EXTENSITY, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

1. Basis of Presentation

The accompanying unaudited condensed consolidated financial statements reflect all adjustments (consisting only of normal recurring adjustments) which, in the opinion of management, are necessary for a fair presentation of the financial results for the periods shown. The balance sheet as of December 31, 2000 was derived from audited financial statements, but does not include all necessary disclosures required by generally accepted accounting principles.

These condensed consolidated financial statements should be read in conjunction with the audited financial statements and notes thereto included in the Company's report on Form 10-K (File No. 000-28897), filed with the Securities and Exchange Commission (the "SEC") on March 30, 2001.

The condensed consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries, Extensity Europe Limited, which commenced operations in September 1999, and Extensity Australia PTY Limited, which commenced operations in February of 2001. All significant intercompany balances and transactions have been eliminated in consolidation.

The results of operations for the current interim period are not necessarily indicative of the results to be expected for the entire current year or other future interim periods.

2. Net Loss Per Share

Basic and diluted net loss per share are computed using the weighted average number of common shares outstanding. Options and warrants were not included in the computation of diluted net loss per share because the effect would be antidilutive.

4

The following table sets forth the computation of basic and diluted net loss per share for the periods indicated (in thousands, except per share data):

Three Months Ended June 30,		Six Months Ended June 30,	
-----	-----	-----	-----
2001	2000	2001	2000
-----	-----	-----	-----

Edgar Filing: EXTENSITY INC - Form 10-Q

Numerator:				
Net loss	\$ (6,733)	\$ (8,865)	\$ (14,232)	\$ (18,202)
Denominator:				
Weighted average shares	24,422	23,629	24,309	20,735
Weighted average unvested common shares	(687)	(1,157)	(747)	(1,195)
	-----	-----	-----	-----
Total weighted average shares	23,735	22,472	23,562	19,540
	-----	-----	-----	-----
Basic and diluted net loss per share	\$ (0.28)	\$ (0.39)	\$ (0.60)	\$ (0.93)
	=====	=====	=====	=====

Diluted net loss per share does not include the effect of the following potential common shares at June 30, 2001 and 2000 (in thousands):

	June 30	
	-----	-----
	2001	2000
	-----	-----
Shares issuable under stock options	3,737	3,575
Shares of unvested stock subject to repurchase	388	1,058
Shares issuable pursuant to warrants to purchase common stock	20	160
	-----	-----
	4,145	4,793
	=====	=====

The weighted-average exercise price of stock options outstanding was \$5.75 and \$4.88 as of June 30, 2001 and 2000, respectively. The weighted average repurchase price of unvested stock was \$1.64 and \$1.91 as of June 30, 2001 and 2000, respectively. The weighted average exercise price of warrants was \$14.50 and \$3.30 as of June 30, 2001 and 2000, respectively.

3. Significant Customers

For the three months ended June 30, 2001, sales to three customers accounted for 21%, 13% and 12% of total revenues. For the three months ended June 30, 2000, sales to two customers accounted for 17% and 14% of total revenues. For the six months ended June 30, 2001, sales to one customer accounted for 12% of total revenues. For the six months ended June 30, 2000, sales to one customer accounted for 17% of total revenues.

4. Stock Option Exchange

Pursuant to a Tender Offer Statement filed with the SEC on May 4, 2001, employees surrendered for cancellation 1,744,400 options to purchase shares of the Company's common stock at exercise prices ranging from \$5.44 to \$38.81. In exchange, the Company on June 5, 2001 granted short-term options to purchase 174,440 shares of the Company's common stock at an exercise price of \$8.82 covering ten percent (10%) of the number of shares that were cancelled. The short-term Options will become 100% vested six months after the date of grant and will expire if not exercised before March 5, 2002 or earlier if employment is terminated.

On a date between December 6, 2001 and December 12, 2001, subject to continued employment, the Company will grant a new option ("New Option") equal to ninety percent (90%) of the number of shares that were cancelled. The exercise price of the New Option will be equal to the closing price of the Company's Common Stock on the date of grant.

Edgar Filing: EXTENSITY INC - Form 10-Q

The grant of short-term options will result in compensation charges over the nine-month life of the options as prescribed under the provisions of FIN No. 44, "Accounting for Certain Transactions Involving Stock Compensation". The compensation expense associated with such options amounted to approximately \$37,000 during the quarter ended June 30, 2001.

5. Comprehensive Loss

The components of comprehensive loss are as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2001	2000	2001	2000
Net Loss	\$(6,733)	\$(8,865)	\$(14,232)	\$(18,202)
Foreign currency translation adjustment	3	16	3	19
Total comprehensive loss	(6,730)	(8,849)	(14,229)	(18,183)

6. Recent Accounting Pronouncements

In July of 2001 the Financial Accounting Standards Board (FASB) issued SFAS No. 141 "Business Combinations" and SFAS No. 142 "Goodwill and Other Intangible Assets". SFAS No. 141 requires business combinations initiated after June 30, 2001 to be accounted for using the purchase method of accounting, and broadens the criteria for recording intangible assets separately from goodwill. Recorded goodwill and intangibles will be evaluated against these new criteria and may result in certain intangibles being subsumed into goodwill, or alternatively, amounts initially recorded as goodwill may be separately identified and recognized apart from goodwill. SFAS No. 142 requires the use of a non-amortization approach to account for purchased goodwill and certain intangibles. Under a non-amortization approach, goodwill and certain intangibles will not be amortized into results of operations, but instead would be reviewed for impairment and written down and charged to results of operations only in the periods in which the recorded value of goodwill and certain intangibles is more than its fair value. The provisions of each statement, which apply to goodwill and intangible assets acquired prior to June 30, 2001, will be adopted by the Company on January 1, 2002. We do not expect the adoption of these accounting standards to result in a significant impact on our financial position or results of operations for any historic transactions.

7. Subsequent Event

In July of 2001, the Company took steps to reduce expenses which included reducing full-time equivalent employees at the Company by approximately 23% through mandatory staff reductions. The Company is also evaluating a reduction in its lease commitments for office space, as well as write downs of certain assets. The Company expects to incur a related pretax charge in the range of \$3 - \$5 million in the third quarter of 2001.

ITEM 2: Management's Discussion and Analysis of Financial Condition and Results of Operations

THIS REPORT CONTAINS FORWARD-LOOKING STATEMENTS WITHIN THE MEANING OF SECTION

Edgar Filing: EXTENSITY INC - Form 10-Q

27A OF THE SECURITIES ACT OF 1933 AND SECTION 21E OF THE SECURITIES EXCHANGE ACT OF 1934, INCLUDING, WITHOUT LIMITATION, STATEMENTS REGARDING THE COMPANY'S EXPECTATIONS, BELIEFS, INTENTIONS, OR FUTURE STRATEGIES THAT ARE SIGNIFIED BY THE WORDS "EXPECTS," "ANTICIPATES," "INTENDS," "BELIEVES," OR SIMILAR LANGUAGE. ALL FORWARD-LOOKING STATEMENTS INCLUDED IN THIS DOCUMENT ARE BASED ON INFORMATION AVAILABLE TO THE COMPANY ON THE DATE HEREOF, AND THE COMPANY ASSUMES NO OBLIGATION TO UPDATE ANY SUCH FORWARD LOOKING STATEMENTS. ACTUAL RESULTS COULD DIFFER MATERIALLY FROM THOSE PROJECTED IN THE FORWARD-LOOKING STATEMENTS. IN EVALUATING THE COMPANY'S BUSINESS, PROSPECTIVE INVESTORS SHOULD CAREFULLY CONSIDER THE INFORMATION SET FORTH BELOW UNDER THE CAPTION "RISK FACTORS" IN ADDITION TO THE OTHER INFORMATION SET FORTH HEREIN. THE COMPANY CAUTIONS INVESTORS THAT ITS BUSINESS AND FINANCIAL PERFORMANCE ARE SUBJECT TO SUBSTANTIAL RISKS AND UNCERTAINTIES.

