Form 10-Q
November 12, 2013
[Table of Contents](#)

UNITED STATES SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q

Quarterly Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934
For the quarterly period ended September 30, 2013

or

Transition Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934
For the transition period from _____ to _____

Commission file number: 0-15536

CODORUS VALLEY BANCORP, INC.

(Exact name of registrant as specified in its charter)

Pennsylvania

(State or other jurisdiction of
incorporation or organization)

23-2428543

(I.R.S. Employer
Identification No.)

105 Leader Heights Road, P.O. Box 2887, York, Pennsylvania 17405

(Address of principal executive offices) (Zip code)

717-747-1519

(Registrant's telephone number, including area code)

Not Applicable

(Former name, former address and former fiscal year,
if changed since the last report.)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or

Edgar Filing: CODORUS VALLEY BANCORP INC - Form 10-Q

for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See definition of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer

Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

APPLICABLE ONLY TO CORPORATE ISSUERS

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date. On November 1, 2013, 4,791,194 shares of common stock, par value \$2.50, were outstanding, which includes the effect of the 5 percent common stock dividend declared October 8, 2013.

Note 1 Basis of Presentation

The accompanying unaudited consolidated balance sheet at December 31, 2012 has been derived from audited financial statements, and the unaudited interim consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information, the instructions to Form 10-Q, and FASB Accounting Standards Codification (ASC) 270. Accordingly, the interim financial statements do not include all of the financial information and notes required by generally accepted accounting principles for complete financial statements. In the opinion of management, the interim consolidated financial statements include all adjustments necessary to present fairly the financial condition and results of operations for the reported periods, and all such adjustments are of a normal and recurring nature.

These consolidated statements should be read in conjunction with the notes to the audited consolidated financial statements contained in the Corporation's Annual Report on Form 10-K for the year ended December 31, 2012.

The consolidated financial statements include the accounts of Codorus Valley Bancorp, Inc. and its wholly owned bank subsidiary, PeoplesBank, A Codorus Valley Company (PeoplesBank), and its wholly owned nonbank subsidiary, SYC Realty Company, Inc. (collectively referred to as Codorus Valley or the Corporation). PeoplesBank has four wholly-owned subsidiaries, Codorus Valley Financial Advisors, Inc., SYC Settlement Services, Inc. and two subsidiaries whose purpose is to temporarily hold foreclosed properties pending eventual liquidation. All significant intercompany account balances and transactions have been eliminated in consolidation. The combined results of operations of the nonbank subsidiaries are not material to the consolidated financial statements.

The results of operations for the three and nine months ended September 30, 2013 are not necessarily indicative of the results to be expected for the full year.

In accordance with FASB ASC 855, the Corporation evaluated the events and transactions that occurred after the balance sheet date of September 30, 2013 and through the date these consolidated financial statements were issued, for items of potential recognition or disclosure.

Note 2 Significant Accounting Policies

Loans

Loans receivable that management has the intent and ability to hold for the foreseeable future or until maturity or payoff, are stated at their outstanding unpaid principal balances less amounts charged off, net of an allowance for loan losses and any deferred fees or costs. Interest income is accrued on the unpaid principal balance. Generally, loan origination fees, net of certain direct origination costs, are deferred and recognized as an adjustment of the yield (interest income) over the contractual life of the loan. The loans receivable portfolio is segmented into commercial and consumer loans. Commercial loans consist of the following industry classes: builder & developer, commercial real estate investor, residential real estate investor, hotel/motel, wholesale & retail, agriculture, manufacturing and all other. Consumer loans consist of the following classes: residential mortgage, home equity and all other.

For all classes of loans receivable, the accrual of interest is discontinued when the contractual payment of principal or interest has become 90 days past due or management has serious doubts about further collectability of principal or interest, even though the loan is currently performing. A loan may remain on accrual status if it is in the process of collection and is either guaranteed or well secured. When a loan is placed on nonaccrual status, unpaid interest credited to income in the current year is reversed and unpaid interest accrued in prior years is charged against the allowance for loan losses. Interest received on nonaccrual loans, including impaired loans, generally is either applied against principal or reported as interest income, according to the Corporation's judgment as to the collectability of principal. Generally, loans are restored to accrual status when the obligation is brought current, has performed in accordance with the contractual terms for a reasonable period of time, generally six months, and the ultimate collectability of the total contractual principal and interest is no longer in doubt. The past due status of all classes of loans receivable is determined based on contractual due dates for loan payments.

Table of Contents

Allowance for Loan Losses

The allowance for loan losses represents the Corporation's estimate of losses inherent in the loan portfolio as of the balance sheet date and is recorded as a reduction to loans. The allowance for loan losses is increased by the provision for loan losses, and decreased by charge-offs, net of recoveries. Loans deemed to be uncollectible are charged against the allowance for loan losses, and subsequent recoveries, if any, are credited to the allowance. All, or part, of the principal balance of loans receivable are charged off to the allowance as soon as it is determined that the repayment of all, or part, of the principal balance is highly unlikely. While the Corporation attributes a portion of the allowance to individual loans and groups of loans that it evaluates and determines to be impaired, the allowance is available to cover all charge-offs that arise from the loan portfolio.

The allowance for loan losses is maintained at a level considered adequate to provide for losses that can be reasonably anticipated. The Corporation performs a quarterly evaluation of the adequacy of the allowance. The allowance is based on the Corporation's past loan loss experience, known and inherent risks in the portfolio, adverse situations that may affect the borrower's ability to repay, the estimated value of any underlying collateral, composition of the loan portfolio, current economic conditions and other relevant factors. This evaluation is inherently subjective as it requires material estimates that may be susceptible to significant revision as more information becomes available.

The allowance consists of specific, general and unallocated components. The specific component relates to loans that are classified as impaired, generally substandard and nonaccrual loans. For loans that are classified as impaired, an allowance is established when the collateral value (or discounted cash flows or observable market price) of the impaired loan is lower than the carrying value of that loan. The general component covers pools of loans by loan class including commercial loans not considered impaired, as well as smaller balance homogeneous loans, such as residential real estate, home equity and other consumer loans. These pools of loans are evaluated for loss exposure based upon historical loss rates for each of these classes of loans, adjusted for qualitative (environmental) risk factors. Historical loss rates are based on a two year rolling average of net charge-offs. Qualitative risk factors that supplement historical losses in the evaluation of loan pools include:

- Changes in national and local economies and business conditions
- Changes in the value of collateral for collateral dependent loans
- Changes in the level of concentrations of credit
- Changes in the volume and severity of classified and past due loans
- Changes in the nature and volume of the portfolio
- Changes in collection, charge-off, and recovery procedures
- Changes in underwriting standards and loan terms
- Changes in the quality of the loan review system
- Changes in the experience/ability of lending management and key lending staff
- Regulatory and legal regulations that could affect the level of credit losses
- Other pertinent environmental factors

Each factor is assigned a value to reflect improving, stable or declining conditions based on the Corporation's best judgment using relevant information available at the time of the evaluation. An unallocated component is maintained to cover uncertainties that could affect the Corporation's estimate of probable losses. The unallocated component of the allowance reflects the margin of imprecision inherent in the underlying assumptions used in the methodologies for estimating specific and general losses in the loan portfolio.

Table of Contents

As disclosed in Note 5-Loans, the Corporation engages in commercial and consumer lending. Loans are made within the Corporation's primary market area and surrounding areas, and include the purchase of whole loan or participation interests in loans from other financial institutions or private equity companies. Commercial related loans, which pose the greatest risk of loss to the Corporation, whether originated or purchased, are generally secured by real estate. Within the broad commercial loan segment, the builder & developer and commercial real estate investor loan classes generally present a higher level of risk than other commercial loan classifications. This greater risk is due to several factors, including the concentration of principal in a limited number of loans and borrowers, the effect of general economic conditions on income producing properties, unstable real estate prices and the dependency upon successful construction and sale or operation of the real estate project. Within the consumer loan segment, junior (i.e., second) liens present a slightly higher risk to the Corporation because economic and housing market conditions can adversely affect the underlying value of the collateral and the ability of some borrowers to service their debt.

A loan is considered impaired when, based on current information and events, it is probable that the Corporation will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Factors considered in determining impairment include payment status and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. The Corporation determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record and the amount of the shortfall in relation to the principal and interest owed. Loans that are deemed impaired are evaluated for impairment loss based on the net realizable value of the collateral, as applicable. Loans that are not collateral dependent will rely on the present value of expected future cash flows discounted at the loan's effective interest rate to determine impairment loss. Large groups of smaller balance homogeneous loans such as residential mortgage loans, home equity loans and other consumer loans are collectively evaluated for impairment, unless they are considered to be a troubled debt restructuring.

An allowance for loan losses is established for an impaired commercial loan if its carrying value exceeds its estimated fair value. For commercial loans secured by real estate, estimated fair values are determined primarily through third-party appraisals of the underlying collateral. When a real estate secured loan becomes impaired, a decision is made regarding whether an updated certified appraisal of the real estate is necessary. This decision is based on various considerations, including the age of the most recent appraisal, the loan-to-value ratio based on the most recent appraisal and the condition of the property. Appraisals are generally discounted to provide for selling costs and other factors to determine an estimate of the net realizable value of the property. For commercial loans secured by non-real estate collateral, such as accounts receivable, inventory and equipment, estimated fair values are determined based on the borrower's financial statements, inventory reports, accounts receivable aging or equipment appraisals or invoices. Indications of value from these sources are generally discounted based on the age of the financial information or the quality of the assets. In instances when specific consumer related loans become impaired, they may be partially or fully charged off, which obviates the need for a specific allowance.

Loans whose terms are modified are classified as troubled debt restructurings if the Corporation grants borrowers experiencing financial difficulties concessions that it would not otherwise consider. Concessions granted under a troubled debt restructuring may involve an interest rate that is below the market rate given the associated credit risk of the loan or an extension of a loan's stated maturity date. Loans classified as troubled debt restructurings are designated as impaired. Non-accrual troubled debt restructurings are restored to accrual status if principal and interest payments, under the modified terms, are current for a reasonable period of time, generally six consecutive months after modification and future payments are reasonably assured.

Banking regulatory agencies, as an integral part of their examination process, periodically review the Corporation's allowance for loan losses and may require the Corporation to recognize additions to the allowance based on their judgments about information available to them at the time of their examination, which may not be currently available to the Corporation. Based on a comprehensive analysis of the loan portfolio, the Corporation believes that the level of the allowance for loan losses at September 30, 2013 is adequate.

Table of Contents*Foreclosed Real Estate*

Foreclosed real estate, included in other assets, is comprised of property acquired through a foreclosure proceeding or property that is acquired through in substance foreclosure. Foreclosed real estate is initially recorded at fair value minus estimated costs to sell at the date of foreclosure, establishing a new cost basis. Any difference between the carrying value and the new cost basis is charged against the allowance for loan losses. Appraisals, based upon an independent third party, are generally used to determine fair value. After foreclosure, management reviews valuations at least quarterly and adjusts the asset to the lower of cost or fair value minus estimated costs to sell through a valuation allowance or a charge-off. Costs related to the improvement of foreclosed real estate are generally capitalized until the real estate reaches a saleable condition subject to fair value limitations. Revenue and expense from operations and changes in the valuation allowance are included in noninterest expense. When a foreclosed real estate asset is ultimately sold, any gain or loss on the sale is included in the income statement as a component of noninterest expense. At September 30, 2013, foreclosed real estate, net of allowance, was \$3,867,000, compared to \$3,633,000 for December 31, 2012.

Per Common Share Computations

All per share computations include the effect of stock dividends declared, including a 5% common stock dividend declared October 8, 2013. The computation of net income per common share is provided in the table below.

