GeoGlobal Resources Inc.

(a development stage enterprise)

Notes to the Consolidated Financial Statements

(Unaudited)

June 30, 2010

1. Organization and Nature of Operations

The Company is engaged primarily in the pursuit of petroleum and natural gas through exploration and development in India. Since inception, the efforts of GeoGlobal have been devoted to the pursuit of Production Sharing Contracts with the Gujarat State Petroleum Corporation, Oil India Limited and the Government of India and the exploration and development thereof. The Company is a Delaware corporation whose common stock is listed and traded on the NYSE/Amex Exchange under the symbol GGR.

On August 29, 2003, the Company commenced oil and gas exploration activities. As of June 30, 2010, the Company has not achieved its planned principal operations from its oil and gas operations. Accordingly, the Company's activities are considered to be those of a "Development Stage Enterprise". Among the disclosures required, are that the Company's financial statements be identified as those of a development stage enterprise. In addition, the statements of operations and comprehensive loss, stockholders' equity and cash flows are required to disclose all activity since the Company's date of inception. The Company will continue to prepare its financial statements and related disclosures as those of a development stage enterprise until such time that the Company achieves planned principle operations.

2. Going Concern

To date, the Company has not achieved its planned principal operations and is considered to be in the development stage. The Company incurs cash outflows from operations, and at this time all exploration activities and overhead expenses are financed by way of equity issuance, oil sales and interest income. The recoverability of the costs incurred to date is uncertain and dependent upon achieving significant commercial production or sale.

The Company's ability to continue as a going concern is dependent upon obtaining the necessary financing to complete further exploration and development activities and generate profitable operations from its oil and natural gas interests in the future. The Company's current operations are dependent upon the adequacy of its current assets to meet its current expenditure requirements and the accuracy of management's estimates of those requirements. Should those estimates be materially incorrect, the Company's ability to continue as a going concern will be impaired. The Company's financial statements as at and for the period ended June 30, 2010 have been prepared on a going concern basis, which contemplates the realization of assets and the settlement of liabilities and commitments in the normal course of business. During the period ended June 30, 2010, the Company incurred a net loss of approximately \$2.1 million, used approximately \$2.3 million of cash flow in its operating activities, used approximately \$8.2 million in its investing activities and had an accumulated deficit of approximately \$30.9 million. These matters raise doubt about the Company's ability to continue as a going concern.

The Company expects to incur expenditures to further its exploration programs and the Company's existing cash balance and any cash flow from operating activities is not sufficient to satisfy its current obligations and meet its commitments of \$29.8 million over the next three and one half years ending December 31, 2013 of which, approximately \$17.0 million is attributable to the twelve months ending June 30, 2011. The Company is considering various alternatives to remedy any future shortfall in capital. The Company deems it necessary to raise capital for continued exploration and development expenditures through equity markets, debt markets or other financing arrangements, which could include the sale of oil and gas interests or participation arrangements in oil and gas interests. There can be no assurance this capital will be available and if it is not, we may be forced to substantially

curtail or cease exploration block acquisition and/or exploration and development expenditures.

As at June 30, 2010, the Company has working capital of approximately \$1.4 million which is available for the Company's future operations. In addition, the Company has \$9.5 million in restricted deposits pledged as security against the minimum work program which will be released upon completion of the minimum work program.

Should the going concern assumption not be appropriate and the Company is not able to realize its assets and settle its liabilities, commitments (as described in note 12) and contingencies (as described in note 13) in the normal course of operations, these unaudited consolidated financial statements would require adjustments to the amounts and classifications of assets and liabilities, and these adjustments could be significant.

These unaudited consolidated financial statements do not reflect the adjustments or reclassifications of assets and liabilities that would be necessary if the Company is unable to continue as a going concern.

Notes to the Consolidated Financial Statements

(Unaudited)

June 30, 2010

3. Significant Accounting Policies

Basis of presentation

The accompanying unaudited consolidated financial statements of the Company have not been audited and are presented in United States dollars unless otherwise noted and have been prepared by management in accordance with accounting principles generally accepted in the United States of America.

In the opinion of management, these unaudited consolidated financial statements reflect all of the normal and recurring adjustments necessary to present fairly the financial position at June 30, 2010 and 2009, the results of operations for the three and six months ended and cash flows for the three months ended June 30, 2010 and 2009 and for the period from inception of August 21, 2002 to June 30, 2010. In preparing these accompanying unaudited consolidated financial statements, management has made certain estimates and assumptions that affect reported amounts in the financial statements and related disclosures. The Company bases its estimates on various assumptions that are believed to be reasonable under the circumstances. Accordingly, actual results may differ significantly from these estimates under different assumptions or circumstances.

Certain information, accounting policies, and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted in this Form 10-Q pursuant to certain rules and regulations of the Securities and Exchange Commission. These Unaudited consolidated financial statements should be read in conjunction with the audited consolidated financial statements and notes included in the Company's Annual Report on Form 10-K for the year ended December 31, 2009. The results of operations for interim periods are not necessarily indicative of the results to be expected for the full year.

Use of estimates

The preparation of the unaudited consolidated financial statements in accordance with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results may differ from these estimated amounts due to factors such as fluctuations in interest rates, currency exchange rates, inflation levels and commodity prices, changes in economic conditions and legislative and regulatory changes.

Significant estimates with regard to the unaudited consolidated financial statements include the estimated carrying value of unproved properties, the estimated cost and timing related to asset retirement obligations, stock-based compensation and contingencies.

4. Restricted Deposits

The Company's PSCs relating to exploration blocks onshore and offshore India contain provisions whereby the joint venture participants must provide the Government of India a bank guarantee in the amount of 35% of the participant's share of the minimum work program for a particular phase, to be undertaken annually during the budget period April 1 to March 31. These bank guarantees have been provided to the Government of India and serve as guarantees for the performance of such minimum work programs and are in the form of irrevocable letters of credit which are secured by

term deposits of the Company in the same amount.

The term deposits securing these bank guarantees are as follows:

	June 30, 2010	December 31, 2009
	\$	\$
Exploration Blocks – India		
Mehsana	160,000	160,000
Sanand/Miroli	1,300,000	1,300,000

(a development stage enterprise)

Notes to the Consolidated Financial Statements

(Unaudited)

June 30, 2010

4. Restricted Deposits (continued)

The following term deposits are classified as current restricted deposits:

	June 30, 2010	June 30, 2009
	\$	\$
Sanand/Miroli	1,300,000	--
Ankleshwar	1,490,000	--
DS 03	450,000	--
KG Onshore	575,000	--
	3,815,000	--

Subsequent to June 30, 2010, term deposits securing bank guarantees amounting to \$2,515,000 included in the current portion of the restricted deposits have been released.

5. Property and Equipment

The amounts capitalized as oil and natural gas properties were incurred for the purchase, exploration and ongoing development of various properties in India.

	June 30, 2010	December 31, 2009
	\$	\$
Oil and natural gas properties (using the full-cost method)		
Unproved properties	56,484,267	51,890,959
Proved properties	4,513,000	4,313,000
Total oil and natural gas properties	60,997,267	56,203,959
Building	889,609	889,609
Computer, office and other equipment	583,560	583,067
Total property and equipment	62,470,436	57,676,635
Accumulated impairment of oil and natural gas properties	(10,098,015)	(10,098,015)
Accumulated depletion	(460,700)	(293,700)
Accumulated depreciation	(537,981)	(471,916)
Total property and equipment, net	51,373,740	46,813,004

The unproved oil and natural gas properties consist of contract interests in 10 exploration blocks held in India.

The Company has capitalized \$244,902 for the six months ended June 30, 2010 (June 30, 2009 – \$650,976) of general and administrative expenses directly related to exploration activities. These amounts include \$54,506 (June 30, 2009 –

\$378,743) of capitalized stock-based compensation expense and capitalized support equipment depreciation of \$34,730 (June 30, 2009 - \$25,931).

Impairment of Oil and Gas Properties

The Company performed a ceiling test calculation at June 30, 2010, to assess the ceiling limitation of its proved oil properties. At June 30, 2010, the Company's net capitalized costs of proved oil and natural gas properties did not exceed the ceiling limitation.

DOC

GeoGlobal Resources Inc.

(a development stage enterprise)

Notes to the Consolidated Financial Statements

(Unaudited)

June 30, 2010

6. Asset Retirement Obligation

Asset retirement obligations are recorded for legal obligations where the Company will be required to retire, dismantle, abandon and restore tangible long-lived assets.

The following table summarizes the changes in the asset retirement obligation:

	June 30, 2010 \$	December 31, 2009 \$
Asset retirement obligation at beginning of period	775,000	633,598
Liabilities incurred	--	85,783
Accretion expense	32,090	55,619
Asset retirement obligation at end of period	807,090	775,000

7. Fair Value Measurements

The carrying values of cash and cash equivalents, accounts receivable, restricted deposits, accounts payable, accrued liabilities and amounts due to related companies approximate their estimated fair value due to their short terms to maturity.

8. Warrants

From time to time, the Company has issued compensation options, compensation warrants and or warrants (collectively the "Warrants") in connection with a finance offering as an incentive to participate in such offerings. The fair value of any Warrants issued is recorded as additional paid-in capital. The fair value of the Warrants is determined using the Black-Scholes option pricing model and management's assumptions as disclosed.

