USA TRUCK, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

September 30, 2007

NOTE A BASIS OF PRESENTATION

The accompanying unaudited consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States for interim financial information. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring adjustments considered necessary for a fair presentation) have been included. Operating results for the three month and nine month periods ended September 30, 2007, are not necessarily indicative of the results that may be expected for the year ending December 31, 2007. For further information, refer to the financial statements, and footnotes thereto, included in our Annual Report on Form 10-K for the year ended December 31, 2006.

By agreement with our customers, and consistent with industry practice, we add a graduated fuel surcharge to the rates we charge our customers as diesel fuel prices increase above an agreed-upon baseline price per gallon. Base revenue in the consolidated statements of income represents revenue excluding this fuel surcharge revenue.

NOTE B REVENUE RECOGNITION

Edgar Filing: USA TRUCK INC - Form 10-Q

Revenue generated by our Trucking segment is recognized in full upon completion of delivery of freight to the receiver's location. For freight in transit at the end of a reporting period, we recognize revenue pro rata based on relative transit time completed as a portion of the estimated total transit time in accordance with EITF 91-9, Method 5 issued by the Emerging Issues Task Force (EITF) of the Financial Accounting Standards Board (FASB). Expenses are recognized as incurred.

Revenue generated by our USA Logistics segment is recognized upon completion of the services provided. Revenue is recorded on a gross basis, without deducting third party purchased transportation costs, as we act as a principal with substantial risks as primary obligor.

Management believes these policies most accurately reflect revenue as earned and direct expenses, including third party purchased transportation costs, as incurred.

NOTE C STOCK-BASED COMPENSATION

The current equity compensation plans that have been approved by our stockholders are our 2004 Equity Incentive Plan and our 2003 Restricted Stock Award Plan. There are also two plans under which options remain outstanding, but no new options may be granted, which are our Employee Stock Option Plan and our 1997 Nonqualified Stock Option Plan for Nonemployee Directors. We do not have any equity compensation plans under which equity awards are outstanding or may be granted that have not been approved by our stockholders.

The USA Truck, Inc. 2004 Equity Incentive Plan provides for the granting of incentive or nonqualified options or other equity-based awards covering up to 975,000 shares of Common Stock to directors, officers and other key employees. On the day of each annual meeting of stockholders of the Company for a period of nine years, which commenced with the Annual Meeting of Stockholders in 2005 and will end with the Annual Meeting of Stockholders in 2013, the maximum number of shares of Common Stock that is available for issuance under the Plan is automatically increased by that number of shares equal to the lesser of 25,000 shares or such lesser number of shares (which may be zero or any number less than 25,000) as determined by the Board. No options were granted under this Plan for less than the fair market value of the Common Stock as defined in the Plan at the date of the grant. Although the exercise period is determined when options are granted, no option may be exercised later than 10 years after it is granted. Options granted under the Plan generally vest ratably over five years. The option price under this Plan is the fair market value of our Common Stock at the date the options were granted, except that the exercise prices of options granted to our Chairman of the Board are equal to 110% of the fair market value of our Common Stock at the date those options were granted. The exercise prices of outstanding options granted under the 2004 Equity Incentive Plan range from \$11.47 to \$30.22 as of September 30, 2007. At September 30, 2007, 596,300 shares were available for granting future options or other equity awards under this Plan.

Effective January 1, 2006, we adopted the fair value recognition provisions of FASB Statement of Financial Accounting Standards No. 123 (Revised 2004), *Share-Based Payment* (SFAS 123(R)), using the modified-prospective transition method. Under the modified-prospective transition method, the prior period's financial statements are not restated to reflect stock-based compensation costs that would have been recognized in the financial statements with respect to outstanding options if we had applied SFAS 123(R) in those prior periods. Compensation cost recognized in the first nine months of 2007 includes: (a) compensation cost for all share-based

7

payments granted prior to, but not yet vested as of January 1, 2006 and (b) compensation cost for all share-based payments granted subsequent to January 1, 2006. The compensation cost is based on the grant-date fair value calculated using a Black-Scholes-Merton option-pricing formula and is amortized over the vesting period in accordance with provisions of SFAS 123(R). For the three and nine month periods ended September 30, 2007, we recognized approximately \$0.06 million and \$0.2 million, respectively, in compensation expense related to incentive and nonqualified stock options granted under our plans.

The following assumptions were used to value the stock options granted during the years indicated:

	2007	2006
Dividend yield	0%	0%
Expected volatility	38.7% - 49.9%	40.2% - 52.1%
Risk-free interest rate	3.1% - 4.9%	4.4% - 5.0%
Expected life	3 to 9 years	2 to 7 years

Edgar Filing: USA TRUCK INC - Form 10-Q

Expected volatility is a measure of the expected fluctuation in our share price. We use the historical method to calculate volatility with the historical period being equal to the expected life of each option. This calculation is then used to determine the potential for our share price to increase over the expected life of the option. Expected life represents the length of time we anticipate the options to be outstanding before being exercised. Based on historical experience, that time period is best represented by the option's contractual life. The risk-free interest rate is based on an implied yield on United States zero-coupon treasury bonds with a remaining term equal to the expected life of the outstanding options.

At September 30, 2007, we had 321,750 outstanding stock options with a weighted average exercise price of \$15.11, and there were 130,550 vested options. The weighted average remaining contractual life of the exercisable options was approximately 0.9 year.

Information related to option activity for the nine months ended September 30, 2007 is as follows:

	Number of Options	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life (in years)	Aggregate Intrinsic Value (1)
Outstanding - beginning of year	380,550	\$ 13.99		
Granted	46,000	16.93		
Exercised	(84,700)	11.56		\$ 379,710
Cancelled/forfeited/expired	(20,100)	12.98		
Outstanding at September 30, 2007	321,750	15.11	2.6	744,637
Exercisable at September 30, 2007 (2)	130,550	\$ 12.76	0.9	\$ 462,785

(1) The intrinsic value of a stock option is the amount by which the market value of the underlying stock exceeds the exercise price of the option. The per share market value of our Common Stock, as determined by the closing price on September 28, 2007 (the last trading day of the quarter) was \$15.25.

(2) The fair value of options exercisable at September 30, 2007 was approximately \$0.6 million.

Information related to the weighted average fair value of stock option activity for the nine months ended September 30, 2007 is as follows:

	Number of Shares Under Options	Weighted Average Fair Value
Nonvested options December 31, 2006	227,000	\$ 5.70
Granted	46,000	7.74
Forfeited	(16,200)	4.84
Vested	(65,600)	4.11
Nonvested options September 30, 2007	191,200	\$ 6.81

8

The exercise price, number, weighted average remaining contractual life of options outstanding and the number of options exercisable as of September 30, 2007 is as follows:

Exercise Price	Number of Options Outstanding	Weighted Average Remaining Contractual Life (in years)	Number of Options Exercisable
\$ 5.44	4,200	0.04	4,200
5.98	6,000	0.04	6,000
7.52	3,000	0.4	3,000

Edgar Filing: USA TRUCK INC - Form 10-Q

11.47	130,600	2.0	63,900
12.10	22,700	0.8	22,700
12.62	10,000	1.1	5,000
12.66	12,800	2.3	6,400
15.83	5,000	6.9	--
16.08	6,000	1.5	1,500
17.06	41,000	4.9	--
22.54	70,700	3.6	15,600
22.93	6,000	2.1	1,500
30.22	3,750	3.3	750
	321,750	2.6	130,550

The 2003 Restricted Stock Award Plan allows us to issue up to 150,000 shares of Common Stock as awards of restricted stock to our officers, 100,000 shares of which have been awarded. Awards under the Plan vest over a period of no less than five years and vesting of awards is also subject to the achievement of performance goals set by the Board of Directors based on criteria set forth in the Plan. The fair value of the 100,000 shares of Common Stock subject to the awards previously granted will be amortized over the vesting period as compensation expense based on management's assessment as to whether achievement of the performance goals is probable. To the extent the performance goals are not achieved and there is not full vesting in the shares awarded, the compensation expense recognized to the extent of the non-vested forfeited shares will be reversed. As of September 30, 2007, management projected that the performance goal for 2007 will not be met. The compensation expense previously recognized for the 19,000 shares that were to vest in 2008 has been reversed. The shares will remain outstanding until their scheduled vesting date of March 1, 2008, at which time their forfeiture will become effective. In accordance with SFAS 123(R), the compensation expense recognized is based on the market value of our Common Stock on the date the restricted stock award is granted and is not adjusted in subsequent periods. Based on the above, for the three months ended September 30, 2007, the Company recovered previously recorded compensation expense of approximately \$0.3 million, net. For the three months ended September 30, 2006, the Company recorded approximately \$0.1 million of compensation expense. For the nine months ended September 30, 2007, the recovery of previously recorded compensation expense was \$0.2 million, net. For the nine months ended September 30, 2006, the Company recorded approximately \$0.3 million of compensation expense.

