QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES
EXCHANGE ACT OF 1934

For the quarterly period ended June 30, 2016
OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES
EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number: 1-36254

Avid Technology, Inc.
(Exact Name of Registrant as Specified in Its Charter)
Delaware 04-2977748
(State or Other Jurisdiction of (I.R.S. Employer
Incorporation or Organization) Identification No.)
75 Network Drive
Burlington, Massachusetts 01803
(Address of Principal Executive Offices, Including Zip Code)

(978) 640-6789
(Registrant's Telephone Number, Including Area Code)

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports) and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large Accelerated Filer Accelerated Filer
Non-accelerated Filer Smaller Reporting Company
(Do not check if smaller reporting company)

Edgar Filing: AVID TECHNOLOGY, INC. - Form 10-Q

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes
" No

The number of shares outstanding of the registrant's Common Stock, par value \$0.01, as of August 2, 2016 was 39,821,072.

CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

This Quarterly Report on Form 10-Q (“Form 10-Q”) includes forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. For this purpose, any statements contained in this Form 10-Q that relate to future results or events are forward-looking statements. Forward-looking statements may be identified by use of forward-looking words, such as “anticipate,” “believe,” “confidence,” “could,” “estimate,” “expect,” “feel,” “intend,” “may,” “should,” “seek,” “will” and “would,” or similar expressions.

Forward-looking statements may involve subjects relating to, among others, the following:

- our ability to successfully implement our Avid Everywhere strategic plan and other strategic initiatives, including our cost saving strategies;
 - our ability to develop, market and sell new products and services;
 - anticipated trends relating to our sales, financial condition or results of operations, including our shift to a recurring revenue model and complex enterprise sales with elongated sales cycles;
 - our ability to achieve our goal of expanding our market positions;
 - the anticipated performance of our products;
 - our business strategies and market positioning;
 - our ability to successfully consummate acquisitions, or investment transactions and successfully integrate acquired businesses including the acquisition of Orad Hi-Tech Ltd (“Orad”), into our operations;
 - our anticipated benefits and synergies from and the anticipated financial impact of any acquired business (including Orad);
 - the anticipated trends and developments in our markets and the success of our products in these markets;
 - our ability to effectively mitigate and remediate the material weaknesses in our internal control over financial reporting, and the expected timing thereof;
 - our capital resources and the adequacy thereof;
 - our ability to service our debt and meet the obligations thereunder, including our ability to satisfy our conversion and repurchase obligations under our convertible notes due 2020;
 - the outcome, impact, costs and expenses of any litigation or government inquiries to which we are or become subject;
 - the effect of the continuing worldwide macroeconomic uncertainty on our business and results of operation, including Brexit;
 - the expected timing of recognition of revenue backlog as revenue, and the timing of recognition of revenues from subscription offerings;
 - estimated asset and liability values and amortization of our intangible assets;
 - our compliance with covenants contained in the agreements governing our indebtedness;
 - changes in inventory levels;
 - seasonal factors;
 - plans regarding repatriation of foreign earnings;
 - fluctuations in foreign exchange and interest rates; and
 - the risk of restatement of our financial statements.
-

Actual results and events in future periods may differ materially from those expressed or implied by forward-looking statements in this Form 10-Q. There are a number of factors that could cause actual events or results to differ materially from those indicated or implied by forward-looking statements, many of which are beyond our control, including the risk factors discussed herein and in Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2015, in Part II, Item 1A of our quarterly report for the quarter ended March 31, 2016 and in other documents we filed from time to time with the U.S. Securities and Exchange Commission (“SEC”). In addition, the forward-looking statements contained in this Form 10-Q represent our estimates only as of the date of this filing and should not be relied upon as representing our estimates as of any subsequent date. While we may elect to update these forward-looking statements at some point in the future, we specifically disclaim any obligation to do so, whether to reflect actual results, changes in assumptions, changes in other factors affecting such forward-looking statements or otherwise, except as required by law.

