SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended June 30, 2016

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from \_\_\_\_\_ to \_\_\_\_\_

Commission File Number 001-03761

TEXAS INSTRUMENTS INCORPORATED

(Exact Name of Registrant as Specified in Its Charter)

Delaware 75-0289970  
(State of Incorporation) (I.R.S. Employer Identification No.)

12500 TI Boulevard, Dallas, Texas 75243  
(Address of principal executive offices) (Zip Code)  
Registrant's telephone number, including area code 214-479-3773

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes  No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes  No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

## TEXAS INSTRUMENTS INCORPORATED AND SUBSIDIARIES

## PART I - FINANCIAL INFORMATION

## ITEM 1. Financial Statements.

Consolidated Statements of Income (Millions of dollars, except share and per-share amounts)	For Three Months Ended		For Six Months Ended	
	June 30, 2016	2015	June 30, 2016	2015
Revenue	\$ 3,273	\$ 3,232	\$ 6,281	\$ 6,382
Cost of revenue (COR)	1,270	1,351	2,454	2,685
Gross profit	2,003	1,881	3,827	3,697
Research and development (R&D)	345	320	671	658
Selling, general and administrative (SG&A)	460	470	908	909
Acquisition charges	79	82	159	165
Restructuring charges/other	2	(1 )	4	(3 )
Operating profit	1,117	1,010	2,085	1,968
Other income (expense), net (OI&E)	6	3	10	7
Interest and debt expense	21	24	43	46
Income before income taxes	1,102	989	2,052	1,929
Provision for income taxes	323	293	605	577
Net income	\$ 779	\$ 696	\$ 1,447	\$ 1,352
Earnings per common share (EPS):				
Basic	\$ .77	\$ .66	\$ 1.42	\$ 1.28
Diluted	\$ .76	\$ .65	\$ 1.40	\$ 1.26
Average shares outstanding (millions):				
Basic	1,004	1,038	1,005	1,042
Diluted	1,016	1,051	1,017	1,056
Cash dividends declared per common share	\$ .38	\$ .34	\$ .76	\$ .68

As a result of accounting rule ASC 260, which requires a portion of Net income to be allocated to unvested restricted stock units (RSUs) on which we pay dividend equivalents, diluted EPS is calculated using the following:

Net income	\$ 779	\$ 696	\$ 1,447	\$ 1,352
Income allocated to RSUs	(10 )	(10 )	(19 )	(19 )
Income allocated to common stock for diluted EPS	\$ 769	\$ 686	\$ 1,428	\$ 1,333

See accompanying notes.

## TEXAS INSTRUMENTS INCORPORATED AND SUBSIDIARIES

## TEXAS INSTRUMENTS INCORPORATED AND SUBSIDIARIES

## Notes to financial statements

## 1. Description of business, including segment information

We design, make and sell semiconductors to electronics designers and manufacturers all over the world. We have two reportable segments, which are established along major categories of products as follows:

- Analog – consists of the following product lines: High Volume Analog & Logic, Power Management, High Performance Analog and Silicon Valley Analog.
- Embedded Processing – consists of the following product lines: Microcontrollers, Processors and Connectivity.

We report the results of our remaining business activities in Other. Other includes operating segments that do not meet the quantitative thresholds for individually reportable segments and cannot be aggregated with other operating segments. Other includes DLP® products, calculators, custom ASICs and royalties received from agreements involving license rights to our patent portfolio.

Our centralized manufacturing and support organizations, such as facilities, procurement and logistics, provide support to our operating segments, including those in Other. Costs incurred by these organizations, including depreciation, are charged to the segments on a per-unit basis. Consequently, depreciation expense is not an independently identifiable component within the segments' results and, therefore, is not provided.

## Segment information

	For Three Months Ended June 30,		For Six Months Ended June 30,	
	2016	2015	2016	2015
Revenue:				
Analog	\$ 2,044	\$ 2,049	\$ 3,923	\$ 4,084

Other	157	147	264	261
Total operating profit	\$ 1,117	\$ 1,010	\$ 2,085	\$ 1,968

2. Basis of presentation and significant accounting policies and practices

Basis of presentation

The consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States (GAAP) and on the same basis as the audited financial statements included in our annual report on Form 10-K for the year ended December 31, 2015. The Consolidated Statements of Income, Comprehensive Income and Cash Flows for the periods ended June 30, 2016 and 2015, and the Consolidated Balance Sheet as of June 30, 2016, are not audited but reflect all adjustments that are of a normal recurring nature and are necessary for a fair statement of the results of the periods shown. Certain information and note disclosures normally included in annual consolidated financial statements have been omitted pursuant to the rules and regulations of the U.S. Securities and Exchange Commission. Because the consolidated interim financial statements do not include all of the information and notes required by GAAP for a complete set of financial statements, they should be read in conjunction with the audited consolidated financial statements and notes included in our annual report on Form 10-K for the year ended December 31, 2015. The results for the three- and six-month periods are not necessarily indicative of a full year's results.

The consolidated financial statements include the accounts of all subsidiaries. All intercompany balances and transactions have been eliminated in consolidation. All dollar amounts in the financial statements and tables in these notes, except per-share amounts, are stated in millions of U.S. dollars unless otherwise indicated.

## TEXAS INSTRUMENTS INCORPORATED AND SUBSIDIARIES

## Significant accounting policies and practices

## Earnings per share (EPS)

Unvested share-based payment awards that contain non-forfeitable rights to receive dividends or dividend equivalents, such as our restricted stock units (RSUs), are considered to be participating securities and the two-class method is used for purposes of calculating EPS. Under the two-class method, a portion of Net income is allocated to these participating securities and, therefore, is excluded from the calculation of EPS allocated to common stock, as shown in the table below.

