Disclosure Regarding Forward-Looking Statements

This Annual Report on Form 10-K contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934 (the Exchange Act) relating to our operations, results of operations and other matters that are based on our current expectations, estimates, assumptions and projections. Words such as may, will, should, likely, anticipates, expects, intends, plans, projects, estimates and similar expressions are used to identify these forward-looking statements. These statements are not guarantees of future performance and involve risks, uncertainties and assumptions that are difficult to predict. Forward-looking statements are based upon assumptions as to future events that might not prove to be accurate. Actual outcomes and results could differ materially from what is expressed or forecast in these forward-looking statements. Risks, uncertainties and other factors that might cause such differences, some of which could be material, include, but are not limited to, the factors discussed below under the section entitled Risk Factors.

Available Information

Our website address is www.accenture.com. We make available free of charge on the Investor Relations section of our website (<http://investor.accenture.com>) our Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and all amendments to those reports as soon as reasonably practicable after such material is electronically filed or furnished with the Securities and Exchange Commission (the SEC) pursuant to Section 13(a) or 15(d) of the Exchange Act. We also make available through our website other reports filed with or furnished to the SEC under the Exchange Act, including our proxy statements and reports filed by officers and directors under Section 16(a) of that Act, as well as our Code of Business Ethics. We do not intend for information contained in our website to be part of this Annual Report on Form 10-K.

Any materials we file with the SEC may be read and copied at the SEC's Public Reference Room at 100 F Street, N.E., Washington, DC, 20549. Information on the operation of the Public Reference Room may be obtained by calling the SEC at 1-800-SEC-0330. The SEC maintains an Internet site (<http://www.sec.gov>) that contains reports, proxy and information statements, and other information regarding issuers that file electronically with the SEC.

In this Annual Report on Form 10-K, we use the terms Accenture, we, our Company, our and us to refer to Accenture Ltd and its subsidiaries. All references to years, unless otherwise noted, refer to our fiscal year, which ends on August 31.

ITEM 1. BUSINESS

Overview

Accenture is one of the world's leading management consulting, technology services and outsourcing organizations, with approximately 170,000 employees; offices and operations in more than 150 cities in 49 countries; and revenues before reimbursements of \$19.70 billion for fiscal 2007.

Our high performance business strategy builds on our expertise in consulting, technology and outsourcing to help clients perform at the highest levels so they can create sustainable value for their customers, stakeholders and shareholders. We use our industry and business-process knowledge, our service offering expertise and our insight into and deep understanding of emerging technologies to identify new business and technology trends and formulate and implement solutions for clients under demanding time constraints. We help clients identify and enter new markets,

increase revenues in

1

existing markets, improve operational performance and deliver their products and services more effectively and efficiently.

We operate globally with one common brand and business model designed to enable us to provide clients around the world with the same high level of service. Drawing on a combination of industry expertise, functional capabilities, alliances, global resources and technology, we deliver competitively priced, high-value services that help our clients measurably improve business performance. Our global delivery model enables us to provide a complete end-to-end delivery capability by drawing on Accenture's global resources to deliver high-quality, cost-effective solutions to clients under demanding timeframes.

Consulting, Technology and Outsourcing Services and Solutions

Our business is structured around five operating groups, which together comprise 17 industry groups serving clients in major industries around the world. Our industry focus gives us an understanding of industry evolution, business issues and applicable technologies, enabling us to deliver innovative solutions tailored to each client or, as appropriate, more-standardized capabilities to multiple clients.

Our three growth platforms—management consulting, systems integration and technology, and outsourcing—are the innovation engines through which we develop our knowledge capital; build world-class skills and capabilities; and create, acquire and manage key assets central to the development of solutions for our clients. The subject matter experts within these areas work closely with the professionals in our operating groups to develop and deliver solutions to clients.

Client engagement teams—which typically consist of industry experts, capability specialists and professionals with local market knowledge—leverage the full capabilities of our global delivery model to deliver price-competitive solutions and services.

Operating Groups

The following table shows the organization of our five operating groups and their 17 industry groups. For financial reporting purposes, our operating groups are our reportable operating segments. We do not allocate total assets by operating group, although our operating groups do manage and control certain assets. For certain historical financial information regarding our operating groups (including certain asset information), as well as financial information by geographical areas (including long-lived asset information), see Note 16 (Segment Reporting) to our Consolidated Financial Statements below under Financial Statements and Supplementary Data.

Communications & High Tech

We are a leading provider of management consulting, technology, systems integration and outsourcing services and solutions to the communications, electronics, high technology, media and entertainment industries. Our Communications & High Tech professionals help clients enhance their business results through industry-specific solutions and by seizing the opportunities made possible by the convergence of communications, computing and content. Examples of our services and solutions include the application of mobile technology, advanced communications network optimization, broadband and Internet protocol solutions, product innovation and digital rights management as well as systems integration, customer care, supply chain and workforce transformation services. In support of these services, we selectively pursue strategic acquisitions and have developed an array of assets, repeatable solutions, methodologies and research facilities to demonstrate how new technologies and industry-leading practices can be applied in new and innovative ways to enhance our clients' business performance. In fiscal 2007, our revenues before reimbursements from multiple contracts with a single client in our Communications & High Tech operating group for the first time was greater than 10% in an annual period, exceeding it by a few percentage points. Our Communications & High Tech operating group comprises the following industry groups:

Communications. Our Communications industry group serves many of the world's leading wireline, wireless, cable and satellite communications network operators and service providers. We provide a wide range of services designed to help our communications clients increase margins, improve asset utilization, improve customer retention, increase revenues, reduce overall costs and accelerate sales cycles. We offer a suite of reusable solutions, called Accenture Communications Solutions, designed to address major business and operational issues related to broadband and Internet protocol-based networks and services, including business intelligence, billing transformation, customer contact transformation, sales force transformation, service fulfillment and next-generation network optimization. Our Communications industry group represented approximately 62% of our Communications & High Tech operating group's revenues before reimbursements in fiscal 2007.

Electronics & High Tech. Our Electronics & High Tech industry group serves the communications technology, consumer technology, enterprise technology, semiconductor, software and aerospace/defense segments. This industry group provides services in areas such as strategy, enterprise resource management, customer relationship management, supply chain management, software development, human performance, and merger/acquisition activities, including post-merger integration. We also offer a suite of reusable solutions, called Accenture High Tech Solutions, designed to address the industry's major business and operational challenges, such as new product innovation and development, customer service and support, sales and marketing, and globalization. Our Electronics & High Tech industry group represented approximately 30% of our Communications & High Tech operating group's revenues before reimbursements in fiscal 2007.

Media & Entertainment. Our Media & Entertainment industry group serves the broadcast, entertainment (television, music and movie), print, publishing and portal industries. Professionals in this industry group provide a wide range of services, including digital content solutions designed to help companies effectively manage, distribute and protect content across numerous media channels. These include Accenture Digital Media Services, which provide a comprehensive solution set to leading content owners and distributors, helping them adapt their organizations' business processes and systems to stay ahead of the demand for digital content and services.

Financial Services

Our Financial Services operating group focuses on the opportunities created by our clients' needs to adapt to changing market conditions, including increased cost pressures, industry consolidation, regulatory changes, the creation of common industry standards and protocols, and the move to a more integrated industry model. We help clients meet these challenges through a variety of assets, services and solutions, including consulting and outsourcing strategies to increase cost efficiency and transform businesses, and customer relationship management initiatives that enable them to acquire and retain profitable customers and improve their cross-selling capabilities. Our Financial Services operating group comprises the following industry groups:

Banking. Our Banking industry group works with retail and commercial banks and diversified financial enterprises. We help these organizations develop and execute strategies to target, acquire and retain customers more effectively, expand product and service offerings, comply with new regulatory initiatives, and leverage new technologies and distribution channels. Our Banking industry group represented approximately 56% of our Financial Services operating group's revenues before reimbursements in fiscal 2007.

Capital Markets. Our Capital Markets industry group helps investment banks, broker/dealers, asset-management firms, depositories, clearing organizations and exchanges improve operational efficiency and transform their businesses to increase competitiveness. For example, we help clients develop and implement innovative trading, asset-management and market-information-management systems and solutions.

Insurance. Our Insurance industry group helps property and casualty insurers, life insurers, reinsurance firms and insurance brokers improve business processes, modernize their technologies and improve the quality and consistency of risk selection decisions. Our Insurance industry group offers a claims management capability that enables insurers to provide better customer service while optimizing claims costs, as well as industry-leading insurance policy administration technology solutions that enable insurers to bring products to market more quickly and reduce costs. We also provide a variety of outsourced solutions to help insurers improve working capital and cash flow, deliver permanent cost savings and enhance long-term growth.

Products

Our Products operating group comprises the following industry groups:

Automotive. Our Automotive industry group works with auto manufacturers, suppliers, dealers, retailers and service providers. Professionals in this industry group help clients develop and implement innovative solutions focused on product development and commercialization, customer service and retention, channel strategy and management, branding, buyer-driven business models, cost reduction, customer relationship management and integrated supplier partnerships.

Consumer Goods & Services. Our Consumer Goods & Services industry group serves food, beverage, household goods and personal care, tobacco and footwear/apparel manufacturers around the world. We add value to these companies through service offerings designed to enhance performance by addressing critical elements of success, including sales and marketing productivity, customer and consumer insight, working capital productivity improvement, supply chain collaboration, and overhead productivity improvement.

Health & Life Sciences. Our Health & Life Sciences industry group works with healthcare providers, government health departments, policy-making authorities/regulators, managed care organizations, health insurers and pharmaceutical, biotechnology, medical products and other industry-related companies to improve the quality, accessibility and affordability of healthcare. Our key offerings include health clinical transformation, electronic health records and hospital back-office services in the provider/government segment; research and development transformation, commercial effectiveness and customer interaction, and integrated electronic compliance (manufacturing and supply chain) in the pharmaceuticals and medical products segment; and health information and data management, claims excellence/cost containment and health plan back-office services in the payor segment.

Industrial Equipment. Our Industrial Equipment industry group serves the industrial and electrical equipment, construction, consumer durable and heavy equipment industries. We help our clients increase operating and supply chain efficiencies by improving processes and leveraging technology. We also help clients generate value from strategic mergers and acquisitions. In addition, our Industrial Equipment industry group develops and deploys innovative solutions in the areas of channel management, collaborative product design, remote field maintenance, enterprise application integration and outsourcing.

Retail. Our Retail industry group serves a wide spectrum of retailers and distributors, including supermarkets, specialty premium retailers and large mass-merchandise discounters. We provide service offerings that help clients address new ways of reaching the retail trade and consumers through precision marketing; maximize brand synergies and cost reductions in mergers and acquisitions; improve supply chain efficiencies through collaborative commerce business models; and enhance the efficiency of internal operations.

Transportation & Travel Services. Our Transportation & Travel Services industry group serves companies in the airline, freight transportation, third-party logistics, hospitality, gaming, car rental, passenger rail and travel distribution industries. We help clients develop and implement strategies and solutions to improve customer relationship management capabilities, operate more-efficient networks, integrate supply chains, develop procurement and electronic business marketplace strategies, and more effectively manage maintenance, repair and overhaul processes and expenses. Through our Navitaire subsidiary, we offer airlines a range of transaction-processing services on an outsourced basis, including distribution, Internet reservations, airport check-in, revenue management and accounting, crew scheduling and management, and disruption recovery.

Resources

Our Resources operating group serves the chemicals, energy, forest products, metals and mining, utilities and related industries. With market conditions driving energy companies to seek new ways of creating value for shareholders, deregulation fundamentally reforming the utilities industry and yielding cross-border opportunities, and an intensive focus on productivity and portfolio management in the chemicals industry, we are working with clients to create innovative solutions that are designed to help them differentiate themselves in the marketplace and gain competitive advantage. Our Resources operating group comprises the following industry groups:

Chemicals. Our Chemicals industry group works with a wide cross-section of industry segments, including petrochemicals, specialty chemicals, polymers and plastics, gases and life science companies. We also have long-term outsourcing contracts with many industry leaders.

Energy. Our Energy industry group serves a wide range of companies in the oil and gas industry, including upstream, downstream and oil services companies. Our key areas of focus include helping clients optimize production, manage the hydrocarbon supply chain, streamline retail operations and realize the full potential of third-party enterprise-wide technology solutions. In addition, our multi-client outsourcing centers enable clients to increase operational efficiencies and exploit cross-industry synergies. Our Energy industry group represented approximately 31% of our Resources operating group's revenues before reimbursements in fiscal 2007.

Natural Resources. Our Natural Resources industry group serves the forest products and metals and mining industries. We help lumber, pulp, papermaking, converting and packaging companies, as well as iron, steel, aluminum, coal, copper and precious metals companies, develop and implement new business strategies, redesign business processes, manage complex change initiatives, and integrate processes and technologies to achieve higher levels of performance.

Utilities. Our Utilities industry group works with electric, gas and water utilities around the world to respond to an evolving and highly competitive marketplace. The group's work includes helping utilities transform themselves from regulated, and sometimes state-owned, local entities to global deregulated corporations, as well as developing diverse products and service offerings to help our clients deliver higher levels of service to their customers. These offerings include customer relationship management, workforce enablement, supply chain optimization, and trading and risk management. We also provide a range of outsourced customer-care services to utilities and retail energy companies in North America. Our Utilities industry group represented approximately 40% of our Resources operating group's revenues before reimbursements in fiscal 2007.

Public Service

Our Public Service operating group (known as our Government operating group prior to September 1, 2007) helps public-service entities around the world improve the social and economic conditions of their citizens. The public-service marketplace is transforming, and traditional governmental entities are working increasingly with the third sector—non-governmental organizations, community-based organizations, educational institutions, charities and non-profit organizations—to deliver services and benefits to citizens.

We typically work with defense, revenue, human services, health, postal, and justice and public-safety authorities or agencies, and our clients are generally national, provincial or state-level government organizations, as well as local or regional governments. We also work with multinational organizations. Our work with clients in the U.S. Federal government represented approximately 33% of our Public Service operating group's revenues before reimbursements in fiscal 2007.

Our offerings help public-sector clients address their most pressing needs, including developing fair and equitable tax systems that help enhance revenues; ensuring the security of citizens and businesses; improving service delivery; and increasing operational efficiency. We work with clients to transform their customer-facing and back-office operations and enable services to be delivered through appropriate technologies that make government more accessible, in a manner consistent with expectations established in the private sector.

The Accenture Institute for Public Service Value is our research organization that helps our public-sector clients assess the value they add to the sector in much the same way shareholder value models measure the value of publicly traded entities. We have pioneered this work through our patent-

pending public service value model. The Institute also focuses on understanding the expectations, desires and disappointments of citizens around the world in order to inform our solutions, and our clients, as public-service transformations continue globally.

Growth Platforms

Our management consulting, systems integration and technology, and outsourcing growth platforms are the skill-based innovation engines through which we develop our knowledge capital; build world-class skills and capabilities; and create, acquire and manage key assets central to the development of solutions for our clients. The professionals within these areas work closely with our operating groups to deliver integrated services and solutions to clients.

Management Consulting

Our management consulting growth platform is responsible for the development and delivery of our strategic, functional, industry and process consulting capabilities, working closely with the professionals in our operating groups. The growth platform comprises five service lines:

Customer Relationship Management. The professionals in our Customer Relationship Management (CRM) service line help companies acquire, develop and retain more profitable customer relationships. We offer a full range of innovative capabilities that address every aspect of CRM, including marketing, direct and indirect sales, customer service, field support and customer contact operations. These capabilities include rigorous approaches to improving the return on marketing investment, methods for building insight into customers purchase habits and service preferences, tailoring offers and service treatment based upon that insight, and unique methods of optimizing the quality, cost and revenue impact of sales and service operations. We use these skills to help our clients accelerate growth, improve marketing and sales productivity and reduce customer-care costs thus increasing the value of their customer relationships and enhancing the economic value of their brands.

Finance & Performance Management. The professionals in our Finance & Performance Management service line work with our clients finance and business unit executives to develop financial transaction processing, risk management and business performance reporting capabilities. Among the services we provide are strategic consulting on the design and structure of the finance function; the establishment of shared service centers; and the configuration of enterprise resource planning platforms for streamlining transaction processing. Our finance capability services also address revenue cycle management, billing, credit risk and collection effectiveness, electronic invoicing and settlement, tax processing, lending and debt recovery. Our performance management services address shareholder value targeting, scorecard and performance metrics development, performance reporting solutions and applied business analytics to improve profitability. Our professionals often utilize the resources of Accenture Finance Solutions, one of our business process outsourcing (BPO) businesses, and work with finance executives to develop and implement solutions that help them align their companies investments with their business objectives and establish security relating to the exchange of information to reporting institutions.

Human Performance. The professionals in our Human Performance service line work with clients on a wide range of talent management, workforce and organizational issues to deliver improved business and operational results. Our integrated approach and end-to-end capabilities include services and solutions in organization and change management, human resources (HR) administration, learning, knowledge management, organizational performance management, talent management, HR information technology (IT) systems implementation and

overall transformation of key workforces. Through our Human Performance service line, we help companies and governments improve the efficiency and effectiveness of their HR services while lowering associated costs; deliver improvements in employee and workforce performance; and transform organizations through project-, program- and enterprise-level change management.

Strategy. Our Strategy professionals combine their strategy and operations experience to help our clients turn insights into results at both the enterprise and business-unit level. With deep skills and capabilities in corporate strategy, corporate restructuring, growth and innovation strategies, mergers and acquisitions, merger integration, organization strategy, pricing strategy and profitability assessment, we help clients develop and execute pragmatic solutions that transform organizations and drive sustained high performance.

Supply Chain Management. The professionals in our Supply Chain Management service line work with clients across a broad range of industries to develop and implement supply chain and operations strategies that enable profitable growth in new and existing markets. Our professionals combine global industry expertise and skills in supply chain strategy, sourcing and procurement, supply chain planning, manufacturing and design, fulfillment and service management to help organizations achieve high performance. We work with clients to implement innovative consulting and outsourcing solutions that align operating models to support business strategies; optimize global operations; support profitable product launches; and enhance the skills and capabilities of the supply chain workforce.

Systems Integration and Technology

Our systems integration and technology growth platform comprises two service areas: systems integration and technology consulting.

Systems Integration

Our key systems integration services include:

Enterprise Solutions and Enterprise Resource Planning. We implement a variety of application software including SAP and Oracle, among others to streamline business processes, systems and information and help organizations access, manage and exploit data to make more-informed business decisions. Our skilled professionals provide planning, implementation and upgrade solutions across the primary application software product suites.

Industry and Functional Solutions. Accenture provides clients with robust, large-scale industry and functional solutions based on proprietary reusable assets, aggregated into industry solutions, such as the Accenture Communications Solutions suite, the Accenture Revenue Solution suite for tax offices, as well as solutions for major industry-specific requirements.

Service-Oriented Architecture. We help CIOs and business leaders use service-oriented architecture to enable improvement in IT efficiency and a more effective alignment between business processes and applications. Accenture guides organizations through a four-phased approach for designing and building flexible IT solutions that enable business process components to be assembled and used more efficiently to deliver distinctive business services and capabilities for higher performance.

Complex Solution Architecture. With deep skills and expertise in both J2EE (Java-based) and .NET technology architectures, we work with clients to address gaps in the functionality provided by commercial packaged applications; address technical aspects of the business

process that are unique to a client; and develop customized technical solutions for business processes for which no packaged solutions are available.

Mobility Solutions. We help clients develop solutions that give their workforces access to key enterprise applications including online trading and wealth management, supply chain management, telematics, radio frequency identification, field force enablement and customer relationship management through mobile devices and/or the Internet. These solutions enable clients to improve efficiency, lower costs, enhance differentiation and ensure compliance.

Microsoft Solutions. Together with our alliance partner Microsoft and our Avanade Inc. subsidiary, we develop and deliver cost-efficient, innovative business solutions based on Microsoft Windows Server and other .NET technologies, leveraging our deep industry expertise and practical applications of leading-edge technologies.

Technology Consulting

Our key technology consulting services include:

IT Strategy & Transformation. We help CEOs and CIOs link IT investments to business results and help manage those investments to ensure that planned business impact is achieved. We also help CIOs transform how IT works, both internally and with business partners, so that IT is run like a business to deliver high performance.

Information Management Services. We provide services to help organizations manage the full range of their information needs to improve data quality, enhance decision-making capabilities and meet compliance requirements. This includes managing both structured data (business intelligence) and unstructured content (content management and portals), as well as developing information strategies and data architectures.

Enterprise Architecture. We provide solutions that integrate IT with business capabilities to provide a seamless operating environment for organizations. Our solutions provide a reference point for measuring both IT investment and results, creating the delivery roadmap that defines how IT systems need to change to drive future business growth and higher performance.

Infrastructure Consulting Services. We provide solutions to help organizations optimize their IT infrastructures while reducing costs. From data center, operations engineering and enterprise network design and implementation to desktop and security solutions, our services enable clients to rationalize, standardize, optimize, secure and transform their IT infrastructures for improved performance of mission-critical business processes, applications and end users.

Research & Development. Through Accenture Technology Labs our research and development organization we use new and emerging technologies to develop business solutions that we believe will be the drivers of our clients' growth and enable them to be first to market with unique capabilities. Key areas of research and development for clients include information insight, collaboration, biometrics, virtualized infrastructures, predictive maintenance, Web 2.0 and sensor technologies, among others.

Microsoft Solutions. Together with our alliance partner Microsoft and our Avanade Inc. subsidiary, we design and provide cost-efficient, innovative business solutions based on Microsoft Windows Server and other .NET technologies, leveraging our deep industry expertise and practical applications of leading-edge technologies.

E-Commerce Solutions. We provide clients with solutions that move more of their business and internal operations online to improve productivity, manage costs and drive revenue growth.

We help clients incorporate next-generation e-Commerce technology such as wikis, blogs, crowd-sourcing and mash-ups, among others to create significant opportunities for collaboration and sharing with their employees, suppliers and customers.

