**Leading Independent Research Firm Says that Magic Software's iBOLT Delivers Strong Integration Capabilities to SAP Business One**

Or Yehuda, Israel (December 15, 2004) - Magic Software Enterprises (NASDAQ: MGIC), a leading provider of state-of-the-art development and integration technology, announced today that Forrester Research Inc. has issued a Quick Take entitled Magic Software's iBOLT Brings SOA to SAP Business One. This recognition of the value of Magic's agreement with SAP America, Inc., the North American subsidiary of SAP AG (NYSE: SAP), under which Magic will introduce a specially designed iBOLT Integration Suite for SAP® Business One, is the second such recognition by one of the leading industry analysts within the last month.

The Forrester Quick Take , issued December 7, 2004, written by Henry Peyret and Ken Vollmer, states Magic Software's Partnership with SAP is a Win for Both Sides . Forrester highlights the significance of Magic's entering the SAP community as SAP's first comprehensive application platform partner, and the strategic implications of offering an integration solution that enables SAP partners to deliver more functionally rich solutions quicker. In the Recommendations section Forrester states that, "The choice is clear for North American customers of SAP Business One: iBOLT delivers strong integration capabilities at a reasonable price. The complete Quick Take can be viewed at <http://www.magicsoftware.com/news/industry>.

Additionally, the report mentions that the recently released new version of iBOLT has seamlessly morphed into a composite application framework that provides more tools based on metadata-driven graphical environments to empower business users.

According to Avigdor Luttinger, Head of iBOLT at Magic Software, "This Quick Take does an excellent job of identifying the strengths of iBOLT in the composite application framework, and highlights our SMB strategy and determination to penetrate and gain market share in all segments of the SMB market. This agreement is another milestone that we have achieved in our implementation program."

The customized version of iBOLT complements SAP's existing arsenal of cutting-edge development tools for SAP Business One. It will enable SAP Business One customers to rapidly enhance their SAP Business One systems with a range of features - including extended workflows, composite applications, multi-channel access, unlimited interoperability and integration with other systems and platforms, as well as business activity and performance monitoring. The new iBOLT version will also open SAP Business One to the large channel of existing Magic Solution Providers, allowing them to seamlessly integrate their existing solutions with SAP Business One, streamlining the process and reducing integration time.
