DEVON ENERGY CORPORATION

(Exact name of registrant as specified in its charter)

Delaware

*(State of other jurisdiction of incorporation or
organization)*

73-1567067

(I.R.S. Employer identification No.)

20 North Broadway, Oklahoma City, Oklahoma

(Address of principal executive offices)

73102-8260

(Zip code)

Registrant's telephone number, including area code: (405) 235-3611

Former name, former address and former fiscal year, if changed from last report: Not applicable

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer

Smaller reporting
company

(Do not check if a smaller
reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).
Yes No

On October 28, 2010, 431.9 million shares of common stock were outstanding.

Table of Contents

DEFINITIONS

Measurements of Oil, Natural Gas and Natural Gas Liquids

NGL or NGLs means natural gas liquids.

Oil includes crude oil and condensate.

Bbl means barrel of oil. One barrel equals 42 U.S. gallons.

- MBbls means thousand barrels.

- MMBbls means million barrels.

- MBbls/d means thousand barrels per day.

Mcf means thousand cubic feet of natural gas.

- MMcf means million cubic feet.

- Bcf means billion cubic feet.

- MMcf/d means million cubic feet per day.

Boe means barrel of oil equivalent, determined by using the ratio of one Bbl of oil or NGLs to six Mcf of gas.

- MBoe means thousand Boe.

- MMBoe means million Boe.

- MBoe/d means thousand Boe per day.

Btu means British thermal units, a measure of heating value.

- MMBtu means million Btu.

- MMBtu/d means million Btu per day.

Geographic Areas

Canada means the operations of Devon encompassing oil and gas properties located in Canada.

International means the discontinued operations of Devon that encompass oil and gas properties that lie outside the United States and Canada.

North America Onshore means the operations of Devon encompassing oil and gas properties in the continental United States and Canada.

U.S. Offshore means the operations of Devon encompassing oil and gas properties in the Gulf of Mexico.

U.S. Onshore means the properties of Devon encompassing oil and gas properties in the continental United States.

Other

Federal Funds Rate means the interest rate at which depository institutions lend balances at the Federal Reserve to other depository institutions overnight.

Inside FERC refers to the publication Inside F.E.R.C.'s Gas Market Report.

LIBOR means London Interbank Offered Rate.

NYMEX means New York Mercantile Exchange.

SEC means United States Securities and Exchange Commission.

Table of Contents

INFORMATION REGARDING FORWARD-LOOKING STATEMENTS

This report includes forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. All statements other than statements of historical facts included or incorporated by reference in this report, including, without limitation, statements regarding our future financial position, business strategy, budgets, projected revenues, projected costs and plans and objectives of management for future operations, are forward-looking statements. Such forward-looking statements are based on our examination of historical operating trends, the information used to prepare the December 31, 2009 reserve reports and other data in our possession or available from third parties. In addition, forward-looking statements generally can be identified by the use of forward-looking terminology such as may, will, expect, intend, project, estimate, anticipate, believe, continue or similar terminology. Although we believe expectations reflected in such forward-looking statements are reasonable, we can give no assurance that such expectations will prove to have been correct. Important factors that could cause actual results to differ materially from our expectations include, but are not limited to, our assumptions about:

energy markets, including the supply and demand for oil, gas, NGLs and other products or services, and the prices of oil, gas, NGLs, including regional pricing differentials, and other products or services;

production levels, including Canadian production subject to government royalties, which fluctuate with prices and production, and International production governed by payout agreements, which affect reported production;

reserve levels;

competitive conditions;

technology;

the availability of capital resources within the securities or capital markets and related risks such as general credit, liquidity, market and interest-rate risks;

capital expenditure and other contractual obligations;

currency exchange rates;

the weather;

inflation;

the availability of goods and services;

drilling risks;

future processing volumes and pipeline throughput;

general economic conditions, whether internationally, nationally or in the jurisdictions in which we or our subsidiaries conduct business;

public policy and government regulatory changes, including changes in royalty, production tax and income tax regimes, changes in hydraulic fracturing regulation, changes in environmental regulation and liability under federal, state, local or foreign environmental laws and regulations;

terrorism;

occurrence, timing and completion of property acquisitions or divestitures; and

risk factors disclosed under Item 1A in our 2009 Annual Report on Form 10-K as well as other factors disclosed under Item 2. Properties Proved Reserves and Estimated Future Net Revenue, Item 7. Management s Discussion and Analysis of Financial Condition and Results of Operations, and Item 7A. Quantitative and Qualitative Disclosures About Market Risk.

All subsequent written and oral forward-looking statements attributable to Devon, or persons acting on its behalf, are expressly qualified in their entirety by the cautionary statements. We assume no duty to update or revise our forward-looking statements based on changes in internal estimates or expectations or otherwise.

Table of Contents

DEVON ENERGY CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

1. Summary of Significant Accounting Policies

The accompanying unaudited consolidated financial statements and notes of Devon Energy Corporation (Devon) have been prepared pursuant to the rules and regulations of the United States Securities and Exchange Commission. Pursuant to such rules and regulations, certain disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been omitted. The accompanying consolidated financial statements and notes should be read in conjunction with the consolidated financial statements and notes included in Devon s 2009 Annual Report on Form 10-K.