<i>(in thousands, except per share data)</i>	Three months ended September 30,		Nine months ended September 30,	
	2013	2012	2013	2012
Net income available to common shareholders	\$ 2,615	\$ 1,809	\$ 7,797	\$ 6,619
Weighted average shares outstanding (basic)	4,751	4,671	4,730	4,654
Effect of dilutive stock options	94	77	89	60
Weighted average shares outstanding (diluted)	4,845	4,748	4,819	4,714
Basic earnings per common share	\$ 0.55	\$ 0.39	\$ 1.65	\$ 1.42
Diluted earnings per common share	\$ 0.54	\$ 0.38	\$ 1.62	\$ 1.40
Anti-dilutive stock options excluded from the computation of earnings per share	4	81	33	87

- 11 -

Table of Contents*Comprehensive Income*

Accounting principles generally accepted in the United States of America require that recognized revenue, expenses, gains and losses be included in net income. Although certain changes in assets and liabilities, such as unrealized gains and losses on available-for-sale securities, are reported as a separate component of the shareholders' equity section of the balance sheet, such items, along with net income, are components of comprehensive income.

Cash Flow Information

For purposes of the statements of cash flows, the Corporation considers interest bearing deposits with banks, cash and due from banks, and federal funds sold to be cash and cash equivalents.

Supplemental cash flow information is provided in the table below.

<i>(dollars in thousands)</i>	Nine months ended September 30,	
	2013	2012
Cash paid during the period for:		
Income taxes	\$ 2,490	\$ 2,727
Interest	\$ 6,599	\$ 8,029
Noncash investing activities:		
Transfer of loans to foreclosed real estate	\$ 551	\$ 231
Transfer of loans held for sale to the held-to-maturity portfolio	\$ 258	\$ 0
Increase in other liabilities for purchase of securities settling after quarter end	\$ 0	\$ 2,201
Increase in other assets for purchase of securities settling after quarter end	\$ 0	\$ 1,566

Reclassification

Certain amounts in the 2012 consolidated financial statements have been reclassified to conform to the 2013 presentation, which did not impact net income or shareholders' equity.

Recent Accounting Pronouncements

There were no new accounting pronouncements affecting the Corporation during the reporting period that were not already adopted or that are expected to have a material impact on the Corporation's consolidated financial position or results of operations.

Note 3-Securities

A summary of securities available-for-sale at September 30, 2013 and December 31, 2012 is provided below. The securities available-for-sale portfolio is generally comprised of high quality debt instruments, principally obligations of the United States government or agencies thereof. Also included in the portfolio are investments in the obligations of states and municipalities. With the exception of an approximately \$8 million portfolio (fair value) of Texas municipal utility district bonds, which has its own criteria for investment (e.g., maximum debt to assessed valuation, minimum assessed valuation and district size, proximity to employment, etc.), the remaining municipal bonds were all rated A or above by a national rating service at September 30, 2013. The majority of municipal bonds in the portfolio are general obligation bonds, which can draw upon multiple sources of revenue, including taxes, for payment. Only a few bonds are revenue bonds, which are dependent upon a single revenue stream for payment, but they are for critical services such as water and sewer. In many cases, municipal debt issues are insured or, in the case of school districts of selected states, backed by specific loss reserves. At September 30, 2013, the fair value of the municipal bond portfolio was concentrated in the states of Pennsylvania at 43 percent and Texas at 17 percent.

Table of Contents

<i>(dollars in thousands)</i>	Amortized Cost	Gross Unrealized		Fair Value
		Gains	Losses	
September 30, 2013				
Debt securities:				
U.S. Treasury notes	\$ 1,500	\$ 5	\$ 0	\$ 1,505

Due after ten years	3,820	3,950
Total debt securities	\$ 234,634	\$ 239,129

Edgar Filing: CODORUS VALLEY BANCORP INC - Form 10-Q

Table of Contents

Gross realized gains and losses on sales of securities available-for-sale are shown below. Realized gains and losses are computed on the basis of specific identification of the adjusted cost of each security and are shown net as a separate line item in the income statement.

<i>(dollars in thousands)</i>	Three months ended September 30,		Nine months ended September 30,	
	2013	2012	2013	2012
Realized gains	\$ 0	\$ 382	\$ 44	\$ 431
Realized losses	0	0	0	0
Net gains	\$ 0	\$ 382	\$ 44	\$ 431

Securities, issued by agencies of the federal government, with a carrying value of \$142,557,000 and \$135,348,000 on September 30, 2013 and December 31, 2012, respectively, were pledged to secure public and trust deposits, repurchase agreements and other short-term borrowings.

The table below shows gross unrealized losses and fair value, aggregated by investment category and length of time, for securities that have been in a continuous unrealized loss position, at September 30, 2013 and December 31, 2012.

<i>(dollars in thousands)</i>	Less than 12 months		12 months or more		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
September 30, 2013						
Debt securities:						
U.S. agency	\$ 29,897	\$ (374)	\$ 0	\$ 0	\$ 29,897	\$ (374)
U.S. agency mortgage-backed, residential	23,140	(168)	0	0	23,140	(168)
State and municipal	17,408	(191)	0	0	17,408	(191)
Total temporarily impaired debt securities, available for sale	\$ 70,445	\$ (733)	\$ 0	\$ 0	\$ 70,445	\$ (733)
December 31, 2012						
Debt securities:						
U.S. agency	\$ 8,251	\$ (25)	\$ 0	\$ 0	\$ 8,251	\$ (25)
State and municipal	11,565	(58)	0	0	11,565	(58)
Total temporarily impaired debt securities, available for sale	\$ 19,816	\$ (83)	\$ 0	\$ 0	\$ 19,816	\$ (83)

The unrealized losses of \$733,000 at September 30, 2013 within the less than 12 months category were attributable to nine U.S. agency securities, eight U.S. agency mortgage-backed securities, and forty-one state and municipal securities, all rated A or above by a national rating service.

Securities available-for-sale are analyzed quarterly for possible other-than-temporary impairment. The analysis considers, among other factors: 1) whether the Corporation has the intent to sell its securities prior to market recovery or maturity; 2) whether it is more likely than not that the Corporation will be required to sell its securities prior to market recovery or maturity; 3) default rates/history by security type; 4) third-party securities ratings; 5) third-party guarantees; 6) subordination; 7) payment delinquencies; 8) nature of the issuer; and 9) current financial news.

The Corporation believes that unrealized losses at September 30, 2013 were primarily the result of changes in market interest rates and that it has the ability to hold these investments for a time necessary to recover the amortized cost. Through September 30, 2013 the Corporation has collected all interest and principal on its investment securities as scheduled. The Corporation believes that collection of the contractual principal and interest is probable and, therefore, all impairment is considered to be temporary.

Table of Contents

Note 4 Restricted Investment in Bank Stocks

Restricted stock, which represents required investments in the common stock of correspondent banks, is carried at cost and, as of September 30, 2013 and December 31, 2012, consisted primarily of the common stock of the Federal Home Loan Bank of Pittsburgh (FHLBP) and, to a lesser degree, Atlantic Community Bankers Bank (ACBB). Under the FHLBP's Capital Plan, PeoplesBank is required to maintain a minimum member stock investment, both as a condition of becoming and remaining a member and as a condition of obtaining borrowings from the FHLBP. The FHLBP uses a formula to determine the minimum stock investment, which is based on the volume of loans outstanding, unused borrowing capacity and other factors.

The FHLBP paid dividends during the periods ended September 30, 2013 and 2012 but reported that future dividends will be dependent upon the condition of its private-label residential mortgage-backed securities portfolio, its overall financial performance, retained earnings and other factors. The FHLBP restricts the repurchase of the excess capital stock of member banks. The amount of excess capital stock that can be repurchased from any member is currently the lesser of five percent of the member's total capital stock outstanding or its excess capital stock outstanding.

Management evaluates the restricted stock for impairment in accordance with FASB ASC Topic 942. Management's determination of whether these investments are impaired is based on their assessment of the ultimate recoverability of their cost rather than by recognizing temporary declines in value. Using the FHLBP as an example, the determination of whether a decline affects the ultimate recoverability of cost is influenced by criteria such as: (1) the significance of the decline in net assets of the FHLBP as compared to the capital stock amount for the FHLBP and the length of time this situation has persisted; (2) commitments by the FHLBP to make payments required by law or regulation and the level of such payments in relation to the operating performance of the FHLBP; and (3) the impact of legislative and regulatory changes on institutions and, accordingly, on the customer base of the FHLBP. Management believes no impairment charge was necessary related to the restricted stock during the periods ended September 30, 2013 and 2012.

Table of Contents**Note 5 Loans***Loan Portfolio Composition*

The table below provides the composition of the loan portfolio at September 30, 2013 and December 31, 2012. The portfolio is comprised of two segments, commercial and consumer loans. The commercial loan segment is disaggregated by industry class which allows the Corporation to monitor risk and performance. Those industries representing the largest dollar investment and most risk are listed separately. The other commercial loans category is comprised of the following industries, including health services, professional services, public administration, restaurant, service, transportation, finance, natural resources, recreation and religious organizations. The consumer related segment is comprised of residential mortgages, home equity and other consumer loans. The Corporation has not engaged in sub-prime residential mortgage originations.

<i>(dollars in thousands)</i>	September 30, 2013	December 31, 2012
Builder & developer	\$ 103,112	\$ 96,936

Home equity	75,080	65,858
Other	39,252	40,285
Total consumer related loans	139,457	129,654
Total loans	\$ 813,661	\$ 737,134

Loan Risk Ratings

The Corporation's internal risk rating system follows regulatory guidance as to risk classifications and definitions. Every approved loan is assigned a risk rating. Generally, risk ratings for commercial related loans and residential mortgages held for investment are determined by a formal evaluation of risk factors performed by the Corporation's underwriting staff. For consumer loans, and commercial loans up to \$750,000, the Corporation uses third-party credit scoring software models for risk rating purposes. The loan portfolio is monitored on a continuous basis by loan officers, loan review personnel and senior management. Adjustments of loan risk ratings are generally performed by the Special Asset Committee, which includes senior management. The Committee, which meets monthly, makes changes, as appropriate, to risk ratings when it becomes aware of credit events such as payment delinquency, cessation of a business or project, bankruptcy or death of the borrower, or changes in collateral value.

The Corporation uses ten risk ratings to grade loans. The first seven ratings, representing the lowest risk, are combined and given a pass rating. A pass rating is a satisfactory credit rating, which applies to a loan that is expected to perform in accordance with the loan agreement and has a low probability of loss. A loan rated special mention has a potential weakness which may, if not corrected, weaken the loan or inadequately protect the Corporation's position at some future date. A loan rated substandard is inadequately protected by the current net worth or paying capacity of the borrower or of the collateral pledged. A substandard loan has a well defined weakness or weaknesses that could jeopardize liquidation of the loan, which exposes the Corporation to loss if the deficiencies are not corrected. When circumstances indicate that collection of the loan is doubtful, the loan is risk rated nonaccrual, the accrual of interest income is discontinued, and any unpaid interest previously credited to income is reversed. Accordingly, the table below does not include the regulatory classification of doubtful, nor does it include the regulatory classification of loss because the Corporation promptly charges off known loan losses.

Edgar Filing: CODORUS VALLEY BANCORP INC - Form 10-Q

Table of Contents

Impaired Loans

The table below presents a summary of impaired loans at September 30, 2013 and December 31, 2012. Generally, impaired loans are loans risk rated substandard and nonaccrual or classified as troubled debt restructurings. An allowance is established for individual commercial related loans where the Corporation has doubt as to full recovery of the outstanding principal balance. Typically, impaired consumer related loans are partially or fully charged off obviating the need for a specific allowance. The recorded investment represents outstanding unpaid principal loan balances adjusted for charge-offs.