Activity with respect to all warrants is presented below for the periods as noted:

	June 30, 2010		December 31, 2009	
	Warrants	Weighted Average Exercise Price	Warrants	Weighted Average Exercise Price
	#	\$	#	\$
Outstanding warrants at the beginning of period	5,599,716	7.91	5,599,716	7.91
Warrants granted	--	--	--	--
Warrants exercised	--	--	--	--
Warrants outstanding at the end of period	5,599,716	7.91	5,599,716	7.91
Exercisable at end of period	5,599,716	7.91	5,599,716	7.91

The weighted average remaining life by exercise price as of June 30, 2010 is summarized below:

	Outstanding and Exercisable #	Weighted Average Remaining Life (Months)	Weighted Average Exercise Price \$
Warrants			
Compensation Options	535,944	11.7	5.55
Compensation Warrants	97,572	11.7	9.00
Stock Purchase Warrants	4,966,200	11.7	8.14
	5,599,716	11.7	7.91

The warrants have certain terms and conditions as follows:

Compensation options enable the holder to purchase one fully-paid non-assessable common share of the Company at a specified price up to June 20, 2011. Certain compensation options consist of one compensation option and one half of one common share purchase warrant referred to as compensation warrants;

Compensation warrants enable the holder to purchase one fully-paid non-assessable common share of the Company at a specified price up to June 20, 2011; and

Share Purchase Warrants enable the holder to purchase one fully-paid non-assessable common share of the Company at a specified price up to June 20, 2011.

DOC

9. Stock Options

The Company's 2008 Stock Incentive Plan (2008 Plan)

Under the terms of the 2008 Plan, 12,000,000 common shares have been reserved for issuance on exercise of options granted under the 2008 Plan. As at June 30, 2010, the Company had 9,500,000 common shares remaining for the grant of options under the 2008 Plan. The Board of Directors of the Company may amend or modify the 2008 Plan at any time, subject to any required stockholder approval. The 2008 Plan will terminate on the earliest of: (i) May 30, 2018; (ii) the date on which all shares available for issuance under the 2008 Plan have been issued as fully-vested shares; or, (iii) the termination of all outstanding options in connection with certain changes in control or ownership of the Company.

Stock-based Compensation

The Company is required to recognize compensation cost for stock-based compensation arrangements with employees, non-employee consultants and non-employee directors based on their fair value using the Black-Scholes option-pricing model, such cost to be expensed over the compensations' respective vesting periods. For awards with graded vesting, in which portions of the award vest in different periods, the Company recognizes compensation costs over the vesting periods for each separate vested tranche.

The following table summarizes stock-based compensation for employees, non-employee consultants and independent directors:

	Three months ended June 30, 2010	Three months ended June 30, 2009	Six months ended June 30, 2010	Six months ended June 30, 2009	Period from Inception August 21, 2002 to June 30, 2010
	\$	\$	\$	\$	\$
Stock-based compensation					
Unaudited Consolidated Statements of Operations					
General and administrative	145,964	215,825	248,790	579,170	3,680,485
Consulting fees	(8,980)	10,253	(45,216)	26,153	3,353,676
	136,984	226,078	203,574	605,323	7,034,161
Consolidated Balance Sheets

	186,331	322,657	258,080	984,066	12,246,335

At June 30, 2010, the total compensation cost related to non-vested awards not yet recognized was \$955,392 (December 31, 2009 – \$382,483) which will be recognized over a weighted-average period of 1 year. During the three and six months ended June 30, 2010 and 2009, no options were exercised.

No income tax benefit has been recognized relating to stock-based compensation expense and no tax benefits have been realized from the exercise of stock options.

The fair value of each option granted was estimated on the date of grant using the Black-Scholes option-pricing model. Weighted average assumptions used in the valuation are disclosed in the following table:

	Three months ended	Three months ended	Six months ended	Six months ended

10. Related Party Transactions

Related party transactions are measured at the exchange amount which is the amount of consideration established and agreed by the related parties.

Roy Group (Mauritius) Inc.

In March 2003, the Company entered into a Participating Interest Agreement with Roy Group (Mauritius) Inc. (a party related by a common officer and director), whereby the Company assigned and holds in trust for 50% of the benefits and obligations of the production sharing contract covering the KG Offshore Block leaving the Company with a net 5% participating interest in the KG Offshore Block. The assignment of interest is subject to approval by the Government of India.

Under the terms of the Participating Interest Agreement and until approval by the Government of India, the Company retains the exclusive right to deal with the other partners to the KG Offshore Block and is entitled to make all decisions regarding the interest assigned to Roy Group (Mauritius) Inc. The Company has a right of set-off against sums owing to GeoGlobal by Roy Group (Mauritius) Inc. In the event that the Indian government consent is delayed or denied, resulting in either Roy Group (Mauritius) Inc. or the Company being denied an economic benefit it would have realized under the Participating Interest Agreement, the parties agreed to amend the Participating Interest Agreement or take other reasonable steps to assure that an equitable result is achieved consistent with the parties' intentions contained in the Participating Interest Agreement.

10. Related Party Transactions (continued)

Roy Group (Barbados) Inc. (Roy Group)

Roy Group is related to the Company by common management and is controlled by an officer and director of the Company who is also a principal shareholder of the Company. On August 29, 2003, the Company entered into a Technical Services Agreement with Roy Group to provide services to the Company as assigned by the Company and to bring new oil and gas opportunities to the Company. The term of the agreement, as amended, extends through December 31, 2010 and continues for successive periods of one year thereafter. Roy Group receives consideration of \$350,000 per year, as outlined and recorded below:

	Three months ended June 30, 2010	Three months ended June 30, 2009	Six months ended June 30, 2010	Six months ended June 30, 2009	Period from Inception, August 21, 2002 to June 30, 2010

Notes to the Consolidated Financial Statements

(Unaudited)

June 30, 2010

12. Commitments

Pursuant to current production sharing contracts, the Company is required to perform minimum exploration activities that include various types of surveys, acquisition and processing of seismic data and drilling of exploration wells. These obligations have not been provided for in the financial statements. The anticipated payments due under these agreements in effect are as follows:

	Operating Leases	Production Sharing Contracts
	\$	\$
2010 (remainder)	96,000	10,175,000
2011	192,000	13,286,000
2012	192,000	4,694,000
2013	16,000	1,650,000
Thereafter	--	--
	496,000	29,805,000

The Company has applied to increase its participating interest under a certain production sharing contract from 10% to 20%. If this application is approved, the Company's commitments would increase by \$2.3 million in 2010, \$2.0 million in 2011, \$3.5 million in 2012 and \$1.6 million in 2013. To date, the approval has not been granted.

The Company has an office lease commitment in Calgary, Alberta, Canada which expires January 2013.

13. Contingencies

GSPC Dispute

GSPC, the operator of the KG Offshore Block in which the Company has a net 5% carried interest, has advised the Company that they are seeking from the Company its pro rata portion of the amount by which the sums expended by GSPC under all phases for the Minimum Work Program as set forth in the PSC for the KG Offshore Block in carrying out exploration activities on the block exceeds the amount that GSPC deems to be the Company's pro rata portion of a financial commitment under all phases included in the parties' joint bid for the award of the KG Offshore Block by the Government of India.

GSPC contends that this excess amount is not within the terms of the Carried Interest Agreement. GSPC asserts that the Company is required to pay 10% of the exploration expenses over and above gross costs of \$109.7 million (10% being \$10.97 million including the net 5% interest of Roy Group (Mauritius) Inc.) plus interest. The Company disputes the claim of GSPC.

Based on the most recent information available from GSPC dated March 25, 2010, GSPC asserts that the amount invested in the KG Offshore Block as of September 30, 2009 is approximately Rs. 5,923 Crore (approximately \$1.5 billion) (10% being \$150 million including the net 5% interest of Roy Group (Mauritius) Inc.).

The Company has disputed GSPC's right to seek the payment and believes the payment GSPC is seeking is in breach of the Carried Interest Agreement. The Company has advised GSPC that it has fulfilled its obligations under the

Carried Interest Agreement to provide extensive technical assistance without any further remuneration other than the carried interest. The Company also has obtained the opinion of prominent Indian legal counsel who has advised that, among other things, under the terms of the agreements between the parties, and in particular the Carried Interest Agreement, the Company is not liable to pay any amount to GSPC for either costs and expenses incurred or otherwise before reaching the stage of commercial production.

In addition, the Company has disputed GSPC's right, which it purported to claim in November 2008, to undertake an additional work program over and above the minimum work program under the PSC as either Joint Operations or as Exclusive Operations under the terms of the PSC and that the Company must elect whether it wishes to participate in these future exploration activities as Joint Operations. GSPC advised the Company that if it failed to make the requested election they would conduct these drilling activities as Exclusive Operations as defined in the PSC. In response, the Company advised GSPC that it elected to participate in the drilling operations as a Joint Operation under the terms of the PSC and Joint Operating Agreement and that the exercise was done pursuant to the terms of our Carried Interest Agreement with GSPC, and as such the Company would be carried for 100% of all of its share of any costs during the additional exploration phase prior to the start of initial commercial production and the Carried Interest Agreement extends through the exploration period of the PSC.

