GUGGENHEIMINVESTMENTS.COM/AVK

...YOUR BRIDGE TO THE LATEST, MOST UP-TO-DATE INFORMATION ABOUT THE ADVENT CLAYMORE CONVERTIBLE SECURITIES AND INCOME FUND

The shareholder report you are reading right now is just the beginning of the story. Online at guggenheiminvestments.com/avk, you will find:

- Daily, weekly and monthly data on share prices, net asset values, dividends and more
- Portfolio overviews and performance analyses
- Announcements, press releases and special notices
- Fund and adviser contact information

Advent Capital Management and Guggenheim Investments are continually updating and expanding shareholder information services on the Fund's website in an ongoing effort to provide you with the most current information about how your Fund's assets are managed and the results of our efforts. It is just one more small way we are working to keep you better informed about your investment in the Fund.

April 30, 2015

DEAR SHAREHOLDER

Tracy V. Maitland
President and Chief Executive Officer

We thank you for your investment in the Advent Claymore Convertible Securities and Income Fund (the "Fund"). This report covers the Fund's performance for the six months ended April 30, 2015.

Advent Capital Management, LLC ("Advent" or the "Investment Adviser") serves as the Fund's Investment Adviser. Based in New York, New York, with additional investment personnel in London, England, Advent is a credit-oriented firm specializing in the management of global convertible, high-yield and equity securities across three lines of business—long-only strategies, hedge funds, and closed-end funds. As of April 30, 2015, Advent managed approximately \$8.5 billion in assets.

Guggenheim Funds Distributors, LLC (the "Servicing Agent") serves as the servicing agent to the Fund. The Servicing Agent is an affiliate of Guggenheim Partners, LLC, a global diversified financial services firm.

The Fund's investment objective is to provide total return through a combination of capital appreciation and current income. Under normal market conditions, the Fund invests at least 80% of its managed assets in a diversified portfolio of convertible securities and non-convertible income securities. Under normal market conditions, the Fund will invest at least 30% of its managed assets in convertible securities and may invest up to 70% in non-convertible income securities. The Fund may invest without limitation in foreign securities. The Fund's non-fundamental investment policies were changed during the period and took effect in January 2015. Please see the Questions & Answers section following for more information.

All Fund returns cited—whether based on net asset value (NAV) or market price—assume the reinvestment of all distributions. For the six-month period ended April 30, 2015, the Fund generated a total return based on market price of 2.43% and a total return of 2.84% based on NAV. As of April 30, 2015, the Fund's market price of \$17.18 represented a discount of 9.39% to NAV of \$18.96.

Past performance is not a guarantee of future results. The Fund's NAV performance data reflect fees and expenses of the Fund. The market price of the Fund's shares fluctuates from time to time, and it may be higher or lower than the Fund's NAV.

In each month of the period, the Fund paid a monthly distribution of \$0.0939 per share. The most recent monthly distribution represents an annualized distribution rate of 6.56% based upon the last closing market price of \$17.18 as of April 30, 2015. There is no guarantee of any future distributions or that the current returns and distribution rate will be maintained. Please see Note 2(m) on page 43 for more information on distributions for the period.

AVK 1 ADVENT CLAYMORE CONVERTIBLE SECURITIES AND INCOME FUND SEMIANNUAL REPORT 1

April 30, 2015

We encourage shareholders to consider the opportunity to reinvest their distributions from the Fund through the Dividend Reinvestment Plan ("DRIP"), which is described in detail on page 57 of this report. When shares trade at a discount to NAV, the DRIP takes advantage of the discount by reinvesting the monthly dividend distribution in common shares of the Fund purchased in the market at a price less than NAV. Conversely, when the market price of the Fund's common shares is at a premium above NAV, the DRIP reinvests participants' dividends in newly-issued common shares at the greater of NAV per share or 95% of the market price per share. The DRIP provides a cost-effective means to accumulate additional shares and enjoy the benefits of compounding returns over time.

The Fund is managed by a team of experienced and seasoned professionals led by myself in my capacity as Chief Investment Officer (as well as President and Founder) of Advent Capital Management, LLC. We encourage you to read the following Questions & Answers section, which provides additional information regarding the factors that influenced the Fund's performance.

