EXPLANATORY NOTE

This report combines the quarterly reports on Form 10-Q of Host Hotels & Resorts, Inc. and Host Hotels & Resorts, L.P. Unless stated otherwise or the context requires otherwise, references to “Host Inc.” mean Host Hotels & Resorts, Inc., a Maryland corporation, and references to “Host L.P.” mean Host Hotels & Resorts, L.P., a Delaware limited partnership, and its consolidated subsidiaries, in cases where it is important to distinguish between Host Inc. and Host L.P. We use the terms “we” or “our” or “the company” to refer to Host Inc. and Host L.P. together, unless the context indicates otherwise.

Host Inc. operates as a self-managed and self-administered real estate investment trust (“REIT”). Host Inc. owns properties and conducts operations through Host L.P., of which Host Inc. is the sole general partner and of which it holds approximately 99% of the partnership interests (“OP units”). The remaining OP units are owned by various unaffiliated limited partners. As the sole general partner of Host L.P., Host Inc. has the exclusive and complete responsibility for Host L.P.’s day-to-day management and control. Management operates Host Inc. and Host L.P. as one enterprise. The management of Host Inc. consists of the same persons who direct the management of Host L.P. As general partner with control of Host L.P., Host Inc. consolidates Host L.P. for financial reporting purposes, and Host Inc. does not have significant assets other than its investment in Host L.P. Therefore, the assets and liabilities of Host Inc. and Host L.P. are substantially the same on their respective condensed consolidated financial statements and the disclosures of Host Inc. and Host L.P. also are substantially similar. For these reasons, we believe that the combination into a single report of the quarterly reports on Form 10-Q of Host Inc. and Host L.P. results in benefits to management and investors.

The substantive difference between Host Inc.’s and Host L.P.’s filings is the fact that Host Inc. is a REIT with public stock, while Host L.P. is a partnership with no publicly traded equity. In the condensed consolidated financial statements, this difference primarily is reflected in the equity (or partners’ capital for Host L.P.) section of the consolidated balance sheets and in the consolidated statements of equity (or partners’ capital for Host L.P.). Apart from the different equity treatment, the condensed consolidated financial statements of Host Inc. and Host L.P. nearly are identical.

This combined Form 10-Q for Host Inc. and Host L.P. includes, for each entity, separate interim financial statements (but combined footnotes), separate reports on disclosure controls and procedures and internal control over financial reporting and separate CEO/CFO certifications. In addition, with respect to any other financial and non-financial disclosure items required by Form 10-Q, any material differences between Host Inc. and Host L.P. are discussed separately herein. For a more detailed discussion of the substantive differences between Host Inc. and Host L.P. and why we believe the combined filing results in benefits to investors, see the discussion in the combined Annual Report on Form 10-K for the year ended December 31, 2015 under the heading “Explanatory Note.”

2. Summary of Significant Accounting Policies

We have condensed or omitted certain information and footnote disclosures normally included in financial statements presented in accordance with GAAP in the accompanying unaudited condensed consolidated financial statements. We believe the disclosures made herein are adequate to prevent the information presented from being misleading. However, the financial statements should be read in conjunction with the consolidated financial statements and notes thereto included in our Annual Report on Form 10-K for the year ended December 31, 2015.

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

In our opinion, the accompanying unaudited condensed consolidated financial statements reflect all adjustments necessary to present fairly our financial position as of June 30, 2016, and the results of our operations for the quarter and year-to-date periods ended June 30, 2016 and 2015, respectively, and cash flows for the year-to-date periods ended June 30, 2016 and 2015, respectively. Interim results are not necessarily indicative of full year performance because of the impact of seasonal variations.

New Accounting Standards

In March 2016, the Financial Accounting Standards Board (“FASB”) issued ASU No. 2016-09, Improvements to Employee Share-Based Payment Accounting, which is intended to simplify accounting for share-based payment transactions and will affect the classification of certain share-based awards and related tax withholdings. The standard is effective for fiscal years beginning after December 15, 2016, with early adoption permitted. We do not anticipate implementation will have a material effect on our financial statements or on the stock compensation plans currently outstanding; however, its effect on future stock compensation plans will be dependent upon the design of those plans.

In February 2016, the FASB issued ASU No. 2016-02, Leases (Topic 842), which affects aspects of accounting for lease agreements. Under the new standard, all leases, including those that previously were accounted for as operating leases, will require recognition of the lease assets and lease liabilities by lessees on the balance sheet. However, the effect on the statement of operations and the statement of cash flows largely is unchanged. The standard is effective for fiscal years beginning after December 15, 2018, with early application permitted. We have not yet completed our assessment of the effect of the new standard on our financial statements.

In February 2015, the FASB issued ASU No. 2015-02, Amendments to the Consolidation Analysis. The ASU amends the consolidation guidance for variable interest entities (VIEs) and general partners' investments in limited partnerships and modifies the evaluation of whether limited partnerships and similar legal entities are VIEs or voting interest entities. The ASU is effective for interim and annual reporting periods beginning after December 15, 2015. Specifically, as a result of the elimination of the presumption that a general partner should consolidate a limited partnership, and that these partnerships should be evaluated under the VIE or Voting Interest model, we re-evaluated the VIE determination of our non-wholly-owned partnerships. We adopted this standard January 1, 2016, and applied the changes retrospectively. As a result, we no longer consolidate the partnership that owns the Fort Lauderdale Marriott Harbor Beach Resort & Spa, of which we are the managing partner and hold 49.9% of the partnership interests, due to the voting rights of the third-party owner. Accordingly, the operations, assets and liabilities of the hotel no longer are included in our consolidated financial statements. Instead, we have included our interest in the

hotel based on the carrying amount on January 1, 2015 in advances to and investments in affiliates and our portion of the hotel's earnings are recorded to equity in earnings of affiliates, with no cumulative-effect adjustment. As a result of the adoption of this ASU, total assets and total liabilities at December 31, 2015 were reduced by \$128 million and \$150 million, respectively. In addition, total revenues for the quarter and year-to-date ended June 30, 2015 were reduced by \$10 million and \$25 million, respectively, while net income for the quarter and year-to-date ended June 30, 2015 were reduced by \$2 million and \$7 million, respectively. The deconsolidation of this entity had no effect on the total equity of Host Inc. stockholders, total Host L.P capital or net income attributable to Host Inc. or Host L.P.

Additionally, three partnerships now are considered VIE's, as the general partner maintains control over the decisions that most significantly impact the partnerships; however, this consideration did not change the consolidation determination. This conclusion includes the operating partnership, Host L.P., which is consolidated by Host Inc., of

HOST HOTELS & RESORTS, INC., HOST HOTELS & RESORTS, L.P., AND SUBSIDIARIES

which Host Inc. is the general partner and holds 99% of the limited partner interests. Host Inc.'s sole significant asset is its investment in Host L.P. and, consequently, substantially all of Host Inc.'s assets and liabilities represent assets and liabilities of Host L.P. All of Host Inc.'s debt is an obligation of Host L.P. and may be settled only with assets of Host L.P. We also determined that our consolidated partnership that owns the Houston Airport Marriott at George Bush Intercontinental, of which we are the general partner and hold 85% of the partnership interests, is a VIE. The total assets of this VIE at June 30, 2016 are \$62 million and consist of cash and property and equipment. Liabilities for the VIE total \$3 million and consist of accounts payable and deferred revenue. The unconsolidated partnership that owns the Philadelphia Marriott Downtown, of which we hold 11% of the limited partner interests, also is a VIE. The carrying amount of this investment at June 30, 2016 is \$(7) million and is included in advances to and investments in affiliates. The mortgage debt held by this VIE is non-recourse to us.