Outsourcing

Accenture provides a wide range of outsourcing services, including business process outsourcing, application outsourcing and infrastructure outsourcing.

Business Process Outsourcing. We work with clients to develop and deliver business process innovations that transform their businesses and deliver higher levels of performance and results as well as lower costs. Through our BPO services, we manage specific business processes or functions for clients, providing solutions that are more efficient and cost-effective than if the functions were provided in-house. In addition to providing individual BPO services, we can bundle two or more business functions to provide clients with even greater efficiencies, control and cost savings.

We offer clients across all industries a variety of function-specific BPO services, including finance and accounting, human resources, learning, procurement and customer contact. We also offer specialized services tailored to clients in specific industries. For instance, we offer life insurers policy administration and management services, including high-volume transaction processing capabilities. We provide utilities companies in North America and Europe with field services, as well as specialized customer care, finance and accounting, human resources, supply chain and IT services. We help market-leading health payers improve service performance in core operational functions, coupled with accompanying cost reductions. We provide services to medical organizations that improve and accelerate clinical development productivity. In addition, through our Navitaire subsidiary, we offer airlines a range of transaction-processing services, including distribution, Internet reservations, airport check-in, revenue management and accounting, crew scheduling and management, and disruption recovery.

Application Outsourcing. Accenture takes a holistic approach to application outsourcing that goes beyond traditional cost-cutting measures, helping clients improve the total performance of application development and maintenance. We provide a wide array of application outsourcing services under flexible arrangements, managing custom or packaged software applications including enterprise-wide applications such as SAP and Oracle over their complete development and maintenance life-cycles. The scope of services ranges from standardized, discrete application outsourcing services, including application testing, application management of enterprise-wide software programs and capacity services, to large-scale application enhancement and development for individual or multiple applications, as well as application portfolio rationalization and consolidation. We can also take end-to-end responsibility for all of a client's IT function, including infrastructure and operations, leveraging our shared services delivery groups and our application and infrastructure transformation consulting expertise to deliver significant gains in client productivity, providing services from a variety of locations, including lower-cost locations.

By transferring to Accenture the responsibility for managing one or more of their applications, clients can leverage our assets, scale and global resources as well as our secure, global infrastructure delivery capabilities. This allows clients to maintain and control the overall performance of their IT capabilities while reducing the complexity and costs associated with managing third parties and increasing the flexibility, scalability, predictability and security of their IT infrastructures.

Infrastructure Outsourcing. We deliver an integrated set of managed infrastructure services encompassing all infrastructure functions from network access and desktop management to remote technology support. Services can be delivered as discrete, standalone solutions or bundled with Accenture application outsourcing and BPO services. Our infrastructure outsourcing services include:

IT spend management Asset management, as well as managed procurement and technology spend, to reduce overall IT non-salary spending;

Data server and multi-function services Hosting to support development and production environments, storage services, database management and messaging services;

Service desk Single point of contact for support and online portal services to resolve frontline issues;

Security services Identity management, intrusion and firewall protection, end-user device and messaging security, and policy and awareness;

Communications services Data and voice network management, optimization and converged services; and

Workplace services Lifecycle management for desktops, field services and mobile devices, and file and print services.

Global Delivery Model

A key Accenture differentiator is our strategic global delivery model, which allows us to draw on the benefits of using people and other resources from around the world including scalable, standardized processes, methods and tools; specialized business process and technology skills; cost advantages; foreign-language fluency; proximity to clients; and time-zone advantages to deliver high-quality solutions under demanding time-frames. Emphasizing quality, reduced risk, speed to market and predictability, our global delivery model enables us to provide clients with price-competitive services and solutions that drive higher levels of performance.

A critical component of this capability is our Global Delivery Network, which comprises local Accenture professionals working at client sites around the world as well as more than 40 delivery centers facilities where teams of Accenture technology and business-process professionals use proven assets to create and deliver business and technology solutions for clients. Our delivery centers improve the efficiency of our engagement teams through the reuse of processes, solution designs, infrastructure and software and by leveraging the experience of delivery center professionals.

Professionals in our Global Delivery Network apply a systematic approach to delivering technology consulting, systems integration, application outsourcing and business processing outsourcing solutions and services delivery to create and capture proven, repeatable processes, methodologies, tools and architectures. For example, we continue to evolve our Accenture Delivery Suite, which combines our common methods, tools, architectures and metrics in support of our global delivery efforts. The Accenture Delivery Suite provides us with a common language, framework and reusable assets that allow us to unite our global delivery capabilities into a single, cohesive approach for our client service teams. The Accenture Delivery Suite enables us to start projects quickly, deliver with high quality, and improve our ability to meet our clients' expectations.

Our ability to build seamless global teams leveraging the right professionals with the right skills for each task enables Accenture to provide a complete end-to-end capability, with consistent Accenture processes around the globe. Client teams leverage our Global Delivery Network to deliver

comprehensive, large-scale reusable and customized services and solutions in less time than would be required for our clients to develop them independently.

We continue to expand and enhance our Global Delivery Network, which we believe is a competitive differentiator for us. In fiscal 2007 we further expanded our Global Delivery Network by, among other things, increasing our activities in systems integration, application outsourcing, business process outsourcing and technology consulting areas, opening new facilities and recruiting actively in key locations of our network, including Eastern Europe, India, China and the Philippines. As of August 31, 2007, we had more than 71,000 people in our network globally, a net increase of approximately 23,000 people since the end of fiscal 2006.

Alliances

We have sales and delivery alliances with companies whose capabilities complement our own, either by enhancing a service offering, delivering a new technology or helping us extend our services to new geographies. By combining our alliance partners' products and services with our own capabilities and expertise, we create innovative, high-value business solutions for our clients. Some alliances are specifically aligned with one of our service lines, thereby adding skills, technology and insights that are applicable across many of the industries we serve. Other alliances extend and enhance our offerings specific to a single industry group.

Almost all of our alliances are non-exclusive. Although individual alliance agreements do not involve direct payments to us that are material to our business, we generate significant revenues from services to implement our alliance partners' products.

Research and Innovation

We are committed to developing leading-edge ideas, as we believe that both research and innovation have been major factors in our success and will help us continue to grow in the future. We use our investment in research and development on which we spent \$307 million, \$298 million and \$243 million in fiscal 2007, 2006 and 2005, respectively to help create, commercialize and disseminate innovative business strategies and technology.

Our research and innovation program is designed to generate early insights into how knowledge can be harnessed to create innovative business solutions for our clients and to develop business strategies with significant value. A key component of this is our research and development organization, Accenture Technology Labs, which identifies and develops new technologies that we believe will be the drivers of our clients' growth and enable them to be first to market with unique capabilities. We also promote the creation of knowledge capital and thought leadership through the Accenture Institute for High Performance Business. In addition, we spend a significant portion of our research and development resources directly through our operating groups and our consulting, technology and outsourcing capabilities to develop market-ready solutions for our clients.

Employees

Our most important asset is our people. The diverse and global makeup of our workforce enables us to serve our diverse and global client base. We are deeply committed to the continued development of our employees, who receive significant and focused technical, functional, industry, managerial and leadership skill development and training appropriate for their roles and levels within our company throughout their careers with us. We seek to reinforce our employees' commitments to our clients, culture and values through a comprehensive performance management system and a career philosophy that rewards both individual performance and teamwork. We strive to maintain a work environment

that reinforces our owner-operator culture and the collaboration, motivation, alignment of interests and sense of ownership and reward that this culture has fostered.

As of August 31, 2007, we had approximately 170,000 employees worldwide.

Competition

We operate in a highly competitive and rapidly changing global marketplace and compete with a variety of organizations that offer services competitive with those we offer. We compete with a variety of companies with respect to our offerings, including:

Off-shore service providers in lower-cost locations, particularly Indian providers, that offer services similar to those we offer, often at highly competitive prices;

Large multinational providers, including the service arms of large global technology providers, that offer some or all of the consulting, systems integration and technology, and outsourcing services that we do;

Niche solution or service providers that compete with us in a specific geographic market, industry segment or service area, including companies that provide new or alternative products, services or delivery models; and

Accounting firms that are expanding or re-emphasizing their provision of consulting services.

In addition, a client may choose to use its own resources rather than engage an outside firm for the types of services we provide.

Our revenues are derived primarily from *Fortune* Global 500 and *Fortune* 1000 companies, medium-sized companies, governments, government agencies and other large enterprises. We believe that the principal competitive factors in the industries in which we compete include:

skills and capabilities of people;

innovative service and product offerings;

ability to add value;

reputation and client references;

price;

scope of services;

service delivery approach;

technical and industry expertise;

quality of services and solutions;

ability to deliver results on a timely basis;

availability of appropriate resources; and

global reach and scale.

Our clients typically retain us on a non-exclusive basis.

Intellectual Property

Our success has resulted in part from our proprietary methodologies, software, reusable knowledge capital, assets and other intellectual property rights. We rely upon a combination of nondisclosure and

other contractual arrangements as well as upon trade secret, copyright, patent and trademark laws to protect our intellectual property rights and the rights of third parties from whom we license intellectual property. We have promulgated policies related to confidentiality and ownership and to the use and protection of our intellectual property and that owned by third parties, and we also enter into agreements with our employees as appropriate.

We recognize the increasing value of intellectual property in the marketplace and vigorously create, harvest and protect our intellectual property. As of August 31, 2007, we had 1,540 patent applications pending in the United States and other jurisdictions and had been issued 279 U.S. patents and 171 non-U.S. patents in, among others, the following areas: goal-based educational simulation; virtual call centers; hybrid telecommunications networks; development architecture frameworks; emotion-based voice processing; mobile communications networks; location-based information filtering; and computerized multimedia asset systems. We intend to continue to vigorously identify, create, harvest and protect our intellectual property and to leverage our protected, differentiated assets and methodologies to provide superior value to our clients.

Organizational Structure

Accenture Ltd is a Bermuda holding company with no material assets other than Class II and Class III common shares in its subsidiary, Accenture SCA, a Luxembourg partnership limited by shares (Accenture SCA). Accenture Ltd's only business is to hold these shares and to act as the sole general partner of Accenture SCA. Accenture Ltd owns a majority voting interest in Accenture SCA. As the general partner of Accenture SCA and as a result of Accenture Ltd's majority voting interest in Accenture SCA, Accenture Ltd controls Accenture SCA's management and operations and consolidates Accenture SCA's results in its financial statements. Accenture operates its business through subsidiaries of Accenture SCA. Accenture SCA generally reimburses Accenture Ltd for its expenses but does not pay Accenture Ltd any fees.

Prior to our transition to a corporate structure in fiscal 2001, we operated as a series of related partnerships and corporations under the control of our partners. In connection with our transition to a corporate structure, our partners generally exchanged all of their interests in these partnerships and corporations for Accenture Ltd Class A common shares or, in the case of partners in certain countries, Accenture SCA Class I common shares or exchangeable shares issued by Accenture Canada Holdings Inc., an indirect subsidiary of Accenture SCA. Generally, partners who received Accenture SCA Class I common shares or Accenture Canada Holdings Inc. exchangeable shares also received a corresponding number of Accenture Ltd Class X common shares, which entitle their holders to vote at Accenture Ltd shareholder meetings but do not carry any economic rights.

In fiscal 2005, Accenture developed and announced a new, broader career model for its highest-level executives that recognizes the diversity of roles and responsibilities demonstrated by these employees. This new career framework replaced the internal use of the partner title with the more comprehensive senior executive title and applies the senior executive title to more than 4,300 of our highest-level employees, including those employees previously referred to as partners. However, for proper context, we continue to use the term partner in this report to refer to these persons in certain situations related to our reorganization and the period prior to our incorporation.

Accenture Ltd Class A Common Shares and Class X Common Shares

Each Class A common share and each Class X common share of Accenture Ltd entitles its holder to one vote on all matters submitted to a vote of shareholders of Accenture Ltd. A holder of a Class X common share is not, however, entitled to receive dividends or to receive payments upon a liquidation of Accenture Ltd.

Accenture Ltd may redeem, at its option, any Class X common share for a redemption price equal to the par value of the Class X common share, or \$0.0000225 per share. Accenture Ltd has separately agreed with the original holders of Accenture SCA Class I common shares and Accenture Canada Holdings Inc. exchangeable shares not to redeem any Class X common share of such holder if the redemption would reduce the number of Class X common shares held by that holder to a number that is less than the number of Accenture SCA Class I common shares or Accenture Canada Holdings Inc. exchangeable shares owned by that holder, as the case may be. Accenture Ltd will redeem Class X common shares upon the redemption or exchange of Accenture SCA Class I common shares and Accenture Canada Holdings Inc. exchangeable shares so that the aggregate number of Class X common shares outstanding at any time does not exceed the aggregate number of Accenture SCA Class I common shares and Accenture Canada Holdings Inc. exchangeable shares outstanding. Class X common shares are not transferable without the consent of Accenture Ltd.

Accenture SCA Class I Common Shares

After June 28, 2005, only our current and former senior executives and their permitted transferees continue to hold Accenture SCA Class I common shares. Each Class I common share entitles its holder to one vote on all matters submitted to the shareholders of Accenture SCA and entitles its holder to dividends and liquidation payments.

Subject to the transfer restrictions in Accenture SCA's Articles of Association described below, Accenture SCA is obligated, at the option of the holder, to redeem any outstanding Accenture SCA Class I common share at any time at a redemption price per share generally equal to its current market value as determined in accordance with Accenture SCA's Articles of Association. Under Accenture SCA's Articles of Association, the market value of a Class I common share that is not subject to transfer restrictions will be deemed to be equal to (i) the average of the high and low sales prices of an Accenture Ltd Class A common share as reported on the New York Stock Exchange (or on such other designated market on which the Class A common shares trade), net of customary brokerage and similar transaction costs, or (ii) if Accenture Ltd sells its Class A common shares on the date that the redemption price is determined (other than in a transaction with any employee or an affiliate or pursuant to a preexisting obligation), the weighted average sales price of an Accenture Ltd Class A common share on the New York Stock Exchange (or on such other market on which the Class A common shares primarily trade), net of customary brokerage and similar transaction costs. See Restrictions on the Transfer of Certain Accenture Shares Articles of Association of Accenture SCA Covered Person Transfer Restrictions below for additional information on these transfer restrictions. Accenture SCA may, at its option, pay this redemption price with cash or by delivering Accenture Ltd Class A common shares on a one-for-one basis. This one-for-one redemption price and exchange ratio will be adjusted if Accenture Ltd holds more than a *de minimis* amount of assets (other than its interest in Accenture SCA and assets it holds only transiently prior to contributing them to Accenture SCA) or incurs more than a *de minimis* amount of liabilities (other than liabilities for which Accenture SCA has a corresponding liability to Accenture Ltd). We have been advised by our legal advisors in Luxembourg that there is no relevant legal precedent in Luxembourg quantifying or defining the term *de minimis*. In the event that a question arises in this regard, we expect that management will interpret *de minimis* in light of the facts and circumstances existing at the time in question. At this time, Accenture Ltd does not intend to hold any material assets other than its interest in Accenture SCA or to incur any material liabilities such that this one-for-one redemption price and exchange ratio would require adjustment and will disclose any change in its intentions that could affect this ratio. In order to maintain Accenture Ltd's economic interest in Accenture SCA, Accenture Ltd generally will acquire additional Accenture SCA common shares each time additional Accenture Ltd Class A common shares are issued.

Accenture SCA Class II and Class III Common Shares

On June 28, 2005, Accenture SCA's shareholders approved certain amendments to the rights of Accenture SCA Class II common shares held by Accenture Ltd, as well as the creation of a new class of common shares known as Class III common shares into which all Class I common shares held by Accenture Ltd and its affiliates were reclassified. Accenture SCA Class II common shares and Class III common shares may not be held by any person other than the general partner of Accenture SCA and its subsidiaries. All Class I common shares that are sold or otherwise transferred to Accenture Ltd or its subsidiaries will be automatically reclassified into Class III common shares.

The amendments to the Class II common shares, the creation of Class III common shares (and all lettered sub-series of that class) and the reclassification of all Class I common shares held or to be held by Accenture Ltd and its subsidiaries have no effect on the computation of Accenture Ltd's earnings per share.

Accenture SCA Class II common shares and Class III common shares (or any lettered sub-series of that class) are not entitled to any cash dividends. If the Board of Directors of Accenture Ltd authorizes the payment of a cash dividend on Accenture Ltd's Class A common shares, Accenture Ltd, as general partner of Accenture SCA, will cause Accenture SCA to redeem Class II common shares and Class III common shares that Accenture Ltd holds to obtain cash needed to pay dividends on its Class A common shares. At any time that Accenture SCA pays a cash dividend on its Class I common shares, new Class II common shares and Class III common shares will be issued to the existing holders of Class II common shares and Class III common shares, in each case having an aggregate value of the amount of any cash dividends that the holders of those Class II or Class III common shares would have received had they ratably participated in the cash dividend paid on the Class I common shares.

Each Class II common share entitles its holder to receive a liquidation payment equal to 10% of any liquidation payment to which a Class I common share entitles its holder. Each Accenture SCA Class III common share entitles its holder to receive a liquidation payment equal to 100% of any liquidation payment to which an Accenture SCA Class I common share entitles its holder.

Accenture Canada Holdings Inc. Exchangeable Shares

Subject to the transfer restrictions contained in Accenture Ltd's bye-laws described below, holders of Accenture Canada Holdings Inc. exchangeable shares may exchange their shares for Accenture Ltd Class A common shares at any time on a one-for-one basis. Accenture may, at its option, satisfy this exchange with cash at a price per share generally equal to the market price of an Accenture Ltd Class A common share at the time of the exchange. Each exchangeable share of Accenture Canada Holdings Inc. entitles its holder to receive distributions equal to any distributions to which an Accenture Ltd Class A common share entitles its holder.

Restrictions on the Transfer of Certain Accenture Shares

Accenture Ltd Bye-Laws

Covered Person Transfer Restrictions. Accenture Ltd's bye-laws contain transfer restrictions that apply to certain Accenture current and former senior executives who hold Accenture Ltd Class A common shares. We refer to these persons as covered persons. The Accenture Ltd shares covered by the transfer restrictions generally include any Accenture Ltd Class A common shares beneficially owned by a senior executive at the time in question and also as of or prior to the initial public offering of the Accenture Ltd Class A common shares in July 2001. We refer to the shares covered by these transfer restrictions as covered shares.

Current senior executives. Historically, the transfer restrictions applicable to covered shares lapsed with the passage of time on an annual basis until July 24, 2009, but were subject to a requirement that covered persons continue to maintain beneficial ownership of at least 25% of their covered shares as long as they remain employed by Accenture, even after July 24, 2009. This was referred to as the 25% minimum holding requirement.

Effective in July 2007, the Board of Directors of Accenture Ltd granted a waiver under the bye-laws that is applicable to covered persons who are active Accenture employees. (The bye-laws of Accenture Ltd permit certain waivers with respect to the transfer restrictions, as described below under Waivers and Adjustments.) This waiver eliminated the 25% minimum holding requirement, and permits covered shares that would otherwise not have become free for transfer until the later of July 24, 2009 or the termination of the employee's employment with Accenture to become transferable on a phased-in schedule as described below.

The effect of this waiver has been to accelerate the timeframe related to the previous transfer restrictions applicable to covered persons who are active employees. The transfer restrictions are being released in equal quarterly installments, with restrictions on one-ninth of the covered shares subject to the 25% minimum holding requirement being released each quarter over a nine-quarter period which began in the fourth quarter of fiscal 2007. The rationale for the waiver was to decrease the large number of shares whose transfer restrictions would otherwise lapse on July 24, 2009 or upon the termination of our senior executives' employment and to remove an incentive for senior executives to resign or retire from Accenture after July 24, 2009 in order to access shares that would have been covered by the 25% minimum holding requirement absent this waiver. By lifting this restriction in stages, on an accelerated basis, we have designed the waiver to limit the potential market impact of having a large number of shares whose transfer restrictions lapse on a single date in July 2009.

The following table shows the total number of covered shares of Accenture Ltd held by active employees scheduled to be released from transfer restrictions each quarter pursuant to the remaining transfer restrictions. This table reflects the adoption of the phased-in quarterly waiver described above starting in the fourth quarter of fiscal 2007 and assumes that all covered persons who are active employees as of October 1, 2007 remain actively employed by Accenture through June 1, 2009. (The actual number of additional covered shares that become available for transfer as a result of the waiver will be reduced depending on the number of covered persons who cease to be employed prior to June 1, 2009.)

Total number of Accenture Ltd Class A common shares held by current employees that are scheduled to become available for transfer

1 st Quarter Fiscal 2008	2,200,691
2 nd Quarter Fiscal 2008	2,031,890
3 rd Quarter Fiscal 2008	2,031,890
4 th Quarter Fiscal 2008	8,347,809
1 st Quarter Fiscal 2009	2,031,890
2 nd Quarter Fiscal 2009	2,031,890
3 rd Quarter Fiscal 2009	2,031,890
4 th Quarter Fiscal 2009	2,033,719

Former senior executives. The waiver described above did not affect the transfer restrictions that continue to apply to retired and resigned covered persons. Accordingly, covered persons who are no

longer employed by Accenture will continue to be able to transfer a percentage of the covered shares received by them on or prior to July 24, 2001 and owned by them as set forth in the following table:

Cumulative percentage of shares permitted to be transferred	Years after July 24, 2001
10%	1 year
25%	2 years
35%	3 years
45%	4 years
55%	5 years
65%	6 years
75%	7 years
100%	The later of (a) 8 years or (b) end of employment by Accenture

Notwithstanding the foregoing, covered persons retiring from Accenture at the age of 50 or older are permitted to transfer covered shares they own on an accelerated basis as follows:

Age at retirement	Percentage of remaining transfer restricted shares permitted to be transferred
56 or older	100%
55	87.5%
54	75%
53	62.5%
52	50%
51	37.5%
50	25%

In addition, a retired senior executive who reaches the age of 56 is permitted to transfer any covered shares he or she owns. Any remaining shares owned by retiring senior executives for which transfer restrictions are not released on an accelerated basis will be eligible to be transferred as if the retiring senior executive continued to be employed by Accenture.