We thank you for your investment in the Fund and we are honored that you have chosen the Advent Claymore Convertible Securities and Income Fund as part of your investment portfolio. For the most up-to-date information regarding your investment, including related investment risks, please visit the Fund's website at guggenheiminvestments.com/avk.

Sincerely,

Tracy V. Maitland
President and Chief Executive Officer of the Advent Claymore Convertible Securities
and Income Fund
May 31, 2015

41 AVK 1 ADVENT CLAYMORE CONVERTIBLE SECURITIES AND INCOME FUND SEMIANNUAL REPORT

QUESTIONS & ANSWERS

April 30, 2015

Advent Claymore Convertible Securities and Income Fund (the "Fund") is managed by a team of seasoned professionals at Advent Capital Management, LLC ("Advent" or the "Investment Adviser"), led by Tracy V. Maitland, Advent's Founder, President, and Chief Investment Officer. In the following interview, the management team discusses the convertible-securities and high-yield markets and Fund performance for the six-month period ended April 30, 2015.

Please describe the Fund's objective and management strategies.

The Fund's investment objective is to provide total return through a combination of capital appreciation and current income. Under normal market conditions, the Fund invests at least 80% of its managed assets in a diversified portfolio of convertible securities and non-convertible income-producing securities. Under normal market conditions, the Fund must invest at least 30% of its managed assets in convertible securities and may invest up to 70% in non-convertible income securities. The Fund may invest without limitation in foreign securities. Prior to January 12, 2015, the Fund invested at least 80% of its managed assets in a diversified portfolio of convertible securities and non-convertible income-producing securities, including U.S. and non-U.S. issuers, with at least 60% of its managed assets in convertible securities and up to 40% of its managed assets in non-convertible income-producing securities.

The Fund also uses a strategy of writing (selling) covered call options on up to 25% of the securities held in the portfolio. The objective of this strategy is to generate current gains from option premiums to enhance distributions payable to the holders of common shares. In addition, the Fund may invest in other derivatives, such as put options, forward foreign currency exchange contracts, futures contracts, and swaps.

The Fund uses financial leverage to finance the purchase of additional securities. Although financial leverage may create an opportunity for increased return for shareholders, it also results in additional risks and can magnify the effect of any losses. There is no assurance that the strategy will be successful. If income and gains earned on securities purchased with the financial leverage proceeds are greater than the cost of the financial leverage, shareholders' return will be greater than if financial leverage had not been used. Conversely, if the income or gains from the securities purchased with the proceeds of financial leverage are less than the cost of the financial leverage, shareholders' return will be less than if financial leverage had not been used.

Discuss the recent changes to Advent's non-fundamental investment policies.

Modifications to non-fundamental investment policies approved by the Board of Trustees of the Fund and Advent's other closed-end funds took effect on January 12, 2015. These modifications were designed to expand the portfolio management flexibility of the Funds and may provide an opportunity to enhance shareholder value through the Investment Manager's expanded investment capabilities and ability to manage risk.

AVK I ADVENT CLAYMORE CONVERTIBLE SECURITIES AND INCOME FUND SEMIANNUAL REPORT I 5

April 30, 2015

Advent's institutional strategies, which invest in the same asset classes as the Fund, have provided superior performance relative to applicable benchmarks. Accordingly, Advent is reallocating the Fund's portfolio over time to establish a core portfolio of convertible bonds that will be managed, subject to the Fund's investment policies and restrictions, in a manner similar to that of Advent's Balanced Convertible Strategy. Advent's Balanced Convertible Strategy seeks a high total return by investing in a portfolio of U.S. dollar convertible securities that provide equity-like returns while seeking to limit downside risk.

This core portfolio will be supplemented by investments in high yield securities selected in a manner similar to that of Advent's High Yield Strategy. Advent's High Yield Strategy seeks income and total return by investing primarily in high yielding corporate credit using fundamental and relative value analysis to identify undervalued securities.

Advent now uses a separate portion of the Fund's portfolio to increase or decrease relative overall exposure to convertible securities, high yield securities, and equities. This portion of the Fund's portfolio will incorporate leverage and operate as an asset allocation tool reflecting Advent's conservative management philosophy and its views on the relative value of these three asset classes under changing market conditions.

