G&K SERVICES, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS
(Amounts in thousands, except per share data)
Three-month period ended September 30, 2006 and October 1, 2005
(Unaudited)

The consolidated condensed financial statements included herein, except for the July 1, 2006 balance sheet which was derived from the audited consolidated financial statements for the fiscal year ended July 1, 2006, have been prepared by G&K Services, Inc. (the Company), without audit, pursuant to the rules and regulations of the Securities and Exchange Commission. In the opinion of the Company, the accompanying unaudited consolidated condensed financial statements contain all adjustments (consisting of only normal recurring adjustments) necessary to present fairly the financial position of the Company as of September 30, 2006, and the results of its operations and its cash flows for the three months ended September 30, 2006 and October 1, 2005. Certain information and footnote disclosures normally included in financial statements prepared in accordance with U.S. generally accepted accounting principles have been condensed or omitted pursuant to such rules and regulations, although the Company believes that the disclosures herein are adequate to make the information presented not misleading. It is suggested that these consolidated condensed financial statements be read in conjunction with the consolidated financial statements and the notes thereto included in the Company's latest report on Form 10-K.

The results of operations for the three-month periods ended September 30, 2006 and October 1, 2005 are not necessarily indicative of the results to be expected for the full year.

1. Summary of Significant Accounting Policies

Accounting policies followed by the Company are set forth in Note 1 in the Company's Annual Report on Form 10-K for the fiscal year ended July 1, 2006.

Nature of Business

G&K Services, Inc. (the Company) is a market leader in providing branded identity apparel and facility services programs that enhance image and safety in the workplace. The Company serves a wide variety of North American industries including automotive, warehousing, distribution, transportation, energy, manufacturing, food processing, pharmaceutical, semi-conductor, retail, restaurants and hospitality, and many others providing them with rented uniforms and facility services products such as floor mats, dust mops, wiping towels, restroom supplies and selected linen items. The Company also manufactures certain uniform garments that it uses to support its garment rental programs. The Company has two operating segments, United States and Canada, which have been identified as components of the Company that are reviewed by the Company's Chief Executive Officer to determine resource allocation and evaluate performance.

Principles of Consolidation

The accompanying consolidated condensed financial statements include the accounts of the Company and its subsidiaries, all of which are wholly owned. Significant intercompany balances and transactions have been eliminated in consolidation.

Revenue Recognition

The Company's rental operations business is largely based on written service agreements whereby it agrees to collect, launder and deliver uniforms and other related products. The service agreements provide for weekly billing upon completion of the laundering process and delivery to the customer. Accordingly, the Company recognizes

revenue from rental operations in the period in which the services are provided. Revenue from rental operations also includes billings to customers for lost or damaged merchandise. Direct sale revenue is recognized in the period in which the product is shipped.

Table of Contents**Derivative Financial Instruments**

The Company uses derivative financial instruments principally to manage the risk that changes in interest rates will affect the amount of its future interest payments. Interest rate swap contracts are used to balance the proportion of total debt that is subject to variable and fixed interest rates. The interest rate swap contracts are reflected at fair value in the consolidated condensed balance sheets and for contracts that cash flow hedge accounting is achieved the related gains or losses on these contracts are deferred in stockholders' equity (as a component of other comprehensive income). Amounts to be paid or received under the contracts are accrued as interest rates change and are recognized over the life of the contracts as an adjustment to interest expense. The net effect of this accounting is that interest expense on the portion of variable rate debt being hedged is generally recorded based on fixed interest rates.

The Company also uses derivative financial instruments to manage the risk that changes in gasoline cost will have on the future financial results of the Company. The Company purchases futures contracts to effectively hedge a portion of anticipated gasoline purchases. The futures contracts are reflected at fair value in the consolidated condensed balance sheet and the related gains or losses on these contracts are deferred in stockholders' equity (as a component of other comprehensive income) or in the statements of operations depending on the effectiveness of the cash flow hedge. Upon settlement of each contract, the actual gain or loss is reflected in cost of rental operations.

The Company may periodically hedge firm commitments with its foreign subsidiary, generally with foreign currency contracts. These agreements are recorded at current market values and the gains and losses are included in earnings. Gains and losses on all such transactions were not significant in the first quarter of fiscal 2007 or 2006.

Per Share Data

Basic earnings per common share was computed by dividing net income by the weighted average number of shares of common stock outstanding during the period. Diluted earnings per common share was computed similarly to the computation of basic earnings per share, except that the denominator is increased for the assumed exercise of dilutive options and other dilutive securities, including non-vested restricted stock, using the treasury stock method.

	Three Months Ended	
	September 30, 2006	October 1, 2005
Weighted average number of common shares outstanding used in computation of basic earning per share	21,186	20,992
Weighted average effect of non-vested restricted stock grants and assumed exercise of options	179	156
Shares used in computation of diluted earnings per share	21,365	21,148

Potential common shares of 523,000 and 448,000 related to the Company's outstanding stock options were excluded from the computation of diluted earnings per share for the three months ended September 30, 2006 and October 1,

2005, respectively. Inclusion of these shares would have been anti-dilutive as the exercise price of these shares exceeded market value.