The following discussion and analysis of our financial condition and results of operations should be read in conjunction with our Summary of Condensed Consolidated Financial Statements, our condensed consolidated financial statements and related notes included in this report, and Management's Discussion and Analysis of Financial Condition and Results of Operations and related financial information contained in the Company's Form 10-K (File No. 000-28897).

OVERVIEW

Extensity was formed in November 1995 and introduced its first commercial product for general availability in March 1998. During this period, our operating activities consisted of the design and development of our product architecture and our first application, the building of our corporate infrastructure, and the development of our professional services and customer support organizations. Our first application, Extensity Expense Reports, was released for general availability in March 1998. We released Extensity Travel Plans in December 1998 and Extensity Timesheets and Extensity Purchase Reqs in July 1999. Extensity Connect, our portalized application front end, role-based reporting tool, and content and commerce gateway was released in March 2000.

We generate revenue principally from licensing our applications and providing related services, including product installation, maintenance and support, consulting and training. We license our applications individually or as an integrated suite of products. The pricing of our software and services fluctuates on a per transaction basis depending on various factors, such as the number of seats covered by a contract and the degree of customization requested by the particular customer. The dollar amounts of our contracts depend on the number of users and applications being used and the professional services requested.

Our software products typically require significant customization, installation and other services. Prior to the release in July 1999 of Version 4.0 of our application suite, it was difficult to generate dependable estimates of the costs necessary to complete product implementations. Therefore, we accounted for our software licenses and implementation revenues using the completed contract method of contract accounting as required under the provisions of SOP 97-2, "Software Revenue Recognition," and SOP 81-1, "Accounting for Performance of Construction-Type and Certain Production-Type Contracts."

Following the release of Version 4.0 in July 1999, we were able to generate dependable estimates of the costs necessary to complete product implementations. Consequently, we accounted for our software licenses and implementation revenues using the percentage-of-completion method of contract accounting. In the intervening year, we released several new versions of our software culminating in our most recent release of version 5.6 which further simplified the implementation process. We have also formed relationships with several

Edgar Filing: EXTENSITY INC - Form 10-Q

implementation partners who have performed a significant number of implementations over the last year. As a result, implementations of our software have been further streamlined and are no longer deemed essential to the functionality of the software. Further, an increasing trend of software sales without accompanying services have allowed us to further develop vendor specific objective evidence for the fair value of our software licenses. Therefore, in the third quarter of 2001, we will recognize license revenue on shipment and recognize implementation revenue as services are performed.

7

We defer amounts billed for maintenance and recognize such amounts ratably over the maintenance period.

In the second quarter of 2001, JD Edwards, a reseller of Extensity's products, and the Company jointly decided to change their relationship from a reseller to a referral arrangement. This event resulted in the Company accelerating recognition of revenue of approximately \$1.1 million in prepaid royalties that would have been recognized in the third and fourth quarters of 2001.

Payments received in advance of revenue recognition are recorded as deferred revenues. All of our customers enter into one-year maintenance and support contracts when they purchase their initial Extensity applications and have the option to purchase additional contracts after completion of the initial contract period. Although we do not grant any rights to our customers to return products, we do provide warranties that our products will function according to written documentation.

We promote and sell our software products through our direct sales force and through indirect channels, including Elite Information Group and Item4you.com, a joint venture between Terra Network and Meta4. We also have marketing referral arrangements in place with Cisco Systems, JD Edwards, IBM, Commerce One, WebEx, Digital Think, EventSource, Visa, GetThere.com, Pro Act Technologies and Elcom.

In February of 2001, we opened a sales office in Sydney, Australia. However, in July of 2001, after close evaluation of our business model and the current economic climate, we decided to close the Sydney office. We have continued to support our European operations in advance of anticipated revenues, though we have also significantly reduced costs in this geography. We do, however, expect our costs for establishing international sales to exceed related revenues as we invest in international operations. For the six months ended June 30, 2001, revenues derived from our international sales represented 12.2% of the total revenues.

Results of Operations

The following table sets forth certain statement of operations data in absolute dollars for the periods indicated. The data has been derived from the condensed consolidated financial statements contained in this report. The operating results discussed below do not include the amortization of non-cash stock based compensation. These amounts are discussed separately within this discussion.

8

	\$ 55	\$ 1,157	\$ 348	\$ 1,157

REVENUES

Total revenues increased to \$9.1 million for the three months ended June 30, 2001 from \$5.3 million for the three months ended June 30, 2000, an increase of 71%. Total revenues increased to \$18.9 million for the six months ended June 30, 2001 from \$9.0 million for the six months ended June 30, 2000, an increase of 109%. For the three months ended June 30, 2001, sales to three customers accounted for 21%, 13% and 12% of total revenues. For the three months ended June 30, 2000, sales to two customers accounted for 17% and 14% of total revenues. For the six months ended June 30, 2001, sales to one customer accounted for 12% of total revenues. For the six months ended June 30, 2000, sales to one customer accounted for 17% of total revenues.

License Revenues. Our license revenues increased to \$5.7 million for the three months ended June 30, 2001 from \$3.0 million for the three months ended June 30, 2000, an increase of 86%. Our license revenues increased to \$11.7 million for the six months ended June 30, 2001 from \$5.3 million for the six months ended June 30, 2000, an increase of 122%. In the three months ended June 30, 2001, \$1.9 million of license revenues were recognized through the Company's relationship with a reseller. The Company and the reseller jointly decided to change their relationship from a reseller to a referral arrangement. The increase in the six months ended June 30, 2001, was attributable to our growing customer

base and an increase in the revenue attributable to our indirect sales channels and to a lesser extent, an increase in the average size of the sales contracts entered into by our customers.

Service and Maintenance Revenues. Our service and maintenance revenues increased to \$3.5 million for the three months ended June 30, 2001 from \$2.3 million for the three months ended June 30, 2000, an increase of 51%. Our service and maintenance revenues increased to \$7.3 million for the six months ended June 30, 2001 from \$3.8 for the six months ended June 30, 2000, an increase of 91%. This increase was attributable to our growing customer base, an increase in professional services revenues recognized on a time and materials basis, an increase in revenues recognized from work performed on partner integration, and to a lesser extent, an increase in the average size of the sales contracts that customers have signed.