DOC

GeoGlobal Resources Inc.

(a development stage enterprise)

Notes to the Consolidated Financial Statements

(Unaudited)

June 30, 2010

13. Contingencies (continued)

The Company continues to be of the view that, under the terms of the Carried Interest Agreement, it has a carried interest in the exploration activities conducted by the parties on the KG Offshore Block for 100% of its share (including the share of Roy Group (Mauritius) Inc.) of costs during the exploration phase prior to the start date of initial commercial production on the KG Offshore Block. To date, commercial production has not been achieved on the block. As such, the Company is of the view that the additional costs of drilling future exploration or development wells, or the costs of building the production facilities shall be subject to the Carried Interest Agreement and shall be carried by GSPC. The Company intends to vigorously protect its contractual rights in accordance with the dispute resolution process under the Carried Interest Agreement, the PSC and the Joint Operating Agreement as may be appropriate. However, there can be no assurance that GSPC will not institute arbitration or other proceedings seeking to recover the sum or otherwise contend the Company is in breach of the PSC. The effect of GSPC seeking payment of this sum may hinder the Company's capital raising and other activities. In September 2007, the Company commenced discussions with GSPC in an effort to reach an amicable resolution. A draft proposal has been put forward to GSPC in both June and December of 2009 and again in July 2010 in order to settle this dispute amicably. The Company is of the understanding that GSPC Board of Directors' approval is required in order to complete this settlement. The Company is currently awaiting the draft proposal to be presented to the GSPC Board. However, no settlement agreement has been reached as of August 13, 2010 and there can be no assurance that this matter will be settled amicably.

Other Matters

The Company has determined that one of its subsidiaries may be in breach of certain regulatory requirements of the jurisdiction of its organization and the Company is currently taking appropriate steps to remedy the matter. The subsidiary's non-compliance with these regulations may result in a financial penalty being imposed against the subsidiary in an amount at the discretion of the regulatory authority. Management believes the outcome pertaining to the matter at this time is not determinable, and as such no provision has been made in these unaudited consolidated financial statements for the payment of the financial penalty. After further evaluation and consultation with the Company's advisors, the range of the possible penalty has been revised to anywhere from \$nil to \$3.2 million.

ITEM MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF
2. OPERATIONS

Overview

We are engaged, through our subsidiaries, in the exploration for and development of oil and natural gas reserves. At June 30, 2010, we have not yet achieved our planned principal operations and are considered to be a development stage enterprise. We initiated these activities in 2003. At present, these activities are primarily being undertaken in four geological basins located offshore and onshore in India where reserves of oil or natural gas are believed by our management to exist. We are also pursuing exploration opportunities elsewhere in Israel and Colombia but have not as yet entered into any final agreements with respect to these activities.

The exploration rights pursuant to PSCs we have entered into with the Government of India are located in the following areas:

- The Krishna Godavari Basin offshore and onshore in the State of Andhra Pradesh in south eastern India;
 - The Cambay Basin onshore in the State of Gujarat in western India;
- The Deccan Syncline Basin onshore in the State of Maharashtra in west central India; and
 - The Rajasthan Basin onshore in the State of Rajasthan in north western India.

To date, we have not earned significant revenue from these activities and are considered to be in the development stage. The recoverability of the costs we have incurred to date is uncertain and dependent upon us achieving commercial production and sale of hydrocarbons, our ability to obtain sufficient financing to fulfill our obligations under the PSCs in India and upon future profitable operations.

All of the exploration activities in which we are a participant should be considered highly speculative.

Unless the context should otherwise require, references to “we,” “us” and “our” in this Quarterly Report refer to GeoGlobal Resources Inc. and our wholly-owned consolidated subsidiaries. When we refer to GeoGlobal Barbados, we are referring to GeoGlobal Resources (Barbados) Inc., our wholly-owned subsidiary incorporated under the Companies Act of Barbados that is the contracting party under our four PSCs covering four blocks in the Cambay Basin, our two PSCs covering two blocks in the Deccan Syncline Basin, our two PSCs covering two blocks in the Rajasthan Basin and our one PSC covering the KG Onshore Block in the Krishna Godavari Basin. When we refer to GeoGlobal India, we are referring to GeoGlobal Resources (India) Inc., our wholly-owned subsidiary that is the contracting party under our PSC covering one KG Offshore Block in the Krishna Godavari Basin.

The following discussion and analysis of our financial condition and results of operation should be read in conjunction with, and is qualified in its entirety by, the more detailed information including our unaudited consolidated financial statements and the related notes appearing elsewhere in this Quarterly Report. This Quarterly Report contains forward-looking statements that involve risks and uncertainties. Our actual results may differ materially from the results and business plans discussed in the forward-looking statements. Factors that may cause or contribute to such differences include those discussed in "Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2009 as well as those discussed elsewhere in this Quarterly Report. For further information, refer to the Consolidated Financial Statements and related Notes and the Management's Discussion and Analysis thereto included in our Annual Report on Form 10-K for the year ended December 31, 2009.

Glossary of Certain Defined Terms:

All dollar amounts are stated in United States dollars

All meterage of drilled wells are measured depths unless otherwise stated

MBbls – thousand barrels

MMcf – million cubic feet

GSPC – means Gujarat State Petroleum Corporation Limited of India

OIL – means Oil India Limited of India

ONGC – means Oil & Natural Gas Corporation Limited of India

PSC – means Production Sharing Contract

NELP – means National Exploration Licensing Policy

DOC

Results of Operations for the Three and Six months ended June 30, 2010 and 2009

We started our first production as non-operator from one field in the Tarapur block in May 2009. Our interest in the proved reserves in this field is 117.6 MBbls of oil and 88.5 MMcf of natural gas and probable reserves of 513.1 MBbls of oil and 695.6 MMcf of natural gas as at December 31, 2009 based upon an independent reserve report dated January 1, 2010 by Chapman Petroleum Engineering Ltd., Calgary, Alberta, Canada.

For the three months ended June 30, 2010, we incurred a net loss of \$1,085,000 compared with a net loss of \$1,146,000 for the three months ended June 30, 2009 before expenses of \$1,754,000 resulting from the extension of the expiration date of outstanding warrants which we effected in the second quarter of 2009.

For the six months ended June 30, 2010, we incurred a net loss of \$2,113,000 compared with a net loss of \$2,313,000 for the six months ended June 30, 2009 before reflecting the warrant modification. This overall decrease was due to an increase in oil and gas sales by \$236,000 and a decrease in overall expenses by \$189,000 offset by a decrease in interest income by \$168,000 and increase in income tax expense by \$56,000.

Depletion per Barrel	\$ 29.59	\$ 14.14	\$ 28.47	\$ 14.14

Oil and Gas Sales

All of our oil and gas sales are derived from the production in India. With the approval of the Tarapur 1 field development plan by the Management Committee, three wells began production in mid May 2009, two wells in September 2009 and one well in January 2010. Further, in January 2010 a pipeline was constructed to allow the sale of the associated natural gas which had been flared off in 2009. There are ten additional wells which are drilled, tested and awaiting tie-in to the oil tank storage facilities. Further, there is one gas well awaiting completion of a separate gas pipeline.

Oil and gas sales for the three months ended June 30, 2010 were \$235,000 as compared to \$190,000 for the three months ended June 30, 2009. This increase is mainly attributable to the increase in the oil price to \$75.54 per barrel as compared to \$62.85 per barrel in the comparative quarter combined with the sale of the associated natural gas which had been flared off in the comparative quarter.

Oil and gas sales for the six months ended June 30, 2010 were \$426,000 as compared to \$190,000 for the six months ended June 30, 2009. This increase is attributable to the increase in the oil price over the comparative period and the oil production is for six months in 2010 as compared to only two months for the six months ended June 30, 2009.

Oil sales are currently based on the spot price based on the Nigeria Bonny Light Crude bench mark. To date, none of our production has been hedged. In addition, all our associated natural gas is sold to local markets at a firm contract price of \$7.00 per Mcf.

Interest Income

Interest income during the three months ended June 30, 2010 was \$11,000 as compared with \$84,000 for the same period in 2009. This decrease is primarily attributed to lower cash balances and restricted deposits available for investment. The average cash balance and restricted deposits during the three months ended June 30, 2010 was \$16.5 million compared with \$30.1 million for the three months ended June 30, 2009.

Interest income during the six months ended June 30, 2010 was \$30,000 as compared with \$198,000 for the same period in 2009. This decrease is primarily attributed to lower cash balances and restricted deposits available for investment. The average cash balance and restricted deposits during the six months ended June 30, 2010 was \$19.3 million compared with \$32.8 million for the six months ended June 30, 2009.

DOC

Operating

Operating costs for the three months ended June 30, 2010 are \$40,000 or approximately \$15.25 per barrel, as a result of production from the Tarapur 1 field. The operating costs includes handling and processing charges, transportation costs and utilities, maintenance and tank rental charges and contains a fixed and variable portion. Operating costs for the three months ended June 30, 2009 was \$83,000 or \$27.54 per barrel, as a result of production from the Tarapur 1 field.