Table of Contents*Troubled Debt Restructurings*

Loans classified as troubled debt restructurings (TDRs) are designated impaired and arise when the Corporation grants borrowers experiencing financial difficulties concessions that it would not otherwise consider. Concessions granted with respect to these loans generally involve an extension of the maturity date or a below market interest rate relative to new debt with similar credit risk. Generally, these loans are secured by real estate. If repayment of the loan is determined to be collateral dependent, the loan is evaluated for impairment loss based on the fair value of the collateral. For loans that are not collateral dependent, the present value of expected future cash flows, discounted at the loan's effective interest rate, is used to determine any impairment loss.

A nonaccrual TDR represents a nonaccrual loan, as previously defined, which includes an economic concession. Nonaccrual TDRs are restored to accrual status if principal and interest payments, under the modified terms, are current for six consecutive payments after the modification and future principal and interest payments are reasonably assured. In contrast, an accruing TDR represents a loan that, at the time of the modification, has a demonstrated history of payments and with respect to which management believes that future loan payments are reasonably assured under the modified terms.

The table below shows loans whose terms have been modified under TDRs during the three and nine months ended September 30, 2013 and 2012. There was no impairment loss recognized on any of these TDRs, and they are all performing under their modified terms. There were no defaults during the three and nine months ended September 30, 2013 and 2012 for TDRs entered into for the last 12 months.

<i>(dollars in thousands)</i>	Number of Contracts	Modifications Pre-Modification Outstanding Recorded Investments	Post-Modification Outstanding Recorded Investments

Total deposits	\$ 922,315	\$ 901,307

Note 8 Short Term Borrowings and Long-term Debt

Short-term borrowings consist of securities sold under agreements to repurchase, federal funds purchased and other borrowings. During the second quarter of 2013, the Corporation opened a \$3 million line of credit with ACNB Bank to provide a source of liquidity. The line, renewable annually, is secured by a first lien on the Codorus Valley Corporate Center. The interest rate on the ACNB Bank line is Wall Street Journal Prime. No draws have been made on the line and on September 30, 2013, the balance was zero.

A summary of long-term debt as of September 30, 2013 and December 31, 2012 is shown below.

<i>(dollars in thousands)</i>	September 30, 2013	December 31, 2012
PeoplesBank s obligations:		
FHLBP		
Due May 2013, 3.46%, amortizing	\$ 0	\$ 245
Due July 2015, 1.90%	5,000	5,000
Due July 2016, 2.35%	5,000	5,000
Due September 2016, 1.18%	10,000	0
Due March 2018, 1.17%	10,000	0
Due June 2018, 1.87%	5,000	5,000
Due June 2019, 2.10%	5,000	5,000

Capital lease obligation	203	260
Codorus Valley Bancorp, Inc. obligations:		
Junior subordinated debt		
Due 2034, 2.27%, floating rate based on 3 month LIBOR plus 2.02%, callable quarterly	3,093	3,093
Due 2036, 1.81% floating rate based on 3 month LIBOR plus 1.54%, callable quarterly	7,217	7,217
Total long-term debt	\$ 50,513	\$ 30,815

Table of Contents

PeoplesBank's long-term debt obligations to the Federal Home Loan Bank of Pittsburgh (FHLBP) are fixed rate instruments. Under terms of a blanket collateral agreement with the FHLBP, the obligations are secured by FHLBP stock and qualifying loan receivables, principally real estate secured loans.

In June 2006, Codorus Valley formed CVB Statutory Trust No. 2, a wholly-owned special purpose subsidiary whose sole purpose was to facilitate a pooled trust preferred debt issuance of \$7,217,000. In November 2004, Codorus Valley formed CVB Statutory Trust No. 1 to facilitate a pooled trust preferred debt issuance of \$3,093,000. The Corporation owns all of the common stock of these nonbank subsidiaries, and the debentures are the sole assets of the Trusts. The accounts of both Trusts are not consolidated for financial reporting purposes in accordance with FASB ASC 810. For regulatory capital purposes, all of the Corporation's trust preferred securities qualified as Tier 1 capital for all reported periods. Trust preferred securities are subject to capital limitations under the FDIC's risk-based capital guidelines. The Corporation used the net proceeds from these offerings to fund its operations.

Note 9 Regulatory Matters

Codorus Valley and PeoplesBank are subject to various regulatory capital requirements. Failure to meet minimum capital requirements can initiate certain mandatory and possible additional discretionary actions by regulators that, if imposed, could have a material effect on Codorus Valley's financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, Codorus Valley and PeoplesBank must meet specific capital guidelines that involve quantitative measures of assets, liabilities, and certain off-balance sheet items as calculated under regulatory accounting practices. The capital amounts and classifications are also subject to qualitative judgments by the regulators.

Edgar Filing: CODORUS VALLEY BANCORP INC - Form 10-Q

Table of Contents

Quantitative measures established by regulators to ensure capital adequacy require Codorus Valley and PeoplesBank to maintain minimum ratios, as set forth below, to total and Tier 1 capital as a percentage of risk-weighted assets, and of Tier 1 capital to quarter-to-date average assets (leverage ratio). Management believes that Codorus Valley and PeoplesBank were well capitalized on September 30, 2013 based on regulatory capital guidelines.

Note 10 Shareholders Equity

Preferred stock issued under the US Treasury's Small Business Lending Fund Program

The annualized dividend rate on the \$25 million of preferred stock issued under the U.S. Treasury's Small Business Lending Fund Program (SBLF Program) was 1 percent for the quarters ended September 30, 2013, December 31, 2012 and September 30, 2012. For the nine-month period ended September 30, 2013, the annualized dividend rate was 1 percent, compared to 1.71 percent for the same period of 2012. Based on the increase in the qualified small business lending portfolio balance over the baseline level at September 30, 2013, the dividend rate will remain at 1 percent through February 18, 2016. Thereafter, under the provisions of the SBLF Program the dividend rate will increase to 9% (including a quarterly lending incentive fee of 0.5%). Additional information about SBLF preferred stock is disclosed in Note 10 Shareholders Equity in the Corporation's Annual Report on Form 10-K for the year ended December 31, 2012.

Common stock dividend

Periodically, the Corporation distributes stock dividends on its common stock. On October 8, 2013, the Corporation declared a 5 percent common stock dividend payable on December 10, 2013, to shareholders of record at the close of business on October 22, 2013. Distribution of this stock dividend will result in the issuance of approximately 226,451 additional common shares. The Corporation distributed a 5 percent common stock dividend on December 11, 2012 which resulted in the issuance of 211,564 additional common shares.

Table of Contents

Note 11 Contingent Liabilities

There are no legal proceedings pending against Codorus Valley Bancorp, Inc. or any of its subsidiaries which are expected to have a material impact upon the consolidated financial position and/or operating results of the Corporation other than routine litigation incidental to the business. Management is not aware of any proceedings known or contemplated by government authorities.

Note 12 Guarantees

Codorus Valley does not issue any guarantees that would require liability recognition or disclosure, other than its standby letters of credit. Standby letters of credit are written conditional commitments issued by PeoplesBank to guarantee the performance of a customer to a third party. Generally, all letters of credit, when issued, have expiration dates within one year. The credit risk involved in issuing letters of credit is essentially the same as those that are involved in extending loan facilities to customers. The Corporation generally holds collateral and/or personal guarantees supporting these commitments. The Corporation had \$27,063,000 of standby letters of credit outstanding on September 30, 2013, compared to \$17,064,000 on December 31, 2012. Management believes that the proceeds obtained through a liquidation of collateral and the enforcement of guarantees would be sufficient to cover the potential amount of future payments required under the corresponding letters of credit. The amount of the liability as of September 30, 2013 and December 31, 2012, for guarantees under standby letters of credit issued, was not material. Many of the commitments are expected to expire without being drawn upon and, therefore, generally do not present significant liquidity risk to the Corporation or PeoplesBank.

Note 13 Fair Value of Assets and Liabilities

The Corporation uses its best judgment in estimating the fair value of the Corporation's assets and liabilities; however, there are inherent weaknesses in any estimation technique. Therefore, the fair value estimates herein are not necessarily indicative of the amounts that could be realized in sales transactions on the dates indicated. The estimated fair value amounts have been measured as of their respective period-ends and have not been re-evaluated or updated for purposes of these financial statements subsequent to those respective dates. As such, the estimated fair values subsequent to the respective reporting dates may be different than the amounts reported at each period end.

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in the principal or most advantageous market for an asset or liability in an orderly transaction (that is, not a forced liquidation or distressed sale) between market participants at the measurement date. GAAP establishes a fair value hierarchy that prioritizes the use of inputs used in valuation methodologies into the following three levels:

Level 1: Inputs to the valuation methodology are quoted prices, unadjusted, for identical assets or liabilities in active markets. A quoted price in an active market provides the most reliable evidence of fair value and shall be used to measure fair value whenever available.

Level 2: Inputs to the valuation methodology include quoted prices for similar assets or liabilities in active markets; inputs to the valuation methodology include quoted prices for identical or similar assets or liabilities in markets that are not active; or inputs to the valuation methodology that utilize model-based techniques for which all significant assumptions are observable in the market.

Table of Contents

Level 3: Inputs to the valuation methodology are unobservable and significant to the fair value measurement; inputs to the valuation methodology that utilize model-based techniques for which significant assumptions are not observable in the market; or inputs to the valuation methodology that require significant management judgment or estimation, some of which may be internally developed. Since management maximizes the use of observable inputs and minimizes the use of unobservable inputs when determining fair value, an asset's or liability's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. Management reviews and updates the fair value hierarchy classifications on a quarterly basis.

Assets Measured at Fair Value on a Recurring Basis**Securities available-for-sale**

The fair values of investment securities were measured using information from a third-party pricing service. The pricing service uses quoted market prices on nationally recognized securities exchanges (Level 1), or matrix pricing (Level 2), which is a mathematical technique, used widely in the industry to value debt securities without relying exclusively on quoted market prices for the specific securities but rather by relying on the securities' relationship to other benchmark quoted prices. At least annually, the Corporation reviews a random sample of the pricing information received from the third-party pricing service by comparing it to price quotes from third-party brokers. Historically, price deviations have been immaterial.

<i>(dollars in thousands)</i>	Total	Fair Value Measurements		
		(Level 1) Quoted Prices in Active Markets for Identical Assets	(Level 2) Significant Other Observable Inputs	(Level 3) Significant Other Unobservable Inputs
September 30, 2013

U.S. agency mortgage-backed, residential	88,233	0	88,233	0
State and municipal	102,739	0	102,739	0

Assets Measured at Fair Value on a Nonrecurring Basis**Impaired loans**

Impaired loans are those that are accounted for under FASB ASC Topic 310, in which the Corporation has measured impairment generally based on the fair value of the loan's collateral. Fair value is generally determined based upon independent third-party appraisals of the properties, or discounted cash flows based upon the expected proceeds. These loans are included as Level 3 fair values, based on the lowest level of input that is significant to the fair value measurements. At September 30, 2013, the fair value of impaired loans with a valuation allowance or charge-off was of \$2,702,000, which is net of valuation allowances of \$870,000 and charge-offs of \$2,861,000. At December 31, 2012 the fair value of impaired loans with a valuation allowance or charge-off was \$4,493,000, which is net of valuation allowances of \$1,162,000 and charge-offs of \$2,605,000.

Table of Contents**Foreclosed Real Estate**

Other real estate property acquired through foreclosure is initially recorded at fair value of the property at the transfer date less estimated selling cost. Subsequently, other real estate owned is carried at the lower of its carrying value or the fair value less estimated selling cost. Fair value is usually determined based upon an independent third-party appraisal of the property or occasionally upon a recent sales offer. At September 30, 2013, the fair value of foreclosed real estate with a valuation allowance or charge-off was \$2,536,000, which is net of valuation allowances of \$3,736,000 and charge-offs of \$100,000. At December 31, 2012, the carrying value of foreclosed real estate with a valuation allowance or charge-off was \$2,779,000, which is net of valuation allowances of \$3,712,000 and no charge-offs.