COST OF REVENUES

Total cost of revenues was \$3.7 million for the three months ended June 30, 2001 and June 30, 2000. Total cost of revenues increased to \$8.2 million for the six months ended June 30, 2001 from \$6.7 million for the six months ended June 30, 2000, an increase of 23%.

Cost of License Revenues. Cost of license revenues consists primarily of third-party license and support fees and, to a lesser extent, costs of duplicating media and documentation and shipping. This cost increased to \$263,000 for the three months ended June 30, 2001 from \$131,000 for the three months ended June 30, 2000, due primarily to increased sales activity. The cost increased to \$708,000 for the six months ended June 30, 2001 from \$215,000 for the six months ended June 30, 2001 due primarily to increased sales activity. As a percentage of license revenues, cost of license revenues increased to 5% for the three months ended June 30, 2001 from 4% for the three months ended June 30, 2000. As a percentage of license revenues, cost of license revenues increase to 6% for the six months ended June 30, 2001 from 4% for the six months ended June 30, 2000. Cost of revenues as a percentage of license revenue may increase over the current level in the future as we incorporate additional third-party products into our offerings.

Cost of Service and Maintenance Revenues. Cost of service and maintenance revenues consists of compensation and related overhead costs for personnel engaged in consulting, training, maintenance and support services for our customers as well as costs for third parties contracted to provide such services to our customers. This cost decreased to \$3.4 million for the three months ended June 30, 2001 from \$3.6 million for the three months ended June 30, 2000, a decrease of 4%. This cost increased to \$7.5 million for the six months ended June 30, 2001 from \$6.4 million for the six months ended June 30, 2001, an increase of 16%. As a percentage of service revenues, cost of service revenues decreased to 99% for the three months ended June 30, 2001 from 156% for the three months ended June 30, 2000. As a percentage of service revenues, cost of service revenues decreased to 103% for the six months ended June 30, 2001 from 170% for the six months ended June 30, 2000. Approximately 56% of the increase for the six months ended June 30, 2001 in the cost of service revenues was due to our hiring of additional service and maintenance personnel. These additional costs were necessary to support our expanding customer base. Total costs of service and maintenance revenues for the three months ended June 30, 2001 were approximately equal to total service revenues for the same period. Total costs exceeded our service and maintenance revenues for the six months period ended June 30, 2001 as we have built our consulting and customer support groups in advance of growing contract volume. We are seeking to further reduce our cost of service revenues as a percentage of total revenue and are also seeking to engage third parties to provide a substantial portion of services related to our

Edgar Filing: EXTENSITY INC - Form 10-Q

applications.

OPERATING EXPENSES

Sales and Marketing. Sales and marketing expenses consist primarily of compensation and related costs for sales and marketing personnel, including commissions and marketing program costs. Sales and marketing expenses increased to \$7.0 million for the three months ended June 30, 2001 from \$6.4 million for the three months ended June 30, 2000, an increase of 9%. Sales and marketing expenses increased to \$14.8 million for the six months ended June 30, 2001 from \$12.0 million for the six months ended June 30, 2000, an increase of 23%. As a percentage of total revenues, sales and marketing expenses decreased to 77% for the three months ended June 30, 2001 from 120% for the three months ended June 30, 2000. As a percentage of total revenues, sales and marketing expenses decreased to 78% for the six months ended June 30, 2001 from 133% for the six months ended June 30, 2000. The increase in sales and marketing expenses for

10

both periods was attributable to increased compensation, commissions and other related costs associated with hiring additional sales representatives, management and marketing personnel. We expect sales and marketing expenses to decrease in the near term. Sales and marketing expenses may increase in the long term as we expand our domestic and international sales force and increase our marketing efforts to capitalize on the growth of our market.

Research and Development. Research and development expenses consist primarily of compensation and related personnel costs, and fees associated with contractors. Research and development expenses increased to \$3.9 million for the three months ended June 30, 2001 from \$3.2 million for the three months ended June 30, 2000, an increase of 24%. Research and development costs increased to \$7.7 million for the six months ended June 30, 2001 from \$6.0 million for the six months ended June 30, 2000, an increase of 28%. As a percentage of total revenues, research and development expenses decreased to 43% for the three months ended June 30, 2001 from 59% for the three months ended June 30, 2000. As a percentage of total revenues, research and development expenses decreased to 41% for the six months ended June 30, 2001 from 66% for the six months ended June 30, 2000. Approximately 60% of the cost increase for the three months ended June 30, 2001 and six months ended June 30, 2001 was attributable to the addition of personnel and costs related to contractors, and approximately 40% of the increase was attributable to expenses associated with localizing our products. These increases resulted from our continuing efforts to add enhancements to our existing software applications and to develop software applications that incorporate new functionality into our integrated suite. We expect research and development expenses to decrease in the near term. Research and development expenses may increase in the long term as we make additional investments in our technology and products.

General and Administrative. General and administrative expenses consist primarily of compensation and related costs for our executive, finance and administrative personnel and other related expenses. General and administrative expenses increased to \$1.8 million for the three months ended June 30, 2001 from \$1.2 million for the three months ended June 30, 2000, an increase of 60%. General and administrative expenses, excluding the non-recurring charge, increased to \$3.5 million for the six months ended June 30, 2001 from \$2.3 million for the six months ended June 30, 2000, an increase of 52%. For the six months ended June 30, 2001 non-recurring general and administrative expenses were \$377,000. These expenses were incurred in connection with exploring potential merger and acquisition transactions. The entire charge was expensed in the three months ended March 31, 2001 as these discussions were terminated. As a percentage of total revenues, general and administrative expenses decreased to 20% for the three months ended June 30, 2001 from 22% for the three months ended June 30, 2000. As a percentage of total revenues, general and administrative

Edgar Filing: EXTENSITY INC - Form 10-Q

expenses, excluding the non-recurring charge, decreased to 19% for the six months ended June 30, 2001 from 26% for the six months ended June 30, 2000. Approximately 40% of the increase in general and administrative expenses in the three-month period ended June 30, 2001 and the six month period ended June 30, 2001 was attributable to hiring additional financial, human resources and internal information technology personnel. We expect general and administrative expenses to decrease in the near term. General and administrative expenses may increase in the long term as we expand our operations.

AMORTIZATION OF NON-CASH STOCK BASED COMPENSATION

Prior to our IPO, we granted certain stock options to our officers and employees at prices deemed to be below the fair value of the underlying stock. The cumulative difference between the fair value of the underlying stock at the date the options were granted and the exercise price of the granted options was \$12.1 million as of the IPO date. This amount is being amortized, using the accelerated method of FASB Interpretation No. 28, Accounting for Stock Appreciation Rights and Other Variable or Award Plans, over the four-year vesting period of the granted options. Accordingly, our results of operations will include deferred compensation expense at least through 2003. We recognized \$55,000 of this expense for the three months ended June 30, 2001 and \$1.2 million for the three months ended June 30, 2000. We recognized \$348,000 for the six months ended June 30, 2001 and \$2.7 million for the six months ended June 30, 2000.

