PART I

Item 1. Business

(a) General Development of the Business

Yellow Corporation and its wholly-owned subsidiaries are collectively referred to as "the company." The company provides international, national and regional less-than-truckload, or "LTL", truckload, and non-asset-based transportation services through our three principal operating units (Yellow Transportation, Inc., SCS Transportation, Inc. and Meridian IQ, LLC) and captive technology company (Yellow Technologies, Inc.). The company's primary focus is the movement of goods and materials for business customers internationally, nationally and regionally. In addition, the company has broadened its focus to include transportation management and logistics consulting services.

In the second quarter of 1998, the company sold Preston Trucking Company, its northeast regional LTL segment, to a management group of three senior officers of Preston Trucking Company. In July 1999, Preston Trucking Company ceased operations and commenced liquidation of its assets under federal bankruptcy regulations. In December 1998, the company acquired Action Express, Inc. (Action Express) a regional LTL carrier operating principally in the Pacific Northwest. In July 1999, the company acquired Jevic Transportation, Inc. (Jevic) a specialized LTL carrier that also offers selective truckload services throughout the United States and Canada. The company expanded their portfolio of transportation services with the introduction of Exact Express(R) in 1998, Definite Delivery(R) in 1999 and Standard Ground Regional Advantage(R) in 2000. In 2000, the company and two other venture partners formed Transportation.com, a non-asset based provider of domestic and international forwarding, multi-modal brokerage and transportation management services. In March 2001, the company completed the integration of its western subsidiaries, WestEx, Inc. (WestEx) and Action Express into Saia Motor Freight Line, Inc. (Saia). The historical financial

Edgar Filing: YELLOW CORP - Form 10-K405

and operational information of Saia has been restated to reflect the integration. The company owned a 65 percent interest in Transportation.com until the third quarter of 2001 when the company completed its acquisition of the remaining 35 percent. On December 31, 2001, the company combined Transportation.com and other non-asset based services of Yellow Transportation to form Meridian IQ. In December 2001, the company formed SCS Transportation as a holding company for Saia and Jevic.

3

Item 1. Business (cont.)

(b) Financial Information about Segments

The company has four reportable segments (Yellow Transportation, Saia, Jevic and Meridian IQ) that are strategic operating units offering different products and services. Financial disclosures for these segments are presented in the Business Segments footnote on page 47 of the 2001 Annual Report to Shareholders, which is incorporated herein by reference.

(c) Narrative Description of the Business

Yellow Corporation is a holding company providing transportation services through its subsidiaries, Yellow Transportation, SCS Transportation and Meridian IQ. Yellow Technologies is a subsidiary that provides information technology services to the company and its subsidiaries. The company employed an average of 30,000 persons in 2001.

Our largest operating unit, Yellow Transportation is among the nation's largest transportation service companies providing primarily LTL transportation as well as a full range of asset-based services for the movement of industrial, commercial, and retail goods and materials. Yellow Transportation satisfies the increasingly complex transportation needs of its customers through service offerings such as:

- Exact Express(R)- a premium expedited and time-definite air and ground service with an industry-leading 100% satisfaction guarantee;
- Definite Delivery(R)- a guaranteed on-time service with constant shipment monitoring and proactive notification;
- Standard Ground(R)- ground service with complete coverage of North America;
- Standard Ground Regional Advantage(R)- a high-speed service for shipments moving between 500 and 1500 miles;
- Yellow Global(R)- a branded international freight forwarding and customs brokerage service covering 88 countries; and
- MyYellow.com(R) - a leading edge e-commerce web site offering secure and customized online resources to manage transportation activity.

Yellow Transportation, founded in 1924, serves more than 700,000 manufacturing, wholesale, retail and government customer locations throughout North America. No single customer accounts for more than 6% of Yellow Transportation revenue. Operating from 366 strategically located facilities, service is provided throughout North America, including within

Edgar Filing: YELLOW CORP - Form 10-K405

Puerto Rico and Hawaii. Shipments range from 100 to 40,000 pounds, with an average shipment size of 1,200 pounds traveling an average distance of more than 1,200 miles. Yellow Transportation has over 700 employees with sales responsibilities.

4

Item 1. Business (cont.)

The Yellow Transportation network is driven by proprietary technology developed and supported by Yellow Technologies. Approximately 20,000 primarily Yellow Transportation employees are dedicated to operating the system that supports 230,000 shipments in transit at any time. An operations research and engineering team is responsible for the equipment, routing, sequencing and timing of nearly 60 million miles per month. At December 31, 2001, Yellow Transportation had 7,485 owned tractors, 492 leased tractors, 33,287 owned trailers and 60 leased trailers.