Information related to the 2003 Restricted Stock Award Plan for the nine months ended September 30, 2007 is as follows:

	Number of Shares	Weighted Average Fair Value
Nonvested shares December 31, 2006	65,000	\$ 16.56
Granted	--	--
Vested shares December 31, 2006	(19,000)	15.00
Nonvested shares September 30, 2007	46,000	\$ 17.21

As of September 30, 2007, we had approximately \$0.6 million and \$0.2 million in unrecognized compensation expense related to stock options and restricted stock, respectively, which is expected to be recognized over a weighted average period of approximately 2.7 years for stock options and 1.9 years for restricted stock.

9

NOTE D REPURCHASE OF EQUITY SECURITIES

On January 24, 2007, we publicly announced that our Board of Directors authorized the repurchase of up to 2,000,000 shares of our outstanding Common Stock over a three-year period ending January 24, 2010. We may make Common Stock purchases under this program on the open market or in privately negotiated transactions at prices determined by our Chairman of the Board or President. Our Board had previously approved an authorization, publicly announced on October 19, 2004, to repurchase up to 500,000 shares and the remaining balance of 264,000 shares was repurchased during the first quarter of 2007 at a total cost of approximately \$4.3 million. During the quarter ended September 30, 2007, we repurchased a total of 125,200 shares at a total cost of approximately \$2.0 million. During the nine months ended September 30, 2007, we repurchased a total of 669,499 shares of our Common Stock under the current authorization, at a total cost of approximately \$10.8 million. Our current repurchase authorization has 1,330,501 shares remaining.

NOTE E SEGMENT REPORTING

We classify our five divisions into two operating segments, Trucking and USA Logistics, which we aggregate into one segment for financial reporting purposes in accordance with FASB Statement of Financial Accounting Standards No. 131, *Disclosures about Segments of an Enterprise and Related Information* (SFAS 131). Trucking consists of our General Freight, Regional Freight and Dedicated Freight divisions, which provide truckload freight services. USA Logistics consists of our Strategic Capacity Solutions (freight brokerage) and Third Party Logistics divisions, which provide services such as transportation scheduling, routing and mode selection, which do not typically involve the use of Company-owned or owner-operator equipment.

Our decision to aggregate our two operating segments into one reporting segment was based on factors such as the similar economic and operating characteristics of our divisions and our centralized internal management structure. Except with respect to the relatively minor components of our operations that do not involve the use of our trucks, key operating statistics include, for example, revenue per mile and miles per tractor per week. While the Third Party Logistics and Strategic Capacity Solutions divisions of our operations do not involve the use of our equipment and drivers, we nevertheless provide truckload freight services to our customers through arrangements with third party carriers who are subject to the same general regulatory environment and cost sensitivities imposed upon our Trucking operations.

The services we provide through all five divisions relate to the transportation of truckload quantities of general freight for customers in a variety of industries. The services generate revenue and incur expenses, primarily on a per mile basis. The two divisions within the USA Logistics operating segment are intended to provide services complementary to our Trucking services, primarily to existing customers of our Trucking operating segment. A majority of the customers of USA Logistics have also engaged us to provide services through one or more of our Trucking divisions. Our USA Logistics operating segment represents a relatively minor part of our business, generating less than 2.5% of our total base revenue for the three months and nine months ended September 30, 2007 and less than 5% of total base revenue in each of the last two fiscal years.

NOTE F - NEW ACCOUNTING PRONOUNCEMENTS

In February 2007, the FASB issued Statement of Financial Accounting Standards No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities* (SFAS 159), which provides companies with an option to report selected financial assets and liabilities at fair value. The objective of SFAS 159 is to reduce both complexity in accounting for financial instruments and the volatility in earnings caused by measuring related assets and liabilities differently. SFAS 159 establishes presentation and disclosure requirements designed to facilitate comparisons between companies that choose different measurement attributes for similar types of assets and liabilities and to more easily understand the effect on earnings of a company's choice to use fair value. SFAS 159 also requires entities to display the fair value of the selected assets and liabilities on the face of the balance sheet. SFAS 159 does not eliminate disclosure requirements of other accounting standards, including fair value measurement disclosures in Statement of Financial Accounting Standards No. 157, *Fair Value Measurements* (SFAS 157), discussed below. Unrealized gains and losses on items for which the fair value option has been elected are reported in earnings. This statement is effective as of the beginning of an entity's first fiscal year beginning after November 15, 2007. We are currently evaluating whether we will apply SFAS 159 to any of our qualified financial assets and liabilities and the potential impact of those choices on our consolidated financial position, results of operations and cash flows.

In September 2006, the Securities and Exchange Commission (SEC) issued Staff Accounting Bulletin 108, *Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements* (SAB 108). SAB 108 provides interpretive guidance on how the effects of the carryover or reversal of prior year misstatements should be considered in quantifying a current year misstatement. The SEC staff believes that registrants should quantify errors using both a balance sheet and an income statement approach and

10

evaluate whether either approach results in quantifying a misstatement that, when all relevant quantitative and qualitative factors are considered, is material. The guidance in SAB 108 became effective for us on January 1, 2007. SAB 108 has not had a material effect on our consolidated financial position, results of operations and cash flows.

In September 2006, the FASB issued SFAS 157. SFAS 157 defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles (GAAP) and expands disclosures about fair value measurements. This statement was published due to the different definitions of fair value that are among the many accounting pronouncements that require fair value measurements and the limited guidance for applying those definitions in GAAP. SFAS 157 defines fair value as the price that would be received to sell an asset or paid to

Edgar Filing: USA TRUCK INC - Form 10-Q

transfer a liability in an orderly transaction between market participants at the measurement date. This statement is effective for financial statements issued for fiscal years beginning after November 15, 2007. Additionally, prospective application of this statement is required as of the beginning of the fiscal year in which it is initially applied. SFAS 157 is not expected to have a material impact upon our consolidated financial position, results of operations and cash flows.

In June 2006, the FASB issued Interpretation No. 48, *Accounting for Uncertainty in Income Taxes, an interpretation of FASB Statement No. 109, Accounting for Income Taxes* (FIN 48). FIN 48 clarifies the accounting for income taxes by prescribing the minimum recognition threshold a tax position is required to meet before being recognized in the financial statements. FIN 48 also provides guidance on derecognition, measurement, classification, interest and penalties, accounting in interim periods, disclosure and transition. FIN 48 applies to all tax positions related to income taxes subject to FASB Statement No. 109 and utilizes a two-step approach for evaluating those positions. Recognition (step one) occurs when an enterprise concludes that a tax position, based solely on its technical merits, is more likely than not to be sustained upon examination. Measurement (step two) is only addressed if step one has been satisfied. Those tax positions failing to qualify for initial recognition are recognized in the first subsequent interim period in which they meet the more-likely-than-not standard or are otherwise resolved to qualify for recognition. Derecognition of previously recognized tax positions occurs when a company subsequently determines that a tax position no longer meets the recognition threshold. FIN 48 specifically prohibits the use of a valuation allowance as a substitute for derecognition of tax positions. The provisions of FIN 48 became effective for us as of January 1, 2007. FIN 48 has not had a material impact upon our consolidated financial position, results of operations and cash flows.

NOTE G - ACCRUED EXPENSES

Accrued expenses consisted of the following:

	(in thousands) September 30, 2007	December 31, 2006
Salaries, wages, bonuses and employee benefits	\$ 4,449	\$ 4,859
Other (1)	8,107	5,949
Total accrued expenses	\$ 12,556	\$ 10,808

- (1) As of September 30, 2007 and December 31, 2006, no single item included within other accrued expenses exceeded 5.0% of our total current liabilities.

