SEMI-ANNUAL REPORT
NOVEMBER 30, 2006

Dear Shareholders:

We are pleased to present this semi-annual report to shareholders of the First Trust/Four Corners Senior Floating Rate Income Fund II (NYSE Symbol: FCT), which includes a discussion of how your Fund performed over the semi-annual reporting period ended November 30, 2006. Over the six-month period covered by this report, the market continued to favor senior, secured, floating-rate loans ("Senior Loans"). The Fund benefited from a strong U.S. economy, Gross Domestic Product ("GDP") expansion, and strong corporate earnings growth. An attractive credit environment driven by strong investor demand for the Senior Loan asset class also contributed positively to the Fund's performance.

First Trust Advisors L.P. acts as the Fund's investment advisor and currently manages or supervises approximately \$28 billion in assets. Four Corners Capital Management, LLC ("Four Corners"), the Fund's Sub-Advisor, structures and manages a variety of alternative fixed-income products with a specialization in Senior Loans. The portfolio managers' outlook for the markets and a review of the Fund's strategy and performance can be found in the portfolio commentary on the following pages.

PORTFOLIO COMMENTARY

OVERVIEW

The First Trust/Four Corners Senior Floating Rate Income Fund II ("FCT" or the "Fund") generated a total return of 6.21%, including market price change and dividends, for the six-month period ending November 30, 2006 (the "Fiscal

Period"). The Fund's Net Asset Value ("NAV") total return over the same period was 3.16%. During the Fiscal Period, the Fund increased its dividend three times and declared dividends totaling \$0.7343 per common share compared to \$0.5922 for the same period in the prior year, representing an increase of 24.0%. The Fund's common share price increased 1.9% during the Fiscal Period from \$17.61 to \$17.95, and its discount to NAV narrowed from 7.3% to 4.6%. Based on its most recent dividend, FCT paid a yield of 8.48% calculated on the Fund's common share price and 8.09% based on the Fund's \$18.81 NAV as of November 30, 2006.

ECONOMIC AND MARKET ENVIRONMENT

The Fiscal Period continued to be a positive environment for Senior Loan investing. The Fund continued to benefit from an attractive credit environment primarily due to a strong U.S. economy, which kept market-wide default rates at very low levels. Additionally, continued strong investor demand for the Senior Loan asset class due to its appealing risk-adjusted returns relative to other investment opportunities has kept secondary prices firm across the Senior Loan market. This combination of low default rates and firm secondary prices has resulted in stable NAV returns.

GDP continued to expand during the period, including the recent upward revision to third-quarter GDP to 2.2%. Corporate earnings growth remained strong during the period and, while interest rates have increased, real rates remain low on a historical basis. The Fund primarily invests in the loans of non-investment grade companies, and strong earnings, combined with low real interest rates, make these companies better able to service their debt.

The Federal Reserve Board (the "Fed") has not changed the Federal Funds rate target (set at 5.25%) since its June 29, 2006 meeting. While the Fed policy makers continue to maintain a tightening bias, they are predicting that economic growth will run slightly below the trend for the next year. Signs of a slowdown in GDP growth domestically and internationally have emerged which have, among other indicators, led some economists to predict a hiatus in Fed tightening during Fiscal 2007.

Page 2

PORTFOLIO COMMENTARY - (CONTINUED)

While we acknowledge these signals and the significant rise in interest rates since 2003, we believe that the fundamental strength of the economy, combined with the Fed's overriding focus on containing inflation, may result in further interest rate increases.

From the Fund's perspective, these are very favorable conditions. A tightening bias increases the possibility that the Fund can continue to increase its dividend since the loans that the fund invests in are floating rate and their income is based on short-term interest rates. However, excessive tightening could result in a spike in real interest rates, hurting companies' ability to service their debt. While we do not expect corporate earnings to sustain their year-over-year double digit growth levels, earnings are generally expected to remain relatively strong through 2007, which, combined with low real interest rates, should continue to enable the companies in which we invest to service their debt.

