Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements

(Unaudited)

1. Summary of Significant Accounting and Reporting Policies

Nature of Operations

Hilltop Holdings Inc. (“Hilltop” and, collectively with its subsidiaries, the “Company”) is a financial holding company registered under the Bank Holding Company Act of 1956, as amended by the Gramm-Leach-Bliley Act of 1999. The Company’s primary line of business is to provide business and consumer banking services from offices located throughout Texas through PlainsCapital Bank (the “Bank”). In addition, the Company provides an array of financial products and services through its broker-dealer, mortgage origination and insurance subsidiaries.

The Company provides its products and services through three primary operating subsidiaries, PlainsCapital Corporation (“PlainsCapital”), Hilltop Securities Holdings LLC (“Securities Holdings”) and National Lloyds Corporation (“NLC”). PlainsCapital is a financial holding company, headquartered in Dallas, Texas, that provides, through its subsidiaries, traditional banking services, wealth and investment management and treasury management primarily in Texas and residential mortgage lending throughout the United States. Securities Holdings is a holding company, headquartered in Dallas, Texas, that provides, through its subsidiaries, investment banking and other related financial services, including municipal advisory, sales, trading and underwriting of taxable and tax-exempt fixed income securities, equity trading, clearing, securities lending, structured finance and retail brokerage services throughout the United States. NLC is a property and casualty insurance holding company, headquartered in Waco, Texas, that provides, through its subsidiaries, fire and homeowners insurance to low value dwellings and manufactured homes primarily in Texas and other areas of the southern United States.

On January 1, 2015, Hilltop completed its acquisition of SWS Group, Inc. (“SWS”) in a stock and cash transaction (the “SWS Merger”), whereby SWS’s broker-dealer subsidiaries, Southwest Securities, Inc. and SWS Financial Services, Inc., became subsidiaries of Securities Holdings, a wholly owned subsidiary of Hilltop initially formed for the purpose of facilitating this transaction, and SWS’s banking subsidiary, Southwest Securities, FSB (“SWS FSB”), was merged into the Bank, an indirect wholly owned subsidiary of Hilltop. As a result of the SWS Merger, each outstanding share of SWS common stock was converted into the right to receive 0.2496 shares of Hilltop common stock and \$1.94 in cash, equating to \$6.92 per share based on Hilltop’s closing price on December 31, 2014 and resulting in an aggregate purchase price of \$349.1 million, consisting of 10.1 million shares of common stock, \$78.2 million in cash and \$70.3 million associated with Hilltop’s existing investment in SWS common stock. Additionally, due to appraisal rights proceedings filed in connection with the SWS Merger, the merger consideration is subject to change, and is therefore, preliminary as of the date of this report. Based on purchase date valuations, the fair value of the assets acquired was

\$3.3 billion, including \$707.5 million in securities, \$863.8 million in non-covered loans and \$1.2 billion in broker-dealer and clearing organization receivables. The fair value of liabilities assumed was \$2.9 billion, consisting primarily of deposits of \$1.3 billion and \$1.1 billion in broker-dealer and clearing organization payables. On October 5, 2015, Southwest Securities, Inc. and SWS Financial Services, Inc. were renamed “Hilltop Securities Inc.” (“Hilltop Securities”) and “Hilltop Securities Independent Network Inc.” (“HTS Independent Network”), respectively.

Basis of Presentation

The accompanying unaudited consolidated financial statements have been prepared in conformity with accounting principles generally accepted in the United States (“GAAP”), and in conformity with the rules and regulations of the Securities and Exchange Commission (the “SEC”). In the opinion of management, these financial statements contain all adjustments necessary for a fair statement of the results of the interim periods presented. Accordingly, the financial statements do not include all of the information and footnotes required by GAAP for complete financial statements and should be read in conjunction with the audited consolidated financial statements and notes thereto included in the Company’s Annual Report on Form 10-K for the year ended December 31, 2014 (“2014 Form 10-K”). Results for interim periods are not necessarily indicative of results to be expected for a full year or any future period.

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period.

Table of Contents

Actual results could differ from those estimates. Estimates regarding the allowance for loan losses, the fair values of financial instruments, the amounts receivable from the Federal Deposit Insurance Corporation (the “FDIC”) under loss-share agreements (the “FDIC Indemnification Asset”), reserves for losses and loss adjustment expenses, the mortgage loan indemnification liability, and the potential impairment of assets are particularly subject to change. The Company has applied its critical accounting policies and estimation methods consistently in all periods presented in these consolidated financial statements.

The operations of SWS were included in the Company’s operating results beginning January 1, 2015 and such operations included a preliminary bargain purchase gain of \$82.8 million as disclosed in the Company’s Quarterly Report on Form 10-Q filed with the SEC on May 6, 2015. In accordance with the Business Combinations Topic of the Accounting Standards Codification (“ASC”), during the quarter ended June 30, 2015, the estimated fair value of the customer relationship intangible asset acquired as of January 1, 2015 was adjusted downward as a result of management’s review and approval of certain key assumptions that existed as of January 1, 2015. Additionally, during the quarter ended September 30, 2015, the estimated fair value of deferred tax assets acquired as of January 1, 2015 was adjusted upward as a result of management’s review and filing of SWS’s consolidated federal tax return for the year ended December 31, 2014. These adjustments resulted in a net decrease in the preliminary bargain purchase gain associated with the SWS Merger to \$81.3 million. This change is reflected in the consolidated statements of operations within noninterest income during the nine months ended September 30, 2015. In the aggregate, these adjustments to the preliminary bargain purchase gain decreased net income for the three months ended March 31, 2015 by \$1.5 million as compared with amounts previously reported in the Company’s Quarterly Report on Form 10-Q for the quarter ended March 31, 2015. Additionally, certain amounts previously reported in the Company’s Quarterly Report on Form 10-Q for the quarter ended March 31, 2015 within the consolidated balance sheet as of March 31, 2015, and the related statements of comprehensive income, stockholders’ equity and cash flows for the three months ended March 31, 2015, as well as the notes to the consolidated financial statements, will be revised in future filings.

Certain reclassifications have been made to the prior period consolidated financial statements to conform with the current period presentation. Additionally, during the preparation of the condensed consolidated financial statements for the period ended September 30, 2015, the Company determined that its previously reported unaudited consolidated statements of cash flows contained in the previously filed Quarterly Reports on Form 10-Q filed with SEC on May 6, 2015 and July 29, 2015 contained a classification error related to how certain acquired balances related to its acquisition of SWS were reflected. Management has evaluated the quantitative and qualitative impact of the classification error to previously issued unaudited consolidated statements of cash flows and concluded that the previously issued condensed consolidated financial statements were not materially misstated. However, in order to correctly present the cash flow statements, management has elected to revise the unaudited consolidated statements of cash flows for each of the three months ended March 31, 2015 and six months ended June 30, 2015 in its future filings. The correction had no impact on the Company’s financial condition or results of operations for the periods presented. The following table summarizes the revisions made to the Company’s unaudited consolidated statements of cash flows for the noted periods (in thousands).

Three Months Ended March 31, 2015	Six Months Ended June 30, 2015
As Revised	As Revised

Table of Contents

Hilltop owns 100% of the outstanding stock of PlainsCapital. PlainsCapital owns 100% of the outstanding stock of the Bank and 100% of the membership interest in PlainsCapital Equity, LLC. The Bank owns 100% of the outstanding stock of PrimeLending, a PlainsCapital Company (“PrimeLending”) and has a 100% membership interest in PlainsCapital Securities, LLC.

PrimeLending owns a 100% membership interest in PrimeLending Ventures Management, LLC, the controlling and sole managing member of PrimeLending Ventures, LLC (“Ventures”).

Hilltop has a 100% membership interest in Securities Holdings, which operates through its wholly-owned subsidiaries, First Southwest Holdings, LLC (“First Southwest”), Hilltop Securities and HTS Independent Network. The principal subsidiaries of First Southwest are First Southwest Company, LLC (“FSC”), a broker-dealer registered with the SEC and the Financial Industry Regulatory Authority (“FINRA”) and a member of the New York Stock Exchange (“NYSE”), and First Southwest Asset Management, LLC, a registered investment advisor under the Investment Advisors Act of 1940. Hilltop Securities is a broker-dealer registered with the SEC and FINRA and a member of the NYSE, and HTS Independent Network is an introducing broker-dealer that is also registered with the SEC and FINRA.

Hilltop also owns 100% of NLC, which operates through its wholly owned subsidiaries, National Lloyds Insurance Company (“NLIC”) and American Summit Insurance Company (“ASIC”).

The consolidated financial statements include the accounts of the above-named entities. All significant intercompany transactions and balances have been eliminated. Noncontrolling interests have been recorded for minority ownership in entities that are not wholly owned and are presented in compliance with the provisions of Noncontrolling Interest in Subsidiary Subsections of the Financial Accounting Standards Board (“FASB”) ASC.

PlainsCapital also owns 100% of the outstanding common securities of PCC Statutory Trusts I, II, III and IV (the “Trusts”), which are not included in the consolidated financial statements under the requirements of the Variable Interest Entities Subsections of the ASC, because the primary beneficiaries of the Trusts are not within the consolidated group.

2. Acquisition

SWS Merger

On January 1, 2015, Hilltop completed its acquisition of SWS in a stock and cash transaction as discussed in Note 1 to the consolidated financial statements. The operations of SWS are included in the Company's operating results beginning January 1, 2015. Such operating results include a preliminary bargain purchase gain of \$81.3 million and are not necessarily indicative of future operating results. SWS's results of operations prior to the acquisition date are not included in the Company's consolidated operating results.

The SWS Merger was accounted for using the acquisition method of accounting, and accordingly, purchased assets, including identifiable intangible assets, and assumed liabilities were recorded at their respective acquisition date fair values. The components of the consideration paid are shown in the following table (in thousands).

Fair value of preliminary consideration paid:	
Common stock issued	\$ 200,626
Cash	78,217
Fair value of Hilltop's existing investment in SWS	70,282
Total preliminary consideration paid	\$ 349,125

Table of Contents

The resulting fair values of the identifiable assets acquired, and liabilities assumed, of SWS at January 1, 2015 are summarized in the following table (in thousands).

Cash and due from banks	\$ 119,314
Federal funds sold and securities purchased under agreements to resell	44,741
Assets segregated for regulatory purposes	181,610
Securities	707,476
Non-covered loans, net	863,819
Broker-dealer and clearing organization receivables	1,221,793
Other assets	159,906
Total identifiable assets acquired	3,298,659
Deposits	(1,287,509)
Broker-dealer and clearing organization payables	(1,109,978)
Short-term borrowings	(164,240)
Securities sold, not yet purchased, at fair value	(140,409)
Notes payable	(76,643)
Other liabilities	(89,466)
Total liabilities assumed	(2,868,245)
Preliminary estimated bargain purchase gain	(81,289)
	349,125
Less Hilltop existing investment in SWS	(70,282)
Net identifiable assets acquired	\$ 278,843

The preliminary bargain purchase gain represents the excess of the estimated fair value of the underlying net tangible assets and intangible assets over the preliminary merger consideration. The SWS Merger was a tax-free reorganization under Section 368(a) of the Internal Revenue Code, therefore no income taxes were recorded in connection with the preliminary bargain purchase gain. The Company used significant estimates and assumptions to value certain identifiable assets acquired and liabilities assumed. The preliminary bargain purchase gain was primarily driven by the Company's ability to realize acquired deferred tax assets through its consolidated core earnings and the decline in the price of the Company's common stock between the date the fixed conversion ratio was agreed upon and the closing date.

Included within the fair value of other assets in the table above are identifiable intangible assets recorded in connection with the SWS Merger. The allocation to intangible assets is as follows (in thousands).

	Estimated Useful Life (Years)	Gross Intangible Assets
Customer relationships	14	\$ 7,300
Core deposits	4	160

\$ 7,460

Transaction and integration-related expenses associated with the SWS Merger of \$2.8 million and \$0.3 million during the three months ended September 30, 2015 and 2014, respectively, and \$17.2 million and \$0.7 million during the nine months ended September 30, 2015 and 2014, respectively, are included in noninterest expense within the consolidated statements of operations. Such expenses were for professional services and other incremental employee and contractual costs associated with the integration of SWS's operations.

In connection with the SWS Merger, Hilltop acquired loans both with and without evidence of credit quality deterioration since origination. The acquired loans were initially recorded at fair value with no carryover of any allowance for loan losses. Acquired loans were segregated between those considered to be purchased credit impaired

Table of Contents

(“PCI”) loans and those without credit impairment at acquisition. The following table presents details on acquired loans at the acquisition date (in thousands).

	Loans, excluding PCI Loans	PCI Loans	Total Loans
Commercial and industrial (1)	\$ 447,959	\$ 9,850	\$ 457,809
Real estate	324,477	62,218	386,695
Construction and land development	14,708	1,391	16,099
Consumer	3,216	—	3,216
Total	\$ 790,360	\$ 73,459	\$ 863,819

(1) Acquired loans include margin loans to customers and correspondents of \$269.4 million associated with acquired broker-dealer operations, none of which are PCI loans.

The following table presents information about the PCI loans at acquisition (in thousands).

Contractually required principal and interest payments	\$ 120,078
Nonaccretable difference	32,040
Cash flows expected to be collected	88,038
Accretable difference	14,579
Fair value of loans acquired with a deterioration of credit quality	\$ 73,459

The following table presents information about the acquired loans without credit impairment at acquisition (in thousands).

Contractually required principal and interest payments	\$ 901,672
Contractual cash flows not expected to be collected	39,721
Fair value at acquisition	790,360

Pro Forma Results of Operations

The results of operations acquired in the SWS Merger have been included in the Company's consolidated financial results since January 1, 2015. The following table discloses the impact of SWS on the Company's results of operations. The table presents pro forma results had the SWS Merger taken place on January 1, 2014 and includes the estimated impact of purchase accounting adjustments (in thousands). The purchase accounting adjustments reflect the impact of recording the acquired loans at fair value, including the estimated accretion of the purchase discount on the loan portfolio. Accretion estimates were based on the acquisition date purchase discount on the loan portfolio, as it was not practicable to determine the amount of discount that would have been recorded based on economic conditions that existed on January 1, 2014. The pro forma results do not include any potential operating cost savings as a result of the SWS Merger. Further, certain costs associated with any integration activities are not reflected in the pro forma results. Pro forma results exclude nonrecurring items resulting directly from the SWS Merger that do not have a continuing impact on results of operations. The pro forma results are not necessarily indicative of what would have occurred had the SWS Merger taken place on the indicated date.

	Three Months Ended September 30, 2014	Nine Months Ended September 30, 2014
Net interest income	\$ 106,593	\$ 322,231
Other revenues	262,960	743,812
Net income	31,636	87,785

Table of Contents

3. Fair Value Measurements

Fair Value Measurements and Disclosures

The Company determines fair values in compliance with The Fair Value Measurements and Disclosures Topic of the ASC (the “Fair Value Topic”). The Fair Value Topic defines fair value, establishes a framework for measuring fair value in GAAP and expands disclosures about fair value measurements. The Fair Value Topic defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. The Fair Value Topic assumes that transactions upon which fair value measurements are based occur in the principal market for the asset or liability being measured. Further, fair value measurements made under the Fair Value Topic exclude transaction costs and are not the result of forced transactions.

The Fair Value Topic creates a fair value hierarchy that classifies fair value measurements based upon the inputs used in valuing the assets or liabilities that are the subject of fair value measurements. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs, as indicated below.

- Level 1 Inputs: Unadjusted quoted prices in active markets for identical assets or liabilities that the Company can access at the measurement date.
- Level 2 Inputs: Observable inputs other than Level 1 prices. Level 2 inputs include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability (such as interest rates, yield curves, prepayment speeds, default rates, credit risks and loss severities), and inputs that are derived from or corroborated by market data, among others.
- Level 3 Inputs: Unobservable inputs that reflect an entity’s own assumptions about the assumptions that market participants would use in pricing the assets or liabilities. Level 3 inputs include pricing models and discounted cash flow techniques, among others.

Fair Value Option

The Company has elected to measure substantially all of PrimeLending’s mortgage loans held for sale and retained mortgage servicing rights (“MSR”) asset at fair value, under the provisions of the Fair Value Option. The Company elected to apply the provisions of the Fair Value Option to these items so that it would have the opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to

apply complex hedge accounting provisions. At September 30, 2015, the aggregate fair value of PrimeLending's mortgage loans held for sale accounted for under the Fair Value Option was \$1.31 billion, and the unpaid principal balance of those loans was \$1.25 billion. At December 31, 2014, the aggregate fair value of PrimeLending's mortgage loans held for sale accounted for under the Fair Value Option was \$1.27 billion, and the unpaid principal balance of those loans was \$1.22 billion. The interest component of fair value is reported as interest income on loans in the accompanying consolidated statements of operations.

On October 2, 2014, Hilltop exercised its warrant to purchase 8,695,652 shares of SWS common stock at an exercise price of \$5.75 per share (the "SWS Warrant") and paid the aggregate exercise price by the automatic elimination of the \$50.0 million aggregate principal amount note due to Hilltop under its credit agreement with SWS. Following the exercise of the SWS Warrant, Hilltop owned approximately 21% of the outstanding shares of SWS common stock as of October 2, 2014. Contemporaneous with the exercise of the SWS Warrant, Hilltop changed the accounting method for its investment in SWS common stock and elected to account for its investment in accordance with the provisions of the Fair Value Option as permitted by GAAP. Hilltop had previously accounted for its investment in SWS common stock as an available for sale security. Under the Fair Value Option, Hilltop's investment in SWS common stock is recorded at fair value effective October 2, 2014, with changes in fair value being recorded in other noninterest income within the consolidated statements of operations rather than as a component of other comprehensive income. At December 31, 2014, the fair value of Hilltop's investment in SWS common stock was \$70.3 million and is included in other assets within the consolidated balance sheet.

Table of Contents

The Company holds a number of financial instruments that are measured at fair value on a recurring basis, either by the application of the Fair Value Option or other authoritative pronouncements. The fair values of those instruments are determined primarily using Level 2 inputs. Those inputs include quotes from mortgage loan investors and derivatives dealers and data from independent pricing services.

The following tables present information regarding financial assets and liabilities measured at fair value on a recurring basis (in thousands).

	Level 1	Level 2	Level 3	Total
September 30, 2015	Inputs	Inputs	Inputs	Fair Value
Trading securities	\$ 9,748	\$ 282,669	\$ 1	\$ 292,418

Edgar Filing: Hilltop Holdings Inc. - Form 10-Q

All net realized and unrealized gains (losses) in the table above are reflected in the accompanying consolidated financial statements. The available for sale securities noted in the table above reflect Hilltop's note receivable from SWS and the SWS Warrant, which, as previously discussed, Hilltop exercised in full on October 2, 2014. Hilltop paid the aggregate exercise price for the SWS Warrant by the automatic elimination of the \$50.0 million aggregate principal amount note due to Hilltop under the credit agreement.

For Level 3 financial instruments measured at fair value on a recurring basis at September 30, 2015, the significant unobservable inputs used in the fair value measurements were as follows.

Financial instrument	Valuation Technique	Unobservable Input	Range (Weighted-Average)
Trading securities	Discounted cash flow	Discount rate	8 - 17 % (10 %)
Loans held for sale	Discounted cash flow / Market comparable	Projected price	93 - 95 % (94 %)
MSR asset	Discounted cash flow	Constant prepayment rate	13.68 %
		Discount rate	10.93 %

The fair value of certain loans held for sale that cannot be sold through normal sale channels or are non-performing is measured using unobservable inputs. The fair value of such loans is generally based upon estimates of expected cash flows using unobservable inputs, including listing prices of comparable assets, uncorroborated expert opinions, and/or management's knowledge of underlying collateral.

Table of Contents

Trading securities include corporate debt securities that are valued using a discounted cash flow model with observable market data; however, due to the distressed nature of these bonds, the Company has determined that these securities should be valued as a Level 3 financial instrument.

The MSR asset, which is included in other assets within the Company's consolidated balance sheets, is valued by projecting net servicing cash flows, which are then discounted to estimate the fair value. The fair value of the MSR asset is impacted by a variety of factors. Prepayment rates and discount rates, the most significant unobservable inputs, are discussed further in Note 7 to the consolidated financial statements.

The Company had no transfers between Levels 1 and 2 during the periods presented.

The following table presents the changes in fair value for instruments that are reported at fair value under the Fair Value Option (in thousands).

	Three Months Ended September 30, 2015			Three Months Ended September 30, 2014		
	Net Gains (Losses)	Other Noninterest Income	Total Changes in Fair Value	Net Gains (Losses)	Other Noninterest Income	Total Changes in Fair Value
Loans held for sale	\$ 18,531	\$ —	\$ 18,531	\$ (15,250)	\$ —	\$ (15,250)
MSR asset	(8,483)	—	(8,483)	(1,565)	—	(1,565)

	Nine Months Ended September 30, 2015			Nine Months Ended September 30, 2014		
	Net Gains (Losses)	Other Noninterest Income	Total Changes in Fair Value	Net Gains (Losses)	Other Noninterest Income	Total Changes in Fair Value
Loans held for sale	\$ 2,773	\$ —	\$ 2,773	\$ 24,918	\$ —	\$ 24,918
MSR asset	(11,749)	—	(11,749)	(645)	—	(645)

The Company also determines the fair value of certain assets and liabilities on a non-recurring basis. In particular, the fair value of all of the assets acquired and liabilities assumed in the SWS Merger was determined at the acquisition date. In addition, facts and circumstances may dictate a fair value measurement when there is evidence of impairment.

Assets and liabilities measured on a non-recurring basis include the items discussed below.

Impaired Loans — The Company reports impaired loans based on the underlying fair value of the collateral through specific allowances within the allowance for loan losses. PCI loans with a fair value of \$172.9 million, \$822.8 million and \$73.5 million were acquired by the Company upon completion of the merger with PlainsCapital (the “PlainsCapital Merger”), the FDIC-assisted transaction (the “FNB Transaction”) whereby the Bank acquired certain assets and assumed certain liabilities of First National Bank (“FNB”) and the SWS Merger, respectively (collectively, the “Bank Transactions”). Substantially all PCI loans acquired in the FNB Transaction are covered by FDIC loss-share agreements. The fair value of PCI loans was determined using Level 3 inputs, including estimates of expected cash flows that incorporated significant unobservable inputs regarding default rates, loss severity rates assuming default, prepayment speeds on acquired loans accounted for in pools (“Pooled Loans”), and estimated collateral values.

At September 30, 2015, estimates for these significant unobservable inputs were as follows.

	PCI Loans			FNB			SWS	
	PlainsCapital			Transaction			Merger	
	Merger							
Weighted average default rate	54	%	54	%	54	%	54	%
Weighted average loss severity rate	51	%	38	%	38	%	38	%
Weighted average prepayment speed	0	%	6	%	1	%	1	%

At September 30, 2015, the resulting weighted average expected loss on PCI loans associated with the PlainsCapital Merger, FNB Transaction and SWS Merger was 28%, 21% and 20%, respectively.

The Company obtains updated appraisals of the fair value of collateral securing impaired collateral dependent loans at least annually, in accordance with regulatory guidelines. The Company also reviews the fair value of such collateral on a quarterly basis. If the quarterly review indicates that the fair value of the collateral may have deteriorated, the Company

Table of Contents

orders an updated appraisal of the fair value of the collateral. Because the Company obtains updated appraisals when evidence of a decline in the fair value of collateral exists, it typically does not adjust appraised values.

Other Real Estate Owned — The Company reports other real estate owned (“OREO”) at fair value less estimated cost to sell. Any excess of recorded investment over fair value, less cost to sell, is charged against either the allowance for loan losses or the related PCI pool discount when property is initially transferred to OREO. Subsequent to the initial transfer to OREO, downward valuation adjustments are charged against earnings. The Company determines fair value primarily using independent appraisals of OREO properties. The resulting fair value measurements are classified as Level 2 or Level 3 inputs, depending upon the extent to which unobservable inputs determine the fair value measurement. The Company considers a number of factors in determining the extent to which specific fair value measurements utilize unobservable inputs, including, but not limited to, the inherent subjectivity in appraisals, the length of time elapsed since the receipt of independent market price or appraised value, and current market conditions. At September 30, 2015, the most significant unobservable input used in the determination of fair value of OREO was a discount to independent appraisals for estimated holding periods of OREO properties. Such discount was 1% per month for estimated holding periods of 6 to 24 months. Level 3 inputs were used to determine the initial fair value at acquisition of a large group of smaller balance properties that were acquired in the FNB Transaction. In the FNB Transaction, the Bank acquired OREO of \$135.2 million, all of which is covered by FDIC loss-share agreements. At September 30, 2015 and December 31, 2014, the estimated fair value of covered OREO was \$106.0 million and \$136.9 million, respectively, and the underlying fair value measurements utilize Level 2 and Level 3 inputs. The fair value of non-covered OREO at September 30, 2015 and December 31, 2014 was \$0.5 million and \$0.8 million, respectively, and is included in other assets within the consolidated balance sheets. Level 3 inputs were used to determine the initial fair value at acquisition of properties totaling \$5.6 million that were acquired in the SWS Merger. During the reported periods, all fair value measurements for non-covered OREO subsequent to initial recognition utilized Level 2 inputs.

The following table presents information regarding certain assets and liabilities measured at fair value on a non-recurring basis for which a change in fair value has been recorded during reporting periods subsequent to initial recognition (in thousands).

	Level 1	Level 2	Level 3	Total	Total Gains (Losses) for the Three Months Ended September 30,		Total Gains (Losses) for the Nine Months Ended September 30,

The Fair Value of Financial Instruments Subsection of the ASC requires disclosure of the fair value of financial assets and liabilities, including the financial assets and liabilities previously discussed. The methods for determining estimated fair value for financial assets and liabilities is described in detail in Note 3 to the consolidated financial statements included in the Company's 2014 Form 10-K.

Table of Contents

The following tables present the carrying values and estimated fair values of financial instruments not measured at fair value on either a recurring or non-recurring basis (in thousands).

September 30, 2015	Carrying Amount	Estimated Fair Value			Total
		Level 1 Inputs	Level 2 Inputs	Level 3 Inputs	
Financial assets:

FSC, Hilltop Securities and HTS Independent Network (collectively, the “Hilltop Broker-Dealers”) enter into transactions that represent commitments to purchase and deliver securities at prevailing future market prices to facilitate customer transactions and satisfy such commitments. Accordingly, the Hilltop Broker-Dealers’ ultimate obligation may exceed the amount recognized in the financial statements. These securities, which are carried at fair value and reported as securities sold, not yet purchased in the consolidated balance sheet, had a value of \$156.8 million at September 30, 2015.

The amortized cost and fair value of available for sale and held to maturity securities are summarized as follows (in thousands).

Table of Contents

During the three and nine months ended September 30, 2015 and 2014, the Company did not record any other-than-temporary impairments. While all of the investments are monitored for potential other-than-temporary impairment, the Company's analysis and experience indicate that these available for sale investments generally do not present a significant risk of other-than-temporary-impairment, as fair values frequently recover over time. Factors considered in the Company's analysis include the reasons for the unrealized loss position, the severity and duration of the unrealized loss position, credit worthiness, and forecasted performance of the investee. While some of the securities held in the investment portfolio have decreased in value since the date of acquisition, the severity of loss and the duration of the loss position are not believed to be significant enough to warrant other-than-temporary impairment of the securities. The Company does not intend, nor does the Company believe that it is likely that the Company will be required, to sell these securities before the recovery of the cost basis. Therefore, management does not believe any other-than-temporary impairments exist at September 30, 2015.

Expected maturities may differ from contractual maturities because certain borrowers may have the right to call or prepay obligations with or without penalties. The amortized cost and fair value of securities, excluding trading and available for sale equity securities, at September 30, 2015 are shown by contractual maturity below (in thousands).

	Available for Sale		Held to Maturity	
	Amortized		Amortized	
	Cost	Fair Value	Cost	Fair Value
Due in one year or less	\$ 27,223	\$ 27,530	\$ 51,750	\$ 51,770
Due after one year through five years	66,426	69,337	20,098	20,314
Due after five years through ten years	79,749	82,745	4,077	4,093
Due after ten years	421,614	422,160	14,034	14,082
	595,012	601,772	89,959	90,259
Residential mortgage-backed securities	36,480	37,655	24,529	25,143
Collateralized mortgage obligations	60,238	59,406	177,968	179,424
Commercial mortgage-backed securities	9,606	9,749	12,860	13,205
	\$ 701,336	\$ 708,582	\$ 305,316	\$ 308,031

The Company realized net gains of \$4.8 million and \$0.2 million from its trading securities portfolio during the three months ended September 30, 2015 and 2014, respectively, and net gains of \$7.6 million and \$1.6 million during the nine months ended September 30, 2015 and 2014, respectively, which are recorded as a component of other noninterest income within the consolidated statements of operations.

Securities with a carrying amount of \$780.2 million and \$895.5 million (with a fair value of \$785.0 million and \$890.3 million, respectively) at September 30, 2015 and December 31, 2014, respectively, were pledged to secure public and trust deposits, federal funds purchased and securities sold under agreements to repurchase, and for other purposes as required or permitted by law.

Mortgage-backed securities and collateralized mortgage obligations consist principally of Government National Mortgage Association (“GNMA”), Federal National Mortgage Association (“FNMA”) and Federal Home Loan Mortgage Corporation (“FHLMC”) pass-through and participation certificates. GNMA securities are guaranteed by the full faith and credit of the United States, while FNMA and FHLMC securities are fully guaranteed by those respective United States government-sponsored agencies, and conditionally guaranteed by the full faith and credit of the United States.

At both September 30, 2015 and December 31, 2014, NLC had investments on deposit in custody for various state insurance departments with carrying values of \$9.2 million.

Table of Contents

5. Non-Covered Loans and Allowance for Non-Covered Loan Losses

Non-covered loans refer to loans not covered by the FDIC loss-share agreements. Covered loans are discussed in Note 6 to the consolidated financial statements. Non-covered loans summarized by portfolio segment are as follows (in thousands).