Please describe the economic and market environment over the last six months.

World securities markets generally advanced in the six months ended April 30, 2015, spurred by healthy monetary conditions in the U.S. and direct injections of quantitative easing or other monetary support in various foreign geographies. In the U.S., various equity indices returned roughly mid-single-digits in the period, led by the health care sector, merger and acquisitions activity, and reasonable strength in the overall U.S. economy. Later in the period, however, slowing corporate earnings growth from falling commodity prices, the strong dollar, and a weaker economy in the first quarter of 2015 led to small corrections in the mid- and small-cap markets. Risk-free Treasury rates fell, and prices rose, continuing a trend from earlier in 2014 as the U.S. Federal Reserve (Fed) kept pushing out the normalization of short-term monetary policy. However, high-yield bonds, a key asset class for the Fund, returned less as spreads widened on exposure to the oil & gas sector and lower liquidity from dealer participants from regulatory changes.

Convertible bond returns were satisfactory, compared to equity indices, as the asset class piggybacked off the higher returns from the highly represented sectors of health care and technology and lower risk-free rates to come to returns that mimicked the equity indices. Exposure to foreign convertibles also helped as overseas securities benefitted from much higher equity returns and even more pronounced declines in bond yields and corporate bond spreads than the U.S. The announcement of a large asset purchase program by the European Central Bank (ECB) and expansion of the existing program by the Bank of Japan led to large advances in equity and bond markets there as well as large declines in the respective currencies. The Fund's policy to hedge foreign currency exposure helped it to take advantage of asset price increases without suffering the related currency depreciation.

61 AVK 1 ADVENT CLAYMORE CONVERTIBLE SECURITIES AND INCOME FUND SEMIANNUAL REPORT

April 30, 2015

How did the Fund perform in this environment?

All Fund returns cited—whether based on net asset value (NAV) or market price—assume the reinvestment of all distributions. For the six-month period ended April 30, 2015, the Fund generated a total return based on market price of 2.43% and a total return of 2.84% based on NAV. As of April 30, 2015, the Fund's market price of \$17.18 represented a discount of 9.39% to NAV of \$18.96. As of October 31, 2014, the Fund's market price of \$17.34 represented a discount of 8.74% to NAV of \$19.00.

Past performance is not a guarantee of future results. The Fund's NAV performance data reflect fees and expenses of the Fund. The market price of the Fund's shares fluctuates from time to time, and it may be higher or lower than the Fund's NAV.

How has the Fund's leverage strategy affected performance?

As part of its investment strategy, the Fund utilizes leverage to finance the purchase of additional securities that provide increased income and potentially greater appreciation potential to common shareholders than could be achieved from a portfolio that is not leveraged.

The Fund's leverage outstanding as of April 30, 2015, including borrowing and reverse repurchase agreements or the issuance of commercial paper or other forms of debt, was \$262 million, approximately 37% of the Fund's total managed assets.

There is no guarantee that the Fund's leverage strategy will be successful, and the Fund's use of leverage may cause the Fund's NAV and market price of common shares to be more volatile.

The Fund's use of leverage remained unchanged in absolute dollars as the fiscal half-year progressed. The Fund's total return, defined as the return inclusive of reinvested dividends, was slightly higher than the cost of that leverage for the fiscal half-year. Therefore, on a simple comparison, the use of leverage had a modestly enhancing effect on shareholder returns for the period.

What was the impact of the Fund's covered call strategy?

The Fund continues to seek income from occasionally overwriting equity positions and convertibles with call options. Equity allocations in the Fund declined in the six months ended April 30, 2015, as the Investment Manager sought out greater income and better relative value in the high-yield market. That plus a continued low-volatility environment led to lower opportunities to generate call option income than previous years. The CBOE SPX Volatility Index (VIX) averaged 15.5 for the six month period, slightly higher than the 14.0 of the previous fiscal year, but both are quite low by historical averages, and the figure had dropped again to 12.5 as of this writing in mid-May. While there is a reasonable forecast of higher volatility as the Fed embarks on a rate hike strategy, neither the hikes nor higher volatility have occurred yet, and the Fund will remain in a monitoring state for better opportunities to write option contracts for income in the near future.