We own or have rights to trademarks and service marks that we use in connection with the operation of our business. Avid is a trademark of Avid Technology, Inc. Other trademarks, logos, and slogans registered or used by us and our subsidiaries in the United States and other countries include, but are not limited to, the following: Avid Everywhere, Avid Motion Graphics, AirSpeed, EUCON, iNEWS, Interplay, ISIS, Avid MediaCentral Platform, Mbox, Media Composer, NewsCutter, Nitris, Pro Tools, Sibelius and Symphony. Other trademarks appearing in this Form 10-Q are the property of their respective owners.

AVID TECHNOLOGY, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

1. FINANCIAL INFORMATION

The accompanying condensed consolidated financial statements include the accounts of Avid Technology, Inc. and its wholly owned subsidiaries (collectively, "Avid" or the "Company"). These financial statements are unaudited. However, in the opinion of management, the condensed consolidated financial statements reflect all normal and recurring adjustments necessary for their fair statement. Interim results are not necessarily indicative of results expected for any other interim period or a full year. The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with the instructions for Form 10-Q and, therefore, do not include all information and footnotes necessary for a complete presentation of operations, comprehensive (loss) income, financial position and cash flows of the Company in conformity with accounting principles generally accepted in the United States of America ("U.S. GAAP"). The accompanying condensed consolidated balance sheet as of December 31, 2015 was derived from the Company's audited consolidated financial statements and does not include all disclosures required by U.S. GAAP for annual financial statements. The Company filed audited consolidated financial statements as of and for the year ended December 31, 2015 in its Annual Report on Form 10-K for the year ended December 31, 2015, which included all information and footnotes necessary for such presentation. The financial statements contained in this Form 10-Q should be read in conjunction with the audited consolidated financial statements in the Company's Annual Report on Form 10-K for the year ended December 31, 2015.

The Company's preparation of condensed consolidated financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the dates of the condensed consolidated financial statements and the reported amounts of revenues and expenses during the reported periods. Actual results could differ from the Company's estimates.

The Company has generally funded operations in recent years through the use of existing cash balances, supplemented from time to time with the proceeds of long-term debt and borrowings under its credit facilities. The Company's principal sources of liquidity include cash and cash equivalents totaling \$50.4 million as of June 30, 2016.

In February 2016, the Company committed to a cost efficiency program that encompasses a series of measures intended to allow the Company to more efficiently operate in a leaner, and more directed cost structure. These measures include reductions in the Company's workforce, facilities consolidation, transferring certain business processes to lower cost regions and reducing other third-party service costs. In connection with this cost efficiency program, the Company expects to incur, in the aggregate, cash expenditures of approximately \$25 million relating to termination benefits, facility costs, employee overlap expenses and related actions. The Company anticipates that the cost efficiency program will be substantially complete by the end of the second quarter of 2017 and, when fully implemented, will result in annualized costs savings of approximately \$76 million.

In connection with the cost efficiency program, on February 26, 2016, the Company entered into a Financing Agreement (the "Financing Agreement") with the lenders party thereto (the "Lenders"). Pursuant to the Financing Agreement, the Company entered into a term loan in the aggregate principal amount of \$100 million. The Financing Agreement also provides the Company with the ability to draw up to a maximum of \$5 million in revolving credit. All outstanding loans under the Financing Agreement will become due and payable in February 2021, or in May 2020 if the \$125 million in outstanding principal of 2.00% convertible senior notes due June 15, 2020 (the "Notes") has not been repaid or refinanced by such time. Proceeds from the Financing Agreement have been used to replace an existing \$35 million revolving credit facility, finance the Company's efficiency program and other initiatives, and provide operating flexibility throughout the remainder of the transformation in this period of heightened market volatility.

After paying for both debt issuance costs and the cost efficiency program, the new financing provided approximately \$70 million of available liquidity, about half of which replaced the prior revolving credit facility with the remainder providing incremental liquidity to fund operations. The Financing Agreement requires the Company to comply with a financial statement covenant that stipulates a maximum leverage ratio (defined to mean the ratio of (a) consolidated total funded indebtedness to (b) consolidated EBITDA) commencing on June 30, 2016 of 4.35:1. The maximum leverage ratio declines gradually over the term of the agreement to a requirement of 2.5:1 on March 31, 2019 and thereafter.