	September 30, 2015	December 31, 2014
Commercial and industrial (1)	\$ 2,121,542	\$ 1,758,851
Real estate	2,253,286	1,694,835
Construction and land development	576,864	413,643
Consumer	47,837	53,147
	4,999,529	3,920,476
Allowance for non-covered loan losses	(42,989)	(37,041)
Total non-covered loans, net of allowance	\$ 4,956,540	\$ 3,883,435

(1) Includes margin loans to customers and correspondents of \$606.0 million and \$378.4 million at September 30, 2015 and December 31, 2014, respectively.

The Bank has lending policies in place with the goal of establishing an asset portfolio that will provide a return on stockholders' equity sufficient to maintain capital to assets ratios that meet or exceed established regulations. Loans are underwritten with careful consideration of the borrower's financial condition, the specific purpose of the loan, the primary sources of repayment and any collateral pledged to secure the loan.

Underwriting procedures address financial components based on the size and complexity of the credit. The financial components include, but are not limited to, current and projected cash flows, shock analysis and/or stress testing, and trends in appropriate balance sheet and statement of operations ratios. The Bank's loan policy provides specific underwriting guidelines by portfolio segment, including commercial and industrial, real estate, construction and land development, and consumer loans. The guidelines for each individual portfolio segment set forth permissible and impermissible loan types. With respect to each loan type, the guidelines within the Bank's loan policy provide minimum requirements for the underwriting factors listed above. The Bank's underwriting procedures also include an analysis of any collateral and guarantor. Collateral analysis includes a complete description of the collateral, as well as determined values, monitoring requirements, loan to value ratios, concentration risk, appraisal requirements and other information relevant to the collateral being pledged. Guarantor analysis includes liquidity and cash flow evaluation based on the significance with which the guarantors are expected to serve as secondary repayment sources.

The Bank maintains a loan review department that reviews credit risk in response to both external and internal factors that potentially impact the performance of either individual loans or the overall loan portfolio. The loan review

process reviews the creditworthiness of borrowers and determines compliance with the loan policy. The loan review process complements and reinforces the risk identification and assessment decisions made by lenders and credit personnel. Results of these reviews are presented to management and the Bank's board of directors.

In connection with the Bank Transactions, the Company acquired non-covered loans both with and without evidence of credit quality deterioration since origination. The following table presents the carrying values and the outstanding balances of the non-covered PCI loans (in thousands).

	September 30, 2015	December 31, 2014
Carrying amount	\$ 81,161	\$ 48,909
Outstanding balance	104,055	67,740

Table of Contents

Changes in the accretable yield for the non-covered PCI loans were as follows (in thousands).

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014
Balance, beginning of period	\$ 22,168	\$ 11,904	\$ 12,814	\$ 17,601
Additions	—	—	14,579	—
Reclassifications from (to) nonaccretable difference, net(1)	6,234	4,270	11,173	13,886
Disposals of loans	—	(744)	(2,778)	(4,928)
Accretion	(9,206)	(2,199)	(16,592)	(13,328)
Balance, end of period	\$ 19,196	\$ 13,231	\$ 19,196	\$ 13,231

(1) Reclassifications from nonaccretable difference are primarily due to net increases in expected cash flows in the quarterly recasts. Reclassifications to nonaccretable difference occur when accruing loans are moved to nonaccrual and expected cash flows are no longer predictable and the accretable yield is eliminated.

The remaining nonaccretable difference for non-covered PCI loans was \$31.1 million and \$18.4 million at September 30, 2015 and December 31, 2014, respectively.

Impaired loans exhibit a clear indication that the borrower's cash flow may not be sufficient to meet principal and interest payments, which is generally when a loan is 90 days past due unless the asset is both well secured and in the process of collection. Non-covered impaired loans include non-accrual loans, troubled debt restructurings ("TDRs"), PCI loans and partially charged-off loans.

The amounts shown in following tables include loans accounted for on an individual basis, as well as Pooled Loans. For Pooled Loans, the recorded investment with allowance and the related allowance consider impairment measured at the pool level. Non-covered impaired loans are summarized by class in the following tables (in thousands).

Consumer	14	—
	\$ 28,062	\$ 19,042

At September 30, 2015 and December 31, 2014, non-covered non-accrual loans included non-covered PCI loans of \$9.6 million and \$6.6 million, respectively, for which discount accretion has been suspended because the extent and timing of cash flows from these non-covered PCI loans can no longer be reasonably estimated. In addition to the non-covered non-accrual loans in the table above, \$1.5 million and \$3.0 million of real estate loans secured by residential properties and classified as held for sale were in non-accrual status at September 30, 2015 and December 31, 2014, respectively.

Table of Contents

Interest income, including recoveries and cash payments, recorded on non-covered impaired loans was \$4.9 million and \$0.1 million during the three months ended September 30, 2015 and 2014, respectively, and \$7.4 million and \$2.6 million during the nine months ended September 30, 2015 and 2014, respectively. Except as noted above, non-covered PCI loans are considered to be performing due to the application of the accretion method.

The Bank classifies loan modifications as TDRs when it concludes that it has both granted a concession to a debtor and that the debtor is experiencing financial difficulties. Loan modifications are typically structured to create affordable payments for the debtor and can be achieved in a variety of ways. The Bank modifies loans by reducing interest rates and/or lengthening loan amortization schedules. The Bank also reconfigures a single loan into two or more loans (“A/B Note”). The typical A/B Note restructure results in a “bad” loan which is charged off and a “good” loan or loans the terms of which comply with the Bank’s customary underwriting policies. The debt charged off on the “bad” loan is not forgiven to the debtor.

The outstanding balance of TDRs granted in the three and nine months ended September 30, 2015 and the nine months ended September 30, 2014 is shown in the following tables (in thousands). There were no TDRs granted during the three months ended September 30, 2014. The TDR granted during the three months ended March 31, 2015 was paid off as of June 30, 2015. At September 30, 2015, the Bank had nominal unadvanced commitments to borrowers whose loans have been restructured in TDRs. At December 31, 2014, the Bank had \$0.5 million in unadvanced commitments to borrowers whose loans have been restructured in TDRs.

In addition to the non-covered loans shown in the table above, \$37.0 million and \$19.2 million of loans included in loans held for sale (with an unpaid principal balance of \$37.2 million and \$19.2 million, respectively) were 90 days past due and accruing interest at September 30, 2015 and December 31, 2014, respectively. These loans are guaranteed by U.S. government agencies and include loans that are subject to repurchase, or have been repurchased, by PrimeLending.

Management tracks credit quality trends on a quarterly basis related to: (i) past due levels, (ii) non-performing asset levels, (iii) classified loan levels, (iv) net charge-offs, and (v) general economic conditions in the state and local markets.

The Bank utilizes a risk grading matrix to assign a risk grade to each of the loans in its portfolio. A risk rating is assigned based on an assessment of the borrower's management, collateral position, financial capacity, and economic factors. The general characteristics of the various risk grades are described below.

Pass – “Pass” loans present a range of acceptable risks to the Bank. Loans that would be considered virtually risk-free are rated Pass – low risk. Loans that exhibit sound standards based on the grading factors above and present a reasonable risk to the Bank are rated Pass – normal risk. Loans that exhibit a minor weakness in one or more of the grading criteria but still present an acceptable risk to the Bank are rated Pass – high risk.

Special Mention – “Special Mention” loans have potential weaknesses that deserve management’s close attention. If left uncorrected, these potential weaknesses may result in a deterioration of the repayment prospects for the loans and weaken the Bank’s credit position at some future date. Special Mention loans are not adversely classified and do not expose the Bank to sufficient risk to require adverse classification.

Substandard – “Substandard” loans are inadequately protected by the current sound worth and paying capacity of the obligor or the collateral pledged, if any. Loans so classified must have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the Bank will sustain some loss if the deficiencies are not corrected. Many substandard loans are considered impaired.

PCI – “PCI” loans exhibited evidence of credit deterioration at acquisition that made it probable that all contractually required principal payments would not be collected.

Table of Contents

Allowance for Loan Losses

The allowance for loan losses is a reserve established through a provision for loan losses charged to expense, which represents management's best estimate of probable losses inherent in the existing portfolio of loans.

It is management's responsibility at the end of each quarter, or more frequently as deemed necessary, to analyze the level of the allowance for loan losses to ensure that it is appropriate for the estimated credit losses in the portfolio consistent with the Interagency Policy Statement on the Allowance for Loan and Lease Losses and the Receivables and Contingencies Topics of the ASC. Estimated credit losses are the probable current amount of loans that the Company will be unable to collect given facts and circumstances as of the evaluation date. When management determines that a loan or portion thereof is uncollectible, the loan, or portion thereof, is charged off against the allowance for loan losses, or for acquired loans accounted for in pools, charged against the pool discount. Recoveries on charge-offs of loans acquired in the Bank Transactions that occurred prior to their acquisition represent contractual cash flows not expected to be collected and are recorded as accretion income. Recoveries on acquired loans charged-off subsequent to their acquisition are credited to the allowance for loan loss, except for recoveries on loans accounted for in pools, which are credited to the pool discount. The Bank's loan portfolio is designated into two populations: acquired loans and originated loans. The allowance for loan losses is calculated separately for acquired and originated loans.

PCI loans acquired in the PlainsCapital Merger are accounted for on an individual loan basis, while PCI loans acquired in each of the FNB Transaction and the SWS Merger are accounted for both in pools and at the individual loan level. Cash flows expected to be collected are recast quarterly for each loan or pool. These evaluations require the continued use and updating of key assumptions and estimates such as default rates, loss severity given default and prepayment speed assumptions (similar to those used for the initial fair value estimate). Management judgment must be applied in developing these assumptions. If expected cash flows for a loan or pool decreases, an increase in the allowance for loan losses is made through a charge to the provision for loan losses. If expected cash flows for a loan or pool increase, any

Table of Contents

previously established allowance for loan losses is reversed and any remaining difference increases the accretable yield. This increase in accretable yield is taken into income over the remaining life of the loan.

The allowance for both originated and acquired loans is subject to regulatory examinations and determinations as to appropriateness, which may take into account such factors as the methodology used to calculate the allowance and the size of the allowance.

Changes in the allowance for non-covered loan losses, distributed by portfolio segment, are shown below (in thousands).

6. Covered Assets and Indemnification Asset

On September 13, 2013, the Bank assumed substantially all of the liabilities, including all of the deposits, and acquired substantially all of the assets of FNB in an FDIC-assisted transaction. As part of the Purchase and Assumption Agreement by and among the FDIC (as receiver of FNB), the Bank and the FDIC (the “P&A Agreement”), the Bank and the FDIC entered into loss-share agreements covering future losses incurred on certain acquired loans and OREO. The Company refers to acquired commercial and single family residential loan portfolios and OREO that are subject to the loss-share agreements as “covered loans” and “covered OREO”, respectively, and these assets are

presented as separate line items in the Company's consolidated balance sheets. Collectively, covered loans and covered OREO are referred to as "covered assets". Pursuant to the loss-share agreements, the FDIC has agreed to reimburse the Bank the following amounts with respect to the covered assets: (i) 80% of net losses on the first \$240.4 million of net losses incurred; (ii) 0% of net losses in excess of \$240.4 million up to and including \$365.7 million of net losses incurred; and (iii) 80% of net losses in excess of \$365.7 million of net losses incurred. Net losses are defined as book value losses plus certain defined expenses incurred in the resolution of assets, less subsequent recoveries. Under the loss-share agreement for commercial assets, the amount of subsequent recoveries that are reimbursable to the FDIC for a particular asset is limited to book value losses and expenses actually billed plus any book value charge-offs incurred prior to September 13, 2013 (the "Bank Closing Date"). There is no limit on the amount of subsequent recoveries reimbursable to the FDIC under the loss-share agreement for single family residential assets. The loss-share agreements for commercial and single family residential assets are in effect for 5 years and 10 years, respectively, from the Bank Closing Date, and the loss recovery provisions to the FDIC are in effect for 8 years and 10 years, respectively, from the Bank Closing Date. The asset arising from the loss-share agreements, referred to as the "FDIC Indemnification Asset," is measured separately from the covered loan portfolio because the agreements are not contractually embedded in the covered loans and are not transferable should the Bank choose to dispose of the covered loans.

In accordance with the loss-share agreements, the Bank may be required to make a "true-up" payment to the FDIC approximately 10 years following the Bank Closing Date if the FDIC's initial estimate of losses on covered assets is greater than the actual realized losses. The "true-up" payment is calculated using a defined formula set forth in the P&A Agreement.

Covered Loans and Allowance for Covered Loan Losses

Loans acquired in the FNB Transaction that are subject to a loss-share agreement are referred to as "covered loans" and reported separately in the consolidated balance sheets. Covered loans are reported exclusive of the cash flow reimbursements that may be received from the FDIC.

The Bank's portfolio of acquired covered loans had a fair value of \$1.1 billion as of the Bank Closing Date, with no carryover of any allowance for loan losses. Acquired covered loans were preliminarily segregated between those considered to be PCI loans and those without credit impairment at acquisition.

In connection with the FNB Transaction, the Bank acquired loans both with and without evidence of credit quality deterioration since origination. The Company's accounting policies for acquired covered loans, including covered PCI

Table of Contents

loans, are consistent with that of acquired non-covered loans, as described in Note 5 to the consolidated financial statements. The Company has established under its PCI accounting policy a framework to aggregate certain acquired covered loans into various loan pools based on a minimum of two layers of common risk characteristics for the purpose of determining their respective fair values as of their acquisition dates, and for applying the subsequent recognition and measurement provisions for income accretion and impairment testing.

The following table presents the carrying value of the covered loans summarized by portfolio segment (in thousands).

	September 30, 2015	December 31, 2014
Commercial and industrial	\$ 14,972	\$ 30,780
Real estate	373,391	552,850
Construction and land development	34,054	59,010
Consumer	—	—
	422,417	642,640
Allowance for covered loans	(1,870)	(4,611)
Total covered loans, net of allowance	\$ 420,547	\$ 638,029

The following table presents the carrying value and the outstanding contractual balance of the covered PCI loans (in thousands).

	September 30, 2015	December 31, 2014
Carrying amount	\$ 251,018	\$ 435,388
Outstanding balance	450,581	685,393

Changes in the accretable yield for the covered PCI loans were as follows (in thousands).

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014
Balance, beginning of period	\$ 185,981	\$ 186,141	\$ 193,493	\$ 156,548
Reclassifications from (to) nonaccretable difference, net(1)	35,338	25,026	61,339	82,607
Transfer of loans to covered OREO(2)	(153)	(281)	1,346	5,091

Accretion	(32,301)	(18,146)	(67,313)	(51,506)
Balance, end of period	\$ 188,865	\$ 192,740	\$ 188,865	\$ 192,740

- (1) Reclassifications from nonaccretable difference are primarily due to net increases in expected cash flows in the quarterly recasts, but may also include the reclassification and immediate income recognition of nonaccretable difference due to the favorable resolution of loans accounted for individually. Reclassifications to nonaccretable difference occur when accruing loans are moved to nonaccrual and expected cash flows are no longer predictable and the accretable yield is eliminated.
- (2) Transfer of loans to covered OREO is the difference between the value removed from the pool and the expected cash flows for the loan.

The remaining nonaccretable difference for covered PCI loans was \$191.9 million and \$382.5 million at September 30, 2015 and December 31, 2014, respectively. During the three and nine months ended September 30, 2015 and 2014, a combination of factors affecting the inputs to the Bank's quarterly recast process led to the reclassifications from nonaccretable difference to accretable yield. These transfers resulted from revised cash flows that reflect better-than-expected performance of the covered PCI loan portfolio as a result of the Bank's strategic decision to dedicate resources to the liquidation of covered loans during the noted periods.

Covered impaired loans include non-accrual loans, TDRs, PCI loans and partially charged-off loans. Substantially all covered impaired loans are PCI loans. The amounts shown in following tables include Pooled Loans, as well as loans accounted for on an individual basis. For Pooled Loans, the recorded investment with allowance and the related allowance consider impairment measured at the pool level.

Table of Contents

	\$ 285,007	\$ 566,245	\$ 346,493	\$ 631,061

Table of Contents

Covered non-accrual loans are summarized by class in the following table (in thousands).

	September 30, 2015	December 31, 2014
Commercial and industrial:		
Secured	\$ 71	\$ 442
Unsecured	—	883
Real estate:		
Secured by commercial properties	452	30,823
Secured by residential properties	1,486	1,046
Construction and land development:		
Residential construction loans	775	1,018
Commercial construction loans and land development	25	11
Consumer	—	—
	\$ 2,809	\$ 34,223

At December 31, 2014, covered non-accrual loans included covered PCI loans of \$31.2 million, for which discount accretion has been suspended because the extent and timing of cash flows from these covered PCI loans can no longer be reasonably estimated. There were no covered non-accrual PCI loans at September 30, 2015.

Interest income, including recoveries and cash payments, recorded on covered impaired loans was \$14.3 million during the three and nine months ended September 30, 2015, respectively. Interest income recorded on covered impaired loans during the three and nine months ended September 30, 2014 was nominal. Except as noted above, covered PCI loans are considered to be performing due to the application of the accretion method.

The Bank classifies loan modifications of covered loans as TDRs in a manner consistent with that of non-covered loans as discussed in Note 5 to the consolidated financial statements. The outstanding balance of TDRs granted in the three and nine months ended September 30, 2015 is shown in the following tables (in thousands). Pooled Loans are not in the scope of the disclosure requirements for TDRs. A TDR granted during the three months ended March 31, 2015 of \$0.6 million, and for which a payment was at least 30 days past due in the three months ended June 30, 2015, was paid off as of September 30, 2015. There were no TDRs granted during the period from September 14, 2013 through September 30, 2014. At September 30, 2015, the Bank had nominal unadvanced commitments to borrowers whose loans have been restructured in TDRs.

The Bank's impairment methodology for the covered loans is consistent with that of non-covered loans as discussed in Note 5 to the consolidated financial statements. To the extent there is experienced or projected credit deterioration on the acquired covered loan pools subsequent to amounts estimated at the previous quarterly recast date and expected cash flows for a loan or pool decreases, an increase in the allowance for loan losses is made through a charge to the provision for loan losses. If expected cash flows for a loan or pool increase, any previously established allowance for loan losses is reversed and any remaining difference increases the accretable yield. This increase in accretable yield is taken into income over the remaining life of the loan. Additionally, provision for credit losses will be recorded on advances on covered loans subsequent to the acquisition date in a manner consistent with the allowance for non-covered loan losses.

Table of Contents

Changes in the allowance for covered loan losses, distributed by portfolio segment, are shown below (in thousands).

Covered Other Real Estate Owned

A summary of the activity in covered OREO is as follows (in thousands).

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014
Balance, beginning of period	\$ 125,510	\$ 142,174	\$ 136,945	\$ 142,833
Additions to covered OREO	3,516	10,214	39,579	42,206
Dispositions of covered OREO	(17,632)	(11,150)	(61,072)	(40,842)
Valuation adjustments in the period	(5,370)	(14,440)	(9,428)	(17,399)
Balance, end of period	\$ 106,024	\$ 126,798	\$ 106,024	\$ 126,798

During the three and nine months ended September 30, 2015 and 2014, the Bank wrote down certain covered OREO assets to fair value to reflect new appraisals on certain OREO acquired in the FNB Transaction and OREO acquired from the foreclosure on certain FNB loans acquired in the FNB Transaction. Although the Bank recorded a fair value discount on the acquired assets upon acquisition, in some cases additional downward valuations were required.

These additional downward valuation adjustments reflect changes to the assumptions regarding the fair value of the OREO, including in some cases the intended use of the OREO due to the availability of more information, as well as the passage of time. The process of determining fair value is subjective in nature and requires the use of significant estimates and assumptions. Although the Bank makes market-based assumptions when valuing acquired assets, new information may come to light that causes estimates to increase or decrease. When the Bank determines, based on subsequent information, that its estimates require adjustment, the Bank records the adjustment. The accounting for such adjustments requires that the decreases to fair value be recorded at the time such new information is received, while increases to fair value are recorded when the asset is subsequently sold. All of the impairments recorded during the three and nine months ended September 30, 2015 and 2014 related to covered assets subject to the loss-share agreements with the FDIC.

FDIC Indemnification Asset

A summary of the activity in the FDIC Indemnification Asset is as follows (in thousands).

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014
Balance, beginning of period	\$ 102,381	\$ 175,114	\$ 130,437	\$ 188,291
FDIC Indemnification Asset accretion (amortization)	201	825	1,027	2,672
Transfers to due from FDIC and other	(9,680)	(26,151)	(38,562)	(41,175)
Balance, end of period	\$ 92,902	\$ 149,788	\$ 92,902	\$ 149,788

As of September 30, 2015, the Bank had billed and collected \$98.9 million from the FDIC, which represented reimbursable covered losses and expenses through June 30, 2015.

Table of Contents

7. Mortgage Servicing Rights

The following tables present the changes in fair value of the Company's MSR asset, as included in other assets within the consolidated balance sheets, and other information related to the serviced portfolio (dollars in thousands).

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014
Balance, beginning of period	\$ 44,985	\$ 35,877	\$ 36,155	\$ 20,149
Additions	11,025	18,982	23,121	33,790
Sales	—	(11,387)	—	(11,387)
Changes in fair value:				
Due to changes in model inputs or assumptions (1)	(7,030)	(1,024)	(6,302)	627
Due to customer payments	(1,453)	(541)	(5,447)	(1,272)
Balance, end of period	\$ 47,527	\$ 41,907	\$ 47,527	\$ 41,907
	September	December		
	30,	31,		
	2015	2014		
Mortgage loans serviced for others	\$ 5,042,199	\$ 3,645,220		
MSR asset as a percentage of serviced mortgage loans	0.94 %	0.99 %		

(1) Primarily represents changes in discount rates and prepayment speed assumptions, which are primarily affected by changes in interest rates and the refinement of other MSR model assumptions.

The key assumptions used in measuring the fair value of the Company's MSR asset were as follows.

	September 30,		December 31,	
	2015		2014	
Weighted average constant prepayment rate	13.68	%	12.17	%
Weighted average discount rate	10.93	%	11.01	%
Weighted average life (in years)	5.8		6.3	

A sensitivity analysis of the fair value of the Company's MSR asset to certain key assumptions is presented in the following table (in thousands).

Edgar Filing: Hilltop Holdings Inc. - Form 10-Q

	September 30, 2015	December 31, 2014
Constant prepayment rate:		
Impact of 10% adverse change	\$ (2,180)	\$ (1,648)
Impact of 20% adverse change	(4,181)	(3,169)
Discount rate:		
Impact of 10% adverse change	(1,722)	(1,431)
Impact of 20% adverse change	(3,322)	(2,753)

This sensitivity analysis presents the effect of hypothetical changes in key assumptions on the fair value of the MSR asset. The effect of such hypothetical change in assumptions generally cannot be extrapolated because the relationship of the change in one key assumption to the change in the fair value of the MSR asset is not linear. In addition, in the analysis, the impact of an adverse change in one key assumption is calculated independent of any impact on other assumptions. In reality, changes in one assumption may change another assumption.

Contractually specified servicing fees, late fees and ancillary fees earned of \$5.2 million and \$3.1 million during the three months ended September 30, 2015 and 2014, respectively, and \$13.7 million and \$8.1 million during the nine months ended September 30, 2015 and 2014, respectively, were included in other noninterest income within the consolidated statements of operations.

Table of Contents

8. Deposits

Deposits are summarized as follows (in thousands).

	September 30, 2015	December 31, 2014
Noninterest-bearing demand	\$ 2,173,890	\$ 2,076,385
Interest-bearing:		
NOW accounts	1,006,263	1,242,110
Money market	1,457,984	861,851
Brokered - money market	70,196	79,937
Demand	415,604	136,886
Savings	266,833	299,051
Time	1,368,973	1,575,910
Brokered - time	61,006	97,762
	\$ 6,820,749	\$ 6,369,892

The significant increase in deposits at September 30, 2015 as compared to December 31, 2014 was primarily due to the inclusion of the deposits assumed in the SWS Merger.

9. Short-term Borrowings

Short-term borrowings are summarized as follows (in thousands).

	September 30, 2015	December 31, 2014
Federal funds purchased	\$ 103,900	\$ 128,100
Securities sold under agreements to repurchase	199,890	136,396
Federal Home Loan Bank notes	375,000	375,000
Short-term bank loans	231,700	123,200
	\$ 910,490	\$ 762,696

Federal funds purchased and securities sold under agreements to repurchase generally mature daily, on demand, or on some other short-term basis. The Bank and the Hilltop Broker-Dealers execute transactions to sell securities under agreements to repurchase with both customers and broker-dealers. Securities involved in these transactions are held by the Bank, the Hilltop Broker-Dealers or a third-party dealer.

Information concerning federal funds purchased and securities sold under agreements to repurchase is shown in the following tables (dollars in thousands).

	Nine Months Ended September 30,			
	2015		2014	
Average balance during the period	\$ 313,765		\$ 326,936	
Average interest rate during the period	0.31	%	0.17	%

	September 30, 2015		December 31, 2014	
Average interest rate at end of period	0.18	%	0.15	%
Securities underlying the agreements at end of period:				
Carrying value	\$ 233,300		\$ 166,734	
Estimated fair value	\$ 234,007		\$ 163,852	

Table of Contents

Federal Home Loan Bank (“FHLB”) short-term notes mature over terms not exceeding 365 days and are collateralized by FHLB Dallas stock, nonspecified real estate loans and certain specific commercial real estate loans. Other information regarding FHLB notes is shown in the following tables (dollars in thousands).

	Nine Months Ended September 30,			
	2015		2014	
Average balance during the period	\$ 314,780		\$ 258,849	
Average interest rate during the period	0.24	%	0.17	%

	September 30,		December 31,	
	2015		2014	
Average interest rate at end of period	0.27	%	0.16	%

The Hilltop Broker-Dealers use short-term bank loans periodically to finance securities owned, margin loans to customers and correspondents, and underwriting activities. Interest on the borrowings varies with the federal funds rate. The weighted average interest rate on the borrowings at September 30, 2015 and December 31, 2014 was 1.24% and 1.07%, respectively.

10. Notes Payable

On April 9, 2015, Hilltop completed an offering of \$150.0 million aggregate principal amount of its 5% senior notes due 2025 (“Senior Unregistered Notes”) in a private offering that was exempt from the registration requirements of the Securities Act of 1933, as amended (the “Securities Act”). The Senior Unregistered Notes were offered within the United States only to qualified institutional buyers pursuant to Rule 144A under the Securities Act, and to persons outside of the United States under Regulation S under the Securities Act. The Senior Unregistered Notes were issued pursuant to an indenture, dated as of April 9, 2015, by and between Hilltop and U.S. Bank National Association, as trustee. The net proceeds from the offering, after deducting estimated fees and expenses and the initial purchasers’ discounts, were approximately \$148 million. Hilltop used the net proceeds of the offering to redeem all of Hilltop’s outstanding Non-Cumulative Perpetual Preferred Stock, Series B at an aggregate liquidation value of \$114.1 million, plus accrued but unpaid dividends of \$0.4 million, and Hilltop is utilizing the remainder for general corporate purposes.

In connection with the issuance of the Senior Unregistered Notes, on April 9, 2015, the Company entered into a registration rights agreement with the initial purchasers of the Senior Unregistered Notes. Under the terms of the

registration rights agreement, the Company agreed to offer to exchange the Senior Unregistered Notes for notes registered under the Securities Act (the “Senior Registered Notes”). The terms of the Senior Registered Notes are substantially identical to the Senior Unregistered Notes for which they were exchanged (including principal amount, interest rate, maturity and redemption rights), except that the Senior Registered Notes generally are not subject to transfer restrictions. On May 22, 2015 and subject to the terms and conditions set forth in the Senior Registered Notes prospectus, the Company commenced an offer to exchange the Senior Unregistered Notes for Senior Registered Notes. Substantially all of the Senior Unregistered Notes were tendered in the exchange offer, and on June 22, 2015, the Company fulfilled its requirements under the registration rights agreement for the Senior Unregistered Notes by issuing Senior Registered Notes in exchange for the tendered Senior Unregistered Notes. The Senior Registered Notes and the Senior Unregistered Notes that remain outstanding are collectively referred to as the “Senior Notes.”

The Senior Notes bear interest at a rate of 5% per year, payable semi-annually in arrears in cash on April 15 and October 15 of each year, commencing on October 15, 2015. The Senior Notes will mature on April 15, 2025, unless Hilltop redeems the Senior Notes, in whole at any time or in part from time to time, on or after January 15, 2025 (three months prior to the maturity date of the Senior Notes) at its election at a redemption price equal to 100% of the principal amount of the Senior Notes to be redeemed plus accrued and unpaid interest to, but excluding, the redemption date.

The indenture contains covenants that limit the Company’s ability to, among other things and subject to certain significant exceptions: (i) dispose of or issue voting stock of certain of the Company’s bank subsidiaries or subsidiaries that own voting stock of our bank subsidiaries, (ii) incur or permit to exist any mortgage, pledge, encumbrance or lien or charge on the capital stock of certain of the Company’s bank subsidiaries or subsidiaries that own capital stock of the Company’s bank subsidiaries and (iii) sell all or substantially all of the Company’s assets or merge or consolidate with or into other companies. The indenture also provides for certain events of default, which, if any of them occurs, would permit or require the principal amount, premium, if any, and accrued and unpaid interest on the then outstanding Senior Notes to be declared immediately due and payable.

Table of Contents

11. Income Taxes

The Company applies an estimated annual effective rate to interim period pre-tax income to calculate the income tax provision for the quarter in accordance with the principal method prescribed by the accounting guidance established for computing income taxes in interim periods. The Company's effective tax rate was 34.9% and 35.8% during the three months ended September 30, 2015 and 2014, respectively, and 23.5% and 36.1% during the nine months ended September 30, 2015 and 2014, respectively. The decrease in the Company's effective tax rate during the nine months ended September 30, 2015 was primarily due to no income taxes being recorded in connection with the preliminary bargain purchase gain of \$81.3 million associated with the SWS Merger because the acquisition was a tax-free reorganization under Section 368(a) of the Internal Revenue Code. In addition, the Company recorded an income tax benefit of \$2.1 million as a result of the SWS Merger to reverse the deferred tax liability for the difference between book and tax basis on Hilltop's investment in SWS common stock. The Company also reversed a previously established valuation allowance of \$1.9 million on a deferred tax asset associated with a capital loss carryforward.