In May 2014, the FASB issued ASU No. 2014-09, Revenue from Contracts with Customers (Topic 606), which affects virtually all aspects of an entity's revenue recognition. The new standard sets forth steps to determine the timing and amount of revenue to be recognized to depict the transfer of goods or services in an amount that reflects the consideration to which the entity expects in exchange. In March, April and May 2016, the FASB issued ASUs No. 2016-08, 2016-10 and 2016-12, respectively, all related to Revenue from Contracts with Customers (Topic 606), which further clarify the application of the standard. In August 2015, the FASB issued ASU No. 2015-14, Revenue from Contracts with Customers (Topic 606): Deferral of the Effective Date, which deferred the effectiveness of ASU No. 2014-09 to reporting periods beginning after December 15, 2017 and permitted early application for annual reporting periods beginning after December 15, 2016. We have not yet completed our assessment of the effect of the new standard on our financial statements, including possible transition alternatives.

3. Earnings Per Common Share (Unit)

Host Inc. Earnings Per Common Share

Basic earnings per common share is computed by dividing net income attributable to common stockholders by the weighted average number of shares of Host Inc. common stock outstanding. Diluted earnings per common share is computed by dividing net income attributable to common stockholders, as adjusted for potentially dilutive securities, by the weighted average number of shares of Host Inc. common stock outstanding plus other potentially dilutive securities. Dilutive securities may include shares granted under comprehensive stock plans, other non-controlling interests that have the option to convert their limited partnership interests to common OP units and convertible debt securities. No effect is shown for any securities that are anti-dilutive. We have 8.9 million OP units which are convertible into 9.0 million common shares which are not included in Host Inc.'s calculation of earnings per share as their effect is not dilutive. The calculation of basic and diluted earnings per common share is shown below (in millions, except per share amounts):

Host L.P. Earnings Per Common Unit

Basic earnings per common unit is computed by dividing net income attributable to common unitholders by the weighted average number of common units outstanding. Diluted earnings per common unit is computed by dividing net income attributable to common unitholders, as adjusted for potentially dilutive securities, by the weighted average number of common units outstanding plus other potentially dilutive securities. Dilutive securities may include units distributed to Host Inc. to support Host Inc. common shares granted under comprehensive stock plans, other non-controlling interests that have the option to convert their limited partnership interests to common OP units and convertible debt securities. No effect is shown for any securities that are anti-dilutive. The calculation of basic and diluted earnings per unit is shown below (in millions, except per unit amounts):

Capital of Host L.P.

As of June 30, 2016, Host Inc. is the owner of approximately 99% of Host L.P.'s common OP units. The remaining common OP units are held by third party limited partners. Each OP unit may be redeemed for cash or, at the election of Host Inc., Host Inc. common stock, based on the conversion ratio of 1.021494 shares of Host Inc. common stock for each OP unit.

In exchange for any shares issued by Host Inc., Host L.P. will issue OP units to Host Inc. based on the applicable conversion ratio. Additionally, funds used by Host Inc. to pay dividends on its common stock are provided by distributions from Host L.P.

For Host Inc. and Host L.P., during the second quarter of 2016, we reclassified a net loss of \$20 million that had been recognized previously in foreign currency translation and other comprehensive income (loss) of unconsolidated affiliates in other comprehensive income related to the sale of two properties in Santiago, Chile. The loss is included in gain on sale of assets on our consolidated statement of operations.

Dividends/Distributions

On June 15, 2016, Host Inc.'s Board of Directors declared a regular quarterly cash dividend of \$0.20 per share on its common stock. The dividend was paid on July 15, 2016 to stockholders of record as of June 30, 2016. Accordingly, Host L.P. made a distribution of \$0.2042988 per unit on its common OP units based on the current conversion ratio.

Share Repurchase

In October 2015, Host Inc.'s Board of Directors authorized a second program to repurchase up to \$500 million of Host Inc. common stock. During the second quarter, we repurchased 5.2 million shares at an average price of \$15.39 for a total purchase price of \$81 million. Year-to-date June 30, 2016, we repurchased 10.3 million shares at an average price of \$15.73 for a total purchase price of approximately \$162 million. As of June 30, 2016, we have \$162 million of repurchase capacity remaining under the program. The common stock may be purchased in the open market or through private transactions, including principal transactions with various financial institutions, like accelerated share repurchases, forwards, options and similar transactions, from time to time, dependent upon market conditions. The plan does not obligate us to repurchase any specific number or any specific dollar amount of shares and may be suspended at any time at our discretion. The shares repurchased constitute authorized but unissued shares.

8. Dispositions

During the second quarter, we sold the following hotels:

- Manhattan Beach Marriott for \$82 million;
- Sheraton Santiago Hotel & Convention Center and San Cristobal Tower, a Luxury Collection Hotel for \$95 million;
- the Seattle Airport Marriott for \$97 million; and
- Atlanta Marriott Perimeter Center for \$71 million.

The following table provides summary results of operations for the eight hotels sold in each of 2016 and 2015, which are included in continuing operations (in millions):

Derivatives and Hedging

Interest rate swap derivatives designated as cash flow hedges. We have designated our floating-to-fixed interest rate swap derivative as a cash flow hedge. The purpose of the interest rate swap is to hedge against changes in cash flows (interest payments) attributable to fluctuations in variable rate debt. The derivative is valued based on the prevailing market yield curve on the date of measurement. We also evaluate counterparty credit risk when we calculate the fair value of the swap. Changes in the fair value of the derivative are recorded to other comprehensive income (loss) on the accompanying balance sheets. The hedge was fully effective as of June 30, 2016.

For the second quarter and year-to-date 2016, there was no material change in the fair value of our interest rate swap derivative designated as a cash flow hedge. The following table summarizes our outstanding contract (in millions):

Transaction Date	Total Notional Amount	Maturity Date	Swapped Index	All-in- Rate
November 2011 ⁽¹⁾	A\$ 62	November 2016	Reuters BBSY	6.7 %

(1) The swap was entered into in connection with the A\$86 million (\$64 million) mortgage loan on the Hilton Melbourne South Wharf.

Foreign Investment Hedging Instruments. We have five foreign currency forward sale contracts that hedge a portion of the foreign currency exposure resulting from the eventual repatriation of our net investment in foreign operations. These derivatives are considered hedges of the foreign currency exposure of a net investment in a foreign operation and are marked-to-market with changes in fair value recorded to other comprehensive income (loss) within the equity portion of our balance sheet. The foreign currency forward sale contracts are valued based on the forward yield curve of the foreign currency to U.S. dollar forward exchange rate on the date of measurement. We also evaluate counterparty credit risk when we calculate the fair value of the derivatives.

In addition to the foreign currency forward sale contracts, we have designated a portion of the foreign currency draws on our credit facility as hedges of net investments in foreign operations. Changes in fair value of the designated credit facility draws are recorded to other comprehensive income (loss).

The following table summarizes the draws on our credit facility that are designated as hedges of net investments in foreign operations (in millions):

(1) We have drawn an additional \$47 million on the credit facility in Canadian dollars, which draw has not been designated as a hedging instrument.