NOTE H - NOTE PAYABLE

At December 31, 2006, we had an unsecured note payable of \$1.8 million that matured on September 1, 2007, and bore interest at an annual rate of 6.0%. This note payable was used to finance a portion of our annual insurance premiums.

11

NOTE I LONG-TERM DEBT

Long-term debt consisted of the following:

	(in thousands) September 30, 2007	December 31, 2006
Revolving credit agreement (1)	\$ 34,872	\$ 37,993
Capitalized lease obligations (2)	52,911	55,622
	87,783	93,615
Less current maturities	25,027	25,798
Long-term debt and capital leases, less current maturities	\$ 62,756	\$ 67,817

- (1) Our Amended and Restated Senior Credit Facility provides for available borrowings of \$100.0 million, including letters of credit not exceeding \$25.0 million. Availability may be reduced by a borrowing base limit as defined in the Facility. At September 30, 2007, we had approximately \$57.9 million available under the Facility. The Facility matures on September 1, 2010. The Facility can also be increased to \$175.0 million at our option, with the additional availability provided by the current lenders, at their election, or by other lenders. The Facility bears variable interest based on the agent bank's prime rate, or federal funds rate plus a certain percentage or London Interbank Offered Rate plus a certain percentage, which is determined based on our attainment of certain financial ratios. The interest rate on our borrowings under the Facility at September 30, 2007 was 6.6%. A quarterly commitment fee is payable on the unused portion of the credit line and bears a rate which is determined based on our attainment of certain financial ratios. At September 30, 2007, the rate was 0.2% per annum. The Facility is collateralized by revenue equipment having a net book value of \$180.0 million at September 30, 2007, and all trade and other accounts receivable. We had outstanding letters of credit of approximately \$7.2 million at September 30, 2007. The Facility requires us to meet certain financial covenants and to maintain a minimum tangible net worth of approximately \$131.3 million at September 30, 2007. We were in compliance with these covenants at September 30, 2007. The covenants would prohibit the payment of dividends by us if such payment would cause us to be in violation of any of the covenants. The carrying amount reported in the balance sheet for borrowings under the Facility approximates its fair value.
- (2) Our capitalized lease obligations have various termination dates extending through October 2010 and contain renewal or fixed price purchase options. The effective interest rates on the leases range from 3.1% to 5.0% at September 30, 2007. The lease agreements require us to pay property taxes, maintenance and operating expenses.

NOTE J LEASES AND COMMITMENTS

We routinely monitor our equipment acquisition needs and adjust our purchase schedule from time to time based on our analysis of factors such as new equipment prices, the condition of the used equipment market, demand for our freight services, prevailing interest rates, technological improvements, fuel efficiency, durability of the equipment, equipment specifications and the availability of qualified drivers.

As of September 30, 2007, we had commitments for purchases of revenue equipment in the aggregate amount of approximately \$13.3 million for the remainder of 2007. In addition, we had purchase obligations of approximately \$1.8 million related to facility expansions contracted for the remainder of 2007.

NOTE K INCOME TAXES

During the quarters ended September 30, 2007 and 2006, our effective tax rates were 97.9% and 47.0%, respectively. During the nine months ended September 30, 2007 and 2006, our effective tax rates were 66.0% and 46.3%, respectively. Income tax expense varies from the amount computed by applying the statutory federal tax rate to income before income taxes primarily due to state income taxes, net of federal income tax effect, adjusted for permanent differences, the most significant of which is the effect of the per diem pay structure for drivers. Drivers may elect to receive non-taxable per diem pay in lieu of a portion of their taxable wages. This per diem program increases our drivers' net pay per mile, after taxes, while decreasing gross pay, before taxes. As a result, salaries, wages and employee benefits are slightly lower, and our effective income tax rate is higher than the statutory rate. As pre-tax income increases, the impact of the driver per diem program on our effective tax rate decreases because aggregate per diem pay becomes smaller in relation to pre-tax income. Due to the partially

12

nondeductible effect of per diem pay, our tax rate will fluctuate in future periods based on fluctuations in earnings and in the number of drivers who elect to receive this pay structure.

We adopted the provisions of FIN 48 on January 1, 2007 and have analyzed filing positions in our federal tax returns as well as in all open tax years. The only periods subject to examination for our federal returns are the 2005 and 2006 tax years. Our policy is to recognize interest related to unrecognized tax benefits as interest expense and penalties as operating expenses. We believe that our income tax filing positions and deductions will be sustained on audit and do not anticipate any adjustments that will result in a material change to our consolidated financial position, results of operations and cash flows. Therefore, no reserves for uncertain income tax positions have been recorded pursuant to FIN 48. At January 1, 2007, we had no unrecognized tax benefits. In addition, we did not record a cumulative effect adjustment related to the adoption of FIN 48.

NOTE L EARNINGS PER SHARE

Edgar Filing: USA TRUCK INC - Form 10-Q

Basic earnings per share is computed based on the weighted average number of shares of Common Stock outstanding during the period. Diluted earnings per share is computed by adjusting the weighted average number of shares of Common Stock outstanding by Common Stock equivalents attributable to dilutive stock options and restricted stock.

The following table sets forth the computation of basic and diluted earnings per share:

	(in thousands, except per share amounts)			
	Three Months Ended September 30,		Nine Months Ended September 30,	
	2007	2006	2007	2006
Numerator:				
Net Income	\$ 16	\$ 3,415	\$ 1,716	\$ 11,222
Denominator:				
Denominator for basic earnings per share weighted average shares	10,429	11,389	10,690	11,373
Effect of dilutive securities:				
Restricted Stock Award Plan	46	65	50	68
Employee stock options	60	104	64	154
	106	169	114	222
Denominator for diluted earnings per share adjusted weighted average shares and assumed conversions	10,535	11,558	10,804	11,595
Basic earnings per share	\$ --	\$ 0.30	\$ 0.16	\$ 0.99
Diluted earnings per share	\$ --	\$ 0.30	\$ 0.16	\$ 0.97
Anti-dilutive employee stock options	128	82	128	82

NOTE M - LITIGATION

We are party to routine litigation incidental to our business, primarily involving claims for personal injury and property damage incurred in the transportation of freight. We maintain insurance to cover liabilities in excess of certain self-insured retention levels. Though management believes these claims to be routine and immaterial to our long-term financial position, adverse results of one or more of these claims could have a material adverse effect on our financial position or results of operations in any given reporting period.

On May 22, 2006, a former independent sales agent filed a lawsuit against us entitled *All-Ways Logistics, Inc. v. USA Truck, Inc.*, in the U.S. District Court for the Eastern District of Arkansas, Jonesboro Division, alleging, among other things, breach of contract, breach of implied duty of good faith and fair dealing, and tortious interference with business relations. The plaintiff alleged that we breached and wrongfully terminated our commission sales agent agreement with it and improperly interfered with its business relationship with certain of its customers. In early August, the jury returned an unfavorable verdict in this contract dispute. The jury held that we breached the contract and awarded the plaintiff damages of approximately \$3.0 million, which was accrued during the quarter ended September 30, 2007. During the fourth quarter, we expect the court to determine any additional amounts that we may owe in pre-judgment interest and legal fees. We are currently considering all of our available options in regard to the jury's verdict.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Forward-Looking Statements

Edgar Filing: USA TRUCK INC - Form 10-Q

This report contains forward-looking statements and information that are based on our current beliefs and expectations and assumptions we have made based upon information currently available. Forward-looking statements include statements relating to our plans, strategies, objectives, expectations, intentions and adequacy of resources, and may be identified by words such as will, could, should, may, believe, expect, intend, plan, schedule, estimate, project and similar expressions. These statements are based on current expectations and are subject to uncertainty and change. Although we believe that the expectations reflected in such forward-looking statements are reasonable, we cannot assure you that such expectations will be realized. If one or more of the risks or uncertainties underlying such expectations materialize, or if underlying assumptions prove incorrect, actual results may vary materially from those expected. Among other things, we cannot assure you that we will be able to continue the recent positive trends identified in this report under the heading

Management's Discussion and Analysis of Financial Condition and Results of Operations, such as the improvements in our miles per tractor per week, driver turnover and safety performance. Among the key factors that are not within our control and that have a direct bearing on operating results are increases in fuel prices, adverse weather conditions, increased regulatory burdens and the impact of increased rate competition. Our results have also been, and will continue to be, significantly affected by fluctuations in general economic conditions, as our tractor utilization is directly related to business levels of customers in a variety of industries. In addition, shortages of qualified drivers and intense or increased competition for drivers have adversely impacted our operating results and our ability to grow and will continue to do so. Results for any specific period could also be affected by various unforeseen events, such as unusual levels of equipment failure or vehicle accident claims. Additional risks associated with our operations are discussed in our Annual Report on Form 10-K for the year ended December 31, 2006, under the heading Risk Factors in Item 1A of that report, and updates, if any, to that information are included in Item 1A in Part II of this report.