Computation and reconciliation of earnings per common share are as follows (shares in millions):

	For Three Months Ended June 30,						
	2016			2015			
	Net	Income	Shares	Net	Income	Shares	EPS
<b>Basic EPS:</b>							
Net income	\$ 779			\$ 696			
Income allocated to RSUs	(10 )			(10 )			
Income allocated to common stock for basic EPS calculation	\$ 769	1,004	\$ .77	\$ 686	1,038	\$ .66	
<b>Adjustment for dilutive shares:</b>							
Stock-based compensation plans		12			13		
<b>Diluted EPS:</b>							
Net income	\$ 779			\$ 696			
Income allocated to RSUs	(10 )			(10 )			
Income allocated to common stock for diluted EPS calculation	\$ 769	1,016	\$ .76	\$ 686	1,051	\$ .65	
	For Six Months Ended June 30,						
	2016			2015			
	Net	Income	Shares	Net	Income	Shares	EPS
<b>Basic EPS:</b>							
Net income	\$ 1,447			\$ 1,352			
Income allocated to RSUs	(19 )			(19 )			
Income allocated to common stock for basic EPS calculation	\$ 1,428	1,005	\$ 1.42	\$ 1,333	1,042	\$ 1.28	
<b>Adjustment for dilutive shares:</b>							
Stock-based compensation plans		12			14		

Diluted EPS:							
Net income			\$ 1,447			\$ 1,352	
Income allocated to RSUs			(19 )			(19 )	
Income allocated to common stock for diluted EPS calculation			\$ 1,428	1,017	\$ 1.40	\$ 1,333	1,056 \$ 1.26

Potentially dilutive securities representing 9 million shares of common stock that were outstanding during the second quarters of 2016 and 2015, and 16 million and 12 million shares outstanding during the first six months of 2016 and 2015, respectively, were excluded from the computation of diluted earnings per common share for these periods because their effect would have been anti-dilutive.

#### Derivatives and hedging

We use derivative financial instruments to manage exposure to foreign currency exchange risk. These instruments are primarily forward foreign currency exchange contracts, which are used as economic hedges to reduce the earnings impact that exchange rate fluctuations may have on our non-U.S. dollar net balance sheet exposures. Gains and losses from changes in the fair value of these forward foreign currency exchange contracts are credited or charged to OI&E. We do not apply hedge accounting to our foreign currency derivative instruments.

TEXAS INSTRUMENTS INCORPORATED AND SUBSIDIARIES

In connection with the issuance of long-term debt, we occasionally use financial derivatives such as treasury rate lock agreements that are recognized in AOCI and amortized over the life of the related debt. The results of these derivative transactions have not been material.

We do not use derivatives for speculative or trading purposes.

Fair values of financial instruments

The fair values of our derivative financial instruments were not material as of June 30, 2016. Our investments in cash equivalents, short-term investments and certain long-term investments, as well as our postretirement plan assets and deferred compensation liabilities, are carried at fair value. The carrying values for other current financial assets and liabilities, such as accounts receivable and accounts payable, approximate fair value due to the short maturity of such instruments. The carrying value of our long-term debt approximates the fair value as measured using broker-dealer quotes, which are Level 2 inputs. See Note 5 for the definition of Level 2 inputs.

Changes in accounting standards

In May 2014, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2014-09, Revenue from Contracts with Customers (Topic 606). This standard provides a single set of guidelines for revenue recognition to be used across all industries and requires additional disclosures, and is effective for annual and interim reporting periods beginning after December 15, 2017. This standard permits early adoption, but not before December 15, 2016, and permits the use of either the retrospective or cumulative effect transition method. We are currently evaluating the potential impact of this standard on our financial position and results of operations, as well as our selected transition method. Based on our preliminary assessment, we believe the new standard will not have a material impact on our financial position and results of operations, as we do not expect to change the manner or timing of recognizing revenue on a majority of our revenue transactions. We recognize revenue on sales to customers and distributors upon satisfaction of our performance obligations when the goods are shipped. For consignment sales, we recognize revenue when the goods are pulled from consignment inventory. In April 2016, the FASB issued an amendment to this guidance, ASU 2016-10, Revenue from Contracts with Customers (Topic 606): Identifying Performance Obligations and Licensing, which, among other things, provides clarification about whether revenue related to a distinct license of intellectual property is recognized over time or at a point in time. We are assessing the impact of this amendment.

In January 2016, the FASB issued ASU No. 2016-01, Financial Instruments – Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities. Under this standard, all equity investments except those accounted for under the equity method are required to be measured at fair value. Equity investments that do not have a readily determinable fair value may, as a practical expedient, be measured at cost, adjusted for changes in observable prices minus impairment. This standard is effective for our interim and annual periods beginning January 1, 2018. This standard must be applied using a cumulative-effect adjustment in net income to the beginning of the fiscal year of adoption, except for equity investments without a readily determinable fair value, which are to be applied prospectively to equity investments as of the adoption date. We do not expect this standard to have a material impact on our financial position and results of operations, as nearly all of our equity investments are already recorded at fair value or under the equity method.

In February 2016, the FASB issued ASU No. 2016-02, Leases (Topic 842). This standard requires all leases that have a term of over 12 months to be recognized on the balance sheet with the liability for lease payments and the corresponding right-of-use asset initially measured at the present value of amounts expected to be paid over the term.

Recognition of the costs of these leases on the income statement will be dependent upon their classification as either an operating or a financing lease. Costs of an operating lease will continue to be recognized as a single operating expense on a straight-line basis over the lease term. Costs for a financing lease will be disaggregated and recognized as both an operating expense (for the amortization of the right-of-use asset) and interest expense (for interest on the lease liability). This standard will be effective for our interim and annual periods beginning January 1, 2019, and must be applied on a modified retrospective basis to leases existing at, or entered into after, the beginning of the earliest comparative period presented in the financial statements. Early adoption is permitted. We are currently evaluating the timing of adoption and the potential impact of this standard on our financial position and results of operations.

TEXAS INSTRUMENTS INCORPORATED AND SUBSIDIARIES

In March 2016, the FASB issued ASU No. 2016-09, Compensation – Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting. This standard provides for several changes to the accounting for share-based awards. Among other changes, this standard will require recognition of certain income tax effects of awards in net income in the period in which the awards are settled or vested, rather than through additional paid-in capital in the equity section of the balance sheet. The standard also changes the presentation of excess tax benefits and statutory tax withholdings in the statement of cash flows. This standard will be effective for our interim and annual periods beginning January 1, 2017; however, early adoption is permitted. Each of the various provisions within this standard has its own specified transition method; some will be applied prospectively and others will be applied on a retrospective or modified retrospective basis. We are currently evaluating the timing of adoption and the potential impact of this standard on our financial position and results of operations.