The Company's ability to satisfy the leverage ratio covenant in the future is heavily dependent on its ability to increase bookings and billings above levels experienced over the last twelve months. In recent quarters, the Company has

experienced volatility in bookings and billings resulting from, among other things, (i) its transition towards subscription and recurring revenue streams and the resulting decline in traditional upfront product sales, (ii) volatility in currency rates and in particular the strengthening of the US dollar against the Euro, (iii) dramatic changes in the media industry and the impact it has on the Company's customers and (iv) the impact of new and anticipated product launches and features. In addition to the impact of new bookings and billings, GAAP revenues recognized as the result of the existence of Implied Maintenance Release PCS in prior periods will decline significantly for the remainder of 2016 and in 2017, which will have an adverse impact on the Company's leverage ratio.

In the event bookings and billings in future quarters are lower than the Company currently anticipates, it may be forced to take remedial actions which could include, among other things (and where allowed by the Lenders), (i) further cost reductions, (ii) seeking replacement financing, (iii) raising additional equity or (iv) disposing of certain assets or businesses. Such remedial actions, which may not be available on favorable terms or at all, could have a material adverse impact on the Company's business. If the Company is not in compliance with the leverage ratio and is unable to obtain an amendment or waiver, such noncompliance may result in an event of default under the Financing Agreement, which could permit acceleration of the outstanding indebtedness under the Financing Agreement and require the Company to repay such indebtedness before the scheduled due date. If an event of default were to occur, the Company might not have sufficient funds available to make the payments required. If the Company is unable to repay amounts owed, the lenders may be entitled to foreclose on and sell substantially all of the Company's assets, which secure its borrowings under the Financing Agreement.

The Company's cash requirements vary depending on factors such as the growth of the business, changes in working capital, capital expenditures, and obligations under the cost efficiency program. Management expects to operate the business and execute its strategic initiatives principally with funds generated from operations, remaining net proceeds from the term loan borrowings under the Financing Agreement, and draw up to a maximum of \$5.0 million under the Financing Agreement's revolving credit facility. Management anticipates that the Company will have sufficient internal and external sources of liquidity to fund operations and anticipated working capital and other expected cash needs for at least the next twelve months as well as for the foreseeable future.

Subsequent Events

The Company evaluated subsequent events through the date of issuance of these financial statements and no subsequent events required recognition or disclosure in these financial statements.

Significant Accounting Policies - Revenue Recognition

General

The Company commences revenue recognition when persuasive evidence of an arrangement exists, delivery has occurred, the sales price is fixed or determinable and collection is reasonably assured. Generally, the products the Company sells do not require significant production, modification or customization. Installation of the Company's products is generally routine, consists of implementation and configuration and does not have to be performed by the Company.

At the time of a sales transaction, the Company makes an assessment of the collectability of the amount due from the customer. Revenues are recognized only if it is reasonably assured that collection will occur. When making this assessment, the Company considers customer credit-worthiness and historical payment experience. If it is determined from the outset of the arrangement that collection is not reasonably assured, revenues are recognized on a cash basis, provided that all other revenue recognition criteria are satisfied. At the outset of the arrangement, the Company also assesses whether the fee associated with the order is fixed or determinable and free of contingencies or significant uncertainties. When assessing whether the fee is fixed or determinable, the Company considers the payment terms of

the transaction, the Company's collection experience in similar transactions without making concessions, and the Company's involvement, if any, in third-party financing transactions, among other factors. If the fee is not fixed or determinable, revenues are recognized only as payments become due from the customer, provided that all other revenue recognition criteria are met. If a significant portion of the fee is due after the Company's normal payment terms, the Company evaluates whether the Company has sufficient history of successfully collecting past transactions with similar terms without offering concessions. If that collection history is sufficient, revenue recognition commences, upon delivery of the products, assuming all other revenue recognition criteria

are satisfied. If the Company was to make different judgments or assumptions about any of these matters, it could cause a material increase or decrease in the amount of revenues reported in a particular period.

The Company often receives multiple purchase orders or contracts from a single customer or a group of related customers that are evaluated to determine if they are, in effect, part of a single arrangement. In situations when the Company has concluded that two or more orders with the same customer are so closely related that they are, in effect, parts of a single arrangement, the Company accounts for those orders as a single arrangement for revenue recognition purposes. In other circumstances, when the Company has concluded that two or more orders with the same customer are independent buying decisions, such as an earlier purchase of a product and a subsequent purchase of a software upgrade or maintenance contract, the Company accounts for those orders as separate arrangements for revenue recognition purposes.

