PSC	Public Service Commission
Rate CNP Environmental	Alabama Power's certificated new plant for environmental costs
Rate ECR	Alabama Power's energy cost recovery rate mechanism
Rate NDR	Alabama Power's natural disaster cost recovery rate mechanism
Rate RSE	Alabama Power's rate stabilization and equalization plan
registrants	Southern Company, Alabama Power, Georgia Power, Gulf Power, Mississippi Power, and Southern Power
SCS	Southern Company Services, Inc.

**Table of Contents**

**DEFINITIONS**

(continued)

<b>Term</b>	<b>Meaning</b>
Southern Company	The Southern Company
Southern Company system	Southern Company, the traditional operating companies, Southern Power, and other subsidiaries
SouthernLINC Wireless	Southern Communications Services, Inc.
Southern Nuclear	Southern Nuclear Operating Company, Inc.
Southern Power	Southern Power Company
traditional operating companies	Alabama Power, Georgia Power, Gulf Power, and Mississippi Power
Westinghouse	Westinghouse Electric Company LLC
wholesale revenues	revenues generated from sales for resale

**Table of Contents****CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING INFORMATION**

This Quarterly Report on Form 10-Q contains forward-looking statements. Forward-looking statements include, among other things, statements concerning the strategic goals for the wholesale business, retail sales, customer growth, economic recovery, fuel cost recovery and other rate actions, environmental regulations and expenditures, future earnings, dividend payout ratios, access to sources of capital, financing activities, start and completion of construction projects, plans and estimated costs for new generation resources, impact of the American Recovery and Reinvestment Act of 2009, impact of recent healthcare legislation, impact of the Small Business Jobs and Credit Act of 2010, estimated sales and purchases under new power sale and purchase agreements, and estimated construction and other expenditures. In some cases, forward-looking statements can be identified by terminology such as may, will, could, should, expects, plans, anticipates, believes, estimates, projects, predicts, potential, or combinations of these terms or other similar terminology. There are various factors that could cause actual results to differ materially from those suggested by the forward-looking statements; accordingly, there can be no assurance that such indicated results will be realized. These factors include:

- the impact of recent and future federal and state regulatory change, including legislative and regulatory initiatives regarding deregulation and restructuring of the electric utility industry, implementation of the Energy Policy Act of 2005, environmental laws including regulation of water quality, coal combustion byproducts, and emissions of sulfur, nitrogen, carbon, soot, particulate matter, hazardous air pollutants, including mercury, and other substances, financial reform legislation, and also changes in tax and other laws and regulations to which Southern Company and its subsidiaries are subject, as well as changes in application of existing laws and regulations;
- current and future litigation, regulatory investigations, proceedings, or inquiries, including the pending EPA civil actions against certain Southern Company subsidiaries, FERC matters, and IRS audits;
- the effects, extent, and timing of the entry of additional competition in the markets in which Southern Company's subsidiaries operate;
- variations in demand for electricity, including those relating to weather, the general economy and recovery from the recent recession, population and business growth (and declines), and the effects of energy conservation measures;
- available sources and costs of fuels;
- effects of inflation;
- ability to control costs and avoid cost overruns during the development and construction of facilities;
- investment performance of Southern Company's employee benefit plans and nuclear decommissioning trusts;
- advances in technology;
- state and federal rate regulations and the impact of pending and future rate cases and negotiations, including rate actions relating to fuel and other cost recovery mechanisms;
- regulatory approvals and actions related to the potential Plant Vogtle expansion, including Georgia PSC and NRC approvals and potential DOE loan guarantees;
- regulatory approvals and actions related to the Kemper IGCC, including Mississippi PSC approvals and potential DOE loan guarantees;
- the performance of projects undertaken by the non-utility businesses and the success of efforts to invest in and develop new opportunities;
- internal restructuring or other restructuring options that may be pursued;
- potential business strategies, including acquisitions or dispositions of assets or businesses, which cannot be assured to be completed or beneficial to Southern Company or its subsidiaries;
- the ability of counterparties of Southern Company and its subsidiaries to make payments as and when due and to perform as required;
- the ability to obtain new short- and long-term contracts with wholesale customers;
- the direct or indirect effect on Southern Company's business resulting from terrorist incidents and the threat of terrorist incidents;
- interest rate fluctuations and financial market conditions and the results of financing efforts, including Southern Company's and its subsidiaries' credit ratings;
- the ability of Southern Company and its subsidiaries to obtain additional generating capacity at competitive prices;

catastrophic events such as fires, earthquakes, explosions, floods, hurricanes, droughts, pandemic health events such as influenzas, or other similar occurrences;  
the direct or indirect effects on Southern Company's business resulting from incidents affecting the U.S. electric grid or operation of generating resources;  
the effect of accounting pronouncements issued periodically by standard setting bodies; and  
other factors discussed elsewhere herein and in other reports (including the Form 10-K) filed by the registrants from time to time with the SEC.