Operating costs for the six months ended June 30, 2010 are \$102,000 or approximately \$19.20 per barrel, as a result of production from the Tarapur 1 field. The operating costs includes handling and processing charges, transportation costs and utilities, maintenance and tank rental charges and contains a fixed and variable portion. Operating costs for the six months ended June 30, 2009 was \$83,000 or \$27.54 per barrel, as a result of production from the Tarapur 1 field.

General and Administrative

For the three months ended June 30, 2010, our general and administrative expenses increased to \$928,000 from \$887,000 for the three months ended June 30, 2009. These general and administrative expenses include costs related to the corporate head office including administrative salaries and services, directors' fees, rent and office costs, insurance, bank guarantee fees, NYSE/Amex listing and filing fees, investor relation services and transfer agent fees and services. Bank guarantee fees increased by \$73,000 in the three months ended June 30, 2010 as compared to the three months ended June 30, 2009 as these costs normally incurred in the first quarter were not incurred until the second quarter of 2010. Directors' fees increased \$73,000, salaries and benefits increased by \$96,000 and travel and hotel by \$50,000 mostly related to restructuring of our management team and the addition of a new executive officer for the three months ended June 30, 2010 as compared to the same period in 2009. These increases are offset by a decrease in compensation costs for stock-based compensation arrangements with employees and directors which are being expensed over their respective vesting periods of the related option grants. These stock-based compensation costs decreased to \$146,000 from \$216,000 for the same period in 2009. A further decrease is a result of a charge of \$264,000 to general and administrative expenses for the warrant modification in the second quarter of 2009 which was not incurred in the second quarter of 2010.

For the six months ended June 30, 2010, our general and administrative expenses decreased to \$1,596,000 from \$1,720,000 for the six months ended June 30, 2009. Directors' fees increased \$175,000, salaries and benefits increased by \$109,000, moving cost increased by \$85,000 and travel and hotel by \$59,000 mostly related to restructuring of our management team and the addition of a new executive officer for the six months ended June 30, 2010 as compared to the same period in 2009. These increases are offset by a decrease in compensation costs for stock-based compensation arrangements with employees and directors which are being expensed over their respective vesting periods of the related option grants. These stock-based compensation costs decreased to \$249,000 from \$579,000 for the same period in 2009. A further decrease is a result of a charge of \$264,000 to general and administrative expenses for the warrant modification in the six months ended June 30, 2009 which was not incurred in the six months ended June 30, 2010.

Consulting Fees

Consulting fees for the three months ended June 30, 2010 were \$188,000, an increase of \$19,000 from \$169,000 when compared to the three months ended June 30, 2009. Significant items included in consulting fee expenses include a portion of costs paid to Roy Group (Barbados) Inc. for Chief Executive Officer services, costs paid to D.I. Investments Inc. for Chief Financial Officer services and the related health care costs and other consulting costs as incurred in employing various technical and corporate consultants who advised us on a variety of matters.

Our fees paid to Roy Group (Barbados) Inc. remained consistent at \$88,000 for both the three months ended June 30, 2010 and 2009. We expensed as consulting fees 75% or \$66,000 of the costs paid to Roy Group (Barbados) Inc. for

CEO related duties and other general corporate affairs. The remaining 25% or \$22,000 was capitalized for technical geological services. We evaluate the nature of our CEO's activities annually to determine the appropriate allocation. Consulting fees paid to D.I. Investments Inc. remained consistent at \$53,000.

Consulting fees for the six months ended June 30, 2010 were \$371,000, an increase of \$19,000 from \$352,000 when compared to the six months ended June 30, 2009.

Our fees paid to Roy Group (Barbados) Inc. remained consistent at \$175,000 for both the six months ended June 30, 2010 and 2009. We expensed as consulting fees 75% or \$131,000 of the costs paid to Roy Group (Barbados) Inc. for CEO related duties and other general corporate affairs. The remaining 25% or \$44,000 was capitalized for technical geological services. We evaluate the payment of these costs annually to determine the appropriate allocation. Consulting fees paid to D.I. Investments Inc. remained consistent at \$106,000.

DOC**Professional Fees**

Professional fees for the three months ended June 30, 2010 were \$64,000 compared with \$217,000 for the three months ended June 30, 2009. This decrease is mostly a result of professional fees incurred during the three months ended June 30, 2009 paid to various tax advisors to complete a review of our corporate structure with a goal to ensure tax compliance, strategy and efficiency across all jurisdictions during the three months ended June 30, 2009 that were not incurred in the current quarter. Professional fees include general counsel, audit and review costs and tax advisors to assist with compliance.

Professional fees for the six months ended June 30, 2010 were \$180,000 compared with \$448,000 for the six months ended June 30, 2009. This decrease is mostly a result of professional fees incurred during the three months ended June 30, 2009 paid to various tax advisors to complete a review of our corporate structure with a goal to ensure tax compliance, strategy and efficiency across all jurisdictions during the six months ended June 30, 2009 that were not incurred in the current quarter.

Depletion and depreciation

Depletion and depreciation increased to \$90,000 during the three months ended June 30, 2010 from \$57,000 during the three months ended June 30, 2009. As a result of our production from the Tarapur 1 field we had depletion of \$77,000 or \$29.59 per barrel and depreciation of \$13,000 for the three months ended June 30, 2010, as compared to depletion of \$43,000 or \$14.14 per barrel and depreciation of \$14,000 for the same period in 2009.

Depletion and depreciation increased to \$198,000 during the six months ended June 30, 2010 from \$73,000 during the six months ended June 30, 2009. As a result of our production from the Tarapur 1 field we had depletion of \$167,000 or \$28.47 per barrel and depreciation of \$31,000 for the six months ended June 30, 2010, as compared to depletion of \$43,000 or \$14.14 per barrel and depreciation of \$30,000 for the six months ended June 30, 2009.

Other

We capitalized certain overhead costs directly related to our exploration activities in India. During the three months ended June 30, 2010, we capitalized overhead costs totaling \$132,000 as compared to \$202,000 during the three months ended June 30, 2009. Included in the amounts above are stock-based compensation costs capitalized of \$50,000 for the three months ended June 30, 2010 compared with \$97,000 for the three months ended June 30, 2009.

During the six months ended June 30, 2010, we capitalized overhead costs totaling \$245,000 as compared to \$651,000 during the six months ended June 30, 2009. Included in the amounts above are stock-based compensation costs capitalized of \$55,000 for the six months ended June 30, 2010 compared with \$379,000 for the six months ended June 30, 2009.

The treatment of capitalized overhead costs remained consistent with the comparable quarter and includes costs relating to personnel, consultants, their travel and stock-based compensation directly associated with the advancement of our oil and gas interests.

Reserve Report

As a result of the approval of the Tarapur 1 field development plan by the Management Committee in April 2009 and the completion of an independent reserve report dated January 1, 2010 by Chapman Petroleum Engineering Ltd., Calgary, Alberta, Canada, we claim reserves in the Tarapur 1 field as at December 31, 2009 as follows:

Reserves Category	Oil (MBbls)	Natural Gas (MMcf)
PROVED		
Developed	117.6	88.5
Undeveloped	--	--

TOTAL PROVED	117.6	88.5
Probable		
Developed	444.5	695.6
Undeveloped	68.6	--
Possible		
Developed	--	--
Undeveloped	--	--

Proved Reserves

Proved oil and gas reserves are those quantities of oil and gas, which, by analysis of geo-science and engineering data, can be estimated with reasonable certainty to be economically producible.

Probable Reserves

Probable reserves are those additional reserves that are less certain to be recovered than proved reserves but which, together with proved reserves, are as likely as not to be recovered.

DOC

Liquidity

Liquidity is a measure of a company's ability to meet potential cash requirements. We have historically met our capital requirements through the issuance of common stock as well as proceeds from the exercise of warrants and options to purchase common equity.

Our ability to continue as a going concern is dependent upon obtaining the necessary financing to complete further exploration and development activities and generate profitable operations from our oil and natural gas interests in the future. Our current operations are dependent upon the adequacy of our current assets to meet our current expenditure requirements and the accuracy of management's estimates of those requirements. Should those estimates be materially incorrect, our ability to continue as a going concern will be impaired. Our unaudited consolidated financial statements as at and for the six months ended June 30, 2010 have been prepared on a going concern basis, which contemplates the realization of assets and the settlement of liabilities and commitments in the normal course of business. We have incurred a history of operating losses and negative cash flows from operations. These matters may raise doubt about our ability to continue as a going concern.

At June 30, 2010, our cash and cash equivalents were \$5.8 million (December 31, 2009 - \$16.3 million). The majority of this balance is being held in US funds, of which \$5.6 million is held in term deposits earning interest based on the US prime rate which will contribute towards covering a portion of our administrative costs and overhead throughout 2010. We have current assets of \$9.9 million and current liabilities of \$8.5 million, or working capital of \$1.4 million. Our current assets as of June 30, 2010 include \$3.8 million of restricted deposits of which \$2.5 million was released from escrow subsequent to June 30, 2010. As of June 30, 2010, we have non-current restricted deposits that total \$5.7 million, which we do not anticipate being released from escrow until June 30, 2012. The restricted deposits are pledged as security against the minimum work programs for our exploration blocks and are released upon completion of those minimum work programs.