<i>(dollars in thousands)</i>	Total	Fair Value Measurements		
		(Level 1) Quoted Prices in Active Markets for Identical Assets	(Level 2) Significant Other Observable Inputs	(Level 3) Significant Other Unobservable Inputs
September 30, 2013				
Impaired loans	\$ 2,702	\$ 0	\$ 0	\$ 2,702
Foreclosed real estate	2,536	0	0	2,536
December 31, 2012				
Impaired loans	\$ 4,493	\$ 0	\$ 0	\$ 4,493
Foreclosed real estate	2,779	0	0	2,779

The following table presents additional quantitative information about assets measured at fair value on a nonrecurring basis and for which the Corporation has utilized Level 3 inputs to determine fair value:

<i>(dollars in thousands)</i>	Fair Value Estimate	Quantitative Information about Level 3 Fair Value Measurements			Weighted Average
		Valuation Techniques	Unobservable Input	Range	
September 30, 2013					
Impaired loans	\$ 2,702	Appraisal (1)	Appraisal adjustments (2)	20% - 30%	26%
Foreclosed real estate	2,536	Appraisal (1)	Appraisal adjustments (2)	8% - 67%	49%
December 31, 2012					
Impaired loans	\$ 4,493	Appraisal (1)	Appraisal adjustments (2)	10% - 100%	27%
Foreclosed real estate	2,779	Appraisal (1)	Appraisal adjustments (2)	5% - 100%	12%

- (1) Fair value is generally determined through independent appraisals, which generally include various level 3 inputs that are not identifiable.
- (2) Appraisals may be adjusted downward by the Corporation's management for qualitative factors such as economic conditions and estimated liquidation expenses. The range of liquidation expenses and other appraisal adjustments are presented as a percent of the appraisal.

Table of Contents

Disclosures about Fair Value of Financial Instruments

The following methods and assumptions were used to estimate the fair value of the Corporation's financial instruments as of September 30, 2013 and December 31, 2012:

Cash and cash equivalents

The carrying amount is a reasonable estimate of fair value.

Securities available for sale

The fair value of securities available for sale is determined in accordance with the methods described under FASB ASC Topic 820 as described above.

Restricted investment in bank stocks

The carrying amount of restricted investment in bank stocks is a reasonable estimate of fair value. The Corporation is required to maintain minimum investment balances in these stocks, which are not actively traded and therefore have no readily determinable market value.

Loans held for sale

The fair value of loans held for sale is determined, when possible, using quoted secondary-market prices. If no such quoted prices exist, the fair value of a loan is determined using quoted prices for a similar loan or loans, adjusted for the specific attributes of that loan.

Loans, net

The fair value of loans, excluding all impaired loans, is estimated using discounted cash flow analyses using the current interest rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities. Loans were first segregated by type such as commercial, real estate, and consumer, and were then further segmented into fixed and variable rate. Projected future cash flows are calculated based upon contractual maturity or call dates. Generally, variable rate loans that reprice frequently have no significant change in credit risk; fair value is based on carrying value.

Interest receivable

The carrying value of interest receivable is a reasonable estimate of fair value.

Deposits

The fair value of demand deposits, savings accounts and money market deposits is the amount payable on demand at the reporting date. The fair values of time deposits are estimated using a discounted cash flow analyses. The discount rates used are based on rates currently offered for deposits with similar remaining maturities. The fair values of variable rate time deposits that reprice frequently are based on carrying value. The fair values of time deposit liabilities do not take into consideration the value of the Corporation's long-term relationships with depositors, which may have significant value.

Short-term borrowings

For these short-term instruments, the carrying amount is a reasonable estimate of fair value.

Long-term debt

Long-term debt includes FHLB advances (Level 2) and junior subordinated debt (Level 3). The fair value of FHLB advances are estimated using discounted cash flow analysis, based on quoted prices for new FHLB advances with similar credit risk characteristics, terms and remaining maturity. These prices are obtained from this active market and represent a market value that is deemed to represent the transfer price if the liability were assumed by a third party. The fair value of junior subordinated debt is estimated using discounted cash flow analysis, based on market rates and spread characteristics of similar debt with similar credit risk characteristics, terms and remaining maturity.

Table of Contents**Interest payable**

The carrying value of interest payable is a reasonable estimate of fair value.

Off-balance sheet instruments

Off-balance sheet instruments consist of lending commitments and letters of credit are based on fees currently charged in the market to enter into similar arrangements, taking into account the remaining terms of the agreements and counterparties' credit standing. These amounts were not considered material.

The following presents the carrying amounts and estimated fair values of the Corporation's financial instruments as of September 30, 2013 and December 31, 2012.

Table of Contents**Note 14 Assets and Liabilities Subject to Offsetting***Securities Sold Under Agreements to Repurchase (Repurchase Agreements)*

PeoplesBank enters into agreements under which it sells securities subject to an obligation to repurchase the same securities the next business day. These repurchase agreements are accounted for as a collateralized financing arrangement (i.e. secured borrowings) and not as a sale and subsequent repurchase of securities. The obligation to repurchase the securities is reflected as a liability (short-term borrowings) in the Corporation's consolidated financial statements of condition, while the securities underlying the repurchase agreements remain in the respective securities asset accounts. In other words, there is no offsetting or netting of the securities with the repurchase agreement liabilities.

<i>(dollars in thousands)</i>		Gross Amounts of Recognized Liabilities	Gross Amounts Offset in the Statements of Condition	Net Amounts of Liabilities Presented in the Statements of Condition	Gross amounts Not Offset in the Statements of Condition		Net Amount
					Financial Instruments	Cash Collateral Pledged	
September 30, 2013							
Repurchase Agreements	(1)	\$ 25,702	\$ 0	\$ 25,702	\$ (25,702)	\$ 0	\$ 0
December 31, 2012							
Repurchase Agreements	(1)	\$ 19,356	\$ 0	\$ 19,356	\$ (19,356)	\$ 0	\$ 0

- (1) As of September 30, 2013 and December 31, 2012, the fair value of securities pledged in connection with repurchase agreements was \$27,708,000 and \$25,876,000, respectively.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Management's discussion and analysis of the significant changes in the results of operations, capital resources and liquidity presented in the accompanying consolidated financial statements for Codorus Valley Bancorp, Inc. (Codorus Valley or the Corporation), a bank holding company, and its wholly owned subsidiary, PeoplesBank, A Codorus Valley Company (PeoplesBank), are provided below. Codorus Valley's consolidated financial condition and results of operations consist almost entirely of PeoplesBank's financial condition and results of operations. Current performance does not guarantee, and may not be indicative of, similar performance in the future.

Forward-looking statements

Management of the Corporation has made forward-looking statements in this Form 10-Q. These forward-looking statements are subject to risks and uncertainties. Forward-looking statements include information concerning possible or assumed future results of operations of the Corporation and its subsidiaries. When words such as believes, expects, anticipates or similar expressions occur in the Form 10-Q, management is making forward-looking statements.

Note that many factors, some of which are discussed elsewhere in this report and in the documents that are incorporated by reference, could affect the future financial results of the Corporation and its subsidiaries, both individually and collectively, and could cause those results to differ materially from those expressed in the forward-looking statements contained or incorporated by reference in this Form 10-Q. These factors include, but are not limited to, the following:

- operating, legal and regulatory risks;
- enacted financial reform legislation, e.g., Dodd-Frank Wall Street Reform and Consumer Protection Act, which may have a significant impact on the Corporation's business and results of operations;
- a prolonged economic downturn;
- an increase in nonperforming assets requiring loss provisions and the incurrence of carrying costs related to nonperforming assets;
- declines in the market value of investment securities considered to be other-than-temporary;
- the effects of and changes in the rate of FDIC premiums, including special assessments;
- interest rate fluctuations which could increase our cost of funds or decrease our yield on earning assets and therefore reduce our net interest income;
- future legislative or administrative changes to U.S. governmental capital programs;
- unavailability of capital when needed or availability at less than favorable terms;
- political and competitive forces affecting banking, securities, asset management and credit services businesses;
- unauthorized disclosure of sensitive or confidential client or customer information, whether through a breach of our computer systems or otherwise, may adversely affect the Corporation's operations, net income or reputation; and
- the risk that management's analysis of these risks and forces could be incorrect and/or that the strategies developed to address them could be unsuccessful.

The Corporation undertakes no obligation to publicly revise or update these forward-looking statements to reflect events or circumstances that arise after the date of this report.

Table of Contents

Critical accounting policies

We have identified critical accounting policies for the Corporation to include allowance for loan losses, valuation of foreclosed real estate and evaluation of other-than-temporary impairment losses of securities. There were no material changes made to the critical accounting policies disclosed in the 2012 Annual Report on Form 10-K in regards to application or related judgments and estimates used. A detailed disclosure pertaining to critical accounting estimates is provided in Item 7 of the Corporation's 2012 Annual Report on Form 10-K.

**Three months ended September 30, 2013,
compared to three months ended September 30, 2012**

FINANCIAL HIGHLIGHTS

The Corporation earned net income available to common shareholders (earnings) totaling \$2,615,000 for the quarter ended September 30, 2013, compared to \$1,809,000 for the quarter ended September 30, 2012. The \$806,000 or 45 percent increase in earnings for the third quarter of 2013, compared to the third quarter of 2012, was primarily the result of an increase in net interest income and a decrease in the provision for loan losses, as described below.

The \$764,000 or 9 percent increase in net interest income for the third quarter of 2013, compared to the same quarter of 2012, was due primarily to a decrease in funding costs resulting from a larger proportion of low cost core deposits to total deposits and lower rates generally paid on all deposit products, which reflected unusually low market interest rates. An increase in the average volume of earning assets contributed to the increase in net interest income as well. The average balance of interest earning assets, principally commercial loans, increased approximately \$54 million or 5 percent for the third quarter of 2013, compared to the same quarter of 2012. While the volume of earning assets increased, its effect on interest income was partially offset by lower yields, a reflection of the low interest rate environment.

The \$500,000 or 77 percent decrease in the provision for loan losses for the third quarter of 2013, compared to the same quarter of 2012, resulted from a higher level of net charge-offs in the prior year.

The \$441,000 or 19 percent decrease in total noninterest income for the third quarter of 2013, compared to the same quarter of 2012, was primarily the result of decreases in income from mutual fund, annuity and insurance sales and gains on sales of securities.

Total noninterest expense for the third quarter of 2013 was \$7,732,000, a decrease of \$462,000 or 6 percent, compared to the same quarter of 2012 due primarily to a \$1,221,000 decrease in impairment charges associated with foreclosed real estate. The decrease in impairment charges more than offset the \$385,000 or 10 percent increase in personnel expense, which resulted from expanding the bank franchise and normal business growth. An increase in employee benefit expenses also contributed to the increase in personnel expense, including increases in medical insurance, due to a greater level of claims, and employer paid 401K Plan costs.

The provision for income taxes for the third quarter of 2013 was \$990,000, which was \$479,000 or 94 percent above the \$511,000 recorded for the third quarter of 2012 due primarily to the 54 percent increase in income before income taxes.

Edgar Filing: CODORUS VALLEY BANCORP INC - Form 10-Q

Table of Contents

The schedule below presents selected performance metrics for the third quarter of 2013 and 2012. Earnings per common share were adjusted for the 5% common stock dividend declared by the Corporation on October 8, 2013.

	Three months ended	
	September 30,	
	2013	2012
Basic earnings per common share	\$ 0.55	\$ 0.39
Diluted earnings per common share	\$ 0.54	\$ 0.38
Cash dividend payout ratio	20.7%	25.7%
Return on average assets	0.97%	0.71%
Return on average equity	10.26%	7.50%
Net interest margin (tax equivalent basis)	3.78%	3.70%
Net overhead ratio	2.12%	2.38%
Efficiency ratio	64.39%	72.48%
Average equity to average assets	9.42%	9.44%

A more detailed analysis of the factors and trends affecting corporate earnings follows.