The unaudited interim consolidated financial statements furnished in this report reflect all adjustments that are, in the opinion of management, necessary to a fair statement of Devon s financial position as of September 30, 2010 and Devon s results of operations and cash flows for the three-month and nine-month periods ended September 30, 2010 and 2009.

2. Accounts Receivable

The components of accounts receivable include the following:

	September 30, 2010	December 31, 2009
	(In millions)	
Oil, gas and NGL sales	\$ 612	\$ 752
Marketing and midstream revenues	160	188
Joint interest billings	158	151
Production tax credits	85	110
Other	22	19
Gross accounts receivable	1,037	1,220
Allowance for doubtful accounts	(9)	(12)
Net accounts receivable	\$ 1,028	\$ 1,208

3. Derivative Financial Instruments

Devon periodically enters into commodity and interest rate derivative financial instruments. These instruments are used to manage the inherent uncertainty of future revenues due to oil, gas and NGL price volatility and to manage Devon s exposure to interest rate volatility. Devon has elected not to designate any of its derivative instruments for hedge accounting treatment.

The following table presents the derivative fair values included in the accompanying consolidated balance sheets.

		September 30, 2010	December 31, 2009
		(In millions)	
Balance Sheet Caption			
Asset derivatives:			
Commodity derivatives	Other current assets	\$ 493	\$ 172
Commodity derivatives	Other long-term assets	45	
Interest rate derivatives	Other current assets		39
Interest rate derivatives	Other long-term assets	48	131

Total asset derivatives		\$ 586	\$	342
Liability derivatives:				
Commodity derivatives	Other current liabilities	\$ 14	\$	38
Commodity derivatives	Other long-term liabilities	96		
Interest rate derivatives	Other current liabilities	38		
Total liability derivatives		\$ 148	\$	38

The following table presents the cash settlements and unrealized gains and losses on fair value changes included in the accompanying consolidated statements of operations associated with these derivative financial instruments. Cash settlements and unrealized gains and losses on fair value changes associated with Devon's commodity derivatives are presented in the Oil,

	September	December 31,
	30,	2009
	2010	2009
	(In millions)	
Derivative financial instruments	\$ 493	\$ 211
Inventories	141	182
Other	104	88
Other current assets	\$ 738	\$ 481

5. Property and Equipment**Offshore Divestitures**

In November 2009, Devon announced plans to reposition itself strategically as a North America onshore exploration and production company. As part of this strategic repositioning, Devon is bringing forward the value of its offshore assets by divesting them.

Closed Transactions

The following table presents Devon's offshore divestiture transactions that closed in the first nine months of 2010. Gross proceeds represent contract prices based upon a January 1, 2010 effective date for the Gulf of Mexico and Azerbaijan divestitures, a May 1, 2010 effective date for the China-Panyu divestiture, and a September 1, 2010

effective date for the China-Exploration divestiture. After-tax proceeds represent gross proceeds adjusted for customary purchase price adjustments, selling costs and income taxes. The purchase price adjustments consist primarily of net cash flow subsequent to the effective date of the divestitures. Proved reserves in the following table are based upon estimated proved reserves as of the divestiture dates.

Table of Contents

DEVON ENERGY CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

	Gross Proceeds	After-Tax Proceeds	Proved Reserves (MMBoe) (Unaudited)
	(In millions)		
Gulf of Mexico (continuing operations)	\$ 4,145	\$ 3,222	91
Azerbaijan (discontinued operations)	2,000	1,924	56
China Panyu (discontinued operations)	515	405	13
China Exploration (discontinued operations)	77	59	
Total	\$ 6,737	\$ 5,610	160

Proceeds from these divestitures are being used to retire debt and repurchase Devon common shares. Additionally, Devon is using divestiture proceeds to fund North America Onshore exploration and development opportunities, including a joint-venture investment in the Pike oil sands discussed below.

Under full cost accounting rules, sales or other dispositions of oil and gas properties are generally accounted for as adjustments to capitalized costs, with no recognition of gain or loss. However, if not recognizing a gain or loss on the disposition would otherwise significantly alter the relationship between a cost center's capitalized costs and proved reserves, then a gain or loss must be recognized.

The Gulf of Mexico divestitures presented above did not significantly alter such relationship for Devon's United States cost center. Therefore, Devon did not recognize a gain in connection with the Gulf of Mexico divestitures. The Azerbaijan divestiture included all of Devon's properties in its Azerbaijan cost center. As a result, Devon recognized a \$1.5 billion (\$1.5 billion after-tax) gain during the third quarter of 2010 in connection with the Azerbaijan divestiture. Panyu was Devon's only producing property in its China cost center. As a result, Devon recognized a \$308 million (\$235 million after-tax) gain in connection with the Panyu divestiture in the second quarter of 2010. No gain was recognized upon the divestiture of Devon's exploratory assets in China in the third quarter of 2010. These gains are included in earnings from discontinued operations in the accompanying 2010 consolidated statements of operations.