In June 2016, the FASB issued ASU No. 2016-13, Financial Instruments – Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments. This standard requires entities to use a current lifetime expected credit loss methodology to measure impairments of certain financial assets. Using this methodology will result in earlier recognition of losses than under the current incurred loss approach, which required waiting to recognize a loss until it is probable of having been incurred. There are other provisions within the standard affecting how impairments of other financial assets may be recorded and presented, as well as expanded disclosures. This standard will be effective for our interim and annual periods beginning after December 15, 2019, and permits earlier application but not before December 15, 2018. The standard will be applied using a modified retrospective approach. We are currently evaluating the potential impact of this standard, but we expect it will not have a material impact on our financial position and results of operations.

## TEXAS INSTRUMENTS INCORPORATED AND SUBSIDIARIES

## 3. Restructuring charges/other

Restructuring charges/other are recognized in Other for segment reporting purposes.

## Restructuring charges

For the three and six months ended June 30, 2016, we incurred restructuring charges of \$2 million and \$4 million, respectively, related to our plans to phase out a manufacturing facility in Greenock, Scotland, through the end of 2018. These charges were comprised of severance and benefits costs, as well as accelerated depreciation. Total restructuring charges, primarily severance and related benefit costs, are estimated to be about \$40 million, of which \$21 million has been recognized through June 30, 2016. The remaining charges are expected to be recognized through the end of 2018. As of June 30, 2016, no payments have been made related to the phase-out of the Scotland facility.

## Restructuring balances

The restructuring accrual balances are primarily reported as a component of either Accrued expenses and other liabilities or Deferred credits and other liabilities on our Consolidated Balance Sheets, depending on the expected timing of payment. The \$32 million balance as of December 31, 2015, was composed of \$17 million related to the Scotland facility and \$15 million related to prior actions. The \$25 million balance as of June 30, 2016, is composed of \$17 million related to the Scotland facility and \$8 million related to prior actions.

Balance, December 31, 2015	\$ 32
Restructuring charges	4
Payments	(7)
Non-cash items (a)	(4)
Balance, June 30, 2016	\$ 25

(a) Reflects charges for impacts of accelerated depreciation and changes in exchange rates.

## 4. Income taxes

Federal income taxes for the interim periods presented have been included in the accompanying financial statements on the basis of an estimated annual effective tax rate. As of June 30, 2016, the estimated annual effective tax rate for 2016 is about 30 percent, which differs from the 35 percent statutory corporate tax rate due to lower statutory tax rates applicable to our operations in many of the jurisdictions in which we operate and from U.S. tax benefits.

## 5. Valuation of debt and equity investments and certain liabilities

### Debt and equity investments

We classify our investments as available for sale, trading, equity method or cost method. Most of our investments are classified as available for sale.

Available-for-sale and trading securities are stated at fair value, which is generally based on market prices or broker quotes. See the fair-value discussion below. Unrealized gains and losses on available-for-sale securities are recorded as an increase or decrease, net of taxes, in AOCI on our Consolidated Balance Sheets. We record other-than-temporary impairments on available-for-sale securities in OI&E in our Consolidated Statements of Income.

We classify certain mutual funds as trading securities. These mutual funds hold a variety of debt and equity investments intended to generate returns that offset changes in certain deferred compensation liabilities. We record changes in the fair value of these mutual funds and the related deferred compensation liabilities in SG&A.

Our other investments are not measured at fair value but are accounted for using either the equity method or cost method. These investments consist of interests in venture capital funds and other non-marketable equity securities. Gains and losses from equity-method investments are reflected in OI&E based on our ownership share of the investee's financial results. Gains and losses on cost-method investments are recorded in OI&E when realized or when an impairment of the investment's value is warranted based on our assessment of the recoverability of each investment.

## TEXAS INSTRUMENTS INCORPORATED AND SUBSIDIARIES

Details of our investments are as follows:

	June 30, 2016			December 31, 2015		
	Cash and Cash Equivalents	Short-Term Investments	Long-Term Investments	Cash and Cash Equivalents	Short-Term Investments	Long-Term Investments
Measured at fair value:						
Available-for-sale securities:						
Money market funds	\$ 533	\$ —	\$ —	\$ 395	\$ —	\$ —
Corporate obligations	102	325	—	132	285	—
U.S. Government agency and Treasury securities	395	979	—	245	1,933	—
Trading securities:						
Mutual funds	—	—	190	—	—	187
Total	1,030	1,304	190	772	2,218	187
Other measurement basis:						
Equity-method investments	—	—	25	—	—	25
Cost-method investments	—	—	9	—	—	9
Cash on hand	205	—	—	228	—	—
Total	\$ 1,235	\$ 1,304	\$ 224	\$ 1,000	\$ 2,218	\$ 221

As of June 30, 2016, and December 31, 2015, unrealized gains and losses associated with our available-for-sale investments were not material. We did not recognize any credit losses related to available-for-sale investments for the six months ended June 30, 2016, and June 30, 2015.

For the six months ended June 30, 2016, and June 30, 2015, the proceeds from sales, redemptions and maturities of short-term available-for-sale investments were \$2.11 billion and \$1.48 billion, respectively. Gross realized gains and losses from these sales were not material.

The following table presents the aggregate maturities of investments in debt securities classified as available for sale as of June 30, 2016:

Due	Fair Value
One year or less	\$ 2,304
One to two years	30

Other-than-temporary declines and impairments in the values of long-term investments recognized in OI&E were not material in the six months ended June 30, 2016, and June 30, 2015.

#### Fair-value considerations

We measure and report certain financial assets and liabilities at fair value on a recurring basis. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date.

The three-level hierarchy discussed below indicates the extent and level of judgment used to estimate fair-value measurements.

- Level 1 – Uses unadjusted quoted prices that are available in active markets for identical assets or liabilities as of the reporting date.
- Level 2 – Uses inputs other than Level 1 that are either directly or indirectly observable as of the reporting date through correlation with market data, including quoted prices for similar assets and liabilities in active markets and quoted prices in markets that are not active. Level 2 also includes assets and liabilities that are valued using models or other pricing methodologies that do not require significant judgment since the input assumptions used in the models, such as interest rates and volatility factors, are corroborated by readily observable data. We utilize a third-party data service to provide Level 2 valuations. We verify these valuations for reasonableness relative to unadjusted quotes obtained from brokers or dealers based on observable prices for similar assets in active markets.