At September 30, 2015 and December 31, 2014, the Company had net operating loss carryforwards for federal income tax purposes of \$90.9 million and \$45.5 million, respectively. This increase in net operating loss carryforwards was a result of the SWS Merger. The net operating loss carryforwards are subject to either separate return year limitations or annual limitations on their usage because of the ownership change. These net operating loss carryforwards expire in 2023 and later years. The Company expects to realize its current deferred tax asset for these net operating loss carryforwards through the implementation of certain tax planning strategies, core earnings, and reversal of timing differences. The Company has a valuation allowance recorded of \$2.2 million at September 30, 2015 against its gross deferred tax asset for an investment that may result in a capital loss. This increase in the valuation allowance of \$0.3 million from December 31, 2014 was a result of an increase in the valuation allowance of \$2.2 million from the SWS Merger, offset by a decrease of \$1.9 million associated with the unexpected capital gain recognition on a capital loss carryforward. The Company has no valuation allowance on the remainder of its deferred tax assets at September 30, 2015 or December 31, 2014.

GAAP requires the measurement of uncertain tax positions. Uncertain tax positions are the difference between a tax position taken, or expected to be taken in a tax return, and the benefit recognized for accounting purposes. At September 30, 2015, the total amount of gross unrecognized tax benefits was \$0.9 million, of which \$0.6 million if recognized, would favorably impact the Company's effective tax rate. The Company does not anticipate a significant change in the unrecognized tax benefits within the next twelve months.

The Company files income tax returns in U.S. federal and numerous state jurisdictions. The Company is subject to tax audits in numerous jurisdictions in the United States until the applicable statute of limitations expires. The Company is no longer subject to U.S. federal tax examinations for tax years prior to 2012. The Company is open for various state tax audits for tax years 2010 and later. The Company is currently under income tax examination by several state authorities for tax years 2011 through 2013. The Company does not expect any significant liability to arise as a result of the examinations.

12. Employee Benefits

Deferred Compensation Plan

As a result of the SWS Merger, the Company assumed a deferred compensation plan offered by the former SWS (the “SWS Plan”) that allows former SWS eligible officers and employees to defer a portion of their bonus compensation and commissions. The SWS Plan matched 15% of the deferrals made by participants up to a predetermined limit through matching contributions that vest ratably over four years. Pursuant to the terms of the SWS Plan, the trustee periodically purchased the former SWS common stock in the open market. As a result of the SWS Merger, the former SWS common shares were converted into Hilltop common stock based on the terms of the merger agreement. No further contributions can be made to this plan.

The assets of the SWS Plan are held in a rabbi trust and primarily include investments in company-owned life insurance (“COLI”) and Hilltop common stock. These assets are consolidated with those of the Company. Investments in COLI are carried at the cash surrender value of the insurance policies and recorded in other assets within the consolidated balance sheet at September 30, 2015. Investments in Hilltop common stock, which are carried at cost and accounted for in a manner similar to treasury stock, and the corresponding liability related to the deferred compensation plan are presented

Table of Contents

as components of stockholders' equity as employee stock trust and deferred compensation employee stock trust, net, respectively, at September 30, 2015.

13. Commitments and Contingencies

Legal Matters

The Company is subject to loss contingencies related to litigation, claims, investigations and legal and administrative cases and proceedings arising in the ordinary course of business. The Company evaluates these contingencies based on information currently available, including advice of counsel. The Company establishes accruals for those matters when a loss contingency is considered probable and the related amount is reasonably estimable. Any accruals are periodically reviewed and may be adjusted as circumstances change. A portion of the Company's exposure with respect to loss contingencies may be offset by applicable insurance coverage. In determining the amounts of any accruals or estimates of possible loss contingencies, the Company does not take into account the availability of insurance coverage, other than that provided by reinsurers in the insurance segment. When it is practicable, the Company estimates loss contingencies for possible litigation and claims, whether or not there is an accrued probable loss. When the Company is able to estimate such possible losses, and when it estimates that it is reasonably possible it could incur losses, in excess of amounts accrued, the Company is required to make a disclosure of the aggregate estimation. As available information changes, however, the matters for which the Company is able to estimate, as well as the estimates themselves will be adjusted, accordingly.

Assessments of litigation and claims exposures are difficult due to many factors that involve inherent unpredictability. Those factors include the following: the varying stages of the proceedings, particularly in the early stages; unspecified, unsupported, or uncertain damages; damages other than compensatory, such as punitive damages; a matter presenting meaningful legal uncertainties, including novel issues of law; multiple defendants and jurisdictions; whether discovery has begun or not or discovery is not complete; meaningful settlement discussions have not commenced; and whether the claim involves a class action and if so, how the class is defined. As a result of some of these factors, the Company may be unable to estimate reasonably possible losses with respect to some or all of the pending and threatened litigation and claims asserted against the Company.

Each of Hilltop, Securities Holdings, SWS and the individual members of the board of directors of SWS have been named as defendants in two purported stockholder class action lawsuits arising out of the SWS Merger. Both lawsuits were filed in Delaware Chancery Court (Joseph Arceri v. SWS Group, Inc. et al and Chaile Steinberg v. SWS Group, Inc. et al filed April 8, 2014 and April 11, 2014, respectively). On May 13, 2014, the Delaware Chancery Court consolidated the two actions (the "Consolidated Action") for all purposes. On June 10, 2014, plaintiffs filed a consolidated amended complaint. The complaint generally alleges, among other things, that the SWS board of directors breached its fiduciary duties to stockholders by failing to take steps to maximize stockholder value or to engage in a fair sale process before approving the merger, that the SWS board of directors labored under conflicts of interest, that certain provisions of the merger agreement unduly restrict SWS's ability to negotiate with other potential

bidders, and that the other defendants aided and abetted the SWS board of director's breaches of fiduciary duty. The complaint further alleges, among other things, that the proxy statement/prospectus filed by Hilltop on May 29, 2014 omits or misstates certain material information. The complaints seek relief that includes, among other things, an injunction prohibiting the consummation of the SWS Merger, rescission to the extent the merger terms have already been implemented, damages for the alleged breaches of fiduciary duty, and the payment of plaintiffs' attorneys' fees and costs.

On November 13, 2014, the parties to the Consolidated Action entered into a memorandum of understanding (the "MOU") reflecting the terms of an agreement, subject to final approval by the Court and certain other conditions, to settle the Consolidated Action. Pursuant to the MOU, defendants, without admitting any wrongdoing, agreed to make certain supplemental disclosures requested by plaintiffs in the Consolidated Action, as set forth in SWS's Current Report on Form 8-K dated November 14, 2014. In addition, Hilltop agreed to forbear from asserting certain rights under the Agreement and Plan of Merger, dated as of March 31, 2014, by and among Hilltop, Securities Holdings and SWS. The MOU further contemplates that, following confirmatory discovery, the parties will enter into a stipulation of settlement, which will be subject to customary conditions, including court approval following notice to the former stockholders of SWS. If the parties enter into a stipulation of settlement, a hearing will be scheduled at which the court will consider the fairness, reasonableness and adequacy of the settlement. There can be no assurance that the parties will ultimately enter into a stipulation of settlement, that the applicable court will approve any proposed settlement, or that any eventual settlement will be under the same terms as those contemplated by the MOU.

Table of Contents

Following completion of Hilltop's acquisition of SWS, several purported holders of shares of SWS common stock, representing a total of approximately 8.43 million shares of common stock of SWS, filed petitions in the Court of Chancery of the State of Delaware seeking appraisal for their shares pursuant to Section 262 of the Delaware General Corporation Law. The actions are captioned as follows: Highland Select Equity Master Fund, L.P. et al. v. SWS Group, Inc. et al., C.A. No. 10554-VCG; Lone Star Value Investors, LP et al. v. SWS Group, Inc. et al., C.A. No. 10572-VCG; and Merlin Partners, LP et al. v. SWS Group, Inc. et al., C.A. No. 10578-VCG. The Company believes these claims are without merit and intends to vigorously defend these actions.

On or about November 2, 2012, FSC, along with thirteen other defendants, was named in a lawsuit pending in the state of Rhode Island Superior Court styled Rhode Island Economic Development Corporation v. Wells Fargo Securities, LLC, et al. FSC is included in connection with its role as financial advisor to the State of Rhode Island, specifically in connection with the Rhode Island Economic Development Corporation's issuance of \$75 million in bonds to finance a loan to 38 Studios, LLC. FSC intends to defend itself vigorously in this action.

The Company is involved in information-gathering requests and investigations (both formal and informal), as well as reviews, examinations and proceedings (collectively, "Inquiries") by various governmental regulatory agencies, law enforcement authorities and self-regulatory bodies regarding certain of its businesses, business practices and policies, as well as the conduct of persons with whom it does business. Additional Inquiries will arise from time to time. In connection with those Inquiries, the Company receives document requests, subpoenas and other requests for information. The Inquiries, including the Inquiry described below, could develop into administrative, civil or criminal proceedings or enforcement actions that could result in consequences that have a material effect on the Company's consolidated financial position, results of operations or cash flows as a whole. Such consequences could include adverse judgments, findings, settlements, penalties, fines, orders, injunctions, restitution, or alterations in the Company's business practices, and could result in additional expenses and collateral costs, including reputational damage.

As a part of an industry-wide inquiry, PrimeLending received a subpoena from the Office of Inspector General of the U.S. Department of Housing and Urban Development regarding mortgage-related practices, including those relating to origination practices for loans insured by the Federal Housing Administration (the "FHA"). On August 20, 2014, PrimeLending received a Civil Investigative Demand from the United States Department of Justice (the "DOJ") related to this Inquiry. According to the Civil Investigative Demand, the DOJ is conducting an investigation to determine whether PrimeLending has violated the False Claims Act in connection with originating and underwriting single-family residential mortgage loans insured by the FHA. No allegations have been asserted against PrimeLending. PrimeLending cannot predict the ultimate outcome of this investigation, and cannot make a reasonable estimate of potential liability, if any, at this time. PrimeLending continues to cooperate with the investigation.

While the final outcome of litigation and claims exposures or of any Inquiries is inherently unpredictable, management is currently of the opinion that the outcome of pending and threatened litigation and Inquiries will not have a material effect on the Company's business, consolidated financial position, results of operations or cash flows

as a whole. However, in the event of unexpected future developments, it is reasonably possible that an adverse outcome in any of the matters discussed above could be material to the Company's business, consolidated financial position, results of operations or cash flows for any particular reporting period of occurrence.

Other Contingencies

The mortgage origination segment may be responsible for errors or omissions relating to its representations and warranties that each loan sold meets certain requirements, including representations as to underwriting standards and the validity of certain borrower representations in connection with the loan. If determined to be at fault, the mortgage origination segment either repurchases the affected loan from the investor or reimburses the investor's losses. The mortgage origination segment has established an indemnification liability reserve for such probable losses.

Generally, the mortgage origination segment first becomes aware that an investor believes a loss has been incurred on a sold loan when it receives a written request from the investor to repurchase the loan or reimburse the investor's losses. Upon completing its review of the investor's request, the mortgage origination segment establishes a specific claims reserve for the loan if it concludes its obligation to the investor is both probable and reasonably estimable.

Table of Contents

An additional reserve has been established for probable investor losses that may have been incurred, but not yet reported to the mortgage origination segment based upon a reasonable estimate of such losses. Factors considered in the calculation of this reserve include, but are not limited to, the total volume of loans sold exclusive of specific investor requests, actual investor claim settlements and the severity of estimated losses resulting from future claims, and the mortgage origination segment's history of successfully curing defects identified in investor claim requests. While the mortgage origination segment's sales contracts typically include borrower early payment default repurchase provisions, these provisions have not been a primary driver of investor claims to date, and therefore, are not a primary factor considered in the calculation of this reserve.

At September 30, 2015 and December 31, 2014, the mortgage origination segment's indemnification liability reserve totaled \$16.1 million and \$17.6 million, respectively. The provision for indemnification losses was \$1.1 million and \$0.9 million during the three months ended September 30, 2015 and 2014, respectively, and \$3.1 million and \$2.3 million during the nine months ended September 30, 2015 and 2014, respectively.

The following tables provide for a rollforward of claims activity for loans put-back to the mortgage origination segment based upon an alleged breach of a representation or warranty with respect to a loan sold and related indemnification liability reserve activity (in thousands).

Representation and Warranty Specific Claims Activity - Origination Loan Balance				
	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2015	2014	2015	2014
Balance, beginning of period	\$ 72,564	\$ 53,123	\$ 53,906	\$ 51,912
Claims made	9,787	13,336	61,768	35,179
Claims resolved with no payment	(12,178)	(8,329)	(34,877)	(17,660)
Repurchases	(4,333)	(3,173)	(12,647)	(12,411)
Indemnification payments	(11,921)	(1,168)	(14,231)	(3,231)
Balance, end of period	\$ 53,919	\$ 53,789	\$ 53,919	\$ 53,789

Indemnification Liability Reserve Activity				
	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2015	2014	2015	2014
Balance, beginning of period	\$ 17,279	\$ 19,688	\$ 17,619	\$ 21,121
Additions for new sales	1,092	883	3,086	2,295
Repurchases	(408)	(388)	(1,206)	(1,416)
Early payment defaults	(5)	(24)	(44)	(101)
Indemnification payments	(1,831)	(542)	(2,872)	(1,654)
Change in estimate	(18)	(508)	(474)	(1,136)
Balance, end of period	\$ 16,109	\$ 19,109	\$ 16,109	\$ 19,109

	September 30, 2015	December 31, 2014
Reserve for Indemnification Liability:		
Specific claims	\$ 5,239	\$ 7,912
Incurred but not reported claims	10,870	9,707
Total	\$ 16,109	\$ 17,619

Although management considers the total indemnification liability reserve to be appropriate, there may be changes in the reserve over time to address incurred losses, due to unanticipated adverse changes in the economy and historical loss patterns, discrete events adversely affecting specific borrowers or industries, and/or actions taken by institutions or investors. The impact of such matters is considered in the reserving process when probable and estimable.

In connection with the FNB Transaction, the Bank entered into two loss-share agreements with the FDIC that collectively cover \$1.2 billion of loans and OREO acquired in the FNB Transaction. Pursuant to the loss-share agreements, the FDIC has agreed to reimburse the Bank the following amounts with respect to the covered assets: (i) 80% of net losses on the first \$240.4 million of net losses incurred; (ii) 0% of net losses in excess of \$240.4 million

Table of Contents

up to and including \$365.7 million of net losses incurred; and (iii) 80% of net losses in excess of \$365.7 million of net losses incurred. Net losses are defined as book value losses plus certain defined expenses incurred in the resolution of assets, less subsequent recoveries. Under the loss-share agreement for commercial assets, the amount of subsequent recoveries that are reimbursable to the FDIC for a particular asset is limited to book value losses and expenses actually billed plus any book value charge-offs incurred prior to the Bank Closing Date. There is no limit on the amount of subsequent recoveries reimbursable to the FDIC under the loss-share agreement for single family residential assets. The loss-share agreements for commercial and single family residential assets are in effect for 5 years and 10 years, respectively, from the Bank Closing Date and the loss recovery provisions to the FDIC are in effect for 8 years and 10 years, respectively, from the Bank Closing Date. In accordance with the loss-share agreements, the Bank may be required to make a “true-up” payment to the FDIC approximately 10 years following the Bank Closing Date if the FDIC’s initial estimate of losses on covered assets is greater than the actual realized losses. The “true-up” payment is calculated using a defined formula set forth in the P&A Agreement. As of September 30, 2015, the Bank estimated that the sum of covered losses and reimbursable expenses subject to the loss-share agreements will exceed \$240.4 million, but will not exceed \$365.7 million. Unless actual plus projected covered losses and reimbursable expenses exceed \$365.7 million, the Bank will not record additional amounts to the FDIC Indemnification Asset. As of September 30, 2015, the Bank had billed \$123.7 million of covered net losses to the FDIC, of which 80%, or \$98.9 million, were reimbursable under the loss-share agreements. As of September 30, 2015, the Bank had received aggregate reimbursements of \$98.9 million from the FDIC.

14. Financial Instruments with Off-Balance Sheet Risk

The Bank is party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit and standby letters of credit that involve varying degrees of credit and interest rate risk in excess of the amount recognized in the consolidated financial statements. Such financial instruments are recorded in the consolidated financial statements when they are funded or related fees are incurred or received. The contract amounts of those instruments reflect the extent of involvement (and therefore the exposure to credit loss) the Bank has in particular classes of financial instruments.

Commitments to extend credit are agreements to lend to a customer provided that the terms established in the contract are met. Commitments generally have fixed expiration dates and may require payment of fees. Because some commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. Standby letters of credit are conditional commitments issued to guarantee the performance of a customer to a third party. These letters of credit are primarily issued to support public and private borrowing arrangements. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan commitments to customers.

In the aggregate, the Bank had outstanding unused commitments to extend credit of \$1.6 billion at September 30, 2015 and outstanding financial and performance standby letters of credit of \$45.5 million at September 30, 2015.

The Bank uses the same credit policies in making commitments and standby letters of credit as it does for on-balance sheet instruments. The amount of collateral obtained, if deemed necessary, in these transactions is based on management's credit evaluation of the borrower. Collateral held varies but may include real estate, accounts receivable, marketable securities, interest-bearing deposit accounts, inventory, and property, plant and equipment.

In the normal course of business, the Hilltop Broker-Dealers execute, settle, and finance various securities transactions that may expose the Hilltop Broker-Dealers to off-balance sheet risk in the event that a customer or counterparty does not fulfill its contractual obligations. Examples of such transactions include the sale of securities not yet purchased by customers or for the accounts of the Hilltop Broker-Dealers, use of derivatives to support certain non-profit housing organization clients, clearing agreements between the Hilltop Broker-Dealers and various clearinghouses and broker-dealers, secured financing arrangements that involve pledged securities, and when-issued underwriting and purchase commitments.

Table of Contents

15. Stock-Based Compensation

Pursuant to the Hilltop Holdings Inc. 2012 Equity Incentive Plan (the “2012 Plan”), the Company may grant nonqualified stock options, stock appreciation rights, restricted stock, restricted stock units, performance awards, dividend equivalent rights and other awards to employees of the Company, its subsidiaries and outside directors of the Company. In the aggregate, 4,000,000 shares of common stock may be delivered pursuant to awards granted under the 2012 Plan. At September 30, 2015, 3,947,579 shares of common stock remained available for issuance pursuant to the 2012 Plan, including shares that may be delivered pursuant to outstanding awards.

During the nine months ended September 30, 2015, the Compensation Committee of the Board of Directors of the Company awarded certain executives and key employees an aggregate of 459,975 restricted stock units (“RSUs”) pursuant to the 2012 Plan, of which 449,110 remained outstanding at September 30, 2015. At September 30, 2015, 353,272 of these RSUs were subject to time-based vesting conditions and generally provided for a cliff vest on the third anniversary of the grant date, and 95,838 of these RSUs provided for vesting based upon the achievement of certain performance goals over a three-year period. The RSUs awarded during the nine months ended September 30, 2015 are subject to service conditions set forth in the award agreements, with associated costs recognized on a straight-line basis over the respective vesting periods. The weighted average grant date fair value related to these RSUs was \$19.51 per share. At September 30, 2015, unrecognized compensation expense related to the RSUs awarded during the nine months ended September 30, 2015 was \$7.4 million, which will be amortized through August 2018. The RSUs are not transferable, and the shares of common stock issuable upon conversion of vested RSUs are generally subject to transfer restrictions for a period of one year following conversion, subject to certain exceptions. In addition, the applicable RSU award agreements provide for accelerated vesting under certain conditions.

Prior to the completion of the SWS Merger and in accordance with the SWS merger agreement, on August 20, 2014, SWS granted restricted shares of SWS common stock to certain of its executive officers and key employees. On January 1, 2015, the effective time of the SWS Merger, these restricted shares of SWS common stock converted into the right to receive an aggregate of 62,994 restricted shares of Hilltop common stock (“Restricted Stock Awards”) based on the value of the merger consideration, and their vesting schedule did not accelerate. At September 30, 2015, 12,118 Restricted Stock Awards remained outstanding. Such Restricted Stock Awards generally vest in three equal annual installments beginning on August 20, 2015, and are subject to service conditions set forth in the award agreements, with associated costs recognized on a straight-line basis over the respective vesting periods. The fair value of these Restricted Stock Awards at the time of conversion was \$19.95 per share. At September 30, 2015, unrecognized compensation expense related to these Restricted Stock Awards was \$0.2 million, which will be amortized through August 2017. The award agreements governing these Restricted Stock Awards provide for accelerated vesting under certain conditions.

During 2014 and 2013, the Compensation Committee of the Board of Directors of the Company awarded certain executives and key employees an aggregate of 444,175 RSUs and 471,000 Restricted Stock Awards, respectively, pursuant to the 2012 Plan, of which 411,325 and 444,000, respectively, remained outstanding at September 30, 2015. At September 30, 2015, unrecognized compensation expense related to these awards was \$6.1 million, which will be amortized through December 2017. The award agreements governing these awards provide for accelerated vesting

under certain conditions.

Compensation expense related to the plans was \$2.0 million and \$1.3 million during the three months ended September 30, 2015 and 2014, respectively, and \$6.2 million and \$3.3 million during the nine months ended September 30, 2015 and 2014, respectively.

During the nine months ended September 30, 2015 and 2014, Hilltop granted 8,219 and 7,227 shares of common stock to certain non-employee members of the Company's Board of Directors for services rendered to the Company pursuant to the 2012 Plan.

Table of Contents

16. Regulatory Matters

Banking and Hilltop

The Bank and Hilltop are subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory — and possibly additional discretionary — actions by regulators that, if undertaken, could have a direct, material effect on the consolidated financial statements. The regulations require the Bank and Hilltop to meet specific capital adequacy guidelines that involve quantitative measures of assets, liabilities and certain off-balance sheet items as calculated under regulatory accounting practices. The capital classifications are also subject to qualitative judgments by the regulators about components, risk weightings and other factors.

On January 1, 2015, the new comprehensive capital framework (“Basel III”) for U.S. banking organizations became effective for the Bank and Hilltop for reporting periods beginning after January 1, 2015 (subject to a phase-in period through January 2019). Under Basel III, total capital consists of two tiers of capital, Tier 1 and Tier 2. Tier 1 capital is further composed of common equity Tier 1 capital and additional Tier 1 capital. Total capital is the sum of Tier 1 capital and Tier 2 capital.

Quantitative measures established by regulation to ensure capital adequacy require the companies to maintain minimum amounts and ratios (set forth in the following table) of Tier 1 capital (as defined in the regulations) to total average assets (as defined), and minimum ratios of common equity Tier 1, Tier 1 and total capital (as defined) to risk-weighted assets (as defined).

In addition, under the final rules, bank holding companies with less than \$15 billion in assets as of December 31, 2009 are allowed to continue to include junior subordinated debentures in Tier 1 capital, subject to certain restrictions. However, if an institution grows to above \$15 billion in assets as a result of an acquisition, or organically grows to above \$15 billion in assets and then makes an acquisition, the combined trust preferred issuances must be phased out of Tier 1 and into Tier 2 capital (75% in 2015 and 100% in 2016). All of the debentures issued to the Trusts, less the common stock of the Trusts, qualified as Tier 1 capital as of September 30, 2015, under guidance issued by the Board of Governors of the Federal Reserve System.

Table of Contents

The following table shows the Bank's and Hilltop's consolidated actual capital amounts and ratios compared to the regulatory minimum capital requirements and the Bank's regulatory minimum capital requirements needed to qualify as a "well-capitalized" institution in accordance with Basel III as measured at September 30, 2015 and applicable regulatory guidelines at December 31, 2014 (dollars in thousands).

	Actual		Minimum Capital Requirements			To Be Well Capitalized Minimum Capital Requirements		
	Amount	Ratio	Amount	Ratio		Amount	Ratio	
September 30, 2015								
Tier 1 capital (to average assets):								
Bank	\$ 1,035,196	12.77 %	\$ 324,201	4.0 %		\$ 405,252	5.0 %	
Hilltop	1,481,139	12.01 %	493,154	4.0 %		N/A	N/A	
Common equity Tier 1 capital (to risk-weighted assets):								
Bank	1,035,196	17.36 %	268,374	4.5 %		387,652	6.5 %	
Hilltop	1,439,487	18.36 %	352,803	4.5 %		N/A	N/A	
Tier 1 capital (to risk-weighted assets):								
Bank	1,035,196	17.36 %	357,832	6.0 %		477,110	8.0 %	
Hilltop	1,481,139	18.89 %	470,405	6.0 %		N/A	N/A	
Total capital (to risk-weighted assets):								
Bank	1,081,368	18.13 %	477,110	8.0 %		596,387	10.0 %	
Hilltop	1,511,992	19.29 %	627,206	8.0 %		N/A	N/A	
December 31, 2014								
Tier 1 capital (to average assets):								
Bank	\$ 845,656	10.31 %	\$ 328,025	4.0 %		\$ 410,031	5.0 %	
Hilltop	1,231,724	14.17 %	347,619	4.0 %		N/A	N/A	
Tier 1 capital (to risk-weighted assets):								
Bank	845,656	13.74 %	246,099	4.0 %		369,148	6.0 %	
Hilltop	1,231,724	19.02 %	259,078	4.0 %		N/A	N/A	
Total capital (to risk-weighted assets):								
Bank	888,744	14.45 %	492,198	8.0 %		615,247	10.0 %	
Hilltop	1,275,023	19.69 %	518,157	8.0 %		N/A	N/A	

To be considered "adequately capitalized" (as defined) under regulatory requirements, the Bank must maintain minimum Tier 1 capital to total average assets of 4%, common equity Tier 1 capital to risk-weighted assets of 4.5%, Tier 1 capital to risk-weighted assets ratios of 6% (an increase from 4% prior to January 1, 2015), and a total capital to risk-weighted assets ratio of 8%. Based on the actual capital amounts and ratios shown in the previous table, the Bank's ratios place it in the "well capitalized" (as defined) capital category under regulatory requirements.

Broker-Dealer

Pursuant to the net capital requirements of the Securities Exchange Act of 1934, as amended (the “Exchange Act”), FSC and Hilltop Securities have each elected to determine their respective net capital requirements using the alternative method. Accordingly, FSC and Hilltop Securities are required to maintain minimum net capital, as defined in Rule 15c3-1 promulgated under the Exchange Act, equal to the greater of \$250,000 and 1,000,000, respectively, or 2% of aggregate debit balances, as defined in Rule 15c3-3 promulgated under the Exchange Act. Additionally, the net capital rule of the NYSE provides that equity capital may not be withdrawn or cash dividends paid if resulting net capital would be less than 5% of the aggregate debit items. HTS Independent Network follows the primary (aggregate indebtedness) method, as defined in Rule 15c3-1 promulgated under the Exchange Act, which requires the maintenance of the larger of minimum net capital of \$250,000 or 1/15 of aggregate indebtedness.

Table of Contents

At September 30, 2015, the net capital position of each of the Hilltop Broker-Dealers was as follows (in thousands).

	FSC	Hilltop Securities	HTS Independent Network
Net capital	\$ 70,575	\$ 151,579	\$ 1,398
Less required net capital	4,923	7,273	250
Excess net capital	\$ 65,652	\$ 144,306	\$ 1,148
Net capital as a percentage of aggregate debit items	28.7 %	41.7 %	
Net capital in excess of 5% aggregate debit items	\$ 58,267	\$ 133,395	

Under certain conditions, the Hilltop Broker-Dealers may be required to segregate cash and securities in a special reserve account for the benefit of customers under Rule 15c3-3 promulgated under the Exchange Act. Assets segregated under the provisions of the Exchange Act are not available for general corporate purposes. At September 30, 2015 and December 31, 2014, the Hilltop Broker-Dealers held cash of \$227.3 million and \$76.0 million, respectively, segregated in special reserve bank accounts for the benefit of customers. Additionally, the Hilltop Broker-Dealers had \$1.0 million in cash in special reserve accounts for the benefit of proprietary accounts of introducing broker-dealers at September 30, 2015. The fair values of these segregated assets included in special reserve accounts were determined using Level 1 inputs.

Mortgage Origination

As a mortgage originator, PrimeLending is subject to minimum net worth requirements established by the U.S. Department of Housing and Urban Development (“HUD”) and the GNMA. On an annual basis, PrimeLending submits audited financial statements to HUD and GNMA documenting PrimeLending’s compliance with its minimum net worth requirements. In addition, PrimeLending monitors compliance on an ongoing basis and, as of September 30, 2015, PrimeLending’s net worth exceeded the amounts required by both HUD and GNMA.

Insurance

The statutory financial statements of the Company's insurance subsidiaries, which are domiciled in the State of Texas, are presented on the basis of accounting practices prescribed or permitted by the Texas Department of Insurance. Texas has adopted the statutory accounting practices of the National Association of Insurance Commissioners (“NAIC”) as the basis of its statutory accounting practices with certain differences that are not significant to the insurance company subsidiaries’ statutory equity.

A summary of statutory capital and surplus and statutory net income (loss) of each insurance subsidiary is as follows (in thousands).

	September 30, 2015	December 31, 2014
Capital and surplus:		
National Lloyds Insurance Company	\$ 117,912	\$ 113,023
American Summit Insurance Company	29,736	28,964

	Three Months Ended September 30, 2015		Nine Months Ended September 30, 2015	
	2015	2014	2015	2014
Statutory net income (loss):				
National Lloyds Insurance Company	\$ 7,901	\$ 6,106	\$ 3,826	\$ 7,428
American Summit Insurance Company	76	(418)	643	958

Regulations of the Texas Department of Insurance require insurance companies to maintain minimum levels of statutory surplus to ensure their ability to meet their obligations to policyholders. At September 30, 2015, the Company's insurance subsidiaries had statutory surplus in excess of the minimum required.

Table of Contents

The NAIC has adopted a risk based capital (“RBC”) formula for insurance companies that establishes minimum capital requirements indicating various levels of available regulatory action on an annual basis relating to insurance risk, asset credit risk, interest rate risk and business risk. The RBC formula is used by the NAIC and certain state insurance regulators as an early warning tool to identify companies that require additional scrutiny or regulatory action. At September 30, 2015, the Company's insurance subsidiaries' RBC ratio exceeded the level at which regulatory action would be required.