Unlike traditional fixed income investments (i.e. high yield bonds), Senior Loans have minimal, if any, interest rate risk. Rather, in rising rate environments like we have seen in recent years, Senior Loan income typically

rises (with a several month lag) along with Fed rate increases. One caveat however, is that in recent years, narrowing credit spread has partly offset the benefits from rising rates. Notwithstanding the modest decline in credit spreads, the Fund still increased its dividend 12 times since the Fed tightening began and has demonstrated low NAV volatility. More recently, we have seen credit spreads trend somewhat higher. Loan market liquidity has also improved during the period.

Inflows into the Senior Loan asset class during Calendar 2006 were exceptional and occurred in tandem with strong growth in new Senior Loan issuance. New Senior Loan issuance rose over 37% year-over-year through November to \$457 billion. In November alone, there was \$66 billion of new Senior Loan issuance. The forward calendar remains very robust with a visible pipeline of \$54 billion already scheduled for 2007. Similarly, secondary trading volume grew nearly 34% year-over year.

As previously mentioned, the demand for the asset class of Senior Loans remained strong, as investors perceived reduced levels of risk resulting from an improving economic environment and low levels of defaults and credit losses, as well as the returns benefit of a floating-rate asset class. For the six months ended November 30, Senior Loans generated a total return of 3.19% (S&P/LSTA Leveraged Loan Index). Senior Loans have generated positive returns every calendar year that the data has been tracked since 1992.

INVESTMENT STRATEGY AND PORTFOLIO COMPOSITION

The primary objective of the Fund is to seek a high level of current income. As a secondary objective, the Fund attempts to preserve capital. The investment strategy employed in managing the Fund was designed to achieve the Fund's objectives through risk minimization throughout entire economic and credit cycles. In contrast, many managers of Senior Loan-based closed-end funds invest up to 20% or more of their portfolios in high yield bonds in order to boost yields in the short run. FCT utilizes a "pure play" strategy that generally prohibits the Fund from investing in high yield bonds, and focuses primarily on Senior Loans. In some market environments, the Fund's pure play strategy may result in lower current dividends/yields than some other Senior Loan-based closed-end funds. However, we believe that our strategy can result in lower NAV volatility while maintaining competitive dividends/yield and higher and more stable long-term total NAV returns.

Our strategy focuses on thorough fundamental credit analysis, broad issuer and industry diversification, and a pro-active sell discipline in order to minimize risk. The Fund's portfolio is generally more heavily weighted towards industry groups that we expect to exhibit lower earnings volatility, and which we expect to provide high recoveries to senior lenders in circumstances where earnings volatility does occur.

The Fund is well diversified with over 200 positions across 31 industries. At November 30, 2006 the five largest individual borrower exposures in total represented 9.1% of the Fund's portfolio. The Fund also has the flexibility to invest up to 10% of the portfolio in Special Situation debt investments, which are typically investments in companies that are either in default at the time of purchase or are experiencing financial difficulties. We view our ability to achieve modest gains from this subset of Senior Loans as opportunistic rather than obligatory, and given the growth and improvement in the economy in recent years, we have seen limited value opportunities in this segment of the portfolio. On November 30, 2006, the portfolio included one Special Situation investment representing 2.3% of the Fund's portfolio.

As mentioned in prior reports, the Fund is leveraged using both adjustable-rate Auction Market Preferred Shares and an asset-backed commercial paper conduit. The terms and conditions of the leverage provide the Fund with the ability to

borrow on a floating-rate basis. Since the income generated by the Fund's Senior Loan investment portfolio is also floating-rate, the Fund is less exposed to interest rate mismatch risk than a closed-end fund with a fixed-rate investment portfolio, and investors will generally benefit from portfolio leverage regardless of short-term interest rates. At November 30, 2006, the portfolio leverage accounted for 36.3% of the Fund's total managed assets.