Table of Contents**Use of Estimates**

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Recent Accounting Pronouncements

In September, 2006, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards (SFAS) No. 158 Employers Accounting for Defined Benefit Pension and Other Postretirement Plans , an amendment of FASB statements No. 87, 88, 106 and 132R. The standard requires the Company to:

Recognize in its statement of financial position the over-funded or under-funded status of a defined benefit postretirement plan measured as the difference between the fair value of plan assets and the benefit obligation.

Recognize as a component of other comprehensive income, net of tax, the actuarial gains and losses and the prior service costs and credits that arise during the period but pursuant to FAS 87 and 106 are not recognized as components of net periodic benefit cost.

Recognize as an adjustment to the opening balance of retained earnings, net of tax, any transition asset or transition obligation remaining from the initial application of FAS 87 or 106.

Measure defined benefit plan assets and defined benefit plan obligations as of the date of the employer s statement of financial position.

Disclose additional information in the notes to financial statements about certain effects on net periodic benefit cost in the upcoming fiscal year that arise from delayed recognition of the actuarial gains and losses and the prior service costs and credits.

On July 13, 2006, the Financial Accounting Standards Board issued FASB Interpretation No. 48 (FIN 48), Accounting for Uncertainty in Income Taxes an Interpretation of FASB Statement 109, which fundamentally changes the way that an entity will be required to treat their uncertain tax positions for financial accounting purposes. FIN 48 prescribes rules regarding how an entity should recognize, measure and disclose in its financial statements tax positions that an entity has taken or will take in its tax return that are reflected in measuring current or deferred income tax assets and liabilities for interim or annual periods. Differences between tax positions taken in a tax return and amounts recognized in the financial statements will generally result in an increase in a liability for income taxes payable, or a reduction in a deferred tax asset or an increase in a deferred tax liability.

The Company is currently evaluating the impact of these standards on its consolidated financial statements.

2. Comprehensive Income

For the three-month periods ended September 30, 2006 and October 1, 2005, the components of comprehensive income were as follows:

	Three Months Ended	
	September 30, 2006	October 1, 2005
Net income	\$ 9,192	\$ 10,371
Other comprehensive income:		

Edgar Filing: G&K SERVICES INC - Form 10-Q

Foreign currency translation adjustments, net of tax	(13)	7,034
Net unrealized holding gain (loss) on derivative financial instruments, net of tax	(1,237)	672
Comprehensive income	\$ 7,942	\$ 18,077

8

Table of Contents**3. Goodwill and Intangible Assets**

The changes in the carrying amount of goodwill for the three months ended September 30, 2006, by operating segment, are as follows:

	United States	Canada	Total
Balance as of July 1, 2006	\$ 286,170	\$ 63,299	\$ 349,469
Goodwill acquired during the period, net of purchase price adjustments	30		30
Other, primarily foreign currency translation		(20)	(20)
Balance as of September 30, 2006	\$ 286,200	\$ 63,279	\$ 349,479

Information regarding the Company's other intangible assets, which are included in other assets on the consolidated condensed balance sheet, are as follows:

	As of September 30, 2006		
	Carrying Amount	Accumulated Amortization	Net
Customer contracts	\$ 106,403	\$ 60,600	\$ 45,803
Non-competition agreements	10,908	8,722	2,186
Total	\$ 117,311	\$ 69,322	\$ 47,989

	As of July 1, 2006		
	Carrying Amount	Accumulated Amortization	Net
Customer contracts	\$ 106,408	\$ 58,158	\$ 48,250
Non-competition agreements	10,908	8,446	2,462
Total	\$ 117,316	\$ 66,604	\$ 50,712

The customer contracts include the combined value of the written service agreements and the related customer relationship. It has been determined that there is no significant separate value in any customer relationships. Amortization expense was \$2,719 and \$2,657 for the three months ended September 30, 2006 and October 1, 2005, respectively. Estimated amortization expense for each of the next five fiscal years based on the intangible assets as of September 30, 2006 is as follows:

2007 remaining	\$ 7,924
2008	10,059
2009	6,338
2010	6,166
2011	5,490

2012

4,734

9

Table of Contents**4. Long-Term Debt**

On August 31, 2005, the Company amended and restated its revolving credit facility. The amended and restated revolving credit facility of \$325,000 expires on August 31, 2010. As of September 30, 2006, borrowings outstanding under the revolving credit facility were \$52,700. The unused portion of the revolver may be used for general corporate purposes, acquisitions, working capital needs and to provide up to \$50,000 in letters of credit. As of September 30, 2006, letters of credit outstanding against the revolver were \$33,142.

Borrowings under the revolving credit facility bear interest at 0.55% to 1.50% over the London Interbank Offered Rate (LIBOR), or the Canadian prime rate for Canadian borrowings, based on a leverage ratio calculated on a quarterly basis. Advances outstanding as of September 30, 2006 bear interest at a rate of 6.28% which is LIBOR plus 0.88%. The Company also pays a fee on the unused daily balance of the revolving credit facility based on a leverage ratio calculated on a quarterly basis.

The Company has issued \$50,000 of 8.4% unsecured fixed rate private placement notes with certain institutional investors. The 10-year notes have a seven-year average life with a final maturity on July 20, 2010. Each year until maturity, the Company will be required to repay \$7,143 of the principal amount at par. As of September 30, 2006, the outstanding balance was \$28,572.

