Notes to Schedule of Investments

* Denotes non-income producing security

- (1) Direct investments are generally restricted as to resale and do not have a readily available resale market. On the date of acquisition of each direct investment, there were no market quotations on similar securities, and such investments were therefore initially valued at acquisition cost. The procedures applied by the Board of Directors in arriving at its estimate of value of securities without readily available market values comply with the China Fund, Inc.'s (the "Fund") policies for valuing Direct Investments at original cost unless the Board of Directors, based on advice from the Direct Investment Manager, concludes that there has been a material change of a long-term nature and sufficient reliable information is available to revalue these investments. Determination of fair values involves subjective judgment and, because of the inherent uncertainty of valuation, the Board of Directors' estimated values may differ significantly from the values that would have been used had a ready market for the securities existed, and the differences could be material.
- (2) Security valued at fair value using methods determined in good faith by or at the direction of the Board of Directors (see note (1) above).
- (3) Warrants issued by Citigroup Global Markets Holdings.
- (4) Warrants issued by Credit Lyonnais (CLSA)
- (5) This investment is listed on the Singapore Stock Exchange, however is still managed by ADCM.

THE CHINA FUND, INC.
 SCHEDULE OF INVESTMENTS (CONTINUED)
 JULY 31, 2006 (UNAUDITED)

 + Affiliated issuer, as defined in the Investment Company Act of 1940, includes issuers in which the Fund held 5% or more of the outstanding securities.

Edgar Filing: CHINA FUND INC - Form N-Q

- (A) Portfolio securities listed on recognized United States or foreign securities exchanges are valued at the last quoted sales price in the principal market where they are traded. Listed securities with no such sales price and unlisted securities are valued at the mean between the current bid and asked prices, if any, of two brokers. Short-term investments having maturities of sixty days or less are valued at amortized cost (original purchase cost as adjusted for amortization of premium or accretion of discount) which when combined with accrued interest approximates market value. Securities for which market quotations are readily available are valued at current market value. Securities for which market quotations are not readily available are valued in good faith at fair value using methods determined by the Board of Directors. Direct Investments not traded on an exchange are valued at fair value as determined by the Board of Directors based on advice from the Direct Investment Manager, ADCM. The Direct Investment's original cost is considered to be fair value unless the Board of Directors, based on such advice, concludes there has been a material change of a long-term nature and sufficient reliable information is available to revalue these investments.

The Fund's investments in China companies involve certain risks not typically associated with investments in securities of U.S. companies or the U.S. Government, including risks relating to (1) social, economic and political uncertainty; (2) price volatility, lesser liquidity and smaller market capitalization of securities markets in which securities of China companies trade; (3) currency exchange fluctuations, currency blockage and higher rates of inflation; (4) controls on foreign investment and limitations on repatriation of invested capital and on the Fund's ability to exchange local currencies for U.S. dollars; (5) governmental involvement in and control over the economy; (6) risk of nationalization or expropriation of assets; (7) the nature of the smaller, less seasoned and newly organized China companies, particularly in China; and (8) the absence of uniform accounting, auditing and financial reporting standards, practices and disclosure requirements and less government supervision and regulation.

- ** At July 31, 2006, aggregate gross unrealized appreciation for all securities for which there was an excess of value over financial reporting cost was \$145,774,442 and aggregate gross unrealized depreciation for all securities for which there was an excess of financial reporting cost over value was \$18,736,174 and net appreciation for financial reporting purposes was \$127,038,268. At July 31, 2006, aggregate cost for financial reporting purposes was \$274,419,859.

- (b) There were no changes in the registrant's internal control over financial reporting (as defined in Rule 30a-3(d) under the 1940 Act (17 CFR 270.30a-3(d))) that occurred during the registrant's last fiscal quarter that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting.