Edgar Filing: ADVENT	CLAYMORE CONVERTIBLE SECURITIES & INCOME FUND - Form N-CSRS

April 30, 2015

How did other market measures perform in this environment?

For the six-month period ended April 30, 2015, the return of the Bank of America Merrill Lynch All Convertibles Index was 3.91%.

The return of the Bank of America Merrill Lynch High Yield Master II Index was 1.51%.

The Fund's mandate differs materially from each of the individual indices. The Fund also maintains leverage and incurs transaction costs, advisory fees and other expenses, while these indices do not.

Please discuss the Fund's distributions.

In each month of the period, the Fund paid a monthly distribution of \$0.0939 per share. The most recent monthly distribution represents an annualized distribution rate of 6.56% based upon the last closing market price of \$17.18 as of April 30, 2015. There is no guarantee of any future distributions or that the current returns and distribution rate will be maintained. Please see Note 2(m) on page 43 for more information on distributions for the period.

How was the Fund's portfolio allocated among asset classes during the six months ended April 30, 2015, and how did this influence performance?

At April 30, 2015, the Fund's assets were invested approximately 64.3% in convertible bonds, convertible preferred securities, and mandatory convertibles; 30.8% in corporate bonds; 2.7% in equities; 1.8% in cash and cash equivalents; and 0.4% in senior floating rate interests. At the previous report at October 31, 2014, the Fund's assets were invested 65.9% in convertible bonds, convertible preferred securities, and mandatory convertibles; 27.6% in corporate bonds; 2.6% in equities; 3.2% in cash and cash equivalents; and 0.7% in senior floating rate interests. The rise in allocation toward corporate bonds and stocks reflects better risk/reward opportunities presenting themselves in corporate bonds after a late 2014 sell-off and the increase in equity valuations forecast with the delay of monetary tightening by the Federal Reserve and the drop in risk-free rates during the period. The convertible market also richened somewhat during the fiscal half-year, which led the Fund to reduce allocations in favor of straight bonds and equities.

International investments were 14.2% of the Fund's long-term investments at April 2015, up from 12.3% in October 2014. Lower valuations and numerous central banks providing quantitative easing or monetary policy support led the Fund to take advantage of appreciation potential, particularly for equity-sensitive securities. The effect of currency fluctuations has been hedged in recent times so shareholders receive the local currency return of the underlying security, an advantageous policy in recent periods where foreign currencies have depreciated against the U.S. dollar.

Which investment decisions had the greatest effect on the Fund's performance?

Among the large winners for the Fund over the period were holdings related to Ctrip.com International Ltd., Kingsoft Corp. Ltd., Penn Virginia Corp., Alta Mesa Holdings LP, and Kindred Healthcare, Inc.

Although foreign issuers are a relatively small part of the Fund, the large moves in equity and bond markets in overseas markets during the period led to some outsized gains for certain holdings.

 $8\,\mathrm{l}$ AVK I ADVENT CLAYMORE CONVERTIBLE SECURITIES AND INCOME FUND SEMIANNUAL REPORT

April 30, 2015

Chinese issuers shined with travel booking leader Ctrip.com International Ltd. (1.6% of long-term investments at period end) and Kingsoft Corp. Ltd. (0.4% of long-term investments at period end), an Internet and mobile software application company, providing noticeable gains. Ctrip convertibles benefitted after a period of investment with stronger revenue guidance for the March quarter, and Kingsoft's Cheetah Mobile subsidiary continued to grow at over triple-digit rates with rapid global user acquisition and advertising monetization metrics. Both convertibles benefitted from monetary easing at the short end of the curve from the People's Bank of China helping equity valuations.

In high-yield, bonds of some oil issuers in the Fund reversed higher as declines in global production helped stabilize or even spur a rebound in oil commodity prices. Large previous losses in Penn Virginia Corp. (0.3% of long-term investments at period end), an independent oil and gas company, and Alta Mesa Holdings LP (0.4% of long-term investments at period end), a privately held company engaged in onshore oil and gas acquisition and production, dissipated, and in the case of Alta Mesa the Fund managed to add to the position at bargain prices and ride the recovery.