PERFORMANCE REVIEW

FCT generated a total return of 6.21%, including market price change and dividends, for the Fiscal Period. The Fund's NAV total return was 3.16% over the same period. This return slightly lagged the benchmark (Standard & Poor's/LSTA Leveraged Loan Index) return of 3.19%. The Fund's performance includes the beneficial impact of leverage, and the negative impact of fees, expenses and uninvested cash balances, which are not part of the benchmark return. The dividend distribution totaled approximately \$0.7343 per common share during the Fiscal Period. FCT paid an annualized yield of 8.48% calculated on the Fund's common share price and 8.09% based on the Fund's \$18.81 NAV as of November 30, 2006. Additionally, the Fund's NAV was relatively stable during the period, ranging from a high of \$19.00 to a low of \$18.69, a range of approximately 1.66%.

In addition to the Fund's stable NAV performance/total return and high yield during the Fiscal Period, the Fund's market price performance improved. During the period, the market price of the Fund closed as high as \$17.95 (November 30, 2006) and as low as \$17.53 (June 13, 2006). The Fund ended the period at a 4.6% discount to its NAV compared to a discount of 7.3% at the beginning of the period. We also note that 13 of the 16 Senior Loan closed-end funds traded at discounts to NAV on November 30, with the average of the narrower pure play group (six of the 16 Senior Loan closed-end funds referred to above) being 3.7%. FCT's annualized market and NAV yield on November 30, 2006 (8.5% and 8.1%, respectively) compare favorably to the pure play peer group average of 8.3% and 8.0%, respectively.

On June 1st, AG Edwards issued its research report with a Buy rating, the firm's highest rating. Other closed end fund research analysts have also published proprietary research on the Fund, available within their specific firms.

We remain committed to long-term performance and superior client support, and we appreciate the opportunity to assist investors in meeting their investment goals.

NOTES TO FINANCIAL STATEMENTS

FIRST TRUST/FOUR CORNERS SENIOR FLOATING RATE INCOME FUND II
NOVEMBER 30, 2006 (UNAUDITED)

1. FUND DESCRIPTION

First Trust/Four Corners Senior Floating Rate Income Fund II (the "Fund") is a diversified, closed-end management investment company organized as a Massachusetts business trust on March 25, 2004, and is registered with the Securities and Exchange Commission ("SEC") under the Investment Company Act of 1940, as amended (the "1940 Act"). The Fund trades under the ticker symbol FCT on the New York Stock Exchange ("NYSE").

The Fund's primary investment objective is to seek a high level of current income. As a secondary objective, the Fund will attempt to preserve capital. The Fund will pursue these objectives through investment in a portfolio of senior secured floating rate corporate loans ("Senior Loans"). There can be no assurance that the Fund will achieve its investment objectives. Investment in Senior Loans involves credit risk and, during periods of generally declining credit quality, it may be particularly difficult for the Fund to achieve its secondary investment objective. The Fund may not be appropriate for all investors.

2. SIGNIFICANT ACCOUNTING POLICIES

The following is a summary of significant accounting policies consistently followed by the Fund in the preparation of its financial statements. The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from those estimates.

A. PORTFOLIO VALUATION:

The net asset value ("NAV") of the Common Shares of the Fund is computed based upon the value of the Fund's portfolio and other assets less any accrued liabilities. The NAV is determined as of the close of regular trading on the NYSE, normally 4:00 p.m. Eastern time, on each day the NYSE is open for trading. Domestic debt securities and foreign securities are priced using data reflecting the earlier closing of the principal markets for those securities. The Fund calculates NAV per Common Share by subtracting the Fund's liabilities (including accrued expenses, dividends payable and any borrowings of the Fund) and the liquidation value of any outstanding Preferred Shares from the Fund's Total Assets (the value of securities and other investments the Fund holds plus cash or other assets, including interest accrued but not yet received), and dividing the result by the total number of Common Shares outstanding.

