Forward-Looking Statements

This report contains forward-looking statements (as that term is defined by the federal securities laws) about our financial condition, results of operations and business. You can find many of these statements by looking for words such as "may," "will," "expect," "anticipate," "believe," "estimate" and similar words used in this report.

These forward-looking statements are subject to numerous assumptions, risks and uncertainties. Because the statements are subject to risks and uncertainties, actual results may differ materially from those expressed or implied by the forward-looking statements. We caution readers not to place undue reliance on the statements, which speak only as of the date of this report.

The cautionary statements set forth above should be considered in connection with any subsequent written or oral forward-looking statements that we or persons acting on our behalf may issue. We do not undertake any obligation to review or confirm analysts' expectations or estimates or to release publicly any revisions to any forward-looking statement to reflect events or circumstances after the date of this report or to reflect the occurrence of unanticipated events.

You should carefully consider the factors discussed in Part I, Item 1A, "Risk Factors," in our Annual Report on Form 10-K for the year ended December 31, 2010, which could materially affect our business, financial condition or future results. The risks described in our Annual Report on Form 10-K are not the only risks facing our Company. Additional risks and uncertainties not currently known to us or that we currently deemed to be immaterial also may materially adversely affect our business, financial position and results of operations or cash flows.

We disclose important factors that could cause our actual results to differ materially from our expectations under Part I, Item 2., "Management's Discussion and Analysis of Financial Condition and Results of Operations," and elsewhere in this report. These cautionary statements qualify all forward-looking statements attributed to us or persons acting on our behalf. When we indicate that an event, condition or circumstance could or would have an adverse effect on us, we mean to include effects upon our business, financial and other condition, results of operations, prospects and ability to service our debt.

## TRIMAS CORPORATION

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(unaudited)

## 1. Basis of Presentation

TriMas Corporation ("TriMas" or the "Company"), and its consolidated subsidiaries, is a global manufacturer and distributor of products for commercial, industrial and consumer markets. The Company is principally engaged in six reportable segments with diverse products and market channels: Packaging, Energy, Aerospace & Defense, Engineered Components, Cequent Asia Pacific and Cequent North America. See Note 10, "Segment Information," for further information on each of the Company's reportable segments.

The accompanying consolidated financial statements include the accounts of the Company and its subsidiaries and in the opinion of management, contain all adjustments, including adjustments of a normal and recurring nature, necessary for a fair presentation of financial position and results of operations. Results of operations for interim periods are not necessarily indicative of results for the full year. Certain prior year amounts have been reclassified to conform with the current year presentation. The accompanying consolidated financial statements and notes thereto should be read in conjunction with the Company's 2010 Annual Report on Form 10-K.

## 2. Discontinued Operations and Assets Held for Sale

During the third quarter of 2011, the Company committed to a plan to exit its precision tool cutting and specialty fittings lines of business, both of which were part of the Engineered Components reportable segment, marketing each line of business for sale.

During the fourth quarter of 2009, the Company committed to a plan to exit its medical device line of business which was part of the Engineered Components reportable segment. The business was sold in May 2010 for cash proceeds of \$2.0 million, which approximated the net book value of the assets and liabilities sold.

During the fourth quarter of 2007, the Company committed to a plan to exit its property management line of business. The sale was completed in April 2010 for cash proceeds of \$13.0 million, resulting in a pre-tax gain on sale of approximately \$10.1 million during the second quarter of 2010.

The results of the aforementioned businesses are reported as discontinued operations for all periods presented. Results of discontinued operations are summarized as follows:

	Three months ended		Nine months ended	
	September 30,		September 30,	
	2011	2010	2011	2010
	(dollars in thousands)			
Net sales	\$11,930	\$10,150	\$34,670	\$30,710
Income from discontinued operations before income tax expense	\$2,050	\$1,190	\$5,450	\$13,060
Income tax expense	(760 )	(420 )	(2,020 )	(4,780 )
Income from discontinued operations, net of income tax expense	\$1,290	\$770	\$3,430	\$8,280

Table of Contents

## TRIMAS CORPORATION

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(unaudited)

Assets and liabilities of the discontinued operations are summarized as follows:

	September 30, 2011	December 31, 2010
	(dollars in thousands)	
Receivables, net	\$7,470	\$5,660
Inventories	5,780	5,320
Prepaid expenses and other assets	1,230	1,160
Property and equipment, net	18,370	18,220
Total assets	\$32,850	\$30,360
Accounts payable	3,990	3,910
Accrued liabilities and other	1,480	1,800
Total liabilities	\$5,470	\$5,710

## 3. Acquisitions

On August 1, 2011, the Company acquired the stock of Innovative Molding ("Innovative") for the purchase price of \$27.0 million. The purchase price remains subject to the finalization of a net working capital adjustment, which is expected to be completed during the first quarter of 2012. Innovative is in the business of designing, lining and manufacturing specialty plastic closures for bottles and jars for the food and nutrition industries, and had approximately \$28.3 million in revenue in the twelve months ended May 31, 2011. Innovative is included in the Company's Packaging reportable segment.

On September 13, 2011, the Company purchased substantially all of the assets of a standard ring type joint gasket manufacturer located in Faridabad, India for the purchase price of approximately \$2.1 million, of which approximately \$1.6 million has been paid and approximately \$0.5 million is scheduled to be paid by the end of the second quarter of 2012. These assets have been integrated into the Company's Lamons business within the Company's Energy reportable segment.

The results of operations of the aforementioned acquisitions are not significant compared to the overall results of operations of the Company.

## 4. Goodwill and Other Intangible Assets

Changes in the carrying amount of goodwill for the nine months ended September 30, 2011 are summarized as follows:

	Packaging	Energy	Aerospace & Defense	Engineered Components	Cequent Asia Pacific	Cequent North America	Total
	(dollars in thousands)						
Balance, December 31, 2010	\$ 113,320	\$ 48,260	\$ 41,130	\$ 3,180	\$—	\$—	\$ 205,890
Goodwill due to acquisitions	9,790	660	—	—	—	—	10,450
Foreign currency translation	(70)	(350)	—	—	—	—	(420)
Balance, September 30, 2011	\$ 123,040	\$ 48,570	\$ 41,130	\$ 3,180	\$—	\$—	\$ 215,920

## TRIMAS CORPORATION

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(unaudited)

The gross carrying amounts and accumulated amortization of the Company's other intangibles as of September 30, 2011 and December 31, 2010 are summarized below. The Company amortizes these assets over periods ranging from 1 to 30 years.

Intangible Category by Useful Life	As of September 30, 2011		As of December 31, 2010	
	Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
	(dollars in thousands)			
Customer relationships:				
5 – 12 years	\$ 37,280	\$ (22,590 )	\$ 32,220	\$ (20,650 )
15 – 25 years	154,610	(75,670 )	154,610	(69,480 )
Total customer relationships	191,890	(98,260 )	186,830	(90,130 )
Technology and other:				
1 – 15 years	28,970	(23,350 )	26,480	(22,460 )
17 – 30 years	43,530	(20,300 )	42,460	(18,690 )
Total technology and other	72,500	(43,650 )	68,940	(41,150 )
Trademark/Trade names (indefinite life)	36,390	—	35,420	—
	\$ 300,780	\$ (141,910 )	\$ 291,190	\$ (131,280 )

Amortization expense related to technology and other intangibles was approximately \$1.0 million and \$0.9 million for the three months ended September 30, 2011 and 2010, respectively, and \$2.6 million and \$2.8 million for the nine months ended September 30, 2011 and 2010, respectively. These amounts are included in cost of sales in the accompanying consolidated statement of operations. Amortization expense related to customer intangibles was approximately \$2.8 million and \$2.6 million for the three months ended September 30, 2011 and 2010, respectively, and \$8.2 million and \$7.8 million for the nine months ended September 30, 2011 and 2010, respectively. These amounts are included in selling, general and administrative expenses in the accompanying consolidated statement of operations.

## 5. Inventories

Inventories consist of the following components:

	September 30, 2011	December 31, 2010
	(dollars in thousands)	
Finished goods	\$ 113,650	\$ 103,560
Work in process	21,040	19,010
Raw materials	39,080	33,410
Total inventories	\$ 173,770	\$ 155,980

## 6. Property and Equipment, Net

Property and equipment consists of the following components:

	September 30, 2011	December 31, 2010
	(dollars in thousands)	
Land and land improvements	\$5,980	\$5,800
Buildings	50,200	49,230
Machinery and equipment	284,330	264,120
	340,510	319,150
Less: Accumulated depreciation	183,330	169,860
Property and equipment, net	\$157,180	\$149,290

Depreciation expense was approximately \$6.0 million and \$5.2 million, and \$17.5 million and \$16.1 million for the three and nine months ended September 30, 2011 and 2010, respectively, of which \$5.3 million and \$4.6 million, and \$15.3 million and \$14.2 million, respectively, is included in cost of sales in the accompanying consolidated statement of operations, and \$0.7 million and \$0.6 million, and \$2.2 million and \$1.9 million, respectively, is included in selling, general and administrative expenses in the accompanying consolidated statement of operations.

## 7. Long-term Debt

The Company's long-term debt consists of the following:

	September 30, 2011	December 31, 2010
	(dollars in thousands)	
U.S. bank debt	\$229,440	\$248,950
Non-U.S. bank debt and other	750	290
9 3/4% senior secured notes, due December 2017	245,770	245,410
	475,960	494,650
Less: Current maturities, long-term debt	2,920	17,730
Long-term debt	\$473,040	\$476,920

## U.S. Bank Debt

The Company is a party to a credit facility consisting of a \$110.0 million revolving credit facility, which matures in June 2017 and is subject to interest at London Interbank Offered Rates ("LIBOR") plus 3.25%, and a \$225.0 million term loan facility, which matures in June 2016 and is subject to interest at LIBOR plus 3.00% (subject to a 1.25% LIBOR floor) (collectively, the "Credit Facility"). Under the Credit Facility, the Company is also able to issue letters of credit, not to exceed \$50.0 million in aggregate, against its revolving credit facility commitments. At September 30, 2011 and December 31, 2010, the Company had letters of credit of approximately \$23.1 million and \$23.7 million, respectively, issued and outstanding.

At September 30, 2011 and December 31, 2010, the Company had \$5.0 million and \$0.0 million, respectively, outstanding under its revolving credit facilities and had an additional \$81.9 million and \$79.3 million, respectively, potentially available after giving effect to approximately \$23.1 million and \$23.7 million, respectively, of letters of credit issued and outstanding. However, including availability under its accounts receivable facility and after

consideration of leverage restrictions contained in the Credit Facility, the Company had \$152.2 million and \$120.7 million, respectively, of borrowing capacity available to it for general corporate purposes.

(unaudited)

The bank debt is an obligation of the Company and its subsidiaries. Although the terms of the Credit Facility do not restrict the Company's subsidiaries from making distributions to it in respect of its 9<sup>3</sup>/<sub>4</sub>% senior secured notes, it does contain certain other limitations on the distribution of funds from TriMas Company LLC, the principal subsidiary, to the Company. The restricted net assets of the guarantor subsidiaries of approximately \$407.7 million and \$336.9 million at September 30, 2011 and December 31, 2010, respectively, are presented in Note 15, "Supplemental Guarantor Condensed Consolidating Financial Information." The Credit Facility also contains various negative and affirmative covenants and other requirements affecting the Company and its subsidiaries. The Company was in compliance with its covenants at September 30, 2011.

The Company's term loan facility traded at approximately 97.3% and 100.3% of par value as of September 30, 2011 and December 31, 2010, respectively, and was valued based on Level 2 inputs as defined in the fair value hierarchy.

**Non-U.S. Bank Debt**

In Australia, the Company's subsidiary is party to a debt agreement which matures on March 31, 2012 and is secured by substantially all the assets of the subsidiary. At September 30, 2011, the balance outstanding under this agreement was approximately \$0.6 million at an average interest rate of 6.7%. At December 31, 2010, the Company's subsidiary had no amounts outstanding under this debt agreement.

**Notes**

The Company's 9<sup>3</sup>/<sub>4</sub>% senior secured notes due 2017 ("Notes") indenture contains negative and affirmative covenants and other requirements that are comparable to those contained in the Credit Facility. At September 30, 2011, the Company was in compliance with all such covenant requirements.

The Company's Notes traded at approximately 103.0% and 108.5% of par value as of September 30, 2011 and December 31, 2010, respectively, and was valued based on Level 2 inputs as defined in the fair value hierarchy.

**Receivables Facility**

The Company is a party to an accounts receivable facility through TSPC, Inc. ("TSPC"), a wholly-owned subsidiary, to sell trade accounts receivable of substantially all of the Company's domestic business operations. The Company amended the facility in September 2011, increasing the committed funding from \$75.0 million to \$90.0 million, and reducing the margin on amounts outstanding from a range of 2.75%-3.50%, depending on leverage ratio, to a range of 1.50%-1.75% depending on the amount drawn under the facility. The amendment also reduced the cost of the unused portion of the facility from a range of 0.50%-1.00%, depending on usage amount, to 0.45% and extended the maturity date from December 29, 2012 to September 15, 2015. The Company incurred approximately \$0.1 million in fees and expenses to complete the amendment.

Under this facility, TSPC, from time to time, may sell an undivided fractional ownership interest in the pool of receivables up to approximately \$90.0 million to a third party multi-seller receivables funding company. The net amount financed under the facility is less than the face amount of accounts receivable by an amount that approximates the purchaser's financing costs. The cost of funds under this facility consisted of a 3-month LIBOR-based rate plus a usage fee of 1.50% and 3.00% as of September 30, 2011 and 2010, respectively, and a fee on the unused portion of the facility of 0.45% and 1.00% as of September 30, 2011 and 2010, respectively.

The Company did not have any amounts outstanding under the facility as of September 30, 2011 or December 31, 2010, but had \$70.3 million and \$41.4 million, respectively, available but not utilized. Aggregate costs incurred under the facility were \$0.5 million and \$0.2 million for the three months ended September 30, 2011 and 2010, respectively, and \$1.4 million and \$0.8 million for the nine months ended September 30, 2011 and 2010, respectively, and are included in interest expense in the accompanying consolidated statement of operations.

The cost of funds fees incurred are determined by calculating the estimated present value of the receivables sold compared to their carrying amount. The estimated present value factor is based on historical collection experience and a discount rate based on a 3-month LIBOR-based rate plus the usage fee discussed above and is computed in accordance with the terms of the securitization agreement. As of September 30, 2011, the costs of funds under the facility was based on an average liquidation period of the portfolio of approximately 1.6 months and an average discount rate of 1.8%.