Yellow Transportation, which is based in Overland Park, Kansas, accounted for 76% of total company revenue in 2001, 78% in 2000 and 81% in 1999, respectively.

SCS Transportation, the company's second operating unit, provides regional overnight and second-day transportation, as well as a variety of other transportation and supply chain solutions through its two subsidiaries, Saia, and Jevic. SCS Transportation provides LTL and selected truckload services to a broad range of industries. SCS Transportation employees are not represented by a collective bargaining unit and management believes that relations with its employees are good.

Founded in 1924, Saia is a leading regional LTL carrier that serves the South, Southwest, Pacific Northwest and the West. Saia specializes in offering its customers a range of premium overnight and second-day LTL services, with time-definite and expedited options. Within these service options, Saia provides its customers with the flexibility to handle shipments between 100 and 10,000 pounds.

Saia customers can choose from a wide variety of service options including one- and two-day regional LTL shipping, guaranteed/expedited delivery, selective truckload shipping, consolidation/distribution services, and specialized or customized services. As of December 31, 2001, Saia owned 2,341 tractors and 7,748 trailers.

Since 1998, Saia has invested more than \$14 million in technology to enhance its ability to monitor and manage service operations and profitability. As a result of improved data capabilities, Saia has introduced a trademarked Customer Service Indicators(R) program, allowing customers to monitor service performance. Customers can access the information via the Internet.

Saia operates a network of 110 facilities. The average Saia shipment weight is approximately 1,300 pounds, and average shipment distance is approximately 480 miles. In March 2001, Saia successfully integrated its WestEx and Action Express affiliates into its operations and expanded its geographic reach to 21 states. Saia has approximately 5,100 employees.

5

Edgar Filing: YELLOW CORP - Form 10-K405

Item 1. Business (cont.)

Saia, which is headquartered in a suburb of Atlanta, Georgia, accounted for 15% of total company revenue in 2001, 13% in 2000 and 14% in 1999, respectively.

Founded in 1981, Jevic is a specialized LTL provider that also offers selective truckload services throughout the continental United States and Canada. Jevic specializes in offering its customers standard and customized regional trucking solutions based on its non-traditional Breakbulk-Free(R) operating model, which often eliminates the need to rehandle freight at interim and destination facilities. In 2001, average shipment weights were approximately 4,700 pounds, and the average shipment distance was approximately 725 miles. As of December 31, 2001, Jevic owned 1,300 tractors and 2,727 trailers and operated nine facilities. Jevic has approximately 2,400 employees.

The Jevic approach offers customers a broad line of LTL and truckload services that can accommodate a wider range of shipment sizes and trip lengths than traditional regional carriers. Jevic develops integrated solutions for customers designed to lower their overall supply chain costs, which can include direct-to-customer deliveries, multi-shipper order consolidation for their inbound supplies, and express and time-definite deliveries. Approximately half of Jevic's trailers are heated and service customers with temperature-sensitive requirements. Jevic is a partner with the American Chemistry Council Responsible Care Program and derives over 40 percent of its revenue from chemical and chemical related segments.

Jevic technology is crucial to its unique Breakbulk-Free(R) LTL operating model. Jevic uses the Qualcomm OmniTRACS satellite-based communications system, facilitating the load planning and capacity management processes critical to its operating structure. To leverage this information, Jevic has developed a proprietary suite of programs called PreSys(R) (predictive systems) that allow early warning of potential problems and corrective action to minimize service failures.

Jevic, which is headquartered in the Philadelphia metropolitan area, accounted for 9% of total company revenue in 2001, 9% in 2000 and 4% in 1999 from its acquisition date on July 9, 1999, respectively.

Item 1. Business (cont.)

Our third business unit, Meridian IQ, is a non-asset-based company utilizing web-based technology to provide customers a single source for their logistics planning, global shipment management and execution needs. Meridian IQ is designed to deliver a wide range of transportation solutions, providing customers improved return-on-investment results through flexible, fast and easy-to-implement transportation services and technology management solutions. By combining the current non-asset-based businesses of Yellow Transportation under one umbrella, Meridian IQ has an immediate revenue stream and 8,500 customers.