Other Liabilities

Fair Value of Other Financial Liabilities. We did not elect the fair value measurement option for any of our other financial liabilities. The fair values of secured debt and our credit facility are determined based on the expected future payments discounted at risk-adjusted rates. Senior Notes are valued based on quoted market prices. The fair values of financial instruments not included in this table are estimated to be equal to their carrying amounts.

The fair value of certain financial liabilities is shown below (in millions):

10. Geographic Information

We consider each of our hotels to be an operating segment, none of which meets the threshold for a reportable segment. We also allocate resources and assess operating performance based on individual hotels. All of our other real estate investment activities (primarily office buildings and apartments) are immaterial and, with our operating segments, meet the aggregation criteria, and thus, we report one segment: hotel ownership. Our consolidated foreign operations consist of hotels in six countries. During the second quarter, we sold our two properties located in Santiago, Chile. In addition, our two remaining properties in New Zealand have been classified as held for sale. There were no intersegment sales during the periods presented.

11. Non-controlling Interests

Other Consolidated Partnerships. We consolidate four majority-owned partnerships that have third-party, non-controlling ownership interests. The third-party partnership interests are included in non-controlling interests — other consolidated partnerships on the balance sheets and totaled \$39 million and \$40 million as of June 30, 2016 and December 31, 2015, respectively. One of the partnerships has a finite life that terminates in 2095, and the associated non-controlling interests are redeemable at our option at the end of, but not prior to, the finite life.

Net income attributable to non-controlling interests of consolidated partnerships is included in our determination of net income. Net loss attributable to non-controlling interests of third parties was \$1 million for each of the quarter and year-to-date periods ended June 30, 2016 and 2015.

Host Inc.'s treatment of the non-controlling interests of Host L.P.: Host Inc. adjusts the non-controlling interests of Host L.P. each period so that the amount presented equals the greater of its carrying value based on accumulated historical cost or its redemption value. The historical cost is based on the proportional relationship between the historical cost of equity held by our common stockholders relative to that of the unitholders of Host L.P. The redemption value is based on the amount of cash or Host Inc. common stock, at our option, that would be paid to the non-controlling interests of Host L.P. if it were terminated. Therefore, the redemption value of the common OP units is equivalent to the number of shares that would be issued upon conversion of the common OP units held by third parties valued at the market price of Host Inc. common stock at the balance sheet date. One common OP unit may be exchanged into 1.021494 shares of Host Inc. common stock. Non-controlling interests of Host L.P. are classified in the mezzanine section of our balance sheets as they do not meet the requirements for equity classification because the redemption feature requires the delivery of registered shares.

The table below details the historical cost and redemption values for the non-controlling interests:

	June 30, 2016	December 31, 2015
OP units outstanding (millions)	8.9	9.1
Market price per Host Inc. common share	\$16.21	\$ 15.34
Shares issuable upon conversion of one OP unit	1.021494	1.021494
Redemption value (millions)	\$147	\$ 143
Historical cost (millions)	88	90
Book value (millions) ⁽¹⁾	147	143

(1) The book value recorded is equal to the greater of redemption value or historical cost. Net income is allocated to the non-controlling interests of Host L.P. based on their weighted average ownership interest during the period. Net income attributable to the non-controlling interests of Host L.P. was \$5 million and \$3 million for the quarters ended June 30, 2016 and 2015, respectively, and \$7 million and \$4 million, for the year-to-date periods ended June 30, 2016 and 2015, respectively.

12. Legal Proceedings

We are involved in various legal proceedings in the normal course of business regarding the operation of our hotels and company matters. To the extent not covered by insurance, these legal proceedings generally fall into the following broad categories: disputes involving hotel-level contracts, employment litigation, compliance with laws such as the Americans with Disabilities Act, tax disputes and other general matters. Under our management agreements, our operators have broad latitude to resolve individual hotel-level claims for amounts generally less than \$150,000. However, for matters exceeding such threshold, our operators may not settle claims without our consent.

Based on our analysis of legal proceedings with which we currently are involved or of which we are aware and our experience in resolving similar claims in the past, we have accrued approximately \$3 million as of June 30, 2016 for liabilities related to legal proceedings and estimate that, in the aggregate, our losses related to these proceedings will not exceed \$10 million. We believe this range represents the maximum potential loss for all of our legal proceedings. We are not aware of any other matters with a reasonably possible unfavorable outcome for which disclosure of a loss contingency is required. No assurances can be given as to the outcome of any pending legal proceedings.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis should be read in conjunction with the unaudited condensed consolidated financial statements and related notes included elsewhere in this report. Host Inc. operates as a self-managed and self-administered REIT. Host Inc. is the sole general partner of Host L.P. and holds approximately 99% of its partnership interests. Host L.P. is a limited partnership operating through an umbrella partnership structure. The remaining common OP units are owned by various unaffiliated limited partners.

Forward-Looking Statements

In this report on Form 10-Q, we make forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These forward-looking statements are identified by their use of terms and phrases such as "anticipate," "believe," "could," "expect," "may," "intend," "predict," "project," "plan," "will," "estimate" and other similar phrases, including references to assumptions and forecasts of future results. Forward-looking statements are based on management's current expectations and assumptions and are not guarantees of future performance. Forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause our actual results to differ materially from those anticipated at the time the forward-looking statements are made.

The following factors, among others, could cause actual results and future events to differ materially from those set forth or contemplated in the forward-looking statements:

- the effect on lodging demand of (i) changes in national and local economic and business conditions, including concerns about the duration and strength of U.S. economic growth, global economic prospects and the value of the U.S. dollar, and (ii) other factors such as natural disasters, weather, pandemics, changes in the international political climate, and the occurrence or potential occurrence of terrorist attacks, all of which will affect occupancy rates at our hotels and the demand for hotel products and services;
- the impact of geopolitical developments outside the U.S., such as the pace of the economic recovery in Europe, the effects of the United Kingdom's referendum to withdraw from the European Union, the slowing of growth in markets such as China and Brazil, or unrest in the Middle East, all of which could affect the relative volatility of global credit markets generally, global travel and lodging demand, including with respect to our foreign hotel properties;
- the continuing volatility in global financial and credit markets, and the impact of budget deficits and pending and future U.S. governmental action to address such deficits through reductions in spending and similar austerity measures, which could materially adversely affect U.S. and global economic conditions, business activity, credit availability, borrowing costs, and lodging demand;
- operating risks associated with the hotel business, including the effect of increasing labor costs or changes in workplace rules that affect labor costs;
- the effect of rating agency downgrades of our debt securities on the cost and availability of new debt financings;
- the reduction in our operating flexibility and the limitation on our ability to pay dividends and make distributions resulting from restrictive covenants in our debt agreements, which limit the amount of distributions from Host L.P. to Host Inc., and other risks associated with the level of our indebtedness or related to restrictive covenants in our debt agreements, including the risk of default that could occur;
- our ability to maintain our properties in a first-class manner, including meeting capital expenditures requirements, and the effect of renovations, including temporary closures, on our hotel occupancy and financial results;
- our ability to compete effectively in areas such as access, location, quality of accommodations and room rate structures;
- our ability to acquire or develop additional properties and the risk that potential acquisitions or developments may not perform in accordance with our expectations;
- relationships with property managers and joint venture partners and our ability to realize the expected benefits of our joint ventures and other strategic relationships;