## 8. Derivative Instruments

The Company was party to a \$125.0 million notional amount interest rate swap which expired in July 2011. The Company was party to a second interest rate swap with a notional amount of \$75.0 million which expired in the first quarter of 2011. Both of these swaps were associated with the Company's term loan facility, but during 2011 and 2010 neither was designated as a hedging instrument. In addition, during the first quarter of 2010, the Company was party to two foreign exchange forward contracts which were not designated as hedging instruments.

As of September 30, 2011 and December 31, 2010, the fair value carrying amounts of the Company's derivative instruments not designated as hedging instruments are recorded as follows:

	Balance Sheet Caption	Asset Derivatives		Liability Derivatives	
		September 30, 2011	December 31, 2010	September 30, 2011	December 31, 2010
(dollars in thousands)

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(unaudited)

Valuations of the interest rate swaps and foreign currency forward contracts were based on the income approach which uses observable inputs such as interest rate yield curves and forward currency exchange rates. Fair value measurements and the fair value hierarchy level for the Company's assets and liabilities measured at fair value on a recurring basis as of December 31, 2010 are shown below. There were no derivative instruments outstanding as of September 30, 2011.

Description	Frequency	December 31, 2010

		(dollars in thousands)			
Interest rate swaps	Recurring	\$(1,130	) \$—	\$(1,130	) \$—

## 9. Commitments and Contingencies

## Asbestos

As of September 30, 2011, the Company was a party to 1,101 pending cases involving an aggregate of 8,081 claimants alleging personal injury from exposure to asbestos containing materials formerly used in gaskets (both encapsulated and otherwise) manufactured or distributed by certain of the Company's subsidiaries for use primarily in the petrochemical refining and exploration industries. The following chart summarizes the number of claimants, number of claims filed, number of claims dismissed, number of claims settled, the average settlement amount per claim and the total defense costs, exclusive of amounts reimbursed under the Company's primary insurance, at the applicable date and for the applicable periods:

	Claims pending at beginning of period	Claims filed during period	Claims dismissed during period	Claims settled during period	Average settlement amount per claim during period	Total defense costs during period
Fiscal Year Ended December 31, 2010	7,816	892	456	52	\$7,029	\$2,870,000
Nine Months Ended September 30, 2011	8,200	379	479	19	\$15,653	\$1,890,000

In addition, the Company acquired various companies to distribute its products that had distributed gaskets of other manufacturers prior to acquisition. The Company believes that many of its pending cases relate to locations at which none of its gaskets were distributed or used.

The Company may be subjected to significant additional asbestos-related claims in the future, the cost of settling cases in which product identification can be made may increase, and the Company may be subjected to further claims in respect of the former activities of its acquired gasket distributors. The Company is unable to make a meaningful statement concerning the monetary claims made in the asbestos cases given that, among other things, claims may be initially made in some jurisdictions without specifying the amount sought or by simply stating the requisite or

maximum permissible monetary relief, and may be amended to alter the amount sought. The large majority of claims do not specify the amount sought. Of the 8,081 claims pending at September 30, 2011, 59 set forth specific amounts of damages (other than those stating the statutory minimum or maximum). 34 of the 59 claims sought between \$1.0 million and \$5.0 million in total damages (which includes compensatory and punitive damages), 20 sought between \$5.0 million and \$10.0 million in total damages (which includes compensatory and punitive damages) and 5 sought over \$10.0 million (which includes compensatory and punitive damages). Solely with respect to compensatory damages, 36 of the 59 claims sought between \$50,000 and \$600,000, 20 sought between \$600,000 and \$5.0 million and 3 sought over \$5.0 million. Solely with respect to punitive damages, 34 of the 59 claims sought between \$1.0 million and \$2.5 million, 20 sought between \$2.5 million and \$5.0 million and 5 sought over \$5.0 million. In addition, relatively few of the claims have reached the discovery stage and even fewer claims have gone past the discovery stage.

Total settlement costs (exclusive of defense costs) for all such cases, some of which were filed over 20 years ago, have been

Table of Contents

TRIMAS CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(unaudited)

approximately \$6.1 million. All relief sought in the asbestos cases is monetary in nature. To date, approximately 50% of the Company's costs related to settlement and defense of asbestos litigation have been covered by its primary insurance. Effective February 14, 2006, the Company entered into a coverage-in-place agreement with its first level excess carriers regarding the coverage to be provided to the Company for asbestos-related claims when the primary insurance is exhausted. The coverage-in-place agreement makes asbestos defense costs and indemnity coverage available to the Company that might otherwise be disputed by the carriers and provides a methodology for the administration of such expenses. Nonetheless, the Company believes it is likely there will be a period within the next three years, prior to the commencement of coverage under this agreement and following exhaustion of the Company's primary insurance coverage, during which the Company will be solely responsible for defense costs and indemnity payments, the duration of which would be subject to the scope of damage awards and settlements paid.

Based on the settlements made to date and the number of claims dismissed or withdrawn for lack of product identification, the Company believes that the relief sought (when specified) does not bear a reasonable relationship to its potential liability. Based upon the Company's experience to date, including the trend in annual defense and settlement costs incurred to date, and other available information (including the availability of excess insurance), the Company does not believe these cases will have a material adverse effect on its financial position and results of operations or cash flows.

Ordinary Course Claims

The Company is subject to other claims and litigation in the ordinary course of business, but does not believe that any such claim or litigation will have a material adverse effect on its financial position and results of operations or cash flows.

10. Segment Information

TriMas groups its operating segments into reportable segments that provide similar products and services. Each operating segment has discrete financial information evaluated regularly by the Company's chief operating decision maker in determining resource allocation and assessing performance. Within these reportable segments, there are no individual products or product families for which reported net sales accounted for more than 10% of the Company's consolidated net sales. See below for more information regarding the types of products and services provided within each reportable segment:

Packaging-Steel and plastic closure caps, drum enclosures, rings and levers and dispensing systems for industrial and consumer markets.

Energy-Metallic and non-metallic industrial sealant products and bolts and fasteners for the petroleum refining, petrochemical and other industrial markets.

Aerospace & Defense-Highly engineered specialty fasteners and screws for the commercial and military aerospace industries and military munitions components for the defense industry.

Engineered Components-High-pressure and low-pressure cylinders for the transportation, storage and dispensing of compressed gases, and natural gas engines, compressors, gas production equipment and chemical pumps engineered at well sites for the oil and gas industry.

Cequent Asia Pacific & Cequent North America-Custom-engineered towing, trailering and electrical products including trailer couplers, winches, jacks, trailer brakes and brake control solutions, lighting accessories and roof racks for the recreational vehicle, agricultural/utility, marine, automotive and commercial trailer markets, functional vehicle accessories and cargo management solutions including vehicle hitches and receivers, sway controls, weight distribution and fifth-wheel hitches, hitch-mounted accessories and other accessory components.

The Company's management uses Adjusted Earnings Before Interest, Taxes, Depreciation and Amortization ("Adjusted EBITDA") as a primary indicator of financial operating performance and as a measure of cash generating capability. Adjusted EBITDA is defined as net income (loss) before cumulative effect of accounting change and before interest, taxes, depreciation, amortization, debt extinguishment costs, non-cash asset and goodwill impairment charges and write-offs and non-cash losses on sale-leaseback of property and equipment.

## 11. Equity Awards

The Company maintains three long-term equity incentive plans, the 2011 TriMas Corporation Omnibus Incentive Compensation Plan, the TriMas Corporation 2006 Long Term Equity Incentive Plan and the TriMas Corporation 2002 Long Term Equity Incentive Plan (collectively the "Plans"). See below for details of awards under the Plans by type.

## Stock Options

The Company did not grant any stock options during the third quarter of 2011. Information related to stock options at September 30, 2011 is as follows:

	Number of Options	Weighted Average Option Price	Average Remaining Contractual Life (Years)	Aggregate Intrinsic Value
Outstanding at January 1, 2011	1,742,086	\$ 10.24		
Granted	17,030	21.55		
Exercised	(443,821)	2.17		
Cancelled	(17,277)	16.40		
Outstanding at September 30, 2011	1,298,018	\$ 13.09	4.9	\$7,353,590

As of September 30, 2011, 854,576 stock options were exercisable under the Plans. In addition, the fair value of options which vested during the nine month periods ended September 30, 2011 and 2010 was \$0.3 million and \$0.2 million, respectively. No options vested during the three month periods ended September 30, 2011 and 2010. As of September 30, 2011, there was approximately \$0.1 million of unrecognized compensation cost related to stock options that is expected to be recorded over a weighted-average period of 0.4 years.

The Company recognized approximately \$0.1 million of stock based compensation expense related to options during each of the three month periods ended September 30, 2011 and 2010, and approximately \$0.2 million during each of the nine month periods ended September 30, 2011 and 2010. The stock-based compensation expense is included in selling, general and administrative expenses in the accompanying statement of operations.

Table of Contents

## TRIMAS CORPORATION

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(unaudited)

## Restricted Shares

During the third quarter of 2011, the Company granted 19,392 restricted shares of its common stock to its non-employee independent directors, which vest one year from date of grant so long as the director and/or Company does not terminate his services prior to the vesting date.

Information related to restricted shares at September 30, 2011 is as follows:

	Number of Unvested Restricted Shares	Weighted Average Grant Date Fair Value	Average Remaining Contractual Life (Years)	Aggregate Intrinsic Value
Outstanding at January 1, 2011	249,218	\$ 6.80		
Granted	232,283	19.44		
Vested	(155,491)	) 5.61		
Cancelled	(1,487)	) 19.86		
Outstanding at September 30, 2011	324,523	\$ 16.35	2.07	\$4,819,163

As of September 30, 2011, there was approximately \$2.9 million of unrecognized compensation cost related to unvested restricted shares that is expected to be recorded over a weighted-average period of 1.5 years.

The Company recognized approximately \$0.8 million and \$0.2 million of stock based compensation expense related to restricted shares during the three month periods ended September 30, 2011 and 2010, respectively, and approximately \$2.4 million and \$0.8 million for nine months ended September 30, 2011 and 2010, respectively. The stock-based compensation expense is included in selling, general and administrative expenses in the accompanying statement of operations.

## 12. Earnings per Share

Net earnings are divided by the weighted average number of shares outstanding during the period to calculate basic earnings per share. Diluted earnings per share are calculated to give effect to stock options and other stock-based awards. The calculation of diluted earnings per share included 156,213 and 132,461 restricted shares for the three months ended September 30, 2011 and 2010, respectively, and 114,911 and 111,187 restricted shares for the nine months ended September 30, 2011 and 2010, respectively. The calculation of diluted earnings per share also included 327,185 and 552,420 options to purchase shares of common stock for the three months ended September 30, 2011 and 2010, respectively, and 438,803 and 538,149 for the nine months ended September 30, 2011 and 2010, respectively.

## 13. Defined Benefit Plans

Net periodic pension and postretirement benefit costs for the Company's defined benefit pension plans and postretirement benefit plans cover foreign employees, union hourly employees and certain salaried employees. The components of net periodic pension and postretirement benefit costs for the three and nine months ended September 30, 2011 and 2010 are as follows:

	Pension Plans				Other Postretirement Benefits			
	Three months ended September 30,		Nine months ended September 30,		Three months ended September 30,		Nine months ended September 30,	
	2011	2010	2011	2010	2011	2010	2011	2010
	(dollars in thousands)							
Service costs	\$160	\$150	\$480	\$460	\$—	\$—	\$—	\$—
Interest costs	400	400	1,200	1,190	10	20	30	50
Expected return on plan assets	(400 )	(400 )	(1,210 )	(1,190 )	—	—	—	—
Amortization of prior service cost	—	—	10	10	(70 )	(70 )	(200 )	(200 )
Amortization of net loss (gain)	180	110	530	320	(20 )	(10 )	(60 )	(40 )
Net periodic benefit cost	\$340	\$260	\$1,010	\$790	\$(80 )	\$(60 )	\$(230 )	\$(190 )

The Company contributed approximately \$0.8 million and \$1.8 million to its defined benefit pension plans during the three and nine months ended September 30, 2011, respectively. The Company expects to contribute approximately \$2.3 million to its defined benefit pension plans for the full year 2011.

## 14. New Accounting Pronouncements

In May 2011, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2011-4, "Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs." ASU 2011-4 amends guidance listed under Accounting Standards Codification ("ASC") Topic 820, "Fair Value Measurement," and represents the converged guidance of the FASB and the International Accounting Standards Board on fair value measurement. The guidance clarifies how a principal market is determined, addresses the fair value measurement of instruments with offsetting market or counterparty credit risks, addresses the concept of valuation premise and highest and best use, extends the prohibition on blockage factors to all three levels of the fair value hierarchy and requires additional disclosures. ASU 2011-4 will be effective prospectively for interim and annual periods beginning after December 15, 2011. The Company is currently evaluating the requirements of ASU 2011-4 and has not yet determined its impact on the consolidated financial statements.

In June 2011, the FASB issued ASU 2011-5, "Presentation of Comprehensive Income." ASU 2011-5 amends guidance listed under ASC Topic 220, "Comprehensive Income" and eliminates the option to present components of other comprehensive income as part of the statement of shareholders' equity. Under the amendments to ASC Topic 220, an entity has the option to present the total of comprehensive income, the components of net income and the components of other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. The amendments also require an entity to present on the face of the financial statements the reclassification adjustments for items that are reclassified from other comprehensive income to net income. ASU 2011-5 will be effective retrospectively for fiscal years, and interim periods within those years,

beginning after December 15, 2011. The adoption of ASU 2011-5 will only affect the presentation of the Company's consolidated financial statements.

Table of Contents

TRIMAS CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(unaudited)

In September 2011, the FASB issued ASU 2011-8, "Intangibles - Goodwill and Other (Topic 350): Testing for Goodwill Impairment." ASU 2011-8 gives companies the option to perform a qualitative assessment to determine whether it is more likely than not (a likelihood of more than 50%) that the fair value of a reporting unit is less than its carrying amount, and in some cases, skip the two-step impairment test. The objective of the revised standard is to simplify how an entity tests goodwill for impairment and to reduce the cost and complexity of the annual goodwill impairment test. ASU 2011-8 will be effective for fiscal years beginning after December 15, 2011, with early adoption permitted. The Company is currently evaluating this guidance and the potential impact of the revised standard on the Company's annual goodwill impairment test.