The Fund's investments are valued daily at market value or, in the absence of

market value with respect to any portfolio securities, at fair value according to procedures adopted by the Fund's Board of Trustees. A majority of the Fund's assets are valued using market information supplied by third parties. In the event that market quotations are not readily available, the pricing service does not provide a valuation for a particular asset, or the valuations are deemed unreliable, or if events occurring after the close of the principal markets for particular securities (e.g., domestic debt and foreign securities), but before the Fund values its assets, would materially affect NAV, First Trust Advisors L.P. ("First Trust") may use a fair value method to value the Fund's securities and investments. The use of fair value pricing by the Fund is governed by valuation procedures adopted by the Fund's Board of Trustees, and in accordance with the provisions of the 1940 Act.

The Senior Loans in which the Fund invests are not listed on any securities exchange or board of trade. Senior Loans are typically bought and sold by institutional investors in individually negotiated private transactions that function in many respects like an over-the-counter secondary market, although typically no formal market-makers exist. This market, while having grown substantially in the past several years, generally has fewer trades and less liquidity than the secondary market for other types of securities. Some Senior Loans have few or no trades, or trade infrequently, and information regarding a specific Senior Loan may not be widely available or may be incomplete. Accordingly, determinations of the market value of Senior Loans may be based on infrequent and dated information. Because there is less reliable, objective data available, elements of judgment may play a greater role in valuation of Senior Loans than for other types of securities. Typically, Senior Loans are valued using information provided by an independent third party pricing service. If the pricing service cannot or does not provide a valuation for a particular Senior Loan or such valuation is deemed unreliable, First Trust may value such Senior Loan at a fair value according to procedures adopted by the Fund's Board of Trustees, and in accordance with the provisions of the 1940 Act.

Portfolio securities listed on any exchange other than the NASDAQ National Market ("NASDAQ") are valued at the last sale price on the business day as of which such value is being determined. If there has been no sale on such day, the securities are valued at the mean of the most recent bid and asked prices on such day. Securities traded on the NASDAQ are valued at the NASDAQ Official Closing Price as

Page 24

NOTES TO FINANCIAL STATEMENTS - (CONTINUED)

FIRST TRUST/FOUR CORNERS SENIOR FLOATING RATE INCOME FUND II
NOVEMBER 30, 2006 (UNAUDITED)

determined by NASDAQ. Portfolio securities traded on more than one securities exchange are valued at the last sale price on the business day as of which such value is being determined at the close of the exchange representing the principal market for such securities. Portfolio securities traded in the over-the-counter market, but excluding securities traded on the NASDAQ, are valued at the closing bid prices. Short-term investments that mature in less than 60 days are valued at amortized cost.

B. REPURCHASE AGREEMENTS:

The Fund engages in repurchase agreement transactions. Under the terms of a typical repurchase agreement, the Fund takes possession of an underlying debt obligation subject to an obligation of the seller to repurchase, and the Fund to

resell, the obligation at an agreed-upon price and time, thereby determining the yield during the Fund's holding period. This arrangement results in a fixed rate of return that is not subject to market fluctuations during the Fund's holding period. The value of the collateral is at all times at least equal to the total amount of the repurchase obligation, including interest. In the event of counterparty default, the Fund has the right to use the collateral to offset losses incurred. There is potential loss to the Fund in the event the Fund is delayed or prevented from exercising its rights to dispose of the collateral securities, including the risk of a possible decline in the value of the underlying securities during the period while the Fund seeks to assert its rights. The Fund reviews the value of the collateral and the creditworthiness of those banks and dealers with which the Fund enters into repurchase agreements to evaluate potential risks.

C. SECURITIES TRANSACTIONS AND INVESTMENT INCOME:

Securities transactions are recorded as of the trade date. Realized gains and losses from securities transactions are recorded on the identified cost basis. Interest income is recorded on the accrual basis. Market premiums and discounts are amortized over the expected life of each respective borrowing.

Securities purchased or sold on a when-issued or delayed-delivery basis may be settled a month or more after the trade date; interest income on such securities is not accrued until settlement date. The Fund maintains liquid assets with a current value at least equal to the amount of its when-issued or delayed-delivery purchase commitments.