- our ability to recover fully under our existing insurance policies for terrorist acts and our ability to maintain adequate or full replacement cost “all-risk” property insurance policies on our properties on commercially reasonable terms;
- the effect of a data breach or significant disruption of hotel operator information technology networks as a result of cyber attacks;
- the effects of tax legislative action and other changes in laws and regulations, or the interpretation thereof, including the need for compliance with new environmental and safety requirements;

22

the ability of Host Inc. and each of the REITs acquired, established or to be established by Host Inc. to continue to satisfy complex rules in order to qualify as REITs for federal income tax purposes, Host L.P.'s ability to satisfy the rules required to maintain its status as a partnership for federal income tax purposes, and Host Inc.'s and Host L.P.'s ability and the ability of our subsidiaries, and similar entities to be acquired or established by us, to operate effectively within the limitations imposed by these rules; and

- risks associated with our ability to execute our dividend policy, including factors such as investment activity, operating results and the economic outlook, any or all of which may influence the decision of our board of directors as to whether to pay future dividends at levels previously disclosed or to use available cash to pay special dividends.

We undertake no obligation to publicly update forward-looking statements, whether as a result of new information, future events, or otherwise. Achievement of future results is subject to risks, uncertainties and potentially inaccurate assumptions, including those risk factors discussed in our Annual Report on Form 10-K for the year ended December 31, 2015 and in other filings with the Securities and Exchange Commission ("SEC"). Although we believe that the expectations reflected in such forward-looking statements are based upon reasonable assumptions, we can give no assurance that we will attain these expectations or that any deviations will not be material.

(1) Adjusted EBITDA, NAREIT FFO and Adjusted FFO per diluted share and comparable hotel operating results (including comparable hotel revenues and comparable hotel EBITDA and margins) are non-GAAP (U.S. generally accepted accounting principles) financial measures within the meaning of the rules of the SEC. See “Non-GAAP Financial Measures” for more information on these measures, including why we believe that these supplemental measures are useful, reconciliations to the most directly comparable GAAP measure, and the limitations on the use of these supplemental measures.

23

Revenue per Available Room (“RevPAR”)

Comparable RevPAR on a constant US\$ basis improved 2.0% for the second quarter, driven by a 120 basis point increase in occupancy to 82.4% and a slight increase in rate. Year-to-date, comparable RevPAR on a constant US\$ basis improved 2.7%, largely due to a 170 basis point increase in occupancy, while room rate growth was constrained to just 0.5%. Group and leisure demand remained strong, leading to increases in occupancy to near record levels; however, an unfavorable business mix shift from higher-rated corporate transient demand to lower-rated discount business led to minimal rate growth for the portfolio. We believe the slowdown in corporate transient demand can be attributed to weakening business investment, as reduced corporate profits, as well as global political and economic uncertainty, have led to a reduction in corporate travel. Additionally, the softening of inbound travel from the United Kingdom and other European countries due to the relative strength of the US dollar put further pressure on demand in our gateway markets. These near-term trends, coupled with increased price transparency from online travel agencies and strengthening supply growth, particularly in several of the gateway cities in which we operate, have inhibited room rate growth.

On a constant US\$ basis, RevPAR at our comparable international properties increased 2.3% for the second quarter and 5.8% year-to-date. Our properties in Latin America experienced rate growth of 4.9% for the quarter, however occupancy remained unchanged as Zika virus fears limited demand growth. However, the improvements in operations at our international properties were offset by the strengthening of the U.S. dollar, and RevPAR on a nominal basis declined for both the quarter and year-to-date.

For our non-comparable hotels, RevPAR declined 6.3% year-to-date and was primarily driven by two hotels, the Hyatt Regency San Francisco Airport and the Denver Marriott Tech Center, which experienced declines of 24% and 35%, respectively. These properties experienced significant disruption due to the extensive renovations of guest rooms, public and meeting space, as well as their food and beverage platforms. See our Redevelopment and Return on Investment Capital Expenditures for further discussion of these properties.

Rooms

Total room revenue decreased 0.4% and increased 1.2% for the quarter and year-to-date, respectively, while our comparable room revenue increased 1.8% and 2.9%, for the quarter and year-to-date, respectively. The increases reflect the 2.0% and 2.7% increase in comparable RevPAR on a constant US\$ basis for the quarter and year-to-date, respectively, partially offset by currency translation effects for our international properties. The decline in total room revenue for the quarter also reflects a net decrease due to dispositions. For the quarter and year-to-date, total room expenses decreased 2.1% and 0.9%, respectively, reflecting our recent dispositions, and comparable rooms expense increased just 0.9% and 1.6%, respectively, as operators were able to improve profitability through improvement in productivity.

Food and beverage

For the second quarter and year-to-date, food and beverage revenue increased 4.5% and 2.9%, respectively, and comparable food and beverage revenue increased 4.5% and 2.8%, respectively, both due to an increase in banquet sales. The strong group business and occupancy levels have led to significant improvements in banquet revenues, driven by our properties in the San Francisco and Boston markets, as well as at The Ritz-Carlton, Naples, which experienced strong revenue growth. Coupled with well-controlled food costs and improvements in productivity, this led to an increase in food and beverage profit for the second quarter of 14.5% and a comparable food and beverage profit increase of 11.2%.

Operating profit

Operating profit margins (calculated based on GAAP operating profit as a percentage of GAAP revenues) increased 100 basis points and 90 basis points for the second quarter and year-to-date, respectively. These operating profit margins are affected significantly by several items, including operations from recently acquired hotels, dispositions, depreciation, and corporate expenses. Our comparable hotel EBITDA margins, which exclude these items, increased 65 basis points, to 30.7%, for the second quarter and 75 basis points, to 28.65%, year-to-date. The improvements in margins were driven by the strength in food & beverage profits, a decrease in utility and insurance costs at our hotels and improvements in productivity due to the implementation of several cost control initiatives that have been implemented at many of our larger resort and convention hotels over the past two years.

Net income, Adjusted EBITDA and Adjusted FFO per Diluted Share

Net income for the quarter increased 64.0% due, primarily, to improvements in operations, an increase in gains on dispositions and a decrease in interest expense due to the refinancing of senior notes in 2015 and \$21 million of debt extinguishment costs incurred in the second quarter 2015, while no similar expenses were incurred in 2016.

Year-to-date, net income increased \$222 million for similar reasons. Adjusted EBITDA increased \$14 million for the quarter and \$39 million year-to-date, due to improvements in

operations and operating profit margins. These improvements led to an increase in earnings of \$0.19 per diluted share for the quarter and \$0.30 per diluted share year to date and an increase in Adjusted FFO per diluted share of \$0.03, or 6.5%, for the quarter and \$0.09, or 11.1%, year-to-date.

The trends and transactions described for Host Inc. affected similarly the operating results for Host L.P., as the only significant difference between the Host Inc. and the Host L.P. statements of operations relates to the treatment of income attributable to the third party limited partners of Host L.P.