In the U.S., the Fund continued to benefit from a myriad of health care investments—one example was mandatory convertibles in nursing care center operator Kindred Healthcare, Inc. (0.6% of long-term investments at period end), which is benefitting from synergies from its takeover of competitor Gentiva Health that closed in February.

Among the leading detractors for the Fund over the last year were holdings related to Wynn Resorts Ltd., Chesapeake Energy Corp., and Micron Technology, Inc.

Equity held in casino operator Wynn Resorts Ltd. (0.2% of long-term investments at period end) performed poorly, as the company struggled with a region-wide decline in gaming from corruption crackdowns and a slowing economy in China.

Preferred stock in Chesapeake Energy Corp. (0.7% of long-term investments at period end) fell after the oil and natural gas producer reported poor production trends with an asset base made smaller by recent asset sales to bolster liquidity.

Convertibles in memory semiconductor maker Micron Technology, Inc. (1.1% of long-term investments at period end) declined as the company's profits suffered with a weakening personal computer market and weak pricing in its secondary market of FLASH storage chips. In general, these were company-specific issues that affected other investments in the same sector to a much smaller degree.

Do you have any other comments about the markets and the Fund?

Markets seem to have taken an aware but thus far unbothered attitude toward the specter of the first Fed short-term monetary policy rate increases since 2004. While there is general consensus there will be some level of increases in the Fed funds rate in the second half of 2015, the Open Market Committee's attitude toward near-term economic data as determining future moves has introduced much uncertainty and debate over the slope and timing of rate increases into 2016. Further increasing uncertainty has been the slowdown in the U.S. economy in the first half of 2015. Foreign bond markets are generally highly priced from the liquidity injections from various central banks but

Edgar Filing: ADVENT CLAYMORE CONVERTIBLE SECURITIES & INCOME FUND - Form N-CSRS AVK I ADVENT CLAYMORE CONVERTIBLE SECURITIES AND INCOME FUND SEMIANNUAL REPORT I 9

April 30, 2015

will have that continued support through 2015 or longer with the potential of economic recovery aiding the balance sheets and leverage levels of corporate issuers. Prices of some select commodities have begun to rebound, perhaps reflecting a stronger foreign growth outlook than in the previous months.

Index Definitions

Indices are unmanaged, do not use leverage, and do not experience fees, expenses or transaction costs, and it is not possible to invest directly in an index.

Bank of America Merrill Lynch All Convertibles Index is comprised of approximately 500 issues of convertible bonds and preferred stock of all qualities.

Bank of America Merrill Lynch High Yield Master II Index is a commonly used benchmark index for high yield corporate bonds. It is a measure of the broad high yield market.

VIX is the ticker symbol for the Chicago Board Options Exchange Market Volatility Index, a popular measure of the implied volatility of S&P 500 index options. It is a weighted blend of prices for a range of options on the S&P 500 index.

AVK Risks and Other Considerations

The views expressed in this report reflect those of the Portfolio Managers only through the report period as stated on the cover. These views are subject to change at any time, based on market and other conditions and should not be construed as a recommendation of any kind. The material may also contain forward-looking statements that involve risk and uncertainty, and there is no guarantee they will come to pass. There can be no assurance that the Fund will achieve its investment objectives. The value of the Fund will fluctuate with the value of the underlying securities. Historically, closed-end funds often trade at a discount to their net asset value. The Fund is subject to investment risk, including the possible loss of the entire amount that you invest. Past performance does not guarantee future results.

Please see guggenheiminvestments.com/avk for a detailed discussion of the Fund's risks and considerations.

indebtedness(g)	\$	2,707		\$	2,710		\$ 2,779		N/A		N/A		N/A	

- (a) Based on average shares outstanding during the period.
- (b) Total return is calculated assuming an initial investment made at the net asset value at the beginning of the period, reinvestment of all dividends and distribution at net asset value during the period, and redemption on the last day of the period. Transaction fees are not reflected in the calculation of total investment return.
- (c) Calculated by subtracting the Fund's total liabilities from the Fund's total assets and dividing by the total number of preferred shares outstanding.
- (d) Annualized.
- (e) Expense ratio does not reflect the fees and expenses incurred indirectly by the Fund as a result of its investment in shares of business development companies. If these fees were included in the expense ratio, the increase to the expense ratio would be approximately 0.08%, 0.02% and 0.08%, respectively, for the years ended October 31, 2014, 2013 and 2012.
- (f) Excluding interest expense, the operating expense ratio for the period ended April 30, 2015 and the years ended October 31, would be:

April 30,					
2015	2014	2013	2012	2011	2010
1.41%	1.37%	1.47%	1.72%	1.58%	1.50%

Edgar Filing: ADVENT CLAYMORE CONVERTIBLE SECURITIES & INCOME FUND - Form N-CSRS

- (g) Calculated by subtracting the Fund's total liabilities (not including the borrowings) from the Fund's total assets and dividing by the total borrowings.
- (h) Included in the total return at net asset value is the impact of the tender and repurchase by the Fund of a portion of its AMPS at 99% of the AMPS' per share liquidation preference. Had this transaction not occurred, the total return at net asset value would have been lowered by 0.67%.

N/A Not Applicable

See notes to financial statements.

NOTES TO FINANCIAL STATEMENTS (Unaudited) April 30, 2015

Note 1 – Organization:

Advent Claymore Convertible Securities and Income Fund (the "Fund") was organized as a Delaware statutory trust on February 19, 2003. The Fund is registered as a diversified, closed-end management investment company under the Investment Company Act of 1940, as amended.

The Fund's investment objective is to provide total return through a combination of capital appreciation and current income. The Fund pursues its investment objective by investing at least 80% of its assets in a diversified portfolio of convertible securities and non-convertible income producing securities.

Note 2 – Accounting Policies:

The preparation of the financial statements in accordance with U.S. generally accepted accounting principles ("GAAP") requires management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from these estimates.

The following is a summary of the significant accounting policies followed by the Fund.

(a) Valuation of Investments

Equity securities listed on an exchange are valued at the last reported sale price on the primary exchange on which they are traded. Equity securities traded on an exchange or on the over-the-counter market and for which there are no transactions on a given day are valued at the mean of the closing bid and ask prices. Securities traded on NASDAQ are valued at the NASDAQ Official Closing Price. Debt securities are valued by independent pricing services or dealers using the mean of the closing bid and ask prices for such securities or, if such prices are not available, at prices for securities of comparable maturity, quality and type. If sufficient market activity is limited or does not exist, the pricing providers or broker-dealers may utilize proprietary valuation models which consider market characteristics such as benchmark yield curves, option-adjusted spreads, credit spreads, estimated default rates, coupon rates, anticipated timing of principal repayments, underlying collateral, or other unique security features in order to estimate relevant cash flows, which are then discounted to calculate a security's fair value. Exchange-traded funds and listed closed-end funds are valued at the last sale price or official closing price on the exchange where the security is principally traded. Exchange-traded options are valued at the closing price, if traded that day. If not traded, they are valued at the mean of the bid and ask prices on the primary exchange on which they are traded. Futures contracts are valued using the settlement price established each day on the exchange on which they are traded. Swaps are valued daily by independent pricing services or dealers using the mid price. Forward foreign currency exchange contracts are valued daily at current exchange rates. The Fund values money market funds at net asset value. Short-term securities with remaining maturities of 60 days or less are valued at market price, or if a market price is not available, at amortized cost, provided such amount approximates market value.

For those securities where quotations or prices are not available, the valuations are determined in accordance with procedures established in good faith by management and approved by the Board of Trustees. A valuation committee consisting of representatives from investment management, fund administration, legal and compliance is responsible for the oversight of the valuation process of the Fund and convenes monthly, or more frequently as needed. The valuation committee reviews

NOTES TO FINANCIAL STATEMENTS (Unaudited) continued

April 30, 2015

monthly Level 3 fair valued securities methodology, price overrides, broker quoted securities, price source changes, illiquid securities, unchanged priced securities, halted securities, price challenges, fair valued securities sold and back testing trade prices in relation to prior day closing prices. On a quarterly basis, the valuations and methodologies of all Level 3 fair valued securities are presented to the Fund's Board of Trustees.