Pending Transaction

Devon has entered into an agreement to sell its assets in Brazil for \$3.2 billion. This transaction continues to progress through the approval process of the Brazilian government and is on track to close around the end of 2010. Devon expects to record a gain upon the close of the transaction.

Deepwater Drilling Rigs

As part of its offshore operations, Devon was leasing three deepwater drilling rigs. The Seadrill West Sirius and Ocean Endeavor deepwater drilling rigs were used in Devon's Gulf of Mexico operations. The Transocean Deepwater Discovery is being used in Devon's operations in Brazil.

In conjunction with the deepwater Gulf of Mexico divestiture that closed in the second quarter of 2010, the buyer assumed Devon's lease and remaining commitments for the Seadrill West Sirius rig. Subsequent to closing all its Gulf of Mexico divestitures, Devon agreed to pay \$31 million to the owner of the Ocean Endeavor rig to terminate the lease. The \$31 million lease termination cost is included in oil and gas property and equipment in the accompanying September 30, 2010, consolidated balance sheet. The buyer of Devon's assets in Brazil will assume Devon's lease and remaining commitments for the Transocean Deepwater Discovery rig when the divestiture transaction closes.

Oil Sands Joint Venture

In conjunction with certain offshore divestitures in the second quarter of 2010, Devon formed a heavy oil joint venture to operate and develop the Pike oil sands leases in Alberta, Canada. As a result, Devon acquired a 50 percent interest in the Pike oil sands leases for \$500 million. Devon will also fund \$155 million of Canadian dollar capital costs on behalf of its joint-venture partner in the form of a non-interest bearing promissory note. The majority of the

capital costs are expected to be paid during 2011 and 2012. See Note 7 for more information regarding the promissory note.

DEVON ENERGY CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

6. Goodwill

During the first nine months of 2010, Devon's Canadian goodwill increased \$47 million. This increase was entirely due to foreign currency translation.

Devon removed all its International goodwill in conjunction with the Azerbaijan divestiture that closed in the third quarter of 2010. Such goodwill totalled \$68 million and was presented in long-term assets held for sale in the accompanying December 31, 2009 consolidated balance sheet.

7. Debt**Commercial Paper**

Devon repaid \$1.4 billion of commercial paper borrowings during the first and second quarters of 2010 primarily with proceeds received from its Gulf of Mexico property divestitures.

In May 2010, Devon reduced the maximum allowed borrowings under its commercial paper program from \$2.85 billion to approximately \$2.2 billion. At September 30, 2010, Devon had no outstanding commercial paper borrowings.

\$350 Million 7.25% Senior Notes Due October 1, 2011

On June 25, 2010, Devon redeemed \$350 million of 7.25% senior notes prior to their scheduled maturity of October 1, 2011, primarily with proceeds received from its Gulf of Mexico divestitures. The notes were redeemed for \$384 million, which represented 100 percent of the principal amount, a make-whole premium of \$28 million and \$6 million of accrued and unpaid interest. On the date of redemption, these notes also had an unamortized premium of \$9 million. The \$28 million make-whole premium and \$9 million amortization of the remaining premium are included in interest expense in the accompanying 2010 consolidated statements of operations.

Non-Interest Bearing Promissory Note

On June 29, 2010, Devon issued a four-year \$155 million Canadian dollar non-interest bearing promissory note in connection with the formation of the Pike oil sands joint venture described in Note 5. The present value of the note was \$139 million on the issue date based upon an effective interest rate of 3.125%. At September 30, 2010, the note had a carrying value of \$143 million, of which \$59 million is presented as short-term debt and the remainder is presented as long-term debt in the accompanying consolidated balance sheet.

Credit Lines

In the second quarter of 2010, Devon cancelled its \$700 million Short-Term Facility prior to its November 2, 2010 maturity date. Devon incurred no cost to cancel the facility and will avoid paying the facility fee that pertains to the cancellation period.

Devon has a syndicated, unsecured revolving line of credit that can be accessed to provide liquidity as needed. The following schedule summarizes the capacity of Devon's Senior Credit Facility by maturity date, as well as its available capacity as of September 30, 2010 (in millions).

April 7, 2012 maturity	\$ 463
April 7, 2013 maturity	2,187
Total Senior Credit Facility	2,650
Less:	
Outstanding Senior Credit Facility borrowings	
Outstanding commercial paper borrowings	
Outstanding letters of credit	37
Total available capacity	\$ 2,613

Table of Contents

DEVON ENERGY CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

The Senior Credit Facility contains only one material financial covenant. This covenant requires Devon's ratio of total funded debt to total capitalization to be less than 65%. The credit agreement contains definitions of total funded debt and total capitalization that include adjustments to the respective amounts reported in the consolidated financial statements. Also, total capitalization is adjusted to add back noncash financial writedowns such as full cost ceiling impairments or goodwill impairments. As of September 30, 2010, Devon was in compliance with this covenant. Devon's debt-to-capitalization ratio at September 30, 2010, as calculated pursuant to the terms of the agreement, was 15.3%.