## TEXAS INSTRUMENTS INCORPORATED AND SUBSIDIARIES

·Level 3 – Uses inputs that are unobservable, supported by little or no market activity and reflect the use of significant management judgment. These values are generally determined using pricing models that utilize management estimates of market participant assumptions. As of June 30, 2016, and December 31, 2015, we had no Level 3 assets or liabilities, other than certain assets held by our postretirement plans.

The following are our assets and liabilities that were accounted for at fair value on a recurring basis as of June 30, 2016, and December 31, 2015. These tables do not include cash on hand, assets held by our postretirement plans, or assets and liabilities that are measured at historical cost or any basis other than fair value.

	Fair Value			Fair Value		
	June 30, 2016			December 31, 2015		
	Total	Level 1	Level 2	Total	Level 1	Level 2
<b>Assets:</b>						
Money market funds	\$ 533	\$ 533	\$ —	\$ 395	\$ 395	\$ —
Corporate obligations	427	—	427	417	—	417
U.S. Government agency and Treasury securities	1,374	1,114	260	2,178	1,828	350
Mutual funds	190	190	—	187	187	—
<b>Total assets</b>	<b>\$ 2,524</b>	<b>\$ 1,837</b>	<b>\$ 687</b>	<b>\$ 3,177</b>	<b>\$ 2,410</b>	<b>\$ 767</b>
<b>Liabilities:</b>						
Deferred compensation	\$ 206	\$ 206	\$ —	\$ 198	\$ 198	\$ —
<b>Total liabilities</b>	<b>\$ 206</b>	<b>\$ 206</b>	<b>\$ —</b>	<b>\$ 198</b>	<b>\$ 198</b>	<b>\$ —</b>

## 6. Goodwill and acquisition-related intangibles

Goodwill, net, was \$4.36 billion as of June 30, 2016, and December 31, 2015. There was no impairment of goodwill during the six months ended June 30, 2016, or June 30, 2015.

The components of Acquisition-related intangibles, net, are as follows:

	Amortization Period (Years)	June 30, 2016			December 31, 2015		
		Gross		Net	Gross		Net
		Carrying Amount	Accumulated Amortization		Carrying Amount	Accumulated Amortization	
Developed technology	7 - 10	\$ 2,131	\$ 1,035	\$ 1,096	\$ 2,131	\$ 928	\$ 1,203
Customer relationships	8	810	482	328	810	431	379
Other intangibles	n/a	—	—	—	3	2	1
<b>Total</b>		<b>\$ 2,941</b>	<b>\$ 1,517</b>	<b>\$ 1,424</b>	<b>\$ 2,944</b>	<b>\$ 1,361</b>	<b>\$ 1,583</b>

Amortization of acquisition-related intangibles was \$79 million and \$80 million for the second quarters of 2016 and 2015, respectively, and \$159 million and \$160 million for the first six months of 2016 and 2015, respectively, primarily related to developed technology. Fully amortized assets are written off against accumulated amortization.

## 7. Postretirement benefit plans

Expense related to defined benefit and retiree health care benefit plans was as follows:

	U.S. Defined Benefit		U.S. Retiree Health Care		Non-U.S. Defined Benefit	
	2016	2015	2016	2015	2016	2015
For Three Months Ended June 30,						
Service cost	\$ 6	\$ 5	\$ 2	\$ 2	\$ 8	\$ 8
Interest cost	11	11	5	5	13	14
Expected return on plan assets	(11)	(12)	(5)	(6)	(17)	(19)
Recognized net actuarial loss	5	5	1	2	7	6
Amortization of prior service cost (credit)	—	—	(1)	2	(1)	(1)
Net periodic benefit costs	11	9	2	5	10	8
Settlement losses	7	11	—	—	—	2
Total	\$ 18	\$ 20	\$ 2	\$ 5	\$ 10	\$ 10

## TEXAS INSTRUMENTS INCORPORATED AND SUBSIDIARIES

For Six Months Ended June 30,	U.S. Defined Benefit		U.S. Retiree Health Care		Non-U.S. Defined Benefit	
	2016	2015	2016	2015	2016	2015
Service cost	\$ 11	\$ 11	\$ 3	\$ 3	\$ 16	\$ 17
Interest cost	22	21	10	10	26	27
Expected return on plan assets	(21)	(24)	(10)	(11)	(34)	(38)
Recognized net actuarial loss	10	10	3	4	13	12
Amortization of prior service cost (credit)	—	—	(2 )	3	(1 )	(1 )
Net periodic benefit costs	22	18	4	9	20	17
Settlement losses	13	12	—	—	1	2
Total	\$ 35	\$ 30	\$ 4	\$ 9	\$ 21	\$ 19

## 8. Debt and lines of credit

## Short-term borrowings

We maintain a line of credit to support commercial paper borrowings, if any, and to provide additional liquidity through bank loans. As of June 30, 2016, we had a variable-rate revolving credit facility from a consortium of investment-grade banks that allows us to borrow up to \$2 billion until March 2021. The interest rate on borrowings under this credit facility, if drawn, is indexed to the applicable London Interbank Offered Rate (LIBOR). As of June 30, 2016, our credit facility was undrawn and we had no commercial paper outstanding.

## Long-term debt

In May 2016, we issued a principal amount of \$500 million of fixed-rate long-term debt due in 2022. We incurred \$3 million of issuance and other related costs, which are amortized to Interest and debt expense over the term of the debt. The proceeds of the offering were \$499 million, net of the original issuance discount, and were used toward the repayment of a portion of \$1.0 billion of maturing debt retired in May.