17. Stockholders' Equity

Stock Repurchase Program

During the second quarter of 2015, the Company's Board of Directors approved a stock repurchase program under which it authorized the Company to repurchase, in the aggregate, up to \$30.0 million of its outstanding common stock. Under the stock repurchase program authorized, the Company may repurchase shares in open-market purchases or through privately negotiated transactions as permitted under Rule 10b-18 promulgated under the Exchange Act. As of September 30, 2015, the Company had repurchased an aggregate of \$30.0 million of its outstanding common stock, and does not intend to make any future purchases of its common stock under this program. The extent to which the Company repurchased its shares and the timing of such repurchases depended upon market conditions and other corporate considerations, as determined by Hilltop's management team. The purchases were funded from available cash balances.

During the three and nine months ended September 30, 2015, the Company paid \$13.0 million and \$30.0 million, respectively, to repurchase and retire an aggregate of 1,390,977 shares of common stock at an average price of \$21.56 per share. These retired shares were returned to the Company's pool of authorized but unissued shares of common stock. The Company uses the par value method of accounting for its stock repurchases, whereby the par value of the shares is deducted from common stock. The excess of the cost of shares acquired over the par value is allocated to additional paid-in capital based on an estimated average sales price per issued share with the excess amounts charged to retained earnings.

18. Derivative Financial Instruments

The Company uses various derivative financial instruments to mitigate interest rate risk. The Bank's interest rate risk management strategy involves effectively managing the re-pricing characteristics of certain assets and liabilities to mitigate potential adverse impacts from changes in interest rates on the net interest margin. PrimeLending has interest rate risk relative to interest rate lock commitments (“IRLCs”) and its inventory of mortgage loans held for sale. PrimeLending is exposed to such interest rate risk from the time an IRLC is made to an applicant to the time the related mortgage loan is sold. To mitigate interest rate risk, PrimeLending executes forward commitments to sell

mortgage-backed securities (“MBSs”). Additionally, PrimeLending has interest rate risk relative to its MSR asset. During the three months ended September 30, 2014, PrimeLending began using derivative instruments, including interest rate swaps and swaptions, to hedge this risk. The Hilltop Broker-Dealers use forward commitments to both purchase and sell MBSs to facilitate customer transactions and as a means to hedge related exposure to interest rate risk in certain inventory positions.

Non-Hedging Derivative Instruments and the Fair Value Option

As discussed in Note 3 to the consolidated financial statements, the Company has elected to measure substantially all mortgage loans held for sale at fair value under the provisions of the Fair Value Option. The election provides the opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without applying complex hedge accounting provisions. The fair values of PrimeLending’s IRLCs, forward commitments, and interest rate swaps and swaptions are recorded in other assets or other liabilities, as appropriate, and changes in the fair values of these derivative instruments are recorded as a component of net gains from sale of loans and other mortgage production income. The fair value of PrimeLending’s derivative instruments decreased \$15.5 million during the three months ended September 30, 2015, compared with an increase of \$0.2 million during the same period in 2014, and an increase of \$17.8 million during the nine months ended September 30, 2015, compared with a decrease of \$5.0 million during the same period in 2014. Changes in fair value are attributable to changes in the volume of IRLCs, mortgage loans held for sale, commitments to purchase and sell MBSs and MSR assets, and changes in market interest rates. Changes in market interest rates also conversely affect the value of PrimeLending’s mortgage loans held for sale and its MSR asset, which are measured at fair value under the Fair Value Option. The effect of the change in market

Table of Contents

interest rates on PrimeLending's loans held for sale and MSR asset is discussed in Note 3 to the consolidated financial statements. The fair values of the Hilltop Broker-Dealers' derivative instruments are recorded in other assets or other liabilities, as appropriate, and the fair values of the Hilltop Broker-Dealers' derivatives increased \$12.7 million and \$5.3 million during the three months ended September 30, 2015 and 2014, respectively, and increased \$30.5 million and \$11.4 million during the nine months ended September 30, 2015 and 2014, respectively. The changes in fair value were recorded as a component of other noninterest income.

Derivative positions are presented in the following table (in thousands).

	September 30, 2015		December 31, 2014	
	Notional Amount	Estimated Fair Value	Notional Amount	Estimated Fair Value
Derivative instruments:				
IRLCs	\$ 1,135,528	\$ 34,539	\$ 621,216	\$ 17,057
Commitments to purchase MBSs	3,518,621	23,980	510,553	6,040
Commitments to sell MBSs	5,381,861	(24,678)	1,968,768	(12,566)
Interest rate swaps and swaptions	275,566	1,406	83,000	425

PrimeLending had cash collateral advances totaling \$8.4 million and \$6.6 million to offset net liability derivative positions on its commitments to sell MBSs at September 30, 2015 and December 31, 2014, respectively. In addition, PrimeLending advanced cash collateral totaling \$4.0 million and \$3.3 million in initial margin on its interest rate swaps and swaptions at September 30, 2015 and December 31, 2014, respectively. These amounts are included in other assets within the consolidated balance sheets.

19. Balance Sheet Offsetting

Certain financial instruments, including resale and repurchase agreements, securities lending arrangements and derivatives, may be eligible for offset in the consolidated balance sheets and/or subject to master netting arrangements or similar agreements. The following tables present the assets and liabilities subject to enforceable master netting arrangements, repurchase agreements, or similar agreements with offsetting rights (in thousands).

Secured Borrowing Arrangements

Secured Borrowings (Repurchase Agreements) — The Company participates in transactions involving securities sold under repurchase agreements, which are secured borrowings and generally mature within one to thirty days from the transaction date. Securities sold under repurchase agreements are reflected at the amount of cash received in connection with the transactions. The Company may be required to provide additional collateral based on the fair value of the underlying securities, which is monitored on a daily basis.

Securities Lending Activities — The Company's securities lending activities includes lending securities for other broker-dealers, lending institutions and its own clearing and retail operations. These activities involve lending securities to other broker-dealers to cover short sales, to complete transactions in which there has been a failure to deliver securities by the required settlement date and as a conduit for financing activities.

When lending securities, the Company receives cash or similar collateral and generally pays interest (based on the amount of cash deposited) to the other party to the transaction. Securities lending transactions are executed pursuant to written agreements with counterparties that generally require securities loaned to be marked-to-market on a daily basis. The Company receives collateral in the form of cash in an amount generally in excess of the fair value of securities loaned. The Company monitors the fair value of securities loaned on a daily basis, with additional collateral obtained or refunded, as necessary. Collateral adjustments are made on a daily basis through the facilities of various clearinghouses. The Company is a principal in these securities lending transactions and is liable for losses in the event of a failure of any other party to honor its contractual obligation. Management sets credit limits with each counterparty and reviews these limits regularly to monitor the risk level with each counterparty. The Company is subject to credit risk through its securities lending activities if securities prices decline rapidly because the value of the Company's collateral could fall below the amount of the indebtedness it secures. In rapidly appreciating markets, credit risk increases due to short positions. The Company's securities lending business subjects the Company to credit risk if a counterparty fails to perform or if collateral securing its obligations is insufficient. In securities transactions, the Company is subject to credit risk during the period between the execution of a trade and the settlement by the customer.

Table of Contents

The following tables present the remaining contractual maturities of repurchase agreement and securities lending transactions accounted for as secured borrowings (in thousands). The Company had no repurchase-to-maturity transactions outstanding at September 30, 2015 or December 31, 2014.

	Remaining Contractual Maturities				
	Overnight and Continuous	Up to 30 Days	30-90 Days	Greater Than 90 Days	Total

	\$ 2,045,604	\$ 179,042

Table of Contents

21. Reserve for Losses and Loss Adjustment Expenses

A rollforward of NLC's reserve for unpaid losses and loss adjustment expenses ("LAE"), as included in other liabilities within the consolidated balance sheets, is as follows (in thousands).

	Nine Months Ended September 30,	
	2015	2014
Balance, beginning of period	\$ 29,716	\$ 27,468
Less reinsurance recoverables	(4,315)	(4,508)
Net balance, beginning of period	25,401	22,960
Incurred related to:		
Current year	71,652	70,349
Prior years	5,784	5,892
Total incurred	77,436	76,241
Payments related to:		
Current year	(58,523)	(55,701)
Prior years	(15,678)	(14,338)
Total payments	(74,201)	(70,039)
Net balance, end of period	28,636	29,162
Plus reinsurance recoverables	14,264	3,298
Balance, end of period	\$ 42,900	\$ 32,460

The increase in NLC's reserves at September 30, 2015 as compared with September 30, 2014 of \$10.4 million is primarily due to increased reserves attributable to an increase in frequency and severity of severe weather events in our geographic coverage area as well as the prior period adverse development and additional reinsurance recoverables associated with the increase in reserves. The prior period adverse development of \$5.8 million during the nine months ended September 30, 2015 was primarily related to litigation emerging from a series of hail storms within the 2012 through 2014 accident years.

22. Reinsurance Activity

NLC limits the maximum net loss that can arise from large risks or risks in concentrated areas of exposure by reinsuring (ceding) certain levels of risk. Substantial amounts of business are ceded, and these reinsurance contracts do not relieve NLC from its obligations to policyholders. Such reinsurance includes quota share, excess of loss,

catastrophe, and other forms of reinsurance on essentially all property and casualty lines of insurance. Net insurance premiums earned, losses and LAE and policy acquisition and other underwriting expenses are reported net of the amounts related to reinsurance ceded to other companies. Amounts recoverable from reinsurers related to the portions of the liability for losses and LAE and unearned insurance premiums ceded to them are reported as assets. Failure of reinsurers to honor their obligations could result in losses to NLC; consequently, allowances are established for amounts deemed uncollectible as NLC evaluates the financial condition of its reinsurers and monitors concentrations of credit risk arising from similar geographic regions, activities, or economic characteristics of the reinsurers to minimize its exposure to significant losses from reinsurer insolvencies. At September 30, 2015, reinsurance receivables had a carrying value of \$18.8 million, which is included in other assets within the consolidated balance sheet. There was no allowance for uncollectible accounts at September 30, 2015, based on NLC's quality requirements.

Table of Contents

The effects of reinsurance on premiums written and earned are summarized as follows (in thousands).

	Three Months Ended September 30,				Nine Months Ended September 30,			
	2015 Written	2015 Earned	2014 Written	2014 Earned	2015 Written	2015 Earned	2014 Written	2014 Earned
Premiums from direct business	\$ 41,319	\$ 42,608	\$ 42,586	\$ 43,890	\$ 130,632	\$ 127,218	\$ 134,355	\$ 130,183
Reinsurance assumed	2,786	2,627	2,531	2,338	8,243	7,617	7,441	6,536
Reinsurance ceded	(4,316)	(4,039)	(4,604)	(4,407)	(13,758)	(13,754)	(14,085)	(13,802)
Net premiums	\$ 39,789	\$ 41,196	\$ 40,513	\$ 41,821	\$ 125,117	\$ 121,081	\$ 127,711	\$ 122,917

The effects of reinsurance on incurred losses are as follows (in thousands).

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014
Loss and LAE incurred	\$ 20,785	\$ 22,834	\$ 98,382	\$ 77,041
Reinsurance recoverables	(3,450)	(205)	(20,946)	(800)
Net loss and LAE incurred	\$ 17,335	\$ 22,629	\$ 77,436	\$ 76,241

Multi-line excess of loss coverage

In addition to the catastrophe reinsurance noted below, both NLIC and ASIC participate in an excess of loss program placed with various reinsurers. This program is limited to each risk with respect to property and liability in the amount of \$500,000 for each of NLIC and ASIC. Each of NLIC and ASIC retain \$500,000 in this program.

Catastrophic coverage

At September 30, 2015, NLC had catastrophic excess of loss reinsurance coverage of losses per event in excess of \$8.0 million retention by NLIC and \$1.5 million retention by ASIC. ASIC maintained an underlying layer of coverage, providing \$6.5 million in excess of its \$1.5 million retention to bridge to the primary program. The

reinsurance for NLIC and ASIC in excess of \$8.0 million is comprised of four layers of protection: \$17.0 million in excess of \$8.0 million retention and/or loss; \$25.0 million in excess of \$25.0 million loss; \$25.0 million in excess of \$50.0 million loss and \$50.0 million in excess of \$75.0 million loss. NLIC and ASIC retain no participation in any of the layers, beyond the first \$8.0 million and \$1.5 million, respectively. At September 30, 2015, total retention for any one catastrophe that affects both NLIC and ASIC was limited to \$8.0 million in the aggregate.

Effective January 1, 2015, NLC renewed its underlying excess of loss contract that provides \$10.0 million aggregate coverage for sub-catastrophic events. NLC retains a 9% participation in this coverage.

Effective July 1, 2015, NLC renewed its catastrophic excess of loss reinsurance coverage for a two-year period. The reinsurance for NLIC and ASIC in excess of \$8.0 million continues in four layers, but the coverage provided in the third and fourth layers was realigned and the total coverage provided was reduced to \$125.0 million (\$140.0 million through June 30, 2015). The third and fourth layers of coverage provide \$25.0 million (\$50.0 million through June 30, 2015) in excess of \$50.0 million loss and \$50.0 million (\$40.0 million through June 30, 2015) in excess of \$75.0 million loss.

23. Segment and Related Information

The Company currently has four reportable business segments that are organized primarily by the core products offered to the segments' respective customers. These segments reflect the manner in which operations are managed and the criteria used by the Company's chief operating decision maker function to evaluate segment performance, develop strategy and allocate resources. The chief operating decision maker function consists of the President and Chief Executive Officer of the Company and the Chief Executive Officer of PlainsCapital. For the third quarter of 2015, the Company began presenting the preliminary bargain purchase gain associated with the SWS Merger, previously allocated to the banking and broker-dealer reportable business segments, within corporate to reflect the Company's internal evaluation of segment performance. This change is reflected in the segment operating results within noninterest income for the nine months ended September 30, 2015. Additionally, related amounts previously reported in the Company's

Table of Contents

Quarterly Reports on Form 10-Q for the quarters ended March 31, 2015 and June 30, 2015, respectively, within the notes to the consolidated financial statements, will be revised in future filings. This change had no impact on the Company's consolidated results of operations.

The banking segment includes the operations of the Bank and, since January 1, 2015, the operations of the former SWS FSB acquired in the SWS Merger. The broker-dealer segment includes the operations of First Southwest and, since January 1, 2015, the broker-dealer operations acquired in the SWS Merger. The mortgage origination segment is composed of PrimeLending, while the insurance segment is composed of NLC.

Corporate includes certain activities not allocated to specific business segments. These activities include holding company financing and investing activities, and management and administrative services to support the overall operations of the Company including, but not limited to, certain executive management, corporate relations, legal, finance and acquisition costs.

Balance sheet amounts not discussed previously and the elimination of intercompany transactions are included in "All Other and Eliminations." The following tables present certain information about reportable business segment revenues, operating results, goodwill and assets (in thousands).

24. Earnings per Common Share

Nonvested share-based payment awards that contain nonforfeitable rights to dividends or dividend equivalents are participating securities and are included in the computation of earnings per share pursuant to the two-class method prescribed by the Earnings Per Share Topic of the ASC. The two-class method is an earnings allocation formula that determines earnings per share for each class of common stock and participating security according to dividends declared (or accumulated) and participation rights in undistributed earnings. Restricted Stock Awards are the only instruments issued by Hilltop which qualify as participating securities.

Table of Contents

Net earnings, less any preferred dividends accumulated for the period (whether or not declared), is allocated between the common stock and participating securities pursuant to the two-class method. Basic earnings per common share is computed by dividing net earnings available to common stockholders by the weighted average number of common shares outstanding during the period, excluding participating nonvested restricted shares.

Diluted earnings per common share is computed in a similar manner, except that first the denominator is increased to include the number of additional common shares that would have been outstanding if potentially dilutive common shares, excluding the participating securities, were issued using the treasury stock method. During the three and nine months ended September 30, 2015 and 2014, stock options and RSUs are the only potentially dilutive non-participating instruments issued by Hilltop. Next, the Company determines and includes in the diluted earnings per common share calculation the more dilutive effect of the participating securities using the treasury stock method or the two-class method. Undistributed losses are not allocated to the nonvested share-based payment awards (the participating securities) under the two-class method as the holders are not contractually obligated to share in the losses of the Company.

The following table presents the computation of basic and diluted earnings per common share (in thousands, except per share data).

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014
Basic earnings per share:				
Income applicable to Hilltop common stockholders	\$ 46,894	\$ 23,386	\$ 188,392	\$ 74,231
Less: income applicable to participating shares	(216)	(121)	(861)	(384)
Net earnings available to Hilltop common stockholders	\$ 46,678	\$ 23,265	\$ 187,531	\$ 73,847

Basic earnings per common share	\$ 0.47	\$ 0.26	\$ 1.89	\$ 0.82
Diluted earnings per share:				
Income applicable to Hilltop common stockholders	\$ 46,894	\$ 23,386	\$ 188,392	\$ 74,231
Weighted average shares outstanding - basic	98,676	89,711	99,297	89,709
Effect of potentially dilutive securities	880	847	894	861
Weighted average shares outstanding - diluted	99,556	90,558	100,191	90,570
Diluted earnings per common share	\$ 0.47	\$ 0.26	\$ 1.88	\$ 0.82

25. Recently Issued Accounting Standards

In September 2015, FASB issued Accounting Standards Update (“ASU”) 2015-16 as part of its initiative to reduce complexity in accounting standards and eliminate the requirement to restate prior period financial statements for measurement period adjustments following a business combination. The amendment requires that an acquirer recognize adjustments to provisional amounts that are identified during the measurement period in the reporting period in which the adjustment amounts are determined. The prior period impact of the adjustment should be either presented separately on the face of the income statement or disclosed in the notes. The amendment is effective for annual periods and interim reporting periods within those annual periods, beginning after December 15, 2015. Early adoption is permitted. Adoption of the amendment is not expected to have a significant effect on the Company’s consolidated financial statements.

In June 2015, FASB issued ASU 2015-10 to clarify the codification, correct unintended application of guidance, eliminate inconsistencies, and to improve the codification’s presentation of guidance for a wide range of topics in the codification. Transition guidance varies based on the amendments included. The amendments that require transition guidance are effective for annual periods, and interim periods within those fiscal periods, beginning after December 15, 2015. Early adoption is permitted, including adoption in an interim period. All other amendments will be effective upon the issuance. Adoption of the amendment is not expected to have a significant effect on the Company’s consolidated financial statements. However, the Company has adopted the amendment related to a clarification of the disclosure requirements for nonrecurring fair value measurements made during the period.

Table of Contents

In May 2015, the FASB issued ASU 2015-09 requiring enhanced disclosures for insurers relating to short-duration insurance contract claims and the unpaid claims liability rollforward for long and short-duration contracts. The amendment is effective for annual periods beginning after December 15, 2015 and interim reporting periods thereafter. Early adoption is permitted. Adoption of the amendment is not expected to have a significant effect on the Company's consolidated financial statements.

In April 2015, the FASB issued ASU 2015-03 to simplify presentation of debt issuance costs to require that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. The recognition and measurement guidance for debt issuance costs is not affected by this amendment. The amendment is effective for annual periods, and interim reporting periods within those annual periods, beginning after December 15, 2015 using the retrospective method of adoption. As permitted within the amendment, the Company elected to early adopt the provisions of this amendment beginning with the three months ended June 30, 2015. Adoption of the amendment resulted in unamortized debt issuance costs of \$1.9 million in connection with Hilltop's issuance of the 5% senior notes due 2025 on April 9, 2015 being presented in the consolidated balance sheet at June 30, 2015 as a reduction from the \$150.0 million aggregate principal amount. During the three and nine months ended September 30, 2015, debt issuance costs of \$33 thousand and \$0.1 million, respectively, were amortized and included in interest expense.

In February 2015, the FASB issued ASU 2015-02 to modify the analysis that companies must perform in order to determine whether a legal entity should be consolidated. ASU 2015-02 affects reporting entities that are required to evaluate whether they should consolidate certain legal entities. All legal entities are subject to reevaluation under the revised consolidation model. Specifically, the amendments: (i) modify the evaluation of whether limited partnerships and similar legal entities are variable interest entities ("VIEs") or voting interest entities, (ii) eliminate the presumption that a general partner should consolidate a limited partnership, (iii) affect the consolidated analysis of reporting entities that are involved with VIEs, particularly those that have fee arrangements and related party relationships and (iv) provide a scope exception for certain entities. The amendment is effective for annual periods, and interim reporting periods within those annual periods, beginning after December 15, 2015. Early adoption is permitted. Adoption of the amendment is not expected to have a significant effect on the Company's consolidated financial statements.

In January 2015, the FASB issued ASU 2015-01 as part of its initiative to reduce complexity in accounting standards. This amendment eliminates the concept of extraordinary items. The amendment is effective for annual periods, and interim reporting periods within those annual periods, beginning after December 15, 2015 and may be adopted using either a full retrospective transition method or a prospective transition method. Adoption of the amendment is not expected to have a significant effect on the Company's consolidated financial statements.

In May 2014, the FASB issued ASU No. 2014-09 which clarifies the principles for recognizing revenue from contracts with customers. The amendment outlines a single comprehensive model for entities to depict the transfer of goods or services to customers in amounts that reflect the payment to which a company expects to be entitled in

exchange for those goods or services. The amendment also requires additional disclosure about the nature, amount, timing and uncertainty of revenue and cash flows arising from customer contracts, including significant judgments and changes in judgments and assets recognized from costs incurred to obtain or fulfill a contract. The amendment was initially scheduled to be effective for the Company no earlier than the first quarter of 2017, however, in July 2015, the FASB voted to defer the effective date by one year. Therefore, the amendment is effective for annual periods, and interim reporting periods within those annual periods, beginning after December 15, 2017 and may be adopted using either a full retrospective transition method or a modified retrospective transition method. Early adoption is permitted no earlier than the first quarter of 2017. The Company is currently evaluating the provisions of the amendment and the impact on its future consolidated financial statements.

The following discussion should be read in conjunction with the consolidated historical financial statements and notes appearing elsewhere in this Quarterly Report on Form 10-Q (this “Quarterly Report”) and the financial information set forth in the tables herein.

These forward-looking statements are based on our beliefs, assumptions and expectations of our future performance taking into account all information currently available to us. These beliefs, assumptions and expectations are subject to risks and uncertainties and can change as a result of many possible events or factors, not all of which are known to us. If an event occurs, our business, business plan, financial condition, liquidity and results of operations may vary materially from those expressed in our forward-looking statements. Certain factors that could cause actual results to differ include, among others:

- risks associated with merger and acquisition integration, including the diversion of management time on acquisition-related issues and our ability to promptly and effectively integrate our businesses with those of SWS and achieve the synergies and value creation contemplated by the acquisition;
- our ability to estimate loan losses;
- changes in the default rate of our loans;
- risks associated with concentration in real estate related loans;
- our ability to obtain reimbursements for losses on acquired loans under loss-share agreements with the FDIC;

Table of Contents

- changes in general economic, market and business conditions in areas or markets where we compete;
- severe catastrophic events in Texas and other areas of the southern United States;
- changes in the interest rate environment;
- cost and availability of capital;
- changes in state and federal laws, regulations or policies affecting one or more of our business segments, including changes in regulatory fees, deposit insurance premiums, capital requirements and the Dodd-Frank Wall Street Reform and Consumer Protection Act (the “Dodd-Frank Act”);
- our ability to use net operating loss carryforwards to reduce future tax payments;
- approval of new, or changes in, accounting policies and practices;
- changes in key management;
- competition in our banking, broker-dealer, mortgage origination and insurance segments from other banks and financial institutions as well as investment banking and financial advisory firms, mortgage bankers, asset-based non-bank lenders, government agencies and insurance companies;
- failure of our insurance segment reinsurers to pay obligations under reinsurance contracts; and
- our ability to use excess cash in an effective manner, including the execution of successful acquisitions.

For a more detailed discussion of these and other factors that may affect our business and that could cause the actual results to differ materially from those anticipated in these forward-looking statements, see “Risk Factors” in Part I, Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2014 (“2014 Form 10-K”), which was filed with the Securities and Exchange Commission (the “SEC”) on February 26, 2015, this Item 2, “Management’s Discussion and Analysis of Financial Condition and Results of Operations,” Part II, Item 1A, “Risk Factors” herein and other filings we have made with the SEC. We caution that the foregoing list of factors is not exhaustive, and new factors may emerge, or changes to the foregoing factors may occur, that could impact our business. All subsequent written and oral forward-looking statements concerning our business attributable to us or any person acting on our behalf are expressly qualified in their entirety by the cautionary statements above. We do not undertake any obligation to update any forward-looking statement, whether written or oral, relating to the matters discussed in this Quarterly Report except to

the extent required by federal securities laws.

OVERVIEW

We are a financial holding company registered under the Bank Holding Company Act of 1956, as amended by the Gramm-Leach-Bliley Act of 1999. Our primary line of business is to provide business and consumer banking services from offices located throughout Texas through the Bank. We also provide an array of financial products and services through our broker-dealer, mortgage origination and insurance segments.

Effective January 1, 2015, in connection with our acquisition of SWS, we modified our organizational structure into three primary operating business units, PlainsCapital (banking and mortgage origination), Securities Holdings (broker-dealer) and NLC (insurance). The PlainsCapital unit continues to include the Bank and PrimeLending, while the new Securities Holdings unit includes First Southwest (transferred from the PlainsCapital unit effective January 1, 2015), and two entities acquired on January 1, 2015, Hilltop Securities and HTS Independent Network. The following includes additional details regarding the financial products and services provided by each of our primary operating business units.

PlainsCapital. PlainsCapital is a financial holding company, headquartered in Dallas, Texas, that provides, through its subsidiaries, traditional banking services, wealth and investment management and treasury management primarily in Texas and residential mortgage lending throughout the United States.

Table of Contents

Securities Holdings. Securities Holdings is a holding company, headquartered in Dallas, Texas, that provides, through its subsidiaries, investment banking and other related financial services, including municipal advisory, sales, trading and underwriting of taxable and tax-exempt fixed income securities, equity trading, clearing, securities lending, structured finance and retail brokerage services throughout the United States.

NLC. NLC is a property and casualty insurance holding company, headquartered in Waco, Texas, that provides, through its subsidiaries, fire and homeowners insurance to low value dwellings and manufactured homes primarily in Texas and other areas of the southern United States.

During the three and nine months ended September 30, 2015, our net income to common stockholders was \$46.9 million, or \$0.47 per diluted share, and \$188.4 million, or \$1.88 per diluted share, respectively. The consolidated operating results during the nine months ended September 30, 2015 include the recognition of a preliminary bargain purchase gain of \$81.3 million related to our acquisition of SWS.

We reported \$72.6 million and \$250.3 million of consolidated income before income taxes during the three and nine months ended September 30, 2015, respectively, including the following contributions from our four reportable operating segments.

- The banking segment contributed \$53.6 million and \$140.6 million of income before income taxes during the three and nine months ended September 30, 2015, respectively;
- The broker-dealer segment contributed \$1.5 million of income before income taxes during the three months ended September 30, 2015, and incurred losses before income taxes of \$3.9 million during the nine months ended September 30, 2015;
- The mortgage origination segment contributed \$12.1 million and \$43.3 million of income before income taxes during the three and nine months ended September 30, 2015, respectively; and
- The insurance segment contributed \$12.0 million and \$8.6 million of income before income taxes during the three and nine months ended September 30, 2015, respectively.

At September 30, 2015, on a consolidated basis, we had total assets of \$12.4 billion, total deposits of \$6.8 billion, total loans, including loans held for sale, of \$6.7 billion and stockholders' equity of \$1.7 billion.

On January 1, 2015, we completed our acquisition of SWS in a stock and cash transaction (the “SWS Merger”), whereby SWS’s broker-dealer subsidiaries, Southwest Securities, Inc. and SWS Financial Services, Inc., became subsidiaries of Securities Holdings and SWS’s banking subsidiary, Southwest Securities, FSB (“SWS FSB”), was merged into the Bank, an indirect wholly owned subsidiary of Hilltop. As a result of the SWS Merger, each outstanding share of SWS common stock was converted into the right to receive 0.2496 shares of Hilltop common stock and \$1.94 in cash, equating to \$6.92 per share based on Hilltop’s closing price on December 31, 2014 and resulting in an aggregate purchase price of \$349.1 million, consisting of 10.1 million shares of common stock, \$78.2 million in cash and \$70.3 million associated with our existing investment in SWS common stock. Additionally, due to appraisal rights proceedings filed in connection with the SWS Merger, the merger consideration is subject to change, and therefore, preliminary at this time. Based on purchase date valuations, the fair value of the assets acquired was \$3.3 billion, including \$707.5 million in securities, \$863.8 million in non-covered loans and \$1.2 billion in broker-dealer and clearing organization receivables. The fair value of liabilities assumed was \$2.9 billion, consisting primarily of deposits of \$1.3 billion and \$1.1 billion in broker-dealer and clearing organization payables. On October 5, 2015, Southwest Securities, Inc. and SWS Financial Services, Inc. were renamed “Hilltop Securities Inc.” and “Hilltop Securities Independent Network Inc.”, respectively.

The operations of SWS were included in our operating results beginning January 1, 2015 and such operations included a preliminary bargain purchase gain of \$82.8 million as disclosed in our Quarterly Report on Form 10-Q filed with the SEC on May 6, 2015. During the quarter ended June 30, 2015, the estimated fair value of the customer relationship intangible asset acquired as of January 1, 2015 was adjusted downward as a result of management’s review and approval of certain key assumptions that existed as of January 1, 2015. Additionally, during the quarter ended September 30, 2015, the estimated fair value of deferred tax assets acquired as of January 1, 2015 was adjusted upward as a result of

Table of Contents

management's review and filing of SWS's consolidated federal tax return for the year ended December 31, 2014. These adjustments resulted in an aggregate decrease in the preliminary bargain purchase gain associated with the SWS Merger to \$81.3 million. This change is reflected in the consolidated statements of operations within noninterest income during the nine months ended September 30, 2015. In the aggregate, these adjustments to the preliminary bargain purchase gain decreased net income for the three months ended March 31, 2015 by \$1.5 million as compared with amounts previously reported in our Quarterly Report on Form 10-Q for the quarter ended March 31, 2015. Additionally, certain amounts previously reported in our Quarterly Report on Form 10-Q for the quarter ended March 31, 2015 within the consolidated balance sheet as of March 31, 2015, and the related statements of comprehensive income, stockholders' equity and cash flows for the three months ended March 31, 2015, as well as the notes to the consolidated financial statements, will be revised in future filings.