Outlook

As noted above, a reduction in corporate demand has led to a slowdown in higher rated transient business for the second quarter. While many factors combined for the slowdown in business travel, the overarching cause can be attributed to the reduction in business investment, which is a significant driver for our portfolio. Additionally, increased price transparency from online travel agencies and brand websites have led to further rate pressures. We also expect international travel patterns will remain challenged; impacted by the strong U.S. dollar and weaker domestic economic growth in certain regions. We anticipate that these trends will continue for the remainder of the year, limiting potential rate growth. At the same time, other drivers of lodging demand continue to demonstrate steady strength in the US, including US GDP growth, continued job creation and improvements in consumer confidence. As a result, we have continued to experience strong leisure and group demand leading to high occupancy levels for our portfolio. These results, along with an increase in food and beverage and other revenues contributed to improvements in our operating margin performance. However, supply growth also continues to impact our results, and is now exceeding the long-term average of 2% in our major markets.

While we still expect that the trends described above will lead to positive RevPAR growth for 2016, we anticipate that the slowdown in corporate demand will lead to subdued rate growth for the remainder of the year. We continue to anticipate strong occupancy going forward as a result of group and leisure demand and we estimate comparable RevPAR growth for the full year 2016 will be between 2.0% and 3.0% on a constant US\$ basis.

The current outlook for the lodging industry is uncertain; therefore, there can be no assurances that any increases in hotel revenues or earnings at our properties will continue for any number of reasons, including, but not limited to, slower than anticipated growth in the economy, changes in travel patterns, and international economic and political instability.

Strategic Initiatives

Portfolio

Our portfolio includes multiple types of premium hotels, primarily located within a defined set of target markets that meet our investment criteria. We continue to focus on long-term results by investing in locations that we believe have strong demand generators that appeal to multiple customer segments, achieve premium rates and have relatively high barriers to other premium hotel supply. At the same time, we intend to reallocate capital out of markets where we expect lower growth prospects or where significant capital expenditures requirements are not justified. We also may dispose of assets in target markets when we have the opportunity to capitalize on value enhancement strategies and apply the proceeds to other business objectives.

Dispositions. During the quarter, we sold five non-core properties for a sales price of approximately \$345 million. We recorded gains on these sales of approximately \$178 million. Additionally, our two remaining properties in New Zealand are under contract, subject to various closing conditions, and are expected to close in the third quarter and we expect to sell our remaining property in Australia over the next twelve months. We can provide no assurance on the

timing or completion of any of these sales.

Acquisitions. Acquisition opportunities have been limited thus far in 2016; however, we did acquire the ground leases for the Key Bridge Marriott for \$54 million. The land is located along the Potomac River, overlooking Washington, D.C., and we are currently exploring further development and value enhancement opportunities for the asset.

Operator changes. We also continue to pursue opportunities to appropriately match each hotel within its specific market with the best operator and brand to optimize operating performance. In June, we reached an agreement to franchise the Westin Cincinnati and selected HEI Hotels & Resorts as the operator. We now have a total of 15 third party managed hotels in our consolidated and joint venture portfolio.

Balance Sheet

Stock Repurchase Program. In October 2015, Host Inc.'s Board of Directors approved a second program to repurchase up to \$500 million of Host Inc. common stock. The common stock may be purchased in the open market or through private transactions,

25

including principal transactions with various financial institutions, like accelerated share repurchases, forwards, options and similar transactions, from time to time depending upon market conditions. The number of shares purchased also will depend upon operating results, funds generated by sales activity, dividends that may be required by tax gains on sales and other investment options that may be available, including reinvesting in our portfolio or acquiring new hotels. The program does not obligate us to repurchase any specific number or any specific dollar amount of shares and may be suspended at any time at our discretion. During the second quarter, we repurchased 5.2 million shares at an average price of \$15.39 for a total purchase price of \$81 million. Year-to-date June 30, 2016, we repurchased 10.3 million shares at an average price of \$15.73 for a total purchase price of approximately \$162 million and have \$162 million of repurchase capacity remaining under the program.

We remain committed to our long-term strategic goal of generating superior returns to our stockholders by driving operating performance, refining our strategy to adapt to changes in the lodging industry, and making well-considered investments that will create real growth in stockholder value. Since the beginning of 2016, we have distributed \$610 million to stockholders through dividends and stock repurchases, including the 2015 fourth quarter dividend that was paid in January 2016.

Debt transactions. During the quarter, we had net repayments under the revolver portion of our credit facility of \$142 million and, as of June 30, 2016, had \$739 million of remaining available capacity thereunder. Subsequent to quarter end, we drew an additional \$50 million under the revolver portion of our credit facility. Additionally, during the quarter, we repaid the \$100 million mortgage loan secured by the Hyatt Regency Reston.

Capital Investments

Capital Expenditures Projects. We continue to pursue opportunities to enhance asset value through select capital improvements, including projects that are designed specifically to increase the eco-efficiency of our hotels, incorporate elements of sustainable design, and replace aging equipment and systems with more efficient technology. Year-to-date, we have completed renovations of over 3,600 guestrooms, 230,000 square feet of meeting space and approximately 83,000 square feet of public space.

· Redevelopment and Return on Investment and Acquisition Capital Expenditures. Redevelopment and return on investment (“ROI”) projects primarily consist of large-scale redevelopment projects designed to increase cash flow and improve profitability by capitalizing on changing market conditions and the favorable locations of our properties, including projects such as the redevelopment of a hotel, the repositioning of a hotel restaurant, the installation of energy efficient systems or the conversion of underutilized space to more profitable uses. Additionally, in conjunction with the acquisition of a property, we prepare capital and operational improvement plans designed to maximize profitability. We spent approximately \$141 million for these projects during the first half of 2016, compared to \$101 million during the first half of 2015. Projects completed during the second quarter included the redevelopment at the Marriott Marquis San Diego Marina, which now has 280,000 square feet of meeting space, including the construction of a 152,000 square foot exhibit hall encompassing ballrooms, grand foyers and outdoor event space overlooking the marina. At the Hyatt Regency San Francisco Airport, we substantially completed the renovation of all of the guestrooms and over 60,000 square feet of meeting and public space, including the addition of 9,000 square feet of new meeting space. Additionally, we completed phase one of the extensive renovations at the Denver Marriott Tech Center and began our two-year renovation at The Phoenician. We expect that ROI projects, including acquisition capital expenditures, for full year 2016 will be approximately \$185 million to \$200 million, representing a decline of approximately \$83 million from 2015.

· Renewal and Replacement Capital Expenditures. We spent \$67 million and \$161 million on renewal and replacement capital expenditures during the second quarter and year-to-date 2016, respectively, compared to \$94 million and \$219 million during the second quarter and year-to-date 2015, respectively, representing a 26%

decrease, resulting in less disruption at our properties in 2016 compared to 2015. These expenditures are designed to ensure that our standards for product quality are maintained and to enhance the overall competitiveness of our properties in the marketplace. Significant renewal and replacement projects completed during the second quarter included rooms renovations at the Chicago Marriott Suites O'Hare, W Seattle and phase one at Toronto Marriott Downtown Eaton Centre Hotel. We also completed the renovation of 10,000 square feet of public space at the Coronado Island Marriott Resort & Spa and certain restaurants at the Manchester Grand Hyatt San Diego and The Westin Cincinnati. We expect that our investment in renewal and replacement expenditures in 2016 will total approximately \$295 million to \$310 million, representing a decrease of approximately \$85 million from 2015.

Statement of Operations Results and Trends

For second quarter and year-to-date 2016, the following items have affected the year-over-year comparability of our operations.