INTEREST INCOME, NET

Interest income, net was \$687,000 for the three months ended June 30, 2001 and \$1.4 million for the three months ended June 30, 2000. Interest income, net was \$1.8 million for the six months ended June 30, 2001 and \$2.4 million for the six months ended June 30, 2000. Interest income is attributed to interest earned on the proceeds from the Company's IPO. Interest income will fluctuate depending upon the overall interest rate environment and our cash, cash equivalent balances and short-term investments.

11

LIQUIDITY AND CAPITAL RESOURCES

Since inception, we have financed our operations and funded our capital expenditures through funds raised from our initial public offering completed in January 2000 and the private sale of equity securities, supplemented by loan facilities and equipment leases. Aggregate net proceeds from private equity financings totaled \$42.3 million and proceeds from the Company's IPO were \$83.3 million, net of offering costs of approximately \$2.2 million. As of June 30, 2001 we had \$59.9 million in cash, cash equivalents and short-term investments and \$50.6 million in working capital.

Net cash used in operating activities was \$18.2 million for the six months ended June 30, 2001 and \$11.0 million for the six months ended June 30, 2000. For the six months ended June 30, 2001, cash used in operating activities was primarily attributable to a net loss of \$14.2 million, adjusted for depreciation and amortization of \$1.4 million and amortization of deferred stock compensation and other of \$433,000, a decrease in deferred revenue of \$7.1 million and a decrease in accrued liabilities of \$1.2 million offset by a decrease in accounts receivable of \$3.0 million. For the six months ended June 30, 2000, cash used in operating activities was primarily attributed to a net loss of \$18.2 million, adjusted for the amortization of deferred stock compensation of \$2.7 million and offset by an increase in accounts payable of \$2.1 million, an increase in accrued liabilities of \$2.3 million and an increase in deferred revenue of \$3.0 million.

Edgar Filing: EXTENSITY INC - Form 10-Q

Net cash provided by investing activities was \$15.3 million for the six months ended June 30, 2001 and net cash used in investing activities was \$40.0 million for the six months ended June 30, 2000. For the six months ended June 30, 2001, investing activities consisted primarily of a decrease in short-term investments of \$17.0 million offset by capital expenditures of \$1.7 million. For the six months ended June 30, 2000, investing activities consisted primarily of an increase in short-term investments and capital expenditures.

Net cash provided by financing activities was \$105,000 for the six months ended June 30, 2001 due to payments on notes payable and capital lease obligations of \$839,000, offset by proceeds from employee stock plans of \$944,000. Net cash provided by financing activities was \$83.2 million for the six months ended June 30, 2000, primarily due to the net proceeds of \$83.3 million from the Company's IPO.

Presently, we anticipate that our existing capital resources will meet our operating and investing needs for at least the next 12 months. After that time, we cannot be certain that additional funding will be available on acceptable terms or at all. While we do not presently anticipate a need for additional capital, if we do require additional capital resources to grow our business, execute our operating plans, or acquire complementary technologies or businesses at any time in the future, we may seek to sell additional equity or debt securities or secure additional lines of credit, which may result in additional dilution to our stockholders.

RISK FACTORS

The following is a discussion of certain factors that currently impact or may impact our business, operating results and/or financial condition. Any investment in our common stock involves a high degree of risk. You should consider carefully the following information about these risks, together with the risks and other information contained in the Company's annual filing on Form 10-K (File No.000-28897) and its periodic reports filed pursuant to the Exchange Act in evaluating our business. The market price of our common stock could decline, and you may lose all or part of the money you paid to buy our common stock.

RISKS RELATED TO OUR BUSINESS

OUR LIMITED OPERATING HISTORY AND THE FACT THAT WE OPERATE IN A NEW INDUSTRY MAKE OUR BUSINESS PROSPECTS DIFFICULT TO EVALUATE.

We were incorporated in November 1995 and commenced licensing of our software applications in March 1998. An investor in our common stock must consider the risks, uncertainties, expenses and difficulties frequently

12

encountered by companies in their early stages of development, particularly companies in new and rapidly evolving markets such as the market for Internet-based software applications. Risks and difficulties include our ability to:

- expand our base of customers with fully installed and deployed systems that can serve as reference accounts for our ongoing sales efforts;
- expand our pipeline of sales prospects in order to promote greater predictability in our period-to-period sales levels;
- continue to offer new products that complement our existing product line, in order to make our suite of applications more attractive to customers;

Edgar Filing: EXTENSITY INC - Form 10-Q

- continue to develop and upgrade our technology to add additional features and functionality;
- continue to attract and retain qualified personnel;
- expand sales channels through geographic expansion and the development of indirect channels such as relationships with OEM customers and distributors;
- increase awareness of our brand; and
- maintain our current and develop new third-party relationships, including but not limited to third-party implementers.

The Company may not be able to successfully address these risks or difficulties and our business strategy may not be successful. If we fail to address these risks or difficulties adequately, our business will likely suffer.

WE HAVE A HISTORY OF LOSSES AND NEGATIVE CASH FLOW AND EXPECT THIS TO CONTINUE FOR THE CURRENT FISCAL YEAR.

Our business is new; we have offered products for a relatively short period of time; and our base of customers and prospective customers is still relatively small. We have spent significant funds to date to develop our current products and to develop our sales and market resources. We have incurred significant operating losses and have not achieved profitability. As of June 30, 2001, we had an accumulated deficit of \$88.7 million. We expect to continue to invest in research and development to enhance current products and develop future products. We also plan to continue to grow our sales force and to spend funds in marketing to promote our company and our products. As a result, we will need to increase our revenues significantly to achieve profitability. In addition, because we expect to continue to invest in our business ahead of anticipated future revenues, we expect that we will continue to incur operating losses through the current fiscal year.

OUR BUSINESS IS CHANGING RAPIDLY, WHICH COULD CAUSE OUR QUARTERLY OPERATING RESULTS TO VARY AND OUR STOCK PRICE TO FLUCTUATE.

Our revenues and operating results may vary significantly from quarter to quarter due to a number of factors, many of which are beyond our control. We expect to continue to expend significant sums in all areas of our business, particularly in our sales and marketing operations, in order to promote future growth. Because the expenses associated with these activities are relatively fixed in the short-term, we may be unable to adjust spending quickly enough to offset any unexpected shortfall in revenue growth or any decrease in revenue levels. As a result, we expect our quarterly operating results to fluctuate. Moreover, because we use the percentage-of-completion method of contract accounting on all new contracts with a service component, if our professional service organization is unable to implement our applications for use by customers within our anticipated time frames, our recognition of revenue for those customers could be deferred, which could cause our quarterly revenue to fluctuate. Our financial results may, as a consequence of quarterly revenue fluctuations, fall short of the expectations of public market analysts or investors. If this occurs, the price of our common stock may drop.

We also seek to develop and maintain a significant pipeline of potential sales prospects, but it is difficult to predict when individual customer orders will be closed. Our base of customers and the number of additional customer

Edgar Filing: EXTENSITY INC - Form 10-Q

licenses we enter into each quarter are still relatively small. Accordingly, the loss or deferral of a small number of anticipated large customer orders in any quarter could result in a significant shortfall in revenues for that quarter and future quarters, which could result in a drop in the price of our stock.