INCOME STATEMENT ANALYSIS

Net interest income

Net interest income for the three month period ended September 30, 2013, was \$9,695,000, an increase of \$764,000 or 9 percent above the third quarter of 2012. The increase in net interest income was due primarily to a decrease in funding costs resulting from a larger proportion of low cost core deposits to total deposits and lower rates generally paid on all deposit products, which reflected unusually low market interest rates. Net interest income (tax equivalent basis) annualized as a percentage of average interest earning assets, i.e., net interest margin, was 3.78 percent for the third quarter of 2013, compared to 3.70 percent for the third quarter of 2012.

The \$211,000 or 2 percent increase in total interest income for the current quarter, compared to the third quarter of 2012, was due primarily to an increase in the average volume of earning assets. Interest earning assets averaged \$1.05 billion and yielded 4.58 percent (tax equivalent basis) for the current quarter, compared to \$998 million and 4.77 percent, respectively, for the third quarter of 2012. The average balance of interest earning assets, principally commercial loans, increased approximately \$54 million or 5 percent for the third quarter of 2013, compared to the same quarter of 2012. While the volume of earning assets increased, its effect on interest income was largely offset by lower yields, a reflection of the low interest rate environment.

The \$553,000 or 21 percent decrease in total interest expense for the current quarter, compared to the third quarter of 2012 resulted from a larger proportion of low cost core deposits to total deposits and lower rates generally paid on all deposit products, which reflected historically low market interest rates. Total interest bearing liabilities averaged \$897 million at an average rate of 0.94 percent for the current quarter, compared to \$865 million and 1.23 percent, respectively, for the third quarter of 2012. The \$32 million or 4 percent increase in the average volume of interest bearing liabilities reflected growth in core deposits, principally demand and money market deposits and, to a lesser degree, savings deposits. The growth of core deposits is a particular focus of the Corporation because the rates are relatively low, are a source of fee income and provide the opportunity to cross-sell other financial products and services. The Corporation excludes time deposits in its definition of core deposits.

Changes which are due to both volume and rate are allocated in proportion to their relationship to the amount of change attributed directly to volume or rate.

Provision for loan losses

For the three month period ended September 30, 2013, the provision for loan losses was \$150,000, which was the level needed to support loan growth and to maintain the adequacy of the allowance for loan losses. Comparatively, the provision was \$650,000 for the third quarter of 2012, which replenished the allowance for net charge-offs totaling \$553,000 in that quarter. More information about the allowance for loan losses can be found in this report under the caption Allowance for Loan Losses on page 54.

Table of Contents**Noninterest income**

The following table presents the components of total noninterest income for the third quarter of 2013, compared to the third quarter of 2012.

Table 3 - Noninterest income

<i>(dollars in thousands)</i>	Three months ended September 30,		Change	
	2013	2012	Increase (Decrease) \$	%
Trust and investment services fees	\$ 510	\$ 450	\$ 60	13%
Income from mutual fund, annuity and insurance sales	74	227	(153)	(67)
Service charges on deposit accounts	688	635	53	8
Income from bank owned life insurance	192	157	35	22
Other income	157	151	6	4
Net gain on sales of loans held for sale	233	293	(60)	(20)
Net gain on sales of securities	0	382	(382)	nm
Total noninterest income	\$ 1,854	\$ 2,295	\$ (441)	(19)%
nm not meaningful				

The discussion that follows addresses changes in selected categories of noninterest income.

Trust and investment services fees The \$60,000 or 13 percent increase in trust and investment services fees was due to appreciation in the market value of managed accounts, upon which some fees are based, growth in traditional trust business and an increase in estate fees.

Income from mutual fund, annuity and insurance sales The \$153,000 or 67 percent decrease in income from the sale of mutual fund, annuity and insurance products by Codorus Valley Financial Advisors (CVFA), a subsidiary of PeoplesBank, was a result of the resignation of three registered representatives who left CVFA in April 2013.

Service charges on deposit accounts The \$53,000 or 8 percent increase in service charge income was due primarily to an increase in debit card revenue as a result of normal business growth.

Income from bank owned life insurance (BOLI) The \$35,000 or 22 percent increase in income from BOLI was due to an additional investment totaling \$5.3 million in February 2013. More information about this transaction is provided under the year-to-date section of Noninterest Income.

Net gain on sales of loans held for sale The \$60,000 or 20 percent decrease in gains from the sale of residential mortgage loans resulted from a decrease in production, which was demand driven. Refinancing demand and gains therefrom have declined as a consequence of saturation and the higher level of market interest rates.

Net gain on sales of securities The third quarter of 2013 had no sales of investment securities. Comparatively, for the third quarter of 2012, PeoplesBank recognized \$382,000 in gains from the sale of approximately \$9 million of U.S. agency mortgage-backed securities (MBS) that were selectively sold to remove relatively low yielding instruments that were prepaying principal faster than anticipated from the MBS portfolio.

Table of Contents**Noninterest expense**

The following table presents the components of total noninterest expense for the third quarter of 2013, compared to the third quarter of 2012.

Table 4 - Noninterest expense

<i>(dollars in thousands)</i>	Three months ended September 30,		Change Increase (Decrease)	
	2013	2012	\$	%
Personnel	\$ 4,191	\$ 3,806	\$ 385	10%
Occupancy of premises, net	496	485	11	2
Furniture and equipment	538	490	48	10
Postage, stationery and supplies	131	116	15	13
Professional and legal	187	155	32	21
Marketing and advertising	341	259	82	32
FDIC insurance	154	181	(27)	(15)
Debit card processing	204	181	23	13
Charitable donations	32	26	6	23
External data processing	164	149	15	10
Foreclosed real estate including (gains) losses on sales	277	1,498	(1,221)	(82)
Impaired loan carrying costs	128	36	92	256
Other	889	812	77	9
Total noninterest expense	\$ 7,732	\$ 8,194	\$ (462)	6%

The discussion that follows addresses changes in selected categories of noninterest expense.

Personnel The \$385,000 or 10 percent increase in personnel expense was due largely to an increase in wage expense resulting from planned staff additions, which included staffing the newest banking office located in Dover, PA that opened for business in September 2013, and normal business growth. An increase in employee benefit expenses also contributed, including increases in medical insurance, due to a greater level of claims, and employer paid 401K Plan costs.

Furniture and equipment The \$48,000 or 10 percent increase in furniture and equipment was due primarily normal business growth, which included increases in depreciation expense on computer hardware and software.

Professional and legal The \$32,000 or 21 percent increase in professional and legal expense was due to an increase in legal costs primarily from normal business growth.

Marketing and advertising The \$82,000 or 32 percent increase in marketing expense was due to normal business growth and increased corporate initiatives such as branding, product advertising, internal promotions and advertising the new banking office as previously described.

FDIC insurance The \$27,000 or 15 percent decrease in FDIC insurance premiums was due to a lower assessment rate, which resulted from improved financial performance by PeoplesBank. The FDIC uses various performance and risk metrics to classify financial institutions below \$10 billion in total assets into four risk categories (1-4) with progressively higher assessments.

Table of Contents

Foreclosed real estate including (gains) losses on sales The \$1,221,000 or 82 percent decrease in foreclosed real estate costs for the current quarter reflected a decrease in provisioning for impairment losses compared to the third quarter of 2012, which included a \$1,027,000 provision associated with one property, as previously reported on Form 8-K dated August 30, 2012, and filed with the SEC.

Impaired loan carrying costs The \$92,000 or 256 percent increase in impaired loan carrying costs is an example of the variability of this line item expense, which is affected by variables such as economic and business conditions, the number and size of the loans in the impaired loan portfolio, financial capacity of the borrower or guarantor, and the value and liquidity of underlying collateral, among other factors.

Provision for income taxes

The provision for income tax for the third quarter of 2013 was \$990,000, which was \$479,000 or 94 percent above the \$511,000 recorded for the third quarter of 2012 due primarily to the 54 percent increase in income before income taxes. For both periods, the Corporation's statutory federal income tax rate was 34 percent. The Corporation's effective income tax rate was 27 percent for the third quarter of 2013, compared to 22 percent for the third quarter of 2012. The effective tax rate differs from the statutory tax rate due to the impact of low-income housing credits and tax-exempt income, including income from bank owned life insurance.

Preferred stock dividends

Preferred stock dividends for the third quarter of 2013 and 2012 totaled \$62,000, which equated to an annualized dividend rate of 1 percent. The Corporation is currently paying the lowest permissible dividend rate under the U.S. Treasury's Small Business Lending Fund Program (SBLF Program) as a result of adding loans that qualify for the SBLF Program in excess of a pre-determined loan portfolio baseline balance. Information about the SBLF Program is provided in this report at Note 10-Shareholders' Equity.

**Nine months ended September 30, 2013,
compared to nine months ended September 30, 2012**

FINANCIAL HIGHLIGHTS

The Corporation earned net income available to common shareholders (earnings) totaling \$7,797,000 for the first nine months of 2013, compared to \$6,619,000 for the same period of 2012. The \$1,178,000 or 18 percent increase in earnings was due primarily to an increase net interest income and, to a lesser degree, decreases in the provision for loan losses, noninterest expense and preferred stock dividends, which more than offset a decrease in noninterest income and an increase in the provision for income taxes, as described below.

The \$1,463,000 or 5 percent increase in net interest income for the first nine months of 2013, compared to the same period of 2012, was due primarily to a decrease in funding costs resulting from a larger proportion of low cost core deposits to total deposits and lower rates generally paid on all deposit products, which reflected unusually low market interest rates. The average balance of interest earning assets, principally commercial loans, increased approximately \$51 million or 5 percent for the first nine months of 2013, compared to the same period of 2012. While the volume of earning assets increased, its effect on interest income was largely offset by lower yields, a reflection of the low interest rate environment.

The \$180,000 or 16 percent decrease in the provision for loan losses for the first nine months of 2013, compared to the same period of 2012, was due primarily to improving credit quality, including a decrease in net loan charge-offs, and adequacy of the allowance for loan losses.

Edgar Filing: CODORUS VALLEY BANCORP INC - Form 10-Q

Table of Contents

The \$135,000 or 2 percent decrease in total noninterest income for the first nine months of 2013, compared to the same period of 2012, was primarily the result of a \$387,000 or 90 percent decrease in gains from the sale of investment securities. Gains from the sale of U.S. agency mortgage-back securities were greater in the prior period as selected instruments that no longer met the Corporation's investment standards were liquidated. A decrease in income from the sale of mutual fund, annuity and insurance products, due to staff resignations, also contributed to the decrease in noninterest income. Core noninterest income, which excludes gains or losses from the sale of securities increased \$252,000 or 4 percent, representing normal business growth. Mortgage loan refinancing, and income therefrom, is expected to decrease as demand has largely been satisfied and the cost to borrow has increased due to higher market interest rates.

The \$274,000 or 1 percent decrease in total noninterest expense for the first nine months of 2013, compared to the same period of 2012, was primarily the result of a 1,888,000 or 82 percent decrease in impairment charges associated with foreclosed real estate. The decrease in impairment charges more than offset the \$1,241,000 or 11 percent increase in personnel expense, which resulted from expanding the bank franchise and normal business growth. An increase in employee benefit expenses also contributed to the increase in personnel expense, including increases in medical insurance, due to a greater level of claims, and employer paid 401K Plan costs.

The \$738,000 or 33 percent increase in the provision for income taxes for the first nine months of 2013, compared to the same period of 2012, was primarily the result of the 19 percent increase in income before income taxes.

The \$134,000 or 42 percent decrease in preferred stock dividends was the result of a decrease in the dividend rate caused by the addition of loans that qualified for the U.S. Treasury's Small Business Lending Fund Program (SBLF Program). Dividends under the SBLF Program are expected to average 1 percent this year, compared to approximately 1.5 percent for the year 2012.

The schedule below presents selected performance metrics for the nine month periods ended September 30, 2013 and 2012. Earnings per common share were adjusted for the 5% common stock dividend declared by the Corporation on October 8, 2013.