Interest Expense

The following schedule includes the components of interest expense.

	Three Months		Nine Months	
	Ended September		Ended September 30,	
	30,		2010	2009
	2010	2009	2010	2009
	(In millions)			
Interest based on debt outstanding	\$ 98	\$ 112	\$ 307	\$ 330
Capitalized interest	(20)	(22)	(55)	(71)
Early retirement of debt			19	
Other	5		9	4
Total	\$ 83	\$ 90	\$ 280	\$ 263

8. Asset Retirement Obligations

The schedule below summarizes changes in Devon's asset retirement obligations.

	Nine Months	
	Ended September 30,	
	2010	2009
	(In millions)	
Asset retirement obligations as of beginning of period	\$ 1,513	\$ 1,387
Liabilities incurred	36	50
Liabilities settled	(94)	(75)
Revision of estimated obligation	194	22
Liabilities assumed by others	(256)	(17)
Accretion expense on discounted obligation	71	68
Foreign currency translation adjustment	10	82
Asset retirement obligations as of end of period	1,474	1,517
Less current portion	80	108
Asset retirement obligations, long-term	\$ 1,394	\$ 1,409

During the first nine months of 2010 and 2009, Devon recognized revisions to its asset retirement obligations totaling \$194 million and \$22 million, respectively. The primary factors causing the 2010 and 2009 increases were an overall increase in abandonment cost estimates and a decrease in the discount rate used to present value the obligations.

During the first nine months of 2010, Devon reduced its continuing operations asset retirement obligations by \$256 million for those obligations that were assumed by purchasers of Devon's Gulf of Mexico oil and gas properties.

Net actuarial loss	7	11	21	33				
Net periodic benefit cost	\$ 21	\$ 28	\$ 63	\$ 84	\$ 2	\$ 1	\$ 4	\$ 3

10. Stockholders' Equity**Stock Repurchases**

During the first nine months of 2010, Devon repurchased 14.7 million common shares under its \$3.5 billion stock repurchase program for \$936 million, or \$63.61 per share. This program expires December 31, 2011.

Dividends

Devon paid common stock dividends of \$211 million and \$213 million (quarterly rates of \$0.16 per share) in the first nine months of 2010 and 2009, respectively.

11. Commitments and Contingencies

Devon is party to various legal actions arising in the normal course of business. Matters that are probable of unfavorable outcome to Devon and that can be reasonably estimated are accrued. Such accruals are based on information known about the matters, Devon's estimates of the outcomes of such matters and its experience in contesting, litigating and settling similar matters. None of the actions are believed by management to involve future amounts that would be material to Devon's financial position or results of operations after consideration of recorded accruals. However, actual amounts could differ materially from management's estimate.

Environmental Matters

Devon is subject to certain laws and regulations relating to environmental remediation activities associated with past operations, such as the Comprehensive Environmental Response, Compensation, and Liability Act and similar statutes. In response to liabilities associated with these activities, loss accruals primarily consist of estimated uninsured costs associated with remediation. Devon's monetary exposure for environmental matters is not expected to be material.

Royalty Matters

Numerous natural gas producers and related parties, including Devon, have been named in various lawsuits alleging violation of the federal False Claims Act. The suits allege that the producers and related parties used below-market prices, improper deductions, improper measurement techniques and transactions with affiliates, which resulted in underpayment of royalties in connection with natural gas and NGLs produced and sold from federal and

Indian-owned or controlled lands. Devon does not currently believe that it is subject to material exposure with respect to such royalty matters.

Table of Contents

DEVON ENERGY CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

Other Matters

Devon is involved in other various routine legal proceedings incidental to its business. However, to Devon's knowledge as of the date of this report, neither Devon nor its property is subject to any material pending legal proceedings.

Commitments

At the end of 2009, Devon's commitments included \$0.9 billion that related to long-term lease contracts for two deepwater drilling rigs being used in the Gulf of Mexico. As discussed in Note 5, Devon no longer has lease commitments for these two rigs.

At the end of 2009, Devon's commitments also included \$0.5 billion that related to a long-term lease contract for a deepwater drilling rig being used in Brazil. Devon's lease and remaining commitments for this rig will be assumed by the buyer of Devon's assets in Brazil when the associated divestiture transaction closes.

At the end of 2009, Devon's commitments also included \$0.4 billion that related to leases of floating, production, storage and offloading facilities being used in the Gulf of Mexico, Brazil and China. Devon's commitments for the Gulf of Mexico and China leases were assumed by the purchasers in the first half of 2010. The Brazil lease will be assumed by the buyer when the associated divestiture transaction closes.

12. Fair Value Measurements

The following tables provide carrying value and fair value measurement information for Devon's financial assets and liabilities.