In connection with the SWS Merger, we modified our organizational structure whereby First Southwest and its related entities also became subsidiaries of Securities Holdings. FSC, Hilltop Securities and HTS Independent Network (collectively, the "Hilltop Broker-Dealers") have operated as separate broker-dealers, under coordinated leadership since the SWS Merger. On October 22, 2015, the Financial Industry Regulatory Authority ("FINRA") granted approval to combine FSC and Hilltop Securities, subject to customary conditions. Over the next few months, the system integration will be completed and result in a combined firm under the Hilltop Securities name.

On April 9, 2015, we completed an offering of \$150.0 million aggregate principal amount of our 5% senior notes due 2025 ("Senior Unregistered Notes") in a private offering. On April 28, 2015, we used the net proceeds of the offering to redeem all of our outstanding Non-Cumulative Perpetual Preferred Stock, Series B ("Series B Preferred Stock") at an aggregate liquidation value of \$114.1 million, plus accrued but unpaid dividends of \$0.4 million, and are utilizing the remainder for general corporate purposes. In connection with the issuance of the Senior Unregistered Notes, on April 9, 2015, we entered into a registration rights agreement with the initial purchasers of the Senior Unregistered Notes and agreed to offer to exchange the Senior Unregistered Notes for notes registered under the Securities Act (the "Senior Registered Notes"). The terms of the Senior Registered Notes are substantially identical to the Senior Unregistered Notes for which they were exchanged (including principal amount, interest rate, maturity and redemption rights), except that the Senior Registered Notes generally are not subject to transfer restrictions. On May 22, 2015, and subject to the terms and conditions set forth in the Senior Registered Notes prospectus, we commenced an offer to exchange the outstanding Senior Unregistered Notes for Senior Registered Notes. Substantially all of the Senior Unregistered Notes were tendered for exchange, and on June 22, 2015, we fulfilled all of the requirements of the registration rights agreement for the Senior Unregistered Notes by issuing Senior Registered Notes in exchange for the tendered Senior Unregistered Notes. We refer to the Senior Registered Notes and the Senior Unregistered Notes that remain outstanding collectively as the "Senior Notes."

Segment Information

Effective January 1, 2015, we have three primary operating business units, PlainsCapital (banking and mortgage origination), Securities Holdings (broker-dealer) and NLC (insurance). Under accounting principles generally accepted in the United States ("GAAP"), our business units are comprised of four reportable business segments organized primarily by the core products offered to the segments' respective customers: banking, broker-dealer,

mortgage origination and insurance. The SWS Merger did not result in changes to our four reportable business segments. For the third quarter of 2015, we began presenting the preliminary bargain purchase gain associated with the SWS Merger, previously allocated to the banking and broker-dealer reportable business segments, within corporate to reflect our internal evaluation of segment performance. This change is reflected in the segment operating results within noninterest income for the nine months ended September 30, 2015. Additionally, related amounts previously reported in our Quarterly Reports on Form 10-Q for the quarters ended March 31, 2015 and June 30, 2015, respectively, within the MD&A, will be revised in future filings. This change had no impact on our consolidated results of operations. Consistent with our historical segment operating results during 2014, we anticipate that future revenues will be driven primarily from the banking segment, with the remainder being generated by our broker-dealer, mortgage origination and insurance segments. Operating results for the mortgage origination segment have historically been more volatile than operating results for the banking, broker-dealer and insurance segments.

The banking segment has included the operations of the former SWS FSB since January 1, 2015. The banking segment primarily provides business and consumer banking services from offices located throughout Texas and generates revenue from its portfolio of earning assets. The Bank's results of operations are primarily dependent on net interest

Table of Contents

income, while also deriving revenue from other sources, including service charges on customer deposit accounts and trust fees.

The broker-dealer segment has included the operations of Hilltop Securities and HTS Independent Network since January 1, 2015. The broker-dealer segment has historically generated a majority of its revenues from fees and commissions earned from investment advisory and securities brokerage services at First Southwest. The principal subsidiaries of First Southwest are FSC, a broker-dealer registered with the SEC and the Financial Industry Regulatory Authority (“FINRA”) and a member of the New York Stock Exchange (“NYSE”), and First Southwest Asset Management, LLC, a registered investment advisor under the Investment Advisors Act of 1940. Hilltop Securities is a broker-dealer registered with the SEC and FINRA and a member of the NYSE, and HTS Independent Network is an introducing broker-dealer that is also registered with the SEC and FINRA.

The mortgage origination segment includes the operations of PrimeLending, which offers a variety of loan products and generates revenue predominantly from fees charged on the origination of loans and from selling these loans in the secondary market.

The insurance segment includes the operations of NLC, which operates through its wholly owned subsidiaries, National Lloyds Insurance Company (“NLIC”) and American Summit Insurance Company (“ASIC”). Insurance segment income is primarily generated from revenue earned on net insurance premiums less loss and loss adjustment expenses (“LAE”) and policy acquisition and other underwriting expenses in Texas and other areas of the southern United States.

Corporate includes certain activities not allocated to specific business segments. These activities include holding company financing and investing activities, and management and administrative services to support the overall operations of our Company including, but not limited to, certain executive management, corporate relations, legal, finance, and acquisition costs.

Balance sheet amounts not discussed previously and the elimination of intercompany transactions are included in “All Other and Eliminations.” Additional information concerning our reportable business segments is presented in Note 23, Segment and Related Information, in the notes to our consolidated financial statements. The following tables present certain information about the operating results of our reportable business segments (in thousands).

How We Generate Revenue

We generate revenue from net interest income and from noninterest income. Net interest income represents the difference between the income earned on our assets, including our loans and investment securities, and our cost of funds, including the interest paid on the deposits and borrowings that are used to support our assets. Net interest income is a significant contributor to our operating results. Fluctuations in interest rates, as well as the amounts and types of interest-earning assets and interest-bearing liabilities we hold, affect net interest income. We generated \$309.3 million in net interest income during the nine months ended September 30, 2015, compared with net interest income of \$269.6 million during the same period in 2014. The year-over-year increase in net interest income was primarily due to the favorable resolution of certain significant loan relationships during the three months ended September 30, 2015 that increased yields earned on loans within our banking segment and the inclusion of the operations acquired in the SWS Merger.

The other component of our revenue is noninterest income, which is primarily comprised of the following:

- (i) Income from broker-dealer operations. Through the Hilltop Broker-Dealers, we provide investment banking and other related financial services. During the nine months ended September 30, 2015 and 2014, we generated \$205.5 million and \$67.7 million, respectively, in securities commissions and fees (net of intercompany eliminations) and investment banking and advisory fees.
- (ii) Income from mortgage operations. Through PrimeLending, we generate noninterest income by originating and selling mortgage loans. During the nine months ended September 30, 2015 and 2014, we generated \$463.2 million

and \$340.7 million, respectively, in net gains from the sale of loans, other mortgage production income (including income associated with retained mortgage servicing rights), and mortgage loan origination fees.

- (iii) Income from insurance operations. Through NLC, we provide fire and limited homeowners insurance for low value dwellings and manufactured homes. We generated \$121.1 million and \$122.9 million in net insurance premiums earned during the nine months ended September 30, 2015 and 2014, respectively.

In the aggregate, we generated \$950.7 million and \$585.5 million in noninterest income during the nine months ended September 30, 2015 and 2014, respectively. Excluding the preliminary bargain purchase gain of \$81.3 million related to the SWS Merger, our noninterest income during the nine months ended September 30, 2015 was \$869.4 million. We are presenting this financial measure because certain investors may use it to evaluate our business and financial results. This year-over-year increase in noninterest income other than preliminary bargain purchase gain is predominantly attributable to increases in noninterest income in our broker-dealer segment due to the inclusion of the operations acquired in the SWS Merger and our mortgage origination segment.

We also incur noninterest expenses in the operation of our businesses. Our businesses engage in labor intensive activities and, consequently, employees' compensation and benefits represent the majority of our noninterest expenses.

Table of Contents

Consolidated Operating Results

Net income applicable to common stockholders during the three months ended September 30, 2015 was \$46.9 million, or \$0.47 per diluted share, compared with net income applicable to common stockholders of \$23.4 million, or \$0.26 per diluted share, during the three months ended September 30, 2014. Net income applicable to common stockholders during the nine months ended September 30, 2015 was \$188.4 million, or \$1.88 per diluted share, compared with net income applicable to common stockholders of \$74.2 million, or \$0.82 per diluted share, during the nine months ended September 30, 2014. The consolidated operating results during the nine months ended September 30, 2015 include the recognition of a preliminary bargain purchase gain related to the SWS Merger of \$81.3 million. Included in the preliminary bargain purchase gain is a reversal of a \$33.4 million valuation allowance against SWS deferred tax assets. This amount is based on our expected ability to realize these acquired deferred tax assets through our consolidated core earnings, the implementation of certain tax planning strategies and reversal of timing differences. SWS's net operating loss carryforwards are subject to an annual limitation on their usage because of the ownership change. In addition, the preliminary bargain purchase gain reflects our acquisition date fair value allocation to identifiable intangible assets of \$7.5 million.

As a result of the SWS Merger, the operations, assets and liabilities acquired in the SWS Merger have been included in our balance sheet and operating results since January 1, 2015. We expect the operations acquired in the SWS Merger to continue to have a significant effect on our broker-dealer segment. In addition, transaction costs primarily related to the execution and closing of the transaction, and integration-related costs associated with employee expenses (such as severance and retention), professional fees (such as consulting and legal) and contractual costs (such as vendor contract termination and lease), have been incurred as a result of the plan to restructure and integrate the operations and systems of SWS and the former SWS FSB. During the nine months ended September 30, 2015, we incurred \$4.3 million in pre-tax transaction costs related to the SWS Merger, while pre-tax integration-related costs associated with employee, professional fee and contractual expenses during this same period were \$7.3 million, \$3.2 million, and \$2.4 million, respectively. During the nine months ended September 30, 2014, we incurred \$0.7 million in pre-tax transaction costs related to the SWS Merger. On October 22, 2015, FINRA granted approval to combine FSC and Hilltop Securities, subject to customary conditions. Over the next few months, the system integration will be completed and result in a combined firm under the Hilltop Securities name. Accordingly, we expect cost savings to commence in 2016 following the combination of FSC and Hilltop Securities; however, we expect to continue to incur additional integration costs in 2016, which we expect to offset, in part, such cost savings.

Certain items included in net income for 2014 and 2015 resulted from purchase accounting associated with the merger of PlainsCapital Corporation with and into a wholly owned subsidiary of Hilltop on November 30, 2012 (the "PlainsCapital Merger"), the FDIC-assisted transaction (the "FNB Transaction") whereby the Bank acquired certain assets and assumed certain liabilities of FNB, and the SWS Merger. Income before taxes during the three months ended September 30, 2015 includes net accretion of \$1.4 million, \$25.7 million and \$8.2 million on earning assets and liabilities acquired in the PlainsCapital Merger, FNB Transaction, and SWS Merger, respectively (collectively, the "Bank Transactions"), offset by amortization of identifiable intangibles of \$2.2 million, \$0.2 million and \$0.3 million, respectively. During the three months ended September 30, 2014, income before taxes includes net accretion of \$3.9 million and \$11.9 million on earning assets and liabilities acquired in the PlainsCapital Merger and FNB Transaction, respectively, offset by amortization of identifiable intangibles of \$2.3 million and \$0.3 million, respectively. Income before taxes during the nine months ended September 30, 2015 includes net accretion of \$11.4 million, \$47.3 million

and \$15.6 million on earning assets and liabilities acquired in the PlainsCapital Merger, FNB Transaction, and SWS Merger, respectively, offset by amortization of identifiable intangibles of \$6.5 million, \$0.7 million and \$0.8 million, respectively. During the nine months ended September 30, 2014, income before taxes includes net accretion of \$30.8 million and \$31.8 million on earning assets and liabilities acquired in the PlainsCapital Merger and FNB Transaction, respectively, offset by amortization of identifiable intangibles of \$7.0 million and \$0.8 million, respectively.

Table of Contents

We consider the ratios shown in the table below to be key indicators of our performance.

	Three Months Ended September 30, 2015				Nine Months Ended September 30, 2015				Year Ended December 31, 2014			
	2015		2014		2015		2014		2015		2014	
Performance Ratios:												
Return on average stockholder's equity	10.97	%	6.51	%	14.95	%	7.37	%	8.01			%
Return on average assets	1.49	%	1.03	%	2.04	%	1.14	%	1.26			%
Net interest margin (taxable equivalent) (1)	4.20	%	4.38	%	3.84	%	4.72	%	4.74			%

- (1) Taxable equivalent net interest income divided by average interest-earning assets.
- (2) During the three and nine months ended September 30, 2015, taxable equivalent net interest margin was 99 basis points and 83 basis points, respectively, lower due to the impact related to the securities financing operations within our Broker-Dealer segment. The effect on taxable equivalent net interest margin was nominal during the three and nine months ended September 30, 2014.

During the three months ended September 30, 2015, the consolidated taxable equivalent net interest margin of 4.20% was 137 basis points greater due to the impact of purchase accounting and primarily related to accretion of discount on loans of \$2.2 million, \$25.7 million and \$8.1 million associated with the PlainsCapital Merger, FNB Transaction, and SWS Merger, respectively, and PlainsCapital Merger-related amortization of premium on acquired securities of \$0.7 million. The consolidated taxable equivalent net interest margin during the three months ended September 30, 2014 of 4.38% was 87 basis points greater due to the impact of purchase accounting and primarily related to accretion of discount on loans of \$4.6 million and \$11.0 million associated with PlainsCapital Merger and FNB Transaction, respectively, PlainsCapital Merger-related amortization of premium on acquired securities of \$0.9 million, and FNB Transaction-related amortization of premium on acquired time deposits of \$0.9 million.

During the nine months ended September 30, 2015, the consolidated taxable equivalent net interest margin of 3.84% was 106 basis points greater due to the impact of purchase accounting and primarily related to accretion of discount on loans of \$14.3 million, \$47.3 million and \$15.0 million associated with the PlainsCapital Merger, FNB Transaction, and SWS Merger, respectively, and PlainsCapital Merger-related amortization of premium on acquired securities of \$2.6 million. The consolidated taxable equivalent net interest margin during the nine months ended September 30, 2014 of 4.72% was 108 basis points greater due to the impact of purchase accounting and primarily related to accretion of discount on loans of \$33.2 million and \$26.3 million associated with PlainsCapital Merger and FNB Transaction, respectively, PlainsCapital Merger-related amortization of premium on acquired securities of \$2.8 million, and FNB Transaction-related amortization of premium on acquired time deposits of \$5.5 million.

The FNB Transaction-related accretion of discount on loans of \$47.3 million and \$26.3 million during the nine months ended September 30, 2015 and 2014, respectively, included accretion of approximately \$28 million and \$18 million, respectively, due to better-than-expected resolution of covered purchased credit impaired ("PCI") loans during the respective periods. This better-than-expected performance and resulting increases in yields calculated as a part of

the Bank's quarterly recast process led to the reclassification of \$61.3 million and \$82.6 million, respectively, from nonaccretable difference to accretable yield.

(1) Average balance includes non-accrual loans.

(2) Annualized taxable equivalent adjustments are based on a 35% tax rate. The adjustment to interest income was \$0.8 million and \$0.6 million for the three months ended September 30, 2015 and 2014, respectively, and \$2.3 million and \$1.8 million for the nine months ended September 30, 2015 and 2014, respectively.

Table of Contents

The banking segment's net interest margin exceeds our consolidated net interest margin shown above. Our consolidated net interest margin includes the yields and costs associated with certain items within interest-earning assets and interest-bearing liabilities in the broker-dealer segment, particularly items related to securities financing operations, as well as the borrowing costs of Hilltop and PlainsCapital, both of which reduce our consolidated net interest margin. In addition, yields and costs on certain interest-earning assets, such as lines of credit extended to subsidiaries by the banking segment, are eliminated from the consolidated financial statements.

On a consolidated basis, net interest income increased \$29.5 million and \$39.6 million during the three and nine months ended September 30, 2015, respectively, compared with the same periods in 2014. These increases were primarily due to the favorable resolution of certain significant loan relationships during the three months ended September 30, 2015 that increased yields earned on loans within our banking segment and the inclusion of the operations acquired in the SWS Merger, partially offset by a reduction in recurring quarterly investment and interest income at corporate.

The provision for loan losses is determined by management as the amount to be added to the allowance for loan losses after net charge-offs have been deducted to bring the allowance to a level which, in management's best estimate, is necessary to absorb probable losses within the existing loan portfolio. The consolidated provision for loan losses, substantially all of which relates to the banking segment, was \$5.6 million and \$4.0 million during the three months ended September 30, 2015 and 2014, respectively. During the three months ended September 30, 2015, the provision for loan losses was comprised of charges relating to newly originated loans and acquired loans without credit impairment at acquisition of \$5.1 million and PCI loans of \$0.5 million, compared to charges relating to newly originated loans and acquired loans without credit impairment at acquisition of \$2.6 million and PCI loans of \$1.4 million during the three months ended September 30, 2014. During the nine months ended September 30, 2015 and 2014, the consolidated provision for loan losses, substantially all of which relates to the banking segment, was \$8.4 million and \$12.8 million, respectively. The provision for loan losses during the nine months ended September 30, 2015 was comprised of charges relating to newly originated loans and acquired loans without credit impairment at acquisition of \$9.3 million, partially offset by the recapture of charges on PCI loans of \$0.9 million, compared to charges relating to newly originated loans and acquired loans without credit impairment at acquisition of \$7.9 million and PCI loans of \$4.9 million during the nine months ended September 30, 2014.

Consolidated noninterest income increased \$84.3 million and \$365.2 million during the three and nine months ended September 30, 2015, respectively, compared with the same periods in 2014. These year-over-year changes included the recognition of a preliminary bargain purchase gain related to the SWS Merger of \$81.3 million during the nine months ended September 30, 2015. Other changes in noninterest income during the three and nine months ended September 30, 2015, compared with the same periods in 2014, included increases in securities commissions and fees (net of intercompany eliminations) and investment banking and advisory fees within our broker-dealer segment of \$42.7 million and \$137.8 million, respectively, and increases within our mortgage origination segment of \$33.7 million and \$122.5 million, respectively.

Consolidated noninterest expense during the three and nine months ended September 30, 2015 increased \$78.8 million and \$282.7 million, respectively, compared with the same periods in 2014. These year-over-year increases during

the three and nine months ended September 30, 2015, compared with the same periods in 2014, included significant increases in noninterest expenses within our broker-dealer segment of \$58.9 million and \$184.3 million, respectively, primarily due to the inclusion of the operations acquired as part of the SWS Merger. In addition, during the three and nine months ended September 30, 2015 we incurred pre-tax transaction and integration costs related to the SWS Merger of \$2.8 million and \$17.2 million, respectively. Changes between the three and nine months ended September 30, 2015 and the comparable periods in 2014 within the major components of noninterest expense included increases of \$74.1 million and \$226.1 million, respectively, in employees' compensation and benefits and \$5.7 million and \$43.2 million, respectively, in other expenses primarily attributable to increases in our broker-dealer and mortgage origination segments.

Consolidated income tax expense during the three months ended September 30, 2015 and 2014 was \$25.3 million and \$14.0 million, respectively, reflecting effective tax rates of 34.9% and 35.8%, respectively. During the nine months ended September 30, 2015 and 2014, consolidated income tax expense was \$58.9 million and \$44.7 million, respectively, reflecting effective tax rates of 23.5% and 36.1%, respectively. The decrease in our effective tax rate during the nine months ended September 30, 2015 was primarily due to no income taxes being recorded during the quarter ended March 31, 2015 in connection with the preliminary bargain purchase gain of \$81.3 million associated with the SWS Merger because the acquisition was a tax-free reorganization under Section 368(a) of the Internal Revenue Code.

Table of Contents

In addition, during the quarter ended March 31, 2015, we recorded an income tax benefit of \$2.1 million as a result of the SWS Merger to reverse the deferred tax liability for the difference between book and tax basis on Hilltop's investment in SWS common stock. During the three months ended September 30, 2015, we also reversed a valuation allowance of \$1.9 million previously established on a deferred tax asset for a capital loss carryforward. Therefore, the effective income tax rate during the nine months ended September 30, 2015 is not necessarily indicative of anticipated future effective tax rates.

Segment Results

Banking Segment

Income before income taxes in our banking segment during the three months ended September 30, 2015 and 2014 was \$53.6 million and \$24.6 million, respectively, while income before income taxes in our banking segment during the nine months ended September 30, 2015 and 2014 was \$140.6 million and \$98.0 million, respectively. The increases in income before income taxes during the three and nine months ended September 30, 2015, compared with the same periods in 2014, were primarily due to the favorable resolution of certain significant loan relationships during the three months ended September 30, 2015 that increased yields earned on loans. The increase in income before income taxes during the nine months ended September 30, 2015, compared to the same period in 2014, was partially offset by pre-tax costs of \$3.0 million directly attributable to the integration of the former SWS FSB.

We consider the ratios shown in the table below to be key indicators of the performance of our banking segment.

	Three Months Ended September 30, 2015		Three Months Ended September 30, 2014		Nine Months Ended September 30, 2015		Nine Months Ended September 30, 2014		Year Ended December 31, 2014
Performance Ratios:									
Efficiency ratio (1)	50.56 %	70.09 %	54.63 %	62.94 %	61.17				%
Return on average assets	1.64 %	0.77 %	1.45 %	1.05 %	1.20				%
Net interest margin (taxable equivalent) (2)	5.79 %	4.62 %	5.13 %	4.98 %	5.00				%

(1) Noninterest expenses divided by the sum of total noninterest income and net interest income for the period.

(2) Taxable equivalent net interest income divided by average interest-earning assets.

During the three months ended September 30, 2015, the banking segment's taxable equivalent net interest margin of 5.79% was 210 basis points greater due to the impact of purchase accounting and primarily related to accretion of discount on loans of \$2.2 million, \$25.7 million and \$8.1 million associated with the PlainsCapital Merger, FNB

Transaction, and SWS Merger, respectively, and PlainsCapital Merger-related amortization of premium on acquired securities of \$0.7 million. The banking segment's taxable equivalent net interest margin during the three months ended September 30, 2014 of 4.62% was 102 basis points greater due to the impact of purchase accounting and primarily related to accretion of discount on loans of \$4.6 million and \$11.0 million associated with PlainsCapital Merger and FNB Transaction, respectively, PlainsCapital Merger-related amortization of premium on acquired securities of \$0.9 million, and FNB Transaction-related amortization of premium on acquired time deposits of \$0.9 million.

During the nine months ended September 30, 2015, the banking segment's taxable equivalent net interest margin of 5.13% was 159 basis points greater due to the impact of purchase accounting and primarily related to accretion of discount on loans of \$14.3 million, \$47.3 million and \$15.0 million associated with the PlainsCapital Merger, FNB Transaction, and SWS Merger, respectively, and PlainsCapital Merger-related amortization of premium on acquired securities of \$2.6 million. The banking segment's taxable equivalent net interest margin during the nine months ended September 30, 2014 of 4.98% was 124 basis points greater due to the impact of purchase accounting and primarily related to accretion of discount on loans of \$33.2 million and \$26.3 million associated with PlainsCapital Merger and FNB Transaction, respectively, PlainsCapital Merger-related amortization of premium on acquired securities of \$2.8 million, and FNB Transaction-related amortization of premium on acquired time deposits of \$5.5 million.

The FNB Transaction-related accretion of discount on loans of \$47.3 million and \$26.3 million during the nine months ended September 30, 2015 and 2014, respectively, included accretion of approximately \$28 million and \$18 million, respectively, due to better-than-expected resolution of covered PCI loans during the respective periods. This better-than-expected performance and resulting increases in yields calculated as a part of the Bank's quarterly recast process led to the reclassification of \$61.3 million and \$82.6 million, respectively, from nonaccretable difference to accretable yield.

(1) Average balance includes non-accrual loans.

(2) Annualized taxable equivalent adjustments are based on a 35% tax rate. The adjustment to interest income was \$0.4 million and \$0.5 million for the three months ended September 30, 2015 and 2014, respectively, and \$1.4 million and \$1.5 million for the nine months ended September 30, 2015 and 2014, respectively.

(3) Excludes the allocation of interest expense on PlainsCapital debt of \$0.4 million and \$0.3 million for the three months ended September 30, 2015 and 2014, respectively, and \$1.1 million and \$0.8 million for the nine months ended September 30, 2015 and 2014, respectively.

Table of Contents

The banking segment's net interest margin shown above exceeds our consolidated net interest margin. Our consolidated net interest margin includes the yields and costs associated with certain items within interest-earning assets and interest-bearing liabilities in the broker-dealer segment, particularly items related to securities financing operations, as well as the borrowing costs of Hilltop and PlainsCapital, both of which reduce our consolidated net interest margin. In addition, the banking segment's interest-earning assets include lines of credit extended to other subsidiaries. Such yields and costs are eliminated from the consolidated financial statements.

The following table summarizes the changes in the banking segment's net interest income for the periods indicated below, including the component changes in the volume of average interest-earning assets and interest-bearing liabilities and changes in the rates earned or paid on those items (in thousands).

	Three Months Ended September 30, 2015 vs. 2014			Nine Months Ended September 30, 2015 vs. 2014

(1) Changes attributable to both volume and yield/rate are included in yield/rate column.

(2) Annualized taxable equivalent.

Taxable equivalent net interest income increased \$27.5 million and \$31.5 million during the three and nine months ended September 30, 2015, respectively, compared with the same periods in 2014. Increases in the volume of

interest-earning assets, primarily loans acquired in the SWS Merger and additional amounts drawn on the subsidiary warehouse lines of credit, increased taxable equivalent net interest income by \$10.0 million and \$56.5 million during the three and nine months ended September 30, 2015, respectively, compared with the same periods in 2014. Changes in the yields earned on interest-earning assets increased taxable equivalent net interest income by \$17.5 million during the three months ended September 30, 2015, compared to the same period in 2014, primarily due to the favorable resolution of certain significant loan relationships during the three months ended September 30, 2015 that increased yields earned on loans. Changes in yields earned on interest-earning assets decreased taxable equivalent net interest income by \$22.9 million during the nine months ended September 30, 2015, compared with the same period in 2014, primarily due to the net effects of lower yields on the loan portfolio and subsidiary warehouse lines of credit, partially offset by the favorable change in yields on loans during the current quarter as previously discussed and increased yields on the investment portfolio. Changes in rates paid on interest-bearing liabilities decreased taxable equivalent net interest income by \$2.5 million during the nine months ended September 30, 2015, compared with the same period in 2014, primarily due to lower amortization of premiums on time deposits acquired in the FNB Transaction and SWS Merger.

The banking segment's noninterest income was \$13.9 million and \$17.6 million during the three months ended September 30, 2015 and 2014, respectively, and \$48.3 million and \$50.3 million during the nine months ended September 30, 2015 and 2014, respectively. The decrease in noninterest income during the three months ended September 30, 2015, compared to the same period in 2014, was primarily due to year-over-year decreases in accretion on FDIC indemnification asset, other real estate owned ("OREO") income and service fees. The year-over-year changes

Table of Contents

during the nine months ended September 30, 2015 was primarily due to \$4.4 million of realized gains on securities acquired in the SWS Merger and subsequently sold during the three months ended March 31, 2015, partially offset by the items during the third quarter of 2015 previously discussed.

The banking segment's noninterest expenses were \$60.5 million and \$67.2 million during the three months ended September 30, 2015 and 2014, respectively, and \$179.4 million and \$188.2 million during the nine months ended September 30, 2015 and 2014, respectively. Noninterest expenses were primarily comprised of employees' compensation and benefits, and occupancy expenses. The decreases in noninterest expenses during the three and nine months ended September 30, 2015, compared to the same periods in 2014, were primarily due to reduced write downs on certain OREO assets acquired in the FNB Transaction and increased gains on the sale of certain OREO assets also acquired in the FNB Transaction. These changes were slightly offset by increases in compensation and benefits associated with the addition of employees of the former SWS FSB. Noninterest expenses during the nine months ended September 30, 2015 included the operations acquired in the SWS Merger and pre-tax integration-related costs directly attributable to the integration of the former SWS FSB of \$3.0 million, respectively, related to employee, professional fees and contractual expenses.

Broker-Dealer Segment

Income before income taxes in our broker-dealer segment during the three months ended September 30, 2015 and 2014 was \$1.5 million and \$1.2 million, respectively, while losses before income taxes in our broker-dealer segment during the nine months ended September 30, 2015 was \$3.9 million compared with income before taxes of \$1.7 million during the same period in 2014. The year-over-year change during the nine months ended September 30, 2015 included pre-tax transaction and integration-related costs of \$10.3 million directly attributable to the acquisition of SWS on January 1, 2015. The broker-dealer segment incurred pre-tax integration-related costs of \$2.1 million directly attributable to the acquisition of SWS during the three months ended September 30, 2015. As shown in the table below, the operations acquired in the SWS Merger had a significant impact on each of the components of income (loss) before income taxes during the three and nine months ended September 30, 2015, compared with the same periods in 2014. The following table provides additional details regarding our broker-dealer operating results (in thousands).

	Three Months Ended September 30,		Variance 2015 vs 2014	Nine Months Ended September 30,		Variance 2015 vs 2014

(1) Securities commissions and fees includes income of \$0.4 million and \$1.0 million during the three and nine months ended September 30, 2015, respectively, that is eliminated in consolidation.

The broker-dealer segment had net interest income of \$8.3 million and \$3.3 million during the three months ended September 30, 2015 and 2014, respectively, and net interest income of \$24.3 million and \$9.1 million during the nine months ended September 30, 2015 and 2014, respectively. In the broker-dealer segment, interest is earned from securities lending activities, interest charged on customer margin loan balances and interest earned on investment

Table of Contents

securities used to support sales, underwriting and other customer activities. The year-over-year increases between the three and nine months ended September 30, 2015 and the comparable periods in 2014 were primarily due to the inclusion of the operations acquired in the SWS Merger.