15. Supplemental Guarantor Condensed Consolidating Financial Information

Under an indenture dated December 29, 2009, TriMas Corporation, the parent company ("Parent"), issued 9<sup>3</sup>/<sub>4</sub>% senior secured notes due 2017 in a total principal amount of \$250.0 million (face value). The outstanding Notes are guaranteed by substantially all of the Company's domestic subsidiaries ("Guarantor Subsidiaries"). All of the Guarantor Subsidiaries are 100% owned by the Parent and their guarantee is full, unconditional, joint and several. The Company's non-domestic subsidiaries and TSPC, Inc. have not guaranteed the Senior Notes ("Non-Guarantor Subsidiaries"). The Guarantor Subsidiaries have also guaranteed amounts outstanding under the Company's Credit Facility.

The accompanying supplemental guarantor condensed, consolidating financial information is presented using the equity method of accounting for all periods presented. Under this method, investments in subsidiaries are recorded at cost and adjusted for the Company's share in the subsidiaries' cumulative results of operations, capital contributions and distributions and other changes in equity. Elimination entries relate primarily to the elimination of investments in subsidiaries and associated intercompany balances and transactions.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis of our financial condition contains forward-looking statements regarding industry outlook and our expectations regarding the performance of our business. These forward-looking statements are subject to numerous risks and uncertainties, including, but not limited to, the risks and uncertainties described under the heading "Forward Looking Statements," at the beginning of this report. Our actual results may differ materially from those contained in or implied by any forward-looking statements. You should read the following discussion together with the Company's reports on file with the Securities and Exchange Commission.

Introduction

We are an industrial manufacturer and distributor of highly engineered products serving focused markets in a diverse range of commercial, industrial and consumer applications. We have six reportable segments: Packaging, Energy, Aerospace & Defense, Engineered Components, Cequent Asia Pacific and Cequent North America.

**Key Factors and Risks Affecting Our Reported Results.** Our businesses and results of operations depend upon general economic conditions and we serve some customers in cyclical industries that are highly competitive and themselves significantly impacted by changes in economic conditions. Over the past few years, global economic conditions have cycled through some significant changes, beginning in the fourth quarter of 2008, in which worldwide credit markets and global economic conditions deteriorated significantly, resulting in declines in demand for our products and services. These conditions persisted throughout 2009, resulting in reductions in sales and earnings from comparable prior periods. We experienced generally higher levels of economic activity during 2010, as economic conditions continued to strengthen throughout the year, helping us to generate year-over-year increases in revenue and earnings in all of our reportable segments except Aerospace & Defense. The economic recovery has continued in 2011, and has been one of the main drivers of the continued increase in our sales and profitability levels.

Critical factors affecting our ability to succeed include: our ability to successfully pursue organic growth through product development, cross selling and extending product-line offerings, and our ability to quickly and cost-effectively introduce new products; our ability to acquire and integrate companies or products that will supplement existing product lines, add new distribution channels, expand our geographic coverage or enable us to better absorb overhead costs; our ability to manage our cost structure more efficiently through improved supply base management, internal sourcing and/or purchasing of materials, selective outsourcing and/or purchasing of support functions, working capital management, and greater leverage of our administrative and overhead functions. If we are unable to do any of the foregoing successfully, our financial condition and results of operations could be materially and adversely impacted.

There is some seasonality in the businesses within our Cequent reportable segments, primarily within Cequent North America, where sales of towing and trailering products are generally stronger in the second and third quarters, as trailer original equipment manufacturers ("OEMs"), distributors and retailers acquire product for the spring and summer selling seasons. No other reportable segment experiences significant seasonal fluctuation in its businesses. We do not consider sales order backlog to be a material factor in our business. A growing portion of our sales may be derived from international sources, which exposes us to certain risks, including currency risks.

The demand for some of our products, particularly in our two Cequent reportable segments, is heavily influenced by consumer sentiment. We experienced decreases in sales and earnings in 2008 and 2009 as a result of an uncertain credit market and interest rate environment and rising energy costs, among other things. While we experienced local currency sales increases in both of our Cequent reportable segments in 2010 and the first nine months of 2011 compared to prior recessionary periods, we expect the current end market conditions may remain unstable, primarily for Cequent North America, given continued uncertainties in employment levels and consumer credit availability, both of which significantly impact consumer discretionary spending.

We are sensitive to price movements in our raw materials supply base. Our largest material purchases are for steel, copper, aluminum, polyethylene and other resins and energy. Historically, we have experienced increasing costs of steel and resin and have worked with our suppliers to manage cost pressures and disruptions in supply. We also utilize pricing programs to pass increased steel, copper, aluminum and resin costs to customers. Although we may experience delays in our ability to implement price increases, we have been generally able to recover such increased costs. We may experience disruptions in supply in the future and we may not be able to pass along higher costs associated with

such disruptions to our customers in the form of price increases. We will continue to take actions as necessary to manage risks associated with increasing steel or other raw material costs. However, such increased costs may adversely impact our earnings.

We report shipping and handling expenses associated with our Cequent North America reportable segment's distribution network as an element of selling, general and administrative expenses in our consolidated statement of operations. As such, gross margins for the Cequent North America reportable segment may not be comparable to other companies which include all costs related to their distribution network in cost of sales.

Table of Contents

We have substantial debt, interest and lease payment requirements that may restrict our future operations and impair our ability to meet our obligations and, in a rising interest rate environment, our performance may be adversely affected by our degree of leverage.

**Key Indicators of Performance.** In evaluating our business, our management has historically considered Adjusted EBITDA as a key indicator of financial operating performance and as a measure of cash generating capability. We define Adjusted EBITDA as net income (loss) before cumulative effect of accounting change, interest, taxes, depreciation, amortization, debt extinguishment costs, non-cash asset and goodwill impairment charges and write-offs and non-cash losses on sale-leaseback of property and equipment. Management believed that consideration of Adjusted EBITDA, together with a careful review of our results reported under GAAP, was the best way to analyze our ability to service and/or incur indebtedness, as we have been a highly leveraged company. Thus, the use of Adjusted EBITDA as a key performance measure facilitated operating performance comparisons from period to period and company to company, as it excluded potential differences caused by variations in capital structures (affecting interest expense), tax positions (such as the impact on periods or companies of changes in effective tax rates or net operating losses), the impact of purchase accounting and depreciation and amortization expense. Because Adjusted EBITDA facilitated internal comparisons of our historical operating performance on a more consistent basis, we have also used Adjusted EBITDA for business planning purposes, in measuring our performance relative to that of our competitors and in evaluating acquisition opportunities. In addition, we believe Adjusted EBITDA and similar measures are widely used by investors, securities analysts, ratings agencies and other interested parties as a measure of financial performance and debt-service capabilities.

In light of the significant changes in our business over the past few years, including changes in our senior leadership (new CFO in 2008 and CEO in 2009) as well as the structural and operating changes in our businesses, we believe we are a more competitive company, with a lower fixed cost structure and more focused on productivity and other lean initiatives to drive future profitability and cash flows. We have generated significant cash from operations during the last two years, which has enabled us to reduce our debt levels. Given these changes, and the resulting improvement in earnings quality, management believes we are evolving from a highly leveraged company that, for comparative purposes, relied on Adjusted EBITDA as a key indicator of performance, to one that can rely and report on GAAP-based results. As the Company continues to grow its earnings base and decrease its debt levels, investors and analysts are placing TriMas in comparable company groupings that rely primarily on GAAP-based metrics for valuation and presentation purposes. Thus, while Adjusted EBITDA remains an important indicator of performance, by the end of 2011, we intend to rely on the GAAP-based metrics of operating profit and cash flow from operations as they relate to our key metrics of earnings and liquidity, respectively.

Our use of Adjusted EBITDA has limitations as an analytical tool, and you should not consider it in isolation or as a substitute for analysis of our results as reported under GAAP. Some of these limitations are:

- it does not reflect our cash expenditures for capital equipment or other contractual commitments; although depreciation, amortization and asset impairment charges and write-offs are non-cash charges, the assets being depreciated, amortized or written off may have to be replaced in the future, and Adjusted EBITDA does not reflect cash capital expenditure requirements for such replacements;
- it does not reflect changes in, or cash requirements for, our working capital needs;
- it does not reflect the significant interest expense or the cash requirements necessary to service interest or principal payments on our indebtedness;
- it does not reflect certain tax payments that may represent a reduction in cash available to us;
- it includes amounts resulting from matters we consider not to be indicative of underlying performance of our fundamental business operations; and
- other companies, including companies in our industry, may calculate these measures differently and as the number of differences in the way two different companies calculate these measures increases, the degree of their usefulness as a comparative measure correspondingly decreases.

Because of these limitations, Adjusted EBITDA should not be considered as a measure of discretionary cash available to us to invest in our growth. We compensate for these limitations by relying primarily on our GAAP results and using Adjusted EBITDA only supplementally. We carefully review our operating profit margins (operating profit as a

percentage of net sales) at a reportable segment level, which are discussed in detail in our year-to-year comparison of operating results.

Table of Contents

The following is a reconciliation of our net income to Adjusted EBITDA and cash flows used for operating activities for the three and nine months ended September 30, 2011 and 2010:

Table of Contents

Results of Operations

The principal factors impacting us during the three months ended September 30, 2011, compared with the three months ended September 30, 2010, were:

- the impact of the continued upturn in economic conditions in the third quarter of 2011 compared to the third quarter of 2010, contributing to increased net sales in all six of our reportable segments;
- market share gains and new product introductions in the third quarter of 2011, primarily within our Engineered Components, Energy and Cequent North America reportable segments;
- the impact of our South Texas Bolt & Fitting and Innovative Molding acquisitions in our Energy and Packaging reportable segments, respectively;
- the favorable impact of currency exchange, as our reported results were favorably impacted by stronger foreign currencies, primarily in our Packaging and Cequent Asia Pacific reportable segments; and
- a mix shift of the gross and operating profit generated by and within our reportable segments, slightly lowering total Company margins as a result of the significant growth in our Energy and Engineered Components reportable segments compared to the quarter-over-quarter change in margins in the other reportable segments.

Three Months Ended September 30, 2011 Compared with Three Months Ended September 30, 2010

Overall, net sales increased approximately \$39.9 million, or approximately 16.8%, to \$277.7 million for the three months ended September 30, 2011, as compared with \$237.7 million in the three months ended September 30, 2010. During the third quarter of 2011, net sales increased in each of our six reportable segments. Of the sales increase, approximately \$6.2 million was due to our Innovative Molding acquisition in our Packaging reportable segment in the third quarter of 2011 and \$5.7 million was due to our South Texas Bolt & Fitting acquisition in our Energy reportable segment in the fourth quarter of 2010. In addition, net sales were favorably impacted by approximately \$4.9 million as a result of currency exchange, as our reported results in U.S. dollars were positively impacted by stronger foreign currencies, primarily in our Packaging and Cequent Asia Pacific reportable segments. The remainder of the increase in sales levels between years was due to the upturn in the economic conditions compared to the third quarter of 2010, generally aiding sales in all of our reportable segments, our continued market share gains, primarily in the Energy, Engineered Components and Cequent North America reportable segments, our expansion in international markets, primarily in our Energy and Cequent Asia Pacific reportable segments and our new product introductions and related growth, primarily in our Engineered Components reportable segment.

Gross profit margin (gross profit as a percentage of sales) approximated 29.5% and 30.3% for the three months ended September 30, 2011 and 2010, respectively. Gross profit was favorably impacted by approximately \$1.7 million as a result of currency exchange, as our reported results in U.S. dollars were positively impacted by stronger foreign currencies. The decrease in profit margin is attributed primarily to a mix shift, as our two lowest gross profit margin reportable segments, Energy and Engineered Components, encompassed a greater percentage of total Company sales following their significant increases in sales in the third quarter of 2011 over third quarter 2010. In addition, our third quarter 2011 gross profit margin was negatively impacted by purchase accounting adjustments related to step-up in value and subsequent amortization of inventory and intangible assets and planned costs incurred and manufacturing inefficiencies related to the move to a new manufacturing facility for our Innovative Molding acquisition. While we continue to generate significant savings from capital investments, productivity projects and lean initiatives, particularly in our Packaging and Engineered Components reportable segments, the savings from those projects has primarily been offset by economic cost increases and our investment in growth initiatives, as our gross profit margins, particularly in our Energy reportable segment, are lower when we open facilities in new geographies and aggressively price these products to gain market penetration plus don't gain the operating leverage on our fixed costs until projected sales volumes are achieved in the future.

Operating profit margin (operating profit as a percentage of sales) approximated 12.9% and 13.3% for the three months ended September 30, 2011 and 2010, respectively. Operating profit increased approximately \$4.1 million, or 12.8%, to \$35.8 million for the three months ended September 30, 2011, from \$31.7 million for the three months ended September 30, 2010, primarily as a result of the higher sales levels. Operating profit was also favorably

impacted by approximately \$1.0 million as a result of currency exchange, as our reported results in U.S. dollars were positively impacted by stronger foreign currencies. Our operating margins declined, primarily due to the sales mix shift between our reportable segments, with our lower margin reportable segments comprising a larger percentage of total sales, which more than offset the 30 basis point improvement in total Company selling, general and administrative expenses as a percentage of sales.

Table of Contents

Interest expense decreased approximately \$1.8 million, to \$10.7 million, for the three months ended September 30, 2011, as compared to \$12.6 million for the three months ended September 30, 2010. The decrease in interest expense was primarily the result of a decrease in our effective weighted average interest rate on variable rate U.S. borrowings, including our accounts receivable facility, to approximately 4.0% for the three months ended September 30, 2011, from 5.6% for the three months ended September 30, 2010. During the third quarter of 2010, we recorded approximately \$0.6 million of interest expense related to changes in the fair value of our interest rate swaps. There were no amounts incurred during the third quarter of 2011 as the swap agreements had expired. Partially offsetting these reductions in interest expense was an increase in our weighted-average U.S. Credit Facility and accounts receivable facility borrowings to approximately \$300.6 million in the three months ended September 30, 2011, from approximately \$272.0 million in the three months ended September 30, 2010, primarily as a result of funding our Innovative Molding acquisition and higher capital expenditures in the third quarter of 2011 than the third quarter of 2010.