The Company maintains a loan agreement expiring on October 23, 2007. Under the loan agreement, the lender will make loans to the Company on a revolving basis up to \$60,000. The facility was amended on June 2, 2006 increasing the facility size from \$50,000 to \$60,000. The Company will be required to pay interest on outstanding loan balances at a rate per annum of one month LIBOR plus a margin or, if the lender is funding the loan through the issuance of commercial paper to third parties, at a rate per annum equal to a margin plus the average annual interest rate for such commercial paper. In connection with the loan agreement, the Company granted a first priority security interest in certain of its U.S. based receivables. The amount of funds available under the loan agreement will be based on the amount of eligible receivables less various reserve requirements. The Company used the net proceeds of this loan to reduce indebtedness under its unsecured credit facilities. At September 30, 2006, there was \$53,000 outstanding under the agreement at a current interest rate of 5.30%.

The Company has \$75,000 of unsecured variable rate private placement notes. The notes bear interest at 0.60% over LIBOR and are scheduled to mature on June 30, 2015. The notes do not require principal payments until maturity. The interest rate is reset and interest payments are paid on a quarterly basis. As of September 30, 2006, the outstanding balance of the notes was \$75,000 at a current rate of 5.97%.

5. Share-Based Compensation

The Company maintains Stock Option and Compensation Plans to grant certain stock awards, including stock options and restricted shares of stock to key employees and external directors of the Company. Stock options granted to employees generally vest annually in equal amounts over three years and stock options granted on an annual basis to external directors, vest over one year. The stock options have an exercise price equal to the market price of the Company's common stock on the date of grant. Restricted stock granted to employees prior to January 1, 2002, vest annually in equal amounts over seven years and grants after January 1, 2002, vest annually in equal amounts over five years. Generally the Company recognizes compensation expense for share-based compensation on a straight-line basis over the pertinent vesting period. Total compensation expense related to share-based awards was \$929 and \$1,007 for the three months ended September 30, 2006, and October 1, 2005, respectively. There were 22,079 and 23,328 shares of restricted stock and stock options that vested during the three months ended September 30, 2006, and October 1, 2005, respectively.

10

Table of Contents**6. Employee Benefit Plans**

The components of net periodic pension cost are as follows for the three months ended September 30, 2006 and October 1, 2005:

	Pension Plan		Supplemental Executive Retirement Plan	
	Three Months Ended		Three Months Ended	
	September	October	September	October
	30,	1,	30,	1,
	2006	2005	2006	2005
Service cost	\$ 706	\$ 1,190	\$ 65	\$ 234
Interest cost	1,528	809	143	188
Expected return on assets	(1,388)	(616)		
Prior service cost	4	13	2	11
Loss		340		76
Net periodic pension cost	\$ 850	\$ 1,736	\$ 210	\$ 509

7. Segment Information

The Company has two operating segments, United States and Canada, which have been identified as components of the Company that are reviewed by the Company's Chief Executive Officer to determine resource allocation and evaluate performance. Each operating segment derives revenues from the branded identity apparel and facility services industry, which includes garment rental and non-apparel items such as floor mats, dust mops, wiping towels, selected linen items and certain restroom products. No one customer's transactions account for 1.5% or more of the Company's revenues.

The accounting policies of the segments are the same as those described in the summary of significant accounting policies (see Note 1). Corporate expenses are allocated to the segments based on segment revenue. The Company evaluates performance based on income from operations. Financial information by geographic location for the three-month periods ended September 30, 2006 and October 1, 2005 is as follows:

For the Three Months Ended	United States	Canada	Total
First Quarter Fiscal Year 2007:			
Revenues	\$ 183,310	\$ 39,818	\$ 223,128
Income from operations	11,990	6,350	18,340
Capital expenditures	9,070	699	9,769
Depreciation and amortization expense	9,606	1,612	11,218
First Quarter Fiscal Year 2006:			
Revenues	\$ 173,196	\$ 34,752	\$ 207,948
Income from operations	12,823	6,074	18,897
Capital expenditures	7,750	756	8,506
Depreciation and amortization expense	9,108	1,491	10,599

Table of Contents**8. Inventory**

The components of inventory are as follows for the three months ended September 30, 2006 and July 1, 2006:

	Three Months Ended	
	September 30, 2006	July 1, 2006
Raw Materials	\$ 4,266	\$ 5,742
Work in Process	5,679	4,587
Finished Goods	53,674	52,457
New Goods	\$ 63,619	\$ 62,786
Merchandise In Service	\$ 78,380	\$ 78,245
Total Inventories	\$ 141,999	\$ 141,031

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

(Unaudited)

Overview

G&K Services, Inc., founded in 1902 and currently is headquartered in Minnetonka, Minnesota, is a market leader in providing branded identity apparel and facility services programs that enhance image and safety in the workplace. We serve a wide variety of North American industrial, service and high-technology companies providing them with rented uniforms and facility services products such as floor mats, dust mops, wiping towels, restroom supplies and selected linen items. We also sell uniforms and other apparel items to customers in our direct sale programs. The North American rental MSA is approximately \$6.5-\$7.0 billion, while the portion of the direct sale market targeted by us is approximately \$4.5-\$5.0 billion in size.

Our industry is consolidating from many family owned and small local providers to several large providers. We are participating in this industry consolidation. Our rental acquisition strategy is focused on acquisitions that expand our geographic presence and/or expand our local market share and further leverage our existing plants.

In the first quarter of fiscal year 2007, our revenue was \$223.1 million a 7% increase from the \$207.9 million reported during the first quarter of fiscal 2006. Continued momentum in rental organic growth and strong direct sale organic growth drove the increase compared to the prior year.

