LINCOLN NATIONAL CORPORATION  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

1. Nature of Operations and Basis of Presentation

Nature of Operations

Lincoln National Corporation and its majority-owned subsidiaries (“LNC” or the “Company,” which also may be referred to as “we,” “our” or “us”) operate multiple insurance businesses through four business segments. See Note 14 for additional details. The collective group of businesses uses “Lincoln Financial Group” as its marketing identity. Through our business segments, we sell a wide range of wealth protection, accumulation and retirement income products. These products include institutional and/or retail fixed and indexed annuities, variable annuities, universal life insurance (“UL”), variable universal life insurance (“VUL”), linked-benefit UL, term life insurance, mutual funds and group life, disability and dental.

Basis of Presentation

The accompanying unaudited consolidated financial statements are prepared in accordance with United States of America generally accepted accounting principles (“GAAP”) for interim financial information and with the instructions for the Securities and Exchange Commission (“SEC”) Quarterly Report on Form 10-Q, including Article 10 of Regulation S-X. Accordingly, they do not include all of the information and notes required by GAAP for complete financial statements. Therefore, the information contained in the Notes to Consolidated Financial Statements included in the Company’s Annual Report on Form 10-K for the year ended December 31, 2010, (“2010 Form 10-K”) should be read in connection with the reading of these interim unaudited consolidated financial statements.

Certain GAAP policies, which significantly affect the determination of financial position, results of operations and cash flows, are summarized in our 2010 Form 10-K.

In the opinion of management, these statements include all normal recurring adjustments necessary for a fair presentation of the Company’s results. Operating results for the three month period ended March 31, 2011, are not necessarily indicative of the results that may be expected for the full year ending December 31, 2011. All material intercompany accounts and transactions have been eliminated in consolidation.

Certain amounts reported in prior years’ consolidated financial statements have been reclassified to conform to the presentation adopted in the current year. These reclassifications had no effect on net income or stockholders’ equity of the prior years.

2. New Accounting Standards

Adoption of New Accounting Standards

Fair Value Measurements and Disclosures Topic

In January 2010, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) No. 2010-06, “Improving Disclosures about Fair Value Measurements” (“ASU 2010-06”), which requires additional disclosure related to the three-level fair value hierarchy. For a more detailed description of ASU 2010-06, see “Adoption of New Accounting Standards – Fair Value Measurements and Disclosures Topic” in Note 2 of our 2010 Form 10-K. We adopted the remaining disclosure requirements in ASU 2010-06 effective January 1, 2011, and have prospectively included the disclosures related to purchases, sales, issuances and settlements for Level 3 fair value measurements in Note 13 for the period ended March 31, 2011.

Financial Services – Insurance Industry Topic

In April 2010, the FASB issued ASU No. 2010-15, “How Investments Held through Separate Accounts Affect an Insurer’s Consolidation Analysis of Those Investments” (“ASU 2010-15”), to clarify a consolidation issue for insurance entities that hold a controlling interest in an investment fund either partially or completely through separate accounts. For a more detailed description of ASU 2010-15, see “Future Adoption of New Accounting Standards – Financial Services – Insurance Industry Topic” in Note 2 of our 2010 Form 10-K. We adopted the accounting guidance in ASU 2010-15 effective January 1, 2011. The adoption did not have a material effect on our consolidated financial condition and results of operations.

Intangibles – Goodwill and Other Topic

In December 2010, the FASB issued ASU No. 2010-28, “When to Perform Step 2 of the Goodwill Impairment Test for Reporting Units with Zero or Negative Carrying Amounts” (“ASU 2010-28”). For a more detailed description of ASU 2010-28, see “Future Adoption of New Accounting Standards – Intangibles – Goodwill and Other Topic” in Note 2 of our 2010 Form 10-K. We adopted ASU 2010-28 effective January 1, 2011, and evaluated the reporting units within scope under this new accounting guidance. The adoption did not have a material effect on our consolidated financial condition and results of operations.

### Receivables Topic

In July 2010, the FASB issued ASU No. 2010-20, “Disclosures about the Credit Quality of Financing Receivables and the Allowance for Credit Losses” (“ASU 2010-20”), in order to enhance and expand the financial statement disclosures. For a more detailed description of ASU 2010-20, see “Adoption of New Accounting Standards – Receivables Topic” in Note 2 of our 2010 Form 10-K. We adopted the remaining disclosure requirements in ASU 2010-20 effective January 1, 2011, and have prospectively included the required financial statement disclosures related to the activity in our allowance for mortgage loan on real estate losses in Note 5 for the period ended March 31, 2011.

### Future Adoption of New Accounting Standards

#### Financial Services – Insurance Industry Topic

In October 2010, the FASB issued ASU No. 2010-26, “Accounting for Costs Associated with Acquiring or Renewing Insurance Contracts” (“ASU 2010-26”), which clarifies the types of costs incurred by an insurance entity that can be capitalized in the acquisition of insurance contracts. For a more detailed description of ASU 2010-26, see “Future Adoption of New Accounting Standards – Financial Services – Insurance Industry Topic” in Note 2 of our 2010 Form 10-K. We will adopt the provisions of ASU 2010-26 effective January 1, 2012, and are currently evaluating the effect of the adoption on our consolidated financial condition and results of operations.

#### Transfers and Servicing Topic

In April 2011, the FASB issued ASU No. 2011-03, “Reconsideration of Effective Control for Repurchase Agreements” (“ASU 2011-03”), which revises the criteria for assessing effective control for repurchase agreements and other agreements that both entitle and obligate a transferor to repurchase or redeem financial assets before their maturity. The determination of whether the transfer of a financial asset subject to a repurchase agreement is a sale is based, in part, on whether the entity maintains effective control over the financial asset. ASU 2011-03 removes from the assessment of effective control: the criterion requiring the transferor to have the ability to repurchase or redeem the financial asset on substantially the agreed terms, even in the event of default by the transferee, and the related requirement to demonstrate that the transferor possesses adequate collateral to fund substantially all the cost of purchasing replacement financial assets. The amendments in ASU 2011-03 will be effective for interim and annual reporting periods beginning on or after December 15, 2011, early adoption is prohibited, and the amendments will be applied prospectively to transactions or modifications of existing transactions that occur on or after the effective date. We will adopt the provisions of ASU 2011-03 effective January 1, 2012, and are currently evaluating the effect of the adoption on our consolidated financial condition and results of operations.

### 3. Dispositions

#### Discontinued Investment Management Operations

On January 4, 2010, we closed on the stock sale of Delaware Management Holdings, Inc. (“Delaware”), our subsidiary, which provided investment products and services to individuals and institutions, to Macquarie Bank Limited (“MBL”) with net of tax proceeds of approximately \$405 million.

We have reclassified the results of operations of Delaware into income (loss) from discontinued operations, net of federal income taxes, for all periods presented on our Consolidated Statements of Income (Loss), and selected amounts (in millions) were as follows:

	For the Three Months Ended March 31, 2010
Discontinued Operations Before Disposal	
Income (loss) from discontinued operations before disposal, before federal income taxes	\$ (17)
Federal income tax expense (benefit)	(3)
Income (loss) from discontinued operations before disposal	(14)
Disposal	
Gain (loss) on disposal, before federal income taxes	37
Federal income tax expense (benefit)	13
Gain (loss) on disposal	24
Income (loss) from discontinued operations	\$ 10

The income (loss) from discontinued operations for the three months ended March 31, 2010, reflected stock compensation expense attributable to the acceleration of vesting of equity awards for certain Delaware employees upon the sale of Delaware.

#### Discontinued Lincoln UK Operations

On October 1, 2009, we closed on the stock sale of Lincoln National (UK) plc (“Lincoln UK”), our subsidiary, which focused primarily on providing life and retirement income products in the United Kingdom to SLF of Canada UK Limited (“SLF”), and we retained Lincoln UK’s pension plan assets and liabilities.

We have reclassified the results of operations of Lincoln UK into income (loss) from discontinued operations, net of federal income taxes, for all periods presented on our Consolidated Statements of Income (Loss), and selected amounts (in millions) were as follows:

	For the Three Months Ended March 31, 2010
Disposal	
Gain (loss) on disposal, before federal income taxes	\$ 27
Federal income tax expense (benefit)	9
Gain (loss) on disposal	18
Income (loss) from discontinued operations	\$ 18

The income (loss) from discontinued operations for the three months ended March 31, 2010, related to additional consideration received attributable to a post-closing adjustment of the purchase price based upon a final actuarial appraisal of the value of the business as set forth in the share purchase agreement.

7

---

## 4. Variable Interest Entities (“VIEs”)

## Consolidated VIEs

We have invested in the Class 1 Notes of two credit-linked note (“CLN”) structures, which represent special purpose trusts combining asset-backed securities with credit default swaps to produce multi-class structured securities. The CLN structures also include subordinated Class 2 Notes, which are held by third parties, and, together with the Class 1 Notes, represent 100% of the outstanding notes of the CLN structures. The entities that issued the CLNs are financed by the note holders, and, as such, the note holders participate in the expected losses and residual returns of the entities. Because the note holders do not have voting rights or similar rights, we determined the entities issuing the CLNs are VIEs, and as a note holder, our interest represented a variable interest. We have the power to direct the most significant activity impacting the performance of both CLN structures, as we have the ability to actively manage the reference portfolio underlying the credit default swaps. As a result, we have concluded we are the primary beneficiary of the VIEs associated with the CLNs and have consolidated the assets and liabilities of both CLN structures in our Consolidated Balance Sheets.