	Nine months ended September 30,	
	2013	2012
Basic earnings per common share	\$ 1.65	\$ 1.42
Diluted earnings per common share	\$ 1.62	\$ 1.40
Cash dividend payout ratio	19.6%	18.5%
Return on average assets	0.98%	0.89%
Return on average equity	10.26%	9.50%
Net interest margin (tax equivalent basis)	3.81%	3.81%
Net overhead ratio	2.01%	2.17%
Efficiency ratio	62.57%	66.57%
Average equity to average assets	9.60%	9.41%

A more detailed analysis of the factors and trends affecting corporate earnings follows.

Table of Contents

INCOME STATEMENT ANALYSIS

Net interest income

Net interest income for the nine month period ended September 30, 2013, was \$28,148,000, an increase of \$1,463,000 or 5 percent above the nine month period ended September 30, 2012. The increase in net interest income was due primarily to a decrease in funding costs resulting from a larger proportion of low cost core deposits to total deposits and lower rates generally paid on all deposit products, which reflected unusually low market interest rates. Net interest income (tax equivalent basis) annualized as a percentage of average interest earning assets, i.e., net interest margin, was 3.81 percent on an annualized basis for both nine month periods.

The \$40,000 or 0.1 percent decrease in total interest income for the current nine month period, compared to the first nine months of 2012, was due primarily to a decrease in yields on earning assets, which was reflective of the long duration of historically low market interest rates. Interest earning assets averaged \$1.02 billion and yielded 4.66 percent (tax equivalent basis) for the current period, compared to \$973 million and 4.91 percent (tax equivalent basis), respectively, for the first nine months of 2012. The average balance of interest earning assets, principally commercial loans, increased approximately \$51 million or 5 percent for the first nine months of 2013, compared to the same period for 2012. While the average volume of earning assets increased, its effect on interest income was offset by lower yields, a reflection of the low interest rate environment. The \$555,000 or 12 percent decrease in interest income from investment securities was attributable to lower reinvestment yields and a decrease in the average volume invested.

The \$1,503,000 or 19 percent decrease in total interest expense for the current nine month period, compared to the first nine months of 2012 resulted from a larger proportion of low cost core deposits to total deposits and lower rates generally paid on time deposits, which reflected historically low market interest rates. Total interest bearing liabilities averaged \$878 million at an average rate of 0.99 percent for the current period, compared to \$850 million and 1.26 percent, respectively, for the first nine months of 2012. The \$27 million or 3 percent increase in the average volume of interest bearing liabilities reflected growth in core deposits, principally money market and demand deposits. The growth of core deposits is a particular focus of the Corporation because the interest rates are relatively low, are a source of fee income and provide the opportunity to cross-sell other financial products and services. The Corporation excludes time deposits in its definition of core deposits. The average volume of time deposits decreased approximately \$20 million or 5 percent during the current nine month period, compared to the same period of 2012, due most likely to depositor preference for liquidity given the small interest rate spread between core and time deposits.

Changes which are due to both volume and rate are allocated in proportion to their relationship to the amount of change attributed directly to volume or rate.

Provision for loan losses

For the nine month period ended September 30, 2013, the provision for loan losses was \$970,000, which was the level needed to support a larger loan portfolio, replenish approximately \$823,000 in net charge-offs and to maintain the adequacy of the allowance for loan losses. Comparatively, the provision was \$1,150,000 for the first nine months of 2012, which largely replenished the allowance for \$1,065,000 in net charge-offs during that period. More information about the allowance for loan losses can be found in this report under the caption Allowance for Loan Losses on page 54.

Table of Contents**Noninterest income**

The following table presents the components of total noninterest income for the nine month periods ended September 30, 2013 and 2012.

Table 7 - Noninterest income

<i>(dollars in thousands)</i>	Nine months ended September 30,		Change Increase (Decrease)	
	2013	2012	\$	%
Trust and investment services fees	\$ 1,447	\$ 1,263	\$ 184	15%
Income from mutual fund, annuity and insurance sales	496	658	(162)	(25)
Service charges on deposit accounts	1,992	1,879	113	6
Income from bank owned life insurance	543	487	56	11
Other income	503	483	20	4
Net gain on sales of loans held for sale	874	833	41	5
Net gain on sales of securities	44	431	(387)	(90)
Total noninterest income	\$ 5,899	\$ 6,034	\$ (135)	(2)%

The discussion that follows addresses changes in selected categories of noninterest income.

Trust and investment services fees The \$184,000 or 15 percent increase in trust and investment services fees was due in part to a \$66,000 increase in the periodic recognition of estate fees, appreciation in the market value of managed accounts, upon which some fees are based, and growth in traditional trust business.

Income from mutual fund, annuity and insurance sales The \$162,000 or 25 percent decrease in income from the sale of mutual fund, annuity and insurance products by Codorus Valley Financial Advisors (CVFA), a subsidiary of PeoplesBank, was a result of the resignation of three registered representatives who left CVFA in April 2013.

Service charges on deposit accounts The \$113,000 or 6 percent increase in service charge income was due primarily to an increase in debit card revenue as a result of normal business growth.

Income from bank owned life insurance (BOLI) The \$56,000 or 11 percent increase in income from BOLI was due to an additional investment totaling \$5.3 million in February 2013. Of this total \$4.7 million was invested with Massachusetts Mutual Life Insurance Company and \$0.6 million was invested with Midland National Life Insurance Company. The initial tax-exempt yield on this investment was approximately 3.77 percent or 5.71 percent on a tax equivalent basis.

Net gain on sales of loans held for sale The \$41,000 or 5 percent increase in gains from the sale of residential mortgage loans resulted from an increase in loan origination volumes due to increased refinancing activity, which occurred in the earlier part of 2013. Since that time, refinancing demand and gains therefrom have trended downward as a consequence of saturation and the higher level of market interest rates.

Net gain on sales of securities The \$387,000 or 90 percent decrease in gains from the sale of investment securities reflected a higher level of sales in the prior year. During the year 2012, PeoplesBank selectively sold U.S. agency mortgage-backed securities (MBS) to remove relatively low yielding instruments that were prepaying principal faster than anticipated from the MBS portfolio.

Table of Contents**Noninterest expense**

The following table presents the components of total noninterest expense for the nine month periods ended September 30, 2013 and 2012.

Table 8 - Noninterest expense

<i>(dollars in thousands)</i>	Nine months ended September 30,		Change Increase (Decrease)	
	2013	2012	\$	%
Personnel	\$ 12,486	\$ 11,245	\$ 1,241	11%
Occupancy of premises, net	1,519	1,497	22	1
Furniture and equipment	1,543	1,414	129	9
Postage, stationery and supplies	438	384	54	14
Professional and legal	489	464	25	5
Marketing and advertising	741	666	75	11
FDIC insurance	463	589	(126)	(21)
Debit card processing	577	536	41	8
Charitable donations	518	507	11	2
External data processing	468	419	49	12
Foreclosed real estate including (gains) losses on sales	414	2,302	(1,888)	(82)
Impaired loan carrying costs	243	266	(23)	(9)
Other	2,243	2,127	116	5
Total noninterest expense	\$ 22,142	\$ 22,416	\$ (274)	(1)%

The discussion that follows addresses changes in selected categories of noninterest expense.

Personnel The \$1,241,000 or 11 percent increase in personnel expense was due largely to an increase in wage expense resulting from planned staff additions, which included staffing the newest banking office located in Dover, PA that opened for business in September 2013, and normal business growth. An increase in employee benefit expenses also contributed to personnel expense, including increases in medical insurance, due to a greater level of claims, and employer paid 401K Plan costs. Effective January 1, 2013, PeoplesBank increased 401K Plan matching contributions to 100 percent up to the first 4 percent of an employee's compensation contributed to the Plan, compared to a 50 percent match up to the first 6 percent contributed, for 2012.

Furniture and equipment The \$129,000 or 9 percent increase in furniture and equipment was due primarily normal business growth, which included increases in software license fees, maintenance and depreciation expense on computer hardware and software and small equipment purchases.

FDIC insurance The \$126,000 or 21 percent decrease in FDIC insurance premiums was due to a lower assessment rate, which resulted from improved financial performance by PeoplesBank. The FDIC uses various performance and risk metrics to classify financial institutions below \$10 billion in total assets into four risk categories (1-4) with progressively higher assessments.

Foreclosed real estate including (gains) losses on sales The \$1,888,000 or 82 percent decrease in foreclosed real estate costs for the current period reflected a decrease in provisioning for impairment losses compared to the first nine months of 2012, which included a \$1,027,000 provision associated with one property, as previously reported on Form 8-K dated August 30, 2012, and filed with the SEC.

Table of Contents

Other Other expense, comprised of many underlying expenses, increased \$116,000 or 5 percent due primarily to increases in Pennsylvania shares tax, third-party data processing expense and ATM and Visa network costs, which was reflective of normal business growth.

Provision for income taxes

The provision for income tax for the first nine months of 2013 was \$2,951,000, compared to \$2,213,000 for the first nine months of 2012. The \$738,000 increase in the provision for income taxes was primarily the result of the increase in taxable income as evidenced by the 19 percent increase in income before income taxes. For both periods, the Corporation's statutory federal income tax rate was 34 percent. The Corporation's effective income tax rate was 27 percent for the first nine months of 2013, compared to 24 percent for the first nine months of 2012. The effective tax rate differs from the statutory tax rate due to the impact of low-income housing credits and tax-exempt income, including income from bank owned life insurance.

Preferred stock dividends

Preferred stock dividends for the first nine months of 2013 were \$187,000, compared to \$321,000 for the same period of 2012. The \$134,000 or 42 percent decrease was the result of a decrease in the dividend rate caused by the addition of loans that qualified for the U.S. Treasury's Small Business Lending Fund Program (SBLF Program). The annualized dividend rate in effect for the nine month period ended September 30, 2013 was 1 percent, compared to approximately 1.71 percent for the same period in 2012. Information about the SBLF Program is provided in this report at Note 10-Shareholders' Equity.

BALANCE SHEET REVIEW

Securities available-for-sale

At September 30, 2013, the fair value of securities available-for-sale totaled \$239 million, which represented a 2 percent increase compared to the \$234 million value at year-end 2012. During the current period, a portion of investable funds were invested primarily in U.S. agency mortgage-backed securities to take advantage of improved yield opportunities and to provide cash flow, which could be re-priced at higher yields should market interest rates trend upward in the future. The composition of the Corporation's investment securities portfolio is provided in Note 3-Securities.

On January 1, 2013, provision 939(a) of the Dodd-Frank Act became effective changing the definition of investment grade by removing reliance on credit ratings by national statistical rating organizations. Investment grade under the revised definition requires an active review (i.e., pre-purchase and post-purchase credit risk analysis) of the obligor to determine that the obligor has an adequate capacity to meet its financial commitments and more specifically that the risk of default is low and that full and timely repayment of principal and interest is expected. Obligations of the U.S. government and U.S. government sponsored enterprises are not subject to the due diligence requirement; however, municipal and corporate obligations are subject to the new requirement.

Loans

On September 30, 2013, total loans, net of deferred fees, totaled \$814 million, which was \$77 million or 10 percent higher than the year-end 2012 level. The increase in volume was due primarily to an increase in commercial related loans, particularly within the commercial real estate investor, agricultural and other (e.g. professional services, recreational) sectors. An increase in home equity loans also contributed to the overall increase in loans. The composition of the Corporation's loan portfolio at September 30, 2013, compared to December 31, 2012, is provided in Note 5 Loans.

Table of Contents

Other assets

On September 30, 2013, other assets totaled \$37 million, which was \$6 million or 19 percent higher than the year-end 2012 level as a result of an investment in bank owned life insurance (BOLI). As a revenue raising strategy, PeoplesBank purchased \$5.3 million of BOLI in February 2013. Of this total, \$4.7 million was invested with Massachusetts Mutual Life Insurance Company and \$0.6 million was invested with Midland National Life Insurance Company. The selection of these insurers was based on their high credit rating and reputation, competitive tax-exempt yield and to accomplish diversification among insurers for the BOLI portfolio. The level of BOLI investment, including the \$5.3 million addition, is estimated at 19 percent of PeoplesBank's Tier 1 capital at September 30, 2013, which is well within PeoplesBank's investment limitation of 25 percent of Tier 1 capital.

Deposits

On September 30, 2013, deposits totaled \$922 million, which represented a \$21 million or 2 percent increase compared to the level at year-end 2012. The increase in total deposits occurred primarily within the demand (both interest and non-interest bearing), money market and savings categories, while higher rate time deposits (i.e., CDs) decreased slightly. The composition of the Corporation's deposit portfolio at September 30, 2013, is provided in Note 7 Deposits.

Long-term debt

On September 30, 2013, long-term debt totaled approximately \$51 million, which was \$20 million or 64 percent above the year-end 2012 level. The increase was the result of two \$10 million advances from the Federal Home Loan Bank of Pittsburgh that provides liquidity and acts as a hedge against rising market interest rates. Both advances are 3-year bullet maturities that have low fixed interest rates. A listing of outstanding long-term debt obligations is provided in Note 8 Short Term Borrowing and Long-term Debt.

Shareholders' equity and capital adequacy

Shareholders' equity, or capital, enables Codorus Valley to maintain asset growth and absorb losses. Total shareholders' equity was approximately \$106 million on September 30, 2013, an increase of approximately \$4 million or 4 percent, compared to the level at December 31, 2012. The increase was primarily the result of an increase in retained earnings from profitable operations, which more than offset the decrease in accumulated other comprehensive income (AOCI). The decrease in AOCI reflected a decline in unrealized gains from the investment securities portfolio caused by an increase in market interest rates.

Dividends on preferred stock

As previously disclosed, the Corporation participates in the U.S. Department of the Treasury's Small Business Lending Fund Program (SBLF Program). Information about the SBLF Program can be found in this report at Note 10 Shareholders' Equity. For the quarter ended September 30, 2013, accrued dividends equated to an annualized dividend rate of 1 percent on the \$25 million of preferred stock outstanding. Comparatively, for the quarters ended December 31 and September 30 of 2012, the annualized dividend rates were also 1 percent.

Dividends on common stock

The Corporation typically pays cash dividends on its common stock on a quarterly basis. The Board of Directors determines the dividend rate after considering the Corporation's capital requirements, current and projected net income, and other factors. On October 8, 2013, the Board of Directors declared a quarterly cash dividend of \$0.12 per common share payable on November 12, 2013, to shareholders of record at the close of business on October 22, 2013. This dividend follows a \$0.12 per common share cash dividend paid in August and a \$0.11 per common share cash dividend paid in May and February. Including the dividend that was just declared, cash dividends for 2013 will total \$0.46 per share, representing an increase of \$0.06 or 15 percent above the 2012 level. As adjusted for the 5 percent common stock dividend that was recently declared (described below), cash dividends per share will total \$0.44 for 2013, compared to \$0.38 for 2012.

Edgar Filing: CODORUS VALLEY BANCORP INC - Form 10-Q

Table of Contents

Periodically, the Corporation distributes stock dividends on its common stock. On October 8, 2013, the Corporation declared a 5 percent common stock dividend payable on December 10, 2013, to shareholders of record at the close of business on October 22, 2013.

Capital adequacy

Codorus Valley and PeoplesBank are subject to various regulatory capital requirements administered by banking regulators that involve quantitative guidelines and qualitative judgments. Quantitative measures established by regulators pertain to minimum capital ratios, as set forth in Note 9 Regulatory Matters, to the financial statements. We believe that Codorus Valley and PeoplesBank were well capitalized on September 30, 2013, based on regulatory capital guidelines.

On July 2, 2013, the Board of Governors of the Federal Reserve System finalized its rule implementing the Basel III regulatory capital framework, which the FDIC adopted on July 9, 2013. Under the rule, minimum requirements will increase both the quantity and quality of capital held by banking organizations. Consistent with the international Basel framework, the rule includes a new minimum ratio of common equity tier 1 capital to risk-weighted assets of 4.5 percent and a common equity tier 1 conservation buffer of 2.5 percent of risk-weighted assets that will apply to all supervised financial institutions. The rule also raises the minimum ratio of tier 1 capital to risk-weighted assets from 4 percent to 6 percent and includes a minimum leverage ratio of 4 percent for all banking organizations. The new rule increases the risk weights for past-due loans, certain commercial real estate loans and some equity exposures, and makes selected other changes in risk weights and credit conversion factors. The rule for smaller, less complex institutions, which includes the Corporation, takes effect January 1, 2015.

The new rule provides that, in order to avoid limitations on capital distributions, including dividend payments and certain discretionary bonus payments to executive officers, a banking organization must hold the 2.5 percent capital conservation buffer, which is to be phased in over a four year period beginning January 1, 2016, with the full 2.5 percent required as of January 1, 2019. The transition schedule for new ratios, including the capital conservation buffer, is as follows:

	2015	2016	As of January 1: 2017	2018	2019
Minimum common equity tier 1 capital ratio	4.5%	4.5%	4.5%	4.5%	4.5%
Common equity tier 1 capital conservation buffer	N/A	0.625%	1.25%	1.875%	2.5%
Minimum common equity tier 1 capital ratio plus capital conservation buffer	4.5%	5.125%	5.75%	6.375%	7.0%
Phase-in of most deductions from common equity tier 1 capital	40%	60%	80%	100%	100%
Minimum tier 1 capital ratio	6.0%	6.0%	6.0%	6.0%	6.0%
Minimum tier 1 capital ratio plus capital conservation buffer	N/A	6.625%	7.25%	7.875%	8.5%
Minimum total capital ratio	8.0%	8.0%	8.0%	8.0%	8.0%
Minimum total capital ratio plus capital conservation buffer	N/A	8.625%	9.25%	9.875%	10.5%

- 50 -

Table of Contents

As fully phased in, a banking organization with a buffer greater than 2.5% would not be subject to limits on dividend payments or discretionary bonus payments; however, a banking organization with a buffer less than 2.5% would be subject to increasingly stringent limitations as the buffer approaches zero. The new rule also prohibits a banking organization from making dividend payments or discretionary bonus payments if its eligible retained income is negative in that quarter and its capital conservation buffer ratio was less than 2.5% as of the beginning of that quarter. Eligible net income is defined as net income for the 4 calendar quarters preceding the current calendar quarter, net of any distributions and associated tax effects not already reflected in net income. A summary of payout restrictions based on the capital conservation buffer is as follows:

Capital Conservation Buffer (as a % of risk-weighted assets)	Maximum Payout (as a % of eligible retained income)
Greater than 2.5%	No payout limitation applies
≤2.5% and >1.875%	60%
≤1.875% and >1.25%	40%
≤1.25% and >0.625%	20%
≤0.625%	0%

The Corporation plans to manage its capital to ensure compliance with the Basel III capital rules.

RISK MANAGEMENT**Credit risk management**

The Credit Risk Management section included in the Corporation's Form 10-K for year-end 2012 provides a general overview of the Corporation's credit risk management process and loan concentrations. Credit risk represents the possibility that a loan client, counterparty or issuer may not perform in accordance with contractual terms, posing one of the most significant risks to the Corporation.

Nonperforming assets

The following table presents asset categories posing the greatest risk of loss and related ratios. We generally place a loan on nonaccrual status and cease accruing interest income, i.e., recognize interest income on a cash basis, as long as the loan is sufficiently collateralized, when loan payment performance is unsatisfactory and the loan is past due 90 days or more. Loans past due 90 days or more and still accruing interest represent loans that are contractually past due, but are well collateralized and in the process of collection. Foreclosed real estate represents real estate acquired to satisfy debts owed to PeoplesBank. The final category, troubled debt restructurings, pertains to loans whose terms have been modified to include a concession that we would not ordinarily consider due to the debtor's financial difficulties. Concessions granted under a troubled debt restructuring typically involve a reduction of interest rate lower than the current market rate for new debt with similar risk, the deferral of payments or extension of the stated maturity date. Troubled debt restructurings are evaluated for impairment if they have been restructured during the most recent calendar year, or if they cease to perform in accordance with the modified terms. The paragraphs below explain significant changes in the aforementioned categories as of September 30, 2013, compared to December 31, 2012. Nonperforming assets are under the purview of in-house counsel who continuously monitors and manages the collection of these accounts. Additionally, an internal asset quality control committee meets monthly to review nonperforming assets. We generally rely on appraisals performed by independent licensed appraisers to determine the value of collateral for impaired collateral-dependent loans. Generally, an appraisal is performed when: an account reaches 60 days past due, unless a certified appraisal was completed within the past six months; market values have changed significantly; the condition of the property has changed significantly; or the existing appraisal is outdated. In instances where the value of the collateral net of costs to sell is less than the net carrying amount for impaired commercial related loans, a specific loss allowance is established for the difference by recording a loss provision to the income statement. When it is probable that some portion or an entire loan balance will not be collected, that amount is charged off as loss against the allowance.

Table of Contents**Table 9-Nonperforming Assets**

<i>(dollars in thousands)</i>	September 30, 2013	December 31, 2012
Nonaccrual loans	\$ 7,364	\$ 6,232
Nonaccrual loans, troubled debt restructurings	2,418	2,110
Accruing loans 90 days or more past due	0	186
Total nonperforming loans	9,782	8,528
Foreclosed real estate, net of allowance	3,867	3,633
Total nonperforming assets	\$ 13,649	\$ 12,161
Accruing troubled debt restructurings	\$ 3,553	\$ 3,550
Total period-end loans, net of deferred fees	\$ 813,661	\$ 737,134
Allowance for loan losses (ALL)	\$ 9,449	\$ 9,302
ALL as a% of total period-end loans	1.16%	1.26%
Annualized net charge-offs as a% of average total loans	0.14%	0.16%
ALL as a% of nonperforming loans	96.61%	109.08%
Nonperforming loans as a% of total period-end loans	1.20%	1.16%
Nonperforming assets as a% of total period-end loans and net foreclosed real estate	1.67%	1.64%
Nonperforming assets as a% of total period-end assets	1.22%	1.15%
Nonperforming assets as a% of total period-end shareholders equity	12.91%	12.00%

The current level of nonperforming assets has increased by approximately \$1.5 million or 12 percent when compared to year-end 2012, primarily as a result of the addition of two unrelated commercial loans to nonaccrual status. Generally, we remain concerned about prolonged weak economic conditions and the corresponding effects it has on our commercial borrowers.

Nonaccrual loans

We evaluate the adequacy of the allowance for loan losses at least quarterly and have established a loss allowance for selected loan relationships where the net realizable value of the collateral is insufficient to repay the loan. In this regard, allowances, if applicable, are noted below within the description of the loan. Collection efforts, including modification of contractual terms for individual accounts based on prevailing market conditions and liquidation of collateral assets, are being employed to maximize recovery. Further provisions for loan losses may be required for nonaccrual loans as additional information becomes available or conditions change. There is also the potential for adjustment to the allowance as a result of regulatory examinations. A loan is returned to interest accruing status when we determine that circumstances have improved to the extent that all of the principal and interest amounts contractually due are current for at least six consecutive payments and future payments are reasonably assured.

On September 30, 2013, the nonperforming loan portfolio balance totaled \$9,782,000 and was comprised primarily of collateralized commercial loans. Comparatively, nonperforming loans totaled \$8,528,000 at year-end 2012. During the quarter ended March 31, 2013, two unrelated commercial loans experiencing deteriorating financial condition were reclassified to nonaccrual status described as loan no. 2 and loan no. 4, below. On September 30, 2013, the nonaccrual loan portfolio was comprised of twenty-seven unrelated loan relationships with outstanding principal balances ranging in size from \$1,000 to \$2,061,000. Six unrelated commercial relationships, which represent 77 percent of the nonperforming loan portfolio balance, are described below.