Earnings per diluted share totaled \$0.43 for the quarter compared to \$0.49 during the prior-year quarter. These results reflect the increased investment in sales, marketing and technology initiatives as compared to the prior year. In addition, the first quarter of fiscal 2007 merchandise expense was higher than the same period in fiscal year 2006 due to the acceleration of new account growth during fiscal 2006. Finally, energy costs were also significantly higher in the first quarter of fiscal 2007 than in the same period of fiscal 2006.

Critical Accounting Policies

The discussion of the financial condition and results of operations are based upon the consolidated condensed financial statements, which have been prepared in conformity with United States generally accepted accounting principles. As such, management is required to make certain estimates, judgments and assumptions that are believed to be reasonable based on the information available. These estimates and assumptions affect the reported amount of assets and liabilities, revenues and expenses, and disclosure of contingent assets and liabilities at the date of the financial statements. Actual results may differ from these estimates under different assumptions or conditions.

Critical accounting policies are defined as those that are reflective of significant judgments and uncertainties, the most important and pervasive accounting policies used and areas most sensitive to material changes from external factors. See Note 1 to the consolidated condensed financial statements for additional discussion of the application of these and other accounting policies.

Table of Contents***Revenue Recognition and Allowance for Doubtful Accounts***

Our rental operations business is largely based on written service agreements whereby we agree to collect, launder and deliver uniforms and other related products. The service agreements provide for weekly billing upon completion of the laundering process and delivery to the customer. Accordingly, we recognize revenue from rental operations in the period in which the services are provided. Revenue from rental operations also includes billings to customers for lost or damaged merchandise. Direct sale revenue is recognized in the period in which the product is shipped. Estimates are used in determining the collectibility of billed accounts receivable. Management analyzes specific accounts receivable and historical bad debt experience, customer credit worthiness, current economic trends and the age of outstanding balances when evaluating the adequacy of the allowance for doubtful accounts. Significant management judgments and estimates are used in connection with establishing the allowance in any accounting period. While we have been consistent in applying our methodologies, and in making our estimates over the past three fiscal years, material differences may result in the amount and timing of bad debt expense recognition for any given period if management makes different judgments or utilizes different estimates.

Inventories

Our inventories consist of new goods and rental merchandise in service. Estimates are used in determining the likelihood that new goods on hand can be sold to customers or used in rental operations. Historical inventory usage and current revenue trends are considered in estimating both obsolete and excess inventories. New goods are stated at lower of cost or market, net of any reserve for obsolete or excess inventory. Merchandise placed in service to support rental operations is amortized into cost of rental operations over the estimated useful lives of the underlying inventory items, primarily on a straight-line basis, which results in a matching of the cost of the merchandise with the weekly rental revenue generated by merchandise. Estimated lives of rental merchandise in service range from nine months to three years. In establishing estimated lives for merchandise in service, management considers historical experience and the intended use of the merchandise. Material differences may result in the amount and timing of operating profit for any period if management makes different judgments or utilizes different estimates.

Goodwill, Intangibles and Other Long-Lived Assets

As required under Statement of Financial Accounting Standards (SFAS) No. 142, Goodwill and Other Intangible Assets, goodwill is separately disclosed from other intangible assets on the balance sheet and no longer amortized. SFAS 142 also requires that companies test goodwill for impairment on an annual basis and when events occur or circumstances change that would more likely than not reduce the fair value of the reporting unit to which goodwill is assigned below its carrying amount. Our evaluation follows the two step impairment test prescribed by SFAS 142. First we assess whether the fair value of the reporting units exceeds the carrying amount of the unit including goodwill. Our evaluation considers changes in the operating environment, competitive position, market trends, operating performance, quoted market prices for our equity securities and fair value models and research prepared by independent analysts. If the carrying amount of a reporting unit exceeded its fair value, we would perform a second test to measure the amount of impairment loss, if any. Management completes its annual impairment tests in the fourth quarter of each fiscal year. There have been no impairments of goodwill or definite-lived intangible assets in fiscal 2006 and there have been no events or circumstances through the first three months of fiscal 2007 that would indicate that there may have been any impairment of goodwill or definite-lived assets. Future events could cause management to conclude that impairment indicators exist and that goodwill and other intangibles associated with acquired businesses are impaired. Any resulting impairment loss could have a material impact on our financial condition and results of operations.

Property, plant and equipment and definite-lived intangible assets are depreciated or amortized over their useful lives. Useful lives are based on management estimates of the period that the assets will add value. Long-lived assets and definite-lived intangible assets are evaluated for impairment whenever events and circumstances indicate an asset may be impaired. There have been no write-downs of any long-lived assets or definite-lived intangible assets in fiscal 2006 or through the first three months of fiscal 2007.

Table of Contents

Insurance

We self-insure for certain obligations related to health, workers' compensation and auto and general liability programs. We purchase stop-loss insurance policies to protect us from catastrophic losses. Estimates are used in determining the potential liability associated with reported claims and for losses that have occurred, but have not been reported. Management estimates consider historical claims experience, escalating medical cost trends, expected timing of claim payments and actuarial analyses provided by third parties. Changes in the cost of medical care, our ability to settle claims and the present value estimates and judgments used by management could have a material impact on the amount and timing of expense for any period.