Long-term debt outstanding as of June 30, 2016, and December 31, 2015, is as follows:

	June 30, 2016	December 31, 2015
Notes due 2016 at 2.375%	\$ —	\$ 1,000
Notes due 2017 at 0.875%	250	250
Notes due 2017 at 6.60% (assumed with National acquisition)	375	375
Notes due 2018 at 1.00%	500	500
Notes due 2019 at 1.65%	750	750

Edgar Filing: TEXAS INSTRUMENTS INC - Form 10-Q

Notes due 2020 at 1.75%	500	500
Notes due 2021 at 2.75%	250	250
Notes due 2022 at 1.85%	500	—
Notes due 2023 at 2.25%	500	500
Total debt	3,625	4,125
Net unamortized discounts, premiums and debt issuance costs	(13 )	(5 )
Total debt, including net unamortized discounts, premiums and debt issuance costs	3,612	4,120
Current portion of long-term debt	(637 )	(1,000 )
Long-term debt	\$ 2,975	\$ 3,120

Interest and debt expense was \$21 million and \$24 million for the second quarters of 2016 and 2015, respectively, and \$43 million and \$46 million for the first six months of 2016 and 2015, respectively. This was net of the amortization of the debt discounts, premiums and other debt issuance costs. Capitalized interest was not material.

TEXAS INSTRUMENTS INCORPORATED AND SUBSIDIARIES

9. Contingencies

Indemnification guarantees

We routinely sell products with an intellectual property indemnification included in the terms of sale. Historically, we have had only minimal, infrequent losses associated with these indemnities. Consequently, we cannot reasonably estimate any future liabilities that may result.

Warranty costs/product liabilities

We accrue for known product-related claims if a loss is probable and can be reasonably estimated. During the periods presented, there have been no material accruals or payments regarding product warranty or product liability. Historically, we have experienced a low rate of payments on product claims. Although we cannot predict the likelihood or amount of any future claims, we do not believe they will have a material adverse effect on our financial condition, results of operations or liquidity. Typically, our warranties for semiconductor products obligate us to repair, replace or credit the purchase price of a covered product back to the buyer. Product claims may exceed the price of our products.

General

We are subject to various legal and administrative proceedings. Although it is not possible to predict the outcome of these matters, we believe that the results of these proceedings will not have a material adverse effect on our financial condition, results of operations or liquidity.

10. Supplemental financial information

Acquisition charges

We incurred various costs as a result of the 2011 acquisition of National Semiconductor Corporation (National) that are included in Other for segment reporting purposes, consistent with how management measures the performance of its segments. For the three and six months ended June 30, 2016, and June 30, 2015, Acquisition charges were primarily from the ongoing amortization of intangible assets resulting from the National acquisition. See Note 6 for additional information.

Details on amounts reclassified out of Accumulated other comprehensive income (loss), net of taxes, to Net income

Our Consolidated Statements of Comprehensive Income include items that have been recognized within Net income during the periods ended June 30, 2016, and June 30, 2015. The table below details where in the Consolidated Statements of Income these transactions are recorded.

	For Three Months Ended June 30, 2016		For Six Months Ended June 30, 2015		Impact to Related Statements of Income Lines
Net actuarial gains (losses) of defined benefit plans:					
Recognized net actuarial loss and Settlement losses (a)	\$ 20	\$ 26	\$ 40	\$ 40	Increase to Pension expense (b)
Tax effect	(7)	(9)	(13)	(13)	Decrease to Provision for income taxes
Recognized within Net income, net of taxes	\$ 13	\$ 17	\$ 27	\$ 27	Decrease to Net income
Prior service (cost) credit of defined benefit plans:					
Amortization of prior service cost (credit) (a)	\$ (2)	\$ 1	\$ (3)	\$ 2	(Decrease) increase to Pension expense (b)
Tax effect	1	(1)	1	(1)	Increase (decrease) to Provision for income taxes
Recognized within Net income, net of taxes	\$ (1)	\$ —	\$ (2)	\$ 1	(Increase) decrease to Net income

(a) Detailed in Note 7.

(b) Pension expense is included in COR, R&D and SG&A in the Consolidated Statements of Income.

ITEM 2. Management's discussion and analysis of financial condition and results of operations.

Overview

We design, make and sell semiconductors to electronics designers and manufacturers all over the world. Our business model is carefully constructed around the following attributes:

- Industry's broadest portfolio of differentiated analog and embedded processing semiconductors. Our customers' design engineers need at least one, and most times multiple, chips for their systems. The breadth of our portfolio means we can solve more of these needs than can our competitors, which gives us access to more customers and the opportunity to generate more revenue per system. We invest more than \$1 billion each year to develop new products for our portfolio.
- A strong foundation of manufacturing technology and low-cost production. We invest in manufacturing technologies that differentiate the features of our semiconductors, and we do most of our own production in-house, as opposed to outsourcing it. This ability to directly control our manufacturing helps ensure a consistent supply of products for our customers. We produce billions of semiconductors each year on a mixture of 150-, 200- and 300-millimeter wafers, and we are able to keep costs low for manufacturing facilities and equipment because our analog and much of our embedded processing semiconductors can be made using mature assets that we acquire ahead of demand when their prices are most attractive. In 2015, we produced approximately 25 percent of our Analog semiconductors on 300-millimeter wafers, the industry's largest wafers, which have a 40 percent cost advantage per unpackaged chip over 200-millimeter wafers. The majority of our future Analog growth will be produced on 300-millimeter wafers, which will be meaningful to the growth of our margins and cash flow over the long term.
- Industry's largest market channels. Our global sales force is larger than those of our competitors, and the breadth of our portfolio attracts tens of millions of visits to our web site each year where customers often begin their initial product searches and design-in journey. These capabilities combine to provide us unique access to more than 100,000 customers.
- Diversity and longevity in our products and in the markets we serve. Together, the attributes above result in diverse and long-lived positions that deliver high terminal value to our shareholders. Because of the breadth of our portfolio we are not dependent on any single product, and because of the breadth of our markets we are not dependent on any single application or customer. Some of our products generate revenue for decades, which strengthens the return on our investments.

The combined effect of these attributes is that we have consistently grown free cash flow and gained market share in Analog and Embedded Processing. These attributes put us in a unique class of companies with the ability to grow, generate cash, and return that cash to shareholders.