**Each registrant expressly disclaims any obligation to update any forward-looking statements.**

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF**  
**FINANCIAL CONDITION AND RESULTS OF OPERATIONS**  
**THIRD QUARTER 2010 vs. THIRD QUARTER 2009**  
**AND**  
**YEAR-TO-DATE 2010 vs. YEAR-TO-DATE 2009**

**OVERVIEW**

Discussion of the results of operations is focused on Southern Company's primary business of electricity sales in the Southeast by the traditional operating companies—Alabama Power, Georgia Power, Gulf Power, and Mississippi Power—and Southern Power. The traditional operating companies are vertically integrated utilities providing electric service in four Southeastern states. Southern Power constructs, acquires, owns, and manages generation assets and sells electricity at market-based rates in the wholesale market. Southern Company's other business activities include investments in leveraged lease projects, telecommunications, and renewable energy projects. For additional information on these businesses, see BUSINESS—The Southern Company System—Traditional Operating Companies, Southern Power, and Other Businesses in Item 1 of the Form 10-K.

Southern Company continues to focus on several key performance indicators. These indicators include customer satisfaction, plant availability, system reliability, and earnings per share. For additional information on these indicators, see MANAGEMENT'S DISCUSSION AND ANALYSIS—OVERVIEW—Key Performance Indicators of Southern Company in Item 7 of the Form 10-K.

**RESULTS OF OPERATIONS****Net Income**

Third Quarter 2010 vs. Third Quarter 2009		Year-to-Date 2010 vs. Year-to-Date 2009	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$27.2	3.5	\$427.6	30.7

Southern Company's third quarter 2010 net income after dividends on preferred and preference stock of subsidiaries was \$817.2 million (\$0.98 per share) compared to \$790.0 million (\$0.99 per share) for third quarter 2009. The increase for the third quarter 2010 when compared to the corresponding period in 2009 was primarily the result of increases in revenues due to warmer weather, revenues associated with increases in rates under Alabama Power's Rate RSE and Rate CNP Environmental that took effect in January 2010, and increases in sales primarily in the industrial sector. The increase for the third quarter 2010 was partially offset by increases in operations and maintenance expenses, which includes an additional NDR accrual at Alabama Power, reduced amortization of the regulatory liability related to other cost of removal obligations at Georgia Power as authorized by the Georgia PSC, and an increase in depreciation on additional plant in service related to environmental, distribution, and transmission projects. Southern Company's year-to-date 2010 net income after dividends on preferred and preference stock of subsidiaries was \$1.82 billion (\$2.20 per share) compared to \$1.39 billion (\$1.77 per share) for year-to-date 2009. The increase for year-to-date 2010 when compared to the corresponding period in 2009 was primarily the result of a litigation settlement agreement with MC Asset Recovery, LLC (MC Asset Recovery) in the first quarter 2009, increases in revenues due to warmer weather in the second and third quarters 2010 and significantly colder weather in the first quarter 2010, the amortization of the regulatory liability related to other cost of removal obligations at Georgia Power as authorized by the Georgia PSC, revenues associated with increases in rates under Alabama Power's Rate RSE and Rate CNP Environmental that took effect in January 2010, and increases in sales primarily in the industrial sector. The increase for year-to-date 2010 was partially offset by increases in operations and maintenance expenses, which includes an additional NDR accrual at Alabama Power, a gain in 2009 on the early termination of two international leveraged lease investments, and an increase in depreciation on additional plant in service related to environmental, distribution, and transmission projects.

**Table of Contents**

**THE SOUTHERN COMPANY AND SUBSIDIARY COMPANIES**  
**MANAGEMENT'S DISCUSSION AND ANALYSIS OF**  
**FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

**Retail Revenues**

Third Quarter 2010 vs. Third Quarter 2009		Year-to-Date 2010 vs. Year-to-Date 2009	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$574.9	14.4	\$1,247.7	12.0

In the third quarter 2010, retail revenues were \$4.57 billion compared to \$4.00 billion for the corresponding period in 2009. For year-to-date 2010, retail revenues were \$11.60 billion compared to \$10.36 billion for the corresponding period in 2009.