Income Taxes

In the normal course of business, we are subject to audits from federal, state, Canadian provincial and other tax authorities regarding various tax liabilities. These audits may alter the timing or amount of taxable income or deductions, or the allocation of income among tax jurisdictions. The amount ultimately paid upon resolution of issues raised may differ from the amount accrued. We believe that taxes accrued on our consolidated balance sheets fairly represent the amount of future tax liability due.

We utilize income tax planning to reduce our overall cost of income taxes. Upon audit, it is possible that certain strategies might be disallowed resulting in an increased liability for income taxes. We believe that the provision for liabilities resulting from the implementation of income tax planning is appropriate. To date, we have not experienced an examination by governmental revenue authorities that would lead management to believe that our past provisions for exposures related to income tax planning are not appropriate.

Deferred income taxes are determined in accordance with SFAS No. 109, Accounting for Income Taxes. Deferred tax assets and liabilities are recorded for temporary differences between the tax basis of assets and liabilities and their reported amounts in the financial statements, using statutory rates in effect for the year in which the differences are expected to reverse. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in the results of operations in the period that includes the enactment date. We record valuation allowances to reduce deferred tax assets when it is more likely than not that some portion of the asset may not be realized. We evaluate our deferred tax assets and liabilities on a periodic basis. We believe that we have adequately provided for our future tax obligations based upon current facts, circumstances and tax law.

Table of Contents**Results of Operations**

The percentage relationships to revenues of certain income and expense items for the three-month periods ended September 30, 2006 and October 1, 2005, and the percentage changes in these income and expense items between periods are presented in the following table:

	Three Months Ended		Percentage Change
	September 30, 2006	October 1, 2005	Three Months Fiscal Year 2007 vs. Fiscal Year 2006
Revenues:			
Rental	92.9%	93.3%	6.8%
Direct	7.1	6.7	14.0
Total revenues	100.0	100.0	7.3
Expenses:			
Cost of rental sales	63.5	64.2	5.7
Cost of direct sales	76.1	73.5	18.0
Total cost of sales	64.4	64.8	6.7
Selling and administrative	22.4	21.0	14.0
Depreciation and amortization	5.0	5.1	5.8
Income from operations	8.2	9.1	(2.9)
Interest expense	1.5	1.5	12.5
Income before income taxes	6.7	7.6	(5.9)
Provision for income taxes	2.6	2.6	4.4
Net income	4.1%	5.0%	(11.4)%

Three months ended September 30, 2006 compared to three months ended October 1, 2005

Revenues. Total revenues in the first quarter of fiscal 2007 increased 7.3% to \$223.1 million from \$207.9 million in the first quarter of fiscal 2006. Rental revenue increased \$13.2 million in the first quarter, or 6.8%. The organic industrial rental growth rate was approximately 5%, an improvement from approximately 3% in the same period of fiscal 2006. Organic industrial rental revenue has improved due to increased professional sales and increased customer retention.

Direct sale revenue increased 14.0% to \$15.8 million in the first quarter of fiscal 2007 compared to \$13.9 million in the same period of fiscal 2006. The organic direct sale growth rate was approximately 11.5%. The increase in direct sale revenue was due almost entirely to organic growth.

Organic growth rates are calculated using industrial rental and direct sale revenue, respectively, adjusted for foreign currency exchange rate differences and revenue from newly acquired business compared to prior-period results. We believe that the organic growth rates better reflect the growth of our existing industrial rental and direct sale business

and are therefore useful in analyzing our financial condition and results of operations.

Cost of Rental and Direct Sale. Cost of rental operations increased 5.7% to \$131.7 million in the first quarter of fiscal 2007 from \$124.5 million in the same period of fiscal 2006. Gross margin from rental sales increased to 36.5% in the first quarter of fiscal 2007 from 35.8% in the first quarter of fiscal 2006. Rental gross margins increased due to lower production and delivery costs partially offset by increased merchandise cost associated with new account growth and substantially higher energy costs.

Table of Contents

Cost of direct sales increased 18.0% to \$12.0 million in the first quarter of fiscal 2007 from \$10.2 million in the same period of fiscal 2006. Gross margin from direct sales decreased to 23.9% in the first quarter of fiscal 2007 from 26.5% in the first quarter of fiscal 2006. The decrease in gross margin was primarily due to increased costs associated with customer fulfillment and freight.

Selling and Administrative. Selling and administrative expenses increased 14.0% to \$49.9 million in the first quarter of fiscal 2007 from \$43.7 million in the same period of fiscal 2006. As a percentage of total revenues, selling and administrative expenses were 22.4% in the first quarter of fiscal 2007 up from 21.0% in the first quarter of fiscal 2006. In dollar terms, total selling and administrative expenses increased due to an increase in the Company's sales force and the continued rollout of the company's information technology initiatives.

Depreciation and Amortization. Depreciation and amortization expense increased 5.8% to \$11.2 million in the first quarter of fiscal 2007 from \$10.6 million in the same period of fiscal 2006. As a percentage of total revenues, depreciation and amortization expense decreased to 5.0% in the first quarter of fiscal 2007 from 5.1% in the first quarter of fiscal 2006. Net capital expenditures, excluding acquisition of businesses, were \$9.8 million in the first quarter of fiscal 2007 compared to \$8.5 million in the prior year's quarter.

Interest Expense. Interest expense was \$3.4 million in the first quarter of fiscal 2007, up from \$3.0 million in the same period of fiscal 2006. The increase was due to higher interest rates in fiscal 2007 than fiscal 2006.

Provision for Income Taxes. Our effective tax rate increased to 38.5% in the first quarter of fiscal 2007 from 34.7% in the same period of fiscal 2006 due to the reversal of tax reserves in 2006 that were no longer required.

Liquidity, Capital Resources and Financial Condition

Our primary sources of cash are net cash flows from operations and borrowings under our debt arrangements. Primary uses of cash are interest payments on indebtedness, capital expenditures, acquisitions and general corporate purposes. Working capital at September 30, 2006 was \$155.2 million, up 9.1% from \$142.2 million at July 1, 2006. The increase in working capital is largely due to continued growth of our business and incremental financing activities.

Operating Activities. Net cash provided by operating activities was \$6.9 million in the first three months of fiscal 2007 and \$7.3 million in the same period of fiscal 2006. In the first quarter of fiscal 2007 and 2006, cash provided by operations was negatively impacted due to working capital needed to support organic growth and incentive compensation payments related to the prior fiscal years.

Investing Activities. Net cash used in investing activities was \$10.8 million in the first three months of fiscal 2007 and \$9.3 million in the same period of fiscal 2006. In fiscal year 2007 and 2006, the cash used in investing activities was used primarily to purchase property, plant and equipment.

Financing Activities. Cash provided by financing activities was \$7.7 million in the first three months of fiscal 2007 and \$4.6 million in the same period of fiscal 2006. In fiscal year 2007 and 2006, the cash provided by financing activities was used to finance the purchase of property, plant and equipment and for working capital.

On August 31, 2005, we amended and restated our revolving credit facility. The amended and restated revolving credit facility of \$325.0 million expires on August 31, 2010. As of September 30, 2006, borrowings outstanding under the revolving credit facility were \$52.7 million. The unused portion of the revolver may be used for general corporate purposes, acquisitions, working capital needs and to provide up to \$50.0 million in letters of credit. As of September 30, 2006, letters of credit outstanding against the revolver were \$33.1 million.

Borrowings under the revolving credit facility bear interest at 0.55% to 1.50% over the London Interbank Offered Rate (LIBOR), or the Canadian prime rate for Canadian borrowings, based on a leverage ratio calculated on a quarterly basis. Advances outstanding as of September 30, 2006 bear interest at a rate of 6.28% which is LIBOR plus 0.88%. We also pay a fee on the unused daily balance of the revolving credit facility based on a leverage ratio calculated on a quarterly basis.

Table of Contents

We have \$50.0 million, 8.4% unsecured fixed rate private placement notes with certain institutional investors. The 10-year notes have a seven-year average life with a final maturity on July 20, 2010. Each year until maturity, we will be required to repay \$7.1 million of the principal amount at par. As of September 30, 2006, the outstanding balance was \$28.6 million.

We maintain a loan agreement expiring on October 23, 2007. Under the loan agreement, the lender will make loans to us on a revolving basis up to \$60.0 million. The facility was amended on June 2, 2006 increasing the facility size from \$50.0 million to \$60.0 million. We will be required to pay interest on outstanding loan balances at a rate per annum of one month LIBOR plus a margin or, if the lender is funding the loan through the issuance of commercial paper to third parties, at a rate per annum equal to a margin plus the average annual interest rate for such commercial paper. In connection with the loan agreement, we granted a first priority security interest in certain of our U.S. based receivables. The amount of funds available under the loan agreement will be based on the amount of eligible receivables less various reserve requirements. We used the net proceeds of this loan to reduce indebtedness under our unsecured credit facilities. At September 30, 2006, there was \$53.0 million outstanding under the agreement at a current rate of 5.30%.

We have \$75.0 million of unsecured variable rate private placement notes. The notes bear interest at 0.60% over LIBOR and are scheduled to mature on June 30, 2015. The notes do not require principal payments until maturity. The interest rate is reset and interest payments are paid on a quarterly basis. As of September 30, 2006, the outstanding balance of the notes was \$75.0 million at a current rate of 5.97%.

Cash Obligations. Under various agreements, we are obligated to make future cash payments in fixed amounts. These include payments under the variable rate term loan and revolving credit facility, the fixed rate term loan, capital lease obligations and rent payments required under non-cancelable operating leases with initial or remaining terms in excess of one year.

At September 30, 2006, we had available cash on hand of \$23.5 million and approximately \$239.2 million of available capacity under our revolving credit facility. We anticipate that we will generate sufficient cash flows from operations to satisfy our cash commitments and capital requirements for fiscal 2007 and to reduce the amounts outstanding under the revolving credit facility; however, we may utilize borrowings under the revolving credit facility to supplement our cash requirements from time to time. We estimate that capital expenditures in fiscal 2007 will be approximately \$25 million to \$35 million.

The amount of cash flow generated from operations could be affected by a number of risks and uncertainties. In fiscal 2007, we may actively seek and consider acquisitions of business assets. The consummation of any acquisition could affect our liquidity profile and level of outstanding debt. We believe that our earnings and cash flow from operations, existing credit facilities and our ability to obtain additional debt or equity capital, if necessary, will be adequate to finance acquisition opportunities.

Off Balance Sheet Arrangements

At September 30, 2006, we had stand-by letters of credit totaling \$33.1 million issued and outstanding, primarily in connection with our property and casualty insurance programs and to provide security in connection with a promissory note. No amounts have been drawn upon these letters of credit.