Management's discussion and analysis of financial condition and results of operations (MD&A) should be read in conjunction with the financial statements and the related notes that appear elsewhere in this document. In the following discussion of our results of operations:

- All dollar amounts in the tables are stated in millions of U.S. dollars.
- When we discuss our results:
  - o Unless otherwise noted, changes in our revenue are attributable to changes in customer demand, which are evidenced by fluctuations in shipment volumes.
  - o New products tend not to have a significant impact on our revenue in any given period because we sell such a large number of products.
  - o From time to time, our revenue and gross profit are affected by changes in demand for higher-priced or lower-priced products, which we refer to as changes in the "mix" of products shipped.
  - o

Because we own much of our manufacturing capacity, a significant portion of our operating cost is fixed. When factory loadings decrease, our fixed costs are spread over reduced output and, absent other circumstances, our profit margins decrease. Conversely, as factory loadings increase, our fixed costs are spread over increased output and, absent other circumstances, our profit margins increase. Increases and decreases in factory loadings tend to correspond to increases and decreases in demand.

- Our segments represent groups of similar products that are combined on the basis of similar design and development requirements, product characteristics, manufacturing processes and distribution channels, and how management allocates resources and measures results. See Note 1 to the financial statements for more information regarding our segments.

· Over time, we have been reallocating resources from areas like manufacturing support and SG&A into R&D activities. As a result of this reallocation, R&D expense will continue increasing into 2017.

#### Performance summary

Our second-quarter revenue was \$3.27 billion, net income was \$779 million and earnings per share (EPS) were \$0.76.

Revenue and EPS for the quarter were solidly in the upper half of our expected range. Compared with a year ago, demand for our products continued to be strong in the automotive market, and grew in the industrial and communications equipment markets. Despite sequential growth, demand in the personal electronics market was down from a year ago.

In our core businesses, Embedded Processing revenue grew 9 percent and Analog revenue was about even with the same quarter a year ago. Operating margin increased in both businesses.

Gross margin of 61.2 percent reflected the quality of our product portfolio, as well as the efficiency of our manufacturing strategy, including the benefit of 300-millimeter Analog production.

Our cash flow from operations of \$4.5 billion for the trailing 12 months again underscored the strength of our business model. Free cash flow for the trailing 12 months was up 7 percent from a year ago to \$3.9 billion, and this represents 30.0 percent of revenue, up from 27.4 percent a year ago.

We have returned \$4.1 billion to shareholders in the past 12 months through stock repurchases and dividends.

Our strategy to return to shareholders 100 percent of free cash flow plus proceeds from exercises of equity compensation minus net debt retirement reflects our confidence in the long-term sustainability of our business model.

Our balance sheet remains strong with \$2.5 billion of cash and short-term investments at the end of the quarter, about 80 percent of which was owned by the company's U.S. entities. Inventory ended the quarter at 133 days.

Free cash flow is a non-GAAP financial measure. For reconciliation to GAAP and an explanation of the reason for providing this non-GAAP measure, see the Non-GAAP financial information section after the Liquidity and capital resources section.

#### Results of operations – second-quarter 2016 compared with second-quarter 2015

Revenue increased \$41 million due to higher revenue from Embedded Processing. Analog revenue was about even while Other revenue declined.

Gross profit of \$2.00 billion was up \$122 million, or 6 percent, primarily due to lower manufacturing costs. As a percentage of revenue, gross profit was 61.2 percent compared with 58.2 percent.

Operating expenses were \$345 million for R&D and \$460 million for SG&A. R&D expense increased \$25 million, or 8 percent, due to a combination of our ongoing reallocation of resources into R&D activities and higher compensation-related costs. SG&A expense decreased \$10 million, or 2 percent, due to savings from the completed restructuring action in Embedded Processing.

Acquisition charges associated with our 2011 acquisition of National were \$79 million compared with \$82 million. These non-cash charges were from the ongoing amortization of intangible assets.

Operating profit was \$1.12 billion, or 34.1 percent of revenue, compared with \$1.01 billion, or 31.3 percent of revenue.

Quarterly income taxes are calculated using the estimated annual effective tax rate. At the end of the second quarter, our estimated annual effective tax rate for 2016 was about 30 percent. Our annual effective tax rate benefits from lower tax rates (compared to the U.S. statutory rate) applicable to our operations in many of the jurisdictions in which we operate and from U.S. tax benefits. These lower non-U.S. tax rates are generally statutory in nature, without expiration and available to companies that operate in those taxing jurisdictions.

Our tax provision was \$323 million compared with \$293 million. The increase was due to higher income before income taxes, and to a lesser extent, a lower benefit from non-U.S. tax rates. The tax provision also included the effect of the federal research tax credit, which was not included in the year-ago quarter.

Net income was \$779 million compared with \$696 million, and EPS was \$0.76 compared with \$0.65.

#### Second-quarter 2016 segment results

Our segment results compared with the year-ago quarter are as follows:

Analog (includes High Volume Analog & Logic (HVAL), Power Management (Power), High Performance Analog (HPA) and Silicon Valley Analog (SVA) product lines)

	2Q16	2Q15	Change
Revenue	\$2,044	\$2,049	0%
Operating profit	771	728	6%
Operating profit % of revenue	37.7%	35.5%	

Analog revenue was about even as increases in HPA and SVA were offset by decreases in HVAL and Power. Operating profit increased primarily due to higher gross profit.

Embedded Processing (includes Microcontrollers, Processors and Connectivity product lines)

	2Q16	2Q15	Change
Revenue	\$755	\$690	9%
Operating profit	189	135	40%
Operating profit % of revenue	25.0%	19.6%	

Embedded Processing revenue increased in all three product lines, led by Processors. The increase in Microcontrollers revenue was due to the mix of products shipped. Operating profit increased primarily due to higher revenue and associated gross profit.

Other (includes DLP® products, calculators, custom ASICs and royalties)

	2Q16	2Q15	Change
Revenue	\$474	\$493	-4%
Operating profit*	157	147	7%
Operating profit % of revenue	33.1%	29.8%	

\*Includes Acquisition charges and Restructuring charges/other

Other revenue declined due to, in decreasing order, calculators, royalties and custom ASICs, partially offset by an increase in revenue from DLP products. Operating profit increased \$10 million.

Results of operations – first six months of 2016 compared with first six months of 2015

Revenue of \$6.28 billion decreased \$101 million, or 2 percent, as lower revenue from Analog and, to a lesser extent, Other more than offset higher revenue from Embedded Processing. Analog and Embedded Processing comprised 86 percent of revenue compared with 85 percent.