Valuations in accordance with these procedures are intended to reflect each security's (or asset's) fair value. Such fair value is the amount that the Fund might reasonably expect to receive for the security (or asset) upon its current sale. Each such determination is based on a consideration of all relevant factors, which are likely to vary from one security to another. Examples of such factors may include, but are not limited to: (i) the type of security, (ii) the initial cost of the security, (iii) the existence of any contractual restrictions on the security's disposition, (iv) the price and extent of public trading in similar securities of the issuer or of comparable companies, (v) quotations or evaluated prices from broker-dealers and/or pricing services, (vi) information obtained from the issuer, analysts, and/or the appropriate stock exchange (for exchange traded securities), (vii) an analysis of the company's financial statements, and (viii) an evaluation of the forces that influence the issuer and the market(s) in which the security is purchased and sold (e.g. the existence of pending merger activity, public offerings or tender offers that might affect the value of the security). There were no securities fair valued in accordance with such procedures established by the Board of Trustees as of April 30, 2015.

GAAP requires disclosure of fair valuation measurements as of each measurement date. In compliance with GAAP, the Fund follows a fair value hierarchy that distinguishes between market data obtained from independent sources (observable inputs) and the Fund's own market assumptions (unobservable inputs). These inputs are used in determining the value of the Fund's investments and summarized in the following fair value hierarchy:

Level 1 – quoted prices in active markets for identical securities

Level 2 – quoted prices in inactive markets or other significant observable inputs (e.g. quoted prices for similar securities; interest rates; prepayment speed; credit risk; yield curves)

Level 3 – significant unobservable inputs (e.g. discounted cash flow analysis; non-market based methods used to determine fair value)

Observable inputs are those based upon market data obtained from independent sources, and unobservable inputs reflect the Fund's own assumptions based on the best information available. A financial instrument's level within the fair value hierarchy is based on the lowest level of any input both individually and in aggregate that is significant to the fair value measurement. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The following are certain inputs and techniques that are generally utilized to evaluate how to classify each major type of investment in accordance with GAAP.

Edgar	Filing: ADVE	INT CLAYMORE	CONVERTIBLE	E SECURITIES 8	R INCOME FUND -	 Form N-CSRS

NOTES TO FINANCIAL STATEMENTS (Unaudited) April 30, 2015

Equity Securities (Common and Preferred Stock) – Equity securities traded in active markets where market quotations are readily available are categorized as Level 1. Equity securities traded in inactive markets and certain foreign equities are valued using inputs which include broker quotes, prices of securities closely related where the security held is not trading but the related security is trading, and evaluated price quotes received from independent pricing providers. To the extent that these inputs are observable, such securities are categorized as Level 2. To the extent that these inputs are unobservable, such securities are categorized as Level 3.

Convertible Bonds & Notes – Convertible bonds and notes are valued by independent pricing providers who employ matrix pricing models utilizing various inputs such as market prices, broker quotes, prices of securities with comparable maturities and qualities, and closing prices of corresponding underlying securities. To the extent that these inputs are observable, such securities are categorized as Level 2. To the extent that these inputs are unobservable, such securities are categorized as Level 3.

Corporate Bonds & Notes – Corporate bonds and notes are valued by independent pricing providers who employ matrix pricing models utilizing various inputs such as market prices, broker quotes, and prices of securities with comparable maturities and qualities, and closing prices of corresponding underlying securities. To the extent that these inputs are observable, such securities are categorized as Level 2. To the extent that these inputs are unobservable, such securities are categorized as Level 3.

Listed derivatives that are actively traded are valued based on quoted prices from the exchange and categorized in level 1 of the fair value hierarchy. Over-the-counter (OTC) derivative contracts including forward currency contracts and option contracts derive their value from underlying asset prices, indices, reference rates, and other inputs. Depending on the product and terms of the transaction, the fair value of the OTC derivative products can be modeled taking into account the counterparties' creditworthiness and using a series of techniques, including simulation models. Many pricing models do not entail material subjectivity because the methodologies employed do not necessitate significant judgments, and the pricing inputs are observed from actively quoted markets. These OTC derivatives are categorized within level 2 of the fair value hierarchy.