All forward-looking statements attributable to us, or persons acting on our behalf, are expressly qualified in their entirety by this cautionary statement.

We undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. In light of these risks and uncertainties, the forward-looking events and circumstances discussed in this report might not occur.

References to the Company, we, us, our and words of similar import refer to USA Truck, Inc. and its subsidiary.

The following discussion should be read in conjunction with our consolidated financial statements and notes thereto and other financial information that appears elsewhere in this report.

Overview

The following Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A) is intended to help the reader understand USA Truck, Inc., our operations and our present business environment. MD&A is provided as a supplement to and should be read in conjunction with our consolidated financial statements and notes thereto and other financial information that appears elsewhere in this report. This overview summarizes the MD&A, which includes the following sections:

Our Business a general description of our business, the organization of our operations and the divisions that comprise our operations.

Critical Accounting Estimates a discussion of accounting policies that require critical judgment and estimates.

Results of Operations an analysis of our consolidated results of operations for the periods presented in our consolidated financial statements and a discussion of seasonality, the potential impact of inflation and fuel availability and cost.

Off-Balance Sheet Arrangements a discussion of significant financial arrangements, if any, that are not reflected on our balance sheet.

Liquidity and Capital Resources an analysis of cash flows, sources and uses of cash, debt, equity and contractual obligations.

Our Business

We operate in the for-hire truckload segment of the trucking industry. Customers in a variety of industries engage us to haul truckload quantities of freight, with the trailer we use to haul that freight being assigned exclusively to that customer's freight until delivery. We have five operating

Edgar Filing: USA TRUCK INC - Form 10-Q

divisions, which we combine into two operating segments, through which we provide various transportation services. We aggregate the financial data for these operating segments into one reportable segment for purposes of our public reporting.

The five divisions are classified into the Trucking operating segment and USA Logistics operating segment. Trucking includes those transportation services in which we use Company-owned tractors and owner-operator tractors. USA Logistics consists of services such as freight brokerage, transportation scheduling, routing and mode selection, which typically do not involve the use of Company-owned and owner-operator equipment. Both Trucking and USA Logistics have similar economic characteristics and are impacted by virtually the same economic factors as discussed elsewhere in this report.

Substantially all of our base revenue from both operating segments is generated by transporting, or arranging for the transportation of, freight for customers and is predominantly affected by the rates per mile received from our customers. For the nine months ended September 30, 2007 and 2006, Trucking base revenue represented 97.6% and 95.8% of base revenue, respectively, with remaining base revenue being generated through USA Logistics.

We generally charge customers for our services on a per-mile basis. Currently, our most challenging costs include recruiting, retaining and compensating qualified drivers, insurance and claims, fuel and capital equipment costs.

We refer to our five divisions as General Freight, Regional Freight, Dedicated Freight, Strategic Capacity Solutions (freight brokerage) and Third Party Logistics.

Trucking. Trucking includes three divisions providing the following services to our customers:

- General Freight.* Our General Freight division provides truckload freight services as a medium-haul common carrier. In the truckload industry, companies whose average length of haul is more than 800 miles but less than 1,200 miles are often referred to as medium-haul carriers. The average length of haul for our General Freight services has been within that range throughout our history. We have provided General Freight services since our inception and we derive the largest portion of our revenues from these services.
- Regional Freight.* Our Regional Freight division provides truckload freight services that involve a length of haul of approximately 500 miles. We began offering our Regional Freight services in 2004, in order to aid in driver recruitment and retention and to participate in the largest segment within the truckload market. Currently, we conduct Regional Freight operations in the areas around our facilities located in Van Buren, Arkansas, Butler Township, Ohio and Spartanburg, South Carolina.
- Dedicated Freight.* Our Dedicated Freight division is a variation of our General Freight and Regional Freight divisions, whereby we agree to make our equipment and drivers available to a specific customer for shipments over particular routes at specified times. In addition to serving specific customer needs, our Dedicated Freight division also aids in driver recruitment and retention.

USA Logistics. USA Logistics includes two divisions providing the following services to our customers:

- Strategic Capacity Solutions.* Our Strategic Capacity Solutions division matches customer shipments with available equipment of other carriers when it is not feasible to use our own equipment.
- Third Party Logistics.* Our Third Party Logistics division provides a variety of freight handling services for our customers, including arranging for the transportation of freight, scheduling, routing and mode selection.

Our Strategic Capacity Solutions and Third Party Logistics divisions provide complementary services to Trucking. We provide these services primarily to our existing Trucking customers, many of whom prefer to rely on a single carrier, or a small group of carriers, to provide all of their transportation needs. To date, a majority of our Strategic Capacity Solutions and Third Party Logistics customers have also engaged us to provide Trucking services.

15

Critical Accounting Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. We base our assumptions, estimates and judgments on historical experience, current trends and other factors that management believes to be relevant at the time our consolidated financial statements are prepared. Actual results could differ from those estimates, and such differences could be material.

The most significant accounting policies and estimates that affect our financial statements include the following:

Edgar Filing: USA TRUCK INC - Form 10-Q

Revenue recognition and related direct expenses based on relative transit time in each period. Revenue generated by Trucking is recognized in full upon completion of delivery of freight to the receiver's location. For freight in transit at the end of a reporting period, we recognize revenue pro rata based on relative transit time completed as a portion of the estimated total transit time in accordance with EITF 91-9, Method 5 issued by the Emerging Issues Task Force of the Financial Accounting Standards Board. Expenses are recognized as incurred.

Revenue generated by USA Logistics is recognized upon completion of the services provided. Revenue is recorded on a gross basis, without deducting third party purchased transportation costs, as we act as a principal with substantial risks as primary obligor.

Management believes these policies most accurately reflect revenue as earned and direct expenses, including third party purchased transportation costs, as incurred.

Selections of estimated useful lives and salvage values for purposes of depreciating tractors and trailers. We operate a significant number of tractors and trailers in connection with our business. We may purchase this equipment or acquire it under leases. We depreciate purchased equipment on the straight-line method over the estimated useful life down to an estimated salvage or trade-in value. We initially record equipment acquired under capital leases at the net present value of the minimum lease payments and amortize it on the straight-line method over the lease term. Depreciable lives of tractors and trailers range from three years to ten years. We estimate the salvage value at the expected date of trade-in or sale based on the expected market values of equipment at the time of disposal.

We make equipment purchasing and replacement decisions on the basis of various factors, including, but not limited to, new equipment prices, the condition of the used equipment market, demand for our freight services, prevailing interest rates, technological improvements, fuel efficiency, durability of the equipment, equipment specifications and the availability of drivers. Therefore, depending on the circumstances, we may accelerate or delay the acquisition and disposition of our tractors and trailers from time to time, based on an operating principle whereby we pursue trade intervals that economically balance our maintenance costs and expected trade-in values in response to the circumstances existing at that time. Such adjustments in trade intervals may cause us to adjust the useful lives or salvage values of our tractors or trailers. By changing the relative amounts of older equipment and newer equipment in our fleet, adjustments in trade intervals also increase and decrease the average age of our tractors and trailers, whether or not we change the useful lives or salvage values of any tractors or trailers. We also adjust depreciable lives and salvage values based on factors such as changes in prevailing market prices for used equipment. We periodically monitor these factors in order to keep salvage values in line with expected market values at the time of disposal. Adjustments in useful lives and salvage values are made as conditions warrant and when we believe that the changes in conditions are other than temporary. These adjustments result in changes in the depreciation expense we record in the period in which the adjustments occur and in future periods. These adjustments also impact any resulting gain or loss on the ultimate disposition of the revenue equipment. Management believes our estimates of useful lives and salvage values have been materially accurate as demonstrated by the insignificant amounts of gains and losses on revenue equipment dispositions in recent periods.

