our ongoing financial reporting.

NOTE 10 – INCOME TAXES

Accounting standards require that all tax positions be analyzed using a two-step approach. The first step requires an entity to determine if a tax position is more-likely-than-not to be sustained upon examination. In the second step, the tax benefit is measured as the largest amount of benefit, determined on a cumulative probability basis, that is more-likely-than-not to be realized upon ultimate settlement. In the first six months of 2015, the Company decreased its liability for unrecognized tax benefits by \$0.1 million. As of July 5, 2015, the Company had accrued approximately \$27.2 million for unrecognized tax benefits. In accordance with applicable accounting standards, the Company's deferred tax asset as of July 5, 2015 reflects a reduction for \$21.9 million of these unrecognized tax benefits.

NOTE 11 – ITEMS RECLASSIFIED FROM OTHER COMPREHENSIVE INCOME

During the first six months of 2015, the Company did not reclassify any significant amounts out of accumulated other comprehensive income. The reclassifications that occurred in that period were primarily comprised of \$0.8 million related to the Company's defined retirement benefit plan and salary continuation plan. These reclassifications were included in the selling, general and administrative expenses line item of the Company's consolidated condensed statement of operations.

Table Of Contents

NOTE 12 – 2014 RESTRUCTURING PLAN

In the third quarter of 2014, the Company committed to a new restructuring plan in its continuing efforts to reduce costs across its worldwide operations. In connection with this restructuring plan, the Company incurred a pre-tax restructuring and asset impairment charge in the third quarter of 2014 in an amount of \$12.4 million. The charge was comprised of severance expenses of \$9.7 million for a reduction of 100 employees, other related exit costs of \$0.1 million, and a charge for impairment of assets of \$2.6 million. Approximately \$10 million of the charge will result in cash expenditures, primarily severance expense.

A summary of these restructuring activities is presented below:

	Total	Costs	Cost	Balance
	Restructuring	Incurred	Incurred	at
	Charge in 2014	in 2014	in 2015	July 5,
				2015

Fixed Asset Impairment	2,584	2,584	0	0
Other Related Exit Costs	133	133	0	0

NOTE 13 – REPURCHASE OF COMMON STOCK

In the fourth quarter of 2014, the Company announced a program to repurchase up to 500,000 shares of common stock per fiscal year, commencing with the 2014 fiscal year. During the first quarter of 2015, the Company repurchased and retired 250,000 shares of common stock at a weighted average purchase price of \$19.39 per share. During the second quarter of 2015, the Company repurchased and retired 250,000 shares of common stock at a weighted average purchase price of \$22.41 per share.

ITEM 2. MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Our discussions below in this Item 2 are based upon the more detailed discussions about our business, operations and financial condition included in our Annual Report on Form 10-K for the fiscal year ended December 28, 2014, under Item 7 of that Form 10-K. Our discussions here focus on our results during the quarter and six months ended, or as of, July 5, 2015, and the comparable periods of 2014 for comparison purposes, and, to the extent applicable, any material changes from the information discussed in that Form 10-K or other important intervening developments or information since that time. These discussions should be read in conjunction with that Form 10-K for more detailed and background information.

Forward-Looking Statements

This report contains statements which may constitute “forward-looking statements” within the meaning of the Securities Act of 1933, as amended, and the Securities Exchange Act of 1934, as amended by the Private Securities Litigation Reform Act of 1995. Important factors currently known to management that could cause actual results to differ materially from those in forward-looking statements include risks and uncertainties associated with economic conditions in the commercial interiors industry as well as the risks and uncertainties discussed under the heading “Risk Factors” included in Item 1A of the Company’s Annual Report on Form 10-K for the fiscal year ended December 28, 2014, which discussion is hereby incorporated by reference. The Company undertakes no obligation to update or revise forward-looking statements to reflect changed assumptions, the occurrence of unanticipated events or changes to future operating results over time.

General

During the quarter ended July 5, 2015, we had net sales of \$263.6 million, compared with net sales of \$260.6 million in the second quarter last year. During the first six months of fiscal year 2015, we had net sales of \$500.5 million, compared with net sales of \$479.6 million in the first six months of last year. Fluctuations in currency exchange rates had negative impacts on our sales and operating income in the 2015 reported periods, compared with the prior year periods. The following table presents the amounts (in U.S. dollars) by which the exchange rates for converting foreign currencies into U.S. dollars have negatively affected our net sales and operating income for the three months and six months ended July 5, 2015.