Details of the change to retail revenues are as follows:

	<b>Third Quarter 2010</b>		<b>Year-to-Date 2010</b>	
	<i>(in millions)</i>	<i>(% change)</i>	<i>(in millions)</i>	<i>(% change)</i>
Retail prior year	\$3,997.7		\$10,355.3	
Estimated change in				
Rates and pricing	162.1	4.1	296.7	2.9
Sales growth (decline)	8.0	0.2	50.4	0.5
Weather	197.3	4.9	377.1	3.6
Fuel and other cost recovery	207.5	5.2	523.5	5.0
Retail current year	\$4,572.6	14.4%	\$11,603.0	12.0%

Revenues associated with changes in rates and pricing increased in the third quarter and for year-to-date 2010 when compared to the corresponding periods in 2009 primarily due to Rate RSE and Rate CNP Environmental increases at Alabama Power, higher contributions from market-driven rates for sales to industrial customers at Georgia Power, recovery of environmental compliance costs at Gulf Power, and increased recognition of environmental compliance cost recovery revenues at Georgia Power in accordance with the 2007 Retail Rate Plan.

Revenues attributable to changes in sales increased in the third quarter and for year-to-date 2010 when compared to the corresponding periods in 2009 due to increases in weather-adjusted retail KWH energy sales of 1.4% and 2.5%, respectively. For the third quarter 2010, weather-adjusted residential KWH energy sales increased 0.1%, weather-adjusted commercial KWH energy sales decreased 0.8%, and weather-adjusted industrial KWH energy sales increased 5.7%. For year-to-date 2010, weather-adjusted residential KWH energy sales increased 0.9%, weather-adjusted commercial KWH energy sales decreased 0.7%, and weather-adjusted industrial KWH energy sales increased 8.2%. Increased demand in the primary metals, chemicals, and transportation sectors were the main contributors to the increases in weather-adjusted industrial KWH energy sales for the third quarter and year-to-date 2010.

Revenues resulting from changes in weather increased in the third quarter 2010 as a result of warmer weather when compared to the corresponding period in 2009. For year-to-date 2010, revenues resulting from changes in weather increased as a result of warmer weather in the second and third quarters 2010 and significantly colder weather in the first quarter 2010 when compared to the corresponding periods in 2009.

Fuel and other cost recovery revenues increased \$207.5 million in the third quarter 2010 and \$523.5 million for year-to-date 2010 when compared to the corresponding periods in 2009. Electric rates for the traditional operating companies include provisions to adjust billings for fluctuations in fuel costs, including the energy component of

purchased power costs. Under these provisions, fuel revenues generally equal fuel expenses, including the fuel component of purchased power costs, and do not affect net income.

**Table of Contents**

**THE SOUTHERN COMPANY AND SUBSIDIARY COMPANIES**  
**MANAGEMENT'S DISCUSSION AND ANALYSIS OF**  
**FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

**Wholesale Revenues**

Third Quarter 2010 vs. Third Quarter 2009		Year-to-Date 2010 vs. Year-to-Date 2009	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$46.8	9.0	\$172.5	12.2

Wholesale energy sales will vary depending on the market cost of available energy compared to the cost of Southern Company system-owned generation, demand for energy within the Southern Company service territory, and the availability of Southern Company system generation. Increases and decreases in revenues that are driven by fuel prices are accompanied by an increase or decrease in fuel costs and do not have a significant impact on net income. In the third quarter 2010, wholesale revenues were \$565.9 million compared to \$519.1 million for the corresponding period in 2009. The increase was primarily due to higher energy and capacity revenues under existing PPAs and new PPAs at Southern Power that began in January, June, and July 2010. This increase was partially offset by the expiration of long-term unit power sales contracts in May 2010 at Alabama Power and the capacity subject to those contracts being made available for retail service starting in June 2010.

For year-to-date 2010, wholesale revenues were \$1.58 billion compared to \$1.41 billion for the corresponding period in 2009. This increase was primarily due to higher energy and capacity revenues under existing PPAs and new PPAs at Southern Power that began in January, June, and July 2010, as well as increased energy sales that were not covered by PPAs at Southern Power due to more favorable weather year-to-date 2010 compared to the corresponding period in 2009. This increase was partially offset by the expiration of long-term unit power sales contracts in May 2010 at Alabama Power and the capacity subject to those contracts being made available for retail service starting in June 2010.

**Other Electric Revenues**

Third Quarter 2010 vs. Third Quarter 2009		Year-to-Date 2010 vs. Year-to-Date 2009	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$21.1	15.1	\$47.4	12.1

In the third quarter 2010, other electric revenues were \$161.0 million compared to \$139.9 million for the corresponding period in 2009. This increase was primarily the result of a \$15.2 million increase in transmission revenues and a \$3.1 million increase in co-generation revenues due to increased sales volume.