To the extent depreciable lives and salvage values are changed, such changes are recorded in accordance with the applicable provisions of Financial Accounting Standards Board Statement of Financial Accounting Standards No. 154, *Accounting Changes and Error Corrections*, a replacement of APB Opinion No. 20 and FASB Statement No. 3.

Estimates of accrued liabilities for claims involving bodily injury, physical damage losses, employee health benefits and workers compensation. We record both current and long-term claims accruals at the estimated ultimate payment amounts based on information such as individual case estimates, historical

16

claims experience and an estimate of claims incurred but not reported. The current portion of the accrual reflects the amounts of claims expected to be paid in the next twelve months. In making the estimates we rely on past experience with similar claims, negative or positive developments in the case and similar factors. We do not discount our claims liabilities.

Allowance for doubtful accounts. We extend credit to our customers in the normal course of business. We perform ongoing credit evaluations and generally do not require collateral. We maintain reserves for estimated credit losses based upon our loss history, aging analysis and ongoing risk assessment of specific customers. Such losses have been within our expectations. Accounts receivable are comprised of a diversified customer base that results in a lack of concentration of credit risk.

Stock option valuation. The assumptions used to value stock options are dividend yield, expected volatility, risk-free interest rate and expected life. As we do not pay any dividends on our Common Stock, the dividend yield is zero. Expected volatility represents the measure used to project the expected fluctuation in our share price. We use the historical method to calculate volatility with the historical period being equal to the expected life of each option. This calculation is then used to determine the potential for our share price to increase over the expected life of the option. The risk-free interest rate is based on an implied yield on United States

Edgar Filing: USA TRUCK INC - Form 10-Q

zero-coupon treasury bonds with a remaining term equal to the expected life of the outstanding options. Expected life represents the length of time we anticipate the options to be outstanding before being exercised. Based on historical experience, that time period is best represented by the option's contractual life.

We periodically reevaluate these policies as circumstances dictate. Together these factors may significantly impact our consolidated results of operations, financial position and cash flow from period to period.

Results of Operations

Executive Overview

The following executive overview is presented comparing the financial results for the three months ended September 30, 2007, to the three months ended September 30, 2006, except as otherwise stated.

The current freight environment continues as one of the most challenging we have ever seen. For the second consecutive year, we have experienced virtually no fall peak shipping season. That soft freight demand, an adverse jury verdict in a contract dispute and high fuel prices were the dominant influences on our earnings during the quarter.

Our base revenue increased 2.7%. Trucking revenue increased 2.5% as our average tractor count grew by 2.3% (but actually declined slightly sequentially from the second quarter). Our increased focus on non-asset based services bore fruit as USA Logistics revenue, particularly our Strategic Capacity Solutions division (freight brokerage), increased 13.0%.

Competitive pressures eroded our base revenue for the quarter by almost \$0.03 per loaded mile (2.0%), and base revenue per total mile decreased approximately \$0.04 (2.9%) as our empty mile factor (historically a strong indicator of freight availability) increased by 0.87 percentage points. We expect pricing and freight availability to remain competitive in the near-term due to the continued over-capacity of tractors in the industry relative to freight demand.

Despite the current freight conditions, we continue to focus our efforts on the fundamentals of our business with some signs of progress. In particular, our driver turnover improved by nearly 45 percentage points year-over-year. The dramatic improvement in driver turnover over the past year has contributed significantly to fewer unmanned tractors (2.5 percentage point improvement for the quarter) and has translated into more miles per tractor per week (3.4% increase for the quarter). Combined with slower fleet growth, the driver turnover improvements yielded a 27.1% decline in driver recruiting costs, or over 100 basis points in margin.

While those improvements contributed to the efficiency of our operations, they were offset by the soft freight demand and cost pressures:

Fuel and fuel tax expense, net of fuel surcharge revenue, increased 130 basis points due largely to a higher national average price for diesel fuel; and

In early August, a jury returned an unfavorable verdict in a litigated contract dispute. The jury held that USA Truck breached a contract and awarded the plaintiff damages of approximately \$3.0 million (300 basis points). During the fourth quarter, we expect the court to determine any additional amounts that we may owe in pre-judgment interest and legal fees. The Company is currently considering all of its available options in regard to the jury's verdict. This verdict had a negative impact on third quarter

17

diluted earnings per share of approximately \$0.17. Without that impact, our operations would have produced improved diluted earnings per share sequentially compared to the second quarter. That is something with which we are pleased given the challenging market conditions.

Our restructured safety department's emphasis on safety awareness, training and accident prevention is showing signs of progress. While our accident frequencies remain elevated year-over-year, we have experienced a sequential reduction in accident frequency each quarter this year. We are executing a detailed, data-driven plan to bring down our accident frequencies long-term. An example of our efforts can be found in the frequency of our rollover accidents. During the first two quarters this year, our fleet of approximately 2,600 tractors experienced 24 of these expensive accidents (one every 7.5 days). During July, we implemented a Company-wide training and awareness campaign targeting rollovers. During the third quarter, with the same approximate number of tractors, we only experienced four rollovers (one every 22.5 days). Our safety effort is much broader than just rollovers, but that performance gives us confidence that our efforts, which we call the war on accidents internally, will yield tangible, long-term results.

Edgar Filing: USA TRUCK INC - Form 10-Q

We have also made progress toward the long-term strategies that we implemented in the fourth quarter of 2006, which basically shift our focus from revenue growth to improving financial returns. Specifically, we have repurchased approximately 934,000 shares of our common stock year-to-date, we have slowed our fleet growth to essentially flat sequentially compared to the second quarter and 2.3% year-over-year, we have increased our revenue yield (revenue per tractor per week) 0.2% year-over-year despite economic conditions, and on a year-over-year basis we have grown our non-asset based service revenue by 13.0% and more than doubled the size of our owner-operator fleet. These signs of progress represent only a small step toward achieving our long-term objectives set forth in our 2006 Annual Report on Form 10-K.

Note Regarding Presentation

By agreement with our customers, and consistent with industry practice, we add a graduated surcharge to the rates we charge our customers as diesel fuel prices increase above an agreed-upon baseline price per gallon. The surcharge is designed to approximately offset increases in fuel costs above the baseline. Fuel prices are volatile, and the fuel surcharge increases our revenue at different rates for each period. We believe that comparing operating costs and expenses to total revenue, including the fuel surcharge, could provide a distorted comparison of our operating performance, particularly when comparing results for current and prior periods. Therefore, we have used base revenue, which excludes the fuel surcharge revenue, and instead taken the fuel surcharge as a credit against the fuel and fuel taxes line item in the table setting forth the percentage relationship of certain items to base revenue below.

We do not believe that a reconciliation of the information presented on this basis and corresponding information comparing operating costs and expenses to total revenue would be meaningful. Data regarding both total revenue, which includes the fuel surcharge, and base revenue, which excludes the fuel surcharge, is included in the Consolidated Statements of Income included in this report.

Base revenues from our Strategic Capacity Solutions and Third Party Logistics divisions have fluctuated in recent periods. These services do not involve the use of our tractors and trailers. Therefore, an increase in these revenues tends to cause expenses related to our operations that do involve our equipment including depreciation and amortization expense, operations and maintenance expense, salaries, wages and employee benefits and insurance and claims expense to decrease as a percentage of base revenue, and a decrease in these revenues tends to cause those expenses to increase as a percentage of base revenue. Since changes in Strategic Capacity Solutions and Third Party Logistics revenues generally affect all such expenses, as a percentage of base revenue, we do not specifically mention it as a factor in our discussion of increases or decreases in those expenses in the period-to-period comparisons below.

Relationship of Certain Items to Base Revenue

The following table sets forth the percentage relationship of certain items to base revenue, for the periods indicated. The period-to-period comparisons below should be read in conjunction with this table and our Consolidated Statements of Income and accompanying notes.