Edgar Filing: YELLOW CORP - Form 10-K405

Meridian IQ offers the following services:

- International Forwarding and Customs Brokerage -- arranging for the administration, transportation and delivery of goods to over 88 countries.
- Multi-modal Brokerage Services -- providing companies with daily shipment needs with access to volume capacity and specialized equipment at competitive rates.
- Domestic Forwarding and Expedited Services -- arranging guaranteed, time definite transportation for companies that have shipment needs within North America that demand time-sensitive delivery options and guaranteed reliability.
- Transportation Solutions and Technology Management -- Web-based Transportation Management Systems enables an organization to manage its transportation network centrally with increased efficiency and visibility to all activities. When combined with network consulting and operations management, any size organization can outsource transportation functions partially or entirely with Meridian IQ.

Meridian IQ and Yellow Transportation create complementary service offerings with the ability for each to generate revenue for the other. Meridian IQ has attracted new transportation and technology management customers who utilize the Yellow Transportation service portfolio. Through its strong relationships, Yellow Transportation has introduced its customers to Meridian IQ for value added transportation technology and management services. Meridian IQ has approximately 220 employees and is headquartered in Overland Park, Kansas.

Yellow Technologies, a captive corporate resource, was established for the purpose of creating competitive advantages for Yellow businesses by delivering innovative information solutions and technology services. In addition to delivering and supporting highly integrated applications and solutions, Yellow Technologies provides technical, network, security, and data services, and enterprise system management of the technology infrastructure. Yellow Technologies and Meridian IQ together provide hosting, infrastructure services, and managed transportation business systems development. Yellow Technologies has approximately 325 employees and is headquartered in Overland Park, Kansas.

7

Item 1. Business (cont.)

Shippers have an increasingly wide range of choices. We believe that service quality, performance, service variety, responsiveness, and flexibility are the important competitive differentiators.

Few U.S.-based players offer comparably broad service capabilities. By integrating traditional ground, expedited, air cargo, and managed transportation solutions, the company provides customers with a single source answer to shipping challenges with a foundation of service excellence and quality as its basis. Our market studies show a continued preference among customers for transportation providers based on quality and value, and the company is positioned to grow given our strategic focus. By increasing

Edgar Filing: YELLOW CORP - Form 10-K405

the depth of the services we offer, the company can successfully compete against the largest transportation players from a value perspective.

Yellow Transportation operates in a highly competitive environment against a wide range of transportation service providers. These competitors include a small number of large, national transportation services providers similar in size and scope to Yellow Transportation, a moderate number of regional or inter-regional providers and a large number of relatively small, shorter-haul transportation companies. Yellow Transportation also competes in and against several modes of transportation, including LTL, truckload, air cargo, rail, consolidators and private fleets.

SCS Transportation focuses primarily on regional business and operates in a highly competitive environment against a wide range of transportation service providers. These competitors include a small number of large, national transportation services providers in the long haul market and two-day markets and a large number of shorter-haul or regional transportation companies in the two-day and overnight market. SCS Transportation also competes in and against several modes of transportation, including LTL, truckload and private fleets.

Entry into the LTL trucking industry on a small scale with a limited service area is relatively easy. The larger the service area, the greater the barriers to entry due to the need for broader geographic coverage and additional equipment and facility requirements associated with this coverage. The level of technology applications required and the ability to generate shipment densities that provide adequate labor and equipment utilization also make larger-scale entry into the market difficult.

The competition of Meridian IQ includes transportation management systems providers, domestic and international freight forwarders, freight brokers, and third party logistic companies.

Item 1. Business (cont.)

The company's business is subject to a number of general economic factors that may have a materially adverse effect on the results of our operations, many of which are largely out of the company's control. These include recessionary economic cycles and downturns in customers' business cycles, particularly in market segments and industries, such as retail and manufacturing, where we have a significant concentration of customers. Economic conditions may adversely affect our customers' business levels, the amount of transportation services they need and their ability to pay for our services. It is not possible to predict the medium or long-term effects of the September 11, 2001 terrorists attacks and subsequent events on the economy or on customer confidence in the United States, or the impact, if any, on our future results of operations. The company operates in a highly price-sensitive and competitive industry, making pricing, customer service, effective asset utilization, and cost control major competitive factors. No single customer accounts for more than 6% of the company's total revenue. Yellow Transportation and SCS Transportation revenues are subject to seasonal variations. Customers tend to reduce shipments after the winter holiday season, and operating expenses tend to be higher in the winter months primarily due to colder weather, which causes higher fuel consumption

Edgar Filing: YELLOW CORP - Form 10-K405

from increased idle time. Generally, the first quarter is the weakest while the third quarter is the strongest. The availability and cost of fuel and labor can significantly impact the company's cost structure and earnings.