Asset and liability information (dollars in millions) for these consolidated VIEs included on our Consolidated Balance Sheets was as follows:

	As of March 31, 2011			As of December 31, 2010		
	Number of Instruments	Notional Amounts	Carrying Value	Number of Instruments	Notional Amounts	Carrying Value
<b>Assets</b>						
Fixed maturity corporate asset-backed						
credit card loan securities (1)	N/A	\$ -	\$ 587	N/A	\$ -	\$ 584
<b>Liabilities</b>						
Derivative instruments not designated and not qualifying as hedging instruments:						
Credit default swaps (2)	2	\$ 600	\$ 207	2	\$ 600	\$ 215
Contingent forwards (2)	2	-	(4)	2	-	(6)
Total derivative instruments not designated and not qualifying as hedging instruments	4	600	203	4	600	209
Federal income tax (2)	N/A	-	(73)	N/A	-	(77)
Total liabilities	4	\$ 600	\$ 130	4	\$ 600	\$ 132

(1) Reported in VIEs’ fixed maturity securities on our Consolidated Balance Sheets.

(2) Reported in VIEs’ liabilities on our Consolidated Balance Sheets.

For details related to the fixed maturity available-for-sale (“AFS”) securities for these VIEs, see Note 5.

The credit default swaps create variability in the CLN structures and expose the note holders to the credit risk of the referenced portfolio. The contingent forwards transfer a portion of the loss in the underlying fixed maturity corporate asset-backed credit card loan securities back to the counterparty after credit losses reach our attachment point.

The gains (losses) for these consolidated VIEs (in millions) recorded on our Consolidated Statements of Income (Loss) were as follows:

	For the Three Months Ended March 31,	
	2011	2010
Derivative Instruments Not Designated and Not Qualifying as Hedging Instruments		
Credit default swaps (1)	\$ 8	\$ 1
Contingent forwards (1)	(2)	(5)
Total derivative instruments not designated and not qualifying as hedging instruments	\$ 6	\$ (4)

(1) Reported in realized gain (loss) on our Consolidated Statements of Income (Loss).

The following summarizes information regarding the CLN structures (dollars in millions) as of March 31, 2011:

	Amount and Date of Issuance	
	\$400 December 2006	\$200 April 2007
Original attachment point (subordination)	5.50 %	2.05 %
Current attachment point (subordination)	4.17 %	1.48 %
Maturity	12/20/2016	3/20/2017
Current rating of tranche	B	Ba2
Current rating of underlying collateral pool	Aa1-B3	Aaa-B1
Number of defaults in underlying collateral pool	2	2
Number of entities	123	99
Number of countries	19	22

There has been no event of default on the CLNs themselves. Based upon our analysis, the remaining subordination as represented by the attachment point should be sufficient to absorb future credit losses, subject to changing market conditions. Similar to other debt market instruments, our maximum principal loss is limited to our original investment as of March 31, 2011.

As described more fully in Note 1 of the 2010 Form 10-K, we regularly review our investment holdings for other-than-temporary impairments (“OTTIs”). Based upon this review, we believe that the fixed maturity corporate asset-backed credit card loan securities were not other-than-temporarily impaired as of March 31, 2011.

The following summarizes the exposure of the CLN structures' underlying collateral by industry and rating as of March 31, 2011:

Industry	AAA	AA	A	BBB	BB	B	CCC	Total
Telecommunications	- %	- %	6.4 %	4.3 %	0.5 %	- %	- %	11.2 %
Financial intermediaries	0.4 %	4.0 %	6.2 %	0.5 %	- %	- %	- %	11.1 %
Oil and gas	- %	1.0 %	1.2 %	4.1 %	- %	- %	- %	6.3 %
Utilities	- %	- %	3.1 %	1.4 %	- %	- %	- %	4.5 %
Chemicals and plastics	- %	- %	2.3 %	1.2 %	0.3 %	- %	- %	3.8 %
Drugs	0.3 %	2.2 %	1.2 %	- %	- %	- %	- %	3.7 %
Retailers (except food and drug)	- %	- %	1.2 %	1.2 %	1.1 %	- %	- %	3.5 %

#### Unconsolidated VIEs

Effective December 31, 2010, we issued a \$500 million long-term senior note in exchange for a corporate bond AFS security of like principal and duration from a non-affiliated VIE whose primary activities are to acquire, hold and issue notes and loans, as well as pay and collect interest on the notes and loans. We have concluded that we are not the primary beneficiary of this VIE because we do not have power over the activities that most significantly affect its economic performance. In addition, the terms of the senior note provide us with a set-off right to the corporate bond AFS security we purchased from the VIE; therefore, neither appears on our Consolidated Balance Sheets. We assigned the corporate bond AFS security to one of our subsidiaries and issued a guarantee to our subsidiary for the timely payment of the corporate bond's principal.

Through our investment activities, we make passive investments in structured securities issued by VIEs for which we are not the manager. These structured securities include our mortgage-backed securities ("MBS"), which include collateralized mortgage obligations ("CMOs"), mortgage pass through securities ("MPTS") and commercial mortgage-backed securities ("CMBS") and our asset-backed securities ("ABS") collateralized debt obligations ("CDOs"). We have not provided financial or other support with respect to these VIEs other than our original investment. We have determined that we are not the primary beneficiary of these VIEs due to the relative size of our investment in comparison to the principal amount of the structured securities issued by the VIEs and the level of credit subordination which reduces our obligation to absorb losses or right to receive benefits. Our maximum exposure to loss on these structured securities is limited to the amortized cost for these investments. We recognize our variable interest in these VIEs at fair value on our consolidated financial statements. For information about these structured securities, see Note 5.

#### 5. Investments

##### AFS Securities

Pursuant to the Fair Value Measurements and Disclosures Topic of the FASB Accounting Standards Codification™ (“ASC”), we have categorized AFS securities into a three-level hierarchy, based on the priority of the inputs to the respective valuation technique. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3), as described in Note 1 in our 2010 Form 10-K, which also includes additional disclosures regarding our fair value measurements.

The amortized cost, gross unrealized gains, losses and OTTI and fair value of AFS securities (in millions) were as follows:

	Amortized Cost	As of March 31, 2011			Fair Value
		Gains	Losses	OTTI	
Fixed Maturity Securities					
Corporate bonds	\$ 50,575	\$ 3,285	\$ 615	\$ 69	\$ 53,176

For information regarding our investments in VIEs, see Note 4.

We perform detailed analysis on the AFS securities backed by pools of residential and commercial mortgages that are most at risk of impairment based on factors discussed in Note 1 in our 2010 Form 10-K. Selected information for these securities in a gross unrealized loss position (in millions) was as follows:

	As of March 31, 2011		
	Amortized Cost	Fair Value	Unrealized Loss
Total			
AFS securities backed by pools of residential mortgages	\$ 2,722	\$ 2,278	\$ 444
AFS securities backed by pools of commercial mortgages	502	367	135
Total	\$ 3,224	\$ 2,645	\$ 579
Subject to Detailed Analysis			
AFS securities backed by pools of residential mortgages	\$ 2,190	\$ 1,754	\$ 436
AFS securities backed by pools of commercial mortgages	133	62	71
Total	\$ 2,323	\$ 1,816	\$ 507

	As of December 31, 2010		
	Amortized Cost	Fair Value	Unrealized Loss
Total			
AFS securities backed by pools of residential mortgages	\$ 2,539	\$ 2,006	\$ 533
AFS securities backed by pools of commercial mortgages	611	410	201
Total	\$ 3,150	\$ 2,416	\$ 734
Subject to Detailed Analysis			
AFS securities backed by pools of residential mortgages	\$ 2,303	\$ 1,776	\$ 527
AFS securities backed by pools of commercial mortgages	185	76	109
Total	\$ 2,488	\$ 1,852	\$ 636

For the three months ended March 31, 2011 and 2010, we recorded OTTI for AFS securities backed by pools of residential and commercial mortgages of \$21 million and \$43 million, pre-tax, respectively, and before associated amortization expense for deferred acquisition costs (“DAC”), value of business acquired (“VOBA”), deferred sales inducements (“DSI”) and deferred front-end loads (“DFEL”), of which \$(26) million and \$(5) million, respectively, was recognized in OCI and \$47 million and \$48 million, respectively, was recognized in net income (loss).

The fair value, gross unrealized losses, the portion of OTTI recognized in OCI (in millions) and number of AFS securities where the fair value had declined and remained below amortized cost by greater than 20% were as follows:

	As of March 31, 2011			Number of Securities (1)
	Fair	Gross Unrealized		
	Value	Losses	OTTI	
Less than six months	\$ 93	\$ 22	\$ 19	28
Six months or greater, but less than nine months	31	16	-	6
Nine months or greater, but less than twelve months	33	14	-	11
Twelve months or greater	762	419	138	190
Total	\$ 919	\$ 471	\$ 157	235
	As of December 31, 2010			Number of Securities (1)
	Fair	Gross Unrealized		
	Value	Losses	OTTI	
Less than six months	\$ 170	\$ 73	\$ 5	41
Six months or greater, but less than nine months	60	22	-	13
Nine months or greater, but less than twelve months	42	17	1	13
Twelve months or greater	929	520	184	224
Total	\$ 1,201	\$ 632	\$ 190	291

(1) We may reflect a security in more than one aging category based on various purchase dates.