Other important factors that could cause our quarterly results and stock price to fluctuate materially include:

- our ability to grow our customer base and our base of referencing customers, in light of our relatively limited number of customers to date;
- our ability to successfully develop alternative sales channels for our products, such as sales through OEM customers or distributors,
- our ability to expand our implementation and consulting resources through third-party relationships, in light of the fact that we have limited third-party implementation and consulting relationships currently in place; and
- technical difficulties or "bugs" affecting the operation of our software.

Due to our limited operating history, the early stage of our market and the factors discussed above, you should not rely on quarter-to-quarter comparisons of our results of operations as indicators of our future performance.

OUR BUSINESS WILL SUFFER IF WE DO NOT SIGNIFICANTLY EXPAND OUR SALES CAPABILITIES.

We sell our workforce optimization applications primarily through our direct sales force. We must significantly expand our direct sales operations to increase our revenues. We cannot be certain that we will be successful in these efforts. Our products and services require sophisticated sales efforts and our ability to increase our direct sales operation will depend on our ability to recruit, train and retain top sales people with effective sales skills and advanced technical knowledge. Competition for qualified personnel is intense in our industry. Moreover, new sales personnel require training and take time to achieve full productivity. If we are unable to hire or retain qualified sales personnel, if newly hired personnel fail to develop the necessary skills, or if they reach productivity more slowly than anticipated, we may be unable to grow our revenues as rapidly as planned, if at all, and our business could be harmed.

WE FACE INTENSE COMPETITION, WHICH COULD AFFECT OUR ABILITY TO INCREASE REVENUE, MAINTAIN OUR MARGINS AND INCREASE MARKET SHARE.

The market for our Internet-based workforce optimization applications is intensely competitive and we expect competition to increase in the future. Competitors vary in size and in the scope and breadth of the products and services they offer. Companies offering one or more products directly competitive with our products include Ariba, Captura Software, Concur Technologies, IBM, PeopleSoft Corporation and Oracle Corporation. As a result of the large market opportunity for workforce optimization applications, we also expect competition from other established and emerging companies.

Many of our current and potential competitors have longer operating histories, significantly greater financial, technical, marketing and other resources, significantly greater name recognition, and a larger installed base of customers than us. In addition, many of our competitors have well-established relationships with our current and potential customers and have extensive knowledge of our industry. Current and potential competitors have established or may establish cooperative relationships among themselves or with third parties

Edgar Filing: EXTENSITY INC - Form 10-Q

to increase the ability of their products to address customer needs. Accordingly, it is possible that new competitors or alliances among competitors may emerge and rapidly acquire significant market share. We also expect that competition will increase as a result of industry consolidation. Increased competition may result in price reductions, reduced margins and loss of market share, any one of which could seriously harm our business.

IF WE DO NOT PROVIDE SOFTWARE APPLICATIONS AND RELATED SERVICES THAT MEET THE CHANGING DEMANDS OF OUR CUSTOMERS, THE MARKET FOR OUR PRODUCTS WILL NOT GROW OR MAY DECLINE, AND OUR PRODUCT SALES WILL SUFFER.

14

To successfully implement our business strategy, we have to provide software applications and related services that meet the demands of our customers and prospective customers as the market and customer requirements evolve. We expect that competitive factors will create a continuing need for us to improve and add to our suite of software applications. Not only will we have to expend significant funds and other resources to continue to improve our existing suite of applications, but we must also properly anticipate, address and respond to customer preferences and demands. As organizations' needs change with respect to their enterprise applications, our existing suite of software applications may become obsolete or inefficient relative to our competitors' offerings and may require modifications or improvements. The addition of new products and services will also require that we continue to improve the technology underlying our applications. These requirements could be significant, and we may fail to fulfill them quickly and efficiently. If we fail to expand the breadth of our applications quickly in response to customer needs or if these offerings fail to achieve market acceptance, the market for our products will not grow or may decline, and our business may suffer significantly.

Our workforce optimization software products and related services have accounted for all of our revenues to date. We anticipate that revenues from these products and related services will continue to constitute substantially all of our revenues for the foreseeable future. Consequently, our future financial performance will depend, in significant part, upon the successful development, introduction and customer acceptance of enhanced versions of our workforce optimization applications and any new products or services that we may develop or acquire. We cannot assure you that we will be successful in enhancing, upgrading or continuing to effectively market our workforce optimization applications or that any new products or services that we may develop or acquire will achieve market acceptance.

EVOLVING TECHNOLOGICAL DEVELOPMENTS AND EMERGING INDUSTRY STANDARDS WILL REQUIRE US TO ENHANCE THE FUNCTIONALITY OF OUR WORKFORCE OPTIMIZATION APPLICATIONS, AND ANY INABILITY TO ENHANCE FUNCTIONALITY COULD CAUSE OUR SALES TO DECLINE.

Because the market for our products is emerging and subject to rapid technological change and evolving industry standards, the life cycles of our products are difficult to predict. Competitors may introduce new products or enhancements to existing products employing new technologies, which could render our existing products and services obsolete and unmarketable. For example, our currently available software applications are written entirely in the Java computer language. While we believe that this provides our solution with significant advantages in terms of functionality and flexibility, the market for Java-based software is still relatively new and it is not clear whether Java-based systems will continue to maintain commercial acceptance.

To be successful, our products and services must keep pace with technological developments and emerging industry standards, address the ever-changing and increasingly sophisticated needs of our customers and achieve market acceptance. Our results of operations would be seriously harmed if we are

Edgar Filing: EXTENSITY INC - Form 10-Q

unable to develop, release and market new software product enhancements on a timely and cost-effective basis, or if new products or enhancements do not achieve market acceptance or fail to respond to evolving industry or technology standards.

In developing new products and services, we may also fail to develop and market products that respond to technological changes or evolving industry standards in a timely or cost-effective manner, or experience difficulties that could delay or prevent the successful development, introduction and marketing of these new products and services.

OUR REVENUES HAVE BEEN DERIVED FROM A RELATIVELY SMALL NUMBER OF CUSTOMERS, AND THE LOSS OF A SMALL NUMBER OF MAJOR CUSTOMERS OR POTENTIAL CUSTOMERS COULD ADVERSELY IMPACT OUR REVENUES OR OPERATING RESULTS.

We licensed our first workforce optimization application in March 1998 and have fully implemented our applications for only a limited number of customers to date due to the time required to implement. Moreover, as of June 30, 2001, we had not completed an implementation of our Extensity Purchase Reqs application for any customer. We expect that we will continue to derive a significant portion of our revenues from a relatively small number of customers in the future. Accordingly, the loss of a small number of major customers could materially and adversely affect our business, and the deferral or loss of anticipated orders from a small number of prospective customers could materially and adversely impact our revenues and operating results in any period.

15

IF WE FAIL TO MAINTAIN POSITIVE MARGINS ON SERVICE REVENUES IN THE FORESEEABLE FUTURE, OUR RESULTS OF OPERATIONS COULD SUFFER.