- The results of hotels acquired or sold during the comparable periods (collectively, our “Recent Acquisitions and Dispositions”) had a significant impact on year-over-year comparisons. The only acquisition reflected in our non-comparable results is the June 2015 acquisition of the 643-room Phoenician for \$400 million. Dispositions include the sale of eight hotels in the first half of 2016 and eight hotels in 2015.

The table below presents the net change in earnings due to these acquisitions and dispositions for the quarter and year-to-date. The table reflects the contribution to earnings from The Phoenician net of earnings from our 2015 and 2016 dispositions that did not repeat in the period presented (in millions, increase (decrease)):

Quarter ended	Year-to-date ended
---------------	--------------------

Edgar Filing: HOST HOTELS & RESORTS, INC. - Form 10-Q

	June 30, 2016	June 30, 2016
Total revenues	\$ (18)	\$ (5)
Net income (excluding gain on sale)	—	14
Adjusted EBITDA	(4)	9

In addition to the eight hotels sold in 2016, we have two additional properties that are held for sale. The table below presents earnings we have recognized for these 10 properties for the second quarter and year-to-date and hence will affect future comparisons between 2016 and 2017 results (in millions):

27

	Quarter ended	Year-to-date ended
	June 30, 2016	June 30, 2016
Total revenues	\$ 21	\$ 55
Net income (excluding gain on sale)	3	8
Adjusted EBITDA	4	12

Our domestic hotel portfolio represents approximately 97% of our revenues and total assets. However, for international properties, we are exposed to currency exchange risks in the normal course of business. For the first half of 2016, currency fluctuations did not have a significant impact on our operations as we reduced our international exposure and currency fluctuations were not as significant as in 2015. Overall, total revenues were affected negatively by approximately \$4 million for the second quarter and \$10 million year-to-date and Adjusted EBITDA by \$1 million for the second quarter and \$3 million year-to-date, with an immaterial effect on net income, due to currency fluctuations.

Hotel Sales Overview

The following table presents total revenues in accordance with GAAP and includes both comparable and non-comparable hotels (in millions, except percentages):

	Quarter ended June 30,			Year-to-date ended June 30,		
	2016	2015	Change	2016	2015	Change
Revenues:						
Rooms	\$933	\$937	(0.4)%	\$1,776	\$1,755	1.2%
Food and beverage	439	420	4.5	847	823	2.9
Other	87	82	6.1	175	163	7.4
Total revenues	\$1,459	\$1,439	1.4	\$2,798	\$2,741	2.1

Rooms. Total rooms revenues decreased 0.4% for the quarter, and increased 1.2% year-to-date. For our comparable hotels, rooms revenues increased 1.8% and 2.9% for the quarter and year-to-date, respectively, reflecting the improvements in RevPAR described above. The decline in the total rooms revenues for the quarter reflects the net effect of our acquisitions and dispositions, which reduced rooms revenues by \$19 million for the quarter and \$18 million year-to-date.

Food and beverage. Total food and beverage (“F&B”) revenues increased 4.5% for the quarter and 2.9% year-to-date. Similarly, on a comparable hotel basis, F&B revenues increased 4.5% and 2.8% for the quarter and year-to-date, respectively. During the quarter, strong group business led to improvements in banquet revenues. Recent Acquisitions and Dispositions had minimal effect, as the F&B revenues gained during the first half of 2016 from The Phoenician offset the loss of F&B revenues for our disposed hotels.

Other revenues. Total other revenues increased 6.1% for the quarter and 7.4% year to date. At our comparable hotels, other revenues increased 4.6% for the quarter and 4.1% year-to-date. During the second quarter, cancellation and attrition fees were higher than in recent years. In addition, the effects of our Recent Acquisitions and Dispositions increased other revenues by \$2 million and \$7 million for the quarter and year-to-date, respectively, as golf and spa

revenues for The Phoenician outweighed the loss of other revenues for our disposed hotels.

28

Property-level Operating Expenses

The following table presents property-level operating expenses in accordance with GAAP and includes both comparable and non-comparable hotels (in millions, except percentages):

	Quarter ended			Year-to-date		
	June 30, 2016	2015	Change	ended June 30, 2016	2015	Change
Expenses:						
Rooms	\$228	\$233	(2.1)%	\$449	\$453	(0.9)%
Food and beverage	289	289	—	573	572	0.2
Other departmental and support expenses	332	330	0.6	660	651	1.4
Management fees	66	68	(2.9)	123	120	2.5
Other property-level expenses	100	96	4.2	193	192	0.5
Depreciation and amortization	178	178	—	359	351	2.3
Total property-level operating expenses	\$1,193	\$1,194	(0.1)	\$2,357	\$2,339	0.8

Our operating costs and expenses, which have both fixed and variable components, are affected by changes in occupancy, inflation, and revenues (which affect management fees), though the effect on specific costs will differ. Our wages and benefits account for approximately 56% of the operating expenses at our hotels (excluding depreciation). Other property level expenses consist of property taxes, the amounts and structure of which are highly dependent on local jurisdiction taxing authorities, and property and general liability insurance, all of which do not necessarily increase or decrease based on similar changes in revenues at our hotels.

Rooms. Rooms expenses decreased 2.1% and 0.9% for the second quarter and year-to-date, 2016, respectively as increases in wages and commissions were mitigated by savings in supply expenses. At our comparable hotels, rooms expenses increased 0.9% and 1.6% for the quarter and year-to-date, respectively. The decline in rooms expenses for quarter and year-to-date reflects a net decrease of \$6 million and \$7 million, respectively, due to the effect of our Recent Acquisitions and Dispositions.

Food and beverage. F&B expenses were flat in the second quarter and increased \$1 million for year-to-date 2016, primarily due to increases in operating supply costs offset by hourly productivity improvements. For our comparable hotels, F&B expenses increased 1.4% for the quarter and 0.9% year-to-date. F&B expense reflects a decrease of \$2 million for the quarter and an increase of \$1 million for year-to-date due to the net results of our Recent Acquisitions and Dispositions.

Other departmental and support expenses. Other departmental and support expenses increased \$2 million for the second quarter and \$9 million year-to-date, primarily due to an increase in hourly wages and training expenses for the

quarter, offset by an improvement in productivity and a decrease in utilities expense of 5.9% for the quarter and 8.7% for the year-to-date at our comparable hotels.

Management fees. Base management fees, which generally are calculated as a percentage of total revenues, were flat in the second quarter and increased \$1 million year-to-date. Incentive management fees, which generally are based on the level of operating profit at each property after we receive a priority return on our investment, were flat in the second quarter and increased \$4 million for the year-to-date 2016, respectively, as 50 of our properties earned incentive management fees for the second quarter of 2016.