The company's operations are further described in Management's Discussion and Analysis in the 2001 Annual Report to Shareholders, which is incorporated herein by reference.

The company's liquidity needs arise primarily from capital investment in new equipment, land and structures and information technology, as well as funding working capital requirements. To ensure short-term and longer-term liquidity, the company maintains capacity under a bank credit agreement and an asset backed securitization (ABS) agreement involving Yellow Transportation accounts receivable. The company can operate with negative working capital because of the quick turnover of its accounts receivable and its ready access to sources of short-term liquidity.

The trucking industry has been substantially deregulated following the enactment of the Motor Carrier Act of 1980, the Trucking Industry Regulatory Reform Act of 1994, the Federal Aviation Administration Authorization of 1994, and the ICC Termination Act of 1995. Prices and services are now largely free of regulatory controls, although the states retained the right to require compliance with safety and insurance requirements and interstate motor carriers remain subject to certain regulatory controls imposed by agencies within the U.S. Department of Transportation.

9

Item 1. Business (cont.)

The trucking industry is also subject to regulatory and legislative changes, which can affect the economics of the industry. The trucking industry is also regulated by various state agencies, and our operations are also subject to various federal, state and local environmental laws and regulations dealing with transportation, storage, presence, use, disposal and handling of hazardous materials, discharge of storm-water and underground fuel storage tanks.

We believe that our operations are in substantial compliance with current laws and regulations and do not know of any existing condition that would cause compliance with applicable regulations to have a material adverse effect on the company's business or operating results.

Future Outlook

Consistent with the views of most economists, the company expects it will be the second half of 2002 before meaningful economic improvement materializes. The pricing environment is expected to be very competitive over the course of 2002. Given the experience with successful yield and cost management initiatives, all Yellow operating companies are well positioned for strong improvement as the economy rebounds.

At Yellow Transportation, approximately 80 percent of the employees are represented by the International Brotherhood of Teamsters under a 5-year contract that expires in March 2003. Contract discussions are underway and negotiations toward a new National Master Freight Agreement will accelerate as 2002 progresses.

Edgar Filing: YELLOW CORP - Form 10-K405

The pricing and availability of most forms of insurance, including surety bonds, have recently been impacted by the events of September 11 and by several well-publicized bankruptcies of large companies. The company expects continued access to appropriate insurance coverage; however, the premiums paid for this coverage are projected to increase significantly. In 2001, insurance premiums represented less than one-half percent of consolidated revenue. Given the size and financial strength of the company, the additional premium expenses are not expected to have a material adverse impact on financial position or results of operations. The lack of availability of surety bonds could require the company to issue additional letters of credit, which reduce available capacity under the revolving credit facility.

10

Item 1. Business (cont.)

SCS Transportation was formed in December 2001 as a holding company for Saia and Jevic. The formation of this holding company represents progress toward the strategic objective of separating the regional companies from Yellow Corporation. Assuming favorable market conditions, the company expects to spin-off SCS Transportation to shareholders during 2002.

Statements contained in this document that are not purely historical are forward looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, including statements regarding the company's expectations, hopes, beliefs and intentions on strategies regarding the future. It is important to note that the company's actual future results could differ materially from those projected in such forward-looking statements because of a number of factors, including but not limited to inflation, labor relations, inclement weather, price and availability of fuel, competitor pricing activity, expense volatility, changes in and customer acceptance of new technology, changes in equity and debt markets and a downturn in general or regional economic activity.

(d) Financial Information About Geographic Areas

The company's revenue from foreign sources is largely derived from Canada and Mexico. Revenue from foreign sources is discussed in the "Business Segments" footnote on page 48 of the registrant's Annual Report to Shareholders for the year ended December 31, 2001, which is incorporated herein by reference. Foreign source revenue was not material to consolidated financial results in 2001, 2000 and 1999, respectively.

Item 2. Properties

The company's asset-based operating subsidiaries (Yellow Transportation, Saia and Jevic) each provide their transportation services through separate networks, principally consisting of a fleet of tractors and trailers and real estate terminal facilities.

11

Item 2. Properties (cont.)