	Carrying Amount	Total Fair Value	Fair Value Measurements Using:		
			Quoted Prices in Active Markets (Level 1) (In millions)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
September 30, 2010 assets (liabilities):

13. Restructuring Costs***Employee Severance***

In the fourth quarter of 2009, Devon recognized \$153 million of estimated employee severance costs associated with the planned divestiture of its offshore assets that was announced in November 2009. This amount was based on estimates of the number of employees that will ultimately be impacted by the divestitures and included amounts related to cash severance costs and accelerated vesting of share-based grants. Of the \$153 million total, \$105 million related to Devon's U.S. Offshore operations and the remainder related to its International discontinued operations.

As discussed in Note 5, Devon had divested all its U.S. Offshore assets by the end of the second quarter of 2010 and a significant part of its International assets by the end of the third quarter of 2010. As a result of these divestitures and associated employee terminations, Devon decreased its estimate of employee severance costs in the second and third quarters of 2010 by \$14 million and \$21 million, respectively. As a result, Devon now estimates it will incur approximately \$118 million of employee severance costs. The lower estimate results primarily from more offshore employees than previously estimated receiving comparable positions with the purchaser of the properties or in Devon's U.S. Onshore operations. Of the \$118 million total, \$78 million relates to Devon's U.S. Offshore operations and the remainder relates to its International discontinued operations. Of the \$35 million reduction recognized during 2010, \$27 million relates to Devon's U.S. Offshore operations and the remainder relates to its International discontinued operations.

Lease Obligations

As a result of the divestitures discussed above, Devon ceased using certain office space that was subject to non-cancellable operating lease arrangements. Consequently, in the third quarter of 2010, Devon recognized \$70 million of restructuring costs that represent the present value of its future obligations under the leases, net of anticipated sublease income. Devon's estimate of lease obligations was based upon certain key estimates that could change over the term of the leases. These estimates include the estimated sublease income that Devon may receive over the term of the leases, as well as the amount of variable operating costs that Devon will be required to pay under the leases.

Asset Impairments

In the third quarter of 2010, Devon recognized \$11 million of asset impairment charges for leasehold improvements and furniture associated with the office space it ceased using.

Financial Statement Presentation

Recognition and adjustments to cash severance, accelerated vesting of share-based grants, lease obligations and asset impairments are included in restructuring costs in the accompanying 2010 consolidated statements of operations. Amounts related to cash severance and lease obligations are accrued for in other current liabilities and other long-term liabilities in the

Table of Contents

DEVON ENERGY CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

accompanying consolidated balance sheets, while amounts related to accelerated share-based awards are recorded as a reduction to Devon's additional paid-in capital in the accompanying consolidated balance sheets. Asset impairments are presented as a reduction to Devon's net property and equipment in the accompanying consolidated 2010 balance sheet.

The schedule below summarizes activity and balances associated with Devon's restructuring liabilities.

	Other Current Liabilities			Other Long-Term Liabilities

Restructuring costs	\$ 63	\$ (3)	\$ 60	\$ 55	\$ (8)	\$ 47

14. Reduction of Carrying Value of Oil and Gas Properties

In the first quarter of 2009, Devon reduced the carrying value of its United States oil and gas properties \$6,408 million, or \$4,085 million after taxes, due to a full cost ceiling limitation. The reduction resulted from a significant decrease in the full cost ceiling compared to the immediately preceding quarter due to the effects of declining natural gas prices subsequent to December 31, 2008.

15. Income Taxes

The Gulf of Mexico divestitures discussed in Note 5 have taxable gains that increase Devon's current income tax expense of \$858 million. However, the additional current income taxes are offset by a decrease in deferred income tax expense, resulting in no impact to Devon's total income tax expense.

Additionally, in conjunction with the filing of its 2009 income tax return in the third quarter of 2010, Devon recognized a \$220 million decrease to current income tax expense that was offset by a like increase to deferred income

tax expense. These amounts relate to a change in the timing of certain deductions which Devon elected to expense rather than capitalize for the 2009 tax year. Such deductions created a net operating loss for the 2009 tax year that Devon is using to reduce its 2010 current income taxes that would otherwise be due as a result of the taxable divestiture gains mentioned above.

In the third quarter of 2009, Devon recognized \$59 million of income tax benefits in conjunction with the initial or amended filings of its 2005, 2006, 2007 and 2008 income tax returns. These tax benefits consist of deferred tax benefits of \$50 million and current tax benefits of \$9 million. Of the \$59 million, \$41 million relates to taxation on foreign operations. The remaining \$18 million relates to taxation on U.S. federal and state operations.

16. Discontinued Operations

Revenues related to Devon's discontinued operations totaled \$139 million and \$573 million in the third quarter and first nine months of 2010, respectively, and \$250 million and \$646 million in the third quarter and first nine months of 2009, respectively.

The following table presents the main classes of assets and liabilities associated with Devon's discontinued operations.

	September 30, 2010	December 31, 2009
	(In millions)

Accounts payable	\$ 324	\$ 158
Other current liabilities	53	76
Current liabilities	\$ 377	\$ 234
Asset retirement obligations	\$ 29	\$ 109
Deferred income taxes	35	101
Other liabilities	5	3
Long-term liabilities	\$ 69	\$ 213

Reductions of Carrying Value of Oil and Gas Properties

In the first quarter of 2009, Devon reduced the carrying values of its Brazilian and other International oil and gas properties, which are now held for sale, \$109 million due to full cost ceiling limitations. The Brazilian reduction of \$103 million, which had no related tax benefit, resulted largely from an exploratory well drilled at the BM-BAR-3 block in the offshore Barreirinhas Basin. After drilling this well in the first quarter of 2009, Devon concluded that the well did not have adequate reserves for commercial viability. As a result, the seismic, leasehold and drilling costs associated with this well contributed to the reduction recognized in the first quarter of 2009.

Divestitures

See Note 5 for more information on the Azerbaijan and China divestitures.

17. Earnings (Loss) Per Share

The following table reconciles earnings (loss) from continuing operations and common shares outstanding used in the calculations of basic and diluted earnings (loss) per share for the three-month and nine-month periods ended September 30, 2010 and 2009. Because a net loss from continuing operations was generated during the nine-month period ended September 30, 2009, the dilutive shares produce an antidilutive net loss per share result. Therefore, the diluted loss per share amount from continuing operations in the nine months ended September 30, 2009 reported in the accompanying 2009 consolidated statement of operations is the same as the basic loss per share amount.

	Earnings (Loss)	Common Shares	Earnings (Loss) per Share	
	(In millions, except per share amounts)			
Three Months Ended September 30, 2010:				
Earnings from continuing operations	\$ 429	435		
Attributable to participating securities	(4)	(5)		
Basic earnings per share	425	430	\$	0.99
Dilutive effect of potential common shares issuable upon the exercise of outstanding stock options		1		
Diluted earnings per share	\$ 425	431	\$	0.98
Three Months Ended September 30, 2009:				
Earnings from continuing operations	\$ 382	444		
Attributable to participating securities	(4)	(5)		
Basic earnings per share	378	439	\$	0.86
Dilutive effect of potential common shares issuable upon the exercise of outstanding stock options		2		
Diluted earnings per share	\$ 378	441	\$	0.86
Nine Months Ended September 30, 2010:				
Earnings from continuing operations	\$ 1,855	442		
Attributable to participating securities	(21)	(5)		
Basic earnings per share	1,834	437	\$	4.20
Dilutive effect of potential common shares issuable upon the exercise of outstanding stock options		2		
Diluted earnings per share	\$ 1,834	439	\$	4.18

Edgar Filing: DEVON ENERGY CORP/DE - Form 10-Q

Nine Months Ended September 30, 2009:

Loss from continuing operations	\$ (3,310)	444		
Attributable to participating securities	36	(5)		
Basic and diluted loss per share	\$ (3,274)	439	\$	(7.46)

Certain options to purchase shares of Devon's common stock are excluded from the dilution calculations because the options are antidilutive. During the three-month and nine-month periods ended September 30, 2010, 8.6 million shares and 7.9 million shares, respectively, were excluded from the diluted earnings per share calculations. During the three-month and nine-month periods ended September 30, 2009, 7.1 million shares and 8.9 million shares, respectively, were excluded from the diluted earnings per share calculations.

18. Segment Information

Devon manages its operations through distinct operating segments, or divisions, which are defined primarily by geographic areas. For financial reporting purposes, Devon aggregates its United States divisions into one reporting segment due to the similar nature of the business. However, Devon's Canadian and International divisions are reported as separate reporting segments primarily due to significant differences in the respective regulatory environments.

Following is certain financial information regarding Devon's reporting segments. The revenues reported are all from external customers.

	U.S.	Canada	International	Total
	(In millions)

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations**

The following discussion addresses material changes in our results of operations and capital resources and uses for the three-month and nine-month periods ended September 30, 2010, compared to the three-month and nine-month periods ended September 30, 2009, and in our financial condition and liquidity since December 31, 2009. For information regarding our critical accounting policies and estimates, see our 2009 Annual Report on Form 10-K under

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations. Unless otherwise stated, all dollar amounts are expressed in U.S. dollars.

Financial Overview

During the third quarter and first nine months of 2010, we generated net earnings of \$2.1 billion, or \$4.79 per diluted share, and \$4.0 billion, or \$8.99 per diluted share, for the respective periods. This compares to net earnings of \$499 million, or \$1.12 per diluted share, for the third quarter of 2009 and a net loss of \$3.1 billion, or \$7.09 per diluted share for the first nine months of 2009. Our financial results for the third quarter and first nine months of 2010 include after-tax gains of \$1.5 billion and \$1.8 billion, respectively, related to International offshore divestitures. Our financial results for the first nine months of 2009 were negatively impacted by a \$6.4 billion (\$4.1 billion after tax) reduction of the carrying value of our United States oil and gas properties.

Key measures of our financial performance for the third quarter and first nine months of 2010 compared to 2009 are summarized below:

Production decreased 3% and 4% in the third quarter and first nine months of 2010, respectively. Excluding the effects of property divestitures, North America Onshore production climbed 4% and declined 1% for the respective third quarter and nine month comparisons.