We regularly review our investment holdings for OTTI. Our gross unrealized losses on AFS securities decreased \$186 million for the three months ended March 31, 2011. This change was attributable primarily to a decline in

overall market yields, which was driven, in part, by improved credit fundamentals. As discussed further below, we believe the unrealized loss position as of March 31, 2011, did not represent OTTI as we did not intend to sell these fixed maturity AFS securities, it is not more likely than not that we will be required to sell the fixed maturity AFS securities before recovery of their amortized cost basis, the estimated future cash flows were equal to or greater than the amortized cost basis of the debt securities, or we had the ability and intent to hold the equity AFS securities for a period of time sufficient for recovery.

Based upon this evaluation as of March 31, 2011, management believed we had the ability to generate adequate amounts of cash from our normal operations (e.g., insurance premiums and fees and investment income) to meet cash requirements with a prudent margin of safety without requiring the sale of our temporarily-impaired securities.

As of March 31, 2011, the unrealized losses associated with our corporate bond securities were attributable primarily to securities that were backed by commercial loans and individual issuer companies. For our corporate bond securities with commercial loans as the underlying collateral, we evaluated the projected credit losses in the underlying collateral and concluded that we had sufficient subordination or other credit enhancement when compared with our estimate of credit losses for the individual security and we expected to recover the entire amortized cost for each security. For individual issuers, we performed detailed analysis of the financial performance of the issuer and determined that we expected to recover the entire amortized cost for each security.

As of March 31, 2011, the unrealized losses associated with our MBS and ABS CDOs were attributable primarily to collateral losses and credit spreads. We assessed for credit impairment using a cash flow model as discussed above. The key assumptions included default rates, severities and prepayment rates. We estimated losses for a security by forecasting the underlying loans in each transaction. The forecasted loan performance was used to project cash flows to the various tranches in the structure, as applicable. Our forecasted cash flows also considered, as applicable, independent industry analyst reports and forecasts, sector credit ratings and other independent market data. Based upon our assessment of the expected credit losses of the security given the performance of the underlying collateral compared to our subordination or other credit enhancement, we expected to recover the entire amortized cost basis of each security.

As of March 31, 2011, the unrealized losses associated with our hybrid and redeemable preferred securities were attributable primarily to wider credit spreads caused by illiquidity in the market and subordination within the capital structure, as well as credit risk of specific issuers. For our hybrid and redeemable preferred securities, we evaluated the financial performance of the issuer based upon credit performance and investment ratings and determined we expected to recover the entire amortized cost of each security.

Changes in the amount of credit loss of OTTI recognized in net income (loss) where the portion related to other factors was recognized in OCI (in millions) on fixed maturity AFS securities were as follows:

	For the Three Months Ended March 31,	
	2011	2010
Balance as of beginning-of-year	\$ 319	\$ 268
Increases attributable to:		
Credit losses on securities for which an OTTI was not previously recognized	25	2
Credit losses on securities for which an OTTI was previously recognized	22	27
Decreases attributable to:		
Securities sold	(14)	(4)
Balance as of end-of-period	\$ 352	\$ 293

During the three months ended March 31, 2011 and 2010, we recorded credit losses on securities for which an OTTI was not previously recognized as we determined the cash flows expected to be collected would not be sufficient to recover the entire amortized cost basis of the debt security. The credit losses we recorded on securities for which an OTTI was not previously recognized were attributable primarily to one or a combination of the following reasons:

- Failure of the issuer of the security to make scheduled payments;
  - Deterioration of creditworthiness of the issuer;
  - Deterioration of conditions specifically related to the security;
- Deterioration of fundamentals of the industry in which the issuer operates;
- Deterioration of fundamentals in the economy including, but not limited to, higher unemployment and lower housing prices; and
  - Deterioration of the rating of the security by a rating agency.

We recognize the OTTI attributed to the noncredit portion as a separate component in OCI referred to as unrealized OTTI on AFS securities.

Details of the amount of credit loss of OTTI recognized in net income (loss) where the portion related to other factors was recognized in OCI (in millions), were as follows:

	As of March 31, 2011				OTTI in Credit Losses
	Amortized Cost	Gains	Gross Unrealized Losses and OTTI	Fair Value	
Corporate bonds	\$ 192	\$ 1	\$ 63	\$ 130	\$ 50
MBS:					
CMOs	515	1	102	414	276
CMBS	9	-	6	3	26
Total	\$ 716	\$ 2	\$ 171	\$ 547	\$ 352

	As of December 31, 2010				OTTI in Credit Losses
	Amortized Cost	Gains	Gross Unrealized Losses and OTTI	Fair Value	
Corporate bonds	\$ 204	\$ 3	\$ 76	\$ 131	\$ 60
MBS:					
CMOs	509	2	126	385	258
CMBS	6	-	5	1	1
Total	\$ 719	\$ 5	\$ 207	\$ 517	\$ 319

#### Mortgage Loans on Real Estate

Mortgage loans on real estate principally involve commercial real estate. The commercial loans are geographically diversified throughout the U.S. with the largest concentrations in California and Texas, which accounted for approximately 31% and 30% of mortgage loans as of March 31, 2011, and December 31, 2010, respectively.

The following provides the current and past due composition of our mortgage loans on real estate (in millions):

	As of March 31, 2011	As of December 31, 2010
Current	\$ 6,687	\$ 6,697
60 to 90 days past due	17	8
Greater than 90 days past due	38	40
Valuation allowance associated with impaired mortgage loans on real estate	(11)	(13)
Unamortized premium (discount)	18	20
Total carrying value	\$ 6,749	\$ 6,752

The number of impaired mortgage loans on real estate, each of which had an associated specific valuation allowance, and the carrying value of impaired mortgage loans on real estate (dollars in millions) were as follows:

	As of March 31, 2011	As of December 31, 2010
Number of impaired mortgage loans on real estate	8	9
Principal balance of impaired mortgage loans on real estate	\$ 59	\$ 75
Valuation allowance associated with impaired mortgage loans on real estate	(11)	(13)
Carrying value of impaired mortgage loans on real estate	\$ 48	\$ 62

Changes in the valuation allowance for credit losses associated with impaired mortgage loans on real estate (in millions) were as follows:

	For the Three Months Ended March 31, 2011
Balance as of beginning-of-year	\$ 13
Additions	1
Charge-offs	(3)
Balance as of end-of-period	\$ 11

Information for our impaired mortgage loans on real estate (in millions) was as follows:

	For the Three Months Ended March 31,	
	2011	2010
Average carrying value for impaired mortgage loans on real estate	\$ 55	\$ 40
Interest income recognized on impaired mortgage loans on real estate	1	-
Interest income collected on impaired mortgage loans on real estate	1	-

As described in Note 1 in our 2010 Form 10-K, we use the loan-to-value and debt-service coverage ratios as credit quality indicators for our mortgage loans on real estate, which were as follows (dollars in millions):

	As of March 31, 2011				As of December 31, 2010			
	Principal Amount	%		Debt- Service Coverage Ratio	Principal Amount	%		Debt- Service Coverage Ratio
Loan-to-Value								
Less than 65%	\$ 4,928	73.1 %		1.63	\$ 4,863	72.1 %		1.62
65% to 74%	1,409	20.9 %		1.40	1,484	22.0 %		1.40
75% to 100%	222	3.3 %		0.91	179	2.7 %		0.85
Greater than 100%	182	2.7 %		1.08	219	3.2 %		1.06
	\$ 6,741	100.0 %			\$ 6,745	100.0 %		

Total mortgage loans on real  
estate

## Alternative Investments

As of March 31, 2011, and December 31, 2010, alternative investments included investments in approximately 97 and 95 different partnerships, respectively, and the portfolio represented less than 1% of our overall invested assets.

## Realized Gain (Loss) Related to Certain Investments

The detail of the realized gain (loss) related to certain investments (in millions) was as follows:

	For the Three Months Ended March 31,	
	2011	2010
Fixed maturity AFS securities:		
Gross gains	\$ 36	\$ 50
Gross losses	(63)	(84)
Equity AFS securities:		
Gross gains	8	-
Gross losses	-	(4)
Gain (loss) on other investments	13	(21)
Associated amortization of DAC, VOBA, DSI and DFEL and changes in other contract holder funds	(11)	4
Total realized gain (loss) related to certain investments	\$ (17)	\$ (55)

Details underlying write-downs taken as a result of OTTI (in millions) that were recognized in net income (loss) and included in realized gain (loss) on AFS securities above, and the portion of OTTI recognized in OCI (in millions) were as follows:

	For the Three Months Ended March 31,	
	2011	2010
OTTI Recognized in Net Income (Loss)		
Fixed maturity securities:		
Corporate bonds	\$ (3)	\$ (41)
MBS:		
CMOs	(20)	(24)
CMBS	(24)	-
ABS CDOs	(1)	(1)
Hybrid and redeemable preferred securities	(2)	(5)

Equity securities:		
Other financial services securities	-	(3)
Total equity securities	-	(3)
Gross OTTI recognized in net income (loss)	(50)	(74)
Associated amortization of DAC, VOBA, DSI and DFEL	11	21
Net OTTI recognized in net income (loss), pre-tax	\$ (39)	\$ (53)

Portion of OTTI Recognized in OCI				
Gross OTTI recognized in OCI	\$	8	\$	22
Change in DAC, VOBA, DSI and DFEL		(2)		2
Net portion of OTTI recognized in OCI, pre-tax	\$	6	\$	24

### Determination of Credit Losses on Corporate Bonds and ABS CDOs

As of March 31, 2011, and December 31, 2010, we reviewed our corporate bond and ABS CDO portfolios for potential shortfall in contractual principal and interest based on numerous subjective and objective inputs. The factors used to determine the amount of credit loss for each individual security, include, but are not limited to, near term risk, substantial discrepancy between book and market value, sector or company-specific volatility, negative operating trends and trading levels wider than peers.