For year-to-date 2010, other electric revenues were \$438.5 million compared to \$391.1 million for the corresponding period in 2009. This increase was primarily the result of a \$25.7 million increase in transmission revenues, a \$10.7 million increase in co-generation revenues due to increased sales volume, a \$4.1 million increase in rents from electric property, and a \$2.3 million increase in outdoor lighting revenues.

Revenues from co-generation and other energy services are generally offset by related expenses and do not have a significant effect on net income.

**Other Revenues**

Third Quarter 2010 vs. Third Quarter 2009		Year-to-Date 2010 vs. Year-to-Date 2009	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$(4.4)	(17.8)	\$(16.0)	(20.4)

In the third quarter 2010, other revenues were \$20.4 million compared to \$24.8 million for the corresponding period in 2009. The decrease was primarily the result of a \$4.3 million decrease in revenues at SouthernLINC Wireless related to lower average revenue per subscriber and fewer subscribers due to increased competition in the industry.

**Table of Contents**

**THE SOUTHERN COMPANY AND SUBSIDIARY COMPANIES**  
**MANAGEMENT'S DISCUSSION AND ANALYSIS OF**  
**FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

For year-to-date 2010, other revenues were \$62.3 million compared to \$78.3 million for the corresponding period in 2009. The decrease was primarily the result of a \$15.0 million decrease in revenues at SouthernLINC Wireless related to lower average revenue per subscriber and fewer subscribers due to increased competition in the industry.

**Fuel and Purchased Power Expenses**

	Third Quarter 2010 vs. Third Quarter 2009		Year-to-Date 2010 vs. Year-to-Date 2009	
	<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
Fuel*	\$236.2	13.6	\$654.9	14.3
Purchased power	42.5	25.5	56.6	13.9
Total fuel and purchased power expenses	\$278.7		\$711.5	

\* Fuel includes fuel purchased by the Southern Company system for tolling agreements where power is generated by the provider and is included in purchased power when determining the average cost of purchased power. Fuel and purchased power expenses for the third quarter 2010 were \$2.18 billion compared to \$1.90 billion for the corresponding period in 2009. The increase was primarily the result of a \$208.5 million increase related to total KWHs generated and purchased and a \$70.2 million increase in the average cost of fuel and purchased power. The increase in total fuel and purchased power expenses resulted primarily from increased generation and higher fossil fuel prices when compared to the corresponding period in 2009.

For year-to-date 2010, fuel and purchased power expenses were \$5.71 billion compared to \$5.00 billion for the corresponding period in 2009. The increase was primarily the result of a \$402.9 million increase related to total KWHs generated and purchased and a \$308.6 million increase in the average cost of fuel and purchased power. The increase in total fuel and purchased power expenses resulted primarily from increased generation and higher fossil fuel prices when compared to the corresponding period in 2009.

Fuel expenses at the traditional operating companies are generally offset by fuel revenues and do not have a significant effect on net income. See FUTURE EARNINGS POTENTIAL - State PSC Matters - Retail Fuel Cost Recovery herein for additional information. Fuel expenses incurred under Southern Power's PPAs are generally the responsibility of the counterparties and do not significantly affect net income.

Details of Southern Company's cost of generation and purchased power are as follows:

	Third Quarter 2010	Third Quarter 2009	Percent Change	Year-to-Date 2010	Year-to-Date 2009	Percent Change
	<i>(cents per net KWH)</i>			<i>(cents per net KWH)</i>		
Average Cost	3.55	3.42	3.8	3.55	3.39	4.7
Fuel	8.03	8.00	0.4	7.13	6.20	15.0
Purchased power						

Energy purchases will vary depending on demand for energy within the Southern Company service area, the market cost of available energy as compared to the cost of Southern Company system-generated energy, and the availability of Southern Company system generation.

**Table of Contents**

**THE SOUTHERN COMPANY AND SUBSIDIARY COMPANIES**  
**MANAGEMENT'S DISCUSSION AND ANALYSIS OF**  
**FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

**Other Operations and Maintenance Expenses**

Third Quarter 2010 vs. Third Quarter 2009		Year-to-Date 2010 vs. Year-to-Date 2009	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$199.5	24.3	\$323.6	12.8

In the third quarter 2010, other operations and maintenance expenses were \$1.02 billion compared to \$820.9 million for the corresponding period in 2009. The increase was primarily the result of a \$42.2 million increase in fossil, hydro, and nuclear expenses, a \$31.4 million increase in commodity and labor costs, a \$79.5 million increase in transmission and distribution expenses, which includes an additional accrual of \$40.0 million to the NDR at Alabama Power, a \$37.2 million increase in administrative and general expenses, and a \$9.2 million increase in customer service and sales expenses.