For many of the Company's products, there has been an ongoing practice of Avid making available at no charge to customers minor feature and compatibility enhancements as well as bug fixes on a when-and-if-available basis (collectively "Software Updates"), for a period of time after initial sales to end users. The implicit obligation to make such Software Updates available to customers over a period of time represents implied post-contract customer support, which is deemed to be a deliverable in each arrangement and is accounted for as a separate element ("Implied Maintenance Release PCS").

Over the course of the last two years, in connection with a strategic initiative to increase support and other recurring revenue streams, the Company has taken a number of steps to eliminate the longstanding practice of providing Implied Maintenance Release PCS for many of its products, including Media Composer, Pro Tools and Sibelius product lines. In the third quarter and fourth quarter of 2015, respectively, the Company concluded that Implied Maintenance Release PCS for its Media Composer and Sibelius product lines had ceased. In the first quarter of 2016, in connection with the release of Cloud Collaboration in Pro Tools version 12.5, which was an undelivered feature that had prevented the Company from recognizing any revenue related to new Pro Tools 12 software sales as it represented a specified upgrade right for which vendor specific objective evidence ("VSOE") of fair value was not available, the Company concluded that Implied Maintenance Release PCS for Pro Tools 12 product lines had also ended. The determination that Pro Tools 12 Implied Maintenance Release PCS had ended was based on management (i) clearly communicating a policy of no longer providing any Software Updates or other support to customers that are not covered under a paid support plan and (ii) implementing robust digital rights management tools to enforce the policy. With the new policy and technology for Pro Tools 12 in place, combined with management's intent to continue to adhere to the policy, management concluded in the first quarter of 2016 that Implied Maintenance Release PCS for Pro Tools 12 transactions no longer exists. As a result of the conclusion that Implied Maintenance Release PCS on Pro Tools 12 has ended, revenue and net income in the first quarter of 2016 increased approximately \$11.1 million, reflecting the recognition of orders received after the launch of Pro Tools 12 that would have qualified for earlier recognition using the residual method of accounting. In addition, the elimination of Implied Maintenance Release PCS also resulted in the accelerated recognition of maintenance and product revenues that were previously being recognized on a ratable basis over a much longer expected period of Implied Maintenance Release PCS rather than the contractual maintenance period. The reduction in the estimated amortization period of transactions being recognized on a ratable basis resulted in an additional \$15.2 million and \$21.7 million of revenue during the three and six months ended June 30, 2016, respectively.

The Company enters into certain contractual arrangements that have multiple elements, one or more of which may be delivered subsequent to the delivery of other elements. These multiple-deliverable arrangements may include products, support, training, professional services and Implied Maintenance Release PCS. For these multiple-element arrangements, the Company allocates revenue to each deliverable of the arrangement based on the relative selling prices of the deliverables. In such circumstances, the Company first determines the selling price of each deliverable based on (i) VSOE of fair value if that exists; (ii) third-party evidence of selling price ("TPE"), when VSOE does not

exist; or (iii) best estimate of the selling price (“BESP”), when neither VSOE nor TPE exists. Revenue is then allocated to the non-software deliverables as a group and to the software deliverables as a group using the relative selling prices of each of the deliverables in the arrangement based on the selling price hierarchy. The Company’s process for determining BESP for deliverables for which VSOE or TPE does not exist involves significant management judgment. In determining BESP, the Company considers a number of data points, including:

- the pricing established by management when setting prices for deliverables that are intended to be sold on a standalone basis;
- contractually stated prices for deliverables that are intended to be sold on a standalone basis;
- the pricing of standalone sales that may not qualify as VSOE of fair value due to limited volumes or variation in prices; and

other pricing factors, such as the geographical region in which the products are sold and expected discounts based on the customer size and type.

In determining a BEBP for Implied Maintenance Release PCS, which the Company does not sell separately, the Company considers (i) the service period for the Implied Maintenance Release PCS, (ii) the differential in value of the Implied Maintenance Release PCS deliverable compared to a full support contract, (iii) the likely list price that would have resulted from the Company's established pricing practices had the deliverable been offered separately, and (iv) the prices a customer would likely be willing to pay.