Other expense, net decreased approximately \$0.7 million due to higher gains in transactions denominated in foreign currencies for the three months ended September 30, 2011 than during the three months ended September 30, 2010. The effective income tax rates for the three months ended September 30, 2011 and 2010 were 33.7% and 37.0%, respectively. For the three months ended September 30, 2011, we recorded the favorable impact of certain tax credits that we now expect to realize and benefited from an overall lower foreign effective tax rate than for the three months ended September 30, 2010.

Net income from continuing operations increased by \$5.0 million to \$17.0 million for the three months ended September 30, 2011 from \$12.0 million for the three months ended September 30, 2010 primarily as a result of higher sales levels year-over-year, which helped to generate \$4.1 million increased operating profit. The \$4.1 million increase in operating profit, plus the \$1.8 million reduction in interest expense, primarily due to lower weighted-average interest rates on U.S. variable-rate borrowings, plus the \$0.7 million higher gains on transactions denominated in foreign currencies, less the \$1.6 million increase in income taxes, primarily related to the higher earnings in the third quarter of 2011 compared to the third quarter of 2010, all resulted in the increase in net income in the third quarter of 2011 compared to the third quarter of 2010.

Adjusted EBITDA margin from continuing operations (Adjusted EBITDA as a percentage of sales) approximated 16.6% and 16.9% for the three months ended September 30, 2011 and 2010, respectively. Adjusted EBITDA from continuing operations increased approximately \$5.9 million for the three months ended September 30, 2011, compared to the three months ended September 30, 2010, consistent with the change in operating profit between years after consideration of approximately \$1.0 million higher depreciation and amortization expense and \$0.7 million higher gains on transactions denominated in foreign currencies in the third quarter of 2011 than the third quarter of 2010.

See below for a discussion of operating results by segment.

**Packaging.** Net sales increased approximately \$1.6 million, or 3.6%, to \$46.1 million in the three months ended September 30, 2011, as compared to \$44.5 million in the three months ended September 30, 2010. Sales increased approximately \$6.2 million as a result of the acquisition of Innovative Molding in August 2011. In addition, sales increased by approximately \$1.3 million due to favorable currency exchange, as our reported results in U.S. dollars were positively impacted as a result of the weaker U.S. dollar relative to foreign currencies. Sales of our industrial closures, rings and levers decreased by approximately \$4.1 million in the three months ended September 30, 2011 compared to the three months ended September 30, 2010, and sales of our specialty systems products decreased by approximately \$1.8 million in the three months ended September 30, 2011 compared to the three months ended September 30, 2010, with decreases in both categories primarily due to customer actions to actively manage down inventory levels in response to the current economic softness and uncertain end-market demand. In addition, specialty systems decreased as a result of fewer promotional programs launched in the third quarter of 2011 than the third quarter of 2010.

Packaging's gross profit decreased approximately \$1.1 million to \$17.2 million, or 37.2% of sales, in the three months ended September 30, 2011, as compared to \$18.3 million, or 41.0% of sales, in the three months ended September 30, 2010. Although the acquisition of Innovative Molding added approximately \$6.2 million of sales in the quarter, it only

contributed approximately \$0.4 million of gross profit, with the low margin primarily due to purchase accounting adjustments related to step-up in value and subsequent amortization of inventory and intangible assets and planned costs incurred and manufacturing inefficiencies related to the move to a new manufacturing facility. The inclusion of Innovative Molding's results of operations, including the purchase accounting and move costs, drove a 480 basis point drop in gross profit margin for this segment. After consideration of changes in gross profit related to the Innovative Molding acquisition, gross profit margins on the legacy business increased 100 basis points despite the reduction in sales levels, as the savings and efficiencies generated by our continued capital investments, productivity projects and lean initiatives within this segment more than offset the lower fixed cost absorption associated with the lower industrial and specialty product sales levels as well as higher material costs incurred in the third quarter of 2011. Packaging's selling, general and administrative expenses increased approximately \$1.9 million to \$6.9 million, or 14.9% of sales, in the three months ended September 30, 2011, as compared to \$5.0 million, or 11.3% of sales, in the three months ended September 30, 2010. The increase is primarily related to the incremental operating costs for Innovative Molding in addition to incremental travel, legal, finance and other diligence costs associated with consummating the deal. In addition, we have increased our sales-related and technical resources in recent months in support our sales growth initiatives.

Table of Contents

Packaging's operating profit decreased approximately \$2.9 million to \$10.2 million, or 22.2% of sales, in the three months ended September 30, 2011, as compared to \$13.1 million, or 29.5% of sales, in three months ended September 30, 2010, primarily due to the purchase accounting, move-related and incremental selling, general and administrative costs associated with the acquisition of Innovative Molding. In addition, operating profit decreased within our legacy business due to declines in sales levels between years, higher material costs and higher selling expenses related to our sales growth efforts, which were partially offset by our continued capital, productivity and lean initiatives which continue to generate operating savings.

Packaging's Adjusted EBITDA decreased approximately \$2.1 million to \$14.0 million, or 30.3% of sales, in the three months ended September 30, 2011, as compared to \$16.0 million, or 36.0% of sales, in the three months ended September 30, 2010, consistent with the change in operating profit between years after consideration of \$0.3 million higher depreciation and amortization expense in the third quarter of 2011 than the third quarter of 2010 and \$0.2 million of gains on transactions denominated in foreign currencies incurred in the third quarter of 2011 that didn't occur in the third quarter of 2010.

Energy. Net sales for the three months ended September 30, 2011 increased approximately \$11.0 million, or 34.6%, to \$42.7 million, as compared to \$31.7 million in the three months ended September 30, 2010. Of this increase, approximately \$5.7 million is due to the acquisition of the legacy South Texas Bolt & Fitting business in the fourth quarter of 2010, and approximately \$2.0 million is due to an increase in our market share of bolts, as certain existing customers continue to award us additional business due to our enhanced specialty bolt manufacturing capabilities as a result of the South Texas Bolt acquisition. In addition, we generated approximately \$1.2 million in incremental sales from our new Midland, MI, Salt Lake City, UT, Edmonton, Canada and Grimsby, UK branch facilities. The remainder of the increase is primarily due to increased levels of turn-around activity at refineries and petrochemical plants and increased sales demand from the chemical industry, as customers continue to perform maintenance work and new programs deferred from 2010 that require our replacement and specialty gaskets and bolts.

Gross profit within Energy increased approximately \$2.1 million to \$11.0 million, or 25.8% of sales, in the three months ended September 30, 2011, as compared to \$8.9 million, or 28.1% of sales, in the three months ended September 30, 2010. Gross profit margins declined year-over-year mainly due to a less favorable sales mix, as standard gaskets and bolts, which return lower margins than highly-engineered gaskets and bolts, comprised a larger percentage of net sales in the third quarter of 2011 than the third quarter of 2010. In addition, as this segment continues to add new branch locations to grow its sales base, we have experienced a sales mix shift. Our new branch sales, which have lower margins due to aggressively pricing products to penetrate new markets in addition to incurring launch costs, including employee training of manufacturing processes, encompass a larger percentage of the total sales in the third quarter of 2011 than in the third quarter of 2010.

Selling, general and administrative expenses within Energy increased approximately \$0.6 million to \$6.5 million, or 15.1% of sales, in the three months ended September 30, 2011, as compared to \$5.8 million, or 18.4% of sales, in the three months ended September 30, 2010, as selling, general and administrative expenses increased in support of our branch facility growth initiatives. However, selling, general and administrative expenses decreased as a percentage of sales due to the continued fixed cost reductions implemented throughout 2010 and 2011 and operating leverage gained on the higher sales levels.

Overall, operating profit within Energy increased approximately \$1.5 million to \$4.6 million, or 10.7% of sales, in the three months ended September 30, 2011, as compared to \$3.1 million, or 9.8% of sales, in the three months ended September 30, 2010, due principally to the leverage gained by higher sales levels, which was partially offset by a less favorable product mix, continued increases in sales in our new branches, which typically have lower margins as they penetrate new markets, and higher selling, general and administrative expenses in support of our growth initiatives. Energy's Adjusted EBITDA increased \$1.5 million to \$5.0 million, or 11.7% of sales, in the three months ended September 30, 2011, as compared to \$3.5 million, or 11.2% of sales, in the three months ended September 30, 2010, consistent with the increase in operating profit between years.

Aerospace & Defense. Net sales for the three months ended September 30, 2011 increased approximately \$1.2 million, or 6.1%, to \$20.3 million, as compared to \$19.2 million in the three months ended September 30, 2010. Sales in our aerospace business increased approximately \$5.0 million, primarily due to higher sales levels in our blind bolt

and temporary fastener product lines to our distribution customers, continuing the trend that began in the third quarter of 2010 of higher order activity in the aerospace bolt and fastener supply chain. Sales in our defense business decreased approximately \$3.8 million, primarily due to decreased activity associated with managing the relocation to and establishment of the new defense facility.

Gross profit within Aerospace & Defense increased approximately \$1.6 million to \$8.3 million, or 40.9% of sales, in the three months ended September 30, 2011, from \$6.8 million, or 35.2% of sales, in the three months ended September 30, 2010, primarily due the increase in sales levels in the aerospace business and a more favorable product sales mix, as the more profitable aerospace business comprised a larger percentage of the gross profit in the third quarter of 2011 than in the third quarter of 2010.

Selling, general and administrative expenses increased approximately \$1.5 million to \$2.9 million, or 14.2% of sales, in the three months ended September 30, 2011, as compared to \$1.4 million, or 7.3% of sales, in the three months ended September 30, 2010. The increase in selling, general and administrative expenses was primarily due to higher costs in the aerospace business for commissions and other costs incurred in support of our growth initiatives and higher legal fee costs within our defense business.

Table of Contents

Operating profit within Aerospace & Defense remained essentially flat at \$5.4 million, or 26.7% of sales, in the three months ended September 30, 2011, as compared to \$5.4 million, or 27.9% of sales, in the three months ended September 30, 2010, as the increase in gross profit due to the higher sales levels between years and more favorable product sales mix in the third quarter of 2011 more than offset the increase in selling, general and administrative expenses.

Aerospace & Defense's Adjusted EBITDA increased approximately \$0.4 million to \$6.1 million, or 30.2% of sales, in the three months ended September 30, 2011, as compared to \$5.8 million, or 30.1% of sales, in the three months ended September 30, 2010, consistent with the increase in operating profit between years after consideration of \$0.3 million higher depreciation expense in the third quarter of 2011 than the third quarter of 2010.

**Engineered Components.** Net sales for the three months ended September 30, 2011 increased approximately \$15.5 million, or 50.7%, to \$46.0 million, as compared to \$30.5 million in the three months ended September 30, 2010. Sales in our industrial cylinder business increased by approximately \$8.2 million. Of this increase, approximately \$3.2 million was due to market share gains, primarily of large high pressure cylinders to existing customers. The remainder of the increase was primarily due to the continued upturn in economic conditions. Sales of slow speed and compressor engines and related products increased by approximately \$7.3 million, as sales of engines and engine parts increased approximately \$4.3 million due to increased drilling activity as compared to the third quarter of 2010. Sales of gas compression products and processing and meter run equipment increased by approximately \$3.0 million, as we continue to introduce new products to add to our well-site content.

Gross profit within Engineered Components increased approximately \$4.9 million to \$10.9 million, or 23.7% of sales, in the three months ended September 30, 2011, from \$6.1 million, or 19.8% of sales, in the three months ended September 30, 2010. Gross profit increased approximately \$3.1 million as a result of the higher sales levels. In addition, both our industrial cylinder and engine businesses significantly increased their gross profit margins compared to the third quarter of 2010. Our industrial cylinder business experienced a more favorable product sales mix, as the growth in sales was mainly in large high pressure cylinders, which have a higher margin than small high pressure cylinders. In addition, this business continues to generate incremental savings and cost reductions from productivity projects related to the asset acquisition from Taylor Wharton in the second quarter of 2010. Our engine business continues to benefit from significant operating leverage, as their sales increased without significant additional fixed cost requirements. In addition, while the engine business experienced a less favorable sales mix in the third quarter of 2011 due to a higher percentage of sales related to lower margin engines than higher margin engines, parts and compression parts, this margin was more than made up by material cost reduction projects and improved productivity as a result of new process automation.

Selling, general and administrative expenses increased approximately \$0.5 million to \$3.2 million, or 7.0% of sales, in the three months ended September 30, 2011, as compared to \$2.7 million, or 9.0% of sales, in the three months ended September 30, 2010, primarily as a result of increased sales and promotional spending in support of our sales growth projects. However, selling, general and administrative expenses decreased as a percentage of sales due to the continued fixed cost reductions implemented throughout 2010 and 2011 and operating leverage gained on the higher sales levels.

Operating profit within Engineered Components increased \$4.5 million to approximately \$7.7 million, or 16.8% of sales, in the three months ended September 30, 2011, as compared to operating profit of \$3.2 million, or 10.5% of sales, in the three months ended September 30, 2010, primarily due to the higher sales levels between years, higher operating leverage and productivity projects, which were partially offset by higher selling, general and administrative expenses in support of our sales growth initiatives.

Engineered Components' Adjusted EBITDA increased \$4.6 million to \$8.6 million, or 18.6% of sales, in the three months ended September 30, 2011, as compared to \$4.0 million, or 13.1% of sales, in the three months ended September 30, 2010, consistent with the increase in operating profit between years.

**Cequent Asia Pacific.** Net sales increased approximately \$7.7 million, or 42.3%, to \$26.0 million in the three months ended September 30, 2011, as compared to \$18.3 million in the three months ended September 30, 2010. Net sales were favorably impacted by approximately \$3.4 million of currency exchange, as our reported results in U.S. dollars were positively impacted as a result of the weaker U.S. dollar relative to foreign currencies. Excluding the

impact of currency exchange, sales increased approximately \$4.3 million, primarily due to new original equipment customer program business awards.

Cequent Asia Pacific's gross profit increased approximately \$3.2 million to \$7.9 million, or 30.3% of sales, in the three months ended September 30, 2011, from approximately \$4.7 million, or 25.4% of sales, in the three months ended September 30, 2010. Gross profit was favorably impacted by approximately \$1.1 million of currency exchange. Excluding the impact of currency exchange, gross profit increased by approximately \$2.1 million, with \$1.1 million as a result of the higher sales levels between years. The remaining increase in gross profit was primarily as a result of a third quarter 2011 agreement with a customer to reimburse us for start-up costs we previously incurred for a new program and recorded as cost of sales, primarily in the second quarter of 2011.