For year-to-date 2010, other operations and maintenance expenses were \$2.85 billion compared to \$2.52 billion for the corresponding period in 2009. The increase was primarily the result of a \$112.1 million increase in fossil, hydro, and nuclear expenses, a \$69.4 million increase in commodity and labor costs, a \$108.2 million increase in transmission and distribution expenses, which includes an additional accrual of \$40.0 million to the NDR at Alabama Power, a \$30.4 million increase in administrative and general expenses, and a \$3.5 million increase in customer service and sales expenses.

See FUTURE EARNINGS POTENTIAL State PSC Matters Alabama Power Retail Regulatory Matters Natural Disaster Cost Recovery and Note (B) to the Condensed Financial Statements under State PSC Matters Alabama Power Natural Disaster Cost Recovery herein for additional information on the NDR.

**MC Asset Recovery Litigation Settlement**

Third Quarter 2010 vs. Third Quarter 2009		Year-to-Date 2010 vs. Year-to-Date 2009	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
		\$(202.0)	N/M

N/M Not Meaningful

In the first quarter 2009, Southern Company entered into a litigation settlement agreement with MC Asset Recovery which resulted in a charge of \$202.0 million and required MC Asset Recovery to release Southern Company and certain other designated avoidance actions assigned to MC Asset Recovery in connection with Mirant's plan of reorganization, as well as to release all actions against current or former officers and directors of Mirant and Southern Company that have or could have been filed. The settlement has been completed and resolves all claims by MC Asset Recovery against Southern Company. In June 2009, the case was dismissed with prejudice. See Note (B) to the Condensed Financial Statements under Mirant Matters herein for additional information.

**Depreciation and Amortization**

Third Quarter 2010 vs. Third Quarter 2009		Year-to-Date 2010 vs. Year-to-Date 2009	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$94.7	28.5	\$37.5	3.4

In the third quarter 2010, depreciation and amortization was \$426.8 million compared to \$332.1 million for the corresponding period in 2009. The increase was primarily due to the amortization of \$5.0 million in the third quarter

2010 compared to \$54.0 million in the third quarter 2009 of the regulatory liability related to other cost of removal obligations at Georgia Power as authorized by the Georgia PSC, as well as additional depreciation on plant in service related to environmental, transmission, and distribution projects.

**Table of Contents**

**THE SOUTHERN COMPANY AND SUBSIDIARY COMPANIES**  
**MANAGEMENT'S DISCUSSION AND ANALYSIS OF**  
**FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

For year-to-date 2010, depreciation and amortization was \$1.14 billion compared to \$1.10 billion for the corresponding period in 2009. The increase was primarily the result of additional depreciation on plant in service related to environmental, transmission, and distribution projects. The increase was partially offset by the amortization of \$119.3 million in 2010 compared to \$54.0 million in 2009 of the regulatory liability related to other cost of removal obligations at Georgia Power as authorized by the Georgia PSC.

See Note 3 to the financial statements of Southern Company in Item 8 of the Form 10-K under Retail Regulatory Matters Georgia Power Cost of Removal for additional information on the amortization of the other cost of removal regulatory liability.

**Taxes Other Than Income Taxes**

Third Quarter 2010 vs. Third Quarter 2009

Year-to-Date 2010 vs. Year-to-Date 2009

<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$22.4	10.5	\$40.6	6.6

In the third quarter 2010, taxes other than income taxes were \$235.3 million compared to \$212.9 million for the corresponding period in 2009. This increase was primarily due to higher municipal franchise fees at Georgia Power as a result of increased retail revenues, increases in ad valorem taxes, and increases in payroll taxes.

For year-to-date 2010, taxes other than income taxes were \$661.5 million compared to \$620.9 million for the corresponding period in 2009. This increase was primarily due to higher municipal franchise fees at Georgia Power as a result of increased retail revenues, increases in ad valorem taxes, and increases in payroll taxes.

**Allowance for Equity Funds Used During Construction**

Third Quarter 2010 vs. Third Quarter 2009

Year-to-Date 2010 vs. Year-to-Date 2009

<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$(5.9)	(11.6)	\$(1.3)	(0.9)

In the third quarter 2010, AFUDC equity was \$45.2 million compared to \$51.1 million for the corresponding period in 2009. For year-to-date 2010, AFUDC equity was \$139.9 million compared to \$141.2 million for the corresponding period in 2009. The third quarter and year-to-date 2010 decreases were primarily due to the completion of environmental projects at Alabama Power and Gulf Power. These decreases were partially offset by increases in construction related to three new combined cycle units, two new nuclear generating units, and ongoing environmental and transmission projects at Georgia Power.