Other Income and Expense

Corporate and other expenses. Corporate and other expenses include the following items (in millions):

	Quarter ended		Year-to-date ended June	
	June 30,	30,	2016	2015
	2016	2015	2016	2015
General and administrative costs	\$24	\$ 18	\$ 48	\$ 43
Non-cash stock-based compensation expense	3	3	6	8
Litigation (recoveries)/accruals and acquisition costs, net	—	2	—	(4)
Total	\$27	\$ 23	\$ 54	\$ 47

29

Interest expense. Interest expense decreased \$33 million and \$43 million for the second quarter and year-to-date 2016, respectively, compared to the corresponding 2015 period, primarily due to the repayments or refinancings of debt in 2015, which lowered our weighted average interest rate, and a \$21 million decrease in debt extinguishment costs. The following table details our interest expense for the quarter and year-to-date (in millions):

	Quarter ended June 30, 2016		Year-to-date ended June 30, 2015	
Cash interest expense ⁽¹⁾	\$38	\$44	\$75	\$87
Non-cash interest expense	1	7	3	13
Non-cash debt extinguishment costs	—	6	—	6
Cash debt extinguishment costs ⁽¹⁾	—	15	—	15
Total interest expense	\$39	\$72	\$78	\$121

(1) Including the change in accrued interest, total cash interest paid was \$68 million and \$100 million for year-to-date 2016 and 2015, respectively.

Gain on sale of assets. During the second quarter and year-to-date 2016, we recognized gain on sale of assets of \$172 million and \$231 million, respectively, due to the sale of five hotels during the second quarter and three hotels during the first quarter. We recognized a gain on sale of assets of \$53 million and \$57 million during the second quarter and year-to-date 2015, respectively, due to the sale of three hotels during the second quarter and one during the first quarter.

Equity in earnings of affiliates. Equity in earnings of affiliates primarily reflects our interest in the operations of the Euro JV and the Fort Lauderdale Marriott Harbor Beach Resort & Spa. Upon adoption of ASU No. 2015-02, Amendments to the Consolidation Analysis on January 1, 2016, the results of the Fort Lauderdale Marriott Harbor Beach Resort & Spa no longer are consolidated and now are included in equity in earnings (losses) of affiliates. See “Note 2. Summary of Significant Accounting Policies.” The decrease in equity in earnings of affiliates during the second quarter of 2016 primarily relates to the €36 million (\$40 million) gain recorded by the Euro JV on the sale of the Crowne Plaza Amsterdam City Centre in 2015.

Provision for income taxes. We lease substantially all of our properties to consolidated subsidiaries designated as taxable REIT subsidiaries (“TRS”) for federal income tax purposes. The difference between hotel-level operating cash flow and the aggregate rent paid to Host L.P. by the TRS represents its taxable income or loss, on which we record an income tax provision or benefit. The income tax provision recorded in the second quarter and year-to-date 2016 primarily relates to domestic and foreign corporate income taxes on hotel operations and \$9 million for Chilean capital gain tax on the sale of our two properties in Chile.

Comparable Hotel RevPAR Overview

We discuss operating results for our hotels on a comparable basis. Comparable hotels are those properties that we have consolidated for the entirety of the reporting periods being compared. Comparable hotels do not include the results of properties acquired or sold, or that incurred significant property damage or business interruption, or have undergone large scale capital projects during these periods. As of June 30, 2016, 90 of our 98 owned hotels are classified as comparable hotels. See “Comparable Hotel Operating Statistics” for a complete description of our comparable hotels. We also discuss our comparable RevPAR results by property type (i.e. urban, suburban, resort, or airport), geographic market, and mix of business (i.e. transient, group, or contract).

On the west coast, RevPAR improvements were led by our properties in Los Angeles with an overall RevPAR increase of 9.1% primarily due to rate growth of 5.1%. The rate growth was driven by strong group demand, as well as

an improved contract base at The Westin Los Angeles Airport where new crew business led to a rate increase of 14.4%. At our Hawaiian properties, the RevPAR increase was driven by strong group demand at Fairmont Kea Lani, Maui, as well as strong transient demand in the market due to a combination of the Zika virus threat in the Caribbean and South America, terrorism concerns in Europe and lower airfare prices. In Phoenix and San Francisco, our properties slightly outperformed our portfolio due to increases in average rate of 1.7% and 2.9%, respectively, driven by association and corporate group rate gains. However, San Francisco Marriott Marquis was impacted by the construction at the nearby Moscone Center, which construction is scheduled to continue for the remainder of 2016 and into 2017. Our Seattle market was negatively affected by rooms renovations at the W Seattle and difficult comparisons to 2015, when the city hosted the U.S. Golf Association Open Championship. In San Diego, our hotels were impacted by less concentrated city-wide events which led to a decrease in occupancy of 2.9 percentage points.

On the east coast, our Boston and Washington, D.C. properties outperformed the portfolio due to a combination of rate growth and an increase in occupancy. In Boston, the RevPAR growth was due to increased corporate volume and new airline crew contracts, while Washington, D.C. benefited year over year from the 2015 renovations. Conversely, in New York, supply growth has continued to negatively impact our hotels, as well as the strong U.S. dollar resulting in a decline in European travel, as RevPAR decreased by 4.9% driven primarily by a 4.8 percentage point decline in rate.

In the southern and central U.S., our Atlanta, Chicago and Denver markets outperformed our portfolio. In Atlanta and Denver, RevPAR was driven by a combination of strong rate growth of 3.2% and 3.4%, respectively, and an increase in occupancy of 2.6 and 2.8 percentage points, respectively, due to increased group business. In addition, our Atlanta properties benefited from a number of

city-wide events during the second quarter. Our Chicago properties benefited from the completed renovations at Embassy Suites by Hilton Chicago Downtown Magnificent Mile and Chicago Marriott Suites Downers Grove where occupancy increased by 10.4 and 4.1 percentage points, respectively. Meanwhile, RevPAR at our Florida and Houston hotels underperformed our portfolio. RevPAR at our Florida properties declined due to difficult comparisons to prior year when occupancy was at a peak, while our Houston properties continued to be affected by disruption in the oil markets as the shift in segment mix moved away from energy related group business.

On a constant dollar basis, our international markets experienced RevPAR growth of 2.3%, led by our Latin America properties with RevPAR growth of 5.0%, due to an increase in average rate of 4.9%, driven by pre-Olympic test business. Due to the upcoming Olympics in Rio de Janeiro, we expect Latin America to have a strong third quarter. At our Canadian properties, RevPAR was relatively flat due to the guest room renovation at the Toronto Marriott Downtown Eaton Centre Hotel offset by the benefit from the 2015 renovation at the Calgary Marriott Downtown Hotel. However, low oil prices continue to negatively impact both hotels. Due to the continued strength of the U.S. dollar on a relative basis, RevPAR at our international properties declined 6.2% on a nominal basis for the quarter.

Our airport properties continued to lead the portfolio for the quarter driven by a combination of strong rate growth of 2.7% and an increase in occupancy of 5.8 percentage points. In particular, the Newark Airport had an increase in occupancy of over 20 percentage points due to lower occupancy in 2015 when the hotel was under renovation. Our suburban properties also outperformed the portfolio for the quarter driven by strong rate growth of 3.4%, as high occupancy levels in urban markets has continued to help drive demand toward adjacent suburban markets. The occupancy increase at our urban properties was driven by an increase in group business. However, average rate at our urban properties decreased by 0.4%, resulting in overall RevPAR growth of 1.1%, slightly below our portfolio. Our resort properties also underperformed the market with a decrease in occupancy of 1.8 percentage points, affected by lower leisure travel to Florida and some group cancellations.

Hotels Sales by Business Mix

The majority of our customers fall into three broad categories: transient, group, and contract business. The information below is derived from business mix data for 90 of our hotels for which business mix data is available from our managers. For further detail on our business mix, see “Management’s Discussion and Analysis of Financial Condition and Results of Operations” in our most recent Annual Report on Form 10 K.