The combined realized price without hedges for oil, gas and NGLs increased 17% and 33% in the third quarter and first nine months of 2010, respectively.

Oil, gas and NGL derivatives generated net gains of \$209 million and \$874 million in the third quarter and first nine months of 2010, respectively, and net gains of \$23 million and \$190 million in the third quarter and first nine months of 2009. Included in these amounts were cash receipts of \$232 million and \$580 million for the third quarter and first nine months of 2010, respectively, and cash receipts of \$127 million and \$359 million in the third quarter and first nine months of 2009, respectively.

Marketing and midstream operating profit increased 20% to \$125 million and 1% to \$383 million in the third quarter and first nine months of 2010, respectively.

Per unit operating costs increased 3% to \$7.35 per Boe and 4% to \$7.44 per Boe in the third quarter and first nine months of 2010, respectively.

Operating cash flow increased 29% to \$4.2 billion in the first nine months of 2010.

Including a \$500 million acquisition of a 50 percent interest in the Pike oil sands, cash spent on capital expenditures was approximately \$4.8 billion in the first nine months of 2010.

Throughout 2010, we have moved closer to completion of our offshore divestiture program announced in November 2009. We have completed our exit from the Gulf of Mexico and have divested our assets in Azerbaijan and China. Additionally, we have entered into an agreement to sell our assets in Brazil for \$3.2 billion. This transaction continues to progress through the approval process of the Brazilian government and is on track to close around the end of 2010. The divestiture process is ongoing for our exploration assets in Angola.

During the first nine months of 2010, our divestitures generated total after-tax proceeds of \$5.6 billion. In accordance with full cost accounting rules, we did not recognize a gain on the Gulf of Mexico divestitures. The Azerbaijan and China divestitures generated gains of \$1.5 billion (\$1.5 billion after-tax) and \$0.3 billion (\$0.2 billion after-tax), respectively.

Once all divestiture assets are sold, we estimate the total pre-tax proceeds will approximate \$10 billion and the after-tax proceeds will be approximately \$8 billion. As a result of the success we have experienced with our offshore divestiture program, we are using the divestiture proceeds to invest in North America Onshore exploration and development opportunities, repurchase our common shares and reduce outstanding debt.

Table of Contents

In conjunction with certain offshore divestitures in the second quarter of 2010, we formed a heavy oil joint venture to operate and develop the Pike oil sands leases in Alberta, Canada. As a result, we acquired a 50 percent interest in the Pike oil sands leases for \$500 million. We will also fund \$155 million of Canadian dollar capital costs on behalf of our joint-venture partner. The majority of these costs are expected to be paid during 2011 and 2012.

Furthermore, in connection with the completed divestitures, we have substantially reduced our deepwater drilling rig commitments. We no longer have lease commitments for the two deepwater drilling rigs that were being used in the Gulf of Mexico. The third deepwater drilling rig is being used in our Brazil operations and will be assumed by the buyer when that divestiture transaction closes.

In May 2010, we announced a share repurchase program that authorizes the repurchase of up to \$3.5 billion of our common shares. Through September, we had repurchased 14.7 million shares for \$936 million, or \$63.61 per share.

Additionally, we repaid all our outstanding commercial paper and redeemed our \$350 million 7.25% senior notes prior to their scheduled maturity with proceeds from the U.S. Offshore divestitures.

Finally, our performance and divestitures to date enabled us to end the third quarter of 2010 with a robust level of liquidity. As of September 30, 2010, we held \$4.0 billion in cash and cash equivalents and had \$2.6 billion of available credit under our credit lines. This liquidity will allow us to continue repurchasing common shares and investing in the opportunities that exist across our North America Onshore portfolio of properties.

Third-Quarter Operating Highlights

We drilled 407 wells in the third quarter of 2010 with an overall success rate of 99 percent. We achieved several notable operational accomplishments in the third-quarter:

Our oil and natural gas liquids production totaled 193 thousand barrels per day in the third quarter of 2010. This represents an 11% increase in liquids production compared to the third quarter of 2009.

In the Permian Basin, increased oil and liquids-rich activity drove production 18% higher than the year-ago quarter to 44,000 barrels per day. We are currently running 17 operated rigs and have assembled nearly 1 million net acres of leasehold targeting the Avalon Shale, Bone Spring, Wolfberry and other conventional formations.

In Canada, net production from our Jackfish oil sands project averaged 21,300 barrels per day in the third quarter. Jackfish was taken offline for scheduled plant maintenance during the last three weeks of the third quarter and resumed operations on September 30, 2010.

Construction of our second Jackfish oil sands project is now approximately 90% complete. We plan to commence steam injection at Jackfish 2 in the second quarter of 2011, with first production expected by the end of next year.

We sanctioned our third Jackfish development project and filed a regulatory application in the third quarter. We could begin facilities construction at Jackfish 3 by the end of 2011, with plant start-up targeted for 2015.

Production from our Cana-Woodford Shale play in western Oklahoma averaged a record 117 million cubic feet of gas equivalent per day during the quarter. This represents an increase in production of 122% over the year-ago quarter. We expect to commence operations from our Cana gas processing plant by the end of 2010.