**Leveraged Lease Income**

Third Quarter 2010 vs. Third Quarter 2009

Year-to-Date 2010 vs. Year-to-Date 2009

<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$(0.8)	(11.2)	\$(12.1)	(48.8)

In the third quarter 2010, leveraged lease income was \$5.8 million compared to \$6.6 million for the corresponding period in 2009. The decrease when compared to the corresponding period in 2009 was not material.

For year-to-date 2010, leveraged lease income was \$12.6 million compared to \$24.7 million for the corresponding period in 2009. This decrease was primarily related to the early termination of two leveraged lease investments in the second quarter 2009.

**Table of Contents**

**THE SOUTHERN COMPANY AND SUBSIDIARY COMPANIES**  
**MANAGEMENT'S DISCUSSION AND ANALYSIS OF**  
**FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

***Gain on Disposition of Lease Termination***

Third Quarter 2010 vs. Third Quarter 2009		Year-to-Date 2010 vs. Year-to-Date 2009	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
		\$(26.3)	N/M

N/M Not Meaningful

In the second quarter 2009, Southern Company terminated two international leveraged lease investments early which resulted in a gain of \$26.3 million.

***Loss on Extinguishment of Debt***

Third Quarter 2010 vs. Third Quarter 2009		Year-to-Date 2010 vs. Year-to-Date 2009	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
		\$(17.2)	N/M

N/M Not Meaningful

In the second quarter 2009, Southern Company terminated two international leveraged lease investments early. The proceeds from the terminations were used to extinguish all debt related to leveraged lease investments, a portion of which had make-whole redemption provisions which resulted in a loss of \$17.2 million.

***Interest Expense, Net of Amounts Capitalized***

Third Quarter 2010 vs. Third Quarter 2009		Year-to-Date 2010 vs. Year-to-Date 2009	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$(1.2)	(0.5)	\$(18.6)	(2.7)

In the third quarter 2010, interest expense, net of amounts capitalized was \$225.1 million compared to \$226.3 million for the corresponding period in 2009. The decrease when compared to the corresponding period in 2009 was not material.

For year-to-date 2010, interest expense, net of amounts capitalized was \$666.3 million compared to \$684.9 million for the corresponding period in 2009. The decrease was primarily due to a \$24.8 million decrease related to lower average interest rates on variable-rate debt, an \$18.7 million decrease in other interest charges, and a \$1.3 million decrease related to higher capitalized interest. Partially offsetting this decrease was a \$26.2 million increase associated with \$1.04 billion in additional debt outstanding at September 30, 2010 when compared to September 30, 2009.

***Income Taxes***

Third Quarter 2010 vs. Third Quarter 2009		Year-to-Date 2010 vs. Year-to-Date 2009	
<i>(change in millions)</i>	<i>(% change)</i>	<i>(change in millions)</i>	<i>(% change)</i>
\$6.0	1.4	\$96.3	11.6

In the third quarter 2010, income taxes were \$441.9 million compared to \$435.9 million for the corresponding period in 2009. This increase was primarily due to higher pre-tax earnings in the third quarter 2010, partially offset by state investment tax credits at Georgia Power, and tax benefits associated with the construction of a biomass facility at

Southern Power.

For year-to-date 2010, income taxes were \$925.1 million compared to \$828.8 million for the corresponding period in 2009. This increase was primarily due to higher pre-tax earnings in 2010, partially offset by a decrease in uncertain tax positions at Georgia Power related to state income tax credits that remain subject to litigation, state investment tax credits at Georgia Power, and tax benefits associated with the construction of a biomass facility at Southern Power.