Covered persons who became disabled before our transition to a corporate structure are permitted to transfer all of their covered shares. Current and former senior executives who have become disabled since our transition to a corporate structure are subject to the general transfer restrictions applicable to employees or, if disabled after the age of 50, benefit from the accelerated lapses of transfer restrictions applicable to retired senior executives.

All transfer restrictions applicable to a covered person under Accenture Ltd's bye-laws terminate upon death.

If Accenture approves in writing a covered person's pledge of his covered shares to a lender, foreclosures by the lender on those shares, and any subsequent sales of those shares by the lender, are not restricted, provided that the lender give Accenture a right of first refusal to buy any shares at the market price before they are sold by the lender.

Notwithstanding the transfer restrictions described in this summary, Accenture Ltd Class X common shares may not be transferred at any time, except upon the death of a holder of Class X common shares or with the consent of Accenture Ltd.

Accenture Canada Holdings Inc. exchangeable shares held by covered persons are also subject to the transfer restrictions in Accenture Ltd's bye-laws.

Term and Amendment. The transfer restrictions in Accenture Ltd's bye-laws will not terminate unless they have been previously waived or terminated under the terms of the bye-laws. Amendment of the transfer restrictions in Accenture Ltd's bye-laws requires the approval of the Board of Directors of Accenture Ltd and a majority vote of Accenture Ltd's shareholders.

Waivers and Adjustments. The transfer restrictions and the other provisions of Accenture Ltd's bye-laws may be waived at any time by the Board of Directors of Accenture Ltd or its designees to permit covered persons to:

participate as sellers in underwritten public offerings of common shares and tender and exchange offers and share purchase programs by Accenture;

transfer covered shares in family or charitable transfers;

transfer covered shares held in employee benefit plans; and

transfer covered shares in particular situations (for example, to immediate family members and trusts).

Subject to the foregoing, from time to time, pursuant to the provisions of Accenture Ltd's bye-laws, the Board of Directors of Accenture Ltd or its designees may also approve limited relief from the existing share transfer restrictions for specified senior executives or groups of senior executives in connection with particular retirement, employment and severance arrangements that are determined to be in the best interests of the Company.

Administration and Resolution of Disputes. The terms and provisions of Accenture Ltd's bye-laws are administered by the Board of Directors of Accenture Ltd. The Board of Directors of Accenture Ltd or its designees have the sole power to enforce the provisions of the bye-laws.

Articles of Association of Accenture SCA

General. Except in the case of a redemption of Class I common shares or a transfer of Class I common shares to Accenture Ltd or one of its subsidiaries, Accenture SCA's Articles of Association provide that Accenture SCA Class I common shares may be transferred only with the consent of Accenture Ltd, as the general partner of Accenture SCA.

Covered Person Transfer Restrictions. In addition, Accenture SCA's Articles of Association contain transfer restrictions that apply to certain Accenture current and former senior executives who hold Accenture SCA Class I common shares and are parties to the Accenture SCA transfer rights agreement, including redemptions by Accenture SCA and purchases by subsidiaries of Accenture Ltd. We refer to these persons as covered persons. The shares covered by these transfer restrictions generally include all Class I common shares owned by a covered person. We refer to the shares covered by these transfer restrictions as covered shares.

Current senior executives. Historically, the transfer restrictions applicable to covered shares lapsed with the passage of time on an annual basis until July 24, 2009, but were subject to a requirement that covered persons continue to maintain beneficial ownership of at least 25% of their covered shares as long as they remain employed by Accenture, even after July 24, 2009. This was referred to as the 25% minimum holding requirement.

Effective in July 2007, the supervisory board of Accenture SCA, which consists of at least three members, each elected by a simple majority vote of each general meeting of shareholders of Accenture

SCA, granted a waiver under the Articles of Association that is applicable to covered persons who are active Accenture employees. (The Articles of Association of Accenture SCA permit certain waivers with respect to the transfer restrictions, as described below under **Waivers and Adjustments.**) This waiver eliminated the 25% minimum holding requirement and permits covered shares that would otherwise not have become free for transfer until the later of July 24, 2009 or the termination of the employee's employment with Accenture to become transferable on a phased-in schedule as described below.

The effect of this waiver has been to accelerate the timeframe related to the previous transfer restrictions applicable to covered persons who are active employees. The transfer restrictions are being released in equal quarterly installments, with restrictions on one-ninth of the covered shares subject to the 25% minimum holding requirement being released each quarter over a nine-quarter period which began in the fourth quarter of fiscal 2007. The rationale for the waiver was to decrease the large number of shares whose transfer restrictions would otherwise lapse on July 24, 2009 or upon the termination of our senior executives' employment and to remove an incentive for senior executives to resign or retire from Accenture after July 24, 2009 in order to access shares that would have been covered by the 25% minimum holding requirement absent this waiver. By lifting this restriction in stages, on an accelerated basis, we have designed the waiver to limit the potential market impact of having a large number of shares whose transfer restrictions lapse on a single date in July 2009.

The following table shows the total number of covered shares of Accenture SCA held by active employees scheduled to be released from transfer restrictions each quarter pursuant to the remaining transfer restrictions. This table reflects the adoption of the phased-in quarterly waiver described above starting in the fourth quarter of fiscal 2007 and assumes that all covered persons who are active employees as of October 1, 2007 remain actively employed by Accenture through June 1, 2009. (The actual number of additional covered shares that become available for transfer as a result of the waiver will be reduced depending on the number of covered persons who cease to be employed prior to June 1, 2009.)

	Total number of Accenture SCA Class I common shares held by current employees that are scheduled to become available for transfer
1 st Quarter Fiscal 2008	5,730,171
2 nd Quarter Fiscal 2008	5,148,004
3 rd Quarter Fiscal 2008	5,148,004
4 th Quarter Fiscal 2008	20,504,921
1 st Quarter Fiscal 2009	5,148,004
2 nd Quarter Fiscal 2009	5,148,004
3 rd Quarter Fiscal 2009	5,148,004
4 th Quarter Fiscal 2009	5,152,637

Former senior executives. The waiver described above did not affect the transfer restrictions that continue to apply to retired and resigned covered persons. Accordingly, covered persons who are no longer employed by Accenture will continue to be able to transfer a percentage of the covered shares received by them on or prior to July 24, 2001 and owned by them commencing on July 24, 2002 as set

forth in the following table. Since these covered persons are no longer employed by Accenture, their ability to complete the transfer of 100% of their covered shares is effective on July 24, 2009:

Cumulative percentage of shares permitted to be transferred	Years after July 24, 2001
35%	3 years
45%	4 years
55%	5 years
65%	6 years
75%	7 years
100%	The later of (a) 8 years or (b) end of employment by Accenture

Covered persons retiring at the age of 50 or above or who become disabled are granted accelerations of these provisions on terms identical to those applicable to Accenture Ltd Class A common shares held by covered persons and described under Accenture Ltd Bye-Laws Covered Person Transfer Restrictions above.

All transfer restrictions applicable to a covered person under Accenture SCA's Articles of Association terminate upon death.

If Accenture SCA approves in writing a covered person's pledge of his covered shares to a lender, foreclosures by the lender on those shares, and any subsequent sales of those shares by the lender, are not restricted, provided that the lender give Accenture SCA a right of first refusal to buy any shares at the market price before they are sold by the lender.

Term and Amendment. The transfer restrictions contained in Accenture SCA's Articles of Association will not terminate unless they have been previously waived or terminated under the terms of the Articles of Association. Amendment of the transfer restrictions in Accenture SCA's Articles of Association requires the consent of Accenture SCA's general partner and approval at a general meeting of shareholders.

Waivers and Adjustments. The transfer restrictions and the other provisions of Accenture SCA's Articles of Association may be waived at any time by the supervisory board of Accenture SCA or its designees to permit covered persons to:

participate as sellers in underwritten public offerings of common shares and tender and exchange offers and share purchase programs by Accenture;

transfer covered shares in family or charitable transfers; and

transfer covered shares in particular situations (for example, to immediate family members and trusts).

Subject to the foregoing, from time to time, pursuant to the provisions of Accenture SCA's Articles of Association, the supervisory board of Accenture SCA or its designees may also approve limited relief from the existing share transfer restrictions for specified senior executives or groups of senior executives in connection with particular retirement, employment and severance arrangements that are determined to be in the best interests of the Company.

Other Restrictions. In addition to the foregoing, all holders of Class I common shares are precluded from having their shares redeemed by Accenture SCA or transferred to Accenture SCA, Accenture Ltd or a subsidiary of Accenture Ltd at any time or during any period when Accenture SCA determines, based on the advice of counsel, that there is material non-public information that may

affect the average price per share of Accenture Ltd Class A common shares, if the redemption would be prohibited by applicable law, during an underwritten offering due to an underwriters lock-up or during the period from the announcement of a tender offer by Accenture SCA or its affiliates for Accenture SCA Class I common shares until the expiration of ten business days after the termination of the tender offer (other than to tender the holder's Accenture SCA Class I common shares in the tender offer).

Administration and Resolution of Disputes. The terms and provisions of Accenture SCA's Articles of Association are administered by the supervisory board of Accenture SCA.

Senior Executive Ownership Requirements

To ensure that senior executives continue to maintain equity ownership levels that Accenture considers meaningful, we require current senior executives to comply with the Accenture Senior Executive Equity Ownership Policy. This policy requires senior executives to own Accenture equity valued at a multiple (ranging from 1 to 6) of their base compensation determined by their position level. This policy remains in place notwithstanding the waiver of the 25% minimum holding requirement described above.

Senior Executive Trading Policy

In July 2005, we implemented a Senior Executive Trading Policy applicable to our senior executives that provides, among other things, that covered shares held by actively employed senior executives will be subject to company-imposed quarterly trading guidelines. We set allocation limits of unrestricted covered shares based on a composite average weekly volume of trading in Accenture Ltd Class A common shares. These guidelines allow us to manage the total number of shares redeemed, sold or otherwise transferred by our senior executives in any calendar quarter. The policy guidelines, which can be adjusted by management, are not legal or contractual restrictions, however, and there is a risk that the internal sanctions available to us might not adequately dissuade individual employees from attempting transfers in excess of the amounts permitted under the policy. The Senior Executive Trading Policy also prohibits senior executives from trading in any Accenture equity during any company-designated black-out period.

ITEM 1A. RISK FACTORS

In addition to the other information set forth in this report, you should carefully consider the following factors which could materially affect our business, financial condition or future results. The risks described below are not the only risks facing us.

Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition and/or operating results.

Risks That Relate to Our Business

Our results of operations could be negatively affected if we cannot expand and develop our services and solutions in response to changes in technology and client demand.

Our success depends on our ability to develop and implement consulting, systems integration and technology, and outsourcing services and solutions that anticipate and respond to rapid and continuing changes in technology, industry developments and client needs. We may not be successful in anticipating or responding to these developments on a timely basis, and our offerings may not be successful in the marketplace. Also, services, solutions and technologies offered by current or future

competitors may make our service or solution offerings uncompetitive or obsolete. Any one of these circumstances could have a material adverse effect on our ability to obtain and successfully deliver client work.

The consulting, systems integration and technology, and outsourcing markets are highly competitive, and we might not be able to compete effectively.

The consulting, systems integration and technology, and outsourcing markets are highly competitive. We compete with a variety of companies with respect to our offerings, including:

Off-shore service providers in lower-cost locations, particularly Indian providers, that offer services similar to those we offer, often at highly competitive prices;

Large multinational providers, including the service arms of large global technology providers, that offer some or all of the consulting, systems integration and technology, and outsourcing services that we do;

Niche solution or service providers that compete with us in a specific geographic market, industry segment or service area, including companies that provide new or alternative products, services or delivery models; and

Accounting firms that are expanding or re-emphasizing their provision of consulting services.

In addition, a client may choose to use its own resources rather than engage an outside firm for the types of services we provide.

Some of our competitors may have greater financial, marketing or other resources than we do and, therefore, may be better able to compete for new work and skilled professionals. Additionally, some of our competitors, particularly those located in regions with lower costs of doing business, may be able to provide services and solutions at lower cost or on more favorable terms than we can, particularly in the outsourcing and systems integration markets. There is a risk that increased competition could put downward pressure on the prices we can charge for our services and on our operating margins. Similarly, if our competitors develop and implement methodologies that yield greater efficiency and productivity, they may be able to offer services similar to ours at lower prices without adversely affecting their profit margins. Even if we have potential offerings that address marketplace or client needs, our competitors may be more successful at selling similar services they offer, including to companies that are Accenture clients. If we are unable to provide our clients with superior services and solutions at competitive prices, our results of operations may suffer.

In addition, we may face greater competition from companies that have increased in size or scope as the result of strategic mergers. These mergers may include consolidation activity among hardware manufacturers, software developers and vendors, and service providers. This vertical integration may result in greater convergence among previously separate technology functions or reduced access to products, and may adversely affect our competitive position.

Our results of operations could be affected by economic and political conditions and the effects of these conditions on our clients' businesses and levels of business activity.

Global economic and political conditions affect our clients' businesses and the markets they serve. A significant or prolonged economic downturn or a negative or uncertain political climate could adversely affect our clients' financial condition and the levels of business activity of our clients and the industries we serve. This may reduce our clients' demand for our services or depress pricing of those services and have a material adverse effect on our results of operations. Changes in global economic conditions could also shift demand to services for which we do not have

competitive

advantages, and this could negatively affect the amount of business that we are able to obtain. In addition, if we are unable to successfully anticipate changing economic and political conditions, we may be unable to effectively plan for and respond to those changes, and our business could be negatively affected.

Our work with government clients exposes us to additional risks inherent in the government contracting environment.

Our clients include national, provincial, state and local governmental entities. Our government work carries various risks inherent in the government contracting process. These risks include, but are not limited to, the following:

Government entities typically fund projects through appropriated monies. While these projects are often planned and executed as multi-year projects, the government entities usually reserve the right to change the scope of or terminate these projects for lack of approved funding and at their convenience. Changes in government or political developments could result in our projects being reduced in scope or terminated altogether.

Government entities often reserve the right to audit our contract costs, including allocated indirect costs, and conduct inquiries and investigations of our business practices with respect to our government contracts. If the client finds that the costs are not reimbursable, then we will not be allowed to bill for them, or the cost must be refunded to the client if it has already been paid to us. Findings from an audit also may result in our being required to prospectively adjust previously agreed rates for our work and may affect our future margins.

If a government client discovers improper or illegal activities in the course of audits or investigations, we may become subject to various civil and criminal penalties and administrative sanctions, which may include termination of contracts, forfeiture of profits, suspension of payments, fines and suspensions or debarment from doing business with other agencies of that government. The inherent limitations of internal controls may not prevent or detect all improper or illegal activities, regardless of their adequacy. Additionally, an allegation of improper activity, even if not proven, could result in adverse publicity and damage to our reputation and business.

Government contracts, and the proceedings surrounding them, are often subject to more extensive scrutiny and publicity than contracts with commercial clients. Negative publicity related to our government contracts, regardless of its accuracy, may further damage our business by affecting our ability to compete for new contracts.

Political and economic factors such as pending elections, the outcome of recent elections, changes in leadership among key executive or legislative decision makers, revisions to governmental tax policies and reduced tax revenues can affect the number and terms of new government contracts signed.

Terms and conditions of government contracts tend to be more onerous and are often more difficult to negotiate than those for commercial contracts.

The occurrences or conditions described above could affect not only our business with the particular government agency involved, but also our business with other agencies of the same or other governmental entities. Additionally, because of their visibility and political nature, government projects may present a heightened risk to our reputation. Either of these could have a material adverse effect on our business or our results of operations.

Our business could be adversely affected if our clients are not satisfied with our services.

Our business model depends in large part on our ability to attract new work from our base of existing clients, at times on a sole source basis. Our business model also depends on relationships our senior executives develop with our clients so that we can understand our clients' needs and deliver solutions and services that are tailored to those needs. If a client is not satisfied with the quality of work performed by us or a subcontractor, or with the type of services or solutions delivered, then we could incur additional costs to address the situation, the profitability of that work might be impaired, and the client's dissatisfaction with our services could damage our ability to obtain additional work from that client. In particular, clients that are not satisfied might seek to terminate existing contracts prior to their scheduled expiration date and could direct future business to our competitors. In addition, negative publicity related to our client relationships, regardless of its accuracy, may further damage our business by affecting our ability to compete for new contracts with current and prospective clients.

We could be subject to liabilities if our subcontractors or the third parties with whom we partner cannot deliver their project contributions on time or at all.

Large and complex arrangements often require that we utilize subcontractors or that our services and solutions incorporate or coordinate with the software, systems or infrastructure requirements of other vendors and service providers. Our ability to serve our clients and deliver and implement our solutions in a timely manner depends on the ability of these subcontractors, vendors and service providers to meet their project obligations in a timely manner. The quality of our services and solutions could suffer if our subcontractors or the third parties with whom we partner do not deliver their products and services in accordance with project requirements. In addition, certain work requires the use of unique and complex structures and alliances. Some of these structures require us to assume responsibility to the client for the performance of third parties whom we do not control. (For a discussion of our indemnification obligations under our client agreements, see Management's Discussion and Analysis of Financial Condition and Results of Operations—Off-Balance Sheet Arrangements.) If our subcontractors or these third parties fail to deliver their contributions on time or at all, if their contributions do not meet project requirements, or if we are unable to obtain reimbursement for liabilities of third parties that we have assumed, our ability to perform could be adversely affected and we might be subject to additional liabilities, which could have a material adverse effect on our business, revenues, profitability or cash flow.

Our results of operations could be adversely affected if our clients terminate their contracts with us on short notice.

Our clients typically retain us on a non-exclusive, project-by-project basis. Although we do not centrally track the termination provisions of our contracts, we estimate that the majority of our contracts can be terminated by our clients with short notice. Many of our consulting contracts are less than 12 months in duration, and these shorter-duration contracts typically permit a client to terminate the agreement with as little as 30 days notice and without significant penalty. Longer-term, larger and more complex contracts, such as the majority of our outsourcing contracts, generally require a longer notice period for termination and often include an early termination charge to be paid to us, but this charge might not be sufficient to cover our costs or make up for anticipated profits lost upon termination of the contract. Additionally, large client projects often involve multiple contracts or stages, and a client could choose not to retain us for additional stages of a project, try to renegotiate the terms of its contract or cancel or delay additional planned work.

Terminations, cancellations or delays could result from factors that are beyond our control and unrelated to our work product or the progress of the project, including the business or financial conditions of the client, changes in ownership or management at our clients, changes in client strategies or the economy or markets generally. When contracts are terminated, we lose the anticipated revenues and might not be able to eliminate associated costs in a timely manner. Consequently, our profit margins in subsequent periods could be lower than expected.

Outsourcing services are a significant part of our business and subject us to operational and financial risk.

We earned approximately 40% of our revenues before reimbursements in fiscal 2007 from our outsourcing services. This portion of our business presents potential operational and financial risks that are different from those of our consulting, technology and systems integration services. In many cases, we take over the operation of certain portions of our clients' businesses, and client personnel and contracts are sometimes transferred to us. In some cases, this could mean that we assume responsibility for portions of our clients' personnel, staffing, overhead and similar needs but might not have full ability to control the work and efforts of client personnel or their subcontractors. In addition, we could incur liability for failure to comply with laws or regulations related to the portions of our clients' businesses that are transferred to us.

This type of work also presents financial risks to us. Outsourcing contracts typically have longer terms than consulting contracts and generally have lower gross margins than consulting contracts, particularly during the first year of the contract. This could exert downward pressure on our overall gross margins, particularly during the early stages of new outsourcing contracts, which might not be offset by improved performance on contracts in our portfolio that we have been operating for a longer time. In addition, we have experienced a trend toward outsourcing agreements that are of shorter duration and therefore of smaller initial total contract value than they have been in the past. Furthermore, we face considerable competition for outsourcing work and our clients are increasingly using intensive contracting processes and aggressive contracting techniques, sometimes assisted by third-party advisors.

Our results of operations may be affected by the rate of growth in the use of technology in business and the type and level of technology spending by our clients.

Our business depends in part upon continued growth in the use of technology in business by our clients and prospective clients and their customers and suppliers. In challenging economic environments, our clients may reduce or defer their spending on new technologies in order to focus on other priorities. At the same time, many companies have already invested substantial resources in their current means of conducting commerce and exchanging information, and they may be reluctant or slow to adopt new approaches that could disrupt existing personnel, processes and infrastructures. If the growth of use of technology in business or our clients' spending on technology in business declines or if we cannot convince our clients or potential clients to embrace new technology solutions, our results of operations could be adversely affected.

Our profitability could suffer if we are not able to maintain favorable pricing rates.

Our profit margin, and therefore our profitability, is dependent on the rates we are able to charge for our services. If we are not able to maintain favorable pricing for our services, our profit margin and our profitability could suffer. The rates we are able to charge for our services are affected by a number of factors, including:

our clients' perceptions of our ability to add value through our services;

competition;

introduction of new services or products by us or our competitors;

our competitors' pricing policies;

our ability to charge higher prices where market demand or the value of our services justifies it;

our ability to accurately estimate, attain and sustain contract revenues, margins and cash flows over long contract periods;

procurement practices of clients and their use of third-party advisors;

the use by our competitors and our clients of off-shore resources to provide lower-cost service delivery capabilities; and

general economic and political conditions.

Our profitability could suffer if we are not able to maintain favorable utilization rates.

The cost of providing our services, including the utilization rate of our professionals, affects our profitability. Our utilization rates are affected by a number of factors, including:

our ability to transition employees from completed projects to new assignments and to hire and assimilate new employees;

our ability to forecast demand for our services and thereby maintain an appropriate headcount in each of our geographies and workforces;

our ability to manage attrition; and

our need to devote time and resources to training, professional development and other non-chargeable activities.