D. UNFUNDED LOAN COMMITMENTS:

The Fund may enter into certain credit agreements, all or a portion of which may be unfunded. The Fund had unfunded loan commitments of approximately \$7,323,628 as of November 30, 2006. The Fund is obligated to fund these loan commitments at the borrower's discretion. Net unrealized depreciation of \$33,635 from these commitments is included in "Accrued expenses and other liabilities" on the Statement of Assets and Liabilities.

E. RESTRICTED SECURITIES:

The Fund may invest a portion of its assets in restricted securities. Restricted securities are securities that cannot be offered for public sale without first being registered under the Securities Act of 1933, as amended. The Fund currently holds the restricted securities shown in the following table. The Fund does not have the right to demand that such securities be registered. These securities are valued using market quotations according to the valuation procedures as stated in the Portfolio Valuation section (Note 2A) and are not expressed as a discount to the carrying value of a comparable unrestricted security. There are no unrestricted securities with the same maturity dates and yields for these issuers.

F. DIVIDENDS AND DISTRIBUTIONS TO SHAREHOLDERS:

The Fund will distribute to holders of its Common Shares monthly dividends of all or a portion of its net income after the payment of interest and dividends in connection with the financing associated with leverage. If the Fund recognizes a long-term capital gain, it will be required to allocate such gain between the Common Shares and Auction Market Preferred Shares ("AMP Shares") issued by the Fund in proportion to the total dividends paid for the year. Distributions will automatically be reinvested into additional Common Shares pursuant to the Fund's Dividend Reinvestment Plan unless cash distributions are elected by the shareholder.

Distributions from income and capital gains are determined in accordance with income tax regulations, which may differ from accounting principles generally accepted in the United States of America. These differences are primarily due to differing treatments of income and gains on various investment securities held by the Fund, timing differences and differing characterization of distributions made by the Fund.

The tax character of distributions paid during the fiscal years ended May 31, 2006 and May 31, 2005 is as follows:

	2006	2005
Distributions paid from:		
Ordinary Income	\$ 36,953,889	\$ 24,738,405

As of May 31, 2006, the components of distributable earnings on a tax basis are as follows:

Undistributed Ordinary Income	\$ 3,191,642
Net Unrealized Appreciation	\$ 914,840

G. INCOME TAXES:

The Fund intends to continue to qualify as a regulated investment company by complying with the requirements under Subchapter M of the Internal Revenue Code of 1986, as amended, and by distributing substantially all of its net investment income and net realized gains to shareholders. Accordingly, no provision has been made for federal or state income taxes.

As of May 31, 2006, the Fund had a capital loss carryforward for federal income tax purposes of \$4,136,367, expiring on May 31, 2014.

H. EXPENSES:

The Fund will pay all expenses directly related to its operations.

I. NEW ACCOUNTING PRONOUNCEMENTS:

In July 2006, the Financial Accounting Standards Board ("FASB") issued FASB Interpretation No. 48 ("FIN 48"), "Accounting for Uncertainty in Income Taxes." This pronouncement provides guidance on the recognition, measurement, classification, and disclosures related to uncertain tax positions, along with any related interest and penalties. FIN 48 is effective for fiscal years beginning after December 15, 2006. At this time, management is evaluating the implications of FIN 48 and its impact on the financial statements which has not yet been determined.

In addition, in September 2006, Statement of Financial Accounting Standards No. 157 Fair Value Measurements ("SFAS 157") was issued by the FASB and is effective for fiscal years beginning after November 15, 2007. SFAS 157 defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. Management is currently evaluating the impact the adoption of SFAS 157 will have on the Fund's financial statement disclosures.

3. INVESTMENT ADVISORY FEE AND OTHER AFFILIATED TRANSACTIONS

First Trust is a limited partnership with one limited partner, Grace Partners of DuPage, L.P., and one general partner, The Charger Corporation. First Trust serves as investment advisor to the Fund pursuant to an Investment Management Agreement. First Trust is responsible for the ongoing monitoring of the Fund's investment portfolio, managing the Fund's business affairs and certain administrative services necessary for the management of the Fund. For these services, First Trust is entitled to a monthly fee calculated at

The Fund is required to meet certain asset coverage tests with respect to the AMP Shares. If the Fund fails to maintain Eligible Assets having an aggregated Discounted Value at least equal to the AMP Shares Basic Maintenance Amount as of any Valuation Date and the failure is not cured on or before the related Asset Coverage Cure Date, the Fund will be required in certain circumstances to redeem certain AMP Shares.