Selling, general and administrative expenses increased approximately \$0.4 million to \$2.6 million, or 10.0% of sales, in the three months ended September 30, 2011, as compared to \$2.2 million, or 12.1% of sales, in the three months ended September 30, 2010, primarily as a result of currency exchange, as local currency spending levels were consistent year-over-year.

Table of Contents

Cequent Asia Pacific's operating profit increased approximately \$2.8 million to approximately \$5.3 million, or 20.2% of sales, in the three months ended September 30, 2011 as compared to \$2.4 million, or 13.3% of net sales, in the three months ended September 30, 2010. Operating profit was favorably impacted by approximately \$0.7 million of currency exchange. Excluding the impact of currency exchange, operating profit increased by \$2.1 million, primarily as a result of the higher sales levels between years and the agreement with a customer to reimburse us for start-up costs previously expensed.

Cequent Asia Pacific's Adjusted EBITDA increased approximately \$3.0 million to \$6.2 million, or 24.0% of sales, for the three months ended September 30, 2011, from \$3.2 million, or 17.7% of sales, for the three months ended September 30, 2010, consistent with the increase in operating profit between years after consideration of \$0.2 million of additional depreciation expense in the third quarter of 2011 compared to the third quarter of 2010.

Cequent North America. Net sales increased approximately \$3.0 million, or 3.2% to \$96.5 million in the three months ended September 30, 2011, as compared to \$93.6 million in the three months ended September 30, 2010, primarily due to year-over-year increases within our retail and industrial channels. Sales in our retail channel increased approximately \$1.2 million in the third quarter of 2011 compared to the third quarter of 2010, primarily due to sales to new customers. Sales within our industrial channel increased approximately \$2.5 million in the third quarter of 2011 compared to the third quarter of 2010, primarily due to new customer gains. Partially offsetting these increases in retail and industrial sales was a reduction in sales to international customers of approximately \$1.0 million in the third quarter of 2011 compared to the third quarter of 2010, primarily due to cautious purchasing by our European customers managing their inventory levels in light of the economic uncertainties.

Cequent North America's gross profit decreased approximately \$0.8 million to \$26.7 million, or 27.6% of sales, in the three months ended September 30, 2011, from approximately \$27.4 million, or 29.3% of sales, in the three months ended September 30, 2010. While we continue to generate additional gross profit via productivity and alternate sourcing initiatives, and via incremental sales as we continue to gain market share and generate new customer wins, the gross profit from higher sales and the savings generated by these productivity initiatives were more than offset by reductions in gross profit due to higher steel and freight costs in the third quarter of 2011 than the third quarter of 2010, as management elected to delay certain additional sales price increases to its customers in response to continued higher steel, copper and freight costs until the fourth quarter of 2011 in order to continue to generate market share gains, primarily in the aftermarket and industrial channels.

Selling, general and administrative expenses increased approximately \$0.7 million to \$17.1 million, or 17.7% of sales, in the three months ended September 30, 2011, as compared to \$16.5 million, or 17.6% of sales, in the three months ended September 30, 2010, primarily as a result of new sales promotions, advertising and other costs that support our sales growth initiatives and higher sales levels in the third quarter of 2011.

Cequent North America's operating profit decreased approximately \$1.4 million to \$9.6 million, or 9.9% of sales, in the three months ended September 30, 2011 as compared to \$11.0 million, or 11.8% of net sales, in the three months ended September 30, 2010, primarily due to reduced gross profit due to higher steel and freight costs, as well as higher selling, general and administrative expenses in support of the higher sales levels and our sales growth initiatives.

Cequent North America's Adjusted EBITDA decreased approximately \$1.8 million to \$12.3 million, or 12.8% of sales, for the three months ended September 30, 2011, from \$14.1 million, or 15.1% of sales, for the three months ended September 30, 2010. After consideration of approximately \$0.1 million of lower depreciation and amortization expense in the three months ended September 30, 2011 compared with the three months ended September 30, 2010, and \$0.1 million higher losses on transactions denominated in foreign currencies in the three months ended September 30, 2011 than the three months ended September 30, 2010, the change in Adjusted EBITDA is consistent with the decrease in operating profit between years.

Corporate Expenses. Corporate expenses included in operating profit and Adjusted EBITDA consist of the following:

	Three months ended September 30,
	2011                      2010
	(in millions)

Edgar Filing: TRIMAS CORP - Form 10-Q

Corporate operating expenses	\$3.3	\$3.0
Employee costs and related benefits	3.7	3.5
Corporate expenses—operating profit	\$7.0	\$6.5
Other, net	\$(0.8)	) \$—
Corporate expenses—Adjusted EBITDA	\$6.2	\$6.5

36

---

Table of Contents

Corporate expenses included in operating profit increased approximately \$0.5 million to \$7.0 million for the three months ended September 30, 2011, from \$6.5 million for the three months ended September 30, 2010. The increase between years is primarily attributed to an increase in third party professional fees, primarily supporting our international growth efforts, and higher employee costs and related benefits, primarily incurred due to increasing our support staff to bring certain competencies, primarily in tax and legal-related functions, in-house rather than outsourcing. Other expense, net decreased by \$0.8 million for the three months ended September 30, 2011, primarily due to increased gains on transactions denominated in foreign currencies between years.

**Discontinued Operations.** The results of discontinued operations consist of our precision tool cutting and specialty fitting lines of business, which we committed to a plan to exit the businesses in the third quarter of 2011, our medical device line of business, which was sold in May 2010, and our property management line of business, which was sold in April 2010. Income from discontinued operations, net of income taxes, was \$1.3 million for the three months ended September 30, 2011, as compared to \$0.8 million for the three months ended September 30, 2010. See Note 2, "Discontinued Operations and Assets Held for Sale," to our consolidated financial statements included in Part I, Item 1 of this report on Form 10-Q.

#### Nine Months Ended September 30, 2011 Compared with Nine Months Ended September 30, 2010

Overall, net sales increased approximately \$134.4 million, or approximately 19.5%, to \$824.3 million for the nine months ended September 30, 2011, as compared with \$690.0 million in the nine months ended September 30, 2010. During the first nine months of 2011, net sales increased in each of our six reportable segments. Of the sales increase, approximately \$30.0 million was due to our South Texas Bolt & Fitting, Taylor-Wharton and Innovative Molding acquisitions. In addition, net sales were favorably impacted by approximately \$14.0 million as a result of currency exchange, as our reported results in U.S. dollars were positively impacted by stronger foreign currencies, primarily in Australia. The remainder of the increase in sales levels between years was due to the upturn in the economic conditions compared to the first nine months of 2010, generally aiding sales in all of our reportable segments, our continued market share gains, primarily in the Engineered Components, Energy and Cequent North America reportable segments, our expansion into new markets, primarily in our Energy and Cequent Asia Pacific reportable segments and our new product introductions and related growth, primarily in our Engineered Components reportable segments.

Gross profit margin (gross profit as a percentage of sales) approximated 29.4% and 30.3% for the nine months ended September 30, 2011 and 2010, respectively. The decrease in profit margin is attributed primarily to a mix shift, as the reportable segments with lower gross profit margins, Engineered Components and Energy, encompassed a greater percentage of total Company sales following their significant increases in sales in the first nine months of 2011 over the first nine months of 2010 compared to the other reportable segments. While we continue to generate significant savings from capital investments, productivity projects and lean initiatives, the savings from those projects has primarily been offset by economic cost increases and our investment in growth initiatives, as our gross profit margins, particularly in our Energy reportable segment, are lower when we open facilities in new geographies and aggressively price these products to gain market penetration plus don't gain the operating leverage on our fixed costs until projected sales volumes are achieved in the future.

Operating profit margin (operating profit as a percentage of sales) approximated 12.7% and 13.1% for the nine months ended September 30, 2011 and 2010, respectively. Operating profit increased approximately \$14.2 million, or 15.7%, to \$104.9 million for the nine months ended September 30, 2011, from \$90.7 million for the nine months ended September 30, 2010, primarily as a result of the higher sales levels. Our operating margins declined, primarily due to the unfavorable sales mix shift between our reportable segments, with our lower margin reportable segments comprising a larger percentage of total Company sales, which more than offset the 40 basis point improvement in total Company selling, general and administrative expenses as a percentage of sales.

Interest expense decreased approximately \$5.4 million, to \$34.4 million, for the nine months ended September 30, 2011, compared to \$39.8 million for the nine months ended September 30, 2010. The primary reason for the decline in interest expense is related to interest expense recorded for changes in the fair value of interest rate swaps, for which we recorded approximately \$0.4 million of interest expense during the nine months ended September 30, 2011,

compared to \$3.5 million during the nine months ended September 30, 2010. In addition, we recognized a decrease in interest expense due to a decrease in our effective weighted average interest rate on credit agreement and accounts receivable facility borrowings to approximately 4.8%, from 5.5%, for the nine months ended September 30, 2011 and 2010, respectively. Partially offsetting these reductions was an increase in our weighted-average Credit Facility and accounts receivable facility borrowings to approximately \$296.5 million in the nine months ended September 30, 2011, from approximately \$287.1 million in the nine months ended September 30, 2010.

Debt extinguishment costs of approximately \$4.0 million were incurred related to the refinance of our U.S. bank debt in the nine months ended September 30, 2011. No such costs were incurred during the nine months ended September 30, 2010.

During the nine months ended September 30, 2010, we recognized an approximate \$0.4 million gain on a bargain purchase associated with the asset acquisition in our industrial cylinder business. There was no bargain purchase during the nine months ended September 30, 2011.

Table of Contents

Other expense, net remained relatively flat at \$1.2 million for each of the nine months ended September 30, 2011 and 2010. During the nine months ended September 30, 2011, we incurred approximately \$1.0 million of expense attributable to a reduction of an indemnification asset related to uncertain tax positions. This increase in expense was offset by an approximately \$1.0 million change in gains and losses in transactions denominated in foreign currencies, as we realized \$0.1 million of gains on such transactions in the nine months ended September 30, 2011, while recorded losses of \$0.9 million on such transactions in the nine months ended September 30, 2010.

The effective income tax rate for the nine months ended September 30, 2011 and 2010 was 33.2% and 37.5%, respectively. During the first nine months of 2011, the Company recorded a net tax benefit of approximately \$1.0 million primarily related to a change in an uncertain tax position reserve for which the statute of limitations expired, as well as certain tax credits that the Company now expects to realize. During the first nine months of 2010, the Company recorded a tax charge of approximately \$1.4 million related to certain Subpart F exceptions under U.S. tax legislation that had expired in the first quarter of 2010.

Net income from continuing operations increased by \$12.4 million to \$43.7 million for the nine months ended September 30, 2011 from \$31.3 million for the nine months ended September 30, 2010 primarily as a result of higher sales levels year-over-year, which helped to generate \$14.2 million increased operating profit. The \$14.2 million increase in operating profit, plus the \$5.4 million reduction in interest expense, primarily due to less interest expense recorded on changes in the fair value of our interest rate swaps, less the \$4.0 million charge in the first nine months of 2011 for debt extinguishment costs incurred in connection with our U.S. bank debt refinancing, less the \$0.4 million bargain purchase gain on the industrial cylinder business acquisition in the first nine months of 2010, less the \$2.9 million increase in income taxes, primarily related to higher income levels in the first nine months of 2011 compared to the first nine months of 2010, all resulted in the increase in net income in the first nine months of 2011 compared to the first nine months of 2010.

Adjusted EBITDA margin from continuing operations (Adjusted EBITDA as a percentage of sales) approximated 16.0% and 16.9% for the nine months ended September 30, 2011 and 2010, respectively. Adjusted EBITDA from continuing operations increased approximately \$15.4 million for the nine months ended September 30, 2011, compared to the nine months ended September 30, 2010. After consideration of the \$1.0 million of expense attributable to a reduction of an indemnification asset related to uncertain tax positions in the first nine months of 2011, the \$0.4 million gain on bargain purchase related to the asset acquisition in our industrial cylinder business in the first half of 2010, the \$0.1 million gains on transactions denominated in foreign currencies in the first nine months of 2011 compared to \$0.9 million of losses on transactions denominated in foreign currencies in the first nine months of 2010 and \$1.5 million higher depreciation and amortization expense in the first nine months of 2011 compared to the first nine months of 2010, the change in Adjusted EBITDA is consistent with the change in operating profit between years.

See below for a discussion of operating results by segment.

**Packaging.** Net sales increased approximately \$4.3 million, or 3.2%, to \$137.9 million in the nine months ended September 30, 2011, as compared to \$133.6 million in the nine months ended September 30, 2010. Sales increased approximately \$6.2 million as a result of the acquisition of Innovative Molding in August 2011. In addition, sales increased by approximately \$3.8 million due to favorable currency exchange, as our reported results in U.S. dollars were positively impacted as a result of the weaker U.S. dollar relative to foreign currencies. Sales of our industrial closures, rings and levers increased by approximately \$2.3 million in the nine months ended September 30, 2011 compared to the nine months ended September 30, 2010, primarily as a result of market share gains and the general economic recovery in 2011, primarily in the first half of 2011. Sales of our specialty dispensing products decreased approximately \$8.0 million in the nine months ended September 30, 2011 compared to the nine months ended September 30, 2010, primarily due to approximately \$4.9 million of swine flu-related product sales during the pandemic in 2010 and a pipeline fill of new product introductions at two significant personal care customers in 2010, both of which did not recur in the first nine months of 2011.

Packaging's gross profit increased approximately \$2.3 million to \$56.3 million, or 40.9% of sales, in the nine months ended September 30, 2011, as compared to \$54.1 million, or 40.5% of sales, in the nine months ended September 30,

2010. Although the acquisition of Innovative Molding added approximately \$6.2 million of sales in 2011, it only contributed approximately \$0.4 million of gross profit, with the low margin primarily due to purchase accounting adjustments related to step-up in value and subsequent amortization of inventory and intangible assets and related to planned costs incurred and manufacturing inefficiencies related to the move to a new manufacturing facility. The inclusion of Innovative Molding's results of operations, including the purchase accounting and move costs, drove a 160 basis point drop in gross profit margin for this segment. After consideration of changes in gross profit related to the Innovative Molding acquisition, gross profit increased \$1.9 million, primarily driven by favorable currency exchange of \$1.8 million. This segment was able to hold gross profit dollars essentially flat in its legacy business despite a \$5.7 million reduction in legacy sales levels after consideration of currency exchange, equating to almost a 200 basis point improvement in gross profit margins. This margin improvement was due to the continued savings and efficiencies generated by our continued capital investments, productivity projects and lean initiatives.