Noninterest income was \$83.8 million and \$29.7 million during the three months ended September 30, 2015 and 2014, respectively, and \$243.6 million and \$80.2 million during the nine months ended September 30, 2015 and 2014, respectively. The increases in noninterest income of \$54.1 million and \$163.4 million during the three and nine months ended September 30, 2015, compared with the same periods in 2014, were primarily due to increases of \$42.7 million and \$131.4 million, respectively, associated with the inclusion of SWS's operations, increased fees earned by FSC from increased volumes in its non-profit housing program and increased advisory fees by FSC on its public finance clients.

The broker-dealer segment participates in programs in which it issues forward purchase commitments of mortgage-backed securities to certain non-profit housing clients and sells U.S. Agency to-be-announced ("TBA") securities. Additionally, TBA purchase and sales agreements are entered into to assist small to mid-size mortgage loan originators in hedging the interest rate risk associated with their client-owned mortgages. The fair values of these derivative instruments increased \$12.7 million and \$5.3 million during the three months ended September 30, 2015 and 2014, respectively, and \$30.5 million and \$11.4 million during the nine months ended September 30, 2015 and 2014, respectively. The Hilltop Broker-Dealers also hold trading securities to support sales, underwriting and other customer activities. The fair values of securities within this trading portfolio increased \$4.6 million and \$0.3 million during the three months ended September 30, 2015 and 2014, respectively, and \$7.2 million and \$1.1 million during the nine months ended September 30, 2015 and 2014, respectively. These changes in the fair value of derivative instruments and trading portfolio are included within other noninterest income.

Noninterest expenses, including provision for loan losses, were \$90.7 million and \$31.8 million during the three months ended September 30, 2015 and 2014, respectively, and \$271.9 million and \$87.5 million during the nine months ended September 30, 2015 and 2014, respectively. The increases in noninterest expenses, including provision for loan losses, of \$58.9 million and \$184.3 million during the three and nine months ended September 30, 2015, compared to the same periods in 2014, were primarily due to increases of \$44.3 million and \$139.2 million, respectively, in employees' compensation and benefits costs, of which \$37.0 million and \$118.7 million, respectively, was associated with the operations acquired in the SWS Merger. Increases in compensation that varies with noninterest income accounted for \$7.2 million and \$18.8 million, respectively, of the noted increase in First Southwest's compensation and benefits expenses. Increases in occupancy and equipment expenses accounted for the majority of the noninterest expenses incurred during each respective period. In addition, during the nine months ended September 30, 2015, the broker-dealer segment incurred pre-tax transaction costs of \$0.8 million, while pre-tax integration-related costs resulting from employee expenses, professional fees and contractual expenses directly attributable to the integration of SWS were \$0.4 million, \$1.6 million and \$0.1 million, respectively, during the three months ended September 30, 2015, and \$5.5 million, \$2.4 million and \$1.6 million, respectively, during the nine months ended September 30, 2015. On October 22, 2015, FINRA granted approval to combine FSC and Hilltop Securities, subject to customary conditions. Over the next few months, the system integration will be completed and result in a combined firm under the Hilltop Securities name. Accordingly, we expect cost savings to commence in 2016 following the combination of FSC and Hilltop Securities; however, we expect to continue to incur additional integration costs in 2016, which we expect to offset, in part, such cost savings.

Mortgage Origination Segment

Income before income taxes in our mortgage origination segment during the three months ended September 30, 2015 and 2014 was \$12.1 million and \$11.1 million, respectively, and \$43.3 million and \$17.3 million during the nine months ended September 30, 2015 and 2014, respectively. The increases in income before income taxes during the three and nine months ended September 30, 2015 compared to the same periods in 2014 were primarily due to increases in noninterest income partially offset by increases in compensation that varies with the volume of mortgage loan originations (“variable compensation”), and to a lesser extent, increases in other noninterest expenses. Net interest expense of \$2.5 million and \$3.2 million during the three months ended September 30, 2015 and 2014, respectively, and net interest expense of \$7.8 million and \$9.7 million during the nine months ended September 30, 2015 and 2014, respectively, resulted from interest incurred on a warehouse line of credit held with the Bank as well as related intercompany financing costs, partially offset by interest income earned on loans held for sale.

Table of Contents

The mortgage origination segment originates all of its mortgage loans through a retail channel. The following table provides certain details regarding our mortgage loan originations and selected information for the periods indicated below (dollars in thousands).

	Three Months Ended September 30,				Nine Months Ended September 30,			
	2015	% of Total	2014	% of Total	2015	% of Total	2014	% of Total

Mortgage Loan Sales - Volume	\$ 3,699,047	\$ 3,060,101	\$ 10,240,166	\$ 7,479,092
------------------------------------	--------------	--------------	---------------	--------------

The mortgage lending business is subject to variables that can impact loan origination volume, including seasonal and interest rate fluctuations. Historically, the mortgage origination segment has typically experienced increased loan origination volume from purchases of homes during the spring and summer, when more people tend to move and buy or sell homes. An increase in mortgage interest rates tends to result in decreased loan origination volume from refinancings, while a decrease in mortgage interest rates tends to result in increased loan origination volume from refinancings. Changes in interest rates have historically had a lesser impact on home purchases volume than on refinancing volume. On October 3, 2015, lender compliance changes associated with TILA-RESPA Integrated Disclosures ("TRID") became effective and significantly modify required disclosure documents and settlement procedures associated with home mortgage loans. Lender compliance with TRID could result in delays in loan closings or delays in mortgage processing, particularly in the early stages of implementation. Given the recent implementation of TRID by PrimeLending, the impacts of TRID on the mortgage loan origination process, volumes and associated costs beginning in the fourth quarter of 2015 are unknown.

Refinancing volume increased to \$693.6 million and \$2.7 billion during the three and nine months ended September 30, 2015, respectively (representing 19.1% and 26.6%, respectively, of total loan origination volume), from \$537.4 million and \$1.4 billion during the three and nine months ended September 30, 2014, respectively (representing 18.2% and 18.0%, respectively, of total loan origination volume). The increase in refinancing volume as a percent of total loan origination volume during the nine months ended September 30, 2015 was primarily the result of a decline in mortgage interest rates that began in the second quarter of 2014 and continued into the first quarter of 2015.

Refinancing volume as a percent of total loan origination volume increased at a lesser rate during the three months ended September 30, 2015 because the fluctuation in interest rates during the second and third quarters of 2015 was minimal when compared to changes between the second quarter of 2014 and the first quarter of 2015. Home purchases volume increased 22.3% to \$2.9 billion from \$2.4 billion during the three months ended September 30, 2015 compared to the same period in 2014,

Table of Contents

while home purchases volume increased 20.3% to \$7.5 billion from \$6.3 billion during the nine months ended September 30, 2015 compared to the same period in 2014.

The mortgage origination segment's total loan origination volume during the three and nine months ended September 30, 2015 increased 23.5% and 34.4%, respectively, compared to the same periods in 2014, while income before income taxes during the three and nine months ended September 30, 2015 increased 9.4% and 150.0%, respectively, compared to the same periods in 2014. Income before income taxes during the three months ended September 30, 2015, increased at a lesser rate than loan origination volume compared to the same period in 2014, primarily due to noninterest expense increasing by 26.5%, compared with an increase in noninterest income of 23.9%. Income before taxes during the nine months ended September 30, 2015 increased at a greater rate than loan origination volume compared to the same period in 2014, primarily due to noninterest income increasing by 34.9%, compared with an increase in noninterest expense of 30.2%.

Noninterest income was \$159.8 million and \$129.0 million during the three months ended September 30, 2015 and 2014, respectively, and \$463.3 million and \$343.6 million during the nine months ended September 30, 2015 and 2014, respectively, and was comprised of the following (in thousands).

	Three Months Ended September 30,		Variance 2015 vs 2014	Nine Months Ended September 30,		Variance 2015 vs 2014
	2015	2014		2015	2014	
Net gains from sale of loans	\$ 139,703	\$ 117,047	\$ 22,656	\$ 382,416	\$ 267,336	\$ 115,080
Mortgage loan origination fees	22,647	17,593	5,054	58,194	46,920	11,274
Other mortgage production income:						
Change in net fair value and related derivative activity:						
Interest rate lock commitments and loans held for sale	(4,845)	(8,571)	3,726	14,828	20,449	(5,621)
Mortgage servicing rights asset	(2,946)	(194)	(2,752)	(5,820)	723	(6,543)
Servicing fees	5,235	3,114	2,121	13,696	8,144	5,552
	\$ 159,794	\$ 128,989	\$ 30,805	\$ 463,314	\$ 343,572	\$ 119,742

Net gains on sale of loans increased 19.4% and 43.0%, and mortgage origination fees increased 28.7% and 24.0% during the three and nine months ended September 30, 2015, respectively, compared with the same periods in 2014. The increase in net gains on sale of loans during the three months ended September 30, 2015 was primarily a result of a 20.9% increase in total loan sales volume, partially offset by a decrease in average loan sales margin, compared with the same period in 2014. The increase in net gain on sale of loans during the nine months ended September 30, 2015 was primarily a result of a 36.9% increase in total loan sales volume, in addition to an increase in average loan sales margins compared with the same period in 2014. The increases in mortgage loan origination fees were primarily a result of 23.5% and 34.4% increases in total loan origination volume during the three and nine months

ended September 30, 2015, respectively, compared with the same periods in 2014. Also contributing to the increase in mortgage loan origination fees during the three months ended September 30, 2015 was an increase in average loan origination fees. A decrease in average loan origination fees during the nine months ended September 30, 2015, partially offset the impact of increased loan origination volume on mortgage loan origination fees, compared with the same period in 2014.

During the three and nine months ended September 30, 2015, noninterest income included a \$4.8 million decrease and a \$14.8 million increase, respectively, in net fair value of the mortgage origination segment's IRLCs and loans held for sale and the related activity associated with forward commitments used by the mortgage origination segment to mitigate interest rate risk associated with its IRLCs and mortgage loans held for sale. During the three and nine months ended September 30, 2014, noninterest income included comparable changes of an \$8.6 million decrease and a \$20.4 million increase, respectively. The decreases during the three months ended September 30, 2015 and 2014 were primarily a result of decreases in the volume of IRLCs and mortgage loans held during these periods, partially offset during the three months ended September 30, 2015, by increases in the average value of individual IRLCs and mortgage loans. The increases during the nine months ended September 30, 2015 and 2014 were primarily a result of increases in the volume of IRLCs and mortgage loans held during these periods, in addition to increases in the average value of individual IRLCs and mortgage loans.

The mortgage origination segment sells substantially all mortgage loans it originates to various investors in the secondary market, the majority servicing released. During the year ended December 31, 2014, the mortgage origination segment retained servicing on approximately 31% of loans sold, but decreased to approximately 25% and 20% during the three and nine months ended September 30, 2015. The mortgage origination segment's determination of whether to

Table of Contents

retain or release servicing on mortgage loans it sells is impacted by, among other things, changes in mortgage interest rates, and refinancing and market activity. The related mortgage servicing rights (“MSR”) asset was valued at \$48.6 million on \$5.2 billion of serviced loan volume at September 30, 2015, compared with a value of \$37.4 million on \$3.8 billion of serviced loan volume at December 31, 2014. The mortgage origination segment may, from time to time, manage its MSR asset through different strategies, including varying the percentage of mortgage loans sold servicing released and opportunistically selling MSR assets. The mortgage origination segment has also retained servicing on certain loans sold to the banking segment. Gains and losses associated with such sales to the banking segment and the related MSR asset are eliminated in consolidation. During the third quarter of 2014, the mortgage origination segment began using derivative financial instruments, including interest rate swaps, swaptions and forward commitments to sell mortgage-backed securities, as a means to mitigate market risk associated with its MSR asset. Changes in the net fair value of the MSR asset and the related derivatives resulted in net losses of \$2.9 million and \$5.8 million during the three and nine months ended September 30, 2015, respectively, while the change in the net value of the MSR asset resulted in a net loss of \$0.2 million and a net gain of \$0.7 million during the three and nine months ended September 30, 2014.

Noninterest expenses were \$145.1 million and \$114.7 million during the three months ended September 30, 2015 and 2014, respectively, and \$412.2 million and \$316.5 million during the nine months ended September 30, 2015 and 2014, respectively, and were comprised of the following (in thousands).

	Three Months Ended September 30,		Variance 2015 vs 2014	Nine Months Ended September 30,		Variance 2015 vs 2014
	2015	2014		2015	2014	
Variable compensation	\$ 64,582	\$ 47,021	\$ 17,561	\$ 179,884	\$ 122,094	\$ 57,790
Segment operating costs	72,206	57,676	14,530	202,586	170,007	32,579
Unreimbursed closing costs	8,325	9,993	(1,668)	29,764	24,445	5,319
	\$ 145,113	\$ 114,690	\$ 30,423	\$ 412,234	\$ 316,546	\$ 95,688

Employees’ compensation and benefits accounted for the majority of the noninterest expenses incurred during all periods presented. Variable compensation increased \$17.6 million and \$57.8 million during the three and nine months ended September 30, 2015, compared with the same periods in 2014, and comprised 64.2% and 61.9% of the total employees’ compensation and benefits expenses during the three months ended September 30, 2015 and 2014, respectively, and 64.0% and 58.2% of total employees’ compensation and benefits expenses during the nine months ended September 30, 2015 and 2014, respectively. Variable compensation tends to fluctuate at greater rates than loan origination volumes because mortgage loan originator and fulfillment staff incentive compensation plans are structured to pay at increasing rates as higher monthly volume tiers are achieved.

While total loan origination volumes increased 23.5% and 34.4% for the three and nine months ended September 30, 2015, respectively, as compared to the same periods in 2014, the mortgage origination segment’s operating costs increased 25.2% and 19.2%, respectively. The largest increases in segment operating costs during the three and nine months ended September 30, 2015, compared to the same periods in 2014, were increases in salaries and benefits

totaling \$7.2 million and \$13.5 million, respectively. Segment operating costs tend to fluctuate with, but at a lesser magnitude than, loan origination volume, as these costs are comprised of salaries, benefits, occupancy and administrative costs, which are not normally highly sensitive to changes in loan origination volume. Segment operating costs during the three months ended September 30, 2015, increased at a greater rate than loan origination volume primarily as a result of the addition of headcount to support not only increasing loan origination volumes, but also technology initiatives, and regulatory and compliance needs.

The mortgage origination segment records unreimbursed closing costs as noninterest expense when it pays a customer's closing costs. Unreimbursed closing costs are generally paid in return for the customer choosing to accept a higher interest rate on the customer's mortgage loan, and as a result, unreimbursed closing costs typically increase as mortgage interest rates decrease and decrease as mortgage interest rates increase.

Between January 1, 2006, and September 30, 2015, the mortgage origination segment sold mortgage loans totaling \$73.3 billion. These loans were sold under sales contracts that generally include provisions that hold the mortgage origination segment responsible for errors or omissions relating to its representations and warranties that loans sold meet certain requirements, including representations as to underwriting standards and the validity of certain borrower representations in connection with the loan. In addition, the sales contracts typically require the refund of purchased servicing rights plus certain investor servicing costs if a loan experiences an early payment default. While the mortgage origination segment sold loans prior to 2006, it does not anticipate experiencing significant losses in the future on loans originated prior to 2006 as a result of investor claims under these provisions of its sales contracts.

Table of Contents

When an investor claim for indemnification of a loan sold is made, the mortgage origination segment evaluates the claim and determines if the claim can be satisfied through additional documentation or other deliverables. If the claim cannot be satisfied in that manner, the mortgage origination segment negotiates with the investor to reach a settlement of the claim. Settlements typically result in either the repurchase of a loan or reimbursement to the investor for losses incurred on the loan. Following is a summary of the mortgage origination segment's claims resolution activity relating to loans sold between January 1, 2006 and September 30, 2015 (dollars in thousands).

	Original Loan Balance		Loss Recognized	
	Amount	% of Loans Sold	Amount	% of Loans Sold
Claims resolved with no payment	\$ 239,334	0.33%	\$ —	0.00%
Claims resolved as a result of a loan repurchase or payment to an investor for losses incurred (1)	241,101	0.33%	27,762	0.04%
	\$ 480,435	0.66%	\$ 27,762	0.04%

(1) Losses incurred include refunded purchased servicing rights.

At September 30, 2015 and December 31, 2014, the mortgage origination segment's indemnification liability reserve totaled \$16.1 million and \$17.6 million, respectively. The related provision for indemnification losses was \$1.1 million and \$0.9 million during the three months ended September 30, 2015 and 2014, respectively, and \$3.1 million and \$2.3 million during the nine months ended September 30, 2015 and 2014, respectively.

Insurance Segment

Income before income taxes in our insurance segment was \$12.0 million and \$8.2 million during the three months ended September 30, 2015 and 2014, respectively, and \$8.6 million and \$14.1 million during the nine months ended September 30, 2015 and 2014. The insurance segment is subject to claims arising out of severe weather, the incidence and severity of which are inherently unpredictable. Generally, the insurance segment's insured risks exhibit higher losses in the second and third calendar quarters due to a seasonal concentration of weather-related events in its primary geographic markets. Although weather-related losses (including hail, high winds, tornadoes and hurricanes) can occur in any calendar quarter, the second calendar quarter, historically, has experienced the highest frequency of losses associated with these events. Hurricanes, however, are more likely to occur in the third calendar quarter of the year.

The insurance segment periodically reviews the pricing of its primary products in each state of operation utilizing a consulting actuarial firm to supplement normal review processes resulting in filings to increase rates as deemed necessary. The benefit of these rate actions are not fully realized until all customers renew their policies under the new rates, typically one year from the date of rate change implementation. Concurrently, business concentrations are reviewed and actions initiated, including cancellation of agents, non-renewal of policies and cessation of new business writing on certain products in problematic geographic areas. Rate actions have historically reduced the rate of premium growth for targeted areas when compared with the patterns exhibited in prior quarters and years and reduced the insurance segment's exposure to volatile weather in these areas, but competition and customer response to rate increases has negatively impacted customer retention and new business. The insurance segment aims to manage and diversify its business concentrations and products to minimize the effects of future weather-related events.

The insurance segment's operations resulted in combined ratios of 75.4% and 84.8% during the three months ended September 30, 2015 and 2014, respectively, and 97.6% and 93.4% during the nine months ended September 30, 2015 and 2014, respectively. The increase in the combined ratio during the nine months ended September 30, 2015, compared with the same period in 2014, was primarily driven by the effects of net insurance premiums earned being relatively flat, an increase in frequency and severity of severe weather events in our geographic coverage area, an increase in claims loss reserves associated with prior period adverse development related to litigation emerging from a series of hail storms within the 2012 through 2014 accident years, and additional costs associated with sales, marketing and corporate organizational initiatives. The combined ratio is a measure of overall insurance underwriting profitability, and represents the sum of loss and LAE and underwriting expenses divided by net insurance premiums earned.

Table of Contents

Noninterest income of \$43.5 million and \$44.0 million during the three months ended September 30, 2015 and 2014, respectively, included net insurance premiums earned of \$41.2 million and \$41.8 million, respectively, while noninterest income of \$128.2 million and \$129.9 million during the nine months ended September 30, 2015 and 2014, respectively, included net insurance premiums earned of \$121.1 million and \$122.9 million, respectively. The decreases in net insurance premiums earned were primarily due to the effect of changes in direct insurance premiums written.

Direct insurance premiums written by major product line are presented in the table below (in thousands).

	Three Months Ended September 30,		Variance 2015 vs 2014	Nine Months Ended September 30,		Variance 2015 vs 2014
	2015	2014		2015	2014	
Direct Insurance Premiums

Homeowners	\$ 18,728	\$ 19,644	\$ (916)	\$ 57,341	\$ 59,659	\$ (2,318)
Fire	12,865	13,329	(464)	40,776	42,289	(1,513)
Mobile Home	8,708	8,556	152	29,484	29,055	429
Commercial	933	965	(32)	2,833	3,126	(293)
Other	85	92	(7)	198	226	(28)
	\$ 41,319	\$ 42,586	\$ (1,267)	\$ 130,632	\$ 134,355	\$ (3,723)

The total direct insurance premiums written for our three largest insurance product lines decreased by \$1.2 million and \$3.4 million during the three and nine months ended September 30, 2015, respectively, compared with the same periods in 2014, due to efforts to reduce concentrations both geographically and within specific product lines, agent management initiatives, customer acceptance of rate increases and competitive pressure.

Net insurance premiums earned by major product line are presented in the table below (in thousands).

	Three Months Ended September 30,		Variance 2015 vs 2014	Nine Months Ended September 30,		Variance 2015 vs 2014
	2015	2014		2015	2014	
Net Insurance Premiums Earned:						

Edgar Filing: Hilltop Holdings Inc. - Form 10-Q

Homeowners	\$ 18,613	\$ 19,219	\$ (606)	\$ 53,149	\$ 54,580	\$ (1,431)
Fire	12,830	13,097	(267)	37,795	38,689	(894)
Mobile Home	8,745	8,467	278	27,328	26,581	747
Commercial	927	950	(23)	2,626	2,860	(234)
Other	81	88	(7)	183	207	(24)
	\$ 41,196	\$ 41,821	\$ (625)	\$ 121,081	\$ 122,917	\$ (1,836)

Net insurance premiums earned during the three and nine months ended September 30, 2015 decreased compared to the same periods in 2014, primarily due to the decreases in net insurance premiums written during 2015. This reduction in net insurance premiums earned when compared with the patterns exhibited in prior quarters and years was consistent with the insurance segment's previously discussed efforts to manage and diversify its business concentrations and products to minimize the effects of future weather-related events.

Noninterest expenses of \$32.4 million and \$36.6 million during the three months ended September 30, 2015 and 2014, respectively, and \$121.9 million and \$118.4 million during the nine months ended September 30, 2015 and 2014, respectively, include both loss and LAE expenses and policy acquisition and other underwriting expenses, as well as other noninterest expenses. Loss and LAE are recognized based on formula and case basis estimates for losses reported with respect to direct business, estimates of unreported losses based on past experience and deduction of amounts for reinsurance placed with reinsurers. Loss and LAE during the three months ended September 30, 2015 was \$17.3 million, compared with \$22.6 million during the same period in 2014, resulting in loss and LAE ratios of 42.1% and 54.1%, respectively. Loss and LAE during the nine months ended September 30, 2015 was \$77.4 million, compared with \$76.2 million during the same period in 2014, resulting in loss and LAE ratios of 64.0% and 62.0%, respectively. The decrease in the loss and LAE ratio during the three months ended September 30, 2015, compared to the same period in 2014, was primarily due to a lesser impact of non-catastrophic weather events in our geographic coverage area and changes in estimates of unreported losses from prior periods. The increase in the loss and LAE ratio during the nine months ended September 30, 2015, compared with the same period in 2014, was primarily due to the effects of net insurance premiums earned being relatively flat, the increase in frequency and severity of severe weather events in our geographic coverage

Table of Contents

area and the increase in claims loss reserves associated with prior period adverse development related to litigation emerging from a series of hail storms within the 2012 through 2014 accident years.

Policy acquisition and other underwriting expenses encompass all expenses incurred relative to NLC operations, and include elements of multiple categories of expense otherwise reported as noninterest expense in the consolidated statements of operations.

The following table details the calculation of the underwriting expense ratio for the periods presented (dollars in thousands).

	Three Months Ended September 30,		Variance 2015 vs 2014	Nine Months Ended September 30,		Variance 2015 vs 2014
	2015	2014		2015	2014	
Amortization of deferred policy acquisition costs	\$ 9,869	\$ 10,630	\$ (761)	\$ 31,034	\$ 31,229	\$ (195)
Other underwriting expenses	4,689	2,960	1,729	12,098	9,665	2,433

Agency expenses	(835)	(753)	(82)	(2,395)	(2,257)	(138)
Total less agency expenses	\$ 13,723	\$ 12,837	\$ 886	\$ 40,737	\$ 38,637	\$ 2,100
Net insurance premiums earned	\$ 41,196	\$ 41,821	\$ (625)	\$ 121,081	\$ 122,917	\$ (1,836)
Expense ratio	33.3 %	30.7 %	2.6 %	33.6 %	31.4 %	2.2 %

Corporate

Corporate includes certain activities not allocated to specific business segments. These activities include holding company financing and investing activities, and management and administrative services to support the overall operations of the Company including, but not limited to, certain executive management, corporate relations, legal, finance, and acquisition costs not allocated to business segments.

As a holding company, Hilltop's primary investment objectives are to preserve capital and have cash resources available to make acquisitions. Investment and interest income earned was \$0.1 million and \$1.7 million during the three months ended September 30, 2015 and 2014, respectively, and \$0.3 million and \$5.1 million during the nine months ended September 30, 2015 and 2014, respectively. On October 2, 2014, Hilltop exercised its warrant to purchase 8,695,652 shares of SWS common stock at an exercise price of \$5.75 per share. The aggregate exercise price was paid by the automatic elimination of the \$50.0 million aggregate principal amount note receivable from SWS. Consequently, recurring quarterly investment and interest income of \$1.6 million were no longer recognized beginning in the fourth calendar quarter of 2014. Investment and interest income during the three and nine months ended September 30, 2015 primarily consisted of intercompany interest earned on a note receivable held with First Southwest.

On April 9, 2015, as previously discussed, Hilltop completed its offering of \$150.0 million aggregate principal amount of Senior Notes and used the net proceeds of the offering to redeem all of its outstanding Series B Preferred Stock at an aggregate liquidation value of \$114.1 million, plus accrued but unpaid dividends of \$0.4 million. Consequently, recurring quarterly interest expense of \$1.9 million will be incurred. Interest expense related to the Senior Notes was \$1.9 million and \$3.6 million during the three and nine months ended September 30, 2015, respectively.

Noninterest income of \$81.3 million during the nine months ended September 30, 2015 represents the recognition of a preliminary bargain purchase gain related to the SWS Merger of \$81.3 million during the quarter ended March 31, 2015 which was previously allocated to the banking and broker-dealer segments. Included in the preliminary bargain purchase gain is a reversal of a \$33.4 million valuation allowance against SWS deferred tax assets. This amount is based on our expected ability to realize these acquired deferred tax assets through our consolidated core earnings, the implementation of certain tax planning strategies and reversal of timing differences. SWS's net operating loss carryforwards are subject to an annual limitation on their usage because of the ownership change.

Noninterest expenses of \$6.0 million and \$5.0 million during the three months ended September 30, 2015 and 2014, respectively, and \$17.5 million and \$9.8 million during the nine months ended September 30, 2015 and 2014, respectively, were primarily comprised of employees' compensation and benefits and professional fees, including corporate governance, legal and transaction costs. During the three and nine months ended September 30, 2015, compared with the same periods in 2014, noninterest expenses included year-over-year increases in employees' compensation and benefits costs of \$0.7 million and \$2.4 million, respectively, associated with increases in headcount

Table of Contents

and incentive compensation costs as well as transaction and integration-related costs directly attributable to the SWS Merger. During the nine months ended September 30, 2015, Hilltop incurred pre-tax transaction costs related to the SWS Merger of \$3.5 million and pre-tax integration-related costs associated with professional fees of \$0.4 million, compared with \$0.7 million in pre-tax transaction costs related to the SWS Merger during the nine months ended September 30, 2014.

Financial Condition

The following discussion contains a more detailed analysis of our financial condition at September 30, 2015 as compared with December 31, 2014.

Securities Portfolio

At September 30, 2015, investment securities consisted of securities of the U.S. Treasury, U.S. government and its agencies, obligations of municipalities and other political subdivisions, primarily in the State of Texas, mortgage-backed, corporate debt, and equity securities. We may categorize investments as trading, available for sale and held to maturity.

Trading securities are bought and held principally for the purpose of selling them in the near term and are carried at fair value, marked to market through operations and held at the Bank and the Hilltop Broker-Dealers. Securities that may be sold in response to changes in market interest rates, changes in securities' prepayment risk, increases in loan demand, general liquidity needs and other similar factors are classified as available for sale and are carried at estimated fair value, with unrealized gains and losses recorded in accumulated other comprehensive income (loss). Securities are classified as held to maturity based on the intent and ability of our management, at the time of purchase, to hold such securities to maturity. These securities are carried at amortized cost.

Table of Contents

The table below summarizes our securities portfolio (in thousands).

	September 30, 2015	December 31, 2014
Trading securities, at fair value

Commercial mortgage-backed securities	12,860	29,782
Collateralized mortgage obligations	177,968	57,328
States and political subdivisions	17,353	6,091
	305,316	118,209
Total securities portfolio	\$ 1,323,866	\$ 1,109,461

We had net unrealized gains of \$6.9 million and \$0.8 million at September 30, 2015 and December 31, 2014 related to the available for sale investment portfolio, while net unrealized gains associated with the securities held to maturity portfolio were \$2.7 million and \$0.1 million at September 30, 2015 and December 31, 2014, respectively.

Banking Segment

The banking segment's securities portfolio plays a role in the management of our interest rate sensitivity and generates additional interest income. In addition, the securities portfolio is used to meet collateral requirements for public and trust deposits, securities sold under agreements to repurchase and other purposes. The available for sale securities portfolio serves as a source of liquidity. Historically, the Bank's policy has been to invest primarily in securities of the U.S. government and its agencies, obligations of municipalities in the State of Texas and other high grade fixed income securities to minimize credit risk. At September 30, 2015, the banking segment's securities portfolio of \$901.7 million was comprised of trading securities of \$20.5 million, available for sale securities of \$575.9 million and held to maturity securities of \$305.3 million.

Broker-Dealer Segment

Our broker-dealer segment holds securities to support sales, underwriting and other customer activities. The Hilltop Broker-Dealers are required to carry their securities at fair value and record changes in the fair value of the portfolio in operations. Accordingly, the Hilltop Broker-Dealers classify their aggregate securities portfolio of \$271.9 million at

Table of Contents

September 30, 2015 as trading. In addition, the Hilltop Broker-Dealers enter into transactions that represent commitments to purchase and deliver securities at prevailing future market prices to facilitate customer transactions and satisfy such commitments. Accordingly, the Hilltop Broker-Dealers' ultimate obligation may exceed the amount recognized in the financial statements. These securities, which are carried at fair value and reported as securities sold, not yet purchased in the consolidated balance sheet, had a value of \$156.8 million at September 30, 2015.