An auction of the Series A AMP Shares is generally held every 7 days and an auction of the Series B AMP Shares is generally held every 28 days. Existing shareholders may submit an order to hold, bid or sell such shares at par value on each auction date.

DIVIDEND REINVESTMENT PLAN

If your Common Shares are registered directly with the Fund or if you hold your Common Shares with a brokerage firm that participates in the Fund's Dividend Reinvestment Plan (the "Plan"), unless you elect, by written notice to the Fund, to receive cash distributions, all dividends, including any capital gain distributions, on your Common Shares will be automatically reinvested by PFPC Inc. (the "Plan Agent"), in additional Common Shares under the Plan. If you elect to receive cash distributions, you will receive all distributions in cash paid by check mailed directly to you by PFPC Inc., as the dividend paying agent.

If you decide to participate in the Plan, the number of Common Shares you will receive will be determined as follows:

- (1) If Common Shares are trading at or above net asset value ("NAV") at the time of valuation, the Fund will issue new shares at a price equal to the greater of (i) NAV per Common Share on that date or (ii) 95% of the market price on that date.
- (2) If Common Shares are trading below NAV at the time of valuation, the Plan Agent will receive the dividend or distribution in cash and will purchase Common Shares in the open market, on the NYSE or elsewhere, for the participants' accounts. It is possible that the market price for the Common Shares may increase before the Plan Agent has completed its purchases. Therefore, the average purchase price per share paid by the Plan Agent may exceed the market price at the time of valuation, resulting in the purchase of fewer shares than if the dividend or distribution had been paid in Common Shares issued by the Fund. The Plan Agent will use all dividends and distributions received in cash to purchase Common Shares in the open market within 30 days of the valuation date except where temporary curtailment or suspension of purchases is necessary to comply with federal securities laws. Interest will not be paid on any uninvested cash payments.

You may elect to opt-out of or withdraw from the Plan at any time by giving written notice to the Plan Agent, or by telephone at (800) 331-1710, in accordance with such reasonable requirements as the Plan Agent and Fund may agree upon. If you withdraw or the Plan is terminated, you will receive a certificate for each whole share in your account under the Plan, and you will receive a cash payment for any fraction of a share in your account. If you wish, the Plan Agent will sell your shares and send you the proceeds, minus brokerage commissions.

The Plan Agent maintains all Common Shareholders' accounts in the Plan and gives written confirmation of all transactions in the accounts, including information you may need for tax records. Common Shares in your account will be held by the Plan Agent in non-certificated form. The Plan Agent will forward to each participant any proxy solicitation material and will vote any shares so held only in accordance with proxies returned to the Fund. Any proxy you receive will include all Common Shares you have received under the Plan.

There is no brokerage charge for reinvestment of your dividends or distributions in Common Shares. However, all participants will pay a pro rata share of brokerage commissions incurred by the Plan Agent when it makes open market purchases.

Automatically reinvesting dividends and distributions does not mean that you do not have to pay income taxes due upon receiving dividends and distributions. Capital gains and income are realized although cash is not received by you. Consult your financial advisor for more information.

If you hold your Common Shares with a brokerage firm that does not participate in the Plan, you will not be able to participate in the Plan and any dividend reinvestment may be effected on different terms than those described above.

The Fund reserves the right to amend or terminate the Plan if in the judgment of the Board of Trustees the change is warranted. There is no direct service charge to participants in the Plan; however, the Fund reserves the right to amend the Plan to include a service charge payable by the participants. Additional information about the Plan may be obtained by writing PFPC Inc., 301 Bellevue Parkway, Wilmington, Delaware 19809.