The Company estimates the service period of Implied Maintenance Release PCS based on the length of time the product version purchased by the customer is planned to be supported with Software Updates. If facts and circumstances indicate that the original service period of Implied Maintenance Release PCS for a product has changed significantly after original revenue recognition has commenced, the Company will modify the remaining estimated service period accordingly and recognize the then-remaining deferred revenue balance over the revised service period.

The Company has established VSOE of fair value for some of the Company's professional services, training and support offerings. The Company's policy for establishing VSOE of fair value consists of evaluating standalone sales to determine if a substantial portion of the transactions fall within a reasonable range. If a sufficient volume of standalone sales exist and the standalone pricing for a substantial portion of the transactions falls within a reasonable range, management concludes that VSOE of fair value exists.

In accordance with ASU No. 2009-14, the Company excludes from the scope of software revenue recognition requirements the Company's sales of tangible products that contain both software and non-software components that function together to deliver the essential functionality of the tangible products. The Company adopted ASU No. 2009-13 and ASU No. 2009-14 prospectively on January 1, 2011 for new and materially modified arrangements originating after December 31, 2010.

Prior to the Company's adoption of ASU No. 2009-14, the Company primarily recognized revenues using the revenue recognition criteria of Accounting Standards Codification, or ASC, Subtopic 985-605, Software-Revenue Recognition. As a result of the Company's adoption of ASU No. 2009-14 on January 1, 2011, a majority of the Company's products are now considered non-software elements under GAAP, which excludes them from the scope of ASC Subtopic 985-605 and includes them within the scope of ASC Topic 605, Revenue Recognition. Because the Company had not been able to establish VSOE of fair value for Implied Maintenance Release PCS, as described further below, substantially all revenue arrangements prior to January 1, 2011 were recognized on a ratable basis over the service period of Implied Maintenance Release PCS. Subsequent to January 1, 2011 and the adoption of ASU No. 2009-14, the Company determines a relative selling price for all elements of the arrangement through the use of BEBP, as VSOE and TPE are typically not available, resulting in revenue recognition upon delivery of arrangement consideration attributable to product revenue, provided all other criteria for revenue recognition are met, and revenue recognition of Implied Maintenance Release PCS and other service and support elements over time as services are rendered.

Revenue Recognition of Non-Software Deliverables

Revenue from products that are considered non-software deliverables is recognized upon delivery of the product to the customer. Products are considered delivered to the customer once they have been shipped and title and risk of loss has been transferred. For most of the Company's product sales, these criteria are met at the time the product is shipped. Revenue from support that is considered a non-software deliverable is initially deferred and is recognized ratably over the contractual period of the arrangement, which is generally 12 months. Professional services and training services are typically sold to customers on a time and materials basis. Revenue from professional services and training services

that are considered non-software deliverables is recognized for these deliverables as services are provided to the customer. Revenue for Implied Maintenance Release PCS that is considered a non-software deliverable is recognized ratably over the service period of Implied Maintenance Release PCS, which ranges from one to eight years.

Revenue Recognition of Software Deliverables

The Company recognizes the following types of elements sold using software revenue recognition guidance: (i) software products and software upgrades, when the software sold in a customer arrangement is more than incidental to the

8

arrangement as a whole and the product does not contain hardware that functions with the software to provide essential functionality, (ii) initial support contracts where the underlying product being supported is considered to be a software deliverable, (iii) support contract renewals, and (iv) professional services and training that relate to deliverables considered to be software deliverables. Because the Company does not have VSOE of the fair value of its software products, the Company is permitted to account for its typical customer arrangements that include multiple elements using the residual method. Under the residual method, the VSOE of fair value of the undelivered elements (which could include support, professional services or training, or any combination thereof) is deferred and the remaining portion of the total arrangement fee is recognized as revenue for the delivered elements. If evidence of the VSOE of fair value of one or more undelivered elements does not exist, revenues are deferred and recognized when delivery of those elements occurs or when VSOE of fair value can be established. VSOE of fair value is typically based on the price charged when the element is sold separately to customers. The Company is unable to use the residual method to recognize revenues for many arrangements that include products that are software deliverables under GAAP since VSOE of fair value does not exist for Implied Maintenance Release PCS elements, which are included in many of the Company's arrangements.