For the three months ended June 30, 2001, our service margins were positive. While we anticipate that our margins will continue to be positive in the current year, we cannot guarantee that they will remain positive. Failure to achieve positive margins on service revenues could cause our business to suffer. For more information related to our costs associated with our service revenues, see "Management's Discussion and Analysis of Financial Condition and Results of Operations."

WE HAVE LIMITED EXPERIENCE WITH LARGE-SCALE IMPLEMENTATIONS, WHICH ARE IMPORTANT TO OUR FUTURE SUCCESS.

We have limited experience in implementing our applications on a large scale. As of June 30, 2001, our largest implementation included approximately 13,400 employee users. We believe that the ability of large customers to roll-out our products across large numbers of users is critical to our future success. If our customers cannot successfully deploy our applications on a large scale, or if they determine for any reason that our products cannot accommodate large-scale deployments, our business could be harmed.

IF WE FAIL TO EXPAND OUR RELATIONSHIPS WITH THIRD PARTIES THAT CAN PROVIDE IMPLEMENTATION AND CONSULTING SERVICES TO OUR CUSTOMERS, WE MAY BE UNABLE TO GROW OUR REVENUES AND OUR BUSINESS COULD BE HARMED.

In order for us to focus more effectively on our core business of developing and licensing software solutions, we must continue to establish relationships with third parties that can provide implementation and consulting services to our customers. Third-party implementation and consulting firms can also be influential in the choice of workforce optimization applications by new customers. To date, we have established relationships with a few third-party implementation and consulting firms. In general, however, if we are unable to establish and maintain effective, long-term relationships with implementation

Edgar Filing: EXTENSITY INC - Form 10-Q

and consulting providers, or if these providers do not meet the needs or expectations of our customers, we may be unable to grow our revenues and our business could be seriously harmed. As a result of the limited resources and capacities of many third-party implementation providers, we may be unable to attain sufficient focus and resources from the third-party providers to meet all of our customers' needs, even if we establish relationships with these third parties. If sufficient resources are unavailable, we will be required to provide these services internally, which could limit our ability to expand our base of customers. A number of our competitors have significantly more established relationships with these third parties and, as a result, these third parties may be more likely to recommend competitors' products and services rather than our own. Even if we are successful in developing additional relationships with third-party implementation and consulting providers, we will be subject to significant risk, as we cannot control the level and quality of service provided by third-party implementation and consulting partners.

CUSTOMER SATISFACTION AND DEMAND FOR OUR PRODUCTS WILL DEPEND ON OUR ABILITY TO EXPAND OUR PROFESSIONAL SERVICES ORGANIZATION.

We believe that growth in our product sales depends on our ability to provide our customers with professional services to assist with support, training, consulting and initial implementation and deployment of our products and to educate third-party systems integrators in the use of our products. As a result, we may need to increase the number of professional services personnel to meet these needs. New professional services personnel will require training and take time to reach full productivity. We may not be able to attract or retain a sufficient number of highly qualified professional services personnel. Competition for qualified professional services personnel is intense due to the limited number of people who have the requisite knowledge and skills. To meet our customers' needs for professional services, we may also need to use more costly third-party consultants to supplement our own professional services group. In addition, we could experience delays in recognizing revenue if our professional services group fails to complete implementations in a timely manner.

16

OUR EXPECTATIONS OF FUTURE GROWTH DEPEND ON OUR ABILITY TO EXPAND INTERNATIONALLY, AND FACTORS SPECIFIC TO OUR INTERNATIONAL EXPANSION MAY PREVENT US FROM ACHIEVING OUR ANTICIPATED GROWTH.

Over time, we intend to expand our international operations to achieve our anticipated growth, but we may face significant challenges to our international expansion. The expansion of our existing international operations and entry into additional international markets will require significant management attention and financial resources. To achieve broad acceptance in international markets, our products must be localized to handle a variety of factors specific to each international market, such as tax laws and local regulations. The incorporation of these factors into our products is a complex process and often requires assistance from third parties. We have limited experience in localizing our products and we may not adequately address all of the factors necessary to achieve broad acceptance in our target international markets. Further, to achieve broad usage by employees across international organizations, our products must be localized to handle native languages and cultures in each international market. Localizing our products is also a complex process and we intend to work with third parties to develop localized products. To date, we have localized our product for the markets where English language is the native language and completed translations for the German, French, Italian and Spanish languages.

We have only a limited history of marketing, selling and supporting our

Edgar Filing: EXTENSITY INC - Form 10-Q

products and services internationally. In 1999, we opened a regional office in the United Kingdom and established a relationship with an international reseller. In 2000, we expanded our European Operations through opening a second office in Frankfurt, Germany. As of June 30, 2001, we had a total of 30 employees in our international operations. For the six months ended June 30, 2001, we derived 12% of our revenues from our international operations. To succeed internationally, we must react quickly to the business environment in which we operate overseas. Thus we must effectively monitor the size of our international workforce and make adjustments as necessary. During periods of growth we must hire and train experienced international personnel as well as recruit and retain qualified domestic personnel to staff and manage our international operations. However, we may experience difficulties in recruiting and training additional international staff. We must also be able to enter into strategic relationships with companies in international markets. If we are not able to maintain successful strategic relationships internationally or recruit additional companies to enter into strategic relationships, our future growth could be limited. We also face other risks inherent in conducting business internationally, such as:

- difficulties in collecting accounts receivable and longer collection periods;
- seasonal business activity in certain parts of the world;
- fluctuations in currency exchange rates; and
- trade barriers.

Any of these factors could seriously harm our international operations and, consequently, our business.

WE ARE GROWING RAPIDLY, AND OUR FAILURE TO MANAGE THIS GROWTH COULD HARM OUR BUSINESS.

We have experienced a period of significant growth. Our full-time employees increased from 83 at December 31, 1998 to 175 at December 31, 1999 to 289 at December 31, 2000 to 297 at June 30, 2001. Our revenues have grown 265% between fiscal 1999 and 2000. We expect that any future growth would cause increased strains on our resources. As part of this growth, we will have to continually enhance our operational and financial systems, procedures and controls; expand, train and manage our employee base; and maintain close coordination among our

17

technical, accounting, finance, marketing and sales staffs. As discussed in the Notes to Consolidated Financial Statements in July of 2001, the Company took steps to reduce expenses which included reducing full time equivalent employees at the Company by approximately 23% through staff reductions. If we are unable to manage our growth effectively, our business, results of operations and financial condition could be adversely affected.

WE MAY BE UNABLE TO ATTRACT AND RETAIN HIGHLY SKILLED EMPLOYEES THAT ARE NECESSARY FOR THE SUCCESS OF OUR GROWTH PLAN.

In addition to our dependence on our sales and professional services personnel as previously discussed, our ability to execute our growth plan and be successful also depends on our continued ability to attract and retain highly skilled employees. We depend on the services of senior management and other personnel, particularly Robert A. Spinner, our Chief Executive Officer. As we continue to grow, we will need to hire additional personnel in all operational areas. Competition for personnel in our industry is intense. We have in the past experienced, and we expect to continue to experience in the future, difficulty

Edgar Filing: EXTENSITY INC - Form 10-Q

in hiring and retaining highly skilled employees with appropriate qualifications. If we do not succeed in attracting or retaining personnel, our business could be adversely affected.