We will incur exploration and other expenses under the terms of our PSCs to further our exploration programs. Our existing cash balance at June 30, 2010 and our anticipated cash flow from operating activities is not sufficient to satisfy our current obligations and meet our exploration commitments of \$17.0 million and \$29.8 million over the twelve months ending June 30, 2011 and the three and one half years ending December 31, 2013, respectively. Accordingly, in the event we are unable to raise sufficient capital to meet our exploration and other commitments during these respective periods, we may be forced to substantially curtail or cease exploration, appraisal and development expenditures and possibly curtail other of our activities.

We are considering various alternatives with respect to raising additional capital to remedy any future shortfall in capital to meet these exploration commitments and for other general corporate purposes but to date have made no specific plans or arrangements. It will be necessary for us to raise additional capital through equity markets, debt markets or other financing arrangements, including participation arrangements that may be available to fund our continued exploration expenditures. Because of the early stage of our operations and our absence of any material oil and natural gas reserves, there can be no assurance this capital will be available. While there can be no assurance as to our success in this regard, we believe that we will be able to raise additional capital which combined with our available cash resources will be sufficient funds to maintain our activities under the terms of our PSCs through our next fiscal year ending December 31, 2011.

We believe at this time that the outcome of the GSPC Carried Interest dispute will not have a material effect on our liquidity.

Our overall position in cash and cash equivalents decreased by \$10.5 million to \$5.8 million at June 30, 2010 from \$16.3 million at December 31, 2009. The primary reason for the decrease in cash and cash equivalents can be attributed to the following activities:

Our net cash used in operating activities during the six months ended June 30, 2010 was \$2.3 million as compared to \$1.5 million for the six months ended June 30, 2009. The use of cash is mainly related to general and administrative costs, consulting and professional fees and operating costs, offset by oil sales and interest earned on our short-term deposits.

Our net cash used in investing activities during the six months ended June 30, 2010 was \$8.2 million as compared to \$1.6 million during the six months ended June 30, 2009. Funds of \$4.7 million were used for exploration activities as compared to \$3.6 million in 2009. This increase is consistent with the increase in exploration activity in the year 2010 versus the year 2009 and prior years. In addition, the increase in the requirement to supply bank guarantees is consistent with the increase in exploration activity. Reflecting this increase in exploration activity, in the six months ended June 30, 2010, funds were used of \$2.6 million compared to funds provided of \$3.9 million for the six months ended June 30, 2009. These bank guarantees have been provided and serve as guarantees for the performance of our minimum work programs and are in the form of irrevocable letters of credit which are secured by our term deposits in the same amount.

Cash provided by financing activities for the six months ended June 30, 2010 and 2009 was \$nil. There were no private placement sales or exercise of options or warrants during the six months ended June 30, 2010 or 2009.

DOC

Should the going concern assumption not be appropriate and we are not able to realize our assets and settle our liabilities, commitments and contingencies, as more fully described in our unaudited consolidated financial statements in the normal course of operations, our unaudited consolidated financial statements would require adjustments to the amounts and classifications of assets and liabilities, and these adjustments could be significant. Our unaudited consolidated financial statements do not reflect the adjustments or reclassifications of assets and liabilities that would be necessary if we are unable to continue as a going concern.

Capital Resources

We intend that our exploration and development activities pursuant to the PSCs we are a party to, and the related drilling activities in the ten exploration blocks that we hold an interest in, will continue through 2010 in accordance with the terms of those agreements, subject to raising sufficient capital. During the period January 1, 2010 to December 31, 2010, based on the current budgets, we anticipate participating in the drilling of ten exploratory wells and ten core wells; conducting a 12,000 line kilometer aeromagnetic survey; and acquire, process and interpret 2,015 line kilometers of 2-D seismic and 350 square kilometers of 3-D seismic. As at June 30, 2010 four of the ten exploratory wells have been drilled and approximately 141.4 square kilometers of 3-D seismic has been acquired. We further expect to commence the construction of the gas gathering and production facilities together with further development drilling on the KG Offshore block for which we are carried. Also, if we increase our participating interest in the KG Onshore Block to 20%, our obligations to fund the 3-D seismic acquisition and the exploratory drilling on the block will increase. At this time, we do not expect to participate in any additional exploratory, appraisal and development wells over and above our existing commitments.

As of August 13, 2010, we are pursuing exploration opportunities elsewhere in Israel and Colombia but have not as yet entered into any final agreements with respect to these activities.

During the first quarter of 2010, we hired a new Senior Executive Officer. We do not expect to have any further significant change in 2010 in our number of employees.

Off-balance Sheet Arrangements

None.

Contractual Obligations

Our minimum exploration commitments under our production sharing contracts and other future lease payments at June 30, 2010 were not substantially different than at December 31, 2009.

Carried Interest Dispute on the KG Offshore Block

GSPC, the operator of the KG Offshore Block in which we have a net 5% carried interest, has advised us that it is seeking from us our pro rata portion of the amount by which the sums expended by GSPC under all phases for the Minimum Work Program as set forth in the PSC for the KG Offshore Block in carrying out exploration activities on the block exceeds the amount that GSPC deems to be our pro rata portion of a financial commitment under all phases included in the parties' joint bid for the award of the KG Offshore Block by the Government of India.

GSPC contends that this excess amount is not within the terms of the Carried Interest Agreement. GSPC asserts that we are required to pay 10% of the exploration expenses over and above gross costs of \$109.7 million (10% being \$10.97 million including the net 5% interest of Roy Group (Mauritius) Inc.) plus interest. We dispute the claim of GSPC.

Based on the most recent information available from GSPC dated March 25, 2010, GSPC asserts that the amount invested in the KG Offshore Block as of September 30, 2009 is approximately Rs. 5,923 Crore (approximately \$1.5 billion) (10% being \$150 million including the net 5% interest of Roy Group (Mauritius) Inc.).

We have disputed GSPC's right to seek the payment and we believe the payment GSPC is seeking is in breach of the Carried Interest Agreement. We have advised GSPC that we have fulfilled our obligations under the Carried Interest Agreement to provide extensive technical assistance without any further remuneration other than the carried interest. We also have obtained the opinion of prominent Indian legal counsel who has advised us that, among other things, under the terms of the agreements between the parties, and in particular the Carried Interest Agreement, we are not liable to pay any amount to GSPC for either costs and expenses incurred or otherwise before reaching the stage of commercial production.

In addition, we have disputed GSPC's right, which it purported to claim in November 2008, to undertake an additional work program over and above the minimum work program under the PSC as either Joint Operations or as Exclusive Operations under the terms of the PSC and that we must elect whether we wish to participate in these future exploration activities as Joint Operations. GSPC advised us that if we failed to make the requested election it will conduct these drilling activities as Exclusive Operations as defined in the PSC. In response, we advised GSPC that we elected to participate in the drilling operations as a Joint Operation under the terms of the PSC and Joint Operating Agreement and that our exercise was done pursuant to the terms of our Carried Interest Agreement with GSPC, and as such we would be carried for 100% of all of our share of any costs during the additional exploration phase prior to the start of initial commercial production and the Carried Interest Agreement extends through the exploration period of the PSC.

DOC

We continue to be of the view that, under the terms of the Carried Interest Agreement, we have a carried interest in the exploration activities conducted by the parties on the KG Offshore Block for 100% of our share (including the share of Roy Group (Mauritius) Inc.) of costs during the exploration phase prior to the start date of initial commercial production on the KG Offshore Block. To date, commercial production has not been achieved on the block. As such, we are of the view that the additional costs of drilling future exploration or development wells, or the costs of building the production facilities shall be subject to the Carried Interest Agreement and shall be carried by GSPC. We intend to vigorously protect our contractual rights in accordance with the dispute resolution process under the Carried Interest Agreement, the PSC and the Joint Operating Agreement as may be appropriate. However, there can be no assurance that GSPC will not institute arbitration or other proceedings seeking to recover the sum or otherwise contend we are in breach of the PSC. The effect of GSPC seeking payment of this sum may hinder our capital raising and other activities. In September 2007, we commenced discussions with GSPC in an effort to reach an amicable resolution. A draft proposal has been put forward by us to GSPC in both June and December of 2009 and again in July 2010 in order to settle this dispute amicably. We are of the understanding that GSPC Board of Directors' approval is required in order to complete this settlement. We are currently awaiting the draft proposal to be presented to the GSPC Board. However, no settlement agreement has been reached as of August 13, 2010 and there can be no assurance that this matter will be settled amicably.

Critical Accounting Estimates

The preparation of financial statements under generally accepted accounting principles (GAAP) in the United States requires management to make estimates, judgments and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. On a regular basis we evaluate our assumptions, judgments and estimates. We also discuss our critical accounting estimates with the Audit Committee of the Board of Directors.

We believe that the assumptions, judgments and estimates involved in the accounting for oil and gas accounting and impairment, asset retirement obligation and share-based payment arrangements have the greatest potential impact on our unaudited consolidated financial statements. These areas are key components of our results of operations and are based on complex rules which require us to make judgments and estimates, so we consider these to be our critical accounting estimates. Historically, our assumptions, judgments and estimates relative to our critical accounting estimates have not differed materially from actual results.