Gross profit of \$3.83 billion was up \$130 million, or 4 percent, despite lower revenue, primarily due to lower manufacturing costs.

R&D expense was \$671 million, an increase of \$13 million, due to a combination of our ongoing reallocation of resources to R&D activities and higher compensation-related costs. These increases were partially offset by savings from the completed restructuring action in Embedded Processing. SG&A expense of \$908 million was about even as savings from the completed restructuring action offset higher compensation-related costs.

Acquisition charges were \$159 million compared with \$165 million. These non-cash charges were from the ongoing amortization of intangible assets.

Operating profit was \$2.09 billion, or 33.2 percent of revenue, compared with \$1.97 billion, or 30.8 percent of revenue.

The tax provision increased to \$605 million from \$577 million primarily due to higher income before income taxes, and to a lesser extent, a lower benefit from non-U.S. tax rates. The increase was partially offset by the effect of the federal research tax credit for the first six months of 2016, which was not included in the year-ago period.

Net income was \$1.45 billion compared with \$1.35 billion. EPS was \$1.40 compared with \$1.26.

#### Year-to-date segment results

Our segment results compared with the year-ago period are as follows:

##### Analog

	YTD 2016	YTD 2015	Change
Revenue	\$3,923	\$4,084	-4%
Operating profit	1,450	1,449	0%
Operating profit % of revenue	37.0%	35.5%	

Analog revenue decreased due to HVAL and, to a lesser extent, Power. SVA and HPA revenue increased due to the mix of products shipped. Operating profit was about even, despite lower revenue, primarily due to higher gross profit, mostly offset by higher operating expenses.

##### Embedded Processing

	YTD 2016	YTD 2015	Change
Revenue	\$1,484	\$1,362	9%
Operating profit	371	258	44%
Operating profit % of revenue	25.0%	18.9%	

Embedded Processing revenue increased in all three product lines, led by Processors. Processors and Microcontrollers revenue increased due to the mix of products shipped. Operating profit increased primarily due to higher revenue and associated gross profit.

##### Other

	YTD 2016	YTD 2015	Change
Revenue	\$874	\$936	-7%
Operating profit*	264	261	1%
Operating profit % of revenue	30.2%	27.9%	

\*Includes Acquisition charges and Restructuring charges/other.

Other revenue declined due to, in decreasing order, calculators, custom ASICs and royalties. The decrease was partially offset by DLP products, which increased due to the mix of products shipped. Operating profit increased \$3 million.

Financial condition

At the end of the second quarter of 2016, Cash and cash equivalents plus Short-term investments was \$2.54 billion, a decrease of \$679 million from the end of 2015.

Accounts receivable were \$1.35 billion, an increase of \$183 million compared with the end of 2015. Days sales outstanding were 37 at the end of the second quarter compared with 33 at the end of 2015.

Inventory was \$1.88 billion, an increase of \$185 million from the end of 2015. Days of inventory increased from 115 at the end of 2015 to 133 at the end of the second quarter as we staged our inventory for future shipments. Our long-term model is for inventory in the range of 105 to 135 days.

#### Liquidity and capital resources

Our primary source of liquidity is cash flow from operations. Additional sources of liquidity are Cash and cash equivalents, Short-term investments and a variable-rate revolving credit facility. Cash flows from operating activities for the first six months of 2016 was \$1.62 billion, an increase of \$187 million from the year-ago period due to a decrease in cash used for working capital.

Our revolving credit facility is with a consortium of investment-grade banks and allows us to borrow up to \$2 billion until March 2021. This credit facility also serves as support for the issuance of commercial paper. As of June 30, 2016, our credit facility was undrawn, and we had no commercial paper outstanding.

For the first six months of 2016, investing activities provided \$638 million compared with using \$16 million in the year-ago period. Capital expenditures were \$282 million compared with \$248 million in the year-ago period and were primarily for semiconductor manufacturing equipment. We received proceeds from sales of short-term investments, net of purchases, of \$917 million compared with \$221 million in the year-ago period.

For the first six months of 2016, financing activities used cash of \$2.02 billion compared with \$1.43 billion in the year-ago period. In 2016, we received proceeds of \$499 million from the issuance of fixed-rate long-term debt (net of original issuance discount) compared with \$498 million in 2015. We retired maturing debt of \$1.0 billion in 2016 and \$250 million in 2015. We paid dividends of \$765 million compared with \$710 million in the year-ago period, reflecting an increase in the dividend rate, partially offset by fewer shares outstanding. We used \$1.16 billion to repurchase 21.4 million shares of our common stock, compared with \$1.32 billion used in the year-ago period to repurchase 23.9 million shares. Employee exercises of stock options provided cash proceeds of \$325 million compared with \$297 million in the year-ago period.

We had \$1.24 billion of Cash and cash equivalents and \$1.30 billion of Short-term investments as of June 30, 2016. We believe we have the necessary financial resources and operating plans to fund our working capital needs, capital expenditures, dividend and debt-related payments, and other business requirements for at least the next 12 months.

## Non-GAAP financial information

This MD&A includes references to free cash flow and ratios based on that measure. These are financial measures that were not prepared in accordance with GAAP. Free cash flow was calculated by subtracting Capital expenditures from the most directly comparable GAAP measure, Cash flows from operating activities (also referred to as cash flow from operations).

We believe that free cash flow and the associated ratios provide insight into our liquidity, our cash-generating capability and the amount of cash potentially available to return to investors, as well as insight into our financial performance. These non-GAAP measures are supplemental to the comparable GAAP measures.

Reconciliation to the most directly comparable GAAP-based measures is provided in the table below.

	For 12 Months Ended June 30,		
	2016	2015	Change
Cash flow from operations (GAAP)	\$4,455	\$4,084	9%
Capital expenditures	(585)	(476)	
Free cash flow (non-GAAP)	\$3,870	\$3,608	7%
Revenue	\$12,899	\$13,152	
Cash flow from operations as a percent of revenue (GAAP)	34.5%	31.1%	
Free cash flow as a percent of revenue (non-GAAP)	30.0%	27.4%	

## Long-term contractual obligations

Information regarding long-term debt obligations is described in the long-term contractual obligations table in Item 7 of our Form 10-K for the year ended December 31, 2015. Additionally, in May 2016 we issued \$500 million principal amount of 1.85 percent notes maturing in 2022, and we retired \$1.0 billion of maturing debt.