Pension Obligations

We account for our defined benefit pension plan using SFAS No. 87 *Employer's Accounting for Pensions* (SFAS 87). Under SFAS 87, pension expense is recognized on an accrual basis over employees' approximate service periods. Pension expense calculated under SFAS 87 is generally independent of funding decisions or requirements. We recognized expense for our defined benefit pension plan of \$0.9 million in the first quarter of fiscal 2007 and \$1.7 million in the same period of fiscal 2006. At July 1, 2006, the fair value of our pension plan assets totaled \$32.8 million.

We have frozen our defined benefit pension plan and related supplemental executive retirement plan effective January 1, 2007 and have incurred \$0.2 million in costs associated with this action in fiscal year 2006. All benefits earned by defined benefit plan participants through the end of calendar year 2006 will be available upon retirement under plan provisions. Future growth in benefits will no longer occur beyond December 31, 2006.

Table of Contents

The calculation of pension expense and the corresponding liability requires the use of a number of critical assumptions, including the expected long-term rate of return on plan assets and the assumed discount rate. Changes in these assumptions can result in different expense and liability amounts, and future actual experience can differ from these assumptions. Pension expense increases as the expected rate of return on pension plan assets decreases. At July 1, 2006, we estimated that the pension plan assets will generate a long-term rate of return of 8.0%. This rate was developed by evaluating input from our outside actuary as well as long-term inflation assumptions. The expected long-term rate of return on plan assets at July 1, 2006 is based on an allocation of U.S. equities and U.S. fixed income securities. Decreasing the expected long-term rate of return by 0.5% (from 8.0% to 7.5%) would increase our estimated 2007 pension expense by approximately \$0.2 million. Pension liability and future pension expense increase as the discount rate is reduced. We discounted future pension obligations using a rate of 6.45% at July 1, 2006. Our outside actuary determines the discount rate by creating a yield curve based on high quality bonds. Decreasing the discount rate by 0.5% (from 6.45% to 5.95%) would increase our accumulated benefit obligation at July 1, 2006 by approximately \$4.6 million and increase the estimated fiscal 2007 pension expense by approximately \$0.3 million. Future changes in plan asset returns, assumed discount rates and various other factors related to the participants in our pension plan will impact our future pension expense and liabilities. We cannot predict with certainty what these factors will be in the future.

Impact of Inflation

In general, we believe that our results of operations are not dependent on moderate changes in the inflation rate. Historically, we have been able to manage the impacts of more significant changes in inflation rates through our customer relationships, customer agreements that generally provide for price increases consistent with the rate of inflation or 5.0%, whichever is greater, and continued focus on improvements of operational productivity. Significant increases in energy costs, specifically natural gas and gasoline, can materially affect our results of operations and financial condition. Currently, energy costs represent approximately 5% of our total revenue.

Litigation

We are involved in a variety of legal actions relating to personal injury, employment, environmental and other legal matters that arise in the normal course of business. These legal actions include lawsuits that challenged the practice of charging for certain environmental services on invoices which were settled in the last fiscal year, and are presently being administered. None of these legal actions are expected to have a material adverse effect on our results of operations or financial position.

Share-Based Compensation

We maintain Stock Option and Compensation Plans to grant certain stock awards, including stock options and restricted shares of stock to key employees and external directors of the Company. Stock options granted to employees generally vest annually in equal amounts over three years and stock options granted on an annual basis to external directors, vest over one year. The stock options have an exercise price equal to the market price of our common stock on the date of grant. Restricted stock granted to employees prior to January 1, 2002, vest annually in equal amounts over seven years and grants after January 1, 2002, vest annually in equal amounts over five years. Generally we recognize compensation expense for share-based compensation on a straight-line basis over the pertinent vesting period. Total compensation expense related to share-based awards was \$0.9 million and \$1.0 million for the three months ended September 30, 2006, and October 1, 2005, respectively. There were 22,079 and 23,328 shares of restricted stock and stock options that vested during the three months ended September 30, 2006, and October 1, 2005, respectively.

Recent Accounting Pronouncements

In September, 2006, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards (SFAS) No. 158 Employers Accounting for Defined Benefit Pension and Other Postretirement Plans , an amendment of FASB statements No. 87, 88, 106 and 132R. The standard requires us to:

Recognize in our statement of financial position the over-funded or under-funded status of a defined benefit postretirement plan measured as the difference between the fair value of plan assets and the benefit obligation.

Table of Contents

Recognize as a component of other comprehensive income, net of tax, the actuarial gains and losses and the prior service costs and credits that arise during the period but pursuant to FAS 87 and 106 are not recognized as components of net periodic benefit cost.

Recognize as an adjustment to the opening balance of retained earnings, net of tax, any transition asset or transition obligation remaining from the initial application of FAS 87 or 106.

Measure defined benefit plan assets and defined benefit plan obligations as of the date of our statement of financial position.

Disclose additional information in our notes to financial statements about certain effects on net periodic benefit cost in the upcoming fiscal year that arise from delayed recognition of the actuarial gains and losses and the prior service costs and credits.