For software products that include Implied Maintenance Release PCS, an element for which VSOE of fair value does not exist, revenue for the entire arrangement fee, which could include combinations of product, professional services, training and support, is recognized ratably as a group over the longest service period of any deliverable in the arrangement, with recognition commencing on the date delivery has occurred for all deliverables in the arrangement (or begins to occur in the case of professional services, training and support). Standalone sales of support contracts are recognized ratably over the service period of the product being supported.

From time to time, the Company offers certain customers free upgrades or specified future products or enhancements. When a software deliverable arrangement contains an Implied Maintenance Release PCS deliverable, revenue recognition of the entire arrangement will only commence when any free upgrades or specified future products or enhancements have been delivered, assuming all other products in the arrangement have been delivered and all services, if any, have commenced.

Recently Adopted Accounting Pronouncement

On March 30, 2016, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2016-09, Compensation-Stock Compensation (Topic 718). The standard is intended to simplify several areas of accounting for share-based compensation arrangements, including the accounting for income taxes, forfeitures, and statutory tax withholding requirements, as well as classification in the statement of cash flows. ASU 2016-09 is effective for fiscal years, and interim periods within those years, beginning after December 15, 2016, and early adoption is permitted. The Company early adopted ASU 2016-09 during the second quarter of 2016 on a modified retrospective basis for the income statement impact of forfeitures. The adoption of ASU 2016-09 has no impact to the Company's income taxes and condensed consolidated statements of cash flows. Accordingly, a cumulative-effect adjustment recorded to the beginning retained earnings as of January 1, 2016 for the impact of forfeitures is immaterial.

Recent Accounting Pronouncements to be Adopted

In May, 2014, the FASB issued a final updated standard on revenue recognition. The standard supersedes the most current revenue recognition guidance, including industry-specific guidance. The new revenue recognition guidance becomes effective for the Company on January 1, 2018, and early adoption as of January 1, 2017 is permitted. Entities have the option of using either a full retrospective or a modified approach to adopt the guidance in the ASU. The Company has not yet selected a transition method and is evaluating the effect that the updated standard will have on its consolidated financial statements and related disclosures.

In August 2014, the FASB issued ASU 2014-15, Presentation of Financial Statements - Going Concern. ASU 2014-15 provides guidance around management's responsibility to evaluate whether there is substantial doubt about an entity's ability to continue as a going concern and to provide related footnote disclosures. For each reporting period, management will be required to evaluate whether there are conditions or events that raise substantial doubt about a company's ability to continue as a going concern within one year from the date the financial statements are issued. The new standard is effective for the Company beginning January 1, 2017. Early adoption is permitted. The Company is evaluating the potential impact of adopting this standard on its financial statements, as well as timing of its adoption of the standard.

On February 25, 2016, the FASB issued new accounting guidance on leases. Lessees will need to recognize virtually all of their leases on the balance sheet, by recording a right-of-use asset and lease liability. The new guidance becomes effective for the Company on January 1, 2019, and early adoption is permitted upon issuance. The Company is evaluating the potential impact of adopting this standard on its financial statements, as well as the timing of its adoption of the standard.

2. NET INCOME PER SHARE

Net income per common share is presented for both basic income per share (“Basic EPS”) and diluted income per share (“Diluted EPS”). Basic EPS is based on the weighted-average number of common shares outstanding during the period. Diluted EPS is based on the weighted-average number of common shares and common share equivalents outstanding during the period.

The potential common shares that were considered anti-dilutive securities were excluded from the diluted earnings per share calculations for the relevant periods either because the sum of the exercise price per share and the unrecognized compensation cost per share was greater than the average market price of the Company’s common stock for the relevant period, or because they were considered contingently issuable. The contingently issuable potential common shares result from certain stock options and restricted stock units granted to the Company’s employees that vest based on performance conditions, market conditions, or a combination of performance and market conditions.

The following table sets forth (in thousands) potential common shares that were considered anti-dilutive securities for the six months ended June 30, 2016 and at June 30, 2015.