## Changes in accounting standards

See Note 2 to the financial statements for detailed information regarding the status of new accounting and reporting standards.

## ITEM 4. Controls and Procedures.

An evaluation as of the end of the period covered by this report was carried out under the supervision and with the participation of management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934). Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that those disclosure controls and procedures were effective. In addition, there has been no change in our internal control over financial reporting (as defined in Rule 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934) that occurred during the period covered by this report that has materially affected,

or is reasonably likely to materially affect, our internal control over financial reporting.

## PART II – OTHER INFORMATION

## ITEM 1A. Risk Factors.

Information concerning our risk factors is contained in Item 1A of our Form 10-K for the year ended December 31, 2015, and is incorporated by reference herein.

## ITEM 2. Unregistered Sales of Equity Securities and Use of Proceeds.

The following table contains information regarding our purchases of our common stock during the quarter.

## ISSUER PURCHASES OF EQUITY SECURITIES

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs <sup>(1)</sup>	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs <sup>(1)</sup>
April 1, 2016 through April 30, 2016	4,966,370	\$ 58.39	4,966,370	\$7.01 billion
May 1, 2016 through May 31, 2016	4,078,870	57.62	4,078,870	6.78 billion
June 1, 2016 through June 30, 2016	39,126	58.77	39,126	6.78 billion
Total	9,084,366	<sup>(2)</sup> \$ 58.04	9,084,366	<sup>(2)</sup> \$6.78 billion <sup>(3)</sup>

<sup>(1)</sup>All purchases during the quarter were made under the authorization from our board of directors to purchase up to \$7.5 billion of additional shares of TI common stock announced September 17, 2015.

<sup>(2)</sup>All purchases during the quarter were open-market purchases.

<sup>(3)</sup>As of June 30, 2016, this amount consisted of the remaining portion of the \$7.5 billion authorized in September 2015. No expiration date has been specified for this authorization.

## ITEM 6. Exhibits.

Designation of Exhibits in This Report	Description of Exhibit
3(a)	Restated Certificate of Incorporation of the Registrant, dated April 18, 1985, as amended (incorporated by reference to Exhibit 3(a) of the Registrant's Annual Report on Form 10-K for the year ended December 31, 2014).

Notice regarding forward-looking statements

This report includes forward-looking statements intended to qualify for the safe harbor from liability established by the Private Securities Litigation Reform Act of 1995. These forward-looking statements generally can be identified by phrases such as TI or its management “believes,” “expects,” “anticipates,” “foresees,” “forecasts,” “estimates” or other words or phrases of similar import. Similarly, statements herein that describe TI’s business strategy, outlook, objectives, plans, intentions or goals also are forward-looking statements. All such forward-looking statements are subject to certain risks and uncertainties that could cause actual results to differ materially from those in forward-looking statements.

We urge you to carefully consider the following important factors that could cause actual results to differ materially from the expectations of TI or its management:

- Market demand for semiconductors, particularly in TI’s end markets;
  - TI’s ability to compete in products and prices in an intensely competitive industry;
- Losses or curtailments of purchases from key customers and the timing and amount of distributor and other customer inventory adjustments;
- Customer demand that differs from forecasts and the financial impact of inadequate or excess TI inventory that results from demand that differs from projections;
- TI’s ability to maintain or improve profit margins, including its ability to utilize its manufacturing facilities at sufficient levels to cover its fixed operating costs, in an intensely competitive and cyclical industry;
- TI’s ability to develop, manufacture and market innovative products in a rapidly changing technological environment;
- Economic, social and political conditions in the countries in which TI, its customers or its suppliers operate, including security risks, health conditions, possible disruptions in transportation, communications and information technology networks and fluctuations in foreign currency exchange rates;
  - Natural events such as severe weather, geological events or health epidemics in the locations in which TI, its customers or its suppliers operate;
  - Breaches of TI’s information technology systems or those of its customers or suppliers;
- Availability and cost of raw materials, utilities, manufacturing equipment, third-party manufacturing services and manufacturing technology;
- Timely implementation of new manufacturing technologies and installation of manufacturing equipment, and the ability to obtain needed third-party foundry and assembly/test subcontract services;
- TI’s ability to maintain and enforce a strong intellectual property portfolio and obtain needed licenses from third parties, expiration of license agreements between TI and its patent licensees, and market conditions reducing royalty payments to TI;
- Compliance with or changes in the complex laws, rules and regulations to which TI is or may become subject, or actions of enforcement authorities, that restrict TI’s ability to manufacture its products or operate its business, or subject us to fines, penalties, or other legal liability;
- Product liability or warranty claims, claims based on epidemic or delivery failure, or other claims relating to TI products, manufacturing, services, design or communications, or recalls by TI customers for a product containing a TI part;
- Changes in the tax rate applicable to TI as the result of changes in tax law, the jurisdictions in which profits are determined to be earned and taxed, adverse resolution of tax audits and the ability to realize deferred tax assets;
- Financial difficulties of distributors or their promotion of competing product lines to TI’s detriment;
- A loss suffered by a customer or distributor of TI with respect to TI-consigned inventory;
- Instability in the global credit and financial markets that affects TI’s ability to fund its daily operations, invest in the business, make strategic acquisitions, or make principal and interest payments on its debt;

- Increases in health care and pension benefit costs;
- TI's ability to recruit and retain skilled personnel;
- TI's ability to successfully integrate and realize opportunities for growth from acquisitions, and its ability to realize its expectations regarding the amount and timing of restructuring charges and associated cost savings; and
- Impairments of TI's non-financial assets.

For a more detailed discussion of these factors see the Risk Factors discussion in Item 1A of our most recent Form 10-K. The forward-looking statements included in this report are made only as of the date of this report, and we undertake no obligation to update the forward-looking statements to reflect subsequent events or circumstances. If we do update any forward-looking statement, you should not infer that we will make additional updates with respect to that statement or any other forward-looking statement.

SIGNATURE

Pursuant to the requirements of the Securities Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