In the Granite Wash in the Texas panhandle, we drilled three significant horizontal wells in the third quarter. Initial production from these wells averaged 4,290 barrels of oil-equivalent per day, including 605 barrels of oil and 1,450 barrels of natural gas liquids per day. We have an average working interest of 65% in these wells.

We increased our net production from the Barnett Shale field in north Texas to an all-time high of 1.2 billion cubic feet of natural gas equivalent per day in the third quarter, including 40,100 barrels per day of liquids production. This represents an 8% increase in production compared to the third quarter of 2009.

Table of Contents**Results of Operations****Revenues**

Our oil, gas and NGL production volumes are shown in the following table.

	Three Months Ended September			Nine Months Ended September

2010 sales	\$ 593	\$ 851	\$ 239	\$ 1,683

The volume and price changes in the tables above caused the following changes to our oil, gas and NGL sales between the nine months ended September 30, 2010 and 2009.

	Oil	Gas	NGLs	Total
	(In millions)			
2009 sales	\$ 1,465	\$ 2,340	\$ 501	\$ 4,306
Changes due to volumes	(14)	(141)	29	(126)
Changes due to prices	525	599	231	1,355
2010 sales	\$ 1,976	\$ 2,798	\$ 761	\$ 5,535

Oil Sales

Oil sales increased \$29 million in the third quarter of 2010 as a result of a 5% increase in our realized price without hedges. The largest contributor to the increase in our realized price was the increase in the average NYMEX West Texas Intermediate index price over the same time period. This was partially offset by an increase in our price differential based upon the NYMEX index price. The higher differential resulted primarily from the increase in our heavy oil production and the widening of the associated differential related to our Canadian operations.

Oil sales decreased \$33 million in the third quarter of 2010 due to a five percent decrease in production. The decrease was primarily due to the divestiture of our U.S. Offshore properties in the second quarter of 2010 partially offset by a 11% increase in our North America Onshore production. The increased North America Onshore production resulted primarily from continued development of our Permian Basin properties in Texas and our Jackfish operations in Canada.

Oil sales increased \$525 million in the first nine months of 2010 as a result of a 36% increase in our realized price without hedges. The largest contributor to the increase in our realized price was the increase in the average NYMEX West Texas Intermediate index price over the same time period.

Table of Contents

Oil sales decreased \$14 million in the first nine months of 2010 due to a one percent decrease in production. The decrease was comprised of the net effects of a 50% decrease in our U.S. Offshore production and a 6% increase in our North America Onshore production. The decrease in our U.S. Offshore production was primarily due to the divestiture of such properties in the second quarter of 2010. The increased North America Onshore production resulted primarily from continued development of our Permian Basin properties in Texas and our Jackfish operations in Canada.

Gas Sales

Gas sales increased \$191 million during the third quarter of 2010 as a result of a 29% increase in our realized price without hedges. This increase was largely due to increases in the North American regional index prices upon which our gas sales are based.

A 4% decrease in production during the third quarter of 2010 caused gas sales to decrease by \$29 million. The decrease was primarily due to the divestiture of our U.S. Offshore properties in the second quarter of 2010 partially offset by a 1% increase in our North America Onshore production. The increased North America Onshore production resulted primarily from continued development activities in the Barnett and Cana Shales, partially offset by natural production declines in our other operating areas.

Gas sales increased \$599 million during the first nine months of 2010 as a result of a 27% increase in our realized price without hedges. This increase is largely due to increases in the North American regional index prices upon which our gas sales are based.

A 6% decrease in production during the first nine months of 2010 caused gas sales to decrease by \$141 million. The decrease in production was primarily due to reduced drilling during most of 2009 for our North America Onshore properties. As a result of reduced drilling activities during the second half of 2009 in response to lower gas prices, natural declines of existing wells outpaced production gains from new drilling. Also, the divestiture of our U.S. Offshore properties in the second quarter of 2010 contributed to the decrease.

NGL Sales

NGL sales increased \$28 million during the third quarter of 2010 as a result of a 13% increase in our realized price without hedges. The increase was largely due to an increase in the Mont Belvieu, Texas index price over the same time period. NGL sales increased \$16 million in the third quarter of 2010 due to an eight percent increase in production. The increase in production is primarily due to increased drilling in North America Onshore areas that have liquids rich gas.

NGL sales increased \$231 million during the first nine months of 2010 as a result of a 44% increase in our realized price without hedges. The increase was largely due to an increase in the Mont Belvieu, Texas index price over the same time period. NGL sales increased \$29 million in the first nine months of 2010 due to a six percent increase in production. The increase in production is primarily due to increased drilling in North America Onshore areas that have liquids rich gas.

Oil, Gas and NGL Derivatives

The following tables provide financial information associated with our oil, gas and NGL hedges. The first table presents the cash settlements and unrealized gains and losses recognized as components of our revenues. The subsequent tables present our oil, gas and NGL prices with, and without, the effects of the cash settlements. The prices do not include the effects of unrealized gains and losses.