	June 30, 2016	June 30, 2015
Options	4,218	5,227
Non-vested restricted stock units	1,177	951
Anti-dilutive potential common shares	5,395	6,178

On June 15, 2015, the Company issued \$125.0 million aggregate principal amount of its 2.00% Convertible Senior Notes due 2020 (the “Notes”). The Notes are convertible into cash, shares of the Company’s common stock or a combination of cash and shares of common stock, at the Company’s election, based on an initial conversion rate, subject to adjustment (see Note 11). In connection with the offering of the Notes, the Company entered into a capped call transaction with a third party (the “Capped Call”) (see Note 11, Long-Term Debt and Credit Agreement). The Company uses the treasury stock method in computing the dilutive impact of the Notes. The Notes are convertible into shares of the Company’s common stock but the Company’s stock price was less than the conversion price as of June 30, 2016, and, therefore, the Notes are excluded from Diluted EPS. The Capped Call is not reflected in diluted net income per share as it will always be anti-dilutive.

3. ACQUISITION

On June 23, 2015, the Company completed the acquisition of Orad Hi-Tech Systems Ltd. (“Orad”). Orad provides 3D real-time graphics, video servers and related asset management solutions. The acquisition adds applications to Avid’s Studio Suite which the Company intends to connect to the Avid MediaCentral Platform.

In allocating the total purchase consideration of \$73.4 million for Orad based on the fair value as of June 23, 2015, the Company recorded \$32.6 million of goodwill, \$37.2 million of identifiable intangibles assets, and \$3.6 million to other net assets. Intangible assets acquired included core and completed technology, customer relationships and trade name.

4. FAIR VALUE MEASUREMENTS

Assets Measured at Fair Value on a Recurring Basis

The Company measures deferred compensation investments on a recurring basis. As of June 30, 2016 and December 31, 2015, the Company's deferred compensation investments were classified as either Level 1 or Level 2 in the fair value hierarchy. Assets valued using quoted market prices in active markets and classified as Level 1 are money market and mutual funds. Assets valued based on other observable inputs and classified as Level 2 are insurance contracts.

The following tables summarize the Company's deferred compensation investments measured at fair value on a recurring basis (in thousands):

	Fair Value Measurements at Reporting Date Using Quoted Prices in Active Markets for Identical Assets (Level 1)			Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
June 30, 2016					

Financial assets:

Deferred compensation assets	\$ 2,641	\$ 474	\$ 2,167	\$	—
------------------------------	----------	--------	----------	----	---

	Fair Value Measurements at Reporting Date Using Quoted Prices in Active Markets for Identical Assets (Level 1)			Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
December 31, 2015					

Financial assets:

Deferred compensation assets	\$ 3,617	\$ 572	\$ 3,045	\$	—
------------------------------	----------	--------	----------	----	---

Financial Instruments Not Recorded at Fair Value

The carrying amounts of the Company's other financial assets and liabilities including cash, accounts receivable, accounts payable and accrued liabilities approximate their respective fair values because of the relatively short period of time between their origination and their expected realization or settlement. As of June 30, 2016, the net carrying amount of the Notes was \$98.7 million, and the fair value of the Notes was approximately \$87.5 million based on open market trading activity, which constitutes a Level 1 input in the fair value hierarchy.

5. INVENTORIES

Inventories consisted of the following (in thousands):

	June 30, December 31,	
	2016	2015
Raw materials	\$10,179	\$ 9,594
Work in process	241	256
Finished goods	43,482	38,223
Total	\$53,902	\$ 48,073

As of June 30, 2016 and December 31, 2015, finished goods inventory included \$8.2 million and \$5.3 million, respectively, associated with products shipped to customers and deferred labor costs for arrangements where revenue recognition had not yet commenced.

6. INTANGIBLE ASSETS AND GOODWILL

Amortizing identifiable intangible assets related to the Company's acquisitions or capitalized costs of internally developed or externally purchased software that form the basis for the Company's products consisted of the following (in thousands):

	June 30, 2016		December 31, 2015			
	Gross	Accumulated Amortization	Net	Gross	Accumulated Amortization	Net
Completed technologies and patents \$