Credit ratings express opinions about the credit quality of a security. Securities rated investment grade, that is those rated BBB- or higher by Standard & Poor's ("S&P") Rating Services or Baa3 or higher by Moody's Investors Service ("Moody's"), are generally considered by the rating agencies and market participants to be low credit risk. As of March 31, 2011, and December 31, 2010, 96% and 95%, respectively, of the fair value of our corporate bond portfolio was rated investment grade. As of March 31, 2011, and December 31, 2010, the portion of our corporate bond portfolio rated below investment grade had an amortized cost of \$2.5 billion and \$2.6 billion, respectively, and a fair value of \$2.4 billion for both period ends. As of March 31, 2011, and December 31, 2010, 91% of the fair value of our ABS CDO portfolio was rated investment grade. As of March 31, 2011, and December 31, 2010, the portion of our ABS CDO portfolio rated below investment grade had an amortized cost of \$22 million and \$24 million and fair value of \$12 million and \$16 million, respectively. Based upon the analysis discussed above, we believed as of March 31, 2011, and December 31, 2010, that we would recover the amortized cost of each investment grade corporate bond and ABS CDO security.

For securities where we recorded an OTTI recognized in net income (loss) for the three months ended March 31, 2011 and 2010, the recovery as a percentage of amortized cost was 98% and 58% for corporate bonds, respectively, and 0% for ABS CDOs for both periods.

### Determination of Credit Losses on MBS

As of March 31, 2011, and December 31, 2010, default rates were projected by considering underlying MBS loan performance and collateral type. Projected default rates on existing delinquencies vary between 25% to 100% depending on loan type and severity of delinquency status. In addition, we estimate the potential contributions of currently performing loans that may become delinquent in the future based on the change in delinquencies and loan liquidations experienced in the recent history. Finally, we develop a default rate timing curve by aggregating the defaults for all loans (delinquent loans, foreclosure and real estate owned and new delinquencies from currently performing loans) in the pool to project the future expected cash flows.

We use certain available loan characteristics such as lien status, loan sizes and occupancy to estimate the loss severity of loans. Second lien loans are assigned 100% severity, if defaulted. For first lien loans, we assume a minimum of 30% severity with higher severity assumed for investor properties and further housing price depreciation.

### Payables for Collateral on Investments

The carrying values of the payables for collateral on investments (in millions) included on our Consolidated Balance Sheets and the fair value of the related investments or collateral consisted of the following:

	As of March 31, 2011		As of December 31, 2010	
	Carrying Value	Fair Value	Carrying Value	Fair Value
Collateral payable held for derivative investments (1)	\$ 730	\$ 730	\$ 800	\$ 800

Edgar Filing: LINCOLN NATIONAL CORP - Form 10-Q

Securities pledged under securities lending agreements (2)	200	192	199	192
Securities pledged under reverse repurchase agreements (3)	280	293	280	294
Securities pledged for Term Asset-Backed Securities Loan Facility ("TALF") (4)	244	278	280	318
Securities pledged for Federal Home Loan Bank of Indianapolis Securities ("FHLBI") (5)	100	115	100	115
Total payables for collateral on investments	\$ 1,554	\$ 1,608	\$ 1,659	\$ 1,719

- (1) We obtain collateral based upon contractual provisions with our counterparties. These agreements take into consideration the counterparties' credit rating as compared to ours, the fair value of the derivative investments and specified thresholds that once exceeded result in the receipt of cash that is typically invested in cash and invested cash. See Note 6 for details about maximum collateral potentially required to post on our credit default swaps.
- (2) Our pledged securities under securities lending agreements are included in fixed maturity AFS securities on our Consolidated Balance Sheets. We generally obtain collateral in an amount equal to 102% and 105% of the fair value of the domestic and foreign securities, respectively. We value collateral daily and obtain additional collateral when deemed appropriate. The cash received in our securities lending program is typically invested in cash and invested cash or fixed maturity AFS securities.
- (3) Our pledged securities under reverse repurchase agreements are included in fixed maturity AFS securities on our Consolidated Balance Sheets. We obtain collateral in an amount equal to 95% of the fair value of the securities, and our agreements with third parties contain contractual provisions to allow for additional collateral to be obtained when necessary. The cash received in our reverse repurchase program is typically invested in fixed maturity AFS securities.
- (4) Our pledged securities for TALF are included in fixed maturity AFS securities on our Consolidated Balance Sheets. We obtain collateral in an amount that has typically averaged 90% of the fair value of the TALF securities. The cash received in these transactions is invested in fixed maturity AFS securities.
- (5) Our pledged securities for FHLBI are included in fixed maturity AFS securities on our Consolidated Balance Sheets. We generally obtain collateral in an amount equal to 85% to 95% of the fair value of the FHLBI securities. The cash received in these transactions is typically invested in cash and invested cash or fixed maturity AFS securities.

Increase (decrease) in payables for collateral on investments (in millions) included on the Consolidated Statements of Cash Flows consisted of the following:

	For the Three Months Ended March 31,	
	2011	2010
Collateral payable held for derivative investments	\$ (70)	\$ (4)
Securities pledged under securities lending agreements	1	(61)
Securities pledged under reverse repurchase agreements	-	(9)
Securities pledged for TALF	(36)	(5)
Total increase (decrease) in payables for collateral on investments	\$ (105)	\$ (79)

#### Investment Commitments

As of March 31, 2011, our investment commitments were \$743 million, which included \$307 million of LPs, \$167 million of private placements and \$269 million of mortgage loans.

#### Concentrations of Financial Instruments

As of March 31, 2011, and December 31, 2010, our most significant investments in one issuer were our investments in securities issued by the Federal Home Loan Mortgage Corporation with a fair value of \$4.9 billion and \$5.0 billion, or 6% of our invested assets portfolio, respectively, and our investments in securities issued by Fannie Mae with a fair value of \$2.8 billion and \$2.9 billion, or 3% of our invested assets portfolio, respectively. These investments are included in corporate bonds in the tables above.

As of March 31, 2011, and December 31, 2010, our most significant investments in one industry were our investment securities in the electric industry with a fair value of \$6.8 billion and \$6.7 billion, or 8% of our invested assets portfolio, respectively, and our investment securities in the CMO industry with a fair value of \$6.3 billion and \$6.5 billion, or 7% and 8% of our invested assets portfolio, respectively. We utilized the industry classifications to obtain the concentration of financial instruments amount; as such, this amount will not agree to the AFS securities table above.

## 6. Derivative Instruments

### Types of Derivative Instruments and Derivative Strategies

We maintain an overall risk management strategy that incorporates the use of derivative instruments to minimize significant unplanned fluctuations in earnings that are caused by interest rate risk, foreign currency exchange risk, equity market risk, default risk, basis risk and credit risk. We assess these risks by continually identifying and monitoring changes in interest rate exposure, foreign currency exposure, equity market exposure and credit exposure that may adversely affect expected future cash flows and by evaluating hedging opportunities. Derivative instruments that are used as part of our interest rate risk management strategy include interest rate swap agreements, interest rate cap agreements, interest rate futures, forward-starting interest rate swaps, consumer price index swaps, interest rate cap corridors, treasury locks and reverse treasury locks. Derivative instruments that are used as part of our foreign currency risk management strategy include foreign currency swaps, currency futures and foreign currency forwards. Call options based on our stock, call options based on the S&P 500 Index® (“S&P 500”), total return swaps, variance swaps, equity collars, put options and equity futures are used as part of our equity market risk management strategy. We also use credit default swaps as part of our credit risk management strategy.

We evaluate and recognize our derivative instruments in accordance with the Derivatives and Hedging Topic of the FASB ASC. As of March 31, 2011, we had derivative instruments that were designated and qualifying as cash flow hedges and fair value hedges. We also had embedded derivatives that were economic hedges, but were not designed to meet the requirements for hedge accounting treatment. See Note 1 in our 2010 Form 10-K for a detailed discussion of the accounting treatment for derivative instruments.

Our derivative instruments are monitored by our Asset Liability Management Committee and our Equity Risk Management Committee as part of those committees’ oversight of our derivative activities. Our committees are responsible for implementing various hedging strategies that are developed through their analysis of financial simulation models and other internal and industry sources. The resulting hedging strategies are incorporated into our overall risk management strategies.

We use a hedging strategy designed to mitigate the risk and income statement volatility caused by changes in the equity markets, interest rates and volatility associated with living benefit guarantees offered in our variable annuity products, including the Lincoln SmartSecurity® Advantage guaranteed withdrawal benefit (“GWB”) feature, the 4LATER® Advantage guaranteed income benefit (“GIB”) feature and the i4LIFE® Advantage GIB feature. See “Guaranteed Living Benefit (“GLB”) Reserves Embedded Derivatives” below for further details.

See Note 13 for additional disclosures related to the fair value of our financial instruments and see Note 4 for derivative instruments related to our consolidated VIEs.