**FUTURE EARNINGS POTENTIAL**

The results of operations discussed above are not necessarily indicative of Southern Company's future earnings potential. The level of Southern Company's future earnings depends on numerous factors that affect the opportunities, challenges, and risks of Southern Company's primary business of selling electricity. These factors include the traditional operating companies' ability to maintain a constructive regulatory environment that continues to allow for the recovery of all prudently incurred costs during a time of increasing costs. Other major factors include profitability of the competitive wholesale supply business and federal regulatory policy, which may impact Southern Company's level of participation in this market. Future earnings for the electricity business in the near term will depend, in part, upon maintaining energy sales which is subject to a number of factors. These factors include weather, competition, new energy contracts with neighboring utilities and other wholesale customers, energy conservation practiced by customers, the price of electricity, the price elasticity of demand, and the rate of economic growth or decline in the service area. In addition, the level of future earnings for the wholesale supply business also depends on numerous factors including creditworthiness of customers, total generating capacity available in the Southeast, future acquisitions and construction of generating facilities, and the successful remarketing of capacity as current contracts expire. Changes in economic conditions impact sales for the traditional operating companies and Southern Power, and the pace of the economic recovery remains uncertain. The timing and extent of the economic recovery will impact growth and may impact future earnings. For additional information relating to these issues, see RISK FACTORS in Item 1A and MANAGEMENT'S DISCUSSION AND ANALYSIS FUTURE EARNINGS POTENTIAL of Southern Company in Item 7 of the Form 10-K.

**Environmental Matters**

Compliance costs related to the Clean Air Act and other environmental statutes and regulations could affect earnings if such costs cannot continue to be fully recovered in rates on a timely basis. See MANAGEMENT'S DISCUSSION AND ANALYSIS FUTURE EARNINGS POTENTIAL Environmental Matters of Southern Company in Item 7 and Note 3 to the financial statements of Southern Company under Environmental Matters in Item 8 of the Form 10-K for additional information.

***New Source Review Actions***

See MANAGEMENT'S DISCUSSION AND ANALYSIS FUTURE EARNINGS POTENTIAL Environmental Matters New Source Review Actions of Southern Company in Item 7 and Note 3 to the financial statements of Southern Company under Environmental Matters New Source Review Actions in Item 8 of the Form 10-K for additional information regarding civil actions brought by the EPA against certain Southern Company subsidiaries. The EPA's action against Alabama Power is alleging that Alabama Power violated the NSR provisions of the Clean Air Act and related state laws with respect to certain of its coal-fired generating facilities. On September 2, 2010, following the end of discovery, the EPA dismissed five of its eight remaining claims against Alabama Power, leaving only three claims for summary disposition or trial, including one relating to a facility co-owned by Mississippi Power. The parties each filed motions for summary judgment on September 30, 2010. The court has set a trial date for October 2011 for any remaining claims. The ultimate outcome of this matter cannot now be determined.

FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

***Carbon Dioxide Litigation***

*New York Case*

See MANAGEMENT'S DISCUSSION AND ANALYSIS FUTURE EARNINGS POTENTIAL Environmental Matters Carbon Dioxide Litigation New York Case of Southern Company in Item 7 and Note 3 to the financial statements of Southern Company under Environmental Matters Carbon Dioxide Litigation New York Case in Item 8 of the Form 10-K for additional information regarding carbon dioxide litigation. The U.S. Court of Appeals for the Second Circuit denied the defendants' petition for rehearing en banc on March 5, 2010. On August 2, 2010, the defendants filed a petition for writ of certiorari with the U.S. Supreme Court. The ultimate outcome of these matters cannot be determined at this time.

*Other Litigation*

See MANAGEMENT'S DISCUSSION AND ANALYSIS FUTURE EARNINGS POTENTIAL Environmental Matters Carbon Dioxide Litigation Other Litigation of Southern Company in Item 7 and Note 3 to the financial statements of Southern Company under Environmental Matters Carbon Dioxide Litigation Other Litigation in Item 8 of the Form 10-K for additional information regarding carbon dioxide litigation related to Hurricane Katrina. On May 28, 2010, the U.S. Court of Appeals for the Fifth Circuit dismissed the plaintiffs' appeal of the case based on procedural grounds relating to the loss of a quorum by the full court on reconsideration, reinstating the district court decision in favor of the defendants. On August 27, 2010, the plaintiffs petitioned the U.S. Supreme Court for a writ of mandamus directing the U.S. Court of Appeals for the Fifth Circuit to reinstate the plaintiffs' appeal. The ultimate outcome of this matter cannot be determined at this time.

***Air Quality***

See MANAGEMENT'S DISCUSSION AND ANALYSIS FUTURE EARNINGS POTENTIAL Environmental Matters Environmental Statutes and Regulations Air Quality of Southern Company in Item 7 of the Form 10-K for information regarding the Industrial Boiler Maximum Achievable Control Technology regulations. On April 29, 2010, the EPA issued a proposed rule that would establish emissions limits for various hazardous air pollutants typically emitted from industrial boilers, including biomass boilers. The EPA is required to finalize the rules by January 16, 2011. The impact of these proposed regulations will depend on their final form and the outcome of any legal challenges, and cannot be determined at this time.