Table of Contents

Loan no. 1 At September 30, 2013, the outstanding principal balance of the loan relationship was \$2,061,000, collateralized by commercial rental properties whose rents are assigned to PeoplesBank. Based on a recent appraisal of the primary real estate collateralizing the relationship, we believe that the loans are adequately collateralized. The borrower is presently operating under a troubled debt restructuring agreement.

Loan no. 2 At September 30, 2013, the outstanding principal balance of the loan relationship was \$1,999,000, collateralized by a portfolio of investment properties. A \$500,000 allowance for loan losses has been established for this relationship. Of the total allowance, \$100,000 was established in the third quarter of 2013 and the remaining \$400,000 established in the year 2012. The Bank is presently pursuing its legal remedies to recover the amount due and the borrower is attempting to liquidate selected properties.

Loan no. 3 At September 30, 2013, the outstanding principal balance of the loan relationship was \$1,349,000, collateralized by two commercial properties. Based on an independent appraisal of the real estate collateralizing the relationship, we believe that the loans are adequately collateralized. The Bank is presently pursuing its legal remedies to recover the amount due.

Loan no. 4 At September 30, 2013, the outstanding principal balance of the loan relationship was \$1,195,000, collateralized by both residential and commercial properties. We believe that the loan is adequately collateralized and are pursuing legal remedies to recover the amount due. During the third quarter of 2013, a commercial property was sold and the Bank was paid approximately \$322,000, which was applied to the principal balance.

Loan no. 5 At September 30, 2013, the outstanding principal balance of the loan relationship was \$729,000, which represents three commercial loans with a U.S. Department of Agriculture guarantee of 70 percent to 80 percent, depending upon the specific loan. A \$120,000 allowance for loan losses was established in a prior period for this relationship. Two parcels of improved real estate, presently listed for sale, provide collateral for the loans. During the third quarter of 2013, the Bank acquired a third parcel of real estate with a net realizable value of \$551,000 in partial satisfaction of one of the loans, which is presently listed for sale.

Loan no. 6 PeoplesBank owns a 62.5 percent participation interest in this loan relationship. The carrying value of the Bank's principal at September 30, 2013, was \$200,000, which reflects a \$210,000 charge-off recognized in the second quarter of 2013 and payments totaling approximately \$446,000 from the guarantors since year-end 2012. The Bank anticipates collection in full of the outstanding balance based on a recent agreement with the guarantors. The borrower is presently operating under a troubled debt restructuring agreement.

Foreclosed real estate

On September 30, 2013, foreclosed real estate, net of allowance, totaled \$3,867,000, compared to \$3,633,000 at December 31, 2012. On September 30, 2013, the portfolio was comprised of five unrelated accounts ranging in size from \$259,000 to \$1,314,000 (net of allowance and charge-offs), which, with the exception of property no. 1, we are actively attempting to liquidate. If a valuation allowance for probable loss has been established for a particular property it is so noted in the property description below. Further valuation allowances may be required on any foreclosed property as additional information becomes available or conditions change. Foreclosed real estate is included in the other assets category on the Corporation's balance sheet. Three unrelated foreclosed real estate properties, which represent the majority of the foreclosed real estate portfolio balance, are described below.

Table of Contents

Property no. 1 The carrying amount of this property at September 30, 2013 was \$1,314,000, which is net of a \$1,984,000 allowance for probable loss based on an independent appraisal less estimated selling costs. This account is collateralized by 266 acres of unimproved land that is zoned for residential development. Based on information obtained in 2012, plans to obtain a formal development plan were suspended with the intent to temporarily retain the property and investigate other development, disposition or income generating options at some future date.

Property no. 2 The carrying amount of this property at September 30, 2013 was \$1,088,000, which is net of a \$1,627,000 allowance for probable loss. This account is primarily collateralized by 134 approved residential building lots. Of this total, 28 lots are improved. Management is evaluating its disposition options with regard to this property.

Property no. 3 The carrying amount of this property at September 30, 2013 was \$780,000, which represents the value of the borrower's personal residence presently listed for sale less estimated selling costs.

Allowance for loan losses

Although the Corporation maintains sound credit policies, certain loans deteriorate and must be charged off as losses. The allowance for loan losses is maintained to absorb losses inherent in the portfolio. The allowance is increased by provisions charged to expense and is reduced by loan charge-offs, net of recoveries. The allowance is based upon management's continuous evaluation of the loan portfolio coupled with a formal review of adequacy on a quarterly basis, which is subject to review and approval by the Board.

The allowance for loan losses consists primarily of three components: specific allowances for individually impaired commercial loans; allowances calculated for pools of loans; and an unallocated component, which reflects the margin of imprecision inherent in the assumptions that underlie the evaluation of the adequacy of the allowance. The Corporation uses an internal risk rating system to evaluate individual loans. Loans are segmented into industry groups or pools with similar characteristics, and an allowance for loan losses is allocated to each segment based on quantitative factors such as recent loss history (two-year rolling average of net charge-offs) and qualitative factors, such as the results of internal and external credit reviews, changes in the size and composition of the loan portfolio, adequacy of collateral, general economic conditions and the local business outlook. Determining the level of the allowance for probable loan losses at any given period is difficult, particularly during deteriorating or uncertain economic periods. We must make estimates using assumptions and information which are often subjective and fluid. There is also the potential for adjustment to the allowance as a result of regulatory examinations.

While the level of the allowance at September 30, 2013, was consistent with the previous two quarters, the unallocated component increased from approximately 10 percent to 22 percent of the total allowance during the third quarter. This occurred because two large charge-offs that were recognized in prior years rolled off of the two-year rolling average loss schedule used to compute historical loss factors, which are applied to pools of unimpaired commercial loans grouped by industry. We believe that the current level of the allowance is appropriate and that a release of reserves at this time would be premature because in our opinion the economy has not fundamentally changed as evidenced by sluggish growth, continued high unemployment, erosion of real estate values and uncertainty and unease in the business community caused by bipartisan friction in the federal government. To avoid a distortion of earnings as a consequence of a release of reserves, we believe it prudent to gradually lower the reserve, in concert with the banking community, to coincide with improvement in the economy and credit quality.

The following table presents an analysis of the activity in the allowance for loan losses for the nine months ended September 30, 2013 and 2012. The increase in the allowance generally supported the increase in the balance of the loan portfolio. The \$180,000 decrease in the provision thus far for 2013 reflected a decrease in net charge-offs compared to the first nine months of 2012. If year-to-date net charge-offs are annualized they appear relatively consistent with the level reported for the year 2012, but well below the level of net charge-offs for the years 2011 and 2010. However, prolonged weakness in economic and business conditions, a relatively high level of unemployment and erosion of real estate values, which adversely affect our borrowers' ability to service their loans, remain and can cause significant fluctuations in the level of charge-offs and provision expense from one period to another. Based on a comprehensive analysis of the loan portfolio, we believe that the allowance for loan losses was adequate at September 30, 2013.

Table of Contents**Table 10 -Analysis of Allowance for Loan Losses**

<i>(dollars in thousands)</i>	2013	2012
Balance-January 1,	\$ 9,302	\$ 8,702
Provision charged to operating expense	970	1,150
Loans charged off:		
Commercial, financial and agricultural	582	607
Real estate - construction and land development	0	2
Real estate - residential mortgages	28	115

Consumer and home equity	60	15
Total recoveries	125	70
Net charge-offs	823	1,065
Balance-September 30,	\$ 9,449	\$ 8,787
Ratios:		
Allowance for loan losses as a % of total period-end loans	1.16%	1.20%
Annualized net charge-offs as a % of average total loans	0.14%	0.20%
Allowance for loan losses as a % of nonperforming loans	96.61%	75.46%

Liquidity risk management

Maintaining adequate liquidity provides the Corporation with the ability to meet financial obligations to depositors, loan customers, employees, and shareholders on a timely and cost effective basis in the normal course of business. Additionally, it provides funds for growth and business opportunities as they arise. Liquidity is generated from transactions relating to both the Corporation's assets and liabilities. The primary sources of asset liquidity are scheduled investment security maturities and cash inflows, funds received from customer loan payments, and asset sales. The primary sources of liability liquidity are deposit growth, short-term borrowings and long-term debt. The Consolidated Statements of Cash Flows, included in this report, present the changes in cash from operating, investing and financing activities. At September 30, 2013, we believe that liquidity was adequate based upon the potential liquidation of unpledged available-for-sale securities with a fair value totaling approximately \$94 million and available credit from the Federal Home Loan Bank of Pittsburgh totaling approximately \$210 million. The Corporation's loan-to-deposit ratio was 88 percent at September 30, 2013, compared to 82 percent at year-end 2012.

Off-balance sheet arrangements

The Corporation's financial statements do not reflect various commitments that are made in the normal course of business, which may involve some liquidity risk. These commitments consist primarily of commitments to grant new loans, unfunded commitments under existing loan facilities, and letters of credit issued under the same standards as on-balance sheet instruments. Unused commitments on September 30, 2013, totaled \$281 million and consisted of \$187 million in unfunded commitments under existing loan facilities, \$67 million to grant new loans and \$27 million in letters of credit. Normally these commitments have fixed expiration dates or termination clauses and are for specific purposes. Accordingly, many of the commitments are expected to expire without being drawn upon and therefore, generally do not present significant liquidity risk to the Corporation or PeoplesBank.

Table of Contents

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Not applicable to smaller reporting companies.

Item 4. Controls and Procedures

The Corporation carried out an evaluation, under the supervision and with the participation of the Corporation's management, including the Corporation's Chief Executive Officer and Chief Financial Officer, of the effectiveness of its disclosure controls and procedures, as defined in Exchange Act Rules 13a-15(e) and 15d-15(e). Based upon the evaluation, the Corporation's Chief Executive Officer and Chief Financial Officer concluded that, as of September 30, 2013, the Corporation's disclosure controls and procedures are effective. The Corporation's disclosure controls and procedures are designed to provide reasonable, not absolute, assurance that information required to be disclosed in the Corporation's reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms. A control system, no matter how well conceived and operated, must reflect the fact that there are resource constraints, that the benefits of controls must be considered relative to their costs, and inherent limitations that may not prevent fraud, particularly by collusion of two or more people or by management override of a control.

There has been no change in the Corporation's internal control over financial reporting that occurred during the quarter ended September 30, 2013, that has materially affected or is reasonably likely to materially affect, the Corporation's internal control over financial reporting.

Part II OTHER INFORMATION

Item 1. Legal proceedings

The Corporation and PeoplesBank are involved in routine litigation incidental to their business. There are no legal proceedings pending against the Corporation or any of its subsidiaries which are expected to have a material impact upon the consolidated financial position and/or operating results of the Corporation. Management is not aware of any proceedings known or contemplated by government authorities.

Item 1A. Risk factors

This Item 1A is not applicable to smaller reporting companies.

Item 2. Unregistered sales of equity securities and use of proceeds

The Corporation relies on its subsidiary PeoplesBank, A Codorus Valley Company, for dividend distributions, which are subject to restrictions as reported in Note 9 Regulatory Matters of the Corporation's Annual Report on Form 10-K for the year ended December 31, 2012.

The Corporation has a Share Repurchase Program (Program), which was authorized in 1995, and periodically amended, to permit the purchase of up to a maximum of 4.9 percent of the outstanding shares of the Corporation's common stock at a price per share no greater than 200 percent of the latest quarterly published book value. For the nine month period ended September 30, 2013 and the year ended December 31, 2012, the Corporation had not acquired any of its common stock under the Program. The U.S. Treasury's Small Business Lending Fund (SBLF) agreement imposes limits on the ability of the Corporation to repurchase shares of common stock if it fails to declare and pay quarterly dividends on the SBLF preferred stock.