18

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2007	2006	2007	2006

Three Months Ended September 30, 2007 Compared to Three Months Ended September 30, 2006

Results of Operations Combined Services

Our base revenue increased 2.7% from \$96.7 million to \$99.3 million, for the reasons addressed in the Trucking and the USA Logistics sections, below.

Net income for all divisions was \$16 thousand as compared to \$3.4 million, or 3.5% of base revenue in 2006.

Overall, our operating ratio increased by 5.7 percentage points of base revenue to 98.0% as a result of the following factors:

Fuel and fuel taxes increased 1.3 percentage points of base revenue primarily due to a 7.1% increase in net fuel price per gallon, a 2.9% decrease in base revenue per total mile, net and a 1.8% decrease in miles per gallon. Operations and maintenance increased by 0.9 percentage points of base revenue primarily due to a 25.0% increase in fleet maintenance costs. The increase in fleet maintenance costs was caused partially by the increase in the average age of our tractors from 19.4 months in 2006 to 23.2 months in 2007 and of our trailers from 36.1 months in 2006 to 40.7 months in 2007. Purchased transportation increased by 1.3 percentage points of base revenue due to the increase in the average size of our owner-operator fleet from 17 in 2006 to 38 in 2007. An unfavorable verdict returned by the jury in a litigated contract dispute cost the Company 3.0 percentage points of base revenue. The jury held that USA Truck breached a contract and awarded the plaintiff damages of approximately \$3.0 million. Other operating expenses decreased by 1.2 percentage points of base revenue primarily due to a decrease in driver recruiting costs of 27.1%. This decrease was a combination of a more accommodating market for hiring drivers and our 44.7 percentage point reduction in driver turnover. Our effective tax rate increased from 47.0% in 2006 to 97.9% in 2007. Income tax expense varies from the amount computed by applying the federal tax rate to income before income taxes primarily due to state income taxes, net of federal income tax effect, adjusted for permanent differences, the most

19

significant of which is the effect of the per diem pay structure for drivers. Due to the partially nondeductible effect of per diem payments, our tax rate will vary in future periods based on fluctuations in earnings and in the number of drivers who elect to receive this pay structure.

Results of Operations Trucking

Key Operating Statistics:

	Three Months Ended September 30, 2007				
	Regional		Dedicated		Total Trucking
	General Freight	Freight	Freight	Freight	
Total miles (in thousands) (1)	62,283	8,581	5,102	75,966	
Empty mile factor (2)	10.7	% 15.2	% 1.6	% 10.6	%
Base revenue per loaded mile	\$ 1.42	\$ 1.53	\$ 1.36	\$ 1.43

Edgar Filing: USA TRUCK INC - Form 10-Q

Average miles per tractor per period	30,161	25,692	28,031	29,433
Average miles per tractor per week	2,394	2,039	2,225	2,336
Average miles per trip (4)	903	503	472	783
Average unmanned tractor percentage (5)	2.5	4.3	2.8	2.8
Base revenue per tractor per week	\$ 3,035	\$ 2,647	\$ 2,977	\$ 2,981

Three Months Ended September 30, 2006

	General Freight	Regional Freight	Dedicated Freight	Total Trucking
Total miles (<i>in thousands</i>) (1)	59,510	5,886	6,388	71,784
Empty mile factor (2)	10.0	13.1	3.6	9.7
Base revenue per loaded mile	\$ 1.46	\$ 1.56	\$ 1.41	\$ 1.46
Average number of tractors (3)	2,041	224	257	2,522
Average miles per tractor per period	29,157	26,278	24,857	28,463
Average miles per tractor per week	2,314	2,086	1,973	2,259
Average miles per trip (4)	951	534	549	841
Average unmanned tractor percentage (5)	4.9	4.5	9.4	5.3
Base revenue per tractor per week	\$ 3,028	\$ 2,832	\$ 2,682	\$ 2,976

- (1) Total miles include both loaded and empty miles.
- (2) The empty mile factor is the number of miles traveled for which we are not typically compensated by any customer as a percentage of total miles traveled.
- (3) Average number of tractors includes Company-operated tractors plus owner-operator tractors.
- (4) Average miles per trip is based upon loaded miles divided by the number of Trucking shipments.
- (5) Average unmanned tractor percentage is the weighted average percentage of Company-operated tractors to which a driver is not assigned.

Base Revenue

Base revenue from Trucking grew by 2.5% to \$96.9 million. The increase was the result of several factors:

General Freight's base revenue per tractor per week increased 0.2%. This increase was primarily due to a 3.5% increase in average miles per tractor per week and a 2.4 percentage point reduction in the unmanned tractor percentage, which was partially offset by a 2.4% decrease in base revenue per loaded mile.

Regional Freight base revenue grew 39.3%. This increase was primarily due to a 49.1% increase in tractors. We intend to continue working to further improve the Regional Freight division's operating efficiencies including increasing the base revenue per tractor per week.

Dedicated Freight base revenue per tractor per week increased 11.0% due to an increase of 12.8% in average miles per tractor per week.

Overall, the average size of our Trucking segment's tractor fleet grew by 2.3%. We grew the average size of the Company-owned tractor fleet by 1.5% to 2,543 tractors and our owner-operator fleet by 123.5% to 38 tractors.

20

Results of Operations USA Logistics

Base revenue from USA Logistics increased by 13.0% to \$2.4 million as a result of a 20.6% increase in our Strategic Capacity Solutions division base revenue. Our Third Party Logistics division saw a 27.4% decrease in base revenue due to our strategic pull-back from the large-scale third party logistics market in the third quarter of 2006.

Nine Months Ended September 30, 2007 Compared to Nine Months Ended September 30, 2006

Results of Operations Combined Services

Edgar Filing: USA TRUCK INC - Form 10-Q

Our base revenue increased 0.8% from \$293.1 million to \$295.5 million, for the reasons addressed in the Trucking and the USA Logistics sections, below.

Net income for all divisions was \$1.7 million, or 0.6% of base revenue, as compared to \$11.2 million, or 3.8% of base revenue for 2006.

Overall, our operating ratio increased by 5.2 percentage points of base revenue to 97.0% as a result of the following factors:

Salaries, wages and employee benefits increased by 2.2 percentage points of base revenue due to a 3.7% increase in driver compensation per mile, a 19.4% increase in non-driver wages and a 2.3% decrease in our base revenue per loaded mile. We steadily increased driver pay during 2006 to stay competitive in the driver hiring market and ensure that we maintain an adequate supply of qualified drivers to meet our fleet needs.

Fuel and fuel taxes increased 0.7 percentage points due to a decrease of 1.8% in miles per gallon and the 2.3% decrease in base revenue per loaded mile.

Depreciation and amortization increased by 0.6 percentage points of base revenue primarily due to an 11.0% increase in our trailer fleet and the 2.3% decrease in base revenue per loaded mile.

Insurance and claims increased by 1.2 percentage points of base revenue due to an increase in the number of accidents and related claim costs.

Operations and maintenance increased by 1.0 percentage points of base revenue primarily due to a 20.5% increase in fleet maintenance costs and the 2.3% decrease in base revenue per loaded mile. The increase in fleet maintenance costs was partially due to the increase in the average age of our tractors from 19.4 months in 2006 to 23.2 months in 2007 and of our trailers from 36.1 months in 2006 to 40.7 months in 2007.

Purchased transportation decreased by 1.0 percentage points of base revenue due primarily to the decrease in carrier expense associated with our Third Party Logistics division. During 2006, we began a strategic pull-back from the large-scale third party logistics market. This was partially offset by a 128.6% increase in our owner-operator fleet from 14 in 2006 to 32 in 2007.

An unfavorable verdict returned by the jury in a litigated contract dispute cost the Company 1.0 percentage points of base revenue. The jury held that USA Truck breached a contract and awarded the plaintiff damages of approximately \$3.0 million.

Other operating expenses decreased by 0.6 percentage points of base revenue primarily due to a decrease in driver recruiting costs of 23.7%. This decrease resulted from a combination of a better market for hiring drivers and our 36.7 percentage point reduction in driver turnover.