OUR SALES CYCLES ARE LONG AND UNPREDICTABLE, WHICH MAKES PERIOD-TO-PERIOD REVENUES DIFFICULT TO PREDICT.

Because the market for our workforce optimization software products and related services is new, we experience long and unpredictable sales cycles. The sales cycle for our workforce optimization applications typically ranges from two to nine months. In the early stages of this market, our customers have frequently viewed the purchase of our products as part of a long-term strategic decision regarding the management of their workforce-related operations and expenditures. This decision process has sometimes resulted in customers taking a long period of time to assess alternative solutions by our competitors or deferring a purchase decision until the market evolves. Sales cycles continue to be long and the timing of purchase decisions by individual customers remain at times uncertain. We must continue to educate potential customers on the use and benefits of our products and services, as well as the integration of our products and services with additional software applications utilized by the individual customers. Because the sales cycle is long and the time of individual orders is uncertain, our period-to-period revenues are difficult to predict.

SOFTWARE DEFECTS COULD LEAD TO LOSS OF REVENUE OR DELAY THE MARKET ACCEPTANCE OF OUR APPLICATIONS.

Our enterprise applications software is complex and, accordingly, may contain undetected errors or failures when first introduced or as new versions are released. This may result in loss of, or delay in, market acceptance of our products. We have in the past discovered software errors in our new releases and new products after their introduction. In the event that we experience significant software errors in future releases, we could experience delays in release, customer dissatisfaction and potentially lost revenues during the period required to correct these errors. We may in the future discover errors, and additional scalability limitations, in new releases or new products after the commencement of commercial shipments. Any of these errors or defects could cause our business to be materially harmed.

WE MAY BECOME INCREASINGLY DEPENDANT ON THIRD-PARTY SOFTWARE INCORPORATED IN OUR PRODUCTS AND, IF SO, IMPAIRED RELATIONS WITH THESE THIRD PARTIES, ERRORS IN THIRD-PARTY SOFTWARE OR INABILITY TO ENHANCE THE SOFTWARE OVER TIME COULD HARM OUR BUSINESS.

We incorporate third-party software into our products. Currently, the third-party software we use includes application server software that we license from BEA Systems, off-line database software from Pointbase, off-line client server software from PUMATECH and synchronization software from AETHER Systems. We may incorporate additional third-party software into our products as we expand our product line and broaden the content and services accessible through our gateway. The operation of our products would be impaired if errors occur in the third-party software that we license. It may be more difficult for us to correct any errors in third-party software because the software is not within our control. Accordingly, our business would be adversely affected in the event

18

of any errors in this software. Furthermore, it may be difficult for us to replace any third-party software if a vendor seeks to terminate our license to the software.

OUR SUCCESS DEPENDS IN PART UPON OUR ABILITY TO PROTECT OUR INTELLECTUAL PROPERTY, WE MAY NOT BE ABLE TO DO SO ADEQUATELY.

Edgar Filing: EXTENSITY INC - Form 10-Q

Our success depends in large part upon our proprietary technology. We rely on a combination of copyright, trademark and trade secret protection, confidentiality and nondisclosure agreements and licensing arrangements to establish and protect our intellectual property rights. We license rather than sell our solutions and require our customers to enter into license agreements, which impose restrictions on their ability to utilize the software. In addition, we seek to avoid disclosure of our trade secrets through a number of means, including requiring those persons with access to our proprietary information to execute nondisclosure agreements with us and restricting access to our source code. We seek to protect our software, documentation and other written materials under trade secret and copyright laws, which afford only limited protection.

Despite our efforts to protect our proprietary rights, unauthorized parties may attempt to copy aspects of our products or to obtain and use information that we regard as proprietary. Policing unauthorized use of our products is difficult, and while we are unable to determine the extent to which piracy of our software products exists, software piracy can be expected to be a persistent problem. In addition, the laws of some foreign countries do not protect our proprietary rights to as great an extent as do the laws of the United States. Our means of protecting our proprietary rights may not be adequate and our competitors may independently develop similar technology, duplicate our products, or design around our proprietary intellectual property.

WE MAY FACE COSTLY DAMAGES OR LITIGATION COSTS IF A THIRD PARTY CLAIMS THAT WE INFRINGE ITS INTELLECTUAL PROPERTY.

There has been a substantial amount of litigation in the software industry and the Internet industry regarding intellectual property rights. It is possible that in the future, third parties may claim that we or our current or potential future products infringe upon their intellectual property. We expect that software product developers and providers of Internet-based software applications will increasingly be subject to infringement claims as the number of products and competitors in our industry segment grows and the functionality of products in different industry segments overlaps. Any claims, with or without merit, could be time consuming, result in costly litigation, cause product shipment delays or require us to enter into royalty or licensing agreements. Royalty or licensing agreements, if required, may not be available on terms acceptable to us or at all, which could seriously harm our business.

ANY FUTURE ACQUISITIONS OF COMPANIES OR TECHNOLOGIES MAY RESULT IN DISTRACTION OF OUR MANAGEMENT AND DISRUPTIONS TO OUR BUSINESS.

We may acquire or make investments in complementary businesses, technologies, services or products if appropriate opportunities arise. From time to time we may engage in discussions and negotiations with companies regarding our acquiring or investing in such companies' businesses, products, services or technologies. We cannot make assurances that we will be able to identify future suitable acquisition or investment candidates, or if we do identify suitable candidates, that we will be able to make such acquisitions or investments on commercially acceptable terms or at all. If we acquire or invest in another company, we could have difficulty assimilating that company's personnel, operations, technology or products and service offerings. In addition, the key personnel of the acquired company may decide not to work for us. These difficulties could disrupt our ongoing business, distract our management and employees, increase our expenses and adversely affect our results of operations. Furthermore, we may incur indebtedness or issue equity securities to pay for any future acquisitions. The issuance of equity securities could be dilutive to our existing stockholders.

WE HAVE ANTI-TAKEOVER PROVISIONS IN OUR CHARTER AND IN OUR CONTRACTS THAT COULD DELAY OR PREVENT AN ACQUISITION OF OUR COMPANY, EVEN IF SUCH AN ACQUISITION

Edgar Filing: EXTENSITY INC - Form 10-Q

WOULD BE BENEFICIAL TO OUR STOCKHOLDERS.

Provisions of our certificate of incorporation, our bylaws, Delaware law and the employment agreements of some of our key officers could make it more difficult for a third party to acquire us, even if doing so might be beneficial to our stockholders.

19

OUR BUSINESS MAY FACE ADDITIONAL RISKS AND UNCERTAINTIES NOT PRESENTLY KNOWN TO US, WHICH WOULD CAUSE OUR BUSINESS TO SUFFER.

In addition to the risks specifically identified in this Risk Factors section or elsewhere in this Quarterly Report, we may face additional risks and uncertainties not presently known to us or that we currently deem immaterial which ultimately may impair our business, results of operations and financial condition.