We have derivative instruments with off-balance-sheet risks whose notional or contract amounts exceed the credit exposure. Outstanding derivative instruments with off-balance-sheet risks (dollars in millions) were as follows:

	Number of Instruments	Notional Amounts	As of March 31, 2011		(Liability) Carrying or Fair Value	
			Asset Carrying or Fair Value Gain	Loss	Gain	Loss

The change in our unrealized gain (loss) on derivative instruments in accumulated OCI (in millions) was as follows:

	For the Three Months Ended March 31,	
	2011	2010
Unrealized Gain (Loss) on Derivative Instruments		
Balance as of beginning-of-year	\$ (15)	\$ 11
Other comprehensive income (loss):		
Unrealized holding gains (losses) arising during the period:		
Cash flow hedges:		
Interest rate swap agreements	11	-
Forward-starting interest rate swaps	(1)	-
Foreign currency swaps	-	15
Treasury locks	(15)	-
Fair value hedges:		
Interest rate swap agreements	1	1
Change in foreign currency exchange rate adjustment	(9)	-
Change in DAC, VOBA, DSI and DFEL	5	2
Income tax benefit (expense)	3	(6)
Less:		
Reclassification adjustment for gains (losses) included in net income (loss):		
Cash flow hedges:		
Interest rate swap agreements (1)	(1)	1
Foreign currency swaps (1)	2	1
Treasury locks (2)	1	-
Fair value hedges:		
Interest rate swap agreements (2)	1	1
Income tax benefit (expense)	(1)	(1)
Balance as of end-of-period	\$ (22)	\$ 21

- (1) The OCI offset is reported within net investment income on our Consolidated Statements of Income (Loss).  
(2) The OCI offset is reported within interest and debt expense on our Consolidated Statements of Income (Loss).

The gains (losses) on derivative instruments (in millions) recorded within income (loss) from continuing operations on our Consolidated Statements of Income (Loss) were as follows:

	For the Three Months Ended March 31,	
	2011	2010
Derivative Instruments Designated and Qualifying as Hedging Instruments		
Cash flow hedges:		
Interest rate swap agreements (1)	\$ (1)	\$ 2
Foreign currency swaps (1)	1	1
Total cash flow hedges	-	3
Fair value hedges:		
Interest rate swap agreements (2)	13	8
Total fair value hedges	13	8
Total derivative instruments designated and qualifying as hedging instruments	13	11
Derivative Instruments Not Designated and Not Qualifying as Hedging Instruments		
Interest rate futures (3)	(24)	35
Equity futures (3)	(44)	(93)
Interest rate swap agreements (3)	(38)	(19)
Foreign currency forwards (3)	-	43
Credit default swaps - marked-to-market (3)	4	10
Total return swaps (4)	(19)	4
Put options (3)	(172)	(109)
Call options (based on S&P 500) (3)	54	36
Variance swaps (3)	(37)	(47)
Currency futures (3)	(5)	(15)
Consumer price index swaps (3)	1	(1)
Interest rate cap corridors (1)	(6)	-
Embedded derivatives:		
Deferred compensation plans (4)	(8)	(8)
Indexed annuity contracts (3)	48	39
GLB reserves (3)	408	181
Reinsurance related (3)	11	(16)
AFS securities (1)	1	-
Total derivative instruments not designated and not qualifying as hedging instruments	174	40
Total derivative instruments	\$ 187	\$ 51

(1) Reported in net investment income on our Consolidated Statements of Income (Loss).

(2) Reported in interest and debt expense on our Consolidated Statements of Income (Loss).

(3) Reported in realized gain (loss) on our Consolidated Statements of Income (Loss).

(4) Reported in underwriting, acquisition, insurance and other expenses on our Consolidated Statements of Income (Loss).

The location in the Consolidated Statements of Income (Loss) where the gains (losses) are recorded for each of the derivative instruments discussed below is specified in the table above.

## Derivative Instruments Designated and Qualifying as Cash Flow Hedges

Gains (losses) (in millions) on derivative instruments designated and qualifying as cash flow hedges were as follows:

	For the Three Months Ended March 31,	
	2011	2010
Gain (loss) recognized as a component of OCI with the offset to net investment income	\$ -	\$ 3

As of March 31, 2011, \$20 million of the deferred net losses on derivative instruments in accumulated OCI are expected to be reclassified to earnings during the next twelve months. This reclassification would be due primarily to the interest rate variances related to the interest rate swap agreements.

For the three months ended March 31, 2011 and 2010, there were no material reclassifications to earnings due to hedged firm commitments no longer deemed probable or due to hedged forecasted transactions that had not occurred by the end of the originally specified time period.

## Interest Rate Swap Agreements

We use a portion of our interest rate swap agreements to hedge the interest rate risk of our exposure to floating rate bond coupon payments, replicating a fixed rate bond. An interest rate swap is a contractual agreement to exchange payments at one or more times based on the actual or expected price level, performance or value of one or more underlying interest rates. We are required to pay the counterparty the stream of variable interest payments based on the coupon payments from the hedged bonds, and in turn, receive a fixed payment from the counterparty at a predetermined interest rate. The gains or losses on interest rate swaps hedging our interest rate exposure on floating rate bond coupon payments are reclassified from accumulated OCI to net income (loss) as the related bond interest is accrued.

In addition, we use interest rate swap agreements to hedge our exposure to fixed rate bond coupon payments and the change in underlying asset values as interest rates fluctuate.

As of March 31, 2011, the latest maturity date for which we were hedging our exposure to the variability in future cash flows for these instruments was June 2042.

## Forward-Starting Interest Rate Swaps

We use forward-starting interest rate swaps to hedge our exposure to interest rate fluctuations related to the forecasted purchase of certain AFS securities. The gains or losses resulting from the swap agreements are recorded in OCI. The gains or losses are reclassified from accumulated OCI to earnings over the life of the assets once the assets are purchased.

## Foreign Currency Swaps

We use foreign currency swaps, which are traded over-the-counter, to hedge some of the foreign exchange risk of investments in fixed maturity securities denominated in foreign currencies. A foreign currency swap is a contractual agreement to exchange the currencies of two different countries at a specified rate of exchange in the future. The gains or losses on foreign currency swaps hedging foreign exchange risk exposure on foreign currency bond coupon

payments are reclassified from accumulated OCI to net income (loss) as the related bond interest is accrued.

As of March 31, 2011, the latest maturity date for which we were hedging our exposure to the variability in future cash flows for these instruments was July 2022.

#### Reverse Treasury Locks

We use reverse treasury locks to hedge the interest rate exposure related to the purchase of fixed rate securities or the anticipated future cash flows of floating rate fixed maturity securities due to changes in interest rates. These derivatives are primarily structured to hedge interest rate risk inherent in the assumptions used to price certain liabilities. The gains or losses resulting from the reverse treasury locks are recorded in OCI and are reclassified from accumulated OCI to earnings over the life of the assets once the assets are purchased.

## Derivative Instruments Designated and Qualifying as Fair Value Hedges

Gains (losses) (in millions) on derivative instruments designated and qualifying as fair value hedges were as follows:

	For the Three Months Ended March 31,	
	2011	2010
Ineffective portion recognized in realized gain (loss)	\$ -	\$ 1
Gain (loss) recognized as a component of OCI with the offset to interest expense	1	1

## Interest Rate Swap Agreements

We used a portion of our interest rate swap agreements to hedge the risk of paying a higher fixed rate of interest on junior subordinated debentures issued to affiliated trusts, which were redeemed during 2010, and on senior debt that would be paid on long-term debt based on current interest rates in the marketplace. We are required to pay the counterparty a stream of variable interest payments based on the referenced index, and in turn, we receive a fixed payment from the counterparty at a predetermined interest rate. The net receipts or payments earned or owed from these interest rate swap agreements are recorded as an adjustment to the interest expense for the debt being hedged in the period it occurs. The changes in fair value of the interest rate swap agreements are recorded as an offsetting adjustment to derivative investments and long-term debt on our Consolidated Balance Sheets.

## Derivative Instruments Not Designated and Not Qualifying as Hedging Instruments

We use various other derivative instruments for risk management and income generation purposes that either do not qualify for hedge accounting treatment or have not currently been designated by us for hedge accounting treatment.

## Interest Rate Cap Agreements

We use interest rate cap agreements to provide a level of protection from the effect of rising interest rates for our annuity business, within our Retirement Solutions – Annuities and Retirement Solutions – Defined Contribution segments. Interest rate cap agreements entitle us to receive quarterly payments from the counterparties on specified future reset dates, contingent on future interest rates. For each cap, the amount of such quarterly payments, if any, is determined by the excess of a market interest rate over a specified cap rate, multiplied by the notional amount divided by four. Our interest rate cap agreements provide an economic hedge of our annuity business.

## Interest Rate Futures and Equity Futures

We use interest rate futures and equity futures contracts to hedge the liability exposure on certain options in variable annuity products. These futures contracts require payment between our counterparty and us on a daily basis for changes in the futures index price.

## Interest Rate Swap Agreements

We use interest rate swap agreements to hedge the liability exposure on certain options in variable annuity products.

## Foreign Currency Forwards

We used foreign currency forward contracts to hedge the liability exposure on certain options in variable annuity products. The foreign currency forward contracts obligated us to deliver a specified amount of currency at a future date and a specified exchange rate.

#### Credit Default Swaps

We buy credit default swaps to hedge against a drop in bond prices due to credit concerns of certain bond issuers. A credit default swap allows us to put the bond back to the counterparty at par upon a default event by the bond issuer. A default event is defined as bankruptcy, failure to pay, obligation acceleration or restructuring.

We sold credit default swaps to offer credit protection to contract holders and investors. The credit default swaps hedge the contract holders and investors against a drop in bond prices due to credit concerns of certain bond issuers. A credit default swap allows the investor to put the bond back to us at par upon a default event by the bond issuer. A default event is defined as bankruptcy, failure to pay, obligation acceleration or restructuring.