During the second quarter of 2015, we had net income of \$21.7 million, or \$0.33 per diluted share, compared with net income of \$13.1 million, or \$0.20 per diluted share, in the second quarter of 2014. During the six months ended July 5, 2015, we had net income of \$34.0 million, or \$0.51 per diluted share, compared with net income of \$17.1 million, or \$0.26 per diluted share, in the first six months of 2014.

The first six months of 2015 were comprised of 27 weeks, while the first six months of 2014 were comprised of 26 weeks. (The additional week was in the first quarter of 2015.) This is a factor in certain of the comparisons discussed in this Item 2.

Net Sales

Below we provide information regarding net sales and analyze those results for the three-month and six-month periods ended July 5, 2015, and June 29, 2014, respectively.

	Three Months Ended		Percentage	
	July 5, 2015	June 29, 2014	Change	
	<i>(In thousands)</i>			
Net Sales	\$263,637	\$260,624	1.2	%

	<i>(In thousands)</i>			

Net Sales \$500,541 \$479,616 4.4 %

For the quarter ended July 5, 2015, net sales increased \$3.0 million (1.2%) versus the comparable period in 2014. As discussed above, the strengthening of the U.S. dollar versus certain foreign currencies (primarily, the Euro, Australian dollar and Canadian dollar) had a negative impact of approximately \$24 million on 2015 second quarter sales as compared to the second quarter of 2014. In the Americas, we increased sales 7%, which was partially offset by declines of 7% in Europe (as reported in U.S. dollars) and 6% in Asia-Pacific (as reported in U.S. dollars) due to the negative currency impacts discussed above. In the Americas, the corporate office market segment led the way with a 12% increase, as the rebound in this market continued and we gained market share in the U.S. Non-office segments were up 3% in the aggregate, with increases in the hospitality (up 55%) and education (up 10%) segments being partially offset by declines in the retail (down 12%), healthcare (down 9%) and residential (down 4%) segments. The decline in the residential segment was primarily in the multi-family sector, as our FLOR residential consumer business posted a 4% sales increase for the 2015 second quarter, primarily due to stronger web-based sales. In Europe, the sales increase in local currency was approximately 16%, due to the strength of the corporate office market segment (up 21%) which comprises the bulk of the sales in the region. Non-office segments in Europe were down 3% in the aggregate in local currency, with the government segment showing the largest decline (down 48%) due to the continued austerity programs in place through the region. In Asia-Pacific, the sales increase in local currency was 4%, which was almost entirely due to the strength of the corporate office market, primarily in Australia.

For the six months ended July 5, 2015, net sales increased \$20.9 million (4.4%) versus the comparable period in 2014. The strengthening of the U.S. dollar versus certain foreign currencies had a negative impact of approximately \$43 million on 2015 first half sales as compared to the first half of 2014. On a geographic basis, we experienced sales increases in the Americas (up 11%) and Asia-Pacific (up 2%) versus the first six months of 2014. Due to the impact of currency fluctuations, Europe experienced a sales decline of 7% as reported in U.S. dollars, but an increase in local currency of 14%. In the Americas, the sales increase was almost evenly balanced between the corporate office and non-office segments, with corporate office sales increasing 12% and non-office segments increasing 10%. All non-office market segments showed an increase for the first six months of 2015, with the exception of the retail (down 5%) and healthcare (essentially flat) segments. Hospitality (up 74%) and education (up 11%) market segments represented the most significant increases over the first six months of 2014. In local currency, the increase in Europe was mostly in the corporate office market, which grew 21%. Non-office segments in Europe in the aggregate were down 9% in local currency, with the most significant decline coming in the government segment due to the continued austerity measures in place throughout the region. In Asia-Pacific, the sales growth of 2% came as a result of the corporate office market. (up 9%) primarily due to increased new construction and refurbishment projects in Australia. With the exception of the hospitality segment (up 17%), all non-office segments in Asia-Pacific showed declines for the period, with the most significant being in retail (down 35%) and healthcare (down 24%).