In recent periods we have maintained a utilization rate that is high by our historical standards. There are no assurances this will be our utilization rate in future periods. Additionally, we may not achieve a utilization rate that is optimal for us. If our utilization rate is too high, it could have an adverse effect on employee engagement and attrition. If the utilization rate for our professionals were to decline, our profit margin and profitability could suffer.

Our business could be negatively affected if we incur legal liability in connection with providing our solutions and services.

If we fail to meet our contractual obligations, fail to disclose our financial or other arrangements with our alliance partners or otherwise breach obligations to clients, or if our subcontractors dispute the terms of our agreements with them, we could be subject to legal liability. We may enter into non-standard agreements because we perceive an important economic opportunity or because our personnel did not adequately adhere to our guidelines. We may find ourselves committed to providing services that we are unable to deliver or whose delivery will cause us financial loss. If we cannot or do not perform our obligations, we could face legal liability and our contracts might not always protect

us adequately through limitations on the scope of our potential liability. If we cannot meet our contractual obligations to provide solutions and services, and if our exposure is not adequately limited through the terms of our agreements, we might face significant legal liability and our business could be adversely affected.

If our pricing structures do not accurately anticipate the cost and complexity of performing our work, then our contracts could be unprofitable.

We negotiate pricing terms with our clients utilizing a range of pricing structures and conditions. Depending on the particular contract, these include time-and-materials pricing, fixed-price pricing, and contracts with features of both of these pricing models. Our pricing is highly dependent on our internal forecasts and predictions about our projects and the marketplace, which might be based on limited data and could turn out to be inaccurate. If we do not accurately estimate the costs and timing for completing projects, our contracts could prove unprofitable for us or yield lower profit margins than anticipated. We could face greater risk when pricing our outsourcing contracts, as many of our outsourcing projects entail the coordination of operations and workforces in multiple locations, utilizing workforces with different skillsets and competencies and geographically distributed service centers. Furthermore, on outsourcing work we occasionally hire employees from our clients and assume responsibility for one or more of our clients business processes. Our pricing, cost and profit margin estimates on outsourcing work frequently include anticipated long-term cost savings from transformational and other initiatives that we expect to achieve and sustain over the life of the outsourcing contract. There is a risk that we will underprice our contracts, fail to accurately estimate the costs of performing the work or fail to accurately assess the risks associated with potential contracts. In particular, any increased or unexpected costs, delays or failures to achieve anticipated cost savings, or unexpected risks we encounter in connection with the performance of this work, including those caused by factors outside our control, could make these contracts less profitable or unprofitable, which could have an adverse effect on our profit margin.

Many of our contracts utilize performance pricing that links some of our fees to the attainment of various performance or business targets. This could increase the variability of our revenues and margins.

Many of our contracts include performance clauses that require us to achieve agreed-upon performance standards or milestones. If we fail to satisfy these measures, it could reduce our fees under the contracts, delay expected payments or subject us to potential damage claims under the contract terms. Additionally, we have an increasing number of contracts, many of which are outsourcing contracts, where a portion of our fees or incentives depends on factors such as cost-savings, revenue enhancement, benefits produced, business goals attained and adherence to schedule. These goals can be complex and often depend in some measure on our clients' actual levels of business activity. These provisions could increase the variability in revenues and margins earned on those contracts. We estimate that a majority of our contracts include terms that condition some or all of our fees on the achievement of contractually defined goals.

Our alliance relationships may not be successful.

We have alliances with companies whose capabilities complement our own. See Business Alliances. As most of our alliance relationships are non-exclusive, our alliance partners are not prohibited from forming closer or preferred arrangements with our competitors. Loss of or limitations on our relationships with them could adversely affect our financial condition and results of operations.

Our global operations are subject to complex risks, some of which might be beyond our control.

We have offices and operations in 49 countries around the world and provide services to clients in more than 75 countries. In fiscal 2007, approximately 43% of our revenues before reimbursements were attributable to the Americas region, 48% were attributable to the Europe, Middle East and Africa

region (EMEA), and 9% were attributable to the Asia Pacific region. In addition, our Global Delivery Network comprises local Accenture professionals working at client sites around the world in tandem with professionals resident in other countries located in more than 40 delivery centers. If we are unable to manage the risks of our global operations, including fluctuations in foreign exchange and inflation rates, international hostilities, terrorism, natural disasters, security breaches, failure to maintain compliance with our clients' control requirements and multiple legal and regulatory systems, our results of operations could be adversely affected.

Our operating results may be adversely affected by fluctuations in foreign currency exchange rates. Although we report our operating results in U.S. dollars, a significant percentage of our revenues before reimbursements is denominated in currencies other than the U.S. dollar. Fluctuations in foreign currency exchange rates can have a number of adverse effects on us.

Because our consolidated financial statements are presented in U.S. dollars, we must translate revenues, expenses and income, as well as assets and liabilities, into U.S. dollars at exchange rates in effect during or at the end of each reporting period. Therefore, changes in the value of the U.S. dollar against other currencies will affect our revenues before reimbursements, operating income and the value of balance-sheet items originally denominated in other currencies. Declines in the value of other currencies against the U.S. dollar could cause our consolidated earnings stated in U.S. dollars to be lower than our consolidated earnings in local currency and could affect our reported results when compared against other periods. Conversely, increases in the value of other currencies against the U.S. dollar could cause our consolidated earnings stated in U.S. dollars to be higher than our consolidated earnings in local currency and could affect our reported results when compared against other periods. There is no guarantee that our financial results will not be adversely affected by currency exchange rate fluctuations.

In some countries we could be subject to strict restrictions on the movement of cash and the exchange of foreign currencies, which could limit our ability to use this cash across our global operations.

As we continue to leverage our global delivery model, more of our expenses are incurred in currencies other than those in which we bill for the related services. An increase in the value of certain currencies, such as the Indian rupee, against the U.S. dollar could increase costs for delivery of services at off-shore sites by increasing labor and other costs that are denominated in local currency, and there can be no assurance that our contractual provisions or our currency hedging activities would offset this impact. This could result in a decrease in the profitability of our contracts that are utilizing delivery center resources.

International hostilities, terrorist activities, natural disasters and infrastructure disruptions could prevent us from effectively serving our clients and thus adversely affect our operating results. Acts of terrorist violence such as those of recent years in the United States, Spain and England—armed regional and international hostilities and international responses to these hostilities, natural disasters, global health risks or pandemics or the threat of or perceived potential for these events, could have a negative impact on us. These events could adversely affect our clients' levels of business activity and precipitate sudden significant changes in regional and global economic conditions and cycles. These events also pose significant risks to our people and to physical facilities and operations around the world, whether the facilities are ours or those of our alliance partners or clients. By disrupting communications and travel and increasing the difficulty of obtaining and retaining highly skilled and qualified personnel, these events could make it difficult or impossible for us to deliver services to our clients. Extended disruptions of electricity, other public utilities or network services at our facilities,

as well as system failures at, or security breaches in, our facilities or systems, could also adversely affect our ability to serve our clients. While we plan and prepare to defend against each of these occurrences, we might be unable to protect our people, facilities and systems against all such occurrences. We generally do not have insurance for losses and interruptions caused by terrorist attacks, conflicts and wars. If these disruptions prevent us from effectively serving our clients, our operating results could be adversely affected.

We could have liability or our reputation could be damaged if we do not protect client data or information systems or if our information systems are breached. We are dependent on information technology networks and systems to process, transmit and store electronic information and to communicate among our locations around the world and with our alliance partners and clients. Security breaches of this infrastructure could lead to shutdowns or disruptions of our systems and potential unauthorized disclosure of confidential information. We are also required at times to manage, utilize and store sensitive or confidential client or employee data. As a result, we are subject to numerous U.S. and foreign jurisdiction laws and regulations designed to protect this information, such as the European Union Directive on Data Protection and various U.S. federal and state laws governing the protection of health or other individually identifiable information. If any person, including any of our employees, negligently disregards or intentionally breaches our established controls with respect to such data or otherwise mismanages or misappropriates that data, we could be subject to monetary damages, fines and/or criminal prosecution. Unauthorized disclosure of sensitive or confidential client or employee data, whether through systems failure, employee negligence, fraud or misappropriation, could damage our reputation and cause us to lose clients. Similarly, unauthorized access to or through our information systems or those we develop for our clients, whether by our employees or third parties, could result in negative publicity, legal liability and damage to our reputation.

We could incur liability or our reputation could be damaged if our provision of services and solutions to our clients contributes to our clients' internal control deficiencies. Our clients may request that we provide an audit of control activities we perform for them when we host or process data belonging to them. Our ability to acquire new clients and retain existing clients may be adversely affected and our reputation could be harmed if we receive a qualified opinion, or if we cannot obtain an unqualified opinion in a timely manner. Additionally, we could incur liability if a process we manage for a client were to result in internal controls failures or impair our client's ability to comply with its own internal control requirements.

Our global operations expose us to numerous and sometimes conflicting legal and regulatory requirements, and violation of these regulations could harm our business. Because we provide services to clients in more than 75 countries, we are subject to numerous, and sometimes conflicting, legal regimes on matters as diverse as import/export controls, content requirements, trade restrictions, tariffs, taxation, sanctions, government affairs, immigration, internal and disclosure control obligations, data privacy and labor relations. Violations of these regulations in the conduct of our business could result in fines, criminal sanctions against us or our officers, prohibitions on doing business and damage to our reputation. Violations of these regulations in connection with the performance of our obligations to our clients also could result in liability for monetary damages, fines and/or criminal prosecution, unfavorable publicity, restrictions on our ability to process information and allegations by our clients that we have not performed our contractual obligations. Due to the varying degrees of development of the legal systems of the countries in which we operate, local laws might be insufficient to protect our rights.

Legislation related to certain non-U.S. corporations has been enacted in various jurisdictions in the United States, none of which adversely affects Accenture. However, additional legislative proposals remain under consideration in various legislatures which, if enacted, could limit or even prohibit our

eligibility to be awarded state or Federal government contracts in the United States in the future. Changes in laws and regulations applicable to foreign corporations could also mandate significant and costly changes to the way we implement our services and solutions, such as preventing us from using off-shore resources to provide our services, or could impose additional taxes on the provision of our services and solutions. These changes could threaten our ability to continue to serve certain markets.

In many parts of the world, including countries in which we operate, practices in the local business community might not conform to international business standards and could violate anticorruption regulations, including the U.S. Foreign Corrupt Practices Act, which prohibits giving anything of value with the intent to influence the awarding of government contracts. Although we have policies and procedures to ensure legal and regulatory compliance, our employees, subcontractors and agents could take actions that violate these requirements. Violations of these regulations could subject us to criminal or civil enforcement actions, including fines and suspension or disqualification from U.S. federal procurement contracting, any of which could have a material adverse effect on our business.

Our profitability could suffer if we are not able to control our costs.

Our ability to control our costs and improve our efficiency affects our profitability. As the continuation of pricing pressures could result in permanent changes in pricing policies and delivery capabilities, we must continuously improve our management of costs. Our short-term cost reduction initiatives, which focus primarily on reducing variable costs, might not be sufficient to deal with all pressures on our pricing. Our long-term cost-reduction initiatives, which focus on global reductions in costs for service delivery and infrastructure, rely upon our successful introduction and coordination of multiple geographic and competency workforces and a growing number of geographically distributed delivery centers. As we increase the number of our professionals and execute our strategies for growth, we might not be able to manage significantly larger and more diverse workforces, control our costs or improve our efficiency. Despite increased cost savings, we could experience erosion of operating income as a percentage of revenues before reimbursements if current pricing pressures accelerate.

If we are unable to attract, retain and motivate employees or efficiently utilize their skills, we might not be able to compete effectively and will not be able to grow our business.

Our success and ability to grow are dependent, in large part, on our ability to hire, retain and motivate sufficient numbers of talented people with the increasingly diverse skills needed to serve clients and grow our business. Competition for skilled personnel is intense at all levels of experience and seniority. To address this competition, we may need to further adjust our compensation practices, which could put upward pressure on our costs and adversely affect our profit margins. We are particularly dependent on the skills of our senior executives, and if we are not able to successfully retain and motivate our senior executives and experienced managers, our ability to develop new business and effectively lead our current projects could be jeopardized. At the same time, the profitability of our business model depends on our ability to effectively utilize personnel with the right mix of skills and experience to support our projects and global delivery centers. The processes and costs associated with recruiting, training and retaining employees place significant demands on our resources. There is a risk that at certain points in time and in certain geographical regions, we will find it difficult to hire and retain a sufficient number of employees with the skills or backgrounds we require, or that it will prove difficult to retain them in a competitive labor market. If we are unable to hire and retain talented employees with the skills, and in the locations, we require, we might need to redeploy existing personnel or increase our reliance on subcontractors to fill certain of our labor needs. If we need to re-assign personnel from other areas, or employ subcontractors, it could increase our

costs and adversely affect our profit margins. If we are not successful at retaining and motivating our senior executives, attracting and retaining other qualified employees in sufficient numbers to meet the demands of our business, or utilizing our people effectively, then our ability to compete for new work and successfully complete existing work for our clients could be adversely affected.

If we are unable to collect our receivables or unbilled services, our results of operations and cash flows could be adversely affected.

Our business depends on our ability to successfully obtain payment from our clients of the amounts they owe us for work performed. We evaluate the financial condition of our clients and usually bill and collect on relatively short cycles. In limited circumstances, we also extend financing to our clients, which totaled \$235 million at August 31, 2007. We maintain allowances against receivables and unbilled services. Actual losses on client balances could differ from those that we currently anticipate and as a result we might need to adjust our allowances. There is no guarantee that we will accurately assess the creditworthiness of our clients. In addition, recovery of client financing and timely collection of client balances depends on our ability to complete our contractual commitments and bill and collect our contracted revenues. If we are unable to meet our contractual requirements, we might experience delays in collection of and/or be unable to collect our client balances, and if this occurs, our results of operations and cash flows could be adversely affected. Although we have recently been successful in timely collection of client balances, if we experience an increase in the time to bill and collect for our services, our cash flows could be adversely affected.

Our services or solutions could infringe upon the intellectual property rights of others or we might lose our ability to utilize the intellectual property of others.

We cannot be sure that our services and solutions, or the solutions of others that we offer to our clients, do not infringe on the intellectual property rights of third parties, and we could have infringement claims asserted against us or against our clients. These claims could harm our reputation, cost us money and prevent us from offering some services or solutions. Historically in a number of our contracts, we have agreed to indemnify our clients for expenses or liabilities resulting from claimed infringements of the intellectual property rights of third parties. In some instances, the amount of these indemnities could be greater than the revenues we receive from the client. Any claims or litigation in this area, whether we ultimately win or lose, could be time-consuming and costly, injure our reputation or require us to enter into royalty or licensing arrangements. We might not be able to enter into these royalty or licensing arrangements on acceptable terms. If a claim of infringement were successful against us or our clients, an injunction might be ordered against our client or our own services or operations, causing further damages.

We could lose our ability to utilize the intellectual property of others. Third-party suppliers of software, hardware or other intellectual assets could be acquired or sued, and this could disrupt use of their products or services by Accenture and our clients. If our ability to provide services and solutions to our clients is impaired, our operating results could be adversely affected.

We have only a limited ability to protect our intellectual property rights, which are important to our success

Our success depends, in part, upon our ability to protect our proprietary methodologies and other intellectual property. Existing laws of some countries in which we provide services or solutions might offer only limited protection of our intellectual property rights. We rely upon a combination of trade secrets, confidentiality policies, nondisclosure and other contractual arrangements, and patent, copyright and trademark laws to protect our intellectual property rights. The steps we take in this regard

might not be adequate to prevent or deter infringement or other misappropriation of our intellectual property, and we might not be able to detect unauthorized use of, or take appropriate and timely steps to enforce, our intellectual property rights.

Depending on the circumstances, we might grant a specific client greater rights in intellectual property developed in connection with a contract than we otherwise generally do, in which case we would seek to cross-license the use of the intellectual property.

However, in certain situations, we might forego rights to the use of intellectual property we help create, which might limit our ability to reuse that intellectual property for other clients. Any limitation on our ability to provide a service or solution could cause us to lose revenue-generating opportunities and require us to incur additional expenses to develop new or modified solutions for future projects.

Tax legislation and negative publicity related to Bermuda companies could lead to an increase in our tax burden or affect our relationships with our clients.

In 2004, the United States Congress enacted legislation relating to the tax treatment of U.S. companies that have undertaken certain types of expatriation transactions. We do not believe this legislation applies to Accenture. However, we are not able to predict with certainty whether the U.S. Internal Revenue Service will challenge our interpretation of the legislation, nor are we able to predict with certainty the impact of regulations or other interpretations that might be issued related to this legislation. Future developments or the finalization of regulations or interpretations could materially increase our tax expense.

In addition, there have been, from time to time, negative comments in the media regarding companies incorporated in Bermuda. This negative publicity could harm our reputation and impair our ability to generate new business if companies or government agencies decline to do business with us as a result of a negative public image of Bermuda companies or the possibility of our clients receiving negative media attention from doing business with us.

If we are unable to manage the organizational challenges associated with the size and expansion of our Company, we might be unable to achieve our business objectives.

Since 2001, we have more than doubled the size of our workforce so that, as of August 31, 2007, we had approximately 170,000 employees, located in more than 150 cities in 49 countries. Increasingly, our expansion is taking place outside of the United States and Europe, with particular growth in our locations in India and the Philippines. The size of our Company presents significant management and organizational challenges and these issues may become more pronounced if we continue our rate of expansion. For example, it takes time for our newer employees to develop the knowledge, skills or experience that our business model requires. Continued growth may make it increasingly difficult to maintain our culture, effectively manage our personnel and operations and effectively communicate to our personnel worldwide our core values, strategies and goals. Similarly, it could become increasingly difficult to maintain common standards across an expanding enterprise or to effectively institutionalize our know-how. Finally, the size and scope of our operations increases the possibility that an employee will engage in unlawful or fraudulent activity, or otherwise expose the Company to unacceptable business risks, despite our efforts to maintain internal controls to prevent such instances. If we do not continue to develop and implement the right processes and tools to manage our large and expanding enterprise, our ability to compete successfully and achieve our business objectives could be impaired.

We may not be successful at identifying, acquiring or integrating other businesses or technologies.

We expect to continue our program of pursuing strategic acquisitions designed to enhance our capabilities. However, there can be no assurance that we will successfully identify suitable acquisition candidates, succeed in completing targeted transactions or achieve desired financial or operating results. Furthermore, we face numerous risks in integrating any businesses we might acquire. We might need to dedicate additional management and other resources to complete the transactions, which could divert our attention from other business operations. Our organizational structure could make it difficult for us to efficiently integrate acquired businesses or technologies into our ongoing operations. We could face challenges combining service delivery operations, consolidating IT and administrative infrastructure, and assimilating employees into our culture and operations. Accordingly, we might fail to realize the expected benefits or strategic objectives of any acquisition we undertake, which could have an adverse effect on our revenues and profit margin or our ability to grow our business. If we are unable to complete the number and kind of acquisitions for which we plan, or if we are inefficient or unsuccessful at integrating any acquired businesses into our operations, we may not be able to achieve our planned rates of growth or further improve our market share, profitability or competitive position in specific markets or services.

Consolidation in the industries that we serve could adversely affect our business.

Companies in the industries that we serve may seek to achieve economies of scale and other synergies by combining with or acquiring other companies. If two or more of our current clients merge or consolidate and combine their operations, it may decrease the amount of work that we perform for these clients. If one of our current clients merges or consolidates with a company that relies on another provider for its consulting, systems integration and technology, or outsourcing services, we may lose work from that client or lose the opportunity to gain additional work. The increased market power of larger companies could also increase pricing and competitive pressures on us. Any of these possible results of industry consolidation could adversely affect our business.

Risks That Relate to Ownership of Our Class A Common Shares

The share price of Accenture Ltd Class A common shares could be adversely affected from time to time by sales, or the anticipation of future sales, of Class A common shares held by our employees and former employees.

Our employees and former employees continue to hold significant amounts of equity in Accenture in the form of Accenture Ltd Class A common shares, restricted share units and options, and shares in our subsidiaries, most of which are exchangeable or redeemable for Accenture Ltd Class A common shares. The majority of these holdings are, or may become, freely tradable in the marketplace, as described below.

Our current employees hold a large number of shares that will become freely tradable in the period leading up to July 24, 2009

At the time of our transition to a corporate structure in 2001, many of our senior executives received a substantial number of Class A common shares and/or securities that may be exercisable, redeemable or exchangeable for Class A common shares or pursuant to which Class A common shares may be delivered to such senior executives. Those shares generally remain subject to transfer restrictions that lapse with the passage of time through July 24, 2009. See Business Organizational Structure Restrictions on Transfer of Certain Accenture Shares.

In fiscal 2007, we eliminated a requirement that senior executives who hold covered shares and who remain employed by Accenture continue to maintain beneficial ownership of, and be restricted from transferring, at least 25% of these shares at all times during their employment. We replaced this 25% minimum holding requirement with a graduated waiver of transfer restrictions that takes effect on a phased-in quarterly basis through the fourth quarter of fiscal 2009. We eliminated the 25% minimum holding requirement in the belief that it would benefit shareholders by decreasing the large number of shares whose transfer restrictions would not otherwise lapse until the later of July 24, 2009 or the termination of our senior executives' employment, and that it would benefit retention by removing a structural incentive for senior executives to resign starting in 2009 to achieve greater liquidity for their shareholdings. Even though we still maintain share ownership guidelines that dictate specific ownership levels for active senior executives (see Business Organizational Structure Senior Executive Ownership Requirements), the waiver described above will permit many of our active senior executives to transfer or sell into the marketplace a portion of their shares significantly earlier than would have been the case in the past, and there is a risk this could have an adverse effect on our share price.

The following table shows the total number of covered shares held by active employees scheduled to be released from transfer restrictions each quarter. This table reflects the adoption of the phased-in quarterly waiver described above starting in the fourth quarter of fiscal 2007 and assumes that all covered persons who are active employees as of October 1, 2007 remain actively employed by Accenture through June 1, 2009. (The actual number of additional covered shares that become available for transfer as a result of the waiver will be reduced depending on the number of covered persons who cease to be employed prior to June 1, 2009.)

