Key Accounting Methodology Differences:

- Proportionate accounting for partnerships in Canadian GAAP versus equity method of accounting in U.S. GAAP
- Reported revenues, EBITDA and EBIT in U.S. GAAP are lower than in Canadian GAAP
- Adjusted EBITDA (EBITDA plus earnings from equity investments plus proportional D&A and interest from such investments) will track very closely to EBITDA under Canadian GAAP
- Differences in accounting for pending changes in tax law (related to timing of recognition) can lead to differences at the net income line, as was the case in 2000 and 2001

Note: EBITDA and EBIT figures are before severance, relocation and other charges.

FINANCIAL IMPACT OF TRANSACTION:
