**Table of Contents****KIRKLAND'S, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)****Note 1 Basis of Presentation**

Kirkland's, Inc. (the Company) is a specialty retailer of home décor with 291 stores in 32 states as of August 1, 2009. The consolidated financial statements of the Company include the accounts of Kirkland's, Inc. and its wholly-owned subsidiaries, Kirkland's Stores, Inc. and Kirklands.com, Inc. Significant intercompany accounts and transactions have been eliminated.

The accompanying unaudited consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles for interim financial information and with instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and notes required by U.S. generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments, including normal recurring adjustments, considered necessary for a fair presentation have been included. These financial statements should be read in conjunction with the audited financial statements included in the Company's Annual Report on Form 10-K filed with the Securities and Exchange Commission on April 20, 2009.

It should be understood that accounting measurements at interim dates inherently involve greater reliance on estimates than those at fiscal year end. In addition, because of seasonality factors, the results of the Company's operations for the 13-week and 26-week periods ended August 1, 2009 are not indicative of the results to be expected for any other interim period or for the entire fiscal year. The Company's fiscal year ends on the Saturday closest to January 31, resulting in years of either 52 or 53 weeks. All references to a fiscal year refer to the fiscal year ending on the Saturday closest to January 31 of the following year.

The preparation of the consolidated financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. Actual results could differ from the estimates and assumptions used.

Changes in estimates are recognized in the period when new information becomes available to management. Areas where the nature of the estimate makes it reasonably possible that actual results could materially differ from amounts estimated include: impairment assessments on long-lived assets, inventory reserves, self-insurance reserves, income tax liabilities, stock-based compensation, gift certificate and gift card breakage, customer loyalty program accruals and contingent liabilities.

Certain prior period balances have been reclassified to conform to the current period presentation.

**Note 2 Income Taxes**

The Company calculates its annual effective tax rate in accordance with Statement of Financial Accounting Standards No. 109, Accounting for Income Taxes. The seasonality of the Company's business is such that the Company expects to offset losses or minimal profits in the early periods of the fiscal year with the largest portion of earnings occurring in the fourth quarter of the year. For the 26-week period ended August 1, 2009, the Company recorded an income tax provision of 22.0% of income before income taxes. This rate differs from the statutory federal income tax rate primarily as a result of a reduction in the Company's valuation allowance against deferred tax assets, which resulted in a reduction of income tax expense by approximately \$0.6 million and \$1.6 million during the 13-week and 26-week periods ended August 1, 2009, respectively. In the prior year periods, the Company recorded an income tax provision of approximately \$9,000.

The Company records income tax liabilities utilizing known obligations and estimates of potential obligations. A deferred tax asset or liability is recognized whenever there are future tax effects from existing temporary differences and operating loss and tax credit carryforwards. The Company records a valuation allowance to reduce deferred tax assets to the balance that is more likely than not to be realized. Estimates and judgments must be made on future taxable income, considering feasible tax planning strategies and taking into account existing facts and circumstances, to determine the proper valuation allowance. When it is determined that deferred tax assets could be realized in greater or lesser amounts than recorded, the asset balance and income statement reflects the change in the period such determination is made. Due to changes in facts and circumstances and the estimates and judgments that are involved in determining the proper valuation allowance, differences between actual future events and prior estimates and

judgments could result in adjustments to this valuation allowance. An estimate of the annual effective tax rate is used at each interim period based on the facts and circumstances available at that time, while the actual effective tax rate is calculated at year-end.

**Table of Contents**

The Company provides for uncertain tax positions and the related interest and penalties, if any, based upon management's assessment of whether a tax benefit is more likely than not to be sustained upon examination by tax authorities. The Company recognizes interest and penalties accrued related to unrecognized tax benefits in income tax expense. To the extent the Company prevails in matters for which a liability for an unrecognized tax benefit is established or is required to pay amounts in excess of the liability, the Company's effective tax rate in a given financial statement period may be affected.

**Note 3 Earnings Per Share**

Basic earnings per share is computed by dividing net income or loss by the weighted average number of shares outstanding during each period presented, which excludes non-vested restricted stock. Diluted earnings per share is computed by dividing net income or loss by the weighted average number of shares outstanding plus the dilutive effect of stock equivalents outstanding during the applicable periods using the treasury stock method. The diluted loss per share amounts for the 13-week and 26-week periods ended August 2, 2008, were calculated using the same denominator as used in the basic loss per share calculation as the inclusion of dilutive securities in the denominator would have been anti-dilutive.

**Note 4 Commitments and Contingencies**

The Company is party to pending legal proceedings and claims. Although the outcome of such proceedings and claims cannot be determined with certainty, the Company's management is of the opinion that it is remote that these proceedings and claims will have a material effect on the financial condition, operating results or cash flows of the Company.

**Note 5 Assets Held for Sale**

At August 2, 2008, the Company owned a building and land in Jackson, Tennessee formerly used as its corporate headquarters which was idle and met the criteria in FASB Statement No. 144, Accounting for the Impairment or Disposal of Long-Lived Assets, to be classified as held for sale. As a result, the estimated net realizable value of the land and building that was held for sale was separately presented in the consolidated balance sheet at August 2, 2008. During the third quarter of fiscal 2008, the Company sold the building and land receiving net proceeds of approximately \$2.8 million.

**Note 6 Recent Accounting Pronouncements**

In fiscal 2008, the Company adopted SFAS 157, Fair Value Measurements, which provides a common definition of fair value, establishes a uniform framework for measuring fair value and requires expanded disclosures about fair value measurements. Pursuant to FASB Staff Position No. FAS 157-2, Effective Date of FASB Statement 157, or FSP 157-2, the Company adopted SFAS 157 as it relates to non-financial assets and liabilities on February 1, 2009. The adoption of FSP 157-2 did not have a material impact on the Company's financial statements at August 1, 2009.

In April 2009, the FASB issued FSP SFAS 107-1 and Accounting Principles Board (APB) Opinion No. 28-1, Interim Disclosures about Fair Value of Financial Instruments, which amends SFAS No. 107, Disclosures about Fair Value of Financial Instruments, and APB Opinion No. 28, Interim Financial Report, to require an entity to provide interim disclosures about the fair value of all financial instruments within the scope of SFAS No. 107 and to include disclosures related to the methods and significant assumptions used in estimating those instruments. This FSP is effective for interim and annual periods ending after June 15, 2009, and accordingly, the Company adopted it during the second quarter of 2009. Adoption of this FSP had no material impact on the Company's financial statements.

**Table of Contents**

In May 2009, the FASB issued Statement of Financial Accounting Standards ( SFAS ) No. 165, Subsequent Events. SFAS 165 provides general standards of accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued. The Company adopted the provisions of SFAS No. 165, which became effective for interim and annual reporting periods ending after June 15, 2009. Subsequent events have been evaluated through the time at which this Form 10-Q was filed with the SEC. No material subsequent events have occurred since August 1, 2009 that required recognition or disclosure in the Company's current period financial statements.

In June 2009, the FASB issued Statement of Financial Accounting Standards ( SFAS ) No. 168, The FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting Principles, a replacement of FASB Statement No. 162. The standard establishes the FASB Accounting Standards Codification (the Codification ) as the source of authoritative accounting principles recognized by the FASB to be applied by nongovernmental entities in the preparation of financial statements in conformity with GAAP, and is intended to simplify user access to all authoritative GAAP by providing all the authoritative literature related to a particular topic in one place. The Codification is effective for interim and annual periods ending after September 15, 2009 and as of the effective date, all existing accounting standard documents will be superseded. The Codification will be effective for the Company for the third quarter of fiscal 2009, and accordingly, the Company's Quarterly Report on Form 10-Q for the quarter ending October 31, 2009, and all subsequent public filings will reference the Codification as the sole source of authoritative literature.

**Note 7 Stock Based Compensation**

The Company maintains equity incentive plans under which it may grant non-qualified stock options, incentive stock options, restricted stock, restricted stock units, or stock appreciation rights to employees, non-employee directors and consultants.

The company granted 627,500 and 630,000 stock options for the 13-week and 26-week periods ended August 1, 2009. This compares to 489,999 stock options granted in the 13-week and 26-week periods ended August 2, 2008. Total stock-based compensation expense (a component of compensation and benefits) was \$443,000 for the 13-week period ended August 1, 2009 and \$563,000 for the 26-week period ended August 1, 2009 compared to \$91,000 and \$137,000 for the comparable periods last year. Compensation expense is recognized on a straight-line basis over the employee's vesting period. There have been no material changes in the assumptions used to compute compensation expense during the current quarter or year.

**ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

**General**

We are a specialty retailer of home décor in the United States, operating 291 stores in 32 states as of August 1, 2009. Our stores present a broad selection of distinctive merchandise, including framed art, mirrors, wall décor, candles, lamps, decorative accessories, accent furniture, textiles, garden accessories and artificial floral products. Our stores also offer an extensive assortment of holiday merchandise as well as items carried throughout the year suitable for gift-giving. In addition, we use innovative design and packaging to market home décor items as gifts. We provide our predominantly female customers an engaging shopping experience characterized by a diverse, ever-changing merchandise selection at surprisingly attractive prices. Our stores offer a unique combination of style and value that has led to our emergence as a recognized name in home décor and has enabled us to develop a strong customer franchise.

**Table of Contents**

During the 13-week period ended August 1, 2009, we opened five new stores and closed six stores. The following table summarizes our stores and square footage under lease by venue type:

*Net sales.* Net sales were flat at \$87.7 million for the second fiscal quarter of 2009 compared to \$87.7 million for the prior year period despite operating 34 fewer stores on average during the second fiscal quarter of 2009. We opened 5 new stores during the second quarter of fiscal 2009 and 3 new stores in fiscal 2008, and we closed 6 stores during the second quarter of fiscal 2009 compared to 39 stores in fiscal 2008. During the second quarter of fiscal 2009,

comparable store sales increased 6.1% as compared to a 2.8% increase in the prior year period. Comparable store sales in our off-mall store locations were up 6.3% for the second quarter, while comparable store sales for our mall store locations were up 5.5%. The comparable store sales increase was primarily due to a slight increase in customer traffic coupled with an increase in the conversion rate and an increase in the average ticket. The increase in the average ticket was the result of a higher average retail selling price, partially offset by a decline in items per transaction. The strongest performing merchandise categories were decorative accessories, wall décor, frames and gifts.

**Table of Contents**

*Gross profit.* Gross profit increased \$5.7 million, or 20.5%, to \$33.6 million for the second quarter of fiscal 2009 from \$27.9 million in the prior year period. Gross profit expressed as a percentage of total revenue increased to 38.3% for the second quarter of fiscal 2009, from 31.8% in the prior year period. The increase in gross profit as a percentage of total revenue was primarily driven by improved merchandise margins, which increased from 50.9% in the second quarter of fiscal 2008 to 53.8% in the second quarter of fiscal 2009. Merchandise margin is calculated as net sales minus product cost of sales and inventory shrinkage. Merchandise margin excludes outbound freight, store occupancy and central distribution costs. The increase in merchandise margin was the result of higher initial markups and a lower markdown rate. Initial markups increased primarily due to significantly lower ocean freight costs. Strong sell-through of merchandise resulting from a more compelling merchandise mix led to lower markdown rates. Store occupancy costs also decreased as a percentage of net sales. This decline resulted from favorable lease renewal terms, comparable store sales leverage, the closure of underperforming stores, and our continued shift to more productive off-mall real estate locations. Outbound freight costs decreased as a percentage of sales reflecting a decline in diesel costs and leverage from the comparable store sales increase.

*Compensation and benefits.* At the store-level, the compensation and benefits expense ratio decreased for the second quarter of fiscal 2009 as compared to the second quarter of 2008 primarily due to the positive comparable store sales performance. At the corporate level, the compensation and benefits ratio increased for the second quarter of 2009 as compared to the second quarter of 2008 primarily due to higher bonus accruals and increased stock compensation expense.

*Other operating expenses.* The slight increase in these operating expenses as a percentage of net sales was primarily the result of increased marketing expenses in the second quarter of fiscal 2009 as compared to the prior year period. This increase was partially offset by the positive comparable store sales performance and the leveraging effect on the fixed components of store and corporate operating expenses.

*Depreciation and amortization.* The decrease in depreciation and amortization as a percentage of sales reflects the large reduction in capital expenditures during fiscal 2008 and the overall decline in store count.

*Income tax provision.* We recorded income tax expense of approximately \$1.4 million, or 28.4% of pretax income during the second quarter of fiscal 2009, versus approximately \$9,000 tax expense recorded in the prior year quarter. Based on the results of the first half of fiscal 2009, we anticipate generating sufficient pre-tax income during fiscal 2009 to allow us to reverse the remaining valuation allowance that is recorded related to our deferred tax assets. During the 13-week period ended August 1, 2009, income tax expense was reduced \$0.6 million as a result of reducing the valuation allowance during the period. The ultimate effective rate that is recorded for fiscal 2009 will depend on our operating performance for the remaining two quarters of the year.

*Net income and earnings per share.* As a result of the foregoing, we reported net income of \$3.4 million, or \$0.17 per diluted share, for the second quarter of fiscal 2009 as compared to a net loss of \$1.7 million, or (\$0.09) per share, for the second quarter of fiscal 2008.

*Net sales.* Net sales decreased 0.4% to \$171.0 million for the first half of fiscal 2009 from \$171.8 million for the prior year period. The net sales decrease resulted primarily from the decrease in store count, partially offset by an increase in comparable store sales. We opened 8 new stores during the first half of fiscal 2009 and 3 new stores in fiscal 2008, and we closed 16 stores during the first half of 2009 and 39 stores in fiscal 2008. During the first half of fiscal 2009, comparable store sales increased 5.7% as compared to a 3.5% increase in the prior year period. Comparable store sales in our off-mall locations were up 5.3% for the first half, while comparable store sales for our mall store locations were up 6.8%. The comparable store sales increase was primarily due to a slight increase in customer traffic coupled with an increase in the conversion rate and an increase in the average ticket. The increase in the average ticket was the result of a higher average retail selling price, partially offset by a decline in items per transaction. The strongest performing merchandise categories were decorative accessories, wall décor, frames and gifts.

*Gross profit.* The increase in gross profit as a percentage of net sales resulted from a combination of factors. The merchandise margin increased from 51.2% in the first half of fiscal 2008 to 54.2% in the first half of fiscal 2009. Merchandise margin is calculated as net sales minus product cost of sales and inventory shrinkage. Merchandise margin excludes outbound freight, store occupancy and central distribution costs. The increase in merchandise margin was the result of higher initial markups and a more compelling merchandise offering, which resulted in fewer

markdowns. Initial markups increased primarily due to significantly lower ocean freight costs. Store occupancy costs also decreased as a percentage of net sales. This decline resulted from favorable lease renewal terms, comparable store sales leverage, the closure of underperforming stores, and our continued shift to more productive off-mall store locations. Outbound freight costs decreased as a percentage of sales reflecting a decline in diesel costs and leverage from the comparable store sales increase.

*Compensation and benefits.* At the store-level, the compensation and benefits expense ratio decreased for the first half of fiscal 2009 as compared to the first half of 2008 primarily due to the positive comparable store sales performance. At the corporate level, the compensation and benefits ratio increased for the first half of 2009 as compared to the first half of 2008 primarily due to higher bonus accruals and an increase in stock compensation expense .

**Table of Contents**

*Other operating expenses.* The decrease in these operating expenses as a percentage of net sales was primarily the result of the positive comparable store sales performance and the leveraging effect on the fixed components of store and corporate operating expenses.

*Depreciation and amortization.* The decrease in depreciation and amortization as a percentage of sales reflects the large reduction in capital expenditures during fiscal 2008 and the decline in overall store count.

*Income tax provision.* We recorded income tax expense of approximately \$1.9 million, or 22.0% of pretax income during the first half of fiscal 2009, versus approximately \$9,000 during the prior year period. Based on the results of the first half of fiscal 2009, we anticipate generating sufficient pre-tax income during the full year to allow us to reverse the remaining valuation allowance that is recorded related to our deferred tax assets. Our effective tax rate of 22.0% for the first half of fiscal 2009 takes into account the reversal of this remaining valuation allowance. During the 26-week period ended August 1, 2009, income tax expense was reduced \$1.6 million as a result of reducing the valuation allowance during the period. The ultimate effective rate that is recorded for the full year will depend on our operating performance for the remaining two quarters of the year.

*Net income and earnings per share.* As a result of the foregoing, we reported net income of \$6.9 million, or \$0.34 per diluted share, for the first half of fiscal 2009 as compared to a net loss of \$4.2 million, or (\$0.22) per share, for the first half of fiscal 2008.

**Liquidity and Capital Resources**

Our principal capital requirements are for working capital and capital expenditures. Working capital consists mainly of merchandise inventories offset by accounts payable, which typically reach their peak by the end of the third quarter of each fiscal year. Capital expenditures primarily relate to new store openings; existing store expansions, remodels or relocations; and purchases of equipment or information technology assets for our stores, distribution facilities and corporate headquarters. Historically, we have funded our working capital and capital expenditure requirements with internally generated cash and borrowings under our credit facility.

*Cash flows from operating activities.* Net cash provided by (used in) operating activities was \$6.7 million and (\$155,000) for the first half of fiscal 2009 and fiscal 2008, respectively. Cash flows from operating activities depend heavily on operating performance, changes in working capital and the timing and amount of payments for income taxes. The change in the amount of cash from operations as compared to the prior year period was primarily the result of the improvement in our operating performance and an increase in accounts payable, partially offset by an increase in income taxes paid. Accounts payable increased approximately \$3.6 million during the first half of fiscal 2009 as compared to a decrease of approximately \$2.0 million for the prior year period. The change in accounts payable is primarily due to the timing of payments and amount of merchandise receipt flow near period end. Cash tax payments for the first half of fiscal 2009 totaled approximately \$9.0 million whereas the Company received refunds of approximately \$2.9 million in the prior year period.

*Cash flows from investing activities.* Net cash used in investing activities for the first half of fiscal 2009 consisted principally of \$4.8 million in capital expenditures as compared to \$1.9 million for the prior year period. The capital expenditures primarily related to new store construction and the purchase of new point-of-sale software and other information technology assets. During the first half of fiscal 2009, we opened 8 stores. We expect that capital expenditures for all of fiscal 2009 will be approximately \$9 to \$10 million, primarily to fund the leasehold improvements of approximately 15 to 18 new stores and maintain and improve our investments in existing stores, our distribution center and information technology infrastructure. As of August 1, 2009, we had lease commitments to open 17 new stores, which includes the eight new stores opened during the first half of fiscal 2009. We anticipate that capital expenditures, including leasehold improvements and furniture and fixtures, and equipment for our new stores in fiscal 2009 will average approximately \$400,000 to \$450,000 per store. We also anticipate that we will receive landlord allowances in connection with the construction of our new stores in fiscal 2009. These allowances are reflected as a component of cash flows from operating activities within our consolidated statement of cash flows.

*Cash flows from financing activities.* Net cash provided by financing activities was approximately \$130,000 and \$47,000 for the first half of fiscal 2009 and fiscal 2008, respectively, and were related to the exercise of employee stock options as well as employee stock purchases.

**Table of Contents**

*Revolving credit facility.* Effective October 4, 2004, we entered into a five-year senior secured revolving credit facility with a revolving loan limit of up to \$45 million. On August 6, 2007, we entered into the First Amendment to Loan and Security Agreement (the Amendment) which provided the Company with additional availability under our borrowing base through higher advance rates on eligible inventory. As a result of the amendment, the aggregate size of the overall credit facility remained unchanged at \$45 million, but the term of the facility was extended two years making the new expiration date October 4, 2011. Amounts outstanding under the amended facility, other than First In Last Out (FILO) loans, bear interest at a floating rate equal to the 60-day LIBOR rate (0.52% at August 1, 2009) plus 1.25% to 1.50% (depending on the amount of excess availability under the borrowing base). FILO loans, which apply to the first approximately \$2 million borrowed at any given time, bear interest at a floating rate equal to the 60-day LIBOR rate plus 2.25% to 2.50% (depending on the amount of excess availability under the borrowing base). Additionally, we pay a quarterly fee to the bank equal to a rate of 0.2% per annum on the unused portion of the revolving line of credit. Borrowings under the facility are collateralized by substantially all of our assets and guaranteed by our subsidiaries. The maximum availability under the credit facility is limited by a borrowing base formula, which consists of a percentage of eligible inventory and receivables less reserves. The facility also contains provisions that could result in changes to the presented terms or the acceleration of maturity. Circumstances that could lead to such changes or acceleration include a material adverse change in the business or an event of default under the credit agreement. The facility has one financial covenant that requires the Company to maintain excess availability under the borrowing base, as defined in the credit agreement, of at least \$3.0 to \$4.5 million depending on the size of the borrowing base, at all times.

As of August 1, 2009, we were in compliance with the covenants in the facility and there were no outstanding borrowings under the credit facility, with approximately \$23.0 million available for borrowing (net of the availability block as described above). We do not anticipate any borrowings under the credit facility during fiscal 2009.

At August 1, 2009, our balance of cash and cash equivalents was approximately \$38.5 million and the borrowing availability under our facility was \$23.0 million (net of the availability block as described above). We believe that the combination of our cash balances, line of credit availability and cash flow from operations will be sufficient to fund our planned capital expenditures and working capital requirements for at least the next twelve months.

**Off-Balance Sheet Arrangements**

None.

**Significant Contractual Obligations and Commercial Commitments***Construction commitments*

The Company had commitments for new store construction projects totaling approximately \$3.6 million at August 1, 2009.

**Critical Accounting Policies and Estimates**

There have been no significant changes to our critical accounting policies during fiscal 2009. Refer to our Annual Report on Form 10-K for the fiscal year ended January 31, 2009, for a summary of our critical accounting policies.

We caution readers that the following important factors, among others, have in the past, in some cases, affected and could in the future affect our actual results of operations and cause our actual results to differ materially from the results expressed in any forward-looking statements made by us or on our behalf.

Our Performance May Be Affected by General Economic Conditions and the Current Global Financial Crisis.

A Prolonged Economic Downturn Could Result in Reduced Net Sales and Profitability.

We May Not Be Able to Successfully Anticipate Consumer Trends and Our Failure to Do So May Lead to Loss of Consumer Acceptance of Our Products Resulting in Reduced Net Sales.

The Market Price for Our Common Stock Might Be Volatile and Could Result in a Decline in the Value of Your Investment.

Our Comparable Store Net Sales Fluctuate Due to a Variety of Factors.

We Face an Extremely Competitive Specialty Retail Business Market, and Such Competition Could Result in a Reduction of Our Prices and a Loss of Our Market Share.

We Depend on a Number of Vendors to Supply Our Merchandise, and Any Delay in Merchandise Deliveries from Certain Vendors May Lead to a Decline in Inventory Which Could Result in a Loss of Net Sales.

We Are Dependent on Foreign Imports for a Significant Portion of Our Merchandise, and Any Changes in the Trading Relations and Conditions Between the United States and the Relevant Foreign Countries May Lead to a Decline in Inventory Resulting in a Decline in Net Sales, or an Increase in the Cost of Sales Resulting in Reduced Gross Profit.

Our Success Is Highly Dependent on Our Planning and Control Processes and Our Supply Chain, and Any Disruption in or Failure to Continue to Improve These Processes May Result in a Loss of Net Sales and Net Income.

Our Business Is Highly Seasonal and Our Fourth Quarter Contributes a Disproportionate Amount of Our Net Sales, Net Income and Cash Flow, and Any Factors Negatively Impacting Us During Our Fourth Quarter Could Reduce Our Net Sales, Net Income and Cash Flow, Leaving Us with Excess Inventory and Making It More Difficult for Us to Finance Our Capital Requirements.

We May Experience Significant Variations in Our Quarterly Results.

The Agreement Governing Our Debt Places Certain Reporting and Consent Requirements on Us Which May Affect Our Ability to Operate Our Business in Accordance with Our Business and Strategy.

We Are Highly Dependent on Customer Traffic in Malls and Shopping Centers, and Any Reduction in the Overall Level of Traffic Could Reduce Our Net Sales and Increase Our Sales and Marketing Expenses.

Our Hardware and Software Systems Are Vulnerable to Damage that Could Harm Our Business.

We Depend on Key Personnel, and if We Lose the Services of Any Member of Our Senior Management Team, We May Not Be Able to Run Our Business Effectively.