Our critical accounting estimates are disclosed in Item 7 of our 2009 Annual Report on Form 10-K, filed with the Securities and Exchange Commission on March 31, 2010, and have not changed materially since the filing of that document.

Recent Exploration Activities

Below is a summary description of information relating to certain material developments to our exploration activities. For additional information and a more complete description of the PSCs to which we are a party, reference should be made to our Annual Report on Form 10-K and our Quarterly Reports on Form 10-Q as well as our Current Reports on Form 8-K.

Krishna Godavari Offshore Block

Deen Dayal West Field Development Plan

A Field Development Plan has been approved with the following details:

- Includes fifteen wells; four existing wells (KG#8, KG#15, KG#17 and KG#28) and eleven new development wells which include three slant wells and eight multilateral wells to be drilled.
 - Production facilities to include:

- Two offshore platforms (one well head and one central processing);
- 20 kilometer long pipeline of 24 inch diameter up to landfall point; and
- One onshore gas terminal to include a gas sweetening unit, gas dehydration unit, dew point depression unit, condensate stabilization unit, sulphur recovery unit and a captive power unit.
- Delivery point for gas will be the outlet flange of delivery facility located at the onshore terminal at Mallavaram Village, near Yanam, Kakinada, Andhra Pradesh.
- First gas production to commence December 2011 (now expected to be June 2012 or later).
- GSPC as operator will apply for a 17 square kilometer mineral lease to cover this area.

GSPC estimated in the Field Development Plan that on a preliminary basis, the gross costs for the production facilities will be approximately US\$941 million and US\$860 million for the future development drilling costs. GSPC is currently in the process of commissioning an offshore platform and jack-up drilling rig to commence the drilling of the new development wells.

Krishna Godavari Onshore Block

During the first half of 2010, Oil India Limited as operator of the KG Onshore Block commenced a 3-D seismic acquisition program. The acquisition program is planned to cover approximately 548 square kilometers with approximately 400 square kilometers of full-fold data as a result of seismic acquisition restrictions in the reserve forest. As at June 30, 2010 approximately 141.4 square kilometers of 3-D seismic had been acquired. It is anticipated that the seismic acquisition and part of the processing will be completed before the end of the 2010 year.

DOC

Three priority locations have been proposed by us and reviewed and agreed to by the operator, Oil India Limited. All of these locations have multiple prospects in both the shallower (Eocene – Miocene) and the deeper (Cretaceous – Jurassic) zones.

All necessary steps are currently being undertaken by Oil India Limited in an effort to commence the drilling of the first of twelve exploration wells by the second or third quarter of 2011.

Tarapur Block

Tarapur 1 Discovery Area

Currently there is an approved field development plan which covers an area of approximately 2.14 square kilometers within the Tarapur 1 Discovery Area of approximately 9.7 square kilometers and includes three existing discovery wells (Tarapur 1, Tarapur P and Tarapur 5) and three development wells (TD-1, TD-2 and TD-3). All six wells are tied into the oil tank storage facilities by way of a gathering system.

First production from the three discovery wells commenced in May 2009. Two development wells (TD-2 and TD-3) commenced production during the month of September 2009 and the third development well (TD-1) commenced production in January 2010. Throughout 2009, associated natural gas was being produced and flared off. GSPC as operator built a small gas line in order to collect and sell this gas. Effective January 2010, this associated natural gas is being sold into the local market.

There are ten additional wells in the Tarapur 1 Discovery Area which are drilled, tested and awaiting tie-in to the oil tank storage facilities. Further, there is one gas well (Tarapur G) awaiting completion of a new gas pipeline. GSPC as operator is currently in the process of preparing and filing the necessary declarations of commerciality and field development plans pursuant to the provisions of the PSC in conjunction with building the gas pipeline in order to bring these additional wells onto production.

GSPC, as operator continues to prepare a work program and budget for the fiscal year April 1, 2010 to March 31, 2011. We believe the program will entail the drilling of further development wells to focus on increasing production from the Tarapur Block however, no program or budget figures have been provided.

Sanand/Miroli Block

GSPC as operator held a Management Committee meeting on July 21, 2010 whereby the Declaration of Commerciality was reviewed for the M-1 and M-6 oil discoveries. GSPC continues to prepare a work program and budget for the fiscal year April 1, 2010 to March 31, 2011. We believe the program will entail the continued testing of wells in conjunction with the preparation and filing of the necessary declarations of commerciality and field development plans pursuant to the provisions of the PSC in order to bring these wells onto production.

Ankleshwar Block

During the first half of 2010, GSPC as operator drilled the remaining three exploratory wells (ANK-39S, ANK-40S and ANK-41S) to complete the Phase I Minimum Work commitment. These three wells are currently being tested and evaluated. GSPC continues to prepare a work program and budget for the fiscal year April 1, 2010 to March 31, 2011. We believe the program will entail the continued testing of the recently drilled wells in conjunction with the preparation and filing of the necessary declarations of commerciality pursuant to the provisions of the PSC.

Mehsana Block

On February 8, 2010 the Directorate General of Hydrocarbons approved the extension of the Phase I minimum work program to July 13, 2010. This extension allowed the consortium time to complete a four well testing and stimulation program in order to complete the appraisal of the block, the results of which are not yet known. After completion of the test results, all areas not defined as a Commercial Discovery will be relinquished under the terms of the PSC as the

consortium has elected not to proceed to Phase II.

DS03 Block

On February 6, 2010 we applied for a six month extension of Phase I to September 3, 2010 in order to complete a 12,000 line kilometer aeromagnetic survey. The extension has been granted and we have further elected to proceed into Phase II of the exploratory work program. Our commitment to the end of Phase II is now to complete this survey which is currently awaiting approval from the Government of India, complete a 500 line kilometers 2-D seismic survey and drill one exploratory well to a depth of approximately 1,500 meters before September 3, 2011.

DS04 Block

It is our intention as operator of the DS04 block to drill ten core holes to a depth of 500 meters and complete a 535 line kilometer 2-D seismic survey over the balance of the 2010 year.

RJ20 and RJ21 Blocks

The consortium recently completed the acquisition, processing and interpretation of a 3-D seismic program of approximately 1,300 square kilometers. On April 21, 2010, the first well on the Rajasthan blocks, the Rachan-1 well commenced drilling on the RJ 21 Block. Oil India Limited as operator has completed the drilling of this well to a total depth of 1,550 meters. The well is currently being tested and evaluated and upon completion, the next drilling location will commence. The Rachan-1 well is the first of twenty exploration wells to be drilled over the two blocks.

DOC

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Market risk is the potential loss arising from changes in market rates and prices. We are exposed to the impact of market fluctuations associated with the following:

Interest Rate Risk

We consider our exposure to interest rate risk to be immaterial. Interest rate exposures relate entirely to our investment portfolio, as we do not have short-term or long-term debt. Our investment objectives are focused on preservation of principal and liquidity. We manage our exposure to market risks by limiting investments to high quality bank issuers at overnight rates, or government securities of the United States or Canadian federal governments such as Guaranteed Investment Certificates or Treasury Bills. We do not hold any of these investments for trading purposes. We do not hold equity investments. We do not expect any material loss from cash equivalents and therefore we believe our interest rate exposure on invested funds is not material.

Foreign Currency Exchange Risk

Substantially, all of our cash and cash equivalents are held in U.S. dollars or U.S. dollar denominated securities. Certain of our expenses are fixed or denominated by foreign currencies including the Canadian dollar and the Indian Rupees. We are exposed to market risks associated with fluctuations in foreign currency exchange rates related to our transactions denominated in currencies other than the U.S. dollar.

At June 30, 2010, we had not entered into any market risk sensitive instruments relating to our foreign currency exchange risk.

Commodity Price Risk

Oil and natural gas prices are subject to wide fluctuations and market uncertainties due to a variety of factors that are beyond our control. These factors include the level of global demand for petroleum products, international supply of oil and gas, the establishment of and compliance with production quotas by oil exporting countries, weather conditions, the price and availability of alternative fuels, overall economic conditions, both international and domestic, and possible international disruptions. We cannot predict future oil and gas prices with any degree of certainty. Sustained weakness in oil and gas prices may adversely affect our ability to obtain capital to fund our activities and could in the future require a reduction in the carrying value of our oil and gas properties. Similarly, an improvement in oil and gas prices can have a favorable impact on our financial condition, results of operations and capital resources.

At June 30, 2010, we had not entered into any market risk sensitive instruments as such term is defined in Item 305 of Regulation S-K, relating to oil and natural gas.

Trading Risks

We have no market risk sensitive instruments held for trading purposes.

ITEM 4. CONTROLS AND PROCEDURES

Disclosure Controls

Our management, with participation of our Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of our disclosure controls and procedures as of June 30, 2010. Disclosure controls and procedures are defined under SEC rules as controls and other procedures that are designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information

required to be disclosed by a company in the reports that it files or submits under the Securities Exchange Act of 1934 is accumulated and communicated to the company's management, including its principal executive and principal financial officers, or persons performing similar functions, as appropriate, to allow timely decisions regarding required disclosure. There are inherent limitations to the effectiveness of any system of disclosure controls and procedures, including the possibility of human error and the circumvention or overriding of the controls and procedures. Accordingly, even effective disclosure controls and procedures can only provide reasonable assurance of achieving their control objectives.