**Total number of Accenture Ltd
Class A common shares, SCA Class I
common shares and Accenture
Canada Holdings Inc. exchangeable
shares held by current employees
that are scheduled to become
available for transfer**

1 st Quarter Fiscal 2008	7,930,862
2 nd Quarter Fiscal 2008	7,179,893
3 rd Quarter Fiscal 2008	7,179,893
4 th Quarter Fiscal 2008	28,852,729
1 st Quarter Fiscal 2009	7,179,893
2 nd Quarter Fiscal 2009	7,179,893
3 rd Quarter Fiscal 2009	7,179,893
4 th Quarter Fiscal 2009	7,186,356

Our former employees hold a large number of shares that will become freely tradable after July 24, 2009

Our retired and resigned partners continue to hold a large number of covered shares. Although some of these are unrestricted and currently available for sale and transfer, the majority will not be free for sale or transfer until July 24, 2009, when the remaining transfer restrictions on these shares will lapse. We have on several occasions conducted transactions, including discounted tender offers of Accenture SCA shares and targeted repurchases of Accenture Ltd shares, designed to address the potential impact of the build-up of shares having transfer restrictions that would otherwise lapse on July 24, 2009. However, there is no assurance that

tender offers and share repurchases we have conducted to date, or other actions we might undertake in the future, will have the desired effect of meaningfully reducing the impact of having a large number of shares become available for transfer on a common date.

The following table shows the total number of covered shares held by former employees scheduled to be released from transfer restrictions each quarter. This table assumes that no covered persons who are active employees as of October 1, 2007 retire or resign through June 1, 2009.

	Total number of Accenture Ltd Class A common shares, SCA Class I common shares and Accenture Canada Holdings Inc. exchangeable shares held by former employees that are scheduled to become available for transfer
1 st Quarter Fiscal 2008	2,402,464
2 nd Quarter Fiscal 2008	655,975
3 rd Quarter Fiscal 2008	2,205,260
4 th Quarter Fiscal 2008	8,050,672
1 st Quarter Fiscal 2009	760,550
2 nd Quarter Fiscal 2009	2,234,887
3 rd Quarter Fiscal 2009	2,442,838
4 th Quarter Fiscal 2009	97,639,354

Our Senior Executive Trading Policy might not be effective at limiting the number of shares sold

We maintain a Senior Executive Trading Policy that provides, among other things, that covered shares held by actively employed senior executives will be subject to company-imposed quarterly trading guidelines. We set allocation limits of unrestricted covered shares based on a composite average weekly volume of trading in Accenture Ltd Class A common shares. These guidelines allow us to manage the total number of shares redeemed, sold or otherwise transferred by our senior executives in any calendar quarter. The policy guidelines, which can be adjusted by management, are not legal or contractual restrictions, however, and there is a risk that the internal sanctions available to us might not adequately dissuade individual employees from attempting transfers in excess of the amounts permitted under the policy. Additionally, there is a risk that this policy creates an adverse incentive for some senior executives to retire or to terminate their employment in order to sell unrestricted shares that would otherwise be governed by these quarterly trading guidelines. This could have an adverse effect on our ability to retain talented and experienced senior executives.

The sale of shares issued under our 2001 Share Incentive Plan could have an adverse effect on our share price

In addition to the covered shares described above, as of October 1, 2007, a total of 50,248,658 of our Class A common shares underlying restricted share units were scheduled to be delivered during the calendar years indicated below:

Calendar Year	Number of Shares
----------------------	-------------------------

2007	1,041,603
2008	6,951,002
2009	15,435,505
2010	15,024,280
2011 and after	11,796,268

Although the holders may choose to defer delivery of some of these shares for tax purposes, it is foreseeable that a significant number of these shares could be sold on the open markets following their delivery.

Furthermore, as of October 1, 2007, a total of 42,671,428 Accenture Ltd Class A common shares were issuable pursuant to options, of which options to purchase an aggregate of 40,114,479 Class A common shares were exercisable and options to purchase an aggregate of 2,556,949 Class A common shares are scheduled to become exercisable during the calendar years indicated below:

Calendar Year	Number of Shares
2007	43,629
After 2007	2,513,320

Upon delivery of restricted stock, or exercise of employee stock options, under our 2001 Stock Incentive Plan, our employees or former employees may choose to sell a significant number of our shares in open market transactions. There is a risk that this could put additional downward pressure on the price of our Class A common stock.

Our share price has fluctuated in the past and could continue to fluctuate, including in response to variability in revenues, operating results and profitability, and as a result our share price could be difficult to predict.

Our share price has fluctuated in the past and could continue to fluctuate in the future in response to various factors. These factors include:

- announcements by us or our competitors about developments in our business or prospects;
- projections or speculation about our business or that of our competitors by the media or investment analysts;
- changes in macroeconomic or political factors unrelated to our business;
- general or industry-specific market conditions or changes in financial markets; and
- changes in our revenues, operating results and profitability.

Our revenues, operating results and profitability have varied in the past and are likely to vary significantly from quarter to quarter in the future, making them difficult to predict. Some of the factors that could cause our revenues, operating results and profitability to vary include:

- seasonality, including number of workdays and holiday and summer vacations;
- the business decisions of our clients regarding the use of our services;
- periodic differences between our clients' estimated and actual levels of business activity associated with ongoing work;
- the stage of completion of existing projects and/or their termination;
- our ability to transition employees quickly from completed to new projects;

the introduction of new products or services by us or our competitors;

changes in our pricing policies or those of our competitors;

our ability to manage costs, including those for personnel, support services and severance;

our ability to maintain an appropriate headcount in each of our workforces;

acquisition and integration costs related to possible acquisitions of other businesses;

changes in, or the application of changes in, accounting principles or pronouncements under U.S. generally accepted accounting principles, particularly those related to revenue recognition;

currency exchange rate fluctuations;

changes in estimates, accruals or payments of variable compensation to our employees; and

global, regional and local economic and political conditions and related risks, including acts of terrorism.

As a result of any of these factors, our share price could be difficult to predict and our share price in the past might not be a good indicator of the price of our shares in the future. In addition, if litigation is instituted against us following variability in our share price, we might need to devote substantial time and resources to responding to the litigation, and our share price could be adversely affected.

Our share price could be adversely affected if we are unable to maintain effective internal controls.

We are required to provide a report from management to our shareholders on our internal control over financial reporting that includes an assessment of the effectiveness of these controls. Internal control over financial reporting has inherent limitations, including human error, the possibility that controls could be circumvented or become inadequate because of changed conditions, and fraud. Because of these inherent limitations, internal control over financial reporting might not prevent or detect all misstatements or fraud. If we cannot maintain and execute adequate internal control over financial reporting or implement required new or improved controls that provide reasonable assurance of the reliability of the financial reporting and preparation of our financial statements for external use, we could suffer harm to our reputation, fail to meet our public reporting requirements on a timely basis, or be unable to properly report on our business and the results of our operations and the market price of our securities could be materially adversely affected.

We are registered in Bermuda and a significant portion of our assets are located outside the United States. As a result, it might not be possible for shareholders to enforce civil liability provisions of the Federal or state securities laws of the United States.

We are organized under the laws of Bermuda, and a significant portion of our assets are located outside the United States. It might not be possible to enforce court judgments obtained in the United States against us in Bermuda or in countries other than in the United States where we have assets based on the civil liability provisions of the Federal or state securities laws of the United States. In addition, there is some doubt as to whether the courts of Bermuda and other countries would recognize or enforce judgments of U.S. courts obtained against us or our directors or officers based on the civil liabilities provisions of the Federal or state securities laws of the United States or would hear actions against us or those persons based on those laws. We have been advised by our legal advisors in Bermuda that the United States and Bermuda do not currently have a treaty providing for the reciprocal recognition and enforcement of judgments in civil and commercial matters. Therefore, a final judgment for the payment of money rendered by any Federal or state court in the United States based on civil liability, whether or not based solely on U.S. Federal or state securities laws, would not automatically be enforceable in Bermuda. Similarly, those judgments might not be enforceable in countries other than in the United States where we have assets.

Bermuda law differs from the laws in effect in the United States and might afford less protection to shareholders.

Our shareholders could have more difficulty protecting their interests than would shareholders of a corporation incorporated in a jurisdiction of the United States. As a Bermuda company, we are governed by the Companies Act 1981 of Bermuda. The Companies Act differs in some material respects from laws generally applicable to U.S. corporations and shareholders, including the provisions relating to interested directors, mergers and acquisitions, takeovers, shareholder lawsuits and indemnification of directors.

Under Bermuda law, the duties of directors and officers of a company are generally owed to the company only. Shareholders of Bermuda companies do not generally have rights to take action against directors or officers of the company, and may only do so in limited circumstances. Officers of a Bermuda company must, in exercising their powers and performing their duties, act honestly and in good faith with a view to the best interests of the company and must exercise the care and skill that a reasonably prudent person would exercise in comparable circumstances. Directors have a duty not to put themselves in a position in which their duties to the company and their personal interests might conflict and also are under a duty to disclose any personal interest in any contract or arrangement with the company or any of its subsidiaries. If a director or officer of a Bermuda company is found to have breached his duties to that company, he could be held personally liable to the company in respect of that breach of duty. A director may be liable jointly and severally with other directors if it is shown that the director knowingly engaged in fraud or dishonesty. In cases not involving fraud or dishonesty, the liability of the director will be determined by the Bermuda courts on the basis of their estimation of the percentage of responsibility of the director for the matter in question, in light of the nature of the conduct of the director and the extent of the causal relationship between his conduct and the loss suffered.

We might be unable to access additional capital on favorable terms or at all. If we raise equity capital, it may dilute our shareholders' ownership interest in us.

We might choose to raise additional funds through public or private debt or equity financings in order to:

- take advantage of opportunities, including more rapid expansion;
- acquire complementary businesses or technologies;
- repurchase additional shares from our current shareholders;
- develop new services and solutions; or
- respond to competitive pressures.

Any additional capital raised through the sale of equity could dilute shareholders' ownership percentage in us. Furthermore, any additional financing we need might not be available on terms favorable to us, or at all.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

We have major offices in the world's leading business centers, including New York, London, Frankfurt, Paris, Madrid, Chicago, Milan, Tokyo, Sao Paulo, Rome, Bangalore, San Francisco, Sydney,

Manila and Boston, among others. In total, we have offices and operations in more than 150 cities in 49 countries around the world. We do not own any material real property. Substantially all of our office space is leased under long-term leases with varying expiration dates. We believe that our facilities are adequate to meet our needs in the near future.

ITEM 3. LEGAL PROCEEDINGS

We are involved in a number of judicial and arbitration proceedings concerning matters arising in the ordinary course of our business. We do not expect that any of these matters, individually or in the aggregate, will have a material impact on our results of operations or financial condition.

In September 2007, the State of Connecticut filed an action in State Superior Court in Hartford against Accenture arising out of an alleged data security breach. The action arises in connection with work we undertook for the State of Connecticut's Office of the Comptroller (the Core-CT Project), during which Accenture properly came into the possession of confidential information, including personally identifiable information, concerning Connecticut citizens. The complaint alleges that some of the information was subsequently placed on a server maintained by the State of Ohio by Accenture employees who were transferred from the Core-CT Project to a similar project for the State of Ohio, and that a back-up tape from the Ohio server containing some of the information was stolen in June 2007 from an Ohio state employee. The State of Connecticut claims that Accenture breached its contract with the Connecticut Comptroller's office and also asserts negligence and the unauthorized taking of information by Accenture. The complaint seeks injunctive relief and damages, including restitution of some unspecified portion of the amount paid to Accenture pursuant to the Core-CT Project contract. During the investigation of this matter, it was discovered that confidential information belonging to several other Accenture clients appeared on the Ohio server, and Accenture has notified the affected clients. Although these events represent a breach of Accenture's internal policies on data security, we have no evidence that any individual has been harmed as a result. Accenture is committed to maintaining the security of its clients' data and is conducting an internal investigation to ensure the integrity of all confidential data, including personally identifiable information, in its possession. Accenture is committed to taking all appropriate remedial actions. In addition to the Connecticut suit, it is possible that other affected parties could bring similar lawsuits or proceedings. We do not believe these matters would have a material impact on our results of operations or financial condition.

On April 12, 2007, the U.S. Department of Justice (the DOJ) intervened in a civil *qui tam* action previously filed under seal by two private individuals in the U.S. District Court for the Eastern District of Arkansas against Accenture and several of its indirect subsidiaries. The complaint alleges that, in connection with work we undertook for the U.S. federal government, we received payments, resale revenue, or other benefits as a result of alliance agreements we maintain with technology vendors and others in violation of our contracts with the U.S. government and/or applicable law or regulations. Similar suits were brought against other companies in our industry. The total amount of the payments, resale revenue and other benefits alleged in the complaint is \$32 million. The suit alleges that these amounts were not disclosed to the government in violation of the Federal False Claims Act and the Anti-Kickback Act, among other statutes. The DOJ complaint seeks various remedies including treble damages, statutory penalties and disgorgement of profits. The suit could lead to other related proceedings by various agencies of the U.S. government, including potential suspension or debarment proceedings. We intend to defend this matter vigorously and do not believe this matter will have a material impact on our results of operations or financial condition.

As previously reported in July 2003, we became aware of an incident of possible noncompliance with the Foreign Corrupt Practices Act and/or with Accenture's internal controls in connection with certain of our operations in the Middle East. In 2003, we voluntarily reported the incident to the

appropriate authorities in the United States promptly after its discovery. Shortly thereafter, the SEC advised us it would be undertaking an informal investigation of this incident, and the DOJ indicated it would also conduct a review. Since that time, there have been no further developments. We do not believe that this incident will have any material impact on our results of operations or financial condition.

We currently maintain the types and amounts of insurance customary in the industries and countries in which we operate, including coverage for professional liability, general liability and management liability. We consider our insurance coverage to be adequate both as to the risks and amounts for the businesses we conduct.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

No matters were submitted to a vote of security holders of Accenture Ltd or Accenture SCA during the fourth quarter of fiscal 2007.

Executive Officers of the Registrant

Our executive officers and persons chosen to become executive officers as of the date hereof are as follows:

Kevin Campbell, 47, became our group chief executive Outsourcing in September 2006, after serving as our senior managing director Business Process Outsourcing beginning in February 2005. Previously, he served as the vice president of global sales at Hewitt Associates from September 2004 to February 2005, and as president and chief operating officer of Exult Inc. from May 2000 to September 2004, when Exult merged with Hewitt. Mr. Campbell was previously employed by Accenture from 1982 until 1999.

Gianfranco Casati, 48, became our group chief executive Products operating group in September 2006. From April 2002 to September 2006, Mr. Casati was managing director of the Products operating group's Europe operating unit. He also served as Accenture's country managing director for Italy and as chairman of our geographic council in its IGEM (Italy, Greece, emerging markets) region, supervising Accenture offices in Italy, Greece and several Eastern European countries. Mr. Casati has been with Accenture for 23 years.

Martin I. Cole, 51, became our group chief executive Communications & High Tech operating group in September 2006, after serving as our group chief executive Government operating group from September 2004 to September 2006. From September 2000 to August 2004, he served in leadership roles in our outsourcing group, including serving as global managing partner of our Outsourcing & Infrastructure Delivery group. Mr. Cole has been with Accenture for 27 years.

Anthony G. Coughlan, 50, has been our principal accounting officer since September 2004 and our controller since September 2001. Mr. Coughlan has been with Accenture for 29 years.

Pamela J. Craig, 50, has been our chief financial officer since October 2006. From March 2004 to October 2006, she was our senior vice president Finance. Previously, Ms. Craig was our group director Business Operations & Services from March 2003 to March 2004, and was our managing partner Global Business Operations from June 2001 to March 2003. Ms. Craig has served as a director of Avanade Inc. since February 2006, and is a member of its Audit Committee. Ms. Craig has been with Accenture for 25 years.

Karl-Heinz Flöther, 55, has been our group chief executive Systems Integration & Technology since May 2005. From December 1999 to May 2005 he was our group chief executive Financial Services operating group. In addition, Mr. Flöther served as one of our directors from June 2001 to

February 2004, and is currently a director of Avanade Inc. Mr. Flöther has been with Accenture for 28 years.

Mark Foster, 48, became our group chief executive Management Consulting & Integrated Markets in September 2006. Prior to that, Mr. Foster served as our group chief executive Products operating group from March 2002 to September 2006. From September 2000 to March 2002, he was managing partner of our Products operating group in Europe. Mr. Foster has been with Accenture for 23 years.

Robert N. Frerichs, 55, has been our chief risk officer since September 2004. From November 2003 to September 2004, he was chief operating officer of our Communication & High Tech operating group. From August 2001 to November 2003, he led the market maker team for our Communications & High Tech operating group. Prior to these roles, Mr. Frerichs held numerous leadership positions within our Communications & High Tech operating group. He currently serves as chairman of the Board of Directors of Avanade Inc., and is a member of its Audit Committee. Mr. Frerichs has been with Accenture for 31 years.

William D. Green, 54, became chairman of the Board of Directors on August 31, 2006, and has been our chief executive officer since September 2004 and a director since June 2001. From March 2003 to August 2004 he was our chief operating officer Client Services, and from August 2000 to August 2004 he was our country managing director, United States. Mr. Green has been with Accenture for 29 years.

Lisa M. Mascolo, 47, became our group chief executive Public Service operating group in September 2006. She has served in leadership roles in our Public Service operating group since 2001, including serving as managing director of our USA Government operating unit and managing partner of Accenture's US Federal Government business. Ms. Mascolo has been with Accenture for 25 years.

Pierre Nanterme, 48, became our group chief executive Financial Services operating group on September 1, 2007. Prior to assuming this role, Mr. Nanterme held various leadership roles throughout the Company, including serving as our chief leadership officer from May 2006 through September 2007, and our country managing director for France from November 2005 to September 2007. Mr. Nanterme has been with Accenture for 24 years.

Stephen J. Rohleder, 50, has been our chief operating officer since September 2004. From March 2003 to September 2004, he was our group chief executive Government operating group. From March 2000 to March 2003, he was managing partner of our Government operating group in the United States. Mr. Rohleder has been with Accenture for 26 years.

Douglas G. Scrivner, 56, has been our general counsel and secretary since January 1996 and our compliance officer since September 2001. Mr. Scrivner has been with Accenture for 27 years.

Alexander M. van t Noordende, 44, became our group chief executive Resources operating group in September 2006. Prior to assuming that role, he led our Resources operating group in Southern Europe, Africa, the Middle East and Latin America, and has served as managing partner of the Resources operating group in France, Belgium and the Netherlands. From 2001 until September 2006, Mr. van t Noordende served as our country managing director for the Netherlands. Mr. van t Noordende has been with Accenture for 20 years.

PART II**ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED SHAREHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES****Price Range of Accenture Ltd Class A Common Shares**

Accenture Ltd Class A common shares are traded on the New York Stock Exchange under the symbol ACN. The New York Stock Exchange is the principal United States market for these shares.

The following table sets forth, on a per share basis for the periods indicated, the high and low sale prices for Accenture Ltd Class A common shares as reported by the New York Stock Exchange.

	Price Range	
	High	Low
<u>Fiscal 2006</u>		
First Quarter	\$ 28.63	\$ 24.45
Second Quarter	\$ 33.05	\$ 28.02
Third Quarter	\$ 32.94	\$ 26.17
Fourth Quarter	\$ 29.66	\$ 25.68
<u>Fiscal 2007</u>		
First Quarter	\$ 35.17	\$ 28.28
Second Quarter	\$ 39.25	\$ 33.45
Third Quarter	\$ 41.19	\$ 34.28
Fourth Quarter	\$ 44.03	\$ 37.25
<u>Fiscal 2008</u>		
First Quarter (through October 15, 2007)	\$ 42.32	\$ 37.25

The closing sale price of an Accenture Ltd Class A common share as reported by the New York Stock Exchange consolidated tape as of October 15, 2007 was \$41.00. As of October 15, 2007, there were 1,318 holders of record of Accenture Ltd Class A common shares.

There is no trading market for Accenture Ltd Class X common shares. As of October 15, 2007, there were 1,293 holders of record of Accenture Ltd Class X common shares.

Dividend Policy

On November 15, 2005, Accenture Ltd paid a cash dividend of \$0.30 per share on its Class A common shares and Accenture SCA paid a cash dividend of \$0.30 per share on its Class I common shares. On November 15, 2006, Accenture Ltd paid a cash dividend of \$0.35 per share on its Class A common shares and Accenture SCA paid a cash dividend of \$0.35 per share on its Class I common shares.

On September 25, 2007, Accenture Ltd declared a cash dividend of \$0.42 per share on its Class A common shares for shareholders of record at the close of business on October 12, 2007. Accenture Ltd will cause Accenture SCA to declare a cash dividend of \$0.42 per share on its Class I common shares for shareholders of record at the close of business on October 9, 2007. Both dividends are payable on November 15, 2007.

Future dividends on Accenture Ltd Class A common shares, if any, will be at the discretion of the Board of Directors of Accenture Ltd and will depend on, among other things, our results of operations, cash requirements and surplus, financial condition, contractual restrictions and other factors that the

Board of Directors may deem relevant, as well as our ability to pay dividends in compliance with the Bermuda Companies Act.

Recent Sales of Unregistered Securities

None.

Purchases and redemptions of Accenture Ltd Class A common shares and Class X common shares

The following table provides information relating to the Company's purchases of Accenture Ltd Class A common shares and redemptions of Accenture Ltd Class X common shares for the fourth quarter of fiscal 2007. For year-to-date information on all share purchases, redemptions and exchanges by the Company and further discussion of the Company's share purchase activity, see Management's Discussion and Analysis of Financial Condition and Results of Operations Liquidity and Capital Resources Share Purchases and Redemptions.