Information related to our open credit default swap liabilities for which we are the seller (dollars in millions) was as follows:

As of March 31, 2011						
Maturity	Reason for Entering	Nature of Recourse	Credit Rating of Underlying Obligation (1)	Number of Instruments	Fair Value (2)	Maximum Potential Payout
12/20/2012 (3)	(5)	(6)	BBB+	4	\$ -	\$ 40
12/20/2016 (4)	(5)	(6)	A	2	(3)	45
03/20/2017 (4)	(5)	(6)	BBB-	2	(3)	40
				8	\$ (6)	\$ 125

As of December 31, 2010						
Maturity	Reason for Entering	Nature of Recourse	Credit Rating of Underlying Obligation (1)	Number of Instruments	Fair Value (2)	Maximum Potential Payout
12/20/2012 (3)	(5)	(6)	BBB+	4	-	40
12/20/2016 (4)	(5)	(6)	BBB	3	(12)	65
03/20/2017 (4)	(5)	(6)	BBB-	2	(4)	40
				9	\$ (16)	\$ 145

(1) Represents average credit ratings based on the midpoint of the applicable ratings among Moody's, S&P and Fitch Ratings, as scaled to the corresponding S&P ratings.

(2) Broker quotes are used to determine the market value of credit default swaps.

(3) These credit default swaps were sold to our contract holders, prior to 2007, where we determined there was a spread versus premium mismatch.

(4) These credit default swaps were sold to a counter-party of the consolidated VIEs as discussed in Note 4 in our 2010 Form 10-K .

(5) Credit default swap was entered into in order to generate income by providing default protection in return for a quarterly payment.

(6) Seller does not have the right to demand indemnification or compensation from third parties in case of a loss (payment) on the contract.

Details underlying the associated collateral of our open credit default swaps for which we are the seller, if credit risk related contingent features were triggered (in millions) are as follows:

	As of March 31, 2011	As of December 31, 2010
Maximum potential payout	\$ 125	\$ 145

Less:

Counterparty thresholds	-	10
Maximum collateral potentially required to post	\$ 125	\$ 135

30

---

Certain of our credit default swap agreements contain contractual provisions that allow for the netting of collateral with our counterparties related to all of our collateralized financing transactions that we have outstanding. If these netting agreements were not in place, we would have been required to post approximately \$6 million as of March 31, 2011, after considering the fair values of the associated investments counterparties' credit ratings as compared to ours and specified thresholds that once exceeded result in the payment of cash.

#### Total Return Swaps

We use total return swaps to hedge a portion of the liability related to our deferred compensation plans. We receive the total return on a portfolio of indexes and pay a floating rate of interest.

#### Put Options

We use put options to hedge the liability exposure on certain options in variable annuity products. Put options are contracts that require counterparties to pay us at a specified future date the amount, if any, by which a specified equity index is less than the strike rate stated in the agreement, applied to a notional amount.

#### Call Options (Based on LNC Stock)

We use call options on our stock to hedge the expected increase in liabilities arising from stock appreciation rights ("SARs") granted on our stock.

#### Call Options (Based on S&P 500)

We use indexed annuity contracts to permit the holder to elect an interest rate return or an equity market component, where interest credited to the contracts is linked to the performance of the S&P 500. Contract holders may elect to rebalance index options at renewal dates, either annually or biannually. As of each renewal date, we have the opportunity to re-price the indexed component by establishing participation rates, subject to minimum guarantees. We purchase call options that are highly correlated to the portfolio allocation decisions of our contract holders, such that we are economically hedged with respect to equity returns for the current reset period. The mark-to-market of the options held generally offsets the change in value of the embedded derivative within the indexed annuity.

#### Variance Swaps

We use variance swaps to hedge the liability exposure on certain options in variable annuity products. Variance swaps are contracts entered into at no cost and whose payoff is the difference between the realized variance rate of an underlying index and the fixed variance rate determined as of inception.

#### Currency Futures

We use currency futures to hedge foreign exchange risk associated with certain options in variable annuity products. Currency futures exchange one currency for another at a specified date in the future at a specified exchange rate.

#### Consumer Price Index Swaps

We use consumer price index swaps to hedge the liability exposure on certain options in fixed/indexed annuity products. Consumer price index swaps are contracts entered into at no cost and whose payoff is the difference between the consumer price index inflation rate and the fixed rate determined as of inception.

### Interest Rate Cap Corridors

We use interest rate cap corridors to provide a level of protection from the effect of rising interest rates for our annuity business, within our Retirement Solutions – Annuities and Retirement Solutions – Defined Contribution segments. Interest rate cap corridors involve purchasing an interest rate cap at a specific cap rate and selling an interest rate cap with a higher cap rate. For each corridor, the amount of quarterly payments, if any, is determined by the rate at which the underlying index rate resets above the original capped rate. The corridor limits the benefit the purchaser can receive as the related interest rate index rises above the higher capped rate. There is no additional liability to us other than the purchase price associated with the interest rate cap corridor. Our interest rate cap corridors provide an economic hedge of our annuity business.

#### Deferred Compensation Plans Embedded Derivatives

We have certain deferred compensation plans that have embedded derivative instruments. The liability related to these plans varies based on the investment options selected by the participants. The liability related to certain investment options selected by the participants is marked-to-market through net income (loss).

#### Indexed Annuity Contracts Embedded Derivatives

We distribute indexed annuity contracts that permit the holder to elect an interest rate return or an equity market component, where interest credited to the contracts is linked to the performance of the S&P 500. This feature represents an embedded derivative under the Derivatives and Hedging Topic of the FASB ASC. Contract holders may elect to rebalance index options at renewal dates, either annually or biannually. As of each renewal date, we have the opportunity to re-price the indexed component by establishing participation rates, subject to minimum guarantees. We purchase S&P 500 call options that are highly correlated to the portfolio allocation decisions of our contract holders, such that we are economically hedged with respect to equity returns for the current reset period. The mark-to-market of the options held generally offsets the change in value of the embedded derivative within the indexed annuity.

#### GLB Reserves Embedded Derivatives

We have certain GLB variable annuity products with GWB and GIB features that are embedded derivatives. Certain features of these guarantees, notably our GIB, 4LATER® and Lincoln Lifetime IncomeSM Advantage features, have elements of both insurance benefits accounted for under the Financial Services – Insurance – Claim Costs and Liabilities for Future Policy Benefits Subtopic of the FASB ASC (“benefit reserves”) and embedded derivatives accounted for under the Derivatives and Hedging and the Fair Value Measurements and Disclosures Topics of the FASB ASC (“embedded derivative reserves”). We calculate the value of the embedded derivative reserve and the benefit reserve based on the specific characteristics of each GLB feature. As of March 31, 2011, we had \$31.9 billion of account values that were attributable to variable annuities with a GWB feature and \$12.1 billion of account values that were attributable to variable annuities with a GIB feature.

We use a hedging strategy designed to mitigate the risk and income statement volatility caused by changes in the equity markets, interest rates and volatility associated with GWB and GIB features. The hedging strategy is designed such that changes in the value of the hedge contracts due to changes in equity markets, interest rates and implied volatilities move in the opposite direction of changes in embedded derivative reserves of the GWB and GIB caused by those same factors. As part of our current hedging program, equity markets, interest rates and volatility in market conditions are monitored on a daily basis. We rebalance our hedge positions based upon changes in these factors as needed. While we actively manage our hedge positions, these hedge positions may not be totally effective in offsetting changes in the embedded derivative reserve due to, among other things, differences in timing between when a market exposure changes and corresponding changes to the hedge positions, extreme swings in the equity markets and interest rates, market volatility, contract holder behavior, divergence between the performance of the underlying funds and the hedging indices, divergence between the actual and expected performance of the hedge instruments and our ability to purchase hedging instruments at prices consistent with our desired risk and return trade-off.

#### Reinsurance Related Embedded Derivatives

We have certain modified coinsurance arrangements and coinsurance with funds withheld reinsurance arrangements with embedded derivatives related to the withheld assets of the related funds. These derivatives are considered total return swaps with contractual returns that are attributable to various assets and liabilities associated with these reinsurance arrangements. Changes in the estimated fair value of these derivatives as they occur are recorded through net income (loss). Offsetting these amounts are corresponding changes in the estimated fair value of trading securities

in portfolios that support these arrangements. During the first quarter of 2009, the portion of the embedded derivative liability related to the funds withheld reinsurance agreement on our disability income business was released due to the rescission of the underlying reinsurance agreement. See Note 14 in our 2010 Form 10-K for information regarding the rescission of the underlying reinsurance agreement.

#### AFS Securities Embedded Derivatives

We own various debt securities that either contain call options to exchange the debt security for other specified securities of the borrower, usually common stock, or contain call options to receive the return on equity-like indexes. The change in fair value of these embedded derivatives flows through net income (loss).

## Credit Risk

We are exposed to credit loss in the event of nonperformance by our counterparties on various derivative contracts and reflect assumptions regarding the credit or nonperformance risk. The nonperformance risk is based upon assumptions for each counterparty's credit spread over the estimated weighted average life of the counterparty exposure less collateral held. As of March 31, 2011, the nonperformance risk adjustment was \$10 million. The credit risk associated with such agreements is minimized by purchasing such agreements from financial institutions with long-standing, superior performance records. Additionally, we maintain a policy of requiring all derivative contracts to be governed by an International Swaps and Derivatives Association ("ISDA") Master Agreement. We are required to maintain minimum ratings as a matter of routine practice in negotiating ISDA agreements. Under some ISDA agreements, our insurance subsidiaries have agreed to maintain certain financial strength or claims-paying ratings. A downgrade below these levels could result in termination of the derivatives contract, at which time any amounts payable by us would be dependent on the market value of the underlying derivative contract. In certain transactions, we and the counterparty have entered into a collateral support agreement requiring either party to post collateral when net exposures exceed pre-determined thresholds. These thresholds vary by counterparty and credit rating. We do not believe the inclusion of termination or collateralization events pose any material threat to the liquidity position of any insurance subsidiary of the Company. The amount of such exposure is essentially the net replacement cost or market value less collateral held for such agreements with each counterparty if the net market value is in our favor. As of March 31, 2011, the exposure was \$161 million.