Our effective tax rate increased from 46.3% in 2006 to 66.0% in 2007. Income tax expense varies from the amount computed by applying the federal tax rate to income before income taxes primarily due to state income taxes, net of federal income tax effect, adjusted for permanent differences, the most significant of which is the effect of the per diem pay structure for drivers. Due to the partially nondeductible effect of per diem payments, our tax rate will vary in future periods based on fluctuations in earnings and in the number of drivers who elect to receive this pay structure.

- (3) Average number of tractors includes Company-operated tractors plus owner-operator tractors.
- (4) Average miles per trip is based upon loaded miles divided by the number of Trucking shipments.
- (5) Average unmanned tractor percentage is the weighted average percentage of Company-operated tractors to which a driver is not assigned.

Base Revenue

Base revenue from Trucking grew by 2.7% to \$288.4 million. The increase was the net effect of several factors:

General Freight's base revenue declined by 0.2%. This decrease was primarily due to a 0.9% decrease in base revenue per loaded mile and a 0.2% decrease in the average number of tractors. This was partially offset by a 2.2% increase in average miles per tractor per week and a 1.2 percentage point decrease in unmanned tractors.

Regional Freight base revenue grew 46.0%. This increase was primarily due to a 53.3% increase in tractors and a 0.7% increase in base revenue per loaded mile. We intend to continue working to further improve the Regional Freight division's operating efficiencies including increasing the base revenue per tractor per week.

Dedicated Freight base revenue declined 8.3%. This decrease was primarily due to a 0.7% decrease in base revenue per loaded mile and a 12.2% decrease in the average number of tractors.

Overall, the average size of our Trucking segment's tractor fleet grew by 3.2%. We grew the average size of the Company-owned tractor fleet by 2.5% to 2,542 tractors and our owner-operator fleet by 128.6% to 32 tractors. Also, our unmanned tractor percentage decreased 1.6 percentage points.

22

Results of Operations USA Logistics

Base revenue from USA Logistics decreased by 42.1% to \$7.1 million. We continue to focus our efforts on our core competency of asset-based Trucking. As a result, our Third Party Logistics division revenue decreased by 86.8% to \$0.8 million. Strategic Capacity Solutions base revenue increased to \$6.3 million, a 1.4% increase.

Seasonality

In the trucking industry, revenues generally decrease as customers reduce shipments during the winter holiday season and as inclement weather impedes operations. At the same time, operating expenses increase due primarily to decreased fuel efficiency and increased maintenance costs. Future revenues could be impacted if customers, particularly those with manufacturing operations, reduce shipments due to temporary plant closings. Historically, many of our customers have closed their plants for maintenance or other reasons during January and July.

Inflation

Although most of our operating expenses are inflation sensitive, the effect of inflation on revenue and operating costs has been minimal in recent years. The effect of inflation-driven cost increases on our overall operating costs is not expected to be greater for us than for our competitors.

Fuel Availability and Cost

The motor carrier industry is dependent upon the availability of fuel. Fuel shortages or increases in fuel taxes or fuel costs have adversely affected our profitability and will continue to do so. Fuel prices have fluctuated widely and fuel taxes have generally increased in recent years. We have not experienced difficulty in maintaining necessary fuel supplies, and in the past we generally have been able to partially offset increases in fuel costs and fuel taxes through increased freight rates and through a fuel surcharge that increases incrementally as the price of fuel increases above an agreed upon baseline price per gallon. Typically, we are not able to fully recover increases in fuel prices through rate increases and fuel surcharges, primarily because those items do not provide any benefit with respect to empty and out-of-route miles, for which we typically do not receive compensation from customers. We do not have any long-term fuel purchase contracts and we have not entered into any other hedging arrangements that protect us against fuel price increases.

Off-Balance Sheet Arrangements

We do not currently have any off-balance sheet arrangements that have or are reasonably likely to have a material current or future effect on our consolidated financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources. From time to time, we enter into operating leases that are not reflected in our balance sheet.

Liquidity & Capital Resources

The continued growth of our business has required significant investments in new revenue equipment. We have financed new tractor and trailer purchases predominantly with cash flows from operations, the proceeds from sales or trades of used equipment, borrowings under our Amended and Restated Senior Credit Facility and capital lease purchase arrangements. We have historically met our working capital needs with cash flows from operations and with borrowings under our Facility. We use the Facility to minimize fluctuations in cash flow needs and to provide flexibility in financing revenue equipment purchases. We had approximately \$57.9 million available under our Facility at September 30, 2007, and \$35.4 million of availability for new capital leases under existing lease facilities. Management is not aware of any known trends or uncertainties that would cause a significant change in our sources of liquidity. We expect our principal sources of capital to be sufficient to finance our operations, annual debt maturities, lease commitments, letter of credit commitments, stock repurchases and capital expenditures for the next several years. There can be no assurance, however, that such sources will be sufficient to fund our operations and all expansion plans for the next several years, or that any necessary additional financing will be available, if at all, in amounts required or on terms satisfactory to us.

23

Cash Flows

	(in thousands)	
	Nine Months Ended	
	September 30,	
	2007	2006
Net cash provided by operating activities	\$ 45,060	\$ 60,259
Net cash used in investing activities	(6,592)	(57,050)
Net cash (used in) provided by financing activities	(38,185)	2,893

Cash provided by operations decreased \$15.2 million for the nine months ended September 30, 2007 as compared to the nine months ended September 30, 2006. The change was primarily due to a \$9.5 million decrease in net income, a larger increase in receivables and a smaller increase in deferred taxes and trade accounts payable during the first nine months of 2007 than in the first nine months of 2006.

Cash used in investing activities decreased \$50.5 million for the nine months ended September 30, 2007 as compared to the nine months ended September 30, 2006 due to a decrease in our net expenditures for revenue equipment. In 2006, we executed an aggressive revenue equipment acquisition program in anticipation of the EPA's emission control regulations that went into effect in January 2007. In addition, as we began 2007, our fleet capacity exceeded freight availability. This imbalance prompted us to slow our fleet growth during the first nine months of 2007.

Cash used in financing activities was \$38.2 million for the nine months ended September 30, 2007 as compared to cash provided by financing activities of \$2.9 million for the nine months ended September 30, 2006. This \$41.1 million difference was primarily a result of our use of \$15.1 million for repurchases of Common Stock, a \$4.7 million increase in payments on capitalized lease obligations, a \$14.5 million decrease in net

Edgar Filing: USA TRUCK INC - Form 10-Q

borrowings on our credit facility and a \$7.2 million decrease in outstanding bank drafts payable.

Debt

On September 1, 2005, we entered into an Amended and Restated Senior Credit Facility. The Facility provides a maximum borrowing amount of \$100.0 million, subject to a borrowing base calculation, it includes a sublimit of up to \$25.0 million for letters of credit, and it matures on September 1, 2010.

The Facility is collateralized by revenue equipment having a net book value of approximately \$180.0 million at September 30, 2007, and all trade and other accounts receivable. The Facility provides an accordion feature allowing us to increase the maximum borrowing amount by up to an additional \$75.0 million in the aggregate in one or more increases no less than six months prior to the maturity date, subject to certain conditions. The maximum borrowing including the accordion feature may not exceed \$175.0 million without the consent of the lenders. At September 30, 2007, \$34.9 million was outstanding under the Facility.

The Facility bears variable interest based on the agent bank's prime rate, the federal funds rate plus a certain percentage or the London Interbank Offered Rate plus a certain percentage, which is determined based on our attainment of certain financial ratios. For the nine months ended September 30, 2007, the effective interest rate was 6.6%. A quarterly commitment fee is payable on the unused credit line at a rate which is determined based on our attainment of certain financial ratios. At September 30, 2007, the rate was 0.2% per annum.

The Facility contains various covenants, which require us to meet certain quarterly financial ratios and to maintain a minimum tangible net worth of approximately \$131.3 million at September 30, 2007. In the event we fail to cure an event of default, the loan can become immediately due and payable. As of September 30, 2007, we were in compliance with the covenants.

Certain leases contain cross-default provisions with other financing agreements, including the Senior Credit Facility, of the Company.

Equity

At September 30, 2007, we had stockholders' equity of \$147.0 million and total debt of \$87.8 million, resulting in a debt to total capitalization ratio of 37.4% compared to 37.4% at December 31, 2006.