On July 13, 2006, the Financial Accounting Standards Board issued FASB Interpretation No. 48 (FIN 48), Accounting for Uncertainty in Income Taxes an Interpretation of FASB Statement 109, which fundamentally changes the way that we will be required to treat our uncertain tax positions for financial accounting purposes. FIN 48 prescribes rules regarding how we should recognize, measure and disclose in our financial statements tax positions that we have taken or will take on our tax return that are reflected in measuring current or deferred income tax assets and liabilities for interim or annual periods. Differences between tax positions taken in a tax return and amounts recognized in the financial statements will generally result in an increase in a liability for income taxes payable, or a reduction in a deferred tax asset or an increase in a deferred tax liability.

We are currently evaluating the impact of these standards on our consolidated financial statements.

Cautionary Statements Regarding Forward-Looking Statements

The Private Securities Litigation Reform Act of 1995 provides a safe harbor from civil litigation for forward-looking statements. Forward-looking statements may be identified by words such as estimates, anticipates, projects, plans, expects, intends, believes, seeks, could, should, may and will or the negative versions thereof and similar words and by the context in which they are used. Such statements are based upon our current expectations and speak only as of the date made. These statements are subject to various risks, uncertainties and other factors that could cause actual results to differ from those set forth in or implied by this quarterly report on Form 10-Q. Factors that might cause such a difference include, but are not limited to, the possibility of greater than anticipated operating costs, including energy costs, lower sales volumes, the performance and costs of integration of acquisitions, fluctuations in costs of materials and labor, costs and possible effects of union organizing activities, loss of key management, uncertainties regarding any existing or newly-discovered expenses and liabilities related to environmental compliance and remediation, failure to achieve and maintain effective internal controls for financial reporting required by the Sarbanes-Oxley Act of 2002, the initiation or outcome of litigation, higher assumed sourcing or distribution costs of products, the disruption of operations from catastrophic events, changes in federal and state tax laws and the reactions of competitors in terms of price and service. We undertake no obligation to update any forward-looking statements to reflect events or circumstances arising after the date on which they are made except as required by law. Additional information concerning potential factors that could effect future financial results is included in the Company's Annual Report on Form 10-K for the fiscal year ended July 1, 2006.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT MARKET RISK

Interest Rate Risk

We are subject to market risk exposure related to changes in interest rates. We use financial instruments, including fixed and variable rate debt, as well as interest rate swaps to manage interest rate risk. Interest rate swap agreements are entered into for periods consistent with related underlying exposures and do not constitute positions independent of those exposures. Assuming the current level of borrowings, a one percentage point increase in interest rates under these borrowings would have increased our interest expense for the first quarter of fiscal 2007 by approximately \$0.3 million. This estimated exposure considers the mitigating effects of interest rate swap agreements outstanding at September 30, 2006 on the change in the cost of variable rate debt.

Table of Contents

Energy Cost Risk

We use derivative financial instruments to manage the risk that changes in gasoline cost will have on the future financial results of the Company. We purchase futures contracts to effectively hedge a portion of anticipated gasoline purchases. The futures contracts are reflected at fair value in the consolidated balance sheet and the related gains or losses on these contracts are deferred in stockholders' equity (as a component of other comprehensive income) for contracts that cash flow hedge accounting is achieved or in the statements of operations depending on the effectiveness of the hedge. Upon settlement of each contract, the actual gain or loss is reflected in gasoline expense. The current fair market value of all outstanding contracts at September 30, 2006 is a negative \$0.4 million.

Foreign Currency Exchange Risk

We have material foreign subsidiaries located in Canada. The assets and liabilities of these subsidiaries are denominated in the Canadian dollar and as such are translated into U.S. dollars at the exchange rate in effect at the balance sheet date. Results of operations are translated using the average exchange rates throughout the period. The effect of exchange rate fluctuations on translation of assets and liabilities are recorded as a component of stockholders' equity. Gains and losses from foreign currency transactions are included in results of operations.

ITEM 4. CONTROLS AND PROCEDURES

Under the supervision and with the participation of our management, including our chief executive officer and chief financial officer, we conducted an evaluation of our disclosure controls and procedures, as such term is defined under Rule 13a-15(e) or Rule 15d-15(e) promulgated under the Securities Exchange Act of 1934, as amended, as of the end of the period covered by this Form 10-Q. Based on their evaluation, our chief executive officer and chief financial officer concluded that the Company's disclosure controls and procedures are effective.

There have been no changes (including corrective actions with regard to significant deficiencies or material weaknesses) in our internal controls over financial reporting that occurred during the period covered by this Form 10-Q that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents

**PART II
OTHER INFORMATION**

ITEM 1A. RISK FACTORS

In addition to the other information set forth in this Quarterly Report on Form 10-Q, you should carefully consider the factors discussed in Part I, Item 1A. Risk Factors in our Annual Report on Form 10-K for the year ended July 1, 2006, which could materially affect our business, financial condition or future results. The risks described in our Annual Report on Form 10-K are not the only risks we face. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition and/or operating results.

ITEM 6. EXHIBITS

a. Exhibits

10.1 Executive Employment Agreement with Richard L. Marcantonio entered into as of August 31, 2004.

31.1 Certification of Chief Executive Officer pursuant to Securities Exchange Act Rule 13a-14(a)/15d-14(a) as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.

31.2 Certification of Chief Financial Officer pursuant to Securities Exchange Act Rule 13a-14(a)/15d-14(a) as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.

32.1 Certification of Chief Executive Officer pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.

32.2 Certification of Chief Financial Officer pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