RISKS RELATED TO OUR INDUSTRY

OUR SUCCESS WILL DEPEND UPON THE GROWTH AND ACCEPTANCE OF THE MARKET WE ADDRESS AND OUR ABILITY TO MEET THE NEEDS OF THE EMERGING MARKET FOR SOLUTIONS.

The market for our workforce optimization applications and services is at an early stage of development. Our success will depend upon the continued development of this market and the increasing acceptance by customers of the benefits to be provided by workforce optimization applications and services. In addition, as the market evolves, it is unclear whether the market will accept our suite of applications as a preferred solution for workforce optimization needs. Accordingly, our products and services may not achieve significant market acceptance or realize significant revenue growth. Unless a critical mass of organizations and their suppliers use our solutions and recommend them to new customers, our solutions may not achieve widespread market acceptance, which may cause our business to suffer.

CUSTOMERS MAY NOT ACCEPT THE INTERNET AS A MEANS TO ACCESS ENTERPRISE APPLICATIONS, AND THIS WOULD LIKELY CAUSE OUR BUSINESS MODEL TO BE UNSUCCESSFUL.

To date, enterprises have generally managed operational functions through internal computer or manual systems rather than over the Internet. Our business model assumes that enterprises and their employees will increasingly adopt the Internet or corporate intranets as a means of managing important business functions. This business model is not yet proven, and if we are unable to successfully implement our business model, our business will be materially adversely affected.

MARKET PRICES OF TECHNOLOGY COMPANIES HAVE BEEN HIGHLY VOLATILE, AND THE MARKET FOR OUR STOCK MAY CONTINUE TO BE VOLATILE AS WELL.

The stock market has experienced significant price and trading volume fluctuations especially this past year, and the market prices of technology companies generally, and Internet-related software companies particularly, have been extremely volatile. Recent initial public offerings by technology companies, including ours, have been accompanied by exceptional share price and trading volume changes. Technology companies that have been publicly traded for a long period of time have also experienced extreme fluctuations in the price of their common stock. Investors may not be able to resell their shares at or above the price they paid for the stock. In the past, following periods of volatility in the market price of a public company's securities, securities class action litigation has often been instituted against the company. Such litigation could result in substantial costs and diversion of management's attention and resources.

SECURITY RISKS AND CONCERNS MAY DETER THE USE OF THE INTERNET FOR CONDUCTING ELECTRONIC COMMERCE.

A significant barrier to electronic commerce and communications is the secure transmission of confidential information over public networks. Advances in computer capabilities, new discoveries in the field of cryptography or other events or developments could result in compromises or breaches of our security systems or those of other websites that protect proprietary information. If any well-publicized compromises of security were to occur, it could have the effect of substantially reducing the use of the Internet for commerce and communications. Anyone who circumvents our security measures could misappropriate proprietary information or cause interruptions in our services or operations. The Internet is a public network, and data is sent over this network from many sources. In the past, computer viruses and software programs that disable or impair computers have been distributed and have rapidly spread over the Internet. Computer viruses could be introduced into our systems or those of our customers or suppliers, which could disrupt our software solutions or make them inaccessible to customers or suppliers. We may be required to expend

20

significant capital and other resources to protect against the threat of security breaches or to alleviate problems caused by breaches. To the extent that our activities may involve the storage and transmission of proprietary information, such as credit card numbers, security breaches could expose us to a risk of loss or litigation and possible liability. Our security measures may be inadequate to prevent security breaches, and our business would be harmed if we do not prevent them.

INCREASING GOVERNMENT REGULATION COULD LIMIT THE MARKET FOR, OR IMPOSE SALES AND OTHER TAXES ON THE SALE OF, OUR PRODUCTS AND SERVICES.

As Internet commerce evolves, we expect that federal, state or foreign agencies will adopt regulations covering issues such as user privacy, pricing, taxation of goods and services provided over the Internet, and content and quality of products and services. It is possible that legislation could expose companies involved in electronic commerce to liability, which could limit the growth of electronic commerce generally. Legislation could dampen the growth in Internet usage and decrease its acceptance as a communications and commercial medium. If enacted, these laws, rules or regulations could limit the market for our products and services.

ITEM 3. Quantitative and Qualitative Disclosures about Market Risk

We develop products in the United States and market our products in North America and, to a lesser extent, in Europe and the rest of the world. As a result, our financial results could be affected by factors such as changes in foreign currency rates or weak economic conditions in foreign markets. Because the majority of our revenues are currently denominated in U.S. dollars, a strengthening of the dollar could make our products less competitive in foreign markets.

INTEREST RATE RISK

We have an investment portfolio of money market funds and fixed income certificates of deposit. The fixed income certificates of deposit, like all fixed income securities, are subject to interest rate risk and will fall in value if market interest rates increase. We attempt to limit this exposure by investing primarily in short-term securities. In view of the nature and mix of our total portfolio, a 10% movement in market interest rates would not have a significant impact on the total value of our portfolio as of June 30, 2001.

PART II. OTHER INFORMATION

ITEM 1. Legal Proceedings

The Company is not involved in any legal proceedings that are material to its business or financial condition.

ITEM 2. Changes in Securities and Use of Proceeds

- a. Not applicable
- b. Not applicable
- c. Not applicable
- d. Use of proceeds from sale of Registered Securities.

On January 27, 2000, the SEC declared effective the Company's Registration Statement on Form S-1/A. Pursuant to this Registration Statement, the Company completed an initial public offering of 4,600,000 shares of its common stock (including 600,000 shares sold pursuant to the exercise of the Underwriters' over-allotment option) at an initial public offering price of \$20.00 per share ("the Offering"). Proceeds to the Company, after deduction of the underwriters' discount and commission, from the Offering totaled approximately \$83.3 million, net of offering costs of approximately \$2.2 million.

21

To date we have used \$76.7 million to fund working capital. All remaining proceeds are invested in cash, cash equivalents, or short-term investments consisting of highly liquid money market funds, commercial paper, government/federal notes and bonds, certificates of deposit, and auction rate preferred stock. The use of these proceeds does not represent a material change in the use of proceeds described in the prospectus.

Upon completion of the Offering, the Company's preferred stock was converted into 14,594,549 shares of common stock. Upon conversion of the preferred stock, all rights to accrued and unpaid dividends were terminated.

ITEM 3. Defaults Upon Senior Securities

None.

ITEM 4. Submission of Matters To a Vote of Security Holders

The Company's annual meeting of stockholders was held on June 1, 2001 (the "Annual Meeting"). The following matters were voted upon at the Annual Meeting:

Proposal I - To elect directors to hold office until the 2002 Annual Meeting of Stockholders and until their successors are elected.

	FOR	WITHHELD AUTHORITY
	-----	-----
Robert A. Spinner	18,047,223	757,725
Sharam I. Sasson	18,734,880	70,068
Christopher D. Brennan	18,734,884	70,064
John R. Hummer	18,734,837	70,111
David A. Reed	18,734,884	70,064
Ted E. Schlein	18,734,880	70,068
Maynard G. Webb	18,734,880	70,068

Edgar Filing: EXTENSITY INC - Form 10-Q

Proposal II - To ratify selection of PricewaterhouseCoopers LLP as independent auditors of the Company for its fiscal year ending December 31, 2001.