For the second quarter, our revenue growth was driven by an improvement in group revenue of 5.3%, with an increase in both average rate and group room nights sold of 2.2% and 3.0%, respectively. Our hotels were able to drive group revenues through higher-rated association business which led group business with an 8.3% increase in revenue. Conversely, transient revenues declined by

1.2% due to a combination of the Easter holiday shift, displacement from greater group segment volume and lower business travel demand. The lower corporate demand led properties to replace the business with lower-rated leisure and government business resulting in an overall decline in transient average rate. Overall, contract business was the strongest performing segment with a 22% increase in room nights leading to revenue growth of 12.7% driven by additional airline crew contracts.

Year-to-date, our revenue growth was primarily driven by group revenue growth of 3.0%, coupled with transient revenue growth of 1.8%. The group revenue increase was driven by corporate business, while the transient revenue increase was driven by increased discount business and government travel.

Liquidity and Capital Resources

Liquidity and Capital Resources of Host Inc. and Host L.P. The liquidity and capital resources of Host Inc. and Host L.P. are derived primarily from the activities of Host L.P., which generates the capital required by our business from hotel operations, the incurrence of debt, the issuance of OP units or the sale of properties. Host Inc. is a REIT and its only significant asset is the ownership of partnership interests of Host L.P.; therefore, its financing and investing activities are conducted through Host L.P., except for the issuance of its common and preferred stock. Proceeds from stock issuances by Host Inc. are contributed to Host L.P. in exchange for OP units. Additionally, funds used by Host Inc. to pay dividends or to repurchase its stock are provided by Host L.P. Therefore, while we have noted those areas in which it is important to distinguish between Host Inc. and Host L.P., we have not included a separate discussion of the liquidity and capital resources as the discussion below applies to both Host Inc. and Host L.P.

Overview. We look to maintain a capital structure and liquidity profile with an appropriate balance of cash, debt, and equity in order to provide financial flexibility given the inherent volatility in the lodging industry. We believe this strategy will result in a lower overall cost of capital, allow us to complete opportunistic investments and acquisitions and will position us to manage potential declines in operations throughout the lodging cycle. As operations have improved in the past several years, we have decreased our leverage as measured by our net debt-to-EBITDA ratio and reduced our debt service obligations, leading to an increase in our fixed charge coverage ratio.

We generally intend to use available cash for acquisitions or other investments in our portfolio to the extent that they meet our return requirements. However, if we are unable to find appropriate investment opportunities, we will consider other uses of any available cash, such as a return of capital through dividends or common stock repurchases, the amount of which will be determined by our operations and other market factors. Significant factors we review to determine the amount and timing of common stock repurchases include the current stock price compared to our determination of the underlying value of our assets, current and forecast operating results and the completion of hotel sales.

We have structured our debt profile to maintain a balanced maturity schedule and to minimize the number of assets that are encumbered by mortgage debt. Currently, 99% of our hotels (as measured by revenues) are unencumbered by mortgage debt. We have access to multiple types of financing, as approximately 98% of our debt consists of senior notes and borrowings under our credit facility, none of which are collateralized by specific hotel properties. We believe that we have sufficient liquidity and access to the capital markets to take advantage of opportunities to enhance our portfolio, withstand declines in operating cash flow, pay near-term debt maturities, and fund our capital expenditures programs. We may continue to access the capital markets if favorable conditions exist in order to further enhance our liquidity and to fund cash needs.

Cash Requirements. We use cash for acquisitions, capital expenditures, debt payments, operating costs, and corporate and other expenses, as well as for dividends and distributions to stockholders and unitholders and stock and unit repurchases. As a REIT, Host Inc. is required to distribute to its stockholders at least 90% of its taxable income,

excluding net capital gain, on an annual basis. On July 15, 2016, we paid a dividend of \$0.20 per share of Host Inc.'s common stock, which totaled approximately \$148 million.

Capital Resources. As of June 30, 2016, we had \$266 million of cash and cash equivalents. We depend primarily on external sources of capital to finance growth, including acquisitions. As a result, the liquidity and debt capacity provided by our credit facility and the ability to issue senior unsecured debt are key components of our capital structure. Our financial flexibility (including our ability to incur debt, make distributions and make investments) is contingent on our ability to maintain compliance with the financial covenants of such indebtedness, which include, among other things, the allowable amounts of leverage, interest coverage and fixed charges.

If, at any time, we determine that market conditions are favorable, after taking into account our liquidity requirements, we may cause Host L.P. to issue senior notes or debentures exchangeable for shares of Host Inc. common stock. Given the total amount of our debt and our maturity schedule, we will continue to redeem or refinance senior notes and mortgage debt from time to time, taking advantage of favorable market conditions. In February 2016, Host Inc.'s Board of Directors authorized repurchases of up to \$500 million of senior notes and mortgage debt other than in accordance with its terms, of which the entire amount remains available under this authority. We may purchase senior notes for cash through open market purchases, privately negotiated transactions, a tender

offer or, in some cases, through the early redemption of such securities pursuant to their terms. Repurchases of debt will depend on prevailing market conditions, our liquidity requirements, contractual restrictions and other factors. Any refinancing or retirement before the maturity date will affect earnings and Funds From Operations (“FFO”) per diluted share, as defined below, as a result of the payment of any applicable call premiums and the acceleration of the write-off of previously deferred financing costs. In addition, as noted above, to the extent we do not identify appropriate investments, we may decide in the future to use available cash for other uses, including share repurchases. Accordingly, in light of our priorities relative to managing our capital structure and our liquidity profile and given prevailing conditions and relative pricing in the capital markets, we may, at any time, subject to applicable securities laws, be considering, or be in discussions with respect to, the repurchase or issuance of exchangeable debentures and/or senior notes or the repurchase or sale of common stock. Any such transactions may, subject to applicable securities laws, occur simultaneously.

Sources and Uses of Cash. Our sources of cash include cash from operations, proceeds from debt and equity issuances, and proceeds from asset sales. Uses of cash include acquisitions, investments in our joint ventures, capital expenditures, operating costs, debt repayments, and repurchases and distributions to equity holders.

Cash Provided by Operations. Our cash provided by operations increased \$63 million to \$612 million for the year-to-date ended June 30, 2016 compared to the same period in 2015, reflecting improved operations at our hotels and a decrease in cash interest and debt extinguishment costs of \$32 million in 2016 compared 2015.

Cash Provided by (Used in) Investing Activities. Net cash provided by investing activities was \$57 million for the first half of 2016 and net cash used for investing activities was \$564 million for the first half of 2015. Cash used in investing activities primarily consisted of capital expenditures on our existing portfolio and the acquisition of the Key Bridge Marriott ground lease in 2016 and the Phoenician in 2015, and totaled \$393 million and \$738 million during the first half of 2016 and 2015, respectively. Cash used for renewal and replacement capital expenditures for the first half of 2016 and 2015 was \$161 million and \$219 million, respectively, while cash used for capital expenditures invested in ROI/redevelopment projects and acquisition capital expenditures during the same period was \$141 million and \$101 million, respectively. Cash provided by investing activities totaled \$450 million and \$174 million for the first half of 2016 and 2015, respectively, and consisted of proceeds from the sale of eight hotels in 2016 and four hotels in 2015, as well as the return of investment from a joint venture in the first half of 2016.