Table Of Contents*Cost and Expenses*

The following table presents, on a consolidated basis for our operations, our overall cost of sales and selling, general and administrative expenses for the three-month and six-month periods ended July 5, 2015, and June 29, 2014, respectively:

<u>Cost and Expenses</u>	Three Months Ended		Percentage	
	July 5, 2015	June 29, 2014	Change	
	<i>(In thousands)</i>			
Cost of sales	\$162,385	\$170,239	(4.6	%)
Selling, general and administrative expenses	68,033	66,042	3.0	%
Total	\$230,418	\$236,281	(2.5	%)

<u>Cost and Expenses</u>	Six Months Ended		Percentage	
	July 5, 2015	June 29, 2014	Change	
	<i>(In thousands)</i>			
Cost of sales	\$313,857	\$314,545	(0.2	%)
Selling, general and administrative expenses	132,065	128,701	2.6	%
Total	\$445,922	\$443,246	0.6	%

For the three months ended July 5, 2015, our cost of sales decreased \$7.9 million (4.6%) versus the comparable period in 2014. Currency fluctuation had a favorable impact on cost of sales; if currency rates had remained the same for the second quarter of 2015 versus that of the second quarter of 2014, our cost of sales would have been approximately \$13 million higher. As a percentage of sales, our cost of sales declined significantly to 61.6% for the second quarter of 2015 versus 65.3% for the second quarter of 2014. Gross profit margin improved across all three of our primary geographic regions, with the Americas showing the largest improvement versus 2014. The key factors in the improvement were (1) reduced raw material costs of 5-7% on a global level due to lower input prices and usage, (2) better absorption of fixed costs associated with higher production volumes, particularly in the Americas and Europe, (3) the normalization of operations in Australia and rebalancing of production in the Asia-Pacific region compared with the inefficiencies associated with the startup of the new facility in Australia in 2014, (4) continued implementation of lean manufacturing practices in our Americas business, and (5) the cost savings associated with our restructuring activities in the third quarter of 2014.

For the six months ended July 5, 2015, our cost of sales decreased \$0.7 million (0.2%) versus the comparable period of 2014. Currency fluctuation had a favorable impact on cost of sales; if currency rates had remained the same for the first half of 2015 versus that of the first half of 2014, our cost of sales would have been approximately \$23 million

higher. As a percentage of sales, our costs of sales for the first six months of 2015 experienced a significant decline to 62.7%, as compared to 65.6% for the comparable period of 2014. The reasons for the decline for the six month period are similar to the reasons addressed above for the three month period: (1) reduced raw materials costs of 5-7%, (2) higher production volumes which led to greater absorption of fixed costs, (3) the continued stabilization of the supply chain and manufacturing footprint in the Asia-Pacific region, (4) improvements in manufacturing efficiencies, and (5) the impacts of our restructuring activities in 2014. The gross margin improvements accelerated during 2015, and as such, the improvement is more significant in the three months ended July 5, 2015 versus the six month period ended July 5, 2015.

For the three month period ended July 5, 2015, our selling, general and administrative expenses increased \$2.0 million (3.0%) versus the comparable period in 2015. Currency fluctuation had a favorable impact on selling, general and administrative expense; if currency rates had remained the same for the second quarter of 2015 versus that of the second quarter of 2014, our selling, general and administrative expenses would have been approximately \$5 million higher. The largest driver of the increase in selling, general and administrative expenses versus the 2014 period is approximately \$5.2 million of higher administrative expenses largely comprised of share-based payment expenses and incentive compensation amounts, as our projected performance is better in 2015 versus 2014. This increase was offset by lower selling and marketing expenses, down \$1.4 million and \$1.7 million, respectively. These declines, however, were largely due to the currency translation effects discussed above, as in local currencies these expenditures remained relatively consistent year over year. Due to the increased administrative expenses discussed above, our selling, general and administrative expenses increased to 25.8% of sales for the three months ended July 5, 2015, versus 25.3% of sales in the corresponding period in 2014. On a sequential basis, however, selling general and administrative expenses as a percentage of sales is lower, compared with 27.0% in the first quarter of 2015.

Table Of Contents

For the six month period ended July 5, 2015, our selling, general and administrative expenses increased \$3.4 million (2.6%) versus the comparable period in 2014. Currency fluctuation had a positive impact on selling, general and administrative expenses; if currency rates had remained the same for the first six months of 2015 versus the first six months of 2014, our selling, general and administrative expenses would have been approximately \$9 million higher. The increase was largely due to higher administrative expenses of \$8.9 million largely comprised of share-based payment expenses and incentive compensation amounts, as our projected performance is better in 2015 versus 2014. These increases were partially offset by lower marketing (down \$3.3 million) and selling (down \$1.7 million) costs. While currency impacts were the primary factor in these declines, across all regions selling and marketing expenses were down as a percentage of sales versus the first six months of 2014, due to both higher sales as well as cost savings as a result of our restructuring actions which took place in the third quarter of 2014. Due to these initiatives, as a percentage of sales, selling, general and administrative expenses for the first six months of 2015 declined to 26.4%, versus 26.8% in the first six months of 2014.