Purchases and Commitments

As of September 30, 2007, our capital expenditures forecast, net of proceeds from the sale or trade of equipment, was \$14.4 million for the remainder of 2007, approximately \$9.4 million of which relates to revenue equipment acquisitions. We expect to use the balance of \$5.0 million primarily for property acquisitions, facility

24

construction and improvements and maintenance and office equipment. We routinely evaluate our equipment acquisition needs and adjust our purchase and disposition schedules from time to time based on our analysis of factors such as freight demand, the availability of drivers and the condition of the used equipment market. During the nine months ended September 30, 2007, we made \$24.6 million of net capital expenditures, including \$23.2 million for revenue equipment purchases and \$1.3 million for facility expansions and other expenditures. The following table represents our outstanding contractual obligations at September 30, 2007, excluding letters of credit:

	Payments Due By Period			
	(in thousands)			
	Less than 1 year	1-3 years	3-5 years	More than 5 years
Contractual Obligations:	Total			

Edgar Filing: USA TRUCK INC - Form 10-Q

Long-term debt obligations (1)	\$ 34,872	\$ --	\$ 34,872	\$ --	\$ --
Capital lease obligations (2)	56,117	26,782	21,231	8,104	--
Purchase obligations	7,729	7,729	--	--	--
Rental obligations	1,863	640	739	143	341
Total	\$ 100,581	\$ 35,151	\$ 56,842	\$ 8,247	\$ 341

(1) Long-term debt obligations, excluding letters of credit in the amount of \$7.2 million, consist of our Amended and Restated Senior Credit Facility, which matures on September 1, 2010.

(2) Includes interest payments not included in the balance sheet.

New Accounting Pronouncements

See Note F New Accounting Pronouncements to the consolidated financial statements included in this Form 10-Q for a description of the most recent accounting pronouncements and their effect, if any.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We experience various market risks, including changes in interest rates, foreign currency exchange rates and commodity prices.

Interest Rate Risk. We are exposed to interest rate risk primarily from our Amended and Restated Senior Credit Facility. The Facility provides for borrowings that bear interest at variable rates based on the agent bank's prime rate, the federal funds rate plus a certain percentage or the London Interbank Offered Rate plus a certain percentage. At September 30, 2007, we had \$42.1 million outstanding pursuant to our Facility including letters of credit of \$7.2 million. Assuming the outstanding balance at September 30, 2007 were to remain constant, a hypothetical one-percentage point increase in interest rates applicable to the Facility would increase our interest expense over a one-year period by approximately \$0.3 million.

Foreign Currency Exchange Rate Risk. We require customers to pay for our services in U.S. dollars. Although the Canadian government makes certain payments, such as tax refunds, to us in Canadian dollars, any foreign currency exchange risk associated with such payments is not material.

Commodity Price Risk. Fuel prices have fluctuated greatly and have generally increased in recent years. In some periods, our operating performance was adversely affected because we were not able to fully offset the impact of higher diesel fuel prices through increased freight rates and fuel surcharges. We cannot predict the extent to which high fuel price levels will continue in the future or the extent to which fuel surcharges could be collected to offset such increases. We do not have any long-term fuel purchase contracts, and we have not entered into any other hedging arrangements, that protect us against fuel price increases. Volatile fuel prices will continue to impact us significantly. A significant increase in fuel costs, or a shortage of diesel fuel, could materially and adversely affect our results of operations. These costs could also exacerbate the driver shortages our industry experiences by forcing independent contractors to cease operations.

25

ITEM 4. CONTROLS AND PROCEDURES

As of the end of the period covered by this report, an evaluation was performed under the supervision and with the participation of our management, including our Chief Executive Officer (the CEO) and Chief Financial Officer (the CFO), of the effectiveness of the design and operation of our disclosure controls and procedures. Based on that evaluation, our management, including the CEO and CFO, concluded that, as of the end of the period covered by this report, our disclosure controls and procedures were effective at the reasonable assurance level. There have been no changes in our internal control over financial reporting during the last fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

26

PART II - OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

We are party to routine litigation incidental to our business, primarily involving claims for personal injury and property damage incurred in the transportation of freight. We maintain insurance covering liabilities in excess of certain self-insured retention levels. Though management believes these claims to be routine and immaterial to our long-term financial position, adverse results of one or more of these claims could have a material adverse effect on our consolidated financial position or results of operations in any given reporting period.

ITEM 1A. RISK FACTORS

Certain risks associated with our operations are discussed in our Annual Report on Form 10-K for the year ended December 31, 2006, under the heading "Risk Factors" in Item 1A of that report. There were no material changes in these risks, other than those set forth below, during the nine months ended September 30, 2007.

In April 2003, the Federal Motor Carrier Safety Administration issued the first significant revisions to the hours-of-service regulations in more than 60 years. While the changes have had some negative effect on our General Freight division's revenues and our drivers' productivity, we have substantially absorbed those effects by now. The regulations were revised again in 2005, but the 2005 changes had no additional material effect on our costs or operations.

On July 24, 2007, the U.S. Court of Appeals for the District of Columbia Circuit ordered that two provisions of the hours-of-service regulations be set aside. The provisions that the court set aside govern the maximum allowable number of daily driving hours and the number of hours that drivers must be off duty before they can begin a new weekly driving cycle. The court's decision requires the Administration to re-examine the impact of the affected provisions on safety. The current hours-of-service provisions will remain in effect until December 27, 2007. It is expected that, prior to that date, the Administration will issue an interim rule to keep the current provisions in place until it completes the rulemaking, which could be a lengthy process. To our knowledge, as of October 23, 2007, the Administration had not yet published a formal notice of proposed rulemaking.

The Administration may determine, after it conducts the rulemaking and re-examination required by the court order, that the vacated provisions should be reinstated without any changes. If so, and there are no further challenges to that conclusion, the court's July 24, 2007 decision will not significantly affect us or our operations. If, on the other hand, the Administration determines that the rules should be changed, or if it does not act to keep the current provisions in place during the rulemaking, the number of driving hours allowed per week or per day may change. If so, we would incur costs in transitioning our operational practices to the new allowable hours of service and could also see a longer term increase in operating costs. We cannot predict what impact the current re-examination of the hours-of-service rules, and any resulting changes to those rules, may have on our consolidated financial position, results of operations and cash flows, or to what extent, if any, we might be able to recoup any increased costs through rate increases.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

(a) Recent unregistered sales of securities.

None.

(b) Use of proceeds from registered sales of securities.

None.

(c) Purchases of equity securities by the issuer and affiliated purchasers.

On January 24, 2007, we publicly announced that our Board of Directors authorized the repurchase of up to 2,000,000 shares of our outstanding Common Stock over a three-year period ending January 24, 2010. We may make Common Stock purchases under this program on the open market or in privately negotiated transactions at prices determined by our Chairman of the Board or President. Our Board of Directors had previously approved an authorization, publicly announced on October 19, 2004, to repurchase up to 500,000 shares, the remaining balance of which was repurchased during the first quarter of 2007. As of September 30, 2007, we had purchased 669,499 shares under the January 2007 authorization and had remaining authorization to repurchase an additional 1,330,501 shares.

The following table sets forth information regarding shares of Common Stock purchased or that may yet be purchased by us under the current authorization during the third quarter of 2007. No shares were purchased under the prior authorization during the quarter, and none remain available for future purchases under that authorization.

Issuer Purchases of Equity Securities

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs
July 1 July 31, 2007	--	\$ --	--	1,455,701
August 1 August 31, 2007	--	--	--	1,455,701
September 1 September 30, 2007	125,200	15.88	125,200	1,330,501
Total	125,200	\$ 15.88	125,200	1,330,501

We may reissue repurchased shares under our equity compensation plans or as otherwise directed by the Board of Directors.

We are required to include in the table above purchases made by us or by an affiliated purchaser. For this purpose, affiliated purchaser does not include our Employee Stock Purchase Plan, which provides that shares purchased for employees under that Plan may be shares provided by us or shares purchased on the open market. Open market purchases under that Plan are made by the administrator of the Plan, which is an agent independent of us. Any shares purchased by the administrator are not counted against the number of shares available for purchase by us pursuant to the repurchase authorization described above.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

None.

ITEM 5. OTHER INFORMATION

None.