Based on the identification of the material weaknesses in our internal control over financial reporting described in our Annual Report on Form 10-K for the year ended December 31, 2009, the Chief Executive Officer and the Chief Financial Officer have concluded that our disclosure controls and procedures were not effective as of June 30, 2010, however, along with the Plan as disclosed in our Form 10-K for the year ended December 31, 2009, we continue to take steps to correct this situation.

Changes in Internal Controls

There were no changes in our internal control over financial reporting (as defined in Rules 13a-15(f) under the Securities Exchange Act), during the quarter ended June 30, 2010 that materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

DOC

PART II OTHER INFORMATION

ITEM 1A. RISK FACTORS

Risks relating to us are described in detail in Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2009 filed on March 31, 2010. Changes or additions to certain of those risk factors, or, those which are currently deemed to be material have been included in this Quarterly Report. Reference should be made to our Annual Report as well as to the following for complete information regarding all risk factors material to investors.

We Have A History Of Losses And Our Liquidity Position Imposes Risk To Our Operations

To date, we have not achieved our planned principal operations and we are considered to be in the development stage of our operations. We have incurred negative cash flows from our operations, and at this time all exploration activities and overhead expenses are primarily financed by way of the issue and sale of equity securities with a small portion being financed from oil sales and interest income on our cash balances. The recoverability of the costs we have incurred to date is uncertain and is dependent upon achieving commercial production or sale. Our prospects must be considered in light of the risks, expenses and difficulties which are frequently encountered by companies in their early stage of operations, particularly companies in the oil and gas exploration industry.

Our ability to continue as a going concern is dependent upon obtaining the necessary financing to complete further exploration and development activities and generate profitable operations from oil and natural gas interests in the future. Our financial statements as at and for the six months ended June 30, 2010 have been prepared on a going concern basis, which contemplates the realization of assets and the settlement of liabilities and commitments in the normal course of business. We incurred a net loss of \$2.1 million, and used \$2.3 million of cash flow in our operating activities and \$8.2 million in our investing activities for the six months ended June 30, 2010. As at June 30, 2010, we had an accumulated deficit of \$30.9 million and working capital of \$1.4 million. These matters raise doubt about our ability to continue as a going concern.

We expect to incur substantial expenditures to further our exploration and development programs and the existing cash balance and any cash flow from operating activities may not be sufficient to satisfy the current obligations and meet our exploration and development commitments. Development activities within our blocks that are unable to achieve production in the short term may need to be deferred or curtailed. We are considering various alternatives to remedy any future shortfall in capital. We deem it necessary to raise capital through equity markets, debt markets or other financing arrangements, including participation arrangements that may be available for continued exploration expenditures. Because of the early stage of our operations and our absence of any material oil and natural gas reserves and revenues, there can be no assurance this capital will be available. If this capital is not made available to us, this could lead to our inability to meet all of our commitments under our PSCs and we may be forced to substantially curtail or cease exploration expenditures which could result in a breach of the terms of our PSCs and could result in the loss of our rights or a portion thereof under the PSCs.

Should the going concern assumption not be appropriate and we are not able to realize our assets and settle our liabilities, commitments and contingencies, as more fully described in our unaudited consolidated financial statements in the normal course of operations, our unaudited consolidated financial statements would require adjustments to the amounts and classifications of assets and liabilities, and these adjustments could be significant. Our unaudited consolidated financial statements do not reflect the adjustments or reclassifications of assets and liabilities that would be necessary if we are unable to continue as a going concern.

Our Capital Resources Have Declined and We May Not Be Successful In Raising Additional Capital

At June 30, 2010, our cash and cash equivalents were \$5.8 million compared with \$16.3 million at December 31, 2009. We have current assets of \$9.9 million and current liabilities of \$8.5 million, or working capital of \$1.4 million. Our current assets as of June 30, 2010 include \$3.8 million of restricted deposits of which \$2.5 million was released from escrow subsequent to June 30, 2010. As of June 30, 2010, we have non-current restricted deposits that total \$5.7 million, which we do not anticipate being released from escrow until June 30, 2012. The restricted deposits are pledged as security against the minimum work programs for our exploration blocks and are released upon completion of those minimum work programs.

We incur exploration and other expenses under the terms of our PSCs to further our exploration programs. Our existing cash balance at June 30, 2010 and our anticipated cash flow from operating activities is not sufficient to satisfy our current obligations and meet our exploration commitments of \$17.0 million and \$29.8 million over the twelve months ending June 30, 2011 and the three and one half years ending December 31, 2013, respectively. Accordingly, in the event we are unable to raise sufficient capital to meet our exploration and other commitments during these respective periods, we may be forced to substantially curtail or cease exploration, appraisal and development expenditures and possibly curtail other of our activities.

DOC

GSPC Is Seeking a Payment From Us In the Amount Of Approximately \$150 Million On Account Of GSPC's Exploration Costs On the KG Offshore Block

GSPC, the operator of the KG Offshore Block in which we have a net 5% carried interest, has advised us that it is seeking from us our pro rata portion of the amount by which the sums expended by GSPC under all phases for the minimum work program as set forth in the PSC for the KG Offshore Block in carrying out exploration activities on the block exceeds the amount that GSPC deems to be our pro rata portion of a financial commitment under all phases included in the parties' joint bid for the award of the KG Offshore Block by the Government of India.

GSPC contends that this excess amount is not within the terms of the Carried Interest Agreement. GSPC asserts that we are required to pay 10% of the exploration expenses over and above gross costs of \$109.7 million (10% being \$10.97 million including the net 5% interest of Roy Group (Mauritius) Inc.) plus interest. We dispute the claim of GSPC.

Based on the most recent information available from GSPC dated March 25, 2010, GSPC asserts that the amount invested in the KG Offshore Block as of September 30, 2009 is approximately Rs. 5,923 Crore (approximately \$1.5 billion) (10% being \$150 million including the net 5% interest of Roy Group (Mauritius) Inc.).

We have disputed GSPC's right to seek the payment and we believe the payment GSPC is seeking is in breach of the Carried Interest Agreement. We have advised GSPC that we have fulfilled our obligations under the Carried Interest Agreement to provide extensive technical assistance without any further remuneration other than the carried interest. We also have obtained the opinion of prominent Indian legal counsel who has advised us that, among other things, under the terms of the agreements between the parties, and in particular the Carried Interest Agreement, we are not liable to pay any amount to GSPC for either costs and expenses incurred or otherwise before reaching the stage of commercial production.

In addition, we have disputed GSPC's right, which it purported to claim in November 2008, to undertake an additional work program over and above the minimum work program under the PSC as either Joint Operations or as Exclusive Operations under the terms of the PSC and that we must elect whether we wish to participate in these future exploration activities as Joint Operations. GSPC advised us that if we failed to make the requested election it will conduct these drilling activities as Exclusive Operations as defined in the PSC. In response, we advised GSPC that we elected to participate in the drilling operations as a Joint Operation under the terms of the PSC and Joint Operating Agreement and that our exercise was done pursuant to the terms of our Carried Interest Agreement with GSPC, and as such we would be carried for 100% of all of our share of any costs during the additional exploration phase prior to the start of initial commercial production and the Carried Interest Agreement extends through the exploration period of the PSC.

We continue to be of the view that, under the terms of the Carried Interest Agreement, we have a carried interest in the exploration activities conducted by the parties on the KG Offshore Block for 100% of our share (including the share of Roy Group (Mauritius) Inc.) of costs during the exploration phase prior to the start date of initial commercial production on the KG Offshore Block. To date, commercial production has not been achieved on the block. As such, we are of the view that the additional costs of drilling future exploration or development wells, or the costs of building the production facilities shall be subject to the Carried Interest Agreement and shall be carried by GSPC. We intend to vigorously protect our contractual rights in accordance with the dispute resolution process under the Carried Interest Agreement, the PSC and the Joint Operating Agreement as may be appropriate. However, there can be no assurance that GSPC will not institute arbitration or other proceedings seeking to recover the sum or otherwise contend we are in breach of the PSC. The effect of GSPC seeking payment of this sum may hinder our capital raising and other activities. In September 2007, we commenced discussions with GSPC in an effort to reach an amicable resolution. A draft proposal has been put forward by us to GSPC in both June and December of 2009 and again in July 2010 in order to settle this dispute amicably. We are of the understanding that GSPC Board of Directors' approval

is required in order to complete this settlement. We are currently awaiting the draft proposal to be presented to the GSPC Board. However, no settlement agreement has been reached as of August 13, 2010 and there can be no assurance that this matter will be settled amicably.

Our Internal Control Over Financial Reporting Was Not Effective As Of June 30, 2010 And Continuing Weaknesses In Our Internal Controls And Procedures Could Have A Material Adverse Effect On Us

During our management's assessment of the effectiveness of our internal control over financial reporting pursuant to Section 404 of the Sarbanes-Oxley Act in connection with the preparation of our Annual Report on Form 10-K for the year ended December 31, 2009 we identified a material weakness in those controls as identified in Item 9A of the Annual Report - Controls and Procedures.