Interest Expense

For the three month period ended July 5, 2015, our interest expense decreased \$3.6 million to \$1.8 million, from \$5.4 million in the second quarter of 2014. For the six month period ended July 5, 2015, our interest expense decreased \$7.2 million to \$3.7 million, from \$10.9 million in the comparable period last year. The reason for the decreases was the debt refinancing activities we completed in the fourth quarter of 2014, in which we redeemed all of our \$247.5 million of outstanding 7.625% Senior Notes and replaced them with borrowings under our Syndicated Credit Facility. This facility is comprised of a term loan as well as a multi-currency revolving debt facility and incurs interest at a significantly lower rate than the 7.625% Senior Notes.

Liquidity and Capital Resources

General

At July 5, 2015, we had \$71.8 million in cash. At that date, we had \$200.0 million in term loan borrowings, \$59.1 million of revolving loan borrowings and \$3.1 million in letters of credit outstanding under the Syndicated Credit Facility. As of July 5, 2015, we could have incurred \$187.8 million of additional borrowings under our Syndicated Credit Facility. In addition, we could have incurred an additional \$19.0 million of borrowings under our other lines of credit in place at other non-U.S. subsidiaries.

Analysis of Cash Flows

Our primary source of cash during the six months ended July 5, 2015 was \$15.2 million due to a reduction of accounts receivable. Our primary uses of cash during the six month then ended were (1) \$27.2 million for increased inventory levels, (2) \$12.1 million for capital expenditures, (3) \$10.5 million for stock repurchases, and (4) \$5.3 million for dividend payments.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Our discussion below in this Item 3 is based upon the more detailed discussions of our market risk and related matters included in our Annual Report on Form 10-K for the fiscal year ended December 28, 2014, under Item 7A of that Form 10-K. Our discussion here focuses on the period ended July 5, 2015, and any material changes from (or other important intervening developments since the time of) the information discussed in that Form 10-K. This discussion should be read in conjunction with that Form 10-K for more detailed and background information.

At July 5, 2015, we recognized a \$20.2 million decrease in our foreign currency translation adjustment account compared to December 28, 2014, primarily because of the strengthening of the U.S. dollar against certain foreign currencies, particularly the Euro and Australian dollar.

Sensitivity Analysis. For purposes of specific risk analysis, we use sensitivity analysis to measure the impact that market risk may have on the fair values of our market sensitive instruments. To perform sensitivity analysis, we assess the risk of loss in fair values associated with the impact of hypothetical changes in interest rates and foreign currency exchange rates on market sensitive instruments.

Because the debt outstanding under our Syndicated Credit Facility has variable interest rates based on an underlying prime lending rate or LIBOR rate, we do not believe changes in interest rates would have any significant impact on the fair value of that debt instrument. Changes in the underlying prime lending rate or LIBOR rate would, however, impact the amount of our interest expense. For a discussion of these hypothetical impacts on our interest expense, please see the discussion in Item 7A of our Annual Report on Form 10-K for the year ended December 28, 2014.

Table Of Contents

As of July 5, 2015, a 10% decrease or increase in the levels of foreign currency exchange rates against the U.S. dollar, with all other variables held constant, would result in a decrease in the fair value of our financial instruments of \$10.1 million or an increase in the fair value of our financial instruments of \$8.3 million, respectively. As the impact of offsetting changes in the fair market value of our net foreign investments is not included in the sensitivity model, these results are not indicative of our actual exposure to foreign currency exchange risk.

ITEM 4. CONTROLS AND PROCEDURES

As of the end of the period covered by this Quarterly Report on Form 10-Q, an evaluation was performed under the supervision and with the participation of our management, including our President and Chief Executive Officer and our Senior Vice President and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures, as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934 (the "Act"), pursuant to Rule 13a-14(c) under the Act. Based on that evaluation, our President and Chief Executive Officer and our Senior Vice President and Chief Financial Officer concluded that our disclosure controls and procedures were effective as of the end of the period covered by this Quarterly Report.

There were no changes in our internal control over financial reporting that occurred during our last fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II - OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

We are subject to various legal proceedings in the ordinary course of business, none of which is required to be disclosed under this Item 1.

ITEM 1A. RISK FACTORS

There are no material changes in risk factors in the second quarter of 2015. For a discussion of risk factors, see Part I, Item 1A, "Risk Factors," in our Annual Report on Form 10-K for the fiscal year ended December 28, 2014.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

The following table contains information with respect to purchases made by or on behalf of the Company, or any "affiliated purchaser" (as defined in Rule 10b-18(a)(3) under the Securities Exchange Act of 1934), of our common stock during the quarter ended July 5, 2015:
