SEMIANNUAL REPORT

March 31, 2002

To our Shareholders:

At quarter-end on March 31, 2002 the net asset value of your Fund was \$25.61 per share. Performance data for the six months and the quarter ended March 31 compared to the indices is as follows:

| | FISCAL YEAR TO DATE 9/30/01 - 3/31/02 ----- | QUARTER ENDED 3/31/02 ----- |
|------------------------------|---|-----------------------------------|
| Net Asset Value | +1.9% | -14.0% |
| Dow Jones Industrial Average | +17.6% | +3.8% |
| NASDAQ Industrials | +30.1% | +2.1% |
| Russell 2000 | +25.1% | +3.1% |

The Fund's second fiscal quarter ended March 31, 2002 was particularly disappointing following the Fund's strong performance during the prior quarter. During the quarter, the biotechnology sector retrenched due to both sector-specific and general factors. However, we continue to be confident in the future of healthcare in general and in emerging biotech and medtech growth companies in particular. We believe that the companies in this sector will continue to lead the advancement of knowledge and remain confident this progress will improve the human condition by providing products and services that will enhance the quality and duration of life. We have no doubt that Americans will appreciate the values of these products and will pay a premium price for them. As such we continue to believe that the investment opportunities in the future will be abundant. We also believe that as the economy generally improves over time, the healthcare sector will play a significant role in any advancement.

While the stock prices of public biotechnology companies have declined during the most recent quarter, we were not aggressive buyers. Rather, we selectively reduced positions and allowed liquidity, as a percent of total assets, to rise to its highest level in recent years. We believe the Fund is well positioned to take advantage of the current situation. Valuations are becoming particularly attractive for both publicly traded and private companies. We expect that in the weeks and months ahead we will have opportunities to invest much of this liquidity at very attractive levels. Many public companies have equity market values with historically low premiums to their liquid assets creating unusual values for their technology and product opportunities. In our venture capital activity, we are now frequently seeing attractive valuations and some transactions are being done at a very significant discount to previous investment rounds completed 1-2 years ago. We believe that this also bodes well for the future.

Having made these assertions, it is also true that there are a number of factors that may have a mitigating impact on the Fund's performance. Certainly, the heightened scrutiny of accounting practices at a number of individual companies, as well as other corporate governance issues, is sobering to the general market. Furthermore, there are a number of issues specific to the pharmaceutical industry that are unsettling to investors.

The Food and Drug Administration is still without a Commissioner, and seems to have recently become even more risk averse than usual. With several product approvals delayed, investors have concerns that product approval cycles are once again lengthening. This comes at a time when patent expirations are increasing with the threat of generic competition. These issues come amidst discussion of the control of drug pricing by government and increasing uncertainty about the ability of healthcare companies to sustain the ever-increasing cost of drug development.

While these concerns are most apparent to major pharmaceutical companies, and less so for the emerging companies, sentiment does affect valuations. Some of these issues are likely to persist at least through the elections in November but we continue to believe that new products that cure or mediate the course of disease will continue to be rewarded.

Two new venture investments were made in the quarter. SENOMYX discovers and develops novel flavor and fragrance molecules by combining its understanding of the biology of taste with receptor biology, combinatorial chemistry, high throughput screening and bioinformatics. AGENSYS develops fully human monoclonal antibodies to treat solid tumor cancers based on the Company's own proprietary drug targets. A follow-on investment was made in Sontra Medical in connection with its merger with ChoiceTel, a publicly traded company.

This was a difficult quarter, but we believe strongly in the future growth of healthcare and in the entrepreneurial approach of the companies in which we invest. We continue to believe that attractive investment opportunities in the future will be abundant.

H&Q HEALTHCARE INVESTORS

NOTES TO FINANCIAL STATEMENTS

March 31, 2002

(UNAUDITED)

(1) ORGANIZATION

H&Q Healthcare Investors (the Fund) is a Massachusetts business trust registered under the Investment Company Act of 1940 as a diversified closed-end management investment company. The Fund's investment objective is long-term capital appreciation through investment in securities of companies in the healthcare industries. The Fund invests primarily in securities of public and private companies that are believed to have significant potential for above-average growth. The Fund was organized on October 31, 1986 and commenced operations on April 22, 1987.

The preparation of these financial statements requires the use of certain estimates by management in determining the entity's assets, liabilities, revenues and expenses. Actual results could differ from these estimates. The following is a summary of significant accounting policies consistently followed by the Fund, which are in conformity with those generally accepted in the United States of America.

INVESTMENT SECURITIES

Investments traded on national securities exchanges or in the over-the-counter market that are National Market System securities are valued at the last sale price or, lacking any sales, at the mean between the last bid and asked prices. Other over-the-counter securities are valued at the most recent bid prices as obtained from one or more dealers that make markets in the securities. As indicated in Note 4, investments for which market quotations are not readily available are valued at fair value as determined in good faith by the Trustees of the Fund. Temporary cash investments with maturity of 60 days or less are valued at amortized cost.

Investment transactions are recorded on a trade date basis. Gains and losses from sales of investments are recorded using the "identified cost" method. Interest income is recorded on the accrual basis. Dividend income is recorded on the ex-dividend date.

The Fund adopted the provisions of the AICPA Audit and Accounting

Edgar Filing: H&Q HEALTHCARE INVESTORS - Form N-30D

Guide for Investment Companies, as revised, effective October 1, 2001 and began accreting discounts and amortizing premiums on all debt securities. Prior to this date, the Fund did not accrete discounts or amortize premiums on long-term debt securities. The cumulative effect of this accounting change had no impact on the total net assets of the Fund, but resulted in an increase in cost of securities and a corresponding decrease in net unrealized appreciation of \$154,000 based on securities held at September 30, 2001. The effect of this change for the six months ended March 31, 2002 was to decrease net investment loss by \$56,220 with a corresponding decrease in the change in net unrealized appreciation of \$56,220.

FEDERAL INCOME TAXES

It is the Fund's policy to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute to its shareholders substantially all of its taxable income and its net realized capital gains, if any. Therefore, no Federal income or excise tax provision is required.

DISTRIBUTIONS

The Fund records all distributions to shareholders from net investment income, if any, and realized gains on the ex-dividend date. Such distributions are determined in conformity with income tax regulations. Due to permanent book/tax differences in accounting for certain transactions, certain distributions may be treated as distributions from capital as opposed to distributions of net investment income or realized capital gains.

14

DISTRIBUTION POLICY

The current distribution policy is to declare distributions in stock. Stock distributions will automatically be paid in newly issued shares of the Fund unless otherwise instructed by the shareholder. Pursuant to an SEC exemptive order, the Fund has implemented a fixed distribution policy that permits the Fund to make quarterly distributions at a rate of 2% of the Fund's net assets to shareholders of record. The Fund intends to use net realized capital gains when making quarterly distributions. This could result in a return of capital to shareholders if the amount of the distribution exceeds the Fund's net investment income and realized capital gains. It is anticipated that net realized capital gains in excess of the total distributed under this policy would be included in the December distribution.

STATEMENT OF CASH FLOWS

The cash amount shown in the Statement of Cash Flows is the amount included in the Fund's Statement of Assets and Liabilities and represents cash on hand at its custodian and does not include temporary cash investments at March 31, 2002.

(2) SECURITIES TRANSACTIONS

The aggregate cost of purchases and proceeds from sales of investment securities (other than temporary cash investments) for the six months ended March 31, 2002 totaled \$19,472,411 and \$51,623,922, respectively.

At March 31, 2002, the total cost of securities for Federal income tax

Edgar Filing: H&Q HEALTHCARE INVESTORS - Form N-30D

purposes was \$237,492,781. The net unrealized gain on securities held by the Fund was \$89,617,770, including gross unrealized gain of \$126,920,790 and gross unrealized loss of \$37,303,020.

(3) INVESTMENT ADVISORY FEES AND OTHER TRANSACTIONS WITH AFFILIATES

The Fund has entered into an Investment Advisory Agreement (the Advisory Agreement) with Hambrecht & Quist Capital Management Incorporated (the Adviser). Pursuant to the terms of the Advisory Agreement, the Fund pays the Adviser a monthly fee at the rate when annualized of (i) 2.5% of the average net assets for the month of its venture capital and other restricted securities up to 25% of net assets and (ii) for the month, for all other assets, 1.0% of the average net assets up to \$250 million, 0.9% of the average net assets for the next \$250 million, 0.8% of the average net assets for the next \$500 million and 0.7% of the average net assets thereafter. The aggregate fee may not exceed a rate when annualized of 1.375%. Certain officers and Trustees of the Fund are also officers of the Adviser. The Adviser is an indirect wholly owned subsidiary of J.P. Morgan Chase & Co.

On March 22, 2002, the Trustees of the Fund approved a new investment advisory agreement with Hambrecht & Quist Capital Management LLC, subject to certain conditions, including approval by the Fund's shareholders. The terms of the new agreement are substantially identical to those in the current Advisory Agreement.

Trustees who are not affiliates of the Adviser receive an annual fee of \$15,000 plus \$1,500 for each meeting attended.

(4) VENTURE CAPITAL AND OTHER RESTRICTED SECURITIES

The Fund may invest in venture capital and other restricted securities if these securities would currently comprise 40% or less of net assets. The value of these securities represents 23% of the Fund's net assets at March 31, 2002.

The value of the venture capital and other restricted securities is determined in good faith by the Trustees. However, because of the inherent uncertainty of valuations, these estimated

values may differ significantly from the values that would have been used had a ready market for the securities existed, and the differences could be material. In fiscal 2001, the Fund sold a restricted security subject to future contingent payments whose estimated value of \$1,647,054 has also been determined by the Trustees and which is included in the Receivable for Investments Sold in the Statement of Assets and Liabilities.

The following table details the acquisition date, cost, carrying value per unit, and value of the Fund's venture capital and other restricted securities at March 31, 2002, as determined by the Trustees of the Fund.

| SECURITY | ACQUISITION DATE | COST | CARRYING VALUE PER UNIT |