Insurance Segment

Our insurance segment's primary investment objective is to preserve capital and manage for a total rate of return. NLC's strategy is to purchase securities in sectors that represent the most attractive relative value. Our insurance segment invests the premiums it receives from policyholders until they are needed to pay policyholder claims or other expenses. At September 30, 2015, the insurance segment's securities portfolio was comprised of \$150.1 million in available for sale securities and \$8.1 million of other investments included in other assets within the consolidated balance sheet.

Non-Covered Loan Portfolio

Consolidated non-covered loans held for investment are detailed in the table below, classified by portfolio segment and segregated between those considered to be PCI loans and all other originated or acquired loans (in thousands). PCI loans showed evidence of credit deterioration on the date of acquisition that made it probable that all contractually required principal and interest payments would not be collected.

	Loans, excluding PCI Loans	PCI Loans	Total Loans
September 30, 2015			
Commercial and industrial	\$ 2,107,893	\$ 13,649	\$ 2,121,542

Non-covered loans, gross	3,871,567	48,909	3,920,476
Allowance for loan losses	(31,722)	(5,319)	(37,041)
Non-covered loans, net of allowance	\$ 3,839,845	\$ 43,590	\$ 3,883,435

Banking Segment

The loan portfolio constitutes the major earning asset of the banking segment and typically offers the best alternative for obtaining the maximum interest spread above the banking segment's cost of funds. The overall economic strength of the banking segment generally parallels the quality and yield of its loan portfolio. The banking segment's loan portfolio is presented below in two sections, "— Non-Covered Loan Portfolio" and "— Covered Loan Portfolio." The "Covered Loan Portfolio" consists of loans acquired in the FNB Transaction that are subject to loss-share agreements with the FDIC and is discussed below. The "Non-Covered Loan Portfolio" includes all other loans held by the Bank, which we refer to as "non-covered loans," and is discussed herein.

The banking segment's total non-covered loans, net of the allowance for non-covered loan losses, were \$5.6 billion and \$4.7 billion at September 30, 2015 and December 31, 2014, respectively. The banking segment's non-covered loan portfolio includes a \$1.5 billion warehouse line of credit extended to PrimeLending, of which \$1.2 billion was drawn at each of September 30, 2015 and December 31, 2014. During July 2015, this warehouse line of credit was temporarily increased to a commitment of \$1.8 billion and reverted to a commitment of \$1.5 billion on October 1, 2015. Amounts

Table of Contents

advanced against the warehouse line of credit are eliminated from net loans on our consolidated balance sheets. The banking segment does not generally participate in syndicated loan transactions and has no foreign loans in its portfolio.

At September 30, 2015, the banking segment had non-covered loan concentrations (loans to borrowers engaged in similar activities) that exceeded 10% of total non-covered loans in its real estate portfolio. The areas of concentration within our non-covered real estate portfolio were non-construction commercial real estate loans, non-construction residential real estate loans, and construction and land development loans, which represented 30.5%, 14.6% and 11.5%, respectively, of the banking segment's total non-covered loans at September 30, 2015. The banking segment's non-covered loan concentrations were within regulatory guidelines at September 30, 2015.

Broker-Dealer Segment

The loan portfolio of the broker-dealer segment consists primarily of margin loans to customers and correspondents that are included within the commercial and industrial portfolio segment in the table above. These loans are collateralized by the securities purchased or by other securities owned by the clients and, because of collateral coverage ratios, are believed to present minimal collectability exposure. Additionally, these loans are subject to a number of regulatory requirements as well as the Hilltop Broker-Dealers' internal policies. The broker-dealer segment's total non-covered loans, net of the allowance for non-covered loan losses, were \$606.0 million and \$378.3 million at September 30, 2015 and December 31, 2014, respectively. This increase was primarily attributable to the inclusion of the operations acquired in the SWS Merger, partially offset by a decrease of \$34.2 million in borrowings in margin accounts held by FSC customers and correspondents.

Mortgage Origination Segment

The loan portfolio of the mortgage origination segment consists of loans held for sale, primarily single-family residential mortgages funded through PrimeLending, and IRLCs with customers pursuant to which we agree to originate a mortgage loan on a future date at an agreed-upon interest rate. The components of the mortgage origination segment's loans held for sale and IRLCs are as follows (in thousands).

	September 30, 2015	December 31, 2014
Loans held for sale:		
Unpaid principal balance	\$ 1,249,521	\$ 1,218,792
Fair value adjustment	56,133	53,360

Edgar Filing: Hilltop Holdings Inc. - Form 10-Q

	\$ 1,305,654	\$ 1,272,152
IRLCs:		
Unpaid principal balance	\$ 1,135,528	\$ 621,216
Fair value adjustment	34,539	17,057
	\$ 1,170,067	\$ 638,273

The mortgage origination segment uses forward commitments to mitigate interest rate risk associated with its loans held for sale and IRLCs. The notional amounts of these forward commitments at September 30, 2015 and December 31, 2014 were \$2.0 billion and \$1.5 billion, respectively, while the related estimated fair values were (\$12.9) million and (\$11.1) million, respectively.

Covered Loan Portfolio

Banking Segment

Loans acquired in the FNB Transaction that are subject to loss-share agreements with the FDIC are referred to as “covered loans” and reported separately in our consolidated balance sheets. Under the terms of the loss-share agreements, the FDIC has agreed to reimburse the Bank the following amounts with respect to the covered assets (including covered loans): (i) 80% of net losses on the first \$240.4 million of net losses incurred; (ii) 0% of net losses in excess of \$240.4 million up to and including \$365.7 million of net losses incurred; and (iii) 80% of net losses in excess of \$365.7 million of net losses incurred. Net losses are defined as book value losses plus certain defined expenses incurred in the resolution of assets, less subsequent recoveries. Under the loss-share agreement for commercial assets, the amount of subsequent recoveries that are reimbursable to the FDIC for a particular asset is limited to book value

Table of Contents

losses and expenses actually billed plus any book value charge-offs incurred prior to September 13, 2013 (the “Bank Closing Date”). There is no limit on the amount of subsequent recoveries reimbursable to the FDIC under the loss-share agreement for single family residential assets. The loss-share agreements for commercial and single family residential assets are in effect for 5 years and 10 years, respectively, and the loss recovery provisions to the FDIC are in effect for 8 years and 10 years, respectively, from the Bank Closing Date. In accordance with the loss-share agreements, the Bank may be required to make a “true-up” payment to the FDIC approximately 10 years following the Bank Closing Date if the FDIC’s initial estimate of losses on covered assets is greater than the actual realized losses. The “true-up” payment is calculated using a defined formula set forth in the Purchase and Assumption Agreement by and among the FDIC (as receiver of FNB), the Bank and the FDIC (the “P&A Agreement”). As of September 30, 2015, the Bank estimated that the sum of covered losses and reimbursable expenses subject to the loss-share agreements will exceed \$240.4 million, but will not exceed \$365.7 million. Unless actual plus projected covered losses and reimbursable expenses exceed \$365.7 million, the Bank will not record additional amounts to the receivable under the loss-share agreements with the FDIC (“FDIC Indemnification Asset”). As of September 30, 2015, the Bank had billed \$123.7 million of covered net losses to the FDIC, of which 80%, or \$98.9 million, were reimbursable under the loss-share agreements. As of September 30, 2015, the Bank had received aggregate reimbursements of \$98.9 million from the FDIC.

In connection with the FNB Transaction, the Bank acquired loans both with and without evidence of credit quality deterioration since origination. Based on purchase date valuations, the banking segment’s portfolio of acquired covered loans had a fair value of \$1.1 billion as of the Bank Closing Date, with no carryover of any allowance for loan losses. Unless the banking segment acquires additional loans subject to loss-share agreements with the FDIC, the covered portfolio will continue to decrease as covered loans are liquidated.

Covered loans held for investment are detailed in the table below and classified by portfolio segment (in thousands).

	Loans, excluding PCI Loans	PCI Loans	Total Loans
September 30, 2015			
Commercial and industrial	\$ 5,419	\$ 9,553	\$ 14,972

Allowance for loan losses	(77)	(4,534)	(4,611)
Covered loans, net of allowance	\$ 207,175	\$ 430,854	\$ 638,029

At September 30, 2015, the banking segment had covered loan concentrations (loans to borrowers engaged in similar activities) that exceeded 10% of total covered loans in its real estate portfolio. The areas of concentration within our covered real estate portfolio were non-construction residential real estate loans and non-construction commercial real estate loans, which represented 54.4% and 34.1%, respectively, of the banking segment's total covered loans at September 30, 2015. The banking segment's covered loan concentrations were within regulatory guidelines at September 30, 2015.

Table of Contents

Allowance for Loan Losses

The allowance for loan losses is a reserve established through a provision for loan losses charged to expense, which represents management's best estimate of probable losses inherent in our existing non-covered and covered loan portfolios.

It is management's responsibility at the end of each quarter, or more frequently as deemed necessary, to analyze the level of the allowance for loan losses to ensure that it is appropriate for the estimated credit losses in the portfolio. Estimated credit losses are the probable current amount of loans that we will be unable to collect given facts and circumstances as of the evaluation date. When management determines that a loan, or portion thereof, is uncollectible, the loan, or portion thereof, is charged-off against the allowance for loan losses, or for acquired loans accounted for in pools, charged against the pool discount. Recoveries on charge-offs of loans acquired in the Bank Transactions that occurred prior to their acquisition represent contractual cash flows not expected to be collected and are recorded as accretion income. Recoveries on acquired loans charged-off subsequent to their acquisition are credited to the allowance for loan loss, except for recoveries on loans accounted for in pools, which are credited to the pool discount.

The allowance for loan losses is subject to regulatory examination and determination as to adequacy, which may take into account such factors as the methodology used to calculate the allowance and the size of the allowance. While we believe we have an appropriate allowance for our existing non-covered and covered portfolios at September 30, 2015, additional provisions for losses on existing loans may be necessary in the future. Within our non-covered portfolio, we recorded net charge-offs of \$1.8 million and \$1.6 million during the three months ended September 30, 2015 and 2014, respectively, and net charge-offs of \$1.7 million and \$3.9 million during the nine months ended September 30, 2015 and 2014, respectively. Our allowance for non-covered loan losses totaled \$43.0 million and \$37.0 million at September 30, 2015 and December 31, 2014, respectively. The ratio of the allowance for non-covered loan losses to total non-covered loans held for investment at September 30, 2015 and December 31, 2014 was 0.86% and 0.94%, respectively. Within our covered portfolio, we recorded net charge-offs of \$0.4 million and \$0.2 million during the three months ended September 30, 2015 and 2014, respectively, and \$3.5 million and \$0.5 million during the nine months ended September 30, 2015 and 2014, respectively. Our allowance for covered loan losses totaled \$1.9 million and \$4.6 million at September 30, 2015 and December 31, 2014, respectively. The ratio of the allowance for covered loan losses to total covered loans held for investment at September 30, 2015 and December 31, 2014 was 0.44% and 0.72%, respectively.

In connection with the Bank Transactions, we acquired loans both with and without evidence of credit quality deterioration since origination. PCI loans acquired in the PlainsCapital Merger are accounted for on an individual loan basis, while PCI loans acquired in each of the FNB Transaction and the SWS Merger are accounted for in pools as well as on an individual loan basis. We have established under our PCI accounting policy a framework to aggregate certain acquired loans into various loan pools based on a minimum of two layers of common risk characteristics for the purpose of determining their respective fair values as of their acquisition dates, and for applying the subsequent recognition and measurement provisions for income accretion and impairment testing. The common risk characteristics used for the pooling of the FNB and SWS PCI loans are risk grade and loan collateral type. The loans acquired in the Bank Transactions were initially recorded at fair value with no carryover of any allowance for loan

losses.

Provisions for loan losses are charged to operations to record the total allowance for loan losses at a level deemed appropriate by the banking segment's management based on such factors as the volume and type of lending it conducted, the amount of non-performing loans and related collateral security, the present level of the allowance for loan losses, the results of recent regulatory examinations, generally accepted accounting principles, general economic conditions and other factors related to the ability to collect loans in its portfolio. The provision for loan losses, primarily in the banking segment, was \$5.6 million and \$4.0 million during the three months ended September 30, 2015 and 2014, respectively, and \$8.4 million and \$12.8 million during the nine months ended September 30, 2015 and 2014, respectively.

Table of Contents

The following tables present the activity in our allowance for loan losses within our non-covered and covered loan portfolios for the periods presented (in thousands). Substantially all of the activity shown below occurred within the banking segment.

	Three Months Ended September 30,		Nine Months Ended September 30,

Potential Problem Loans

Potential problem loans consist of loans that are performing in accordance with contractual terms but for which management has concerns about the ability of an obligor to continue to comply with repayment terms because of the obligor's potential operating or financial difficulties. Management monitors these loans and reviews their performance on a regular basis. Potential problem loans contain potential weaknesses that could improve, persist or further deteriorate. If such potential weaknesses persist without improving, the loan is subject to downgrade, typically to substandard, in three to six months. Potential problem loans are assigned a grade of special mention within our risk grading matrix. Potential problem loans do not include PCI loans since these loans exhibited evidence of credit deterioration at acquisition that made it probable that all contractually required principal payments would not be collected. Within our non-covered loan portfolio at September 30, 2015, we had six credit relationships totaling \$10.9 million of potential problem loans, compared with three credit relationships totaling \$1.8 million of non-covered potential problem loans at December 31, 2014. Within our covered loan portfolio at September 30, 2015, we had one credit relationship totaling \$0.5 million of potential problem loans, compared with no credit relationships with potential problem loans at December 31, 2014.

Non-Performing Assets

The following table presents components of our non-covered non-performing assets (dollars in thousands).

	September 30, 2015	December 31, 2014
Non-covered loans accounted for on a non-accrual basis:		
Commercial and industrial	\$ 22,302	\$ 16,648
Real estate	7,087	4,707
Construction and land development	118	703
Consumer	14	—

Edgar Filing: Hilltop Holdings Inc. - Form 10-Q

	\$	29,521		\$	22,058
Non-covered non-performing loans as a percentage of total non-covered loans		0.46	%	0.42	%
Non-covered other real estate owned	\$	511		\$	808
Other repossessed assets	\$	—		\$	361
Non-covered non-performing assets	\$	30,032		\$	23,227
Non-covered non-performing assets as a percentage of total assets		0.24	%	0.25	%
Non-covered loans past due 90 days or more and still accruing	\$	37,435		\$	19,237
Troubled debt restructurings included in accruing non-covered loans	\$	3,664		\$	2,901

At September 30, 2015, total non-covered non-performing assets increased \$6.8 million to \$30.0 million, compared with \$23.2 million at December 31, 2014. Non-covered non-performing loans totaled \$29.5 million at September 30, 2015 and \$22.1 million at December 31, 2014. At September 30, 2015, non-covered non-accrual loans included 21 commercial and industrial relationships with loans of \$22.0 million secured by accounts receivable, inventory, equipment and life insurance, and a total of \$0.3 million in lease financing receivables. Non-covered non-accrual loans at September 30, 2015 also included \$7.1 million characterized as real estate loans, including four commercial real estate

Table of Contents

loan relationships of \$4.6 million and loans secured by residential real estate of \$2.5 million, \$1.5 million of which were classified as loans held for sale, as well as construction and land development loans of \$0.1 million. At December 31, 2014, non-covered non-accrual loans included twelve commercial and industrial relationships with loans of \$15.0 million secured by accounts receivable, inventory, equipment and life insurance, and a total of \$1.6 million in lease financing receivables. Non-covered non-accrual loans at December 31, 2014 also included \$4.7 million characterized as real estate loans, including two commercial real estate loan relationships of \$0.4 million and loans secured by residential real estate of \$1.3 million, \$3.0 million of which were classified as loans held for sale, as well as construction and land development loans of \$0.7 million.

Non-covered OREO decreased \$0.3 million to \$0.5 million at September 30, 2015, compared with \$0.8 million at December 31, 2014. Changes in non-covered OREO included the disposal of nine properties totaling \$6.5 million, eight of which were acquired in the SWS Merger. At September 30, 2015, non-covered OREO included commercial properties of \$0.4 million. At December 31, 2014, non-covered OREO included commercial properties of \$0.4 million and commercial real estate property consisting of parcels of unimproved land of \$0.4 million.

Non-covered non-PCI loans past due 90 days or more and still accruing were \$37.4 million and \$19.2 million at September 30, 2015 and December 31, 2014, respectively, all of which were loans held for sale and guaranteed by U.S. Government agencies, including loans that are subject to repurchase, or have been repurchased, by PrimeLending.

At September 30, 2015, troubled debt restructurings ("TDRs") on non-covered loans totaled \$9.8 million. These TDRs were comprised of \$3.7 million of non-covered loans that are considered to be performing and non-covered non-performing loans of \$6.1 million reported in non-accrual loans. At December 31, 2014, TDRs on non-covered loans totaled \$10.3 million, of which \$2.9 million relate to non-covered loans that are considered to be performing and non-covered non-performing loans of \$7.4 million reported in non-accrual loans.

The following table presents components of our covered non-performing assets (dollars in thousands).

	September 30, 2015	December 31, 2014
Covered loans accounted for on a non-accrual basis:		
Commercial and industrial	\$ 71	\$ 1,325
Real estate	1,938	31,869
Construction and land development	800	1,029
Consumer	—	—
	\$ 2,809	\$ 34,223

Edgar Filing: Hilltop Holdings Inc. - Form 10-Q

Covered non-performing loans as a percentage of total covered loans	0.66	%	5.33	%
Covered other real estate owned:				
Real estate - residential	\$ 15,916		\$ 15,711	
Real estate - commercial	35,165		40,889	
Construction and land development - residential	12,010		21,719	
Construction and land development - commercial	42,933		58,626	
	\$ 106,024		\$ 136,945	
Other repossessed assets	\$ —		\$ —	
Covered non-performing assets	\$ 108,833		\$ 171,168	
Covered non-performing assets as a percentage of total assets	0.88	%	1.85	%
Covered loans past due 90 days or more and still accruing	\$ 2,094		\$ 67	
Troubled debt restructurings included in accruing covered loans	\$ 518		\$ 326	

At September 30, 2015, covered non-performing assets decreased by \$62.3 million to \$108.8 million, compared with \$171.2 million at December 31, 2014, due to decreases in covered non-accrual loans of \$31.4 million and covered other real estate owned of \$30.9 million. Covered non-performing loans totaled \$2.8 million at September 30, 2015 and \$34.2

Table of Contents

million at December 31, 2014. At September 30, 2015, covered non-performing loans included four commercial and industrial relationships with loans of \$0.1 million secured by accounts receivable and inventory, one commercial real estate loan relationship of \$0.5 million, 14 residential real estate loan relationships of \$1.4 million, as well as construction and land development loans of \$0.8 million. At December 31, 2014, covered non-performing loans included two commercial and industrial relationships with loans of \$1.2 million secured by accounts receivable and inventory, four commercial real estate loan relationships of \$30.8 million, nine residential real estate loan relationships of \$1.1 million, as well as construction and land development loans of \$1.0 million.

OREO acquired in the FNB Transaction that is subject to the FDIC loss-share agreements is referred to as “covered OREO” and reported separately in our consolidated balance sheets. Covered OREO decreased \$30.9 million to \$106.0 million at September 30, 2015, compared with \$136.9 million at December 31, 2014. The decrease was primarily due to the disposal of 207 properties totaling \$61.1 million and fair value valuation decreases of \$9.4 million, partially offset by the addition of 102 properties totaling \$39.6 million.

Covered non-PCI loans past due 90 days or more and still accruing totaled \$2.1 million at September 30, 2015 and included eight residential real estate loans, a commercial real estate loan, and a commercial construction and land development loan. Covered non-PCI loans past due 90 days or more and still accruing totaled \$0.1 million at December 31, 2014 and included a secured commercial and industrial loan, a construction and land development loan, and a residential real estate loan.

At September 30, 2015, TDRs on covered loans totaled \$1.2 million, of which \$0.5 million relate to covered loans that are considered to be performing and covered non-performing loans of \$0.7 million included in non-accrual loans. At December 31, 2014, TDRs on covered loans totaled \$0.7 million, of which \$0.3 million relate to covered loans that are considered to be performing and covered non-performing loans of \$0.4 million included in non-accrual loans.

Insurance Losses and Loss Adjustment Expenses

At September 30, 2015 and December 31, 2014, our gross reserve for unpaid losses and LAE were \$42.9 million and \$29.7 million, respectively, including estimated recoveries from reinsurance of \$14.3 million and \$4.3 million, respectively. The increase in the gross reserve for unpaid losses and LAE was primarily due to increased reserves attributable to prior period adverse development associated with litigation emerging from a series of hail storms within the 2012 through 2014 accident years and significant losses experienced from severe weather events. The liability for insurance losses and LAE represents estimates of the ultimate unpaid cost of all losses incurred, including losses for claims that have not yet been reported, less a reduction for reinsurance recoverables related to those liabilities. Separately for each of NLIC and ASIC and each line of business, our actuaries estimate the liability for unpaid losses and LAE by first estimating ultimate losses and LAE amounts for each year, prior to recognizing the impact of reinsurance. The amount of liabilities for reported claims is based primarily on a claim-by-claim evaluation of coverage, liability, injury severity or scope of property damage, and any other information considered relevant to estimating exposure presented by the claim.

NLC's liabilities for unpaid losses represent the best estimate at a given point in time of what it expects to pay claimants, based on facts, circumstances and historical trends then known. During the loss settlement period, additional facts regarding individual claims may become known and, consequently, it often becomes necessary to refine and adjust the estimates of liability. This process is commonly referred to as loss development. To project ultimate losses and LAE, our actuaries examine the paid and reported losses and LAE for each accident year and multiply these values by a loss development factor. The selected loss development factors are based upon a review of the loss development patterns indicated in the companies' historical loss triangles (which utilize historical trends, adjusted for changes in loss costs, underwriting standards, policy provisions, product mix and other factors) and applicable insurance industry loss development factors. Estimating the liability for unpaid losses and LAE is inherently judgmental and is influenced by factors that are subject to significant variation. Liabilities for LAE are intended to cover the ultimate cost of settling claims, including investigation and defense of lawsuits resulting from such claims.

The reserve analysis performed by our actuaries provides preliminary central estimates of the unpaid losses and LAE. At each quarter-end, the results of the reserve analysis are summarized and discussed with our senior management. The senior management group considers many factors in determining the amount of reserves to record for financial statement purposes. These factors include the extent and timing of any recent catastrophic events, historical pattern and volatility of the actuarial indications, the sensitivity of the actuarial indications to changes in paid and reported loss patterns, the

Table of Contents

consistency of claims handling processes, the consistency of case reserving practices, changes in our pricing and underwriting, and overall pricing and underwriting trends in the insurance market.

Deposits

The banking segment's major source of funds and liquidity is its deposit base. Deposits provide funding for its investments in loans and securities. Interest paid for deposits must be managed carefully to control the level of interest expense and overall net interest margin. The composition of the deposit base (time deposits versus interest-bearing demand deposits and savings), as discussed in more detail within the section entitled "Liquidity and Capital Resources — Banking Segment" below, is constantly changing due to the banking segment's needs and market conditions. Overall, average deposits totaled \$7.0 billion during the nine months ended September 30, 2015, an increase from average deposits of \$6.4 billion during the nine months ended September 30, 2014 and \$6.4 billion during the year ended December 31, 2014. The increase in average deposits during the nine months ended September 30, 2015, compared with the same period in 2014 and the year ended December 31, 2014, was primarily due to changes within our demand deposit and time deposit accounts. The increase in demand deposits between the noted periods primarily related to the inclusion of deposits assumed in the SWS Merger, while the decrease in time deposits between the noted periods was due to our strategic decision during the second quarter of 2014 to offer lower renewal rates on certain time deposits acquired in the FNB Transaction. For the periods presented in the table below, the average rates paid associated with time deposits include the effects of amortization of the deposit premiums booked as a part of the PlainsCapital Merger and the FNB Transaction.

The table below presents the average balance of, and rate paid on, consolidated deposits (dollars in thousands).

	Nine Months Ended September 30, 2015			2014			Year Ended December 31, 2014		
	Average Balance	Average Rate Paid		Average Balance	Average Rate Paid		Average Balance	Average Rate Paid	
Noninterest-bearing demand deposits	\$ 2,166,607	0.00	%	\$ 1,792,014	0.00	%	\$ 1,862,277	0.00	%
Interest-bearing demand deposits	3,015,738	0.14	%	2,266,350	0.22	%	2,249,527	0.22	%
Savings deposits	306,419	0.15	%	295,338	0.19	%	304,774	0.19	%
Time deposits	1,531,443	0.74	%	2,014,945	0.46	%	1,936,447	0.53	%
	\$ 7,020,207	0.23	%	\$ 6,368,647	0.23	%	\$ 6,353,025	0.25	%

Borrowings

Our borrowings are shown in the table below (dollars in thousands).

	September 30, 2015			December 31, 2014		
	Balance	Average Rate Paid		Balance	Average Rate Paid	
Short-term borrowings	\$ 910,490	0.53	%	\$ 762,696	0.32	%
Notes payable	243,556	3.75	%	56,684	4.27	%
Junior subordinated debentures	67,012	3.56	%	67,012	3.52	%
	\$ 1,221,058	1.28	%	\$ 886,392	0.88	%

Short-term borrowings consisted of federal funds purchased, securities sold under agreements to repurchase, borrowings at the Federal Home Loan Bank (“FHLB”) and short-term bank loans. The \$147.8 million increase in short-term borrowings at September 30, 2015 compared with December 31, 2014 was primarily due to an increase of \$177.0 million in short-term bank loans and securities sold under agreements to repurchase used by the Hilltop Broker-Dealers to finance their activities, slightly offset by decreases in borrowings of \$29.2 million in our banking segment as a result of seasonality at downstream correspondents. The increase in Hilltop Broker-Dealer borrowings was primarily due to the inclusion of the operations acquired in the SWS Merger. Notes payable at September 30, 2015 of \$243.6 million was comprised of \$148.2 million related to Senior Notes, net of loan origination fees, associated with our debt offering in April 2015, insurance segment term notes of \$54.5 million and FHLB borrowings with an original maturity greater than one year held by the former SWS FSB within the banking segment of \$40.9 million. For the 2015 period above, the average rate paid associated with notes payable includes the effect of amortization of the premiums on FHLB borrowings booked as a part of the SWS Merger.

Table of Contents

Liquidity and Capital Resources

Hilltop is a financial holding company whose assets primarily consist of the stock of its subsidiaries and invested assets. Hilltop's primary investment objectives, as a holding company, are to preserve capital and have cash resources available to make acquisitions. At September 30, 2015, Hilltop had \$41.1 million in freely available cash and cash equivalents, a decrease of \$104.9 million from \$146.0 million at December 31, 2014. This decrease in available cash was primarily due to the use of \$78.2 million to settle the cash portion of the merger consideration associated with the SWS Merger and use of \$19.3 million to satisfy federal tax obligations. If necessary or appropriate, we may also finance acquisitions with the proceeds from equity or debt issuances. Subject to regulatory restrictions, Hilltop may also receive dividends from its subsidiaries. The current short-term liquidity needs of Hilltop include operating expenses and interest on debt obligations.

Senior Notes due 2025

On April 9, 2015, we completed an offering of \$150.0 million aggregate principal amount of our Senior Unregistered Notes in a private offering that was exempt from the registration requirements of the Securities Act. The Senior Unregistered Notes were offered within the United States only to qualified institutional buyers pursuant to Rule 144A under the Securities Act, and to persons outside of the United States under Regulation S under the Securities Act. The Senior Unregistered Notes were issued pursuant to an indenture, dated as of April 9, 2015 (the "indenture"), by and between Hilltop and U.S. Bank National Association, as trustee. The net proceeds from the offering, after deducting estimated fees and expenses and the initial purchasers' discounts, were approximately \$148 million. We used the net proceeds of the offering to redeem all of our outstanding Series B Preferred Stock at an aggregate liquidation value of \$114.1 million, plus accrued but unpaid dividends of \$0.4 million and Hilltop is utilizing the remainder for general corporate purposes.

In connection with the issuance of the Senior Unregistered Notes, on April 9, 2015, we entered into a registration rights agreement with the initial purchasers of the Senior Unregistered Notes. Under the terms of the registration rights agreement, we agreed to offer to exchange the Senior Unregistered Notes for the Senior Registered Notes, which were registered under the Securities Act. The terms of the Senior Registered Notes are substantially identical to the Senior Unregistered Notes for which they were exchanged (including principal amount, interest rate, maturity and redemption rights), except that the Senior Registered Notes generally are not subject to transfer restrictions. On May 22, 2015, and subject to the terms and conditions set forth in the Senior Registered Notes prospectus, we commenced an offer to exchange the outstanding Senior Unregistered Notes for Senior Registered Notes. Substantially all of the Senior Unregistered Notes were tendered for exchange, and on June 22, 2015, we fulfilled all of the requirements of the registration rights agreement for the Senior Unregistered Notes by issuing Senior Registered Notes in exchange for the tendered Senior Unregistered Notes. We refer to the Senior Registered Notes and the Senior Unregistered Notes that remain outstanding collectively as the "Senior Notes."

The Senior Notes bear interest at a rate of 5% per year, payable semi-annually in arrears in cash on April 15 and October 15 of each year, commencing on October 15, 2015. The Senior Notes will mature on April 15, 2025, unless we redeem the Senior Notes, in whole at any time or in part from time to time, on or after January 15, 2025 (three months prior to the maturity date of the Senior Notes) at our election at a redemption price equal to 100% of the principal amount of the Senior Notes to be redeemed plus accrued and unpaid interest to, but excluding, the redemption date.

The indenture contains covenants that limit our ability to, among other things and subject to certain significant exceptions: (i) dispose of or issue voting stock of certain of our bank subsidiaries or subsidiaries that own voting stock of our bank subsidiaries, (ii) incur or permit to exist any mortgage, pledge, encumbrance or lien or charge on the capital stock of certain of our bank subsidiaries or subsidiaries that own capital stock of our bank subsidiaries and (iii) sell all or substantially all of our assets or merge or consolidate with or into other companies. The indenture also provides for certain events of default, which, if any of them occurs, would permit or require the principal amount, premium, if any, and accrued and unpaid interest on the then outstanding Senior Notes to be declared immediately due and payable.