The amounts recognized (in millions) by S&P credit rating of counterparty, for which we had the right to reclaim cash collateral or were obligated to return cash collateral, were as follows:

S&P Credit Rating of Counterparty	As of March 31, 2011		As of December 31, 2010	
	Collateral Posted by Counter- Party (Held by LNC)	Collateral Posted by LNC (Held by Counter- Party)	Collateral Posted by Counter- Party (Held by LNC)	Collateral Posted by LNC (Held by Counter- Party)
AAA	\$ -	\$ -	\$ 1	\$ -
AA	52	-	99	-
AA-	89	-	65	-
A+	475	(41)	548	(76)
A	453	(263)	436	(223)
	\$ 1,069	\$ (304)	\$ 1,149	\$ (299)

## 7. Federal Income Taxes

The effective tax rate is a ratio of tax expense over pre-tax income (loss). The effective tax rate was 28% and 27% for the three months ended March 31, 2011 and 2010, respectively. The effective tax rate on pre-tax income (loss) from continuing operations was lower than the prevailing corporate federal income tax rate. Differences in the effective rates and the U.S. statutory rate of 35% were the result of certain tax preferred investment income, separate account dividends-received deduction ("DRD"), foreign tax credits and other tax preference items.

The application of GAAP requires us to evaluate the recoverability of our deferred tax assets and establish a valuation allowance if necessary, to reduce our deferred tax asset to an amount that is more likely than not to be realizable. Considerable judgment and the use of estimates are required in determining whether a valuation allowance

is necessary, and if so, the amount of such valuation allowance. In evaluating the need for a valuation allowance, we consider many factors, including: the nature and character of the deferred tax assets and liabilities; taxable income in prior carryback years; future reversals of temporary differences; the length of time carryovers can be utilized; and any tax planning strategies we would employ to avoid a tax benefit from expiring unused. Although realization is not assured, management believes it is more likely than not that the deferred tax assets, including our capital loss deferred tax asset, will be realized.

In the normal course of business, we are subject to examination by taxing authorities throughout the U.S. and the U.K. At any given time, we may be under examination by state, local or non-U.S. income tax authorities. We are currently under audit by the IRS for years 2007 and 2008. The Jefferson-Pilot subsidiaries acquired in the April 2006 merger are subject to a separate IRS examination cycle. For the former Jefferson-Pilot subsidiaries, Jefferson Pilot Life Insurance Company and Jefferson Pilot Financial Insurance Company, the IRS is examining the tax years ended April 1, 2007 and July 1, 2007, respectively.

## 8. Guaranteed Benefit Features

Information on the guaranteed death benefit (“GDB”) features outstanding (dollars in millions) was as follows (our variable contracts with guarantees may offer more than one type of guarantee in each contract; therefore, the amounts listed are not mutually exclusive):

	As of March 31, 2011	As of December 31, 2010
<b>Return of Net Deposits</b>		
Total account value	\$ 54,639	\$ 52,211
Net amount at risk (1)	586	816
	58	58
Average attained age of contract holders	years	years
<b>Minimum Return</b>		
Total account value (2)	\$ 186	\$ 187
Net amount at risk (1)	41	46
	71	70
Average attained age of contract holders	years	years
Guaranteed minimum return	5 %	5 %
<b>Anniversary Contract Value</b>		
Total account value	\$ 24,007	\$ 23,483
Net amount at risk (1)	1,648	2,183
	66	66
Average attained age of contract holders	years	years

(1) Represents the amount of death benefit in excess of the account balance. The decrease in net amount at risk when comparing March 31, 2011, to December 31, 2010, was attributable primarily to the rise in equity markets and associated increase in the account values.

(2) The decrease in total account value when comparing March 31, 2011, to December 31, 2010, was attributable primarily to an increase in contract surrender rates.

The determination of GDB liabilities is based on models that involve a range of scenarios and assumptions, including those regarding expected market rates of return and volatility, contract surrender rates and mortality experience. The following summarizes the balances of and changes in the liabilities for GDB (in millions), which were recorded in future contract benefits on our Consolidated Balance Sheets:

	For the Three Months Ended March 31,	
	2011	2010
Balance as of beginning-of-year	\$ 44	\$ 71
Changes in reserves	4	13
Benefits paid	(10)	(24)
Balance as of end-of-period	\$ 38	\$ 60

Account balances of variable annuity contracts with guarantees (in millions) were invested in separate account investment options as follows:

Asset Type	As of March 31, 2011	As of December 31, 2010
Domestic equity	\$ 37,328	\$ 35,659
International equity	14,744	14,172
Bonds	16,681	15,913
Money market	5,876	5,725
Total	\$ 74,629	\$ 71,469
Percent of total variable annuity separate account values	98 %	98 %

Future contract benefits also include reserves for our products with secondary guarantees for our products sold through our Insurance Solutions – Life Insurance segment. These UL and VUL products with secondary guarantees represented approximately 39% of permanent life insurance in force as of March 31, 2011, and approximately 50% of total sales for these products in 2011.

#### 9. Contingencies and Commitments

See “Contingencies and Commitments” in Note 14 to the consolidated financial statements in our 2010 Form 10-K for a discussion of commitments and contingencies, which information is incorporated herein by reference.

Regulatory bodies, such as state insurance departments, the SEC, Financial Industry Regulatory Authority and other regulatory bodies regularly make inquiries and conduct examinations or investigations concerning our compliance with, among other things, insurance laws, securities laws, laws governing the activities of broker-dealers and unclaimed property laws.

In the ordinary course of its business, LNC and its subsidiaries are involved in various pending or threatened legal proceedings, including purported class actions, arising from the conduct of business. In some instances, these proceedings include claims for unspecified or substantial punitive damages and similar types of relief in addition to amounts for alleged contractual liability or requests for equitable relief. After consultation with legal counsel and a review of available facts, it is management’s opinion that these proceedings, after consideration of any reserves and rights to indemnification, ultimately will be resolved without materially affecting the consolidated financial position of LNC. However, given the large and indeterminate amounts sought in certain of these proceedings and the inherent difficulty in predicting the outcome of such legal proceedings, it is possible that an adverse outcome in certain matters could be material to our operating results for any particular reporting period.

## 10. Shares and Stockholders' Equity

## Common and Preferred Shares

The changes in our preferred and common stock (number of shares) were as follows:

	For the Three Months Ended March 31,	
	2011	2010
Series A Preferred Stock		
Balance as of beginning-of-year	10,914	11,497
Conversion of convertible preferred stock (1)	-	(132)
Balance as of end-of-period	10,914	11,365
Series B Preferred Stock		
Balance as of beginning-of-year	-	950,000
Balance as of end-of-period	-	950,000
Common Stock		
Balance as of beginning-of-year	315,718,554	302,223,281
Conversion of convertible preferred stock (1)	-	2,112
Stock compensation/issued for benefit plans	152,134	259,734
Retirement/cancellation of shares	(2,413,864)	(18,093)
Balance as of end-of-period	313,456,824	302,467,034
Common Stock as of End-of-Period		
Assuming conversion of preferred stock	313,631,448	302,648,874
Diluted basis	321,320,873	312,965,633

(1) Represents the conversion of Series A preferred stock into common stock.

Our common, Series A and Series B preferred stocks are without par value.

## Average Shares

A reconciliation of the denominator (number of shares) in the calculations of basic and diluted earnings (loss) per common share ("EPS") was as follows:

	For the Three Months Ended March 31,	
	2011	2010
Weighted-average shares, as used in basic calculation	315,014,084	302,221,901
Shares to cover exercise of outstanding warrants	10,150,292	13,049,451
Shares to cover conversion of preferred stock	174,624	183,459
Shares to cover non-vested stock	771,357	603,861
Average stock options outstanding during the period	959,872	780,617
Assumed acquisition of shares with assumed proceeds from exercising outstanding warrants	(3,669,994)	(5,428,421)
Assumed acquisition of shares with assumed proceeds and benefits from exercising stock options (at average market price for the period)	(654,934)	(515,391)
Shares repurchaseable from measured but unrecognized stock option expense	(152,416)	(162,378)
Average deferred compensation shares	271,447	1,355,432
Weighted-average shares, as used in diluted calculation	322,864,332	312,088,531

In the event the average market price of LNC common stock exceeds the issue price of stock options, such options would be dilutive to our EPS and will be shown in the table above.

The income used in the calculation of our diluted EPS is our net income (loss), reduced by preferred stock dividends and accretion of discount. These amounts are presented on our Consolidated Statements of Income (Loss).

## Accumulated OCI

The following summarizes the components and changes in accumulated OCI (in millions):

	For the Three Months Ended March 31,	
	2011	2010
Unrealized Gain (Loss) on AFS Securities		
Balance as of beginning-of-year	\$ 1,072	\$ 49
Cumulative effect from adoption of new accounting standards	-	181
Unrealized holding gains (losses) arising during the period	(191)	953
Change in foreign currency exchange rate adjustment	14	(13)
Change in DAC, VOBA, DSI and other contract holder funds	179	(386)
Income tax benefit (expense)	1	(199)
Less:		
Reclassification adjustment for gains (losses) included in net income (loss)	(19)	(38)
Reclassification adjustment for gains (losses) on derivatives included in net income (loss)	-	11
Associated amortization of DAC, VOBA, DSI and DFEL	(11)	4
Income tax benefit (expense)	11	8
Balance as of end-of-period	\$ 1,094	\$ 600
Unrealized OTTI on AFS Securities		
Balance as of beginning-of-year	\$ (129)	\$ (115)
(Increases) attributable to:		
Gross OTTI recognized in OCI during the period	(8)	(22)
Change in DAC, VOBA, DSI and DFEL	2	(2)
Income tax benefit (expense)	2	8
Decreases attributable to:		
Sales, maturities or other settlements of AFS securities	45	33
Change in DAC, VOBA, DSI and DFEL	(8)	(7)
Income tax benefit (expense)	(13)	(9)
Balance as of end-of-period	\$ (109)	\$ (114)
Unrealized Gain (Loss) on Derivative Instruments		
Balance as of beginning-of-year	\$ (15)	\$ 11
Unrealized holding gains (losses) arising during the period	(4)	16
Change in foreign currency exchange rate adjustment	(9)	-
Change in DAC, VOBA, DSI and DFEL	5	2
Income tax benefit (expense)	3	(6)
Less:		
Reclassification adjustment for gains (losses) included in net income (loss)	3	3
Income tax benefit (expense)	(1)	(1)
Balance as of end-of-period	\$ (22)	\$ 21
Foreign Currency Translation Adjustment		
Balance as of beginning-of-year	\$ 1	\$ 3
Foreign currency translation adjustment arising during the period	2	(2)
Income tax benefit (expense)	(1)	1
Balance as of end-of-period	\$ 2	\$ 2
Funded Status of Employee Benefit Plans		

Edgar Filing: LINCOLN NATIONAL CORP - Form 10-Q

Balance as of beginning-of-year	\$ (181)	\$ (210)
Adjustment arising during the period	(1)	5
Income tax benefit (expense)	-	(2)
Balance as of end-of-period	\$ (182)	\$ (207)

## 11. Realized (Gain) Loss

Details underlying realized gain (loss) (in millions) reported on our Consolidated Statements of Income (Loss) were as follows:

	For the Three Months Ended March 31,	
	2011	2010
Total realized gain (loss) related to certain investments (1)	\$ (17)	\$ (55)
Realized gain (loss) related to certain derivative instruments, including those associated with our consolidated VIEs, and trading securities (2)	10	13
Indexed annuity net derivative results: (3)		
Gross gain (loss)	6	4
Associated amortization of DAC, VOBA, DSI and DFEL	(2)	(2)
Guaranteed living benefits: (4)		
Gross gain (loss)	21	39
Associated amortization of DAC, VOBA, DSI and DFEL	(10)	(12)
Guaranteed death benefits: (5)		
Gross gain (loss)	(11)	(15)
Associated amortization of DAC, VOBA, DSI and DFEL	1	2
Total realized gain (loss)	\$ (2)	\$ (26)

(1) See “Realized Gain (Loss) Related to Certain Investments” section in Note 5.

- (2) Represents changes in the fair values of certain derivative investments (including the credit default swaps and contingent forwards associated with our consolidated VIEs), total return swaps (embedded derivatives that are theoretically included in our various modified coinsurance and coinsurance with funds withheld reinsurance arrangements that have contractual returns related to various assets and liabilities associated with these arrangements) and trading securities.
- (3) Represents the net difference between the change in the fair value of the S&P 500 call options that we hold and the change in the fair value of the embedded derivative liabilities of our indexed annuity products along with changes in the fair value of embedded derivative liabilities related to index call options we may purchase in the future to hedge contract holder index allocations applicable to future reset periods for our indexed annuity products.
- (4) Represents the net difference in the change in embedded derivative reserves of our GLB products and the change in the fair value of the derivative instruments we own to hedge, including the cost of purchasing the hedging instruments.

(5) Represents the change in the fair value of the derivatives used to hedge our GDB riders.

## 12. Stock-Based Incentive Compensation Plans

We sponsor various incentive plans for our employees and directors, and for the employees and agents of our subsidiaries that provide for the issuance of stock options, performance shares (performance-vested shares as opposed to time-vested shares), SARS and restricted stock units.

LNC stock-based awards granted were as follows:

	For the Three Months Ended March 31, 2011
Awards	
10-year LNC stock options	459,093
Performance shares	215,137
SARs	106,966
Restricted stock units	451,090
Non-employee:	
Agent stock options	96,575
Director stock options	32,560
Director restricted stock units	9,779

### 13. Fair Value of Financial Instruments

The carrying values and estimated fair values of our financial instruments (in millions) were as follows:

	As of March 31, 2011		As of December 31, 2010	
	Carrying Value	Fair Value	Carrying Value	Fair Value
Assets				
AFS securities:				
Fixed maturity securities	\$ 69,231	\$ 69,231	\$ 68,030	\$ 68,030
VIEs' fixed maturity securities	587	587	584	584
Equity securities	145	145	197	197
Trading securities	2,598	2,598	2,596	2,596
Mortgage loans on real estate	6,749	7,114	6,752	7,183
Derivative investments	946	946	1,076	1,076
Other investments	1,029	1,029	1,038	1,038
Cash and invested cash	2,216	2,216	2,741	2,741
Separate account assets	88,236	88,236	84,630	84,630
Liabilities				
Future contract benefits:				
Indexed annuity contracts embedded derivatives	(528)	(528)	(497)	(497)
GLB reserves embedded derivatives	(118)	(118)	(408)	(408)
Other contract holder funds:				
Remaining guaranteed interest and similar contracts	(1,203)	(1,203)	(1,119)	(1,119)
Account values of certain investment contracts	(26,511)	(26,724)	(26,130)	(27,142)
Short-term debt (1)	(351)	(362)	(351)	(364)
Long-term debt	(5,370)	(5,535)	(5,399)	(5,512)
Reinsurance related embedded derivatives	(91)	(91)	(102)	(102)
VIEs' liabilities - derivative instruments	(203)	(203)	(209)	(209)
Other liabilities:				

Edgar Filing: LINCOLN NATIONAL CORP - Form 10-Q

Deferred compensation plans embedded derivatives	(357)	(357)	(363)	(363)
Credit default swaps	(6)	(6)	(16)	(16)

- (1) The difference between the carrying value and fair value of short-term debt as of March 31, 2011, and December 31, 2010, related to current maturities of long-term debt.

#### Valuation Methodologies and Associated Inputs for Financial Instruments Not Carried at Fair Value

The following discussion outlines the methodologies and assumptions used to determine the fair value of our financial instruments not carried at fair value on our Consolidated Balance Sheets. Considerable judgment is required to develop these assumptions used to measure fair value. Accordingly, the estimates shown are not necessarily indicative of the amounts that would be realized in a one-time, current market exchange of all of our financial instruments.

#### Mortgage Loans on Real Estate

The fair value of mortgage loans on real estate is established using a discounted cash flow method based on credit rating, maturity and future income. The ratings for mortgages in good standing are based on property type, location, market conditions, occupancy, debt-service coverage, loan-to-value, quality of tenancy, borrower and payment record. The fair value for impaired mortgage loans on real estate is based on the present value of expected future cash flows discounted at the loan's effective interest rate, the loan's market price or the fair value of the collateral if the loan is collateral dependent.

#### Other Investments

The carrying value of our assets classified as other investments approximates their fair value. Other investments include LPs and other privately held investments that are accounted for using the equity method of accounting.

#### Other Contract Holder Funds

Other contract holder funds include remaining guaranteed interest and similar contracts and account values of certain investment contracts. The fair value for the remaining guaranteed interest and similar contracts is estimated using discounted cash flow calculations as of the balance sheet date. These calculations are based on interest rates currently offered on similar contracts with maturities that are consistent with those remaining for the contracts being valued. As of March 31, 2011, and December 31, 2010, the remaining guaranteed interest and similar contracts carrying value approximates fair value. The fair value of the account values of certain investment contracts is based on their approximate surrender value as of the balance sheet date.

#### Short-term and Long-term Debt

The fair value of long-term debt is based on quoted market prices or estimated using discounted cash flow analysis determined in conjunction with our incremental borrowing rate as of the balance sheet date for similar types of borrowing arrangements where quoted prices are not available. For short-term debt, excluding current maturities of long-term debt, the carrying value approximates fair value.

#### Financial Instruments Carried at Fair Value

We did not have any assets or liabilities measured at fair value on a nonrecurring basis as of March 31, 2011, or December 31, 2010, and we noted no changes in our valuation methodologies between these periods.

The following summarizes our financial instruments carried at fair value (in millions) on a recurring basis by the fair value hierarchy levels described in "Summary of Significant Accounting Policies" in Note 1 of the 2010 Form 10-K:

	As of March 31, 2011			
	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total Fair Value
<b>Assets</b>				
<b>Investments:</b>				
Fixed maturity AFS securities:				
Corporate bonds	\$ 60	\$ 51,310	\$ 1,806	\$ 53,176

The following summarizes changes to our financial instruments carried at fair value (in millions) and classified within Level 3 of the fair value hierarchy. This summary excludes any effect of amortization of DAC, VOBA, DSI and DFEL. The gains and losses below may include changes in fair value due in part to observable inputs that are a component of the valuation methodology.

For the Three Months Ended March 31, 2011