Table of Contents

Packaging's selling, general and administrative expenses increased approximately \$4.3 million to \$19.2 million, or 13.9% of sales, in the nine months ended September 30, 2011, as compared to \$14.9 million, or 11.1% of sales, in the nine months ended September 30, 2010. The increase is attributable to the increase in sales-related and technical resources, travel costs and sales promotions, all of which support our sales growth initiatives, and due to the incremental operating, diligence and other transaction costs associated with Innovative Molding.

Packaging's operating profit decreased \$1.3 million to \$37.1 million, or 26.9% of sales, in the nine months ended September 30, 2011, as compared to \$38.5 million, or 28.8% of sales, in nine months ended September 30, 2010, as the increases in gross profit generated via the capital, productivity and lean projects and favorable currency exchange were more than offset by the operating profit losses associated with lower legacy business sales levels increases, higher spending levels within selling, general and administrative expenses in support of our growth initiatives, and costs incurred associated with the acquisition of Innovative Molding. In addition, this segment recorded losses on dispositions of fixed assets of \$0.7 million in the first nine months of 2010 that did not recur in the first nine months of 2011.

Packaging's Adjusted EBITDA decreased approximately \$0.3 million to \$47.1 million, or 34.2% of sales, in the nine months ended September 30, 2011, as compared to \$47.4 million, or 35.4% of sales, in the nine months ended September 30, 2010, consistent with the change in operating profit between years after consideration of \$0.5 million of losses on transactions denominated in foreign currencies in the first nine months of 2010 compared to \$0.1 million of gains on transactions denominated in foreign currencies in the first nine months of 2011, and \$0.2 million lower depreciation expense in the first nine months of 2011 compared to the first nine months of 2010.

Energy. Net sales for the nine months ended September 30, 2011 increased approximately \$31.4 million, or 33.3%, to \$125.8 million, as compared to \$94.4 million in the nine months ended September 30, 2010. Of this increase, approximately \$15.6 million is due to the acquisition of South Texas Bolt & Fitting in the fourth quarter of 2010, and approximately \$5.5 million is due to an increase in our market share of bolts, as certain existing customers have awarded us additional business due to our enhanced specialty bolt manufacturing capabilities as a result of the South Texas Bolt acquisition. In addition, approximately \$3.3 million resulted from incremental sales generated by our new Midland, MI, Salt Lake City, UT, Edmonton, Canada and Grimsby, UK branch facilities. Sales also increased by approximately \$0.8 million due to favorable currency exchange, as our reported results in U.S. dollars were positively impacted as a result of the weaker U.S. dollar relative to foreign currencies. The remainder of the increase is primarily due to increased levels of turn-around activity at refineries and petrochemical plants and increased sales demand from the chemical industry, as customers have begun to perform maintenance work and new programs deferred from 2010 that require our replacement and specialty gaskets and bolts.

Gross profit within Energy increased approximately \$7.0 million to \$34.1 million, or 27.1% of sales, in the nine months ended September 30, 2011, as compared to \$27.2 million, or 28.8% of sales, in the nine months ended September 30, 2010. Gross profit margins declined year-over-year mainly due to a sales mix shift. Our new branch sales, which have lower margins due to aggressively pricing products to penetrate new markets in addition to incurring launch costs, including employee training of manufacturing processes, encompass a larger percentage of the total sales in the first nine months of 2011 than in the first nine months of 2010. In addition, this segment experienced a less favorable product sales mix in the first nine months of 2011 than in the first nine months of 2010, as standard gaskets and bolts, which return lower margins than highly-engineered gaskets and bolts, comprised a larger percentage of net sales. Also, gross profit was negatively impacted by the sale of higher-cost inventory in the first nine months of 2011 compared to the first nine months of 2010, primarily due to increases in steel costs.

Selling, general and administrative expenses within Energy increased approximately \$3.5 million to \$19.2 million, or 15.3% of sales, in the nine months ended September 30, 2011, as compared to \$15.7 million, or 16.7% of sales, in the nine months ended September 30, 2010, as selling, general and administrative expenses increased in support of our branch facility growth initiatives. However, selling, general and administrative expenses decreased as a percentage of sales due to the continued fixed cost reductions implemented throughout 2010 and 2011 and operating leverage gained on the higher sales levels.

Overall, operating profit within Energy increased approximately \$3.6 million to \$14.9 million, or 11.9% of sales, in the nine months ended September 30, 2011, as compared to \$11.4 million, or 12.0% of sales, in the nine months ended

September 30, 2010, due principally to the leverage gained by higher sales levels, which was partially offset by an unfavorable mix shift, with the increased new branch sales at lower margins as they penetrate new markets, higher cost inventory sales and higher selling, general and administrative expenses in support of our growth initiatives. Energy's Adjusted EBITDA increased \$3.1 million to \$15.7 million, or 12.5% of sales, in the nine months ended September 30, 2011, as compared to \$12.6 million, or 13.4% of sales, in the nine months ended September 30, 2010. After consideration of a \$1.0 million charge recorded during the nine months ended September 30, 2011 in other expense, net related to the reduction of an indemnification asset related to an uncertain tax position, \$0.7 million higher depreciation and amortization expense in the first nine months of 2011 compared to the first nine months of 2010, primarily related to the South Texas Bolt & Fitting acquisition, and \$0.2 million higher losses on sales denominated in foreign currencies in the first nine months of 2011 compared to the first nine months of 2010, the change in Adjusted EBITDA was consistent with the increase in operating profit between years.

Table of Contents

**Aerospace & Defense.** Net sales for the nine months ended September 30, 2011 increased approximately \$6.7 million, or 12.5%, to \$60.2 million, as compared to \$53.5 million in the nine months ended September 30, 2010. Sales in our aerospace business increased approximately \$11.3 million, primarily due to higher sales levels in our blind bolt and temporary fastener product lines to our distribution customers, continuing the trend that began in the third quarter of 2010 of higher order activity in the aerospace bolt and fastener supply chain. Sales in our defense business decreased approximately \$4.6 million, due to decreases in revenue of approximately \$3.3 million primarily associated with managing the relocation to and establishment of the new defense facility and \$1.3 million of revenues primarily related to the maintenance contracts on the former defense facility which ended in the first quarter of 2010.

Gross profit within Aerospace & Defense increased approximately \$2.7 million to \$22.7 million, or 37.7% of sales, in the nine months ended September 30, 2011, from \$20.0 million, or 37.5% of sales, in the nine months ended September 30, 2010, primarily due to the higher sales levels between years. The defense business experienced a significant reduction in gross profit dollars and margin due to the shift of sales from a completed maintenance contract in 2010 to all sales in 2011 being generated by the lower margin relocation and establishment of the new defense facility program. This decline in gross profit and margin in the defense business was slightly more than offset by an increase in gross profit dollars and margin in the aerospace business, primarily as a result of a more favorable product sales mix, with our composite material products comprising a larger percentage of the net sales.

Selling, general and administrative expenses increased approximately \$1.7 million to \$8.7 million, or 14.4% of sales, in the nine months ended September 30, 2011, as compared to \$7.0 million, or 13.1% of sales, in the nine months ended September 30, 2010, primarily due to higher costs for commissions and other costs incurred in our aerospace business in support of our growth initiatives.

Operating profit within Aerospace & Defense increased approximately \$1.0 million to \$14.0 million, or 23.3% of sales, in the nine months ended September 30, 2011, as compared to \$13.0 million, or 24.4% of sales, in the nine months ended September 30, 2010, as increase in gross profit generated by the aerospace business more than offset the reduction in gross profit in the defense business and higher selling, general and administrative expenses.

Aerospace & Defense's Adjusted EBITDA increased approximately \$1.2 million to \$16.0 million, or 26.6% of sales, in the nine months ended September 30, 2011, as compared to \$14.8 million, or 27.6% of sales, in the nine months ended September 30, 2010, consistent with the increase in operating profit between years after consideration of \$0.2 million higher depreciation expense in the first nine months of 2011 compared to the first nine months of 2010.

**Engineered Components.** Net sales for the nine months ended September 30, 2011 increased approximately \$49.1 million, or 63.1%, to \$126.9 million, as compared to \$77.8 million in the nine months ended September 30, 2010. Sales in our industrial cylinder business increased by approximately \$28.0 million. Of this increase, approximately \$8.2 million was due to our Taylor-Wharton asset acquisition during the second quarter of 2010, approximately \$9.5 million was due to market share gains, primarily of large high pressure cylinders to existing customers, and \$1.1 million was due to new product introductions, primarily related to cellular phone tower and breathing air applications. The remainder of the increase was primarily due to the continued upturn in economic conditions. Sales of slow speed and compressor engines and related products increased by approximately \$21.1 million, as sales of engines and engine parts increased approximately \$12.2 million due to increased drilling activity as compared to the nine months ended September 30, 2010. Sales of gas compression products and processing and meter run equipment increased by approximately \$8.9 million, as we continue to introduce new products to add to our well-site content.

Gross profit within Engineered Components increased approximately \$11.8 million to \$27.4 million, or 21.6% of sales, in the nine months ended September 30, 2011, from \$15.6 million, or 20.1% of sales, in the nine months ended September 30, 2010. Gross profit increased approximately \$9.9 million as a result of the increase in sales levels between years. In addition, we experienced margin expansion in both our industrial cylinder and engine businesses, as their sales increased without significant additional fixed cost requirements.

Selling, general and administrative expenses increased approximately \$1.7 million to \$8.6 million, or 6.7% of sales, in the nine months ended September 30, 2011, as compared to \$6.9 million, or 8.9% of sales, in the nine months ended September 30, 2010, primarily as a result of increased sales and promotional spending in support of our sales growth projects. However, selling, general and administrative expenses decreased as a percentage of sales due to the continued fixed cost reductions implemented throughout 2010 and 2011 and operating leverage gained on the higher

sales levels.

Operating profit within Engineered Components increased \$10.4 million to approximately \$19.0 million, or 15.0% of sales, in the nine months ended September 30, 2011, as compared to operating profit of \$8.6 million, or 11.1% of sales, in the nine months ended September 30, 2010, primarily due to the higher sales levels between years, continued production efficiencies realized and higher operating leverage, all of which were partially offset by higher selling, general and administrative expenses in support of our sales growth initiatives.

40

---

Table of Contents

Engineered Components' Adjusted EBITDA increased \$10.7 million to \$21.6 million, or 17.1% of sales, in the nine months ended September 30, 2011, as compared to \$10.9 million, or 14.1% of sales, in the nine months ended September 30, 2010, consistent with the increase in operating profit between years after consideration of approximately \$0.7 million in additional depreciation expense in the first nine months of 2011 compared to the first nine months of 2010 and the \$0.4 million gain on bargain purchase in the first nine months of 2010, both primarily related to the asset acquisition within our industrial cylinder business.

Cequent Asia Pacific. Net sales increased approximately \$10.4 million, or 18.1%, to \$67.4 million in the nine months ended September 30, 2011, as compared to \$57.0 million in the nine months ended September 30, 2010. Net sales were favorably impacted by approximately \$9.4 million of currency exchange, as our reported results in U.S. dollars were positively impacted as a result of the weaker U.S. dollar relative to foreign currencies. Excluding the impact of currency exchange, sales increased approximately \$1.0 million, as sales increases for new business awards, primarily in Thailand, were more than offset by lower consumer spending levels in Australia compared to the higher levels experienced during the first nine months of 2010, which were boosted by government stimulus incentives, and also due to the December 2010 through January 2011 Queensland, Australia flooding coupled with reduced vehicle availability as a result of the tsunami in Japan.

Cequent Asia Pacific's gross profit increased approximately \$2.4 million to \$17.8 million, or 26.4% of sales, in the nine months ended September 30, 2011, from approximately \$15.4 million, or 27.0% of sales, in the nine months ended September 30, 2010. Gross profit was favorably impacted by approximately \$2.7 million of currency exchange. Excluding the impact of currency exchange, gross profit decreased by \$0.3 million, primarily due to a less favorable product sales mix.

Selling, general and administrative expenses increased approximately \$2.1 million to \$8.0 million, or 11.9% of sales, in the nine months ended September 30, 2011, as compared to \$6.0 million, or 10.4% of sales, in the nine months ended September 30, 2010. Of this increase, approximately \$1.1 million was due to currency exchange. The remaining \$1.0 million increase in selling, general and administrative expenses was primarily in support of our growth initiatives.

Cequent Asia Pacific's operating profit increased approximately \$0.3 million to approximately \$9.7 million, or 14.4% of sales, in the nine months ended September 30, 2011 as compared to \$9.4 million, or 16.5% of net sales, in the nine months ended September 30, 2010. Operating profit was favorably impacted by approximately \$1.4 million of currency exchange. Excluding the impact of currency exchange, operating profit decreased by \$1.1 million, primarily as a result of the less favorable sales mix and higher spending in selling, general and administrative expenses in support of our sales growth initiatives.

Cequent Asia Pacific's Adjusted EBITDA increased approximately \$0.7 million to \$12.2 million, or 18.0% of sales, for the nine months ended September 30, 2011, from \$11.5 million, or 20.1% of sales, for the nine months ended September 30, 2010, consistent with the increase in operating profit between years after consideration of \$0.7 million of additional depreciation expense in the first nine months of 2011 compared to the first nine months of 2010 and \$0.3 million higher losses on transactions denominated in foreign currencies in the first nine months of 2011 compared to the first nine months of 2010.

Cequent North America. Net sales increased approximately \$32.6 million, or 11.9% to \$306.2 million in the nine months ended September 30, 2011, as compared to \$273.6 million in the nine months ended September 30, 2010, primarily due to year-over-year increases within our retail, original equipment, aftermarket and industrial channels, all of which were aided by the economic recovery that began in 2010 and continued through the third quarter of 2011. Sales in our retail channel increased approximately \$14.2 million in the nine months ended September 30, 2011 compared to the nine months ended September 30, 2010, with approximately 40% of the increase related to a one-time stocking order by one significant customer for a new product placement of cargo management products during the first quarter of 2011, 40% of the increase related to product sales to new customers and 20% of the increase related to market share gains at certain of our existing customers to whom we now provide additional products. Sales within our aftermarket channel increased approximately \$8.1 million in the first nine months of 2011 compared to the first nine months of 2010, primarily due to market share gains and new product introductions. Sales in our industrial channel increased approximately \$5.6 million in the first nine months of 2011 compared to the first nine months of 2010,

primarily due to sales to new customers and higher levels of trailer builds, which use our towing, trailer and electrical products. Sales to original equipment manufacturers and suppliers increased approximately \$5.0 million in the nine months ended September 30, 2011 compared to the nine months ended September 30, 2010, primarily due to the full run rate of sales generated from our new product launches throughout 2010.