Stock Repurchase Program

During the second quarter of 2015, our Board of Directors approved a stock repurchase program under which it authorized us to repurchase, in the aggregate, up to \$30.0 million of our outstanding common stock. Under the stock repurchase program authorized, we may repurchase shares in open-market purchases or through privately negotiated transactions as permitted under Rule 10b-18 promulgated under the Exchange Act. As of September 30, 2015, we had repurchased an aggregate of \$30.0 million of our outstanding common stock, and do not intend to make any future

Table of Contents

purchases of our common stock under this program. The extent to which we repurchased our shares and the timing of such repurchases depended upon market conditions and other corporate considerations, as determined by Hilltop's management team. The purchases were funded from available cash balances. During the three and nine months ended September 30, 2015, we paid \$13.0 million and \$30.0 million, respectively, to repurchase and retire an aggregate of 1,390,977 shares of common stock at an average price of \$21.56 per share. These retired shares were returned to our pool of authorized but unissued shares of common stock.

SWS

On January 1, 2015, we completed our acquisition of SWS in a stock and cash transaction, whereby SWS's broker-dealer subsidiaries became subsidiaries of Securities Holdings and SWS's banking subsidiary, SWS FSB, was merged into the Bank. As a result of the SWS Merger, each outstanding share of SWS common stock was converted into the right to receive 0.2496 shares of Hilltop common stock and \$1.94 in cash, equating to \$6.92 per share based on Hilltop's closing price on December 31, 2014 and resulting in an aggregate purchase price of \$349.1 million, consisting of 10.1 million shares of common stock, \$78.2 million in cash and \$70.3 million associated with our existing investment in SWS common stock. Additionally, due to appraisal rights proceedings filed in connection with the SWS Merger, the merger consideration is subject to change, and therefore, preliminary at this time. On October 22, 2015, FINRA granted approval to combine FSC and Hilltop Securities, subject to customary conditions. Over the next few months, the system integration will be completed and result in a combined firm under the Hilltop Securities name.

Loss-Share Agreements

In connection with the FNB Transaction, the Bank entered into two loss-share agreements with the FDIC that collectively cover \$1.2 billion of loans and OREO acquired in the FNB Transaction, which we refer to as "covered assets". Pursuant to the loss-share agreements, the FDIC has agreed to reimburse the Bank the following amounts with respect to the covered assets: (i) 80% of net losses on the first \$240.4 million of net losses incurred; (ii) 0% of net losses in excess of \$240.4 million up to and including \$365.7 million of net losses incurred; and (iii) 80% of net losses in excess of \$365.7 million of net losses incurred. Net losses are defined as book value losses plus certain defined expenses incurred in the resolution of assets, less subsequent recoveries. Under the loss-share agreement for commercial assets, the amount of subsequent recoveries that are reimbursable to the FDIC for a particular asset is limited to book value losses and expenses actually billed plus any book value charge-offs incurred prior to the Bank Closing Date. There is no limit on the amount of subsequent recoveries reimbursable to the FDIC under the loss-share agreement for single family assets. The loss-share agreements for commercial and single family residential loans are in effect for 5 years and 10 years, respectively, from the Bank Closing Date and the loss recovery provisions to the FDIC are in effect for 8 years and 10 years, respectively, from the Bank Closing Date. In accordance with the loss-share agreements, the Bank may be required to make a "true-up" payment to the FDIC approximately 10 years following the Bank Closing Date if the FDIC's initial estimate of losses on covered assets is greater than the actual realized losses. The "true-up" payment is calculated using a defined formula set forth in the P&A Agreement.

Regulatory Capital

We are subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements may prompt certain actions by regulators that, if undertaken, could have a direct material adverse effect on our financial condition and results of operations. Under capital adequacy and regulatory requirements, we must meet specific capital guidelines that involve quantitative measures of our assets, liabilities, and certain off-balance sheet items as calculated under regulatory accounting practices. Our capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings and other factors.

In January 2015, the new comprehensive capital framework (“Basel III”) for U.S. banking organizations became effective for the Bank and Hilltop for reporting periods beginning after January 1, 2015 (subject to a phase-in period through January 2019). Under Basel III, total capital consists of two tiers of capital, Tier 1 and Tier 2. Tier 1 capital is further composed of common equity Tier 1 capital and additional Tier 1 capital. Total capital is the sum of Tier 1 capital and Tier 2 capital.

In addition, under the final rules, bank holding companies with less than \$15 billion in assets as of December 31, 2009 are allowed to continue to include junior subordinated debentures in Tier 1 capital, subject to certain restrictions. However, if an institution grows to above \$15 billion in assets as a result of an acquisition, or organically grows to above

Table of Contents

\$15 billion in assets and then makes an acquisition, the combined trust preferred issuances must be phased out of Tier 1 and into Tier 2 capital (75% in 2015 and 100% in 2016). All of the debentures issued to the PCC Statutory Trusts I, II, III and IV (the “Trusts”), less the common stock of the Trusts, qualified as Tier 1 capital as of September 30, 2015, under guidance issued by the Board of Governors of the Federal Reserve System.

The final rules also provide for a number of adjustments to and deductions from the new common equity Tier 1 capital ratio, as well as changes to the calculation of risk weighted assets which is expected to increase the absolute level. Under current capital standards, the effects of accumulated other comprehensive items included in capital are excluded for the purposes of determining regulatory capital ratios. Under Basel III, the effects of certain accumulated other comprehensive items are not excluded; however, non-advanced approaches banking organizations, including Hilltop and the Bank, made a one-time permanent election to continue to exclude these items. Hilltop and the Bank made this election in order to avoid significant variations in the level of capital depending upon the impact of interest rate fluctuations on the fair value of our securities portfolio. In addition, deductions include, for example, the requirement that mortgage servicing rights, deferred tax assets dependent upon future taxable income and significant investments in non-consolidated financial entities be deducted from the common equity Tier 1 capital ratio to the extent that any one such category exceeds 10% of the common equity Tier 1 capital ratio or all such categories in the aggregate exceed 15% of the common equity Tier 1 capital ratio. Further, deferred tax assets which are related to operating losses and tax credit carryforward are excluded from the common equity Tier 1 capital ratio.

At September 30, 2015, Hilltop exceeded all regulatory capital requirements in accordance with Basel III with a total capital to risk weighted assets ratio of 19.29%, Tier 1 capital to risk weighted assets ratio of 18.89%, common equity Tier 1 capital to risk weighted assets ratio of 18.36% and a Tier 1 capital to average assets, or leverage, ratio of 12.01%. The Bank’s consolidated actual capital amounts and ratios at September 30, 2015 resulted in it being considered “well-capitalized” under regulatory requirements in accordance with Basel III, and included a total capital to risk weighted assets ratio of 18.13%, Tier 1 capital to risk weighted assets ratio of 17.36%, common equity Tier 1 capital to risk weighted assets ratio of 17.36% and a Tier 1 capital to average assets, or leverage, ratio of 12.77%. We discuss regulatory capital requirements in more detail in Note 16 to our consolidated financial statements, as well as under the caption “Government Supervision and Regulation — Banking — BASEL III” set forth in Part I, Item I. of our 2014 Form 10-K.

Banking Segment

Within our banking segment, liquidity refers to the measure of our ability to meet our customers’ short-term and long-term deposit withdrawals and anticipated and unanticipated increases in loan demand without penalizing earnings. Interest rate sensitivity involves the relationships between rate-sensitive assets and liabilities and is an indication of the probable effects of interest rate fluctuations on our net interest income.

Our asset and liability group is responsible for continuously monitoring our liquidity position to ensure that assets and liabilities are managed in a manner that will meet our short-term and long-term cash requirements. Funds invested in

short-term marketable instruments, the continuous maturing of other interest-earning assets, cash flows from self-liquidating investments such as mortgage-backed securities and collateralized mortgage obligations, the possible sale of available for sale securities, and the ability to securitize certain types of loans provide sources of liquidity from an asset perspective. The liability base provides sources of liquidity through deposits and the maturity structure of short-term borrowed funds. For short-term liquidity needs, we utilize federal fund lines of credit with correspondent banks, securities sold under agreements to repurchase, borrowings from the Federal Reserve and borrowings under lines of credit with other financial institutions. For intermediate liquidity needs, we utilize advances from the FHLB. To supply liquidity over the longer term, we have access to brokered time deposits, term loans at the FHLB and borrowings under lines of credit with other financial institutions.

We had deposits of \$6.8 billion at September 30, 2015, an increase of \$450.9 million from \$6.4 billion at December 31, 2014. This increase is primarily due to the inclusion of deposits assumed in the SWS Merger, offset by seasonal factors related to our customers' requirements to satisfy prior year-end tax obligations. Deposit flows are affected by the level of market interest rates, the interest rates and products offered by competitors, the volatility of equity markets and other factors. At September 30, 2015, money market deposits, including brokered deposits, were \$1.5 billion; time deposits, including brokered deposits, were \$1.4 billion; and noninterest bearing demand deposits were \$2.2 billion. Money market deposits, including brokered deposits, increased by \$586.4 million from \$0.9 million and time deposits, including brokered deposits, decreased \$243.7 million from \$1.7 billion at December 31, 2014.

Table of Contents

The Bank's 15 largest depositors, excluding Hilltop Securities, accounted for 10.75% of the Bank's total deposits, and the Bank's five largest depositors, excluding Hilltop Securities, accounted for 5.95% of the Bank's total deposits at September 30, 2015. The loss of one or more of our largest Bank customers, or a significant decline in our deposit balances due to ordinary course fluctuations related to these customers' businesses, could adversely affect our liquidity and might require us to raise deposit rates to attract new deposits, purchase federal funds or borrow funds on a short-term basis to replace such deposits. We have not experienced any liquidity issues to date with respect to brokered deposits or our other large balance deposits, and we believe alternative sources of funding are available to more than compensate for the loss of one or more of these customers.

Broker-Dealer Segment

The Hilltop Broker-Dealers rely on their equity capital, short-term bank borrowings, interest-bearing and non-interest-bearing client credit balances, correspondent deposits, securities lending arrangements, repurchase agreement financings and other payables to finance its assets and operations. At September 30, 2015, FSC had credit arrangements with four unaffiliated banks of up to \$330.0 million and Hilltop Securities had credit arrangements with five unaffiliated banks of up to \$525.0 million. During October 2015, Hilltop Securities entered into a new credit arrangement of \$75.0 million with an additional unaffiliated bank. These credit arrangements are used to finance securities owned, securities held for correspondent accounts, receivables in customer margin accounts and underwriting activities. These credit arrangements are provided on an "as offered" basis and are not committed lines of credit. At September 30, 2015, FSC and Hilltop Securities had borrowed \$111.7 million and \$105.0 million, respectively, under these credit arrangements. In addition, Hilltop Securities has a committed revolving credit facility with an unaffiliated bank of up to \$45.0 million. At September 30, 2015, Hilltop Securities had outstanding borrowings of \$15.0 million under this credit facility.

Mortgage Origination Segment

PrimeLending funds the mortgage loans it originates through a warehouse line of credit of up to \$1.5 billion maintained with the Bank. At September 30, 2015, PrimeLending had outstanding borrowings of \$1.2 billion against the warehouse line of credit. During July 2015, this warehouse line of credit was temporarily increased to a commitment of \$1.8 billion and reverted to a commitment of \$1.5 billion on October 1, 2015. PrimeLending sells substantially all mortgage loans it originates to various investors in the secondary market, the majority with servicing released. As these mortgage loans are sold in the secondary market, PrimeLending pays down its warehouse line of credit with the Bank. In addition, PrimeLending has an available line of credit with JPMorgan Chase Bank, NA ("JPMorgan Chase") of up to \$1.0 million. At September 30, 2015, PrimeLending had no borrowings under the JPMorgan Chase line of credit.

Insurance Segment

Our insurance operating subsidiary's primary investment objectives are to preserve capital and manage for a total rate of return. NLC's strategy is to purchase securities in sectors that represent the most attractive relative value. Bonds, cash and short-term investments of \$218.7 million, or 89.6%, equity investments of \$17.5 million and other investments of \$8.1 million comprised NLC's \$244.3 million in total cash and investments at September 30, 2015. NLC does not currently have any significant concentration in both direct and indirect guarantor exposure or any investments in subprime mortgages. NLC has custodial agreements with Wells Fargo Bank, N.A. and an investment management agreement with DTF Holdings, LLC.

Impact of Inflation and Changing Prices

Our consolidated financial statements included herein have been prepared in accordance with GAAP, which presently require us to measure financial position and operating results primarily in terms of historic dollars. Changes in the relative value of money due to inflation or recession are generally not considered. The primary effect of inflation on our operations is reflected in increased operating costs. In management's opinion, changes in interest rates affect the financial condition of a financial institution to a far greater degree than changes in the inflation rate. While interest rates are greatly influenced by changes in the inflation rate, they do not necessarily change at the same rate or in the same magnitude as the inflation rate. Interest rates are highly sensitive to many factors that are beyond our control, including changes in the expected rate of inflation, the influence of general and local economic conditions and the monetary and fiscal policies of the U.S. government, its agencies and various other governmental regulatory authorities.

Table of Contents

Off-Balance Sheet Arrangements; Commitments; Guarantees

In the normal course of business, we enter into various transactions, which, in accordance with GAAP, are not included in our consolidated balance sheets. We enter into these transactions to meet the financing needs of our customers. These transactions include commitments to extend credit and standby letters of credit, which involve, to varying degrees, elements of credit risk and interest rate risk in excess of the amounts recognized in our consolidated balance sheets.

We enter into contractual loan commitments to extend credit, normally with fixed expiration dates or termination clauses, at specified rates and for specific purposes. Substantially all of our commitments to extend credit are contingent upon customers maintaining specific credit standards until the time of loan funding. We minimize our exposure to loss under these commitments by subjecting them to credit approval and monitoring procedures. We assess the credit risk associated with certain commitments to extend credit and have recorded a liability related to such credit risk in our consolidated financial statements.

Standby letters of credit are written conditional commitments issued by us to guarantee the performance of a customer to a third party. In the event the customer does not perform in accordance with the terms of the agreement with the third party, we would be required to fund the commitment. The maximum potential amount of future payments we could be required to make is represented by the contractual amount of the commitment. If the commitment is funded, we would be entitled to seek recovery from the customer. Our policies generally require that standby letter of credit arrangements contain security and debt covenants similar to those contained in loan agreements.

In the aggregate, the Bank had outstanding unused commitments to extend credit of \$1.6 billion at September 30, 2015 and outstanding financial and performance standby letters of credit of \$45.5 million at September 30, 2015.

In the normal course of business, the Hilltop Broker-Dealers execute, settle and finance various securities transactions that may expose the Hilltop Broker-Dealers to off-balance sheet risk in the event that a customer or counterparty does not fulfill its contractual obligations. Examples of such transactions include the sale of securities not yet purchased by customers or for the account of the Hilltop Broker-Dealers, use of derivatives to support certain non-profit housing organization clients, clearing agreements between the Hilltop Broker-Dealers and various clearinghouses and broker-dealers, secured financing arrangements that involve pledged securities, and when-issued underwriting and purchase commitments.

Critical Accounting Policies and Estimates

Our accounting policies are fundamental to understanding our management's discussion and analysis of our results of operations and financial condition. We have identified certain significant accounting policies which involve a higher degree of judgment and complexity in making certain estimates and assumptions that affect amounts reported in our consolidated financial statements. The significant accounting policies which we believe to be the most critical in preparing our consolidated financial statements relate to allowance for loan losses, FDIC Indemnification Asset, reserve for losses and loss adjustment expenses, goodwill and identifiable intangible assets, loan indemnification liability, mortgage servicing rights and acquisition accounting. Since December 31, 2014, there have been no changes in critical accounting policies as further described under "Critical Accounting Policies and Estimates" and Note 1 to the Consolidated Financial Statements in our 2014 Form 10-K.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

Our assessment of market risk as of September 30, 2015 indicates there are no material changes in the quantitative and qualitative disclosures from those previously reported in our 2014 Form 10-K, except as discussed below.

The primary objective of the following information is to provide forward-looking quantitative and qualitative information about our potential exposure to market risks. Market risk represents the risk of loss that may result from changes in value of a financial instrument as a result of changes in interest rates, market prices and the credit perception of an issuer. The disclosure is not meant to be a precise indicator of expected future losses, but rather an indicator of reasonably possible losses, and therefore our actual results may differ from any of the following projections. This forward-looking information provides an indicator of how we view and manage our ongoing market risk exposures.

Table of Contents

Banking Segment

The banking segment is engaged primarily in the business of investing funds obtained from deposits and borrowings in interest-earning loans and investments, and our primary component of market risk is sensitivity to changes in interest rates. Consequently, our earnings depend to a significant extent on our net interest income, which is the difference between interest income on loans and investments and our interest expense on deposits and borrowings. To the extent that our interest-bearing liabilities do not reprice or mature at the same time as our interest-bearing assets, we are subject to interest rate risk and corresponding fluctuations in net interest income.

There are several common sources of interest rate risk that must be effectively managed if there is to be minimal impact on our earnings and capital. Repricing risk arises largely from timing differences in the pricing of assets and liabilities. Reinvestment risk refers to the reinvestment of cash flows from interest payments and maturing assets at lower or higher rates. Basis risk exists when different yield curves or pricing indices do not change at precisely the same time or in the same magnitude such that assets and liabilities with the same maturity are not all affected equally. Yield curve risk refers to unequal movements in interest rates across a full range of maturities.

We have employed asset/liability management policies that attempt to manage our interest-earning assets and interest-bearing liabilities, thereby attempting to control the volatility of net interest income, without having to incur unacceptable levels of risk. We employ procedures which include interest rate shock analysis, repricing gap analysis and balance sheet decomposition techniques to help mitigate interest rate risk in the ordinary course of business. In addition, the asset/liability management policies permit the use of various derivative instruments to manage interest rate risk or hedge specified assets and liabilities.

An interest rate sensitive asset or liability is one that, within a defined time period, either matures or experiences an interest rate change in line with general market interest rates. The management of interest rate risk is performed by analyzing the maturity and repricing relationships between interest-earning assets and interest-bearing liabilities at specific points in time ("GAP") and by analyzing the effects of interest rate changes on net interest income over specific periods of time by projecting the performance of the mix of assets and liabilities in varied interest rate environments. Interest rate sensitivity reflects the potential effect on net interest income resulting from a movement in interest rates. A company is considered to be asset sensitive, or have a positive GAP, when the amount of its interest-earning assets maturing or repricing within a given period exceeds the amount of its interest-bearing liabilities also maturing or repricing within that time period. Conversely, a company is considered to be liability sensitive, or have a negative GAP, when the amount of its interest-bearing liabilities maturing or repricing within a given period exceeds the amount of its interest-earning assets also maturing or repricing within that time period. During a period of rising interest rates, a negative GAP would tend to affect net interest income adversely, while a positive GAP would tend to result in an increase in net interest income. During a period of falling interest rates, a negative GAP would tend to result in an increase in net interest income, while a positive GAP would tend to affect net interest income adversely. However, it is our intent to remain relatively balanced so that changes in rates do not have a significant impact on earnings.

Table of Contents

As illustrated in the table below, the banking segment is asset sensitive overall. Loans that adjust daily or monthly to the Wall Street Journal Prime rate comprise a large percentage of interest sensitive assets and are the primary cause of the banking segment's asset sensitivity. To help neutralize interest rate sensitivity, the banking segment has kept the terms of most of its borrowings under one year as shown in the following table (dollars in thousands).

	September 30, 2015					
	3 Months or Less	> 3 Months to 1 Year	> 1 Year to 3 Years	> 3 Years to 5 Years	> 5 Years	Total
Interest sensitive assets:						
Loans	\$ 3,316,700	\$ 636,715	\$ 894,701	\$ 120,244	\$ 1,028,061	\$ 5,996,421
Securities	309,084	192,425	149,707	56,536	250,563	958,315
Federal funds sold and securities purchased under agreements to resell	24,861	—	—	—	—	24,861
Other interest sensitive assets	267,733	—	—	—	—	267,733
Total interest sensitive assets	3,918,378	829,140	1,044,408	176,780	1,278,624	7,247,330
Interest sensitive liabilities:						
Interest bearing checking	\$ 2,541,850	\$ —	\$ —	\$ —	\$ —	\$ 2,541,850
Savings	266,833	—	—	—	—	266,833
Time deposits	436,007	512,686	413,204	33,056	35,026	1,429,979
Notes payable and other borrowings	461,444	151,043	27,027	3,033	16,202	658,749
Total interest sensitive liabilities	3,706,134	663,729	440,231	36,089	51,228	4,897,411
Interest sensitivity	\$ 212,244	\$ 165,411	\$ 604,177	\$ 140,691	\$ 1,227,396	\$ 2,349,919

The positive GAP in the interest rate analysis indicates that banking segment net interest income would generally rise if rates increase. Because of inherent limitations in interest rate GAP analysis, the banking segment uses multiple interest rate risk measurement techniques. Simulation analysis is used to subject the current repricing conditions to rising and falling interest rates in increments and decrements of 1%, 2% and 3% to determine the effect on net interest income changes for the next twelve months. The banking segment also measures the effects of changes in interest rates on economic value of equity by discounting projected cash flows of deposits and loans. Economic value changes in the investment portfolio are estimated by discounting future cash flows and using duration analysis. Investment security prepayments are estimated using current market information. We believe the simulation analysis presents a more accurate picture than the GAP analysis. Simulation analysis recognizes that deposit products may not react to changes in interest rates as quickly or with the same magnitude as earning assets contractually tied to a market rate index. The sensitivity to changes in market rates varies across deposit products. Also, unlike GAP analysis, simulation analysis takes into account the effect of embedded options in the securities and loan portfolios as well as any off-balance-sheet derivatives.

The table below shows the estimated impact of increases of 1%, 2% and 3% and a decrease of 0.5% in interest rates on net interest income and on economic value of equity for the banking segment at September 30, 2015 (dollars in thousands).

Change in Interest Rates (basis points)	Changes in Net Interest Income			Changes in Economic Value of Equity		
	Amount	Percent		Amount	Percent	
+300	\$ 13,367	5.09	%	\$ 41,168	3.10	%
+200	\$ 2,124	0.81	%	\$ 25,399	1.91	%
+100	\$ (7,512)	(2.86)	%	\$ 9,859	0.74	%
-50	\$ 1,579	0.60	%	\$ (40,958)	(3.08)	%

The projected changes in net interest income and economic value of equity to changes in interest rates at September 30, 2015 were in compliance with established internal policy guidelines. These projected changes are based on numerous assumptions of growth and changes in the mix of assets or liabilities.

The historically low level of interest rates, combined with the existence of rate floors that are in effect for a significant portion of the loan portfolio, are projected to cause yields on our earning assets to rise more slowly than increases in market interest rates. As a result, in a rising interest rate environment, our interest rate margins are projected to compress until the rise in market interest rates is sufficient to allow our loan portfolio to reprice above applicable rate floors.

Table of Contents

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Our management, with the supervision and participation of our Principal Executive Officer and Principal Financial Officer, has evaluated the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) as of the end of the period covered by this report.

Based upon that evaluation, our Principal Executive Officer and Principal Financial Officer concluded that, as of the end of such period, our disclosure controls and procedures were effective in recording, processing, summarizing and reporting, on a timely basis, information required to be disclosed by us in the reports that we file or submit under the Exchange Act and are effective in ensuring that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is accumulated and communicated to the Company's management, including our Principal Executive Officer and Principal Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting during the quarter covered by this report that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting, other than as it relates to the incorporation of the acquired systems and processes of SWS into our internal control environment.

Table of Contents

PART II. OTHER INFORMATION

Item 1. Legal Proceedings.

For a description of material pending legal proceedings, see the discussion set forth under the heading “Legal Matters” in Note 13 to our Consolidated Financial Statements, which is incorporated by reference herein.

Item 1A. Risk Factors.

Except as follows, there have been no material changes to the risk factors disclosed under “Item 1A. Risk Factors” of our 2014 Form 10-K. For additional information concerning our risk factors, please refer to “Item 1A. Risk Factors” of our 2014 Form 10-K.

Our indebtedness may affect our ability to operate our business, and may have a material adverse effect on our financial condition and results of operations. We may incur additional indebtedness, including secured indebtedness.

At September 30, 2015, on a consolidated basis, we had total deposits of \$6.8 billion and other indebtedness of \$1.1 billion, including \$150.0 million in aggregate principal amount of Senior Notes. Our significant amount of indebtedness could have important consequences, such as:

- limiting our ability to obtain additional financing to fund our working capital needs, acquisitions, capital expenditures or other debt service requirements or for other purposes;
- limiting our ability to use operating cash flow in other areas of our business because we must dedicate a substantial portion of these funds to service debt;
- limiting our ability to compete with other companies who are not as highly leveraged, as we may be less capable of responding to adverse economic and industry conditions;
- restricting us from making strategic acquisitions, developing properties or exploiting business opportunities;

- restricting the way in which we conduct our business because of financial and operating covenants in the agreements governing our and certain of our subsidiaries' existing and future indebtedness, including, in the case of certain indebtedness of subsidiaries, certain covenants that restrict the ability of subsidiaries to pay dividends or make other distributions to us;
- exposing us to potential events of default (if not cured or waived) under financial and operating covenants contained in our or our subsidiaries' debt instruments that could have a material adverse effect on our business, financial condition and operating results;
- increasing our vulnerability to a downturn in general economic conditions or in pricing of our products; and
- limiting our ability to react to changing market conditions in our industry and in our customers' industries.

In addition to our debt service obligations, our operations require substantial investments on a continuing basis. Our ability to make scheduled debt payments, to refinance our obligations with respect to our indebtedness and to fund capital and non-capital expenditures necessary to maintain the condition of our operating assets and properties, as well as to provide capacity for the growth of our business, depends on our financial and operating performance, which, in turn, is subject to prevailing economic conditions and financial, business, competitive, legal and other factors.

Subject to the restrictions in the indenture governing the Senior Notes, we may incur significant additional indebtedness, including secured indebtedness. If new debt is added to our current debt levels, the risks described above could increase.

Table of Contents

We may not be able to generate sufficient cash to service all of our indebtedness, including the Senior Notes, and may be forced to take other actions to satisfy our obligations under our indebtedness that may not be successful.

Our ability to satisfy our debt obligations will depend upon, among other things:

- our future financial and operating performance, which will be affected by prevailing economic conditions and financial, business, regulatory and other factors, many of which are beyond our control; and
- our future ability to refinance the Senior Notes, which depends on, among other things, our complying with the covenants in the indenture governing the Senior Notes.

We cannot assure you that our business will generate sufficient cash flow from operations, or that we will be able to obtain financing in an amount sufficient to fund our liquidity needs.

If our cash flows and capital resources are insufficient to service our indebtedness, including the Senior Notes, we may be forced to reduce or delay capital expenditures, sell assets, seek additional capital or restructure or refinance our indebtedness, including the Senior Notes. These alternative measures may not be successful and may not permit us to meet our scheduled debt service obligations, including our obligations under the Senior Notes. Our ability to restructure or refinance our debt will depend on the condition of the capital markets and our financial condition at such time. Any refinancing of our debt could be at higher interest rates and may require us to comply with more onerous covenants, which could further restrict our business operations. In addition, the terms of existing or future debt agreements may restrict us from adopting some of these alternatives. In the absence of such operating results and resources, we could face substantial liquidity problems and might be required to dispose of material assets or operations, sell equity and/or negotiate with our lenders and other creditors to restructure the applicable debt, in order to meet our debt service and other obligations. We may not be able to consummate those dispositions for fair market value or at all. The indenture governing the Senior Notes may restrict, or market or business conditions may limit, our ability to avail ourselves of some or all of these options. Furthermore, any proceeds that we could realize from any such dispositions may not be adequate to meet our debt service obligations then due.

The indenture governing the Senior Notes contains, and any instruments governing future indebtedness of ours would likely contain, restrictions that will limit our flexibility in operating our business.

The indenture governing the Senior Notes contains, and any instruments governing future indebtedness of ours would likely contain, a number of covenants that will impose significant operating and financial restrictions on us, including restrictions on our ability to, among other things:

- dispose of or issue voting stock of certain subsidiaries; or
- incur or permit to exist any mortgage, pledge, encumbrance or lien or charge on the capital stock of certain subsidiaries.

Any of these restrictions could limit our ability to plan for or react to market conditions and could otherwise restrict corporate activities. Any failure to comply with these covenants could result in a default under the indenture governing the Senior Notes offered hereby. Upon a default, holders of the Senior Notes offered hereby would have the ability ultimately to force us into bankruptcy or liquidation, subject to the indenture governing the Senior Notes. In addition, a default under the indenture governing the Senior Notes could trigger a cross default under the agreements governing our existing and future indebtedness. Our operating results may not be sufficient to service our indebtedness or to fund our other expenditures and we may not be able to obtain financing to meet these requirements.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

On July 17, 2015, we issued an aggregate of 2,512 shares of common stock under the Hilltop Holdings 2012 Equity Incentive Plan to certain non-employee directors as compensation for their service on our Board of Directors during the third quarter of 2015. The shares were issued pursuant to the exemption from registration under Section 4(a)(2) of the Securities Act.

Table of Contents

The following table details our repurchases of shares of common stock during the three months ended September 30, 2015.

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs (1)
July 1 – July 31, 2015	—	\$ —	—	\$ 13,046,284
August 1 – August 31, 2015	616,533	21.15	616,533	3,921
September 1 – September 30, 2015	—	—	—	3,921
Total	616,533	\$ 21.15	616,533	

(1) On May 18, 2015, we announced a stock repurchase program under which it authorized us to repurchase, in the aggregate, up to \$30.0 million of our outstanding common stock. Under the stock repurchase program authorized, we may repurchase shares in open-market purchases or through privately negotiated transactions as permitted under Rule 10b-18 promulgated under the Exchange Act. As of September 30, 2015, we had repurchased an aggregate of \$30.0 million of our outstanding common stock, and do not intend to make any future purchases of our common stock under this program.