We did not maintain an effective control environment. Specifically, we did not formally communicate and emphasize controls and enforce corporate strategy and objectives. We did not formally define roles and responsibilities for employees and management or have a formal process to monitor the performance of employees and management against such objectives. As a result of not effectively defining roles and responsibilities for employees and management, we did not identify certain regulatory, registration and taxation requirements in the multiple jurisdictions in which we operate.

This control deficiency could contribute to a reasonable possibility that a material misstatement could occur in the financial statements, not be prevented or detected on a timely basis and therefore constitutes a material weakness.

DOC

As a result of the existence of the material weakness discussed above, our management concluded that we did not maintain effective internal control over financial reporting as of June 30, 2010, based on the criteria established in Internal Control - Integrated Framework issued by COSO.

Prior to filing this Report, we have taken certain steps to remediate this material weakness. Although these actions are continuing, we anticipate that these actions when completed will remediate the material weakness we identified and strengthen our internal control over financial reporting. However we cannot assure you that the finalized measures that we implement will effectively address such material weakness or that additional material weaknesses may not develop in the future.

Although we have made significant progress towards remediation of our material weakness over our control environment, certain aspects of our remediation plan are still in progress. Remedying the existing material weakness, as well as any additional significant deficiencies or material weaknesses that we or our independent auditors may identify in the future, may require us to incur significant costs and expend significant time and management resources. If we fail to timely remedy any current or additional material weaknesses or significant deficiencies that we or our auditors may identify or if we cannot produce reliable financial reports, we may be unable to comply with our periodic reporting requirements, accurately report our financial results, detect fraud or comply with the requirements of Section 404 of the Sarbanes-Oxley Act all of which could result in a loss of investor confidence in the accuracy, timeliness and completeness of our financial reports. As a consequence, the market price of our common stock could decline significantly, we may be unable to obtain additional financing to operate and expand our business and our business and financial condition could be materially harmed. In addition, we can give no assurance that our independent auditors will agree with our management's assessment of the effectiveness of our internal control over financial reporting at that time.

The Failure Of One Of Our Subsidiaries To Timely File Certain Reports With The Proper Regulatory Authorities Could Result in the Imposition of a Material Penalty

In the fourth quarter of 2009, we determined that one of our subsidiaries may be in breach of certain regulatory requirements of the jurisdiction of its organization and we are currently taking appropriate steps to remedy the matter. Our subsidiary's non-compliance with these regulations may result in a financial penalty being imposed against the subsidiary in an amount at the discretion of the regulatory authority. We believe the outcome pertaining to the matter at this time is not determinable, and as such no provision has been made in these unaudited consolidated financial statements for the payment of the financial penalty. After further evaluation and consultation with our advisors, the range of the possible penalty has been revised to anywhere from \$nil to \$3.2 million which could materially and adversely affect our financial condition and results of operations.

Our Activities Have Only Recently Commenced And We Have a Very Limited Operating History. Our Reserves Of Oil And Gas Are Not Material. We Anticipate Future Losses and There Is No Assurance Of Our Success.

We are in the early stage of developing our operations. We have a very limited operating history, we have realized very limited revenues from our activities, and we have not achieved our planned principal operations as at June 30, 2010.

Our only activities in the oil and natural gas exploration and production industry have primarily involved entering into ten PSCs with the Government of India. Our exploration opportunities are highly speculative and should any of these opportunities not result in the discovery of commercial quantities of oil and gas reserves, our investment in the venture could be lost. Our current plans are to conduct the exploration and development activities on the areas offshore and onshore India in accordance with the terms of the PSCs we are a party to. There can be no assurance that the exploratory drilling to be conducted on the exploration blocks in which we hold an interest will result in any discovery of hydrocarbons or that any hydrocarbons that are discovered will be in commercially recoverable quantities. Further, the realization of any revenues from commercially recoverable hydrocarbons is substantially dependent upon the

ability to deliver, store and market any hydrocarbons that are discovered. As of August 13, 2010, there are no or limited facilities for the delivery and storage of hydrocarbons on the areas covered by our PSCs.

Companies engaged in exploratory oil and gas activities are exposed to a number of special risks including, among others;

- We may experience failures to discover oil and gas in commercial quantities;
- There are uncertainties as to the costs to be incurred in our exploratory drilling activities, cost overruns are possible and we may encounter mechanical difficulties and failures in completing wells;
- There are uncertain costs inherent in drilling into unknown formations, such as over-pressured zones, high temperatures and tools lost in the hole; and
 - We may make changes in our drilling plans and locations as a result of prior exploratory drilling.

There can be no assurance that the ventures in which we are a participant or hold an interest will be successful in addressing these risks, and any failure to do so could have a material adverse effect on our prospects for the future.

DOC

Cautionary Statement For Purposes Of The “Safe Harbor” Provisions Of The Private Securities Litigation Reform Act Of 1995

With the exception of historical matters, the matters discussed in this Report are “forward-looking statements” as defined under the Securities Act of 1933, as amended, and the Securities Exchange Act of 1934, as amended, that involve risks and uncertainties. Forward-looking statements made herein include, but are not limited to:

- the statements in this Report regarding our plans and objectives relating to our future operations,
- plans and objectives regarding the exploration, development and production activities conducted on the exploration blocks in India in which we have interests,
- plans regarding drilling activities intended to be conducted through the ventures in which we are a participant, the success of those drilling activities and our ability and the ability of the ventures to complete any wells on the exploration blocks, to develop reserves of hydrocarbons in commercially marketable quantities, to establish facilities for the collection, distribution and marketing of hydrocarbons, to produce oil and natural gas in commercial quantities and to realize revenues from the sales of those hydrocarbons,
- our ability to maintain compliance with the terms and conditions of our PSCs, including the related work commitments, to obtain consents, waivers and extensions from the Director General of Hydrocarbons or Government of India as and when required, and our ability to fund those work commitments,
- our plans and objectives to join with others or to directly seek to enter into or acquire interests in additional PSCs with the Government of India and others,
 - our assumptions, plans and expectations regarding our future capital requirements,
 - our plans and intentions regarding our plans to raise additional capital,
- the costs and expenses to be incurred in conducting exploration, well drilling, development and production activities, our estimates as to the anticipated annual costs of those activities and the adequacy of our capital to meet our requirements for our present and anticipated levels of activities are all forward-looking statements.

These statements appear, among other places, in Part I under the caption “Item 2. - Management’s Discussion and Analysis of Financial Condition and Results of Operations” and in Part II under the caption “Item 1A. - Risk Factors”. If our plans fail to materialize, your investment will be in jeopardy.

- We cannot assure you that our assumptions or our business plans and objectives discussed herein will prove to be accurate or be able to be attained.
- We cannot assure you that any commercially recoverable quantities of hydrocarbon reserves will be discovered on the exploration blocks in which we have an interest.
- Our ability to realize revenues cannot be assured. Our ability to successfully drill, test and complete producing wells cannot be assured.
- We cannot assure you that we will have available to us the capital required to meet our plans and objectives at the times and in the amounts required or we will have available to us the amounts we are required to fund under the terms of the PSCs we are a party to.
- We cannot assure you that we will be successful in joining any further ventures seeking to be granted PSCs by the Government of India or that we will be successful in acquiring interests in existing ventures.
- We cannot assure you that we will obtain all required consents, waivers and extensions from the Director General of Hydrocarbons or Government of India as and when required to maintain compliance with our PSCs, that we may not be adversely affected by any delays we may experience in receiving those consents, waivers and extensions, that we may not incur liabilities under the PSCs for our failure to maintain compliance with and timely complete the related work programs, or that GSPC may not be successful in its efforts to obtain payment from us on account of exploration costs it has expended on the KG Offshore Block for which it asserts we are liable or otherwise seek to hold us in breach of that PSC or commence arbitration proceedings against us.
- We cannot assure you that the outcome of testing of one or more wells on the exploration blocks under our PSCs will be satisfactory and result in commercially-productive wells or that any further wells drilled will have commercially-successful results.

An investment in shares of our common stock involves a high degree of risk. There can be no assurance that the exploratory drilling to be conducted on the exploration blocks in which we hold an interest will result in any discovery of reserves of hydrocarbons or that any hydrocarbons that are discovered will be in commercially recoverable quantities. In addition, the realization of any revenues from commercially recoverable hydrocarbons is dependent upon the ability to deliver, store and market any hydrocarbons that are discovered.

Our inability to meet our goals and objectives or the consequences to us from adverse developments in general economic or capital market conditions, events having international consequences, or military or terrorist activities could have a material adverse effect on us. We caution you that various risk factors accompany those forward-looking statements and are described, among other places, under the caption “Risk Factors” herein. They are also described in our Quarterly Reports on Form 10-Q and our Current Reports on Form 8-K. These risk factors could cause our operating results, financial condition and ability to fulfill our plans to differ materially from those expressed in any forward-looking statements made in this Report and could adversely affect our financial condition and our ability to pursue our business strategy and plans.