Cequent North America's gross profit increased approximately \$7.2 million to \$83.7 million, or 27.3% of sales, in the nine months ended September 30, 2011, from approximately \$76.5 million, or 28.0% of sales, in the nine months ended September 30, 2010, primarily due to the increase in sales levels between years and savings generated from continued productivity projects, primarily via negotiated vendor cost reductions and new process automation.

However, gross profit margins declined by 70 basis points, as these increases in gross profit were partially offset by delays of certain sales price increases to customers in response to the higher commodity costs, primarily steel and copper, in order to continue to generate market share gains, primarily in the aftermarket and industrial channels.

Table of Contents

Selling, general and administrative expenses increased approximately \$4.7 million to \$53.0 million, or 17.3% of sales, in the nine months ended September 30, 2011, as compared to \$48.3 million, or 17.7% of sales, in the nine months ended September 30, 2010, primarily as a result of new sales promotions, advertising commissions and other costs previously deferred that support our sales growth initiatives and higher sales levels in the first nine months of 2011. While our spending levels increased in support of the higher sales levels, selling, general and administrative expenses declined by 40 basis points year-over-year as a percentage of sales.

Cequent North America's operating profit increased approximately \$2.5 million to \$30.6 million, or 10.0% of sales, in the nine months ended September 30, 2011 as compared to \$28.2 million, or 10.3% of net sales, in the nine months ended September 30, 2010. The increase in operating profit is due primarily to the higher sales levels and continued productivity projects, which were partially offset by the delay of certain pricing actions to customers in response to higher commodity and freight costs to continue to generate market share gains, and increased selling, general and administrative expenses in support of the higher sales levels and our sales growth initiatives.

Cequent North America's Adjusted EBITDA increased approximately \$1.3 million to \$39.1 million, or 12.8% of sales, for the nine months ended September 30, 2011, from \$37.8 million, or 13.8% of sales, for the nine months ended September 30, 2010. After consideration of approximately \$0.9 million of lower depreciation and amortization expense in the nine months ended September 30, 2011 compared with the nine months ended September 30, 2010 and \$0.1 million higher losses on transactions denominated in foreign currencies in the nine months ended September 30, 2011 than in the nine months ended September 30, 2010, the change in Adjusted EBITDA is consistent with the increase in operating profit between years.

Corporate Expenses. Corporate expenses included in operating profit and Adjusted EBITDA consist of the following:

	Nine months ended September 30,	
	2011	2010
	(in millions)	
Corporate operating expenses	\$8.6	\$7.8
Employee costs and related benefits	11.9	10.6
Corporate expenses—operating profit	\$20.5	\$18.4
Other, net	(0.8	) —
Corporate expenses—Adjusted EBITDA	\$19.7	\$18.4

Corporate expenses included in operating profit increased approximately \$2.1 million to \$20.5 million for the nine months ended September 30, 2011, from \$18.4 million for the nine months ended September 30, 2010. The increase between years is primarily attributed to an increase in third party professional fees, primarily supporting our international growth efforts, and higher employee costs and related benefits, primarily incurred due to increasing our support staff to bring certain competencies, primarily in tax and legal-related functions, in-house to better support our businesses' growth initiatives rather than outsourcing. Other expense, net decreased by \$0.8 million for the nine months ended September 30, 2011, primarily due to gains on transactions denominated in foreign currencies.

Discontinued Operations. The results of discontinued operations consist of our precision tool cutting and specialty fitting lines of business, which we committed to a plan to exit the businesses in the third quarter of 2011, our medical device line of business, which was sold in May 2010, and our property management line of business, which was sold in April 2010. Income from discontinued operations, net of income taxes, was \$3.4 million for the nine months ended September 30, 2011 as compared to \$8.3 million for the nine months ended September 30, 2010. See Note 2, "Discontinued Operations and Assets Held for Sale," to our consolidated financial statements included in Part I, Item 1 of this report on Form 10-Q.

Table of Contents

Liquidity and Capital Resources

Cash Flows

Cash provided by operating activities for the nine months ended September 30, 2011 and 2010 was approximately \$35.6 million and \$61.6 million, respectively. Significant changes in cash flows provided by operating activities and the reasons for such changes are as follows:

For the nine months ended September 30, 2011, the Company generated \$95.2 million of cash, based on the reported net income from operations of \$47.1 million and after considering the effects of non-cash items related to gains and losses on dispositions of property and equipment, depreciation, amortization, compensation, changes in deferred income taxes, debt extinguishment costs and other, net. For the nine months ended September 30, 2010, the Company generated \$78.6 million in cash flows based on the reported net income of \$39.6 million and after considering the effects of similar non-cash items.

Increases in accounts receivable resulted in a use of cash of approximately \$39.1 million and \$31.4 million for the nine month periods ended September 30, 2011 and 2010, respectively. The increase in accounts receivable is due primarily to the increase in year-over-year sales and the timing of those sales within the quarter. Our days sales outstanding of receivables increased slightly to 52 days from 48 days as of September 30, 2011 and 2010, respectively.

For the nine months ended September 30, 2011, we used approximately \$13.5 million of cash for investment in our inventories. Inventory levels increased primarily to support the increased sales volumes. In addition, we made additional opportunistic investments in inventory levels in certain of our businesses in order to gain market share, ensuring we would have availability when our competitors experienced inventory shortages. For the nine months ended September 30, 2010, we used approximately \$3.2 million of cash relative to our investment in inventory. For the nine months ended September 30, 2011, accounts payable and accrued liabilities resulted in a net use of cash of approximately \$4.8 million, as compared to a net source of cash of \$19.3 million for the nine months ended September 30, 2010. The change in cash provided by or used for accounts payable and accrued liabilities is primarily a result of the timing of payments made to suppliers, as the days of accounts payable on hand increased in 2011 as compared to 2010.

Prepaid expenses and other assets resulted in a use of cash of approximately \$2.3 million and \$1.8 million for the nine months ended September 30, 2011 and 2010, respectively, due primarily to additional investments in manufacturing supplies, spare parts and tooling assets, to support our increased sales levels.

Net cash used for investing activities for the nine months ended September 30, 2011 and 2010 was approximately \$49.9 million and \$9.1 million, respectively. During the first nine months of 2011, we paid approximately \$28.6 million for business acquisitions, primarily from paying \$27.0 million for the stock acquisition of Innovative Molding within our Packaging reportable segment. We also incurred approximately \$23.5 million for capital expenditures, which increased over the nine months ended September 30, 2010 levels as we have increased our investment in growth and productivity-related capital projects due to the economic improvements. Cash received from the disposition of assets was approximately \$2.2 million. During the first nine months of 2010, we paid approximately \$12.8 million for business acquisitions, primarily for the asset acquisition within our Norris Cylinder business. We also invested approximately \$11.1 million in capital expenditures. Cash used for the asset purchases in 2010 was partially offset by the sale of our property management line of business, our medical device line of business and other asset dispositions of approximately \$14.7 million.

Net cash used by financing activities was approximately \$21.5 million and \$15.4 million for the nine months ended September 30, 2011 and 2010, respectively. During the second quarter of 2011, we paid \$15.0 million on our term loan per the excess cash flow provisions of our previous credit agreement. Following this payment, in June 2011, we completed the refinance of our U.S. bank debt, repaying the remaining \$233.0 million term loan and borrowing \$225.0 million on the new term loan facility. In addition, during the during the first nine months of 2011, we increased outstanding borrowings on our revolving credit facility by \$5.0 million, and \$0.6 million on our credit facility in Australia. During the first nine months of 2010, we decreased amounts outstanding on our revolving credit facilities

by approximately \$5.7 million and made scheduled repayments under our U.S. and Australian term loans.

Table of Contents

Our Debt and Other Commitments

We are party to a credit facility consisting of a \$110.0 million revolving credit facility and a \$225.0 million term loan facility (collectively, the "Credit Facility"). At September 30, 2011, \$224.4 million was outstanding on the term loan and \$5.0 million was outstanding on the revolving credit facility. The Credit Facility allows issuance of letters of credit, not to exceed \$50.0 million in aggregate, against revolving credit facility commitments.

The Credit Facility also provides for incremental revolving credit facility commitments, not to exceed \$125.0 million, and incremental term loan facility commitments, not to exceed \$200.0 million. Under the Credit Facility, we are also able to issue unsecured indebtedness in connection with permitted acquisitions, as defined, as long as we, on a proforma basis, after giving effect to such acquisition, are in compliance with all applicable financial covenants, as defined.

Under the Credit Facility, if, prior to June 22, 2012, we prepay the term loan (\$225.0 million) using a new term loan facility with lower interest rate margins, then we will be required to pay a 1% premium of the aggregate principal amount prepaid. In addition, we are required to make a prepayment of our term loan facility pursuant to an excess cash flow sweep provision, equal to 50% of the computed amount of excess cash flow generated during the year, as defined. In April 2011, we prepaid \$15.0 million of term loan principal under the excess cash flow sweep provision of the previous credit agreement.

Amounts drawn under our revolving credit facilities fluctuate daily based upon our working capital and other ordinary course needs. Availability under our revolving credit facilities depends upon, among other things, compliance with our credit agreement's financial covenants. Our Credit Facility contains negative and affirmative covenants and other requirements affecting us and our subsidiaries, including among others: restrictions on incurrence of debt (except for permitted acquisitions and subordinated indebtedness), liens, mergers, investments, loans, advances, guarantee obligations, acquisitions, asset dispositions, sale-leaseback transactions, hedging agreements, dividends and other restricted junior payments, stock repurchases, transactions with affiliates, restrictive agreements and amendments to charters, by-laws, and other material documents. The terms of our Credit Facility require us and our subsidiaries to meet certain restrictive financial covenants and ratios computed quarterly, including a leverage ratio (total consolidated indebtedness plus outstanding amounts under the accounts receivable securitization facility over consolidated EBITDA, as defined), interest expense coverage ratio (consolidated EBITDA, as defined, over cash interest expense, as defined) and a capital expenditures covenant. The most restrictive of these financial covenants are the leverage ratio and interest expense coverage ratio. Our permitted leverage ratio under the Credit Facility is 4.00 to 1.00 for July 1, 2011 to March 31, 2012, 3.75 to 1.00 for April 1, 2012 to September 30, 2012, 3.50 to 1.00 for October 1, 2012 to June 30, 2013, 3.25 to 1.00 from July 1, 2013 and thereafter. Our actual leverage ratio was 2.65 to 1.00 at September 30, 2011. Our permitted interest expense coverage ratio under the Credit Facility is 2.50 to 1.00 for July 1, 2011 to March 31, 2012, 2.75 to 1.00 for April 1, 2012 to December 31, 2012, 3.00 to 1.00 for January 1, 2013 and thereafter. Our actual interest expense coverage ratio was 4.04 to 1.00 at September 30, 2011. At September 30, 2011, we were in compliance with our financial covenants.

Table of Contents

The following is a reconciliation of net income, as reported, which is a GAAP measure of our operating results, to Consolidated Bank EBITDA, as defined in our credit agreement, for the twelve months ended September 30, 2011:

	Year Ended December 31, 2010	Less: Nine Months Ended September 30, 2010	Add: Nine Months Ended September 30, 2011	Twelve Months Ended September 30, 2011
	(dollars in thousands)			
Net income, as reported	\$45,270	\$39,580	\$47,110	\$52,800
Bank stipulated adjustments:				
Interest expense, net (as defined)	52,380	40,200	34,370	46,550
Income tax expense <sup>(1)</sup>	21,450	23,580	23,750	21,620

	September 30, 2011 (dollars in thousands)	
Consolidated Bank EBITDA, as defined	\$ 180,080	
Total Consolidated Cash Interest Expense, as defined	44,580	
Actual interest expense ratio	4.04	x
Covenant requirement	2.50	x

- (1) Amount includes tax expense associated with discontinued operations.
- (2) Non-cash expenses resulting from the grant of restricted shares of common stock and common stock options.
- (3) Non-recurring costs and expenses arising from the integration of any business acquired not to exceed \$25,000,000 in the aggregate.
- (4) Costs incurred with refinancing our credit facilities.
- (5) Not to exceed \$10,000,000 in any fiscal year.
- (6) EBITDA from permitted dispositions, as defined.
- (7) EBITDA from permitted acquisitions, as defined.
- (8) Includes \$0.5 million of acquisition deferred purchase price.

In addition to our U.S. bank debt, in Australia, we are party to a debt agreement with a bank in the amount of \$10 million Australian dollars. At September 30, 2011, the balance outstanding under this agreement was approximately \$0.6 million at an interest rate of 6.7%. Borrowings under this arrangement are secured by substantially all the assets of our local business which is also subject to financial and reporting covenants. Financial covenants include a capital adequacy ratio (tangible net worth over total tangible assets) and an interest coverage ratio (EBIT over gross interest cost) and we were in compliance with such covenants at September 30, 2011.

