Investments in funds involve risks. Additional risks are associated with international investing, such as government regulations and differences in liquidity which may increase the volatility of your investment. Foreign security markets generally exhibit greater price volatility and are less liquid than the US market. Additionally, this fund focuses its investments in certain geographical regions, thereby increasing its vulnerability to developments in that region and potentially subjecting the fund's shares to greater price volatility.

Closed-end funds, unlike open-end funds, are not continuously offered. There is a one time public offering and once issued, shares of closed-end funds are sold in the open market through a stock exchange. Shares of closed-end funds frequently trade at a discount to net asset value. The price of the fund's shares is determined by a number of factors, several of which are beyond the control of the fund. Therefore, the fund cannot predict whether its shares will trade at, below or above net asset value.

This announcement is not an offer to purchase or the solicitation of an offer to sell shares of the Fund or a prospectus, circular or representation intended for use in the purchase or sale of Fund shares.