Edgar Filing: YELLOW CORP - Form 10-K405

At December 31, 2001, the company operated a total of 479 freight terminals located in 50 states, Puerto Rico, Canada and Mexico. Of this total, 237 were owned terminals and 242 were leased, generally for terms of three years or less. The number of vehicle back-in doors totaled 16,832, of which 12,795 were at owned terminals and 4,037 were at leased terminals. The freight terminals vary in size ranging from one to three doors at small local terminals, to over 300 doors at Yellow Transportation's largest consolidation and distribution terminal. Substantially all of the larger terminals, containing the greatest number of doors, are owned. In addition, the company and most of its subsidiaries own and occupy general office buildings in their headquarters city.

The company's facilities and equipment are adequate to meet current business requirements. Projected net capital expenditures for 2002 are \$115 million, a decrease over 2001 net capital expenditures of \$121 million. Net capital for both periods pertain primarily to replacement of revenue equipment, additional investments in information technology, land and structures.

Item 3. Legal Proceedings.

The information set forth under the "Commitments, Contingencies and Uncertainties" on page 47 in the Notes to Consolidated Financial Statements of the registrant's Annual Report to Shareholders for the year ended December 31, 2001, is incorporated by reference under Item 14 herein.

Item 4. Submission of Matters to a Vote of Security Holders

None.

12

Executive Officers of the Registrant

The names, ages and positions of the executive officers of the company as of March 8, 2002 are listed below. Officers are appointed annually by the Board of Directors at their meeting that immediately follows the annual meeting of shareholders.

Name ----	Age ---	Position(s) Held -----
William D. Zollars	54	Chairman of the Board, President and Chief Executive Officer of the company (since November 1999); President of Yellow Transportation (September 1996 to November 1999); President Ryder Integrated Logistics, Inc. (1996 to 1999)
William F. Martin, Jr.	54	Senior Vice President, Legal and Corporate Secretary of the company (since December 1993); Vice President of the company (prior to December 1993); Vice President and Secretary of Yellow Transportation (prior to March 2002)

Edgar Filing: YELLOW CORP - Form 10-K405

Donald G. Barger, Jr.	59	Senior Vice President and Chief Financial Officer of the company (since November 2000); Vice President and Chief Financial Officer of Hillenbrand Industries, Inc. (1998 to November 2000); Vice President and Chief Financial Officer for Hillenbrand Industries (1993-1998).
Gregory A. Reid	49	Senior Vice President and Chief Marketing Officer (since December 2001); Senior Vice President and Chief Marketing Officer (November 2000 to December 2001); Senior Vice President Sales and Marketing for Yellow Transportation (since November 2000); Vice President and General Manager of Yellow Integrated Logistics' Western Region (prior to November 2000).
Stephen L. Bruffett	38	Vice President and Treasurer (since July 2000); Vice President of Strategic Analysis for Yellow Transportation (since July 2000); Director of Finance for American Freight Lines (June 1998).

The terms of each officer of the company designated above are scheduled to expire April 18, 2002. The terms of each officer of the subsidiary companies are scheduled to expire on the date of the next annual meeting of shareholders of that company. No family relationships exist between any of the executive officers named above.

(b) Reports on Form 8-K

January 29, 2002 - Yellow Corporation announced its adoption of a Rule 10B5-1 Trading Plan Option and potential impairment of Jevic goodwill under FASB Statement of Financial Accounting Standards No. 142.

February 25, 2002 - Yellow Corporation announced adoption of FASB Statement of Financial Accounting Standards No. 142, "Goodwill and Other Intangible Assets", effective January 1, 2002. The company has determined that 100 percent of the Jevic goodwill is impaired and will record a non-cash charge of \$75.2 million in the first quarter of 2002, which will be reflected as a cumulative change in accounting principle.

Report of Independent Public
Accountants on Financial Statement Schedule

To the Shareholders of Yellow Corporation:

We have audited in accordance with auditing standards generally accepted in the United States, the consolidated financial statements included in Yellow Corporation's annual report to shareholders incorporated by reference in this Form 10-K, and have issued our report thereon dated January 25, 2002. Our audit was made for the purpose of forming an opinion on those statements taken as a whole. The schedule of valuation and qualifying accounts (Schedule II) is the responsibility of the company's management and is presented for purposes of complying with the Securities and Exchange Commission's rules and is not part of the basic consolidated financial statements. This schedule has been subjected to the auditing procedures applied in the audit of the basic consolidated financial statements and, in our opinion, fairly states in all material respects the financial data required to be set forth therein in relation to the basic consolidated financial statements taken as a whole.