Another important source of liquidity is our accounts receivable facility, under which we have the ability to sell eligible accounts receivable to a third-party multi-seller receivables funding company. We amended the facility in September 2011, increasing the committed funding from \$75.0 million to \$90.0 million, and reducing the margin on amounts outstanding from a range of 2.75%-3.50%, depending on leverage ratio, to a range of 1.50%-1.75% depending on the amount drawn under the facility. The amendment also reduced the cost of the unused portion of the facility from a range of 0.50%-1.00%, depending on usage amount, to 0.45% and extended the maturity date from December 29, 2012 to September 15, 2015. We incurred approximately \$0.1 million in fees and expenses to complete the amendment. We did not have any amounts outstanding under the facility as of September 30, 2011 or December 31, 2010, but had \$70.3 million and \$41.4 million, respectively, available but not utilized. At September 30, 2011 and December 31, 2010, we had \$5.0 million and \$0.0 million, respectively, outstanding under our revolving credit capacity and had an additional \$81.9 million and \$79.3 million, respectively, potentially available after giving effect to approximately \$23.1 million and \$23.7 million, respectively, of letters of credit issued and outstanding. The letters of credit are used for a variety of purposes, including support of certain operating lease agreements, vendor payment terms and other subsidiary operating activities, and to meet various states' requirements to self-insure workers' compensation claims, including incurred but not reported claims. Including availability under our accounts receivable facility and after consideration of leverage restrictions contained in the Credit Facility, we had \$152.2 million and \$120.7 million, respectively, of borrowing capacity available for general corporate purposes. Our available revolving credit capacity under the Credit Facility, after consideration of approximately \$23.1 million in letters of credit outstanding related thereto, is approximately \$81.9 million, while our available liquidity under our accounts receivable facility ranges from \$40 million to \$75 million, depending on the level of our receivables outstanding at a given point in time during the year. We rely upon our cash flow from operations and available liquidity under our revolving credit and accounts receivable facilities to fund our debt service obligations and other contractual commitments, working capital and capital expenditure requirements. Our weighted average daily amounts

outstanding under the revolving credit facilities and accounts receivable facilities during the first nine months of 2011 approximated \$61.5 million, compared to the weighted average daily amounts outstanding during the first nine months of 2010 of \$36.2 million. The increase in average daily amounts outstanding was primarily due to an increase in working capital to fund the higher sales levels as well as an increase in capital investment in our businesses. During the nine months ended 2011, we used approximately \$28.3 million more cash on capital investment into our businesses as compared to the first nine months of 2010. Generally, we use available liquidity under these facilities to fund capital expenditures

Table of Contents

and daily working capital requirements during the first half of the year, as we experience some seasonality in our two Cequent reportable segments, primarily within Cequent North America. Sales of towing and trailering products within this segment are generally stronger in the second and third quarters, as original equipment manufacturers (OEMs), distributors and retailers acquire product for the spring and summer selling seasons. None of our other reportable segments experiences any significant seasonal fluctuations in their respective businesses. During the second half of the year, the investment in working capital is reduced and amounts outstanding under our revolving credit and receivable facilities are paid down. While this is the general trend in cash flow due to seasonality, our daily average amounts outstanding increased during the third quarter of 2011 compared to the second quarter of 2011, primarily as the cash paid for the Innovative Molding acquisition and incremental capital expenditure projects more than offset the cash generated via working capital reductions for the nine months ended September 30, 2011. At the end of each quarter, we use cash on hand from our domestic and foreign subsidiaries to pay down amounts outstanding under our revolving credit and accounts receivable facilities.

Cash management related to our revolving credit and accounts receivable facilities is centralized. We monitor our cash position and available liquidity on a daily basis and forecast our cash needs on a weekly basis within the current quarter and on a monthly basis outside the current quarter over the remainder of the year. Our business and related cash forecasts are updated monthly. Given aggregate available funding under our revolving credit and accounts receivable facilities of \$152.2 million at September 30, 2011, after consideration of the aforementioned leverage restrictions, and based on forecasted cash sources and requirements inherent in our business plans, we believe that our liquidity and capital resources, including anticipated cash flows from operations, will be sufficient to meet our debt service, capital expenditure and other short-term and long-term obligation needs for the foreseeable future.

We are subject to variable interest rates on our term loan and revolving credit facility. At September 30, 2011, 1-Month LIBOR approximated 0.23%. Based on our variable rate-based borrowings outstanding at September 30, 2011, a 1% increase in 1-Month LIBOR would increase our interest expense by approximately \$0.1 million annually, considering our Credit Facility term loan is subject to a 1.25% LIBOR-floor, and a 1% increase in 1-Month LIBOR would not impact our current effective interest rate on this portion of our debt, as the resulting rate would remain below the 1.25% floor.

Principal payments required under our U.S. Credit Facility term loan are: \$0.6 million due each calendar quarter through March 31, 2017, and \$212.1 million due on June 21, 2017.

We also have \$250.0 million (face value) 9<sup>3</sup>/<sub>4</sub>% senior secured notes ("Senior Notes") outstanding at September 30, 2011, due 2017. Interest on the Senior Notes accrues at the rate of 9.75% per annum and is payable semi-annually in arrears on June 15 and December 15.

Prior to December 15, 2012, the Company may redeem up to 35% of the principal amount of Senior Notes at a redemption price equal to 109.750% of the principal amount, plus accrued and unpaid interest to the applicable redemption date plus additional interest, if any, with the net cash proceeds of one or more equity offerings, provided that at least 65% of the original principal amount of Senior Notes issued remains outstanding after such redemption, and provided further that each such redemption occurs within 90 days of the date of closing of each such equity offering.

In addition to our long-term debt, we have other cash commitments related to leases. We account for these lease transactions as operating leases and annual rent expense for continuing operations related thereto approximated \$14.8 million. We expect to continue to utilize leasing as a financing strategy in the future to meet capital expenditure needs and to reduce debt levels.

**Market Risk**

We conduct business in several locations throughout the world and are subject to market risk due to changes in the value of foreign currencies. We do not currently use derivative financial instruments to manage these risks. The functional currencies of our foreign subsidiaries are the local currency in the country of domicile. We manage these operating activities at the local level and revenues and costs are generally denominated in local currencies; however, results of operations and assets and liabilities reported in U.S. dollars will fluctuate with changes in exchange rates between such local currencies and the U.S. dollar.

Common Stock

We voluntarily transferred our stock exchange listing in the U.S. from the New York Stock Exchange to the NASDAQ Global Market<sup>SM</sup> effective August 24, 2009. Effective January 3, 2011, TriMas became eligible for inclusion, and is now listed, in the NASDAQ Global Select Market<sup>SM</sup>. Our stock continues to trade under the symbol "TRS."

## Table of Contents

### Credit Rating

We and certain of our outstanding debt obligations are rated by Standard & Poor's and Moody's. On August 24, 2011, Standard & Poor's upgraded our outlook to positive and affirmed our credit facilities, senior secured notes, and corporate credit ratings of BB, B-, and B+, respectively. On June 3, 2011, Moody's assigned a Ba2 rating to our senior secured credit facilities, and affirmed our corporate family rating at B1 and our outlook as positive; our ratings on our senior secured notes remained at B3. If our credit ratings were to decline, our ability to access certain financial markets may become limited, the perception of us in the view of our customers, suppliers and security holders may worsen and as a result, we may be adversely affected.

### Outlook

We entered 2011 cautiously optimistic that, given a continued economic recovery, we could continue to build upon the progress made in the past two years to reduce our cost structure, increase our flexibility and maintain a culture of continuous improvement in all that we do. We believe that our results through the first nine months of 2011 continue to build on the positive momentum generated in the past two years, as we benefited from continued economic recovery and experienced significant market share gains in many of our reportable segments. Given the economic recovery and the success of some of our growth initiatives, we decided to strategically increase our investments in inventory levels and capital projects in certain of our businesses to capture additional market share and expand upon our existing growth and productivity initiatives. We also decided to continue our strategic acquisitions of smaller bolt-on businesses in our key platforms, adding both synergies and geographic expansion. While we did experience a less favorable product sales mix within our reportable segments and made certain pricing decisions to aggressively price certain products to penetrate new markets and to delay certain commodity cost increases at certain customers to capture additional market share, we were able to offset much of the margin pressure with our ongoing cost savings and productivity initiatives. We believe we remain well-positioned to achieve further market share gains and generate additional operating leverage as a result of our low fixed cost structure, and we have the capacity to fulfill yet higher net sales levels without incurring significant incremental fixed costs.

Our priorities remain consistent with our strategic aspirations: continuing to identify and execute on cost savings and productivity initiatives that fund core growth, reduce cycle times and secure our position as best cost producer, to grow revenue via new products and expand our core products in non-U.S. markets, to continue to reduce our debt leverage and to increase our available liquidity. While our existing debt structure does not have material current debt maturities, significant deterioration in general economic conditions would adversely impact our anticipated revenue growth and financial performance.

### Impact of New Accounting Standards

In May 2011, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2011-4, "Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs" ("ASU 2011-4"). ASU 2011-4 amends guidance listed under Accounting Standards Codification ("ASC") Topic 820, "Fair Value Measurement" and represents the converged guidance of the FASB and the International Accounting Standards Board on fair value measurement. The guidance clarifies how a principal market is determined, addresses the fair value measurement of instruments with offsetting market or counterparty credit risks, addresses the concept of valuation premise and highest and best use, extends the prohibition on blockage factors to all three levels of the fair value hierarchy and requires additional disclosures. ASU 2011-4 will be effective prospectively for interim and annual periods beginning after December 15, 2011. We are currently evaluating the requirements of ASU 2011-4 and have not yet determined its impact on our consolidated financial statements.

In June 2011, the FASB issued ASU 2011-5, "Presentation of Comprehensive Income" ("ASU 2011-5"). ASU 2011-5 amends guidance listed under ASC Topic 220, "Comprehensive Income" and eliminates the option to present components of other comprehensive income as part of the statement of shareholders' equity. Under the amendments to ASC Topic 220, an entity has the option to present the total of comprehensive income, the components of net income and the components of other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. The amendments also require an entity to present on the face of the

financial statements the reclassification adjustments for items that are reclassified from other comprehensive income to net income. ASU 2011-5 will be effective retrospectively for fiscal years, and interim periods within those years, beginning after December 15, 2011. The adoption of ASU 2011-5 will only affect the presentation of our consolidated financial statements.

## Table of Contents

In September 2011, the FASB issued ASU 2011-8, "Intangibles - Goodwill and Other (Topic 350): Testing for Goodwill Impairment." ASU 2011-8 gives companies the option to perform a qualitative assessment to determine whether it is more likely than not (a likelihood of more than 50%) that the fair value of a reporting unit is less than its carrying amount, and in some cases, skip the two-step impairment test. The objective of the revised standard is to simplify how an entity tests goodwill for impairment and to reduce the cost and complexity of the annual goodwill impairment test. ASU 2011-8 will be effective for fiscal years beginning after December 15, 2011, with early adoption permitted. We are currently evaluating this guidance and the potential impact of the revised standard on our annual goodwill impairment test.

### Critical Accounting Policies

Certain of our accounting policies require the application of significant judgment by management in selecting the appropriate assumptions for calculating financial estimates. By their nature, these judgments are subject to an inherent degree of uncertainty. These judgments are based on our historical experience, our evaluation of business and macroeconomic trends, and information from other outside sources, as appropriate.

During the quarter ended September 30, 2011, there were no material changes to the items that we disclosed as our critical accounting policies in Part II, Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations," in the 2010 Annual Report on Form 10-K.

### Item 3. Quantitative and Qualitative Disclosures About Market Risk

In the normal course of business, we are exposed to market risk associated with fluctuations in foreign currency exchange rates. We are also subject to interest risk as it relates to long-term debt. See Part I, Item 2, "Management's Discussion and Analysis of Financial Condition and Results of Operations," for details about our primary market risks, and the objectives and strategies used to manage these risks. Also see Note 7, "Long-term Debt," in Part I, Item 1, "Notes to Unaudited Consolidated Financial Statements," included within this Form 10-Q for additional information.

### Item 4. Controls and Procedures

The Company maintains disclosure controls and procedures that are designed to ensure that information required to be disclosed in the reports that the Company files or submits under the Securities and Exchange Act of 1934, as amended (the "Exchange Act") is recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to the Company's management, including its Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosures.

#### Evaluation of disclosure controls and procedures

As of September 30, 2011, an evaluation was carried out by management, with the participation of the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the Company's disclosure controls and procedures (as such term is defined in Rule 13a-15(e) and Rule 15d-15(e) of the Exchange Act) pursuant to Rule 13a-15 of the Exchange Act. The Company's disclosure controls and procedures are designed only to provide reasonable assurance that they will meet their objectives. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that as of September 30, 2011, the Company's disclosure controls and procedures are effective to provide reasonable assurance that they would meet their objectives.

#### Changes in disclosure controls and procedures

There have been no changes in the Company's internal control over financial reporting during the quarter ended September 30, 2011 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II. OTHER INFORMATION  
TRIMAS CORPORATION

Item 1. Legal Proceedings

See Note 9, "Commitments and Contingencies," included in Part I, Item 1, "Notes to Consolidated Financial Statements," within this Form 10-Q.

Item 1A. Risk Factors

In addition to the other information set forth in this report, you should carefully consider the factors discussed in Part 1, Item 1A., "Risk Factors," in our Annual Report on Form 10-K for the year ended December 31, 2010, which could materially affect our business, financial condition or future results. There have been no significant changes in our risk factors as disclosed in our 2010 Form 10-K, except for updating the risk factor related to Heartland's ownership of our voting common equity and updating the status of the union activities at our Houston, Texas facility as follows:

Heartland owns approximately 20.9% of our voting common equity.

Heartland Industrial Partners ("Heartland") beneficially owns approximately 20.9% of our outstanding voting common equity as of September 30, 2011. As a result, Heartland has the power to strongly influence all matters submitted to our stockholders and all decisions to enter into any corporate transaction and any transaction that requires the approval of stockholders, regardless of whether other stockholders believe that any such transactions are in their own best interests. For example, Heartland could strongly influence our decisions to make acquisitions that increase the amount of our indebtedness, sell revenue-generating assets or strongly influence our decisions to undergo a "going private" transaction with it or one of its affiliates. So long as Heartland continues to own a significant amount of the outstanding shares of our common stock, it will continue to be able to strongly influence our decisions. Its interests may differ from other stockholders and it may vote in a way with which other stockholders disagree. In addition, this concentration of ownership may have the effect of preventing, discouraging or deterring a change of control. One of our directors is the Managing Member of Heartland's general partner.

We may be subject to further unionization and work stoppages at our facilities or our customers may be subject to work stoppages, which could seriously impact the profitability of our business.

On November 4, 2009, we recognized the United Steel, Paper and Forestry, Rubber, Manufacturing, Energy, Allied Industrial and Service Workers International Union ("Union") at our Houston, Texas facility which is included in our Energy segment, due to the Union obtaining a simple majority of authorization cards during an organizing drive. On December 10, 2009, we received a notice of filing petition for union decertification this facility. A decertification vote administered by the National Labor Relations Board occurred on August 26, 2010; however, those ballots were impounded in light of the Union's field request for review. On August 26, 2011, the National Labor Relations Board determined that the impounded ballots from the decertification vote would not be counted.

The risks described in our Annual Report on Form 10-K are not the only risks facing our Company. Additional risks and uncertainties not currently known to us or that we currently deemed to be immaterial also may materially adversely affect our business, financial position and results of operations or cash flows.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

None.

Item 3. Defaults Upon Senior Securities

Not applicable.

Item 4. Submission of Matters to a Vote of Security Holders

Reserved.

Item 5. Other Information

Not applicable.