See MANAGEMENT'S DISCUSSION AND ANALYSIS FUTURE EARNINGS POTENTIAL Environmental Matters Environmental Statutes and Regulations Air Quality of Southern Company in Item 7 of the Form 10-K for information regarding proposed sulfur dioxide (SO<sub>2</sub>) regulations. On August 23, 2010, the EPA's final revisions to the National Ambient Air Quality Standard for SO<sub>2</sub>, which included the establishment of a new short-term standard, became effective. The ultimate impact of the revised standard will depend on additional regulatory action, state implementation, and the outcome of any legal challenges, and cannot be determined at this time.

On January 22, 2010, the EPA finalized revisions to the National Ambient Air Quality Standard for Nitrogen Dioxide (NO<sub>2</sub>) by setting a new one-hour standard that became effective on April 12, 2010. The impact of this regulation will depend on additional regulatory action, state implementation, and the outcome of any legal challenges, and cannot be determined at this time. Although none of the areas within Southern Company's service territory are expected to be designated as nonattainment for the standard, based on current ambient air quality monitoring data, the new NO<sub>2</sub> standard could result in significant additional compliance and operational costs for units that require new source permitting.

See MANAGEMENT'S DISCUSSION AND ANALYSIS FUTURE EARNINGS POTENTIAL Environmental Matters Environmental Statutes and Regulations Air Quality of Southern Company in Item 7 of the Form 10-K for information regarding the Clean Air Interstate Rule (CAIR). On August 2, 2010, the EPA published a proposed rule to replace CAIR, which was overturned by the U.S. Court of Appeals for the D.C. Circuit in 2008 but left in place pending the promulgation of a replacement rule. This proposed rule, referred to as the Transport Rule, would require 31 eastern

**FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

states and the District of Columbia (D.C.) to reduce power plant emissions of SO<sub>2</sub> and nitrogen oxides (NO<sub>x</sub>) that contribute to downwind states' nonattainment of federal ozone and/or fine particulate matter ambient air quality standards. To address fine particulate matter standards, the proposed Transport Rule would require D.C. and 27 eastern states, including Alabama, Florida, and Georgia, to reduce annual emissions of SO<sub>2</sub> and NO<sub>x</sub> from power plants. To address ozone standards, the proposed Transport Rule would also require D.C. and 25 states, including each of the states in Southern Company's service territory, to achieve additional reductions in NO<sub>x</sub> emissions from power plants during the ozone season. The proposed Transport Rule contains a preferred option that would allow limited interstate trading of emissions allowances; however, the EPA also requests comment on two alternative approaches that would not allow interstate trading of emissions allowances. The EPA states that it also intends to develop a second phase of the Transport Rule next year to address the more stringent ozone air quality standards as they are finalized. The EPA expects to finalize the Transport Rule in late spring of 2011 and to set the initial compliance deadline starting in 2012. The impact of this proposed regulation and potential future regulation will depend on its final form, state implementation, and the outcome of any legal challenges, and cannot be determined at this time. These regulations could result in significant additional compliance and operational costs that could affect future unit retirement and replacement decisions and results of operations, cash flows, and financial condition if such costs are not recovered through regulated rates.

***Coal Combustion Byproducts***

See MANAGEMENT'S DISCUSSION AND ANALYSIS - FUTURE EARNINGS POTENTIAL - Environmental Matters - Environmental Statutes and Regulations - Coal Combustion Byproducts of Southern Company in Item 7 of the Form 10-K for information regarding potential additional regulation of coal combustion byproducts. On June 21, 2010, the EPA published a rulemaking proposal which requested comments on two potential regulatory options for management and disposal of coal combustion byproducts: regulation as a solid waste or regulation as if the materials technically constituted a hazardous waste. Adoption of either option could require closure of or significant change to existing storage units and construction of lined landfills, as well as additional waste management and groundwater monitoring requirements. Under both options, the EPA proposes to exempt the beneficial reuse of coal combustion byproducts from regulation; however, a hazardous or other designation indicative of heightened risk could limit or eliminate beneficial reuse options. Comments on the proposed rules are due by November 19, 2010. Although its analysis is preliminary, Southern Company believes the EPA has significantly underestimated compliance costs in the proposed rule.

The outcome of these proposed regulations will depend on their final form and the outcome of any legal challenges, and cannot be determined at this time. However, additional regulation of coal combustion byproducts could have a significant impact on the management, beneficial use, and disposal of such byproducts. These changes could result in significant additional compliance and operational costs that could affect future unit retirement and replacement decisions and results of operations, cash flows, and financial condition if such costs are not recovered through regulated rates. Further, higher costs that are recovered through regulated r