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs(1)	Approximate Dollar Value of Shares that May Yet Be Purchased Under Publicly Announced Plans or Programs (in millions)
June 1, 2007 - June 30, 2007				
Class A common shares	11,036	\$ 41.14		\$ 978
Class X common shares				
July 1, 2007 - July 31, 2007

Class A common shares(1)(2)	2,576,878	\$ 40.32	1,988,773	
Class X common shares(3)	8,941,869	\$ 0.0000225		

- (1) Since August 2001, the Board of Directors of Accenture Ltd has authorized and periodically confirmed a publicly announced open-market share purchase program for acquiring Accenture Ltd Class A common shares. During the fourth quarter of fiscal 2007, we repurchased an aggregate of 1,988,773 Accenture Ltd Class A common shares for an aggregate purchase price of \$79 million. To date, the Board of Directors of Accenture Ltd has authorized an aggregate of \$2.4 billion for use in these open-market share purchases. As of August 31, 2007, an aggregate of \$900 million remained available for these open-market share purchases. The open-market purchase program does not have an expiration date.

- (2) During the fourth quarter of fiscal 2007, Accenture purchased 588,105 Accenture Ltd Class A common shares in transactions unrelated to publicly announced share plans or programs. These transactions consisted of acquisitions of Accenture Ltd Class A common shares via share withholding for payroll tax obligations due from employees and former employees in connection with the delivery of Accenture Ltd Class A common shares under our various employee equity share plans.
- (3) During the fourth quarter of fiscal 2007, we redeemed 8,941,869 Accenture Ltd Class X common shares pursuant to our bye-laws. Accenture Ltd Class X common shares are redeemable at their par value of \$0.0000225 per share.

Purchases and redemptions of Accenture SCA Class I common shares and Accenture Canada Holdings Inc. exchangeable shares

The following table provides additional information relating to purchases and redemptions by Accenture of Accenture SCA Class I common shares and Accenture Canada Holdings Inc. exchangeable shares during the fourth quarter of fiscal 2007. The Company's management believes the following table and footnotes provide useful information regarding the share purchase and redemption activity of

the Company. Generally, purchases and redemptions of Accenture SCA Class I common shares and Accenture Canada Holdings Inc. exchangeable shares reduce shares outstanding for purposes of computing earnings per share.

Period	Total Number of Shares Purchased (1)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Approximate Dollar Value of Shares that May Yet Be Purchased Under Publicly Announced Plans or Programs

- (1) To date, the Board of Directors of Accenture Ltd has authorized an aggregate of \$5.7 billion for purchases and redemptions of shares from our current and former senior executives and their permitted transferees under our Senior Executive Trading Policy and our prior Share Management Plan. As of August 31, 2007, an aggregate of \$750 million remained available for these purchases and redemptions.
- (2) During the fourth quarter of fiscal 2007, Accenture redeemed and purchased a total of 6,893,517 Accenture SCA Class I common shares and 137,472 Accenture Canada Holdings Inc. exchangeable shares from current and former senior executives and their permitted transferees.
- (3) In addition to the amounts included in this table, during the fourth quarter of fiscal 2007, we also redeemed a total of 3,185,481 Accenture SCA Class I common shares from current and former senior executives and their permitted transferees by issuing an equivalent number of Accenture Ltd Class A common shares. See

Management's Discussion and Analysis of Financial Condition and Results of Operations Liquidity and Capital Resources Other Share Redemptions.

Purchases and redemptions of Accenture SCA Class II and Class III common shares

During the fourth quarter of fiscal 2007, Accenture SCA redeemed 4,617,523 Accenture SCA Class III common shares from Accenture. These redemptions were made in transactions unrelated to publicly announced share plans or programs. Transactions involving Accenture SCA Class II and Class III common shares consist exclusively of inter-company transactions undertaken to facilitate other corporate purposes. These inter-company transactions do not reduce shares outstanding for purposes of computing earnings per share reflected in the Company's Consolidated Financial Statements under Financial Statements and Supplementary Data.

ITEM 6. SELECTED FINANCIAL DATA

The data as of August 31, 2007 and 2006 and for the years ended August 31, 2007, 2006 and 2005 are derived from the audited Consolidated Financial Statements and related Notes that are included elsewhere in this report. The data as of August 31, 2005, 2004 and 2003 and for the years ended August 31, 2004 and 2003 are derived from audited Consolidated Financial Statements and related Notes that are not included in this report. The selected financial data should be read in conjunction with Management's Discussion and Analysis of Financial Condition and Results of Operations and our Consolidated Financial Statements and related Notes included elsewhere in this report.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis should be read in conjunction with our Consolidated Financial Statements and related Notes included elsewhere in this Annual Report on Form 10-K. This discussion and analysis also contains forward-looking statements and should also be read in conjunction with the disclosures and information contained in Disclosure Regarding Forward-Looking Statements and Risk Factors in this Annual Report on Form 10-K.

We use the terms Accenture, we, our Company, our and us in this report to refer to Accenture Ltd and its subsidiaries. All references to years, unless otherwise noted, refer to our fiscal year, which ends on August 31. For example, a reference to fiscal 2007 means the 12-month period that ended on August 31, 2007. All references to quarters, unless otherwise noted, refer to the quarters of our fiscal year.

Overview

Revenues are driven by the ability of our executives to secure new contracts and to deliver solutions and services that add value to our clients. Our ability to add value to clients and therefore drive revenues depends in part on our ability to deliver market-leading service offerings and to deploy skilled teams of professionals quickly and on a global basis.

Our results of operations are also affected by the economic conditions, levels of business activity and rates of change in the industries we serve, as well as by the pace of technological change and the type and level of technology spending by our clients. The ability to identify and capitalize on these market and technological changes early in their cycles is a key driver of our performance. Although we are continuing to see strong demand for our services, we continue to expect that revenue growth

rates across our segments may vary from quarter to quarter during fiscal 2008 as economic conditions vary in different industries and geographic markets.

Revenues before reimbursements for fiscal 2007 were \$19.70 billion, compared with \$16.65 billion for fiscal 2006, an increase of 18% in U.S. dollars and 13% in local currency. Revenues before reimbursements for the fourth quarter of fiscal 2007 were \$5.11 billion, compared with \$3.97 billion for the fourth quarter of fiscal 2006, an increase of 29% in U.S. dollars and 23% in local currency.

Consulting revenues before reimbursements for fiscal 2007 were \$11.86 billion, compared with \$9.89 billion for fiscal 2006, an increase of 20% in U.S. dollars and 15% in local currency. For the fourth quarter of fiscal 2007, consulting revenues before reimbursements were \$3.04 billion, compared with \$2.19 billion for the fourth quarter of fiscal 2006, an increase of 38% in U.S. dollars and 32% in local currency.

Outsourcing revenues before reimbursements for fiscal 2007 were \$7.84 billion, compared with \$6.75 billion for fiscal 2006, an increase of 16% in U.S. dollars and 12% in local currency. Outsourcing revenues before reimbursements for the fourth quarter of fiscal 2007 were \$2.07 billion, compared with \$1.77 billion for the fourth quarter of fiscal 2006, an increase of 17% in U.S. dollars and 12% in local currency. Outsourcing contracts typically have longer terms than consulting contracts and generally have lower gross margins than consulting contracts, particularly in the first year. Long-term relationships with many of our clients continue to contribute to our success in growing our outsourcing business. Consistent with broader market trends, our recently signed outsourcing contracts are of shorter duration and therefore of smaller initial total contract value than they have been in the past. Despite this, our average annualized revenue per contract is steady. Long-term, complex outsourcing contracts, including their consulting components, require ongoing review of their terms and scope of work, in light of our clients' evolving business needs and our performance expectations. Should the size or number of modifications to these arrangements increase, as our business continues to grow and these contracts evolve, we may experience increased variability in expected cash flows, revenues and profitability.

As we are a global company, our revenues are denominated in multiple currencies and may be significantly affected by currency exchange-rate fluctuations. During the majority of fiscal 2006, the weakening of various currencies versus the U.S. dollar resulted in an unfavorable currency translation and decreased our reported revenues, operating expenses and operating income. During the majority of fiscal 2007, the U.S. dollar weakened against many currencies, resulting in favorable currency translation and greater reported U.S. dollar revenues, operating expenses and operating income compared to the same period in the prior year. If this trend continues in fiscal 2008, our U.S. dollar revenue growth will be higher than our growth in local currency. In the future, if the U.S. dollar strengthens against other currencies, our U.S. dollar revenue growth may be lower than our growth in local currency.

The primary categories of operating expenses include cost of services, sales and marketing and general and administrative costs. Cost of services is primarily driven by the cost of client-service personnel, which consists mainly of compensation, sub-contractor and other personnel costs, and non-payroll outsourcing costs. Cost of services as a percentage of revenues is driven by the prices we obtain for our solutions and services, the utilization of our client-service personnel and the level of non-payroll costs associated with the growth of new outsourcing contracts. Utilization represents the percentage of our professionals' time spent on billable work. Sales and marketing expense is driven primarily by business-development activities, the development of new service offerings and client-targeting, image-development and brand-recognition activities. General and administrative costs primarily include costs for non-client-facing personnel, information systems and office space, which we seek

to manage, as a percentage of revenues, at levels consistent with or lower than levels in prior-year periods. Operating expenses also include reorganization costs and benefits, which may vary substantially from year to year.

Gross margin (revenues before reimbursements less cost of services before reimbursable expenses) as a percentage of revenues before reimbursements for the three months and year ended August 31, 2007 were 31.2% and 30.7%, respectively, compared with 34.1% and 30.0%, respectively, for the same periods in fiscal 2006. The decrease in gross margin as a percentage of revenues before reimbursements for the three months ended August 31, 2007 was principally due to the net impact of the NHS Transfer Agreement in the fourth quarter of fiscal 2006. The increase in gross margin as a percentage of revenues before reimbursements for the year ended August 31, 2007 was principally due to the net impact during fiscal 2006 of the NHS Transfer Agreement (as defined below) and the second-quarter fiscal 2006 NHS adjustments, partially offset by higher annual bonus accruals during fiscal 2007. See The NHS Contracts.

Our cost-management strategy is to anticipate changes in demand for our services and to identify cost-management initiatives. A primary element of this strategy is to aggressively plan and manage our payroll costs to meet the anticipated demand for our services, given that payroll costs are the most significant portion of our operating expenses.

Our headcount increased to approximately 170,000 as of August 31, 2007 from approximately 140,000 as of August 31, 2006. Annualized attrition for the three months and year ended August 31, 2007 was 18%, excluding involuntary terminations, consistent with the three months and year ended August 31, 2006. We continue to add substantial numbers of new employees and will continue to actively recruit new employees to balance our mix of skills and resources to meet current and projected future demands, replace departing employees and expand our global sourcing approach, which includes our Global Delivery Network and other capabilities around the world. We have adjusted compensation in fiscal 2007 in certain skill sets and geographies in order to attract and retain appropriate numbers of qualified employees and we may need to continue to adjust compensation in the future. As in previous fiscal years, we have adjusted and expect to continue to adjust pricing with the objective of recovering these increases. Our margins and ability to grow our business could be adversely affected if we do not continue to manage attrition, recover increases in compensation and effectively assimilate and utilize large numbers of new employees.

Sales and marketing and general and administrative costs as a percentage of revenues before reimbursements were 17.9% for fiscal 2007, compared with 19.2% for fiscal 2006. The decrease in these costs as a percentage of revenues before reimbursements was primarily due to higher utilization of our client-service personnel on contracts and our multi-year program to reduce costs as a percentage of revenues before reimbursements.

Operating income as a percentage of revenues before reimbursements remained flat at 12.6% for the three months ended August 31, 2007 compared with the three months ended August 31, 2006. Operating income as a percentage of revenues before reimbursements increased to 12.7% for the year ended August 31, 2007 from 11.1% for the year ended August 31, 2006. Excluding the effects of reorganization benefits, operating income as a percentage of revenues before reimbursements for the year ended August 31, 2007 increased 2.1 percentage points compared with the year ended August 31, 2006. The increase was principally due to the net impact during fiscal 2006 of the NHS Transfer Agreement and the second-quarter fiscal 2006 NHS adjustments, partially offset by higher annual bonus accruals during fiscal 2007. See The NHS Contracts.

From time to time we purchase Accenture shares through our open-market purchase program and also purchase, redeem and exchange Accenture shares held by our current and former senior executives and their permitted transferees. During the year ended August 31, 2007, we purchased \$2,308 million of our shares. This comprised \$441 million for purchases of 13.3 million Accenture Ltd

Class A common shares and \$1,867 million for redemptions and purchases of 54.2 million Accenture SCA Class I common shares and Accenture Canada Holdings Inc. exchangeable shares held by our current and former senior executives and their permitted transferees.

The NHS Contracts

We previously entered into certain large, long-term contracts (the NHS Contracts) to provide systems and services to the National Health Service in England (the NHS). During the second quarter of fiscal 2006, there were several developments that significantly increased the risks and uncertainties associated with the NHS Contracts, and we recorded a \$450 million aggregate loss provision that was reflected in Cost of services of our Government and Products operating groups. On September 28, 2006, we entered into an agreement (the NHS Transfer Agreement) to transfer to a third party all of our rights and obligations under the NHS Contracts, except those relating to the Picture Archiving Communication System. The NHS Transfer Agreement resulted in a \$339 million reduction in revenues before reimbursements in the fourth quarter of fiscal 2006, which was offset by a decrease in Cost of services, including a reversal of \$396 million of the loss provision recorded in the second quarter of fiscal 2006. In addition, during the fourth quarter of fiscal 2006, we recorded impairment writedowns on operational services assets totaling \$57 million. These fourth-quarter fiscal 2006 adjustments were reflected in the operating results of our Government and Products operating groups. During the second quarter of fiscal 2007, the transfer and substantially all related activities were completed for less than the maximum \$125 million loss we previously estimated we would incur in fiscal 2007, and no material obligations remain.

Bookings and Backlog

New contract bookings for the three months ended August 31, 2007 were \$4,946 million, with consulting bookings of \$3,129 million and outsourcing bookings of \$1,817 million. New contract bookings for the year ended August 31, 2007 were \$21,974 million, with consulting bookings of \$12,654 million and outsourcing bookings of \$9,320 million.

We provide information regarding our new contract bookings because we believe doing so provides useful trend information regarding changes in the volume of our new business over time. However, new bookings can vary significantly quarter to quarter depending on the timing of the signing of a small number of large contracts. Information regarding our new bookings is not comparable to, nor should it be substituted for, an analysis of our revenues over time. There are no third-party standards or requirements governing the calculation of bookings. New contract bookings involve estimates and judgments regarding new contracts as well as renewals, extensions and additions to existing contracts. Subsequent cancellations, extensions and other matters may affect the amount of bookings previously reported. New contract bookings are recorded using then existing currency exchange rates and are not subsequently adjusted for currency fluctuations.

The majority of our contracts are terminable by the client on short notice or without notice. Accordingly, we do not believe it is appropriate to characterize bookings attributable to these contracts as backlog. Normally, if a client terminates a project, the client remains obligated to pay for commitments we have made to third parties in connection with the project, services performed and reimbursable expenses incurred by us through the date of termination.

Critical Accounting Policies and Estimates

The preparation of our Consolidated Financial Statements in conformity with U.S. generally accepted accounting principles requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the

Consolidated Financial Statements and the reported amounts of revenues and expenses. We continually evaluate our estimates, judgments and assumptions based on available information and experience. Because the use of estimates is inherent in the financial reporting process, actual results could differ from those estimates. Certain of our accounting policies require higher degrees of judgment than others in their application. These include certain aspects of accounting for revenue recognition, income taxes and defined benefit pension plans.

Revenue Recognition

Our contracts have different terms based on the scope, deliverables and complexity of the engagement, the terms of which frequently require Accenture to make judgments and estimates in recognizing revenues. We have many types of contracts, including time-and-materials contracts, fixed-price contracts and contracts with features of both of these contract types. In addition, some contracts include incentives related to costs incurred, benefits produced or adherence to schedule that may increase the variability in revenues and margins earned on such contracts. We conduct rigorous reviews prior to signing such contracts to evaluate whether these incentives are reasonably achievable.

We recognize revenues from technology integration consulting contracts using the percentage-of-completion method pursuant to the American Institute of Certified Public Accountants Statement of Position 81-1, *Accounting for Performance of Construction Type and Certain Production-Type Contracts* (SOP 81-1). Percentage-of-completion accounting involves calculating the percentage of services provided during the reporting period compared with the total estimated services to be provided over the duration of the contract. Estimated revenues for applying the percentage-of-completion method include estimated incentives for which achievement of defined goals is deemed probable. This method is followed where reasonably dependable estimates of revenues and costs can be made. Estimates of total contract revenues and costs are continuously monitored during the term of the contract, and recorded revenues and costs are subject to revision as the contract progresses. Such revisions may result in increases or decreases to revenues and income and are reflected in the Consolidated Financial Statements in the periods in which they are first identified. If our estimates indicate that a contract loss will occur, a loss provision is recorded in the period in which the loss first becomes probable and reasonably estimable. Contract losses are determined to be the amount by which the estimated direct and indirect costs of the contract exceed the estimated total revenues that will be generated by the contract and are included in Cost of services and classified in Other accrued liabilities. Contract loss provisions recorded as of August, 31, 2007 and 2006 are immaterial.

Revenues from contracts for non-technology integration consulting services with fees based on time and materials or cost-plus are recognized as the services are performed and amounts are earned in accordance with SEC Staff Accounting Bulletin (SAB) No. 101, *Revenue Recognition in Financial Statements* (SAB 101), as amended by SAB No. 104, *Revenue Recognition* (SAB 104). We consider amounts to be earned once evidence of an arrangement has been obtained, services are delivered, fees are fixed or determinable, and collectibility is reasonably assured. In such contracts, our efforts, measured by time incurred, typically represent the contractual milestones or output measure, which is the contractual earnings pattern. For non-technology integration consulting contracts with fixed fees, we recognize revenues as amounts become billable in accordance with contract terms, provided the billable amounts are not contingent, are consistent with the services delivered, and are earned. Contingent or incentive revenues relating to non-technology integration consulting contracts are recognized when the contingency is satisfied and we conclude the amounts are earned.

Outsourcing contracts typically span several years and involve complex delivery, often through multiple workforces in different countries. In a number of these arrangements, we hire client employees and become responsible for certain client obligations. Revenues are recognized on

outsourcing contracts as amounts become billable in accordance with contract terms, unless the amounts are billed in advance of performance of services in which case revenues are recognized when the services are performed and amounts are earned in accordance with SAB 101, as amended by SAB 104. Revenues from time-and-materials or cost-plus contracts are recognized as the services are performed. In such contracts, our effort, measured by time incurred, represents the contractual milestones or output measure, which is the contractual earnings pattern. Revenues from unit-priced contracts are recognized as transactions are processed based on objective measures of output. Revenues from fixed-price contracts are recognized on a straight-line basis, unless revenues are earned and obligations are fulfilled in a different pattern. Outsourcing contracts can also include incentive payments for benefits delivered to clients. Revenues relating to such incentive payments are recorded when the contingency is satisfied and we conclude the amounts are earned. We continuously review and reassess our estimates of contract profitability. Circumstances that potentially affect profitability over the life of the contract include decreases in volumes of transactions or other inputs/outputs on which we are paid, failure to deliver agreed benefits, variances from planned internal/external costs to deliver our services, and other factors affecting revenues and costs.

Costs related to delivering outsourcing services are expensed as incurred with the exception of certain transition costs related to the set-up of processes, personnel and systems, which are deferred during the transition period and expensed evenly over the period outsourcing services are provided. The deferred costs are specific internal costs or incremental external costs directly related to transition or set-up activities necessary to enable the outsourced services. Deferred amounts are protected in the event of early termination of the contract and are monitored regularly for impairment. Impairment losses are recorded when projected undiscounted operating cash flows of the related contract are not sufficient to recover the carrying amount of contract assets. Amounts billable to the client for transition or set-up activities are deferred and recognized as revenue evenly over the period outsourcing services are provided.

Revenues for contracts with multiple elements are allocated pursuant to Emerging Issues Task Force Issue 00-21, *Accounting for Revenue Arrangements with Multiple Deliverables*, based on the lesser of the element's relative fair value or the amount that is not contingent on future delivery of another element. If the amount of non-contingent revenues allocated to a delivered element is less than the costs to deliver such services, then such costs are deferred and recognized in future periods when the revenues become non-contingent. Fair value is determined based on the prices charged when each element is sold separately. Revenues are recognized in accordance with our accounting policies for the separate elements when the services have value on a stand-alone basis, fair value of the separate elements exists and, in arrangements that include a general right of refund relative to the delivered element, performance of the undelivered element is considered probable and substantially in our control. While determining fair value and identifying separate elements require judgment, generally fair value and the separate elements are readily identifiable as we also sell those elements unaccompanied by other elements.

Revenues recognized in excess of billings are recorded as Unbilled services. Billings in excess of revenues recognized are recorded as Deferred revenues until revenue recognition criteria are met. Client prepayments (even if nonrefundable) are deferred and recognized over future periods as services are delivered or performed.

Our consulting revenues are affected by the number of work days in the fiscal quarter, which in turn is affected by the level of vacation days and holidays. Consequently, since we typically have approximately 5 to 10 percent more work days in our first and third quarters than in our second and fourth quarters, our consulting revenues are typically higher in our first and third quarters than in our second and fourth quarters.

Revenues before reimbursements include the margin earned on computer hardware and software resale contracts, as well as revenues from alliance agreements, neither of which is material to us. Reimbursements, including those relating to travel and out-of-pocket expenses, and other similar third-party costs, such as the cost of hardware and software resales, are included in Revenues, and an equivalent amount of reimbursable expenses is included in Cost of services.

Income Taxes

Determining the consolidated provision for income tax expense, income tax liabilities and deferred tax assets and liabilities involves judgment. As a global company, we calculate and provide for income taxes in each of the tax jurisdictions in which we operate. This involves estimating current tax exposures in each jurisdiction as well as making judgments regarding the recoverability of deferred tax assets. Tax exposures can involve complex issues and may require an extended period to resolve. Changes in the geographic mix or estimated level of annual income before taxes can affect the overall effective tax rate.

We apply an estimated annual effective tax rate to our quarterly operating results to determine the provision for income tax expense. In the event there is a significant unusual or infrequent item recognized in our quarterly operating results, the tax attributable to that item is recorded in the interim period in which it occurs. Our effective tax rate for fiscal 2007 was 34.2%, compared with 25.5% for fiscal 2006.

No taxes have been provided on undistributed foreign earnings that are planned to be indefinitely reinvested. If future events, including material changes in estimates of cash, working capital and long-term investment requirements, necessitate that these earnings be distributed, an additional provision for withholding taxes may apply, which could materially affect our future effective tax rate.

As a matter of course, we are regularly audited by various taxing authorities, and sometimes these audits result in proposed assessments where the ultimate resolution may result in us owing additional taxes. We establish reserves when, despite our belief that our tax return positions are appropriate and supportable under local tax law, we believe certain positions are likely to be challenged and we may not succeed in realizing the tax benefit. We evaluate these reserves each quarter and adjust the reserves and the related interest in light of changing facts and circumstances regarding the probability of realizing tax benefits, such as the progress of a tax audit or the expiration of a statute of limitations. We believe the estimates and assumptions used to support our evaluation of tax benefit realization are reasonable. However, final determinations of prior-year tax liabilities, either by settlement with tax authorities or expiration of statutes of limitations, could be materially different from estimates reflected in assets and liabilities and historical income tax provisions. The outcome of these final determinations could have a material effect on our income tax provision, net income, or cash flows in the period in which that determination is made. We believe our tax positions comply with applicable tax law and that we have adequately provided for any known tax contingencies.

Defined Benefit Pension Plans

In the United States and certain other countries, we maintain and administer defined benefit pension plans. The annual cost of these plans can be significantly affected by changes in assumptions and differences between expected and actual experience.

In September 2006, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards (SFAS) No. 158, *Employers Accounting for Defined Benefit Pension and Other Postretirement Plans, an amendment of FASB Statements No. 87, 106, and 132(R)* (SFAS No. 158). SFAS No. 158 requires companies to prospectively recognize the funded status of

pension and other postretirement benefit plans on the balance sheet. Under SFAS No. 158, gains and losses, prior service costs and credits and any remaining transition amounts under SFAS No. 87, *Employers Accounting for Pensions*, (SFAS No. 87) that have not yet been recognized through pension expense will be recognized in accumulated other comprehensive income, net of tax, until they are amortized as a component of net periodic pension/postretirement benefits expense. SFAS No. 87 requires the recognition of an additional minimum liability if the market value of plan assets is less than the accumulated benefit obligation as the end of the measurement date. Had Accenture not been required to adopt SFAS No. 158 as of August 31, 2007, we would have recognized an additional minimum liability pursuant to the provisions of SFAS No. 87. Additionally, SFAS No. 158 requires companies to measure plan assets and obligations at their year-end balance sheet date. We adopted the recognition and disclosure provisions as of August 31, 2007 and will adopt the year-end measurement date provision as of August 31, 2009.

The adoption of SFAS No. 158 impacted the August 31, 2007 Consolidated Balance Sheet as follows: increase in assets of \$2 million, decrease in liabilities of \$24 million, and increase in shareholders' equity of \$26 million. For additional information, refer to Note 10 (Retirement and Profit Sharing Plans) to our Consolidated Financial Statements under Financial Statements and Supplementary Data.

We utilize actuarial methods required by SFAS No. 87 to account for our defined benefit pension plans. The actuarial methods require numerous assumptions to calculate the net periodic pension benefit expense and the related projected benefit obligation for our defined benefit pension plans. Two of the most significant assumptions are the discount rates and expected long-term rate of return on plan assets. In making these assumptions, we are required to consider current market conditions, including changes in interest rates. Changes in the related net periodic pension costs may occur in the future due to changes in these and other assumptions. Our assumptions reflect our historical experience and management's best judgment regarding future expectations. The assumptions, assets and liabilities used to measure our annual pension expense are determined as of June 30 or August 31 for our U.S. and non-U.S. benefit plans.

Key assumptions used to determine annual pension expense are as follows:

	Pension Benefits					
	2008		2007		2006	
	U.S. Plans	Non-U.S. Plans	U.S. Plans	Non-U.S. Plans	U.S. Plans	Non-U.S. Plans
Discount rate	6.25%	5.08%	6.50%	4.68%	5.25%	4.28%
Expected return on plan assets	7.50%	5.97%	7.50%	5.67%	7.50%	5.57%
Rate of increase in future compensation	4.50%	3.84%	4.50%	3.45%	4.50%	3.27%

Discount Rate

The discount rate is required to be used in each pension plan actuarial valuation. Our methodology for selecting the discount rate for our U.S. Plans is to match the plans' cash flows to that of a yield curve that provides the equivalent yields on zero-coupon corporate bonds for each maturity. The discount rate assumption for our Non-U.S. Plans primarily reflects the market rate for high-quality, fixed-income debt instruments. The discount rate assumptions are based on the expected duration of the benefit payments for each of our pension plans as of the annual measurement date and is subject to change each year. Our estimated U.S. pension expense for fiscal 2008 reflects a 25 basis point decrease in our discount rate, while our non-U.S. estimated pension expense for fiscal 2008 reflects a 40 basis point increase in our discount rate. These changes in discount rate will increase estimated pension expense in fiscal 2008 by

approximately \$4.4 million.

A 25 basis point increase in the discount rate would decrease our annual pension expense by \$6.5 million. A 25 basis point decrease in the discount rate would increase our annual pension expense by \$6.6 million.

Expected Return on Plan Assets

The expected long-term rate of return on plan assets should, over time, approximate the actual long-term returns on pension plan assets and is based on historical returns and the future expectations for returns for each asset class, as well as the target asset allocation of the asset portfolio. A 7.50% expected return on plan assets assumption was used for both fiscal 2008 and 2007 for the U.S. plans, while the expected return on plan assets assumptions for the non-U.S. plans were 5.97% and 5.67% in fiscal 2008 and 2007, respectively.

A 25 basis point change in our return on plan assets would change our annual pension expense by \$3.8 million.

U.S. generally accepted accounting principles include mechanisms that serve to limit the volatility in our earnings which otherwise would result from recording changes in the value of plan assets and benefit obligations in our Consolidated Financial Statements in the periods in which those changes occur. For example, while the expected long-term rate of return on plan assets should, over time, approximate the actual long-term returns, differences between the expected and actual returns could occur in any given year. These differences contribute to the deferred actuarial gains or losses, which are then amortized over time. For Accenture, positive market returns occurred for fiscal 2007 and 2006, causing actual pension plan asset returns to exceed our expected returns.

General

Our U.S. pension plans include plans covering certain U.S. employees and former employees, as well as a frozen plan related to former pre-incorporation partners. As of August 31, 2007, our U.S. employee plans had a projected benefit obligation of \$840 million and assets of \$939 million. No fiscal 2008 contributions will be required for the U.S. employee pension plans. We have not determined whether we will make additional voluntary contributions for U.S. employee pension plans in fiscal 2008. The frozen plan for former partners is unfunded and had a projected benefit obligation of \$133 million as of August 31, 2007.

Non-U.S. pension plan obligations totaled \$653 million as of August 31, 2007, while non-U.S. pension assets totaled \$587 million. We contributed \$94 million to non-U.S. plans in fiscal 2007 and expect to contribute approximately \$25 million in fiscal 2008.

Pension expense was \$90 million and \$151 million for fiscal 2007 and 2006, respectively. Pension expense for fiscal 2008 is estimated to be approximately \$72 million. The fiscal 2008 pension expense estimate incorporates the 2008 assumptions described above.

Revenues by Segment/Operating Group

Our five reportable operating segments are our operating groups, which are Communications & High Tech, Financial Services, Government, Products and Resources. Operating groups are managed on the basis of revenues before reimbursements because our management believes revenues before reimbursements are a better indicator of operating group performance than revenues. From time to time, our operating groups work together to sell and implement certain contracts. The resulting revenues and costs from these contracts may be apportioned among the participating operating groups. Generally, operating expenses for each operating group have similar characteristics and are subject to the same factors, pressures and challenges. However, the economic environment and its effects on the industries served by our operating groups affect revenues and operating expenses within our operating

groups to differing degrees. The mix between consulting and outsourcing is not uniform among our operating groups. Local-currency fluctuations also tend to affect our operating groups differently, depending on the geographic concentrations and locations of their businesses.

Revenues presented by operating group, geographic region and type of work were as follows:

	Year Ended August 31, 2007 2006 (in millions)		Percent Increase US\$	Percent Increase Local Currency	Percent of Total Revenues Before Reimbursements for the Year Ended August 31, 2007 2006

n/m = not meaningful

(1) EMEA includes Europe, the Middle East and Africa.

We conduct business in the following countries that individually comprised more than 10% of consolidated revenues before reimbursements within the last three years:

	2007	August 31, 2006	2005
United States	36%	39%	37%
United Kingdom	14	13	17

Results of Operations for the Year Ended August 31, 2007 Compared to Year Ended August 31, 2006

Revenues

Our Communications & High Tech operating group achieved revenues before reimbursements of \$4,600 million for the year ended August 31, 2007, compared with \$4,177 million for the year ended August 31, 2006, an increase of 10% in U.S. dollars and 5% in local currency. The increase was driven by outsourcing growth across all industry groups and all geographic regions and consulting growth in the Asia Pacific and EMEA regions. This was partially offset by a consulting decline in our Communications industry group in the Americas region.

Our Financial Services operating group achieved revenues before reimbursements of \$4,357 million for the year ended August 31, 2007, compared with \$3,558 million for the year ended August 31, 2006, an increase of 22% in U.S. dollars and 16% in local currency, with both consulting and outsourcing contributing to the growth. The increase was primarily driven by growth in the EMEA region across all industry groups, particularly Banking; and in the Americas region, particularly in our Capital Markets and Insurance industry groups.

Our Government operating group achieved revenues before reimbursements of \$2,561 million for the year ended August 31, 2007, compared with \$2,221 million for the year ended August 31, 2006, an increase of 15% in U.S. dollars and 12% in local currency. The increase was driven by consulting growth in the EMEA and Americas regions. Revenue growth was also impacted by a fiscal 2006 \$169 million reduction in consulting revenues associated with the resolution of the NHS matter recorded during the fourth quarter of fiscal 2006. See [The NHS Contracts](#).

Our Products operating group achieved revenues before reimbursements of \$4,913 million for the year ended August 31, 2007, compared with \$4,011 million for the year ended August 31, 2006, an increase of 23% in U.S. dollars and 18% in local currency, with both consulting and outsourcing contributing to the growth. The increase was driven by strong growth in our Consumer Goods & Services and Health & Life Sciences industry groups in the EMEA region and in our Retail and Health & Life Sciences industry groups in the Americas region. These increases more than offset an expected revenue decline in our Retail industry group in the EMEA region during the year ended August 31, 2007 related to a contract termination in the third quarter of fiscal 2006. Revenue growth was also impacted by a fiscal 2006 \$169 million reduction in consulting revenues in our Health & Life Sciences industry group in the EMEA region associated with the resolution of the NHS matter recorded during the fourth quarter of fiscal 2006. See [The NHS Contracts](#).

Our Resources operating group achieved revenues before reimbursements of \$3,243 million for the year ended August 31, 2007, compared with \$2,666 million for the year ended August 31, 2006, an increase of 22% in U.S. dollars and 17% in local currency, primarily driven by strong consulting growth across all geographic regions and strong outsourcing growth in the EMEA region. We experienced strong growth across all four industry groups: Energy, Utilities, Chemicals and Natural Resources.

In the Americas region, we achieved revenues before reimbursements of \$8,483 million in fiscal 2007, compared with \$7,741 million for fiscal 2006, an increase of 10% in U.S. dollars and 9% in local currency. Growth was principally driven by our business in the United States, Brazil and Canada.

In the EMEA region, we achieved revenues before reimbursements of \$9,534 million for fiscal 2007, compared with \$7,644 million for fiscal 2006, an increase of 25% in U.S. dollars and 16% in local currency. Growth was principally driven by our business in the United Kingdom, Spain, Italy, the Netherlands, Germany and France.

In the Asia Pacific region, we achieved revenues before reimbursements of \$1,679 million in fiscal 2007, compared with \$1,261 million for fiscal 2006, an increase of 33% in U.S. dollars and 28% in local currency. Growth was principally driven by our business in Australia, Japan and Singapore.

Operating Expenses

Operating expenses were \$18,960 million in fiscal 2007, an increase of \$2,573 million, or 16%, over fiscal 2006, and decreased as a percentage of revenues to 88.4% from 89.9% over this period. Operating expenses before reimbursable expenses were \$17,203 million in fiscal 2007, an increase of \$2,398 million, or 16%, over fiscal 2006, and decreased as a percentage of revenues before reimbursements to 87.3% from 88.9% over this period. Excluding the effects of reorganization benefits recorded in fiscal 2006, operating expenses as a percentage of revenues before reimbursements for the year ended August 31, 2007 decreased 2.0 percentage points compared with the year ended August 31, 2006.

Cost of Services

Cost of services was \$15,411 million in fiscal 2007, an increase of \$2,177 million, or 16%, over fiscal 2006, and decreased as a percentage of revenues to 71.8% from 72.6% over this period. Cost of services before reimbursable expenses were \$13,654 million in fiscal 2007, an increase of \$2,002 million, or 17%, over fiscal 2006, and decreased as a percentage of revenue before reimbursements to 69.3% from 70.0% over this period. Gross margin (revenues before reimbursements less cost of services before reimbursements as a percentage of revenues before reimbursements) increased to 30.7% from 30.0% during this period. The decrease in Cost of services as a percentage of revenues before reimbursements was principally due to the net impact during fiscal 2006 of the NHS Transfer Agreement and the second-quarter fiscal 2006 NHS adjustments, partially offset by higher annual bonus accruals during fiscal 2007. See The NHS Contracts.

Sales and Marketing

Sales and marketing expense was \$1,904 million in fiscal 2007, an increase of \$196 million, or 12%, over fiscal 2006, and decreased as a percentage of revenues before reimbursements to 9.7% from 10.2% over this period. This decrease as a percentage of revenues before reimbursements was primarily due to lower business and market development costs as a result of higher utilization of our client service personnel on contracts.

General and Administrative Costs

General and administrative costs were \$1,618 million in fiscal 2007, an increase of \$125 million, or 8%, over fiscal 2006, and decreased as a percentage of revenues before reimbursements to 8.2% from 9.0% during this period. This decrease as a percentage of revenues before reimbursements was primarily due to lower costs resulting from our continued efforts to leverage cost efficient locations.

Reorganization Costs (Benefits)

We recorded net reorganization costs of \$26 million for the year ended August 31, 2007 related to interest expense associated with our reorganization liabilities. As of August 31, 2007, the remaining liability for reorganization costs was \$401 million, of which \$377 million was classified as Other accrued liabilities because expirations of statutes of limitations could occur within 12 months. During fiscal 2006, we recorded net reorganization benefits of \$48 million, which included a \$72 million reduction in reorganization liabilities offset by \$24 million of interest expense associated with carrying

these liabilities. In fiscal 2006, the reduction in liabilities was primarily due to final determinations of certain reorganization liabilities established in connection with our transition to a corporate structure in 2001. For additional information, refer to Note 3 (Reorganization Costs (Benefits)) to our Consolidated Financial Statements under

Financial Statements and Supplementary Data. We anticipate that reorganization liabilities will be substantially diminished by the end of fiscal 2008 because we expect final determination will have occurred. However, resolution of current tax audits, initiation of additional audits or litigation may delay final settlements. Final settlement will result in a payment on a final settlement and/or recording a reorganization cost or benefit in our Consolidated Income Statement.

Operating Income

Operating income was \$2,493 million in fiscal 2007, an increase of \$652 million, or 35%, from fiscal 2006. Operating income as a percentage of revenues before reimbursements was 12.7% and 11.1% in fiscal 2007 and 2006, respectively. Excluding the effects of reorganization benefits during fiscal 2006, Operating income as a percentage of revenues before reimbursements for the year ended August 31, 2007 increased by 2.1 percentage points, compared with the year ended August 31, 2006. Operating income for each of the operating groups was as follows:

			Year Ended August 31,		Net
	2007	2006	Increase (Decrease)	Effect of Reorganization Benefits(1)	
			(in millions)		
Communications & High Tech	\$ 582	\$ 631	\$ (49)	\$ 17	\$ (32)
Financial Services	491	388	103	15	118
Government	272	83	189	11	200
Products	669	400	269	18	287
Resources	479	339	140	11	151
Total	\$ 2,493	\$ 1,841	\$ 652	\$ 72	\$ 724

(1) Represents the effect of reorganization benefits recorded during the year ended August 31, 2006.

The following operating income commentary by operating group excludes the effect of reorganization benefits recorded in fiscal 2006:

Communications & High Tech operating income decreased due to higher compensation costs and a decline in contract margins due to a lower proportion of high-margin consulting contracts.

Financial Services operating income increased due to revenue growth, higher utilization and lower sales and marketing costs as a percentage of revenues before reimbursements, partially offset by higher compensation costs and delivery inefficiencies on certain contracts.

Government operating income increased due to the impact of a \$225 million loss provision associated with the NHS Contracts recorded during the second quarter of fiscal 2006. The fiscal 2007 operating income also reflects consulting revenue growth and improved consulting contract margins, offset by higher compensation

costs and asset impairments associated with an outsourcing contract recorded during the first quarter of fiscal 2007. See The NHS Contracts.

Products operating income increased due to strong revenue growth and lower sales and marketing costs as a percentage of revenue before reimbursements, partially offset by higher

compensation costs. Operating income also increased due to the impact of a \$225 million loss provision associated with the NHS Contracts recorded during the second quarter of fiscal 2006, partially offset by revenue recognized in connection with a contract termination in our Retail industry group in the EMEA region recorded during the third quarter of fiscal 2006. See The NHS Contracts.

Resources operating income increased due to strong revenue growth and improved contract margins, partially offset by higher compensation costs.

Higher compensation costs for the year ended August 31, 2007 resulted from higher annual bonus accruals and market compensation adjustments in certain skill sets and geographies.

Gain on Investments, Net

Gain on investments, net was \$19 million in fiscal 2007, an increase of \$17 million from fiscal 2006. The increase resulted primarily from a gain on the sale of a remaining investment from our portfolio of investments that was written down in fiscal 2002.

Interest Income

Interest income was \$155 million in fiscal 2007, an increase of \$25 million, or 19%, over fiscal 2006. The increase resulted primarily from an increase in interest rates and higher average cash balances.

Other Expense

Other expense was \$22 million in fiscal 2007, a decrease of \$6 million from fiscal 2006. The decrease resulted primarily from a decrease in net foreign currency exchange losses.

Provision for Income Taxes

The effective tax rates for fiscal 2007 and 2006 were 34.2% and 25.5%, respectively. The effective tax rate increased in 2007 primarily as a result of benefits recorded in fiscal 2006 related to final determinations of prior-year tax liabilities. Final determinations of prior year tax liabilities, including final agreements with tax authorities and expirations of statutes of limitations, reduced the annual effective tax rate in 2007 and 2006 by 1.8 and 10.8 percentage points, respectively.

Minority Interest

Minority interest eliminates the income earned or expense incurred attributable to the equity interest that some of our current and former senior executives and their permitted transferees have in our Accenture SCA and Accenture Canada Holdings Inc. subsidiaries. See Business Organizational Structure. The resulting net income of Accenture Ltd represents the income attributable to the shareholders of Accenture Ltd. Since January 2002, minority interest has also included immaterial amounts primarily attributable to minority shareholders in our Avanade Inc. subsidiary.

Minority interest was \$480 million in fiscal 2007, an increase of \$20 million, or 4%, from fiscal 2006. The increase was primarily due to an increase in income before minority interest of \$290 million, partially offset by a reduction in the Accenture SCA Class I common shares and Accenture Canada Holdings Inc. exchangeable shares average ownership interests to 27% for the year ended August 31, 2007 from 32% for the year ended August 31, 2006.

Earnings Per Share

Diluted earnings per share were \$1.97 in fiscal 2007, compared with \$1.59 in fiscal 2006. Our earnings per share for the year ended August 31, 2006 were reduced by \$0.26 due to the net impact of the second-quarter fiscal 2006 NHS adjustments. See The NHS Contracts. This reduction of earnings per share was partially offset by increases of \$0.08 resulting from the impact of reorganization benefits and \$0.16 resulting from the impact of tax benefits recorded in June 2006. For information regarding our earnings per share calculation, see Note 2 (Earnings Per Share) to our Consolidated Financial Statements under Financial Statements and Supplementary Data.

Results of Operations for the Year Ended August 31, 2006 Compared to Year Ended August 31, 2005

Revenues presented by operating group, geographic region and type of work were as follows:

	Year Ended August 31, 2006 2005 (in millions)		Percent Increase (Decrease) US\$	Percent Increase Local Currency	Percent of Total Revenues Before Reimbursements for the Year Ended August 31, 2006 2005

Revenues

Our Communications & High Tech operating group achieved revenues before reimbursements of \$4,177 million in fiscal 2006, compared with \$4,001 million in fiscal 2005, an increase of 4% in U.S. dollars and 6% in local currency. The increase was primarily due to revenue growth in our Electronics & High Tech industry group across all geographic regions, consulting growth in the Americas and Asia Pacific regions and outsourcing growth in the EMEA and Asia Pacific regions.

Our Financial Services operating group achieved revenues before reimbursements of \$3,558 million in fiscal 2006, compared with \$3,408 million in fiscal 2005, an increase of 4% in U.S. dollars and 7% in local currency. The increase was driven by revenue growth in our Banking industry group across all regions and in our Insurance industry group in the Americas and Asia Pacific regions. This revenue growth was partially offset by revenue declines in our Capital Markets industry group in the Americas and EMEA regions and in our Insurance industry group in the EMEA region.

Our Government operating group achieved revenues before reimbursements of \$2,221 million in fiscal 2006, compared with \$2,172 million in fiscal 2005, an increase of 2% in U.S. dollars and 4% in local currency. The increase was due to strong outsourcing revenue growth across all geographic regions, partially offset by a \$169 million reduction in consulting revenues associated with the resolution of the NHS matter recorded during the fourth quarter of fiscal 2006. See The NHS Contracts.

Our Products operating group achieved revenues before reimbursements of \$4,011 million in fiscal 2006, compared with \$3,570 million in fiscal 2005, an increase of 12% in U.S. dollars and 15% in local currency, with both consulting and outsourcing contributing to the growth in revenues. The increase was primarily driven by strong revenue growth in the Americas region, particularly in our Health & Life Sciences, Retail, Consumer Goods & Services and Industrial Equipment industry groups. Our Consumer Goods & Services and Industrial Equipment industry groups also had strong growth in the EMEA region. In addition, Products revenues were positively affected by revenues recognized in connection with a contract termination in our Retail industry group in the EMEA region during the third quarter of fiscal 2006. These increases were partially offset by a \$169 million reduction in consulting revenues associated with the resolution of the NHS matter recorded during the fourth quarter of fiscal 2006. See The NHS Contracts.

Our Resources operating group achieved revenues before reimbursements of \$2,666 million in fiscal 2006, compared with \$2,389 million in fiscal 2005, an increase of 12% in both U.S. dollars and local currency, with both consulting and outsourcing contributing to the growth in revenues. We experienced strong revenue growth in our Energy, Chemicals and Natural Resources industry groups across all geographic regions. In our Utilities industry group, we had strong growth in the Americas region, offset by revenue declines in the EMEA and Asia Pacific regions.

In the Americas region achieved revenues before reimbursements of \$7,741 million in fiscal 2006, compared with \$6,730 million for fiscal 2005, an increase of 15% in U.S. dollars and 14% in local currency. Growth was primarily due to our business in the United States, Canada and Brazil.

In the EMEA region recorded revenues before reimbursements of \$7,644 million for fiscal 2006, compared with \$7,735 million for fiscal 2005, a decrease of 1% in U.S. dollars and an increase of 3% in local currency. The decrease was primarily due to a decline in our business in the United Kingdom, including the impact of a \$339 million reduction in consulting revenues associated with the resolution of the NHS matter recorded during the fourth quarter of fiscal 2006. See The NHS Contracts. This decline was partially offset by growth in our business in Italy, Ireland, France, Belgium, the Netherlands, Germany and Spain.

In the Asia Pacific region achieved revenues before reimbursements of \$1,261 million in fiscal 2006, compared with \$1,082 million for fiscal 2005, an increase of 17% in U.S. dollars and 20% in local currency. The increase in revenues was primarily driven by our business in Australia, China and Japan.

Operating Expenses

Operating expenses were \$16,387 million in fiscal 2006, an increase of \$1,404 million, or 9%, over fiscal 2005 and increased as a percentage of revenues to 90% in fiscal 2006 from 88% in fiscal 2005. As a percentage of revenues before reimbursements, operating expenses before reimbursable expenses were 89% and 86% in fiscal 2006 and 2005, respectively. Operating expenses for fiscal 2006 included share-based compensation expense of \$271 million, or 2% of revenues before reimbursements, compared with share-based compensation expense of \$88 million, or 1% of revenues before reimbursements, for fiscal 2005. Effective September 1, 2005, we adopted SFAS No. 123R, *Share Based Payment*, resulting in a change in our method of recognizing share-based compensation expense. Specifically, we now record compensation expense for employee stock options and for our employee share purchase plan. Had we expensed employee stock options and employee share purchase rights during fiscal 2005, we estimate that operating expenses would have included \$306 million in total share-based compensation expense, or 2% of revenues before reimbursements.

Cost of Services

Cost of services was \$13,234 million in fiscal 2006, an increase of \$1,232 million, or 10%, over fiscal 2005 and an increase as a percentage of revenues to 73% in fiscal 2006 from 70% in fiscal 2005. Cost of services before reimbursable expenses was \$11,652 million in fiscal 2006, an increase of \$1,198 million, or 11%, from fiscal 2005. Cost of services before reimbursable expenses increased as a percentage of revenues before reimbursements to 70% in fiscal 2006 from 67% in fiscal 2005. Gross margins (revenues before reimbursements less cost of services before reimbursements) decreased to 30.0% of revenues before reimbursements in fiscal 2006 from 32.8% in fiscal 2005.

The increase in Cost of services and the decrease in gross margins as a percentage of revenues before reimbursements were due primarily to operating losses associated with the net impact of the NHS Transfer Agreement and the second-quarter NHS adjustments. See [The NHS Contracts](#).

Sales and Marketing

Sales and marketing expense was \$1,708 million in fiscal 2006, an increase of \$150 million, or 10%, over fiscal 2005 and increased as a percentage of revenues before reimbursements to 10.2% in fiscal 2006 from 10.0% in fiscal 2005.

General and Administrative Costs

General and administrative costs were \$1,493 million in fiscal 2006, a decrease of \$19 million, or 1%, from fiscal 2005 and decreased as a percentage of revenues before reimbursements to 9.0% in fiscal 2006 from 9.7% in fiscal 2005. The decrease was primarily due to lower spending in geographic facilities and technology costs.

Reorganization Benefits

We recorded net reorganization benefits of \$48 million during fiscal 2006, which included a \$72 million reduction in reorganization liabilities offset by \$24 million of interest expense associated with carrying these liabilities. As of August 31, 2006, the remaining liability for reorganization costs

was \$351 million, of which \$267 million was classified as current liabilities because expirations of statutes of limitations could occur within 12 months. During fiscal 2005, we recorded net reorganization benefits of \$89 million, which included a \$115 million reduction in reorganization liabilities offset by \$26 million of interest expense associated with carrying these liabilities. In both periods, the reduction in liabilities was primarily due to final determinations of certain reorganization liabilities established in connection with our transition to a corporate structure in 2001. For additional information, refer to Note 3 (Reorganization Costs (Benefits)) to our Consolidated Financial Statements under Financial Statements and Supplementary Data. We anticipate that reorganization liabilities will be substantially diminished by the end of fiscal 2008 because the final statutes of limitations will have expired in a number of tax jurisdictions by the end of that year. However, tax audits or litigation may delay final settlements. Final settlement will result in a payment on a final settlement and/or recording a reorganization benefit or cost in our Consolidated Income Statement.

Operating Income

Operating income was \$1,841 million in fiscal 2006, a decrease of \$270 million, or 13%, from fiscal 2005. Operating income as a percentage of revenues before reimbursements was 11.1% and 13.6% in fiscal 2006 and 2005, respectively. Excluding the effects of Reorganization benefits during fiscal 2006, Operating income as a percentage of revenues before reimbursements would have decreased by 0.5 percentage points. Had we expensed employee stock options and employee share purchase rights during fiscal 2005 and adjusted for Reorganization benefits, operating income as a percentage of revenues before reimbursements for fiscal 2005 would have decreased by 2.2 percentage points. The decreases in operating income and operating income as a percentage of revenues before reimbursements were principally due to operating losses associated with the net impact of the NHS Transfer Agreement and the second-quarter NHS adjustments, partially offset by lower general and administrative costs as a percentage of revenues before reimbursements. See The NHS Contracts.

Operating income for each of the operating groups was as follows:

	Year Ended August 31,					Effect of Reorganization Benefits(2)	Net Increase (Decrease)
	2006	2005	Decrease	Adjustments(1)	(in millions)		
Communications & High Tech	\$ 631	\$ 673	\$ (42)	\$ 52	\$ 11	\$ 21	
Financial Services	388	500	(112)	52	11	(49)	
Government	83	169	(86)	27	6	(53)	
Products	400	413	(13)	52	9	48	
Resources	339	356	(17)	35	6	24	
Total	\$ 1,841	\$ 2,111	\$ (270)	\$ 218	\$ 43	\$ (9)	

(1) Adjustments represent the estimated amounts that would have been incurred had we expensed employee stock options and employee share purchase rights for the fiscal year ended August 31, 2005.

(2) Reorganization benefits recorded during the period were allocated to the reportable operating groups as follows:

	Year Ended August 31,		
	2006	2005	Change
	(in millions)		
Communications & High Tech	\$ (17)	\$ (28)	\$ 11
Financial Services	(15)	(26)	11
Government	(11)	(17)	6
Products	(18)	(27)	9
Resources	(11)	(17)	6
Total	\$ (72)	\$ (115)	\$ 43

The following commentary includes the effect on Operating income had we expensed employee stock options and employee share purchase rights in fiscal 2005 and adjusted for reorganization benefits recorded during fiscal 2006 and 2005:

Communications & High Tech operating income increased due to revenue growth, principally in our Electronics & High Tech industry group across all geographic regions and improved gross margins, primarily in the EMEA and Asia Pacific regions.

Financial Services operating income decreased due to lower gross margins from increased payroll costs earlier in the year and delivery inefficiencies on a small number of contracts, partially offset by revenue growth in our Banking industry group across all regions and in our Insurance industry group in the Americas and Asia Pacific regions.

Government operating income decreased principally due to the NHS Contracts operating losses of \$225 million associated with the net impact of the NHS Transfer Agreement and the second-quarter NHS adjustments, partially offset by strong gross margins in outsourcing and increased profitability on certain consulting contracts. See The NHS Contracts.

Products operating income increased due to strong revenue growth, principally in the Americas region, improved gross margins, and lower combined sales and marketing and general and administrative costs as a percentage of revenues before reimbursements. In addition, Products operating income was positively affected by revenues recognized in connection with a contract termination in our Retail industry group in the EMEA region during the third quarter of fiscal 2006. These increases were partially offset by the NHS Contracts operating losses of \$225 million associated with the net impact of the NHS Transfer Agreement and the second- quarter NHS adjustments. See The NHS Contracts.

Resources operating income increased due to strong revenue growth in our Energy, Chemicals and Natural Resources industry groups across all geographic regions and lower sales and marketing costs.

Gain on Investments, Net

Gain on investments, net was \$2 million in fiscal 2006, a decrease of \$19 million from fiscal 2005. The fiscal 2005 gain on investments, net reflects gains on our retained interests in our venture and investment portfolio, which we sold in fiscal 2003.

Interest Income

Interest income was \$130 million in fiscal 2006, an increase of \$21 million, or 20%, over fiscal 2005. The increase resulted primarily from an increase in interest rates.

Other Expense

Other expense was \$28 million in fiscal 2006, an increase of \$17 million over fiscal 2005. The increase resulted primarily from an increase in net foreign currency exchange losses.

Provision for Income Taxes

The effective tax rates for fiscal 2006 and 2005 were 25.5% and 31.6%, respectively. The effective tax rate decreased in 2006 primarily as a result of benefits related to final determinations of prior-year tax liabilities and a 3.8 percentage point benefit related to updated estimates of the probable future benefit of certain deferred tax assets. Final determinations of prior year tax liabilities, including final agreements with tax authorities and expirations of statutes of limitations, reduced the annual effective tax rate in 2006 and 2005 by 10.8 and 6.4 percentage points, respectively. The decrease in reorganization liabilities in fiscal 2006 and 2005 reduced the annual effective tax rate by 0.9 and 1.4 percentage points, respectively. These reductions in the 2006 tax rate were partially offset by increases in the tax rate of 1.6 percentage points related to changes in our geographic mix of income, including decreases in UK income resulting from NHS contract losses and increases in other nondeductible items.

Minority Interest

Minority interest eliminates the income earned or expense incurred attributable to the equity interest that some of our current and former senior executives and their permitted transferees have in our Accenture SCA and Accenture Canada Holdings Inc. subsidiaries. See Business Organizational Structure. The resulting net income of Accenture Ltd represents the income attributable to the shareholders of Accenture Ltd. Since January 2002, minority interest has also included immaterial amounts primarily attributable to minority shareholders in our Avanade Inc. subsidiary.

Minority interest was \$460 million in fiscal 2006, a decrease of \$109 million, or 19%, from fiscal 2005. The decrease was primarily due to lower Net income and a reduction in the Accenture SCA Class I common shares and Accenture Canada Holdings Inc. exchangeable shares average ownership interests to 32% for the year ended August 31, 2006 from 37% for the year ended August 31, 2005.

Earnings Per Share

Diluted earnings per share were \$1.59 in fiscal 2006, compared with \$1.56 in fiscal 2005. For fiscal 2005, had we expensed employee stock options and employee share purchase rights, our reported diluted earnings per share would have been \$1.40. For information regarding our earnings per share calculation, see Note 2 (Earnings Per Share) to our Consolidated Financial Statements under Financial Statements and Supplementary Data.

Liquidity and Capital Resources

Our primary sources of liquidity are cash flows from operations, debt capacity available under various credit facilities and available cash reserves. We may also be able to raise additional funds through public or private debt or equity financings in order to:

- take advantage of opportunities, including more rapid expansion;
- acquire complementary businesses or technologies;
- develop new services and solutions;

respond to competitive pressures; or

facilitate purchases, redemptions and exchanges of Accenture shares.

As of August 31, 2007, cash and cash equivalents of \$3,314 million combined with \$300 million of liquid fixed-income securities that are classified as investments in our Consolidated Balance Sheet totaled \$3,614 million, compared with \$3,530 million as of August 31, 2006, an increase of \$84 million.

Cash flows from operating, investing and financing activities, as reflected in our Consolidated Cash Flows Statements, are summarized in the following table:

	Year Ended August 31,			2007 to 2006 Change
	2007(1)	2006	2005	
		(in millions)		
Net cash provided by (used in):				
Operating activities	\$ 2,631	\$ 2,668	\$ 1,887	\$ (37)
Investing activities	(350)	(243)	(575)	(107)
Financing activities	(2,128)	(1,944)	(1,377)	(184)
Effect of exchange rate changes on cash and cash equivalents	95	102	(4)	(7)
Net increase (decrease) in cash and cash equivalents	\$ 247	\$ 583	\$ (69)	\$ (335)

(1) May not total due to rounding.

Operating activities: The \$37 million decrease in cash provided by was primarily due to changes in operating assets and liabilities, including payments of approximately \$176 million to the NHS in connection with the NHS Transfer Agreement, partially offset by higher Net income.

Investing activities: The \$107 million increase in cash used was primarily due to an increase in the purchases of marketable securities and property and equipment, partially offset by an increase in proceeds from marketable securities and lower spending on business acquisitions during fiscal 2007 compared to fiscal 2006.

Financing activities: The \$184 million increase in cash used was primarily driven by an increase in purchases of common shares and an increase in cash dividends paid, partially offset by a \$51 million increase in cash received for Accenture Ltd Class A common shares issued under Accenture's employee share programs. For additional information, see Note 13 (Material Transactions Affecting Shareholders' Equity) to our Consolidated Financial Statements under Financial Statements and Supplementary Data.

We believe that our available cash balances and the cash flows expected to be generated from operations will be sufficient to satisfy our current and planned working capital and investment needs for the next 12 months. We also believe that our longer-term working capital and other general corporate funding requirements will be satisfied through cash flows from operations and, to the extent necessary, from our borrowing facilities and future financial market activities.

Borrowing Facilities

As of August 31, 2007, we had the following borrowing facilities, including the issuance of letters of credit, to support general working capital purposes:

	Facility Amount	Borrowings Under Facilities (in millions)
Syndicated loan facility(1)	\$ 1,200	\$
Separate bilateral, uncommitted, unsecured multicurrency revolving credit facilities(2)	350	1
Local guaranteed and non-guaranteed lines of credit(3)	139	
Total	\$ 1,689	\$ 1

- (1) On July 12, 2007, the maturity of our existing \$1.2 billion syndicated loan facility was extended one year, resulting in a current maturity of July 31, 2012. This facility provides unsecured, revolving borrowing capacity for general working capital purposes, including the issuance of letters of credit. Financing is provided under this facility at the prime rate or at the London Interbank Offered Rate plus a spread. This facility requires us to:
- (1) limit liens placed on our assets to (a) liens incurred in the ordinary course of business (subject to certain qualifications) and (b) other liens securing obligations not to exceed 30% of our consolidated assets; and
 - (2) maintain a debt-to-cash-flow ratio not exceeding 1.75 to 1.00. We continue to be in compliance with these terms. As of August 31, 2007 and 2006, we had no borrowings under the facility. The facility is subject to annual commitment fees.
- (2) We maintain three separate bilateral, uncommitted, unsecured multicurrency revolving credit facilities. These facilities provide local-currency financing for the majority of our operations. Interest rate terms on the bilateral revolving facilities are at market rates prevailing in the relevant local markets. As of August 31, 2007 and 2006, we had \$1 million and \$2 million, respectively, of borrowings under these facilities.
- (3) We also maintain local guaranteed and non-guaranteed lines of credit for those locations that cannot access our global facilities. As of August 31, 2007 and 2006, we had no borrowings under these various facilities.

Under the borrowing facilities described above, we had an aggregate of \$164 million and \$153 million of letters of credit outstanding as of August 31, 2007 and 2006, respectively. In addition, we had no other short-term borrowings as of August 31, 2007 and 2006.

We also had total outstanding debt of \$25 million and \$50 million as of August 31, 2007 and 2006, respectively, which was primarily incurred in conjunction with the purchase of Accenture HR Services.

Share Purchases and Redemptions

The Board of Directors of Accenture Ltd has authorized funding for our publicly announced open-market share purchase program for acquiring Accenture Ltd Class A common shares and for redemptions and repurchases of Accenture Ltd Class A common shares, Accenture SCA Class I common shares and Accenture Canada Holdings Inc. exchangeable shares held by our current and former senior executives and their permitted transferees. Effective as of

March 24, 2006, the Board of Directors of Accenture Ltd authorized an additional \$1.5 billion for the purchase, redemption and exchange from time to time of our shares, including open-market share purchases. Effective as of March 2, 2007, the Board of Directors of Accenture Ltd authorized an additional \$1.5 billion for the purchase, redemption and exchange from time to time of our shares. In addition, during the year ended August 31, 2007, the Board of Directors of Accenture Ltd separately authorized funding for two discounted tender offers for Accenture SCA Class I common shares.

A summary of our share purchase activity for cash during the year ended August 31, 2007 is as follows:

	Accenture Ltd Class A Common Shares		Accenture SCA Class I Common Shares and Accenture Canada Holdings Inc. Exchangeable Shares(4)		Total	
	Shares	Amount (in millions, except share amounts)	Shares	Amount	Shares	Amount
Open-Market Share Purchases	1,988,773	\$ 79		\$	1,988,773	\$ 79
Discounted Tender Offers(1)			16,538,239	485	16,538,239	485
Other Share Purchase Programs	9,858,011	309(2)	37,640,287	1,382	47,498,298	1,691
Other purchases(3)	1,430,629	53			1,430,629	53
Total	13,277,413	\$ 441	54,178,526	\$ 1,867	67,455,939	\$ 2,308

- (1) On September 11, 2006, Accenture SCA and one of its subsidiaries made a tender offer to Accenture SCA Class I common shareholders that resulted in share redemptions and purchases, effective October 11, 2006, of 7,538,172 shares at a price of \$24.75 per share, resulting in a cash outlay of approximately \$187 million. On March 8, 2007, Accenture SCA and one of its subsidiaries made a tender offer to Accenture SCA Class I common shareholders that resulted in share redemptions and purchases, effective April 9, 2007, of 9,000,067 shares at a price of \$33.00 per share, resulting in a cash outlay of approximately \$298 million.
- (2) On November 13, 2006, Accenture Finance (Gibraltar) Ltd, an indirect subsidiary of Accenture SCA, purchased 1,979,450 Accenture Ltd Class A common shares at a price of \$24.75 per share, resulting in a cash outlay of approximately \$49 million. On May 15, 2007, Accenture Equity Finance B.V., an indirect subsidiary of Accenture SCA, purchased 7,878,561 Accenture Ltd Class A common shares at a per share price of \$33.00 or our local currency equivalent based on exchange rates applicable on April 4, 2007, resulting in a cash outlay of approximately \$260 million. Shares in both transactions were purchased from certain former senior executives residing outside the United States.
- (3) During the year ended August 31, 2007, as authorized under our various employee equity share plans, we acquired Accenture Ltd Class A common shares primarily via share withholding for payroll tax obligations due from employees and former employees in connection with the delivery of Accenture Ltd Class A common shares under those plans.
- (4) Historically, we have recorded redemptions and purchases of Accenture SCA Class I common shares and Accenture Canada Holdings Inc. exchangeable shares (collectively, *Subsidiary Shares*) as a reduction to Additional paid-in-capital. During the year ended August 31, 2007, funds used to acquire *Subsidiary Shares* more than offset the available balance in Additional paid-in-capital. As a result, we began deducting incremental purchases of *Subsidiary Shares* from Retained earnings. Future redemptions and purchases of *Subsidiary Shares* will be recorded against Additional paid-in-capital, to the extent it is available, and any incremental purchases will be recorded against Retained earnings.

As of August 31, 2007, our available authorization was \$1,650 million, which included \$900 million and \$750 million for the open-market share purchase program and other share purchase programs, respectively.

Open-Market Purchases

Accenture has conducted a publicly announced, open-market share purchase program for Accenture Ltd Class A common shares. These purchased shares are currently utilized to provide for select employee benefits, such as equity awards to our senior executives. These shares are held by one or more subsidiaries of Accenture Ltd and are treated as treasury shares.

Other Share Redemptions

On May 15, 2007, we filed a registration statement on Form S-3 relating to 203,349,557 of Accenture Ltd Class A common shares (the registration statement). The registration statement allows us, at our option, to issue freely tradable Accenture Ltd Class A common shares in lieu of cash upon redemptions of Accenture SCA Class I common shares held by Accenture's senior executives, former executives and their permitted transferees. During fiscal 2007, we issued 3,185,481 Accenture Ltd Class A common shares upon redemptions of an equivalent number of Accenture SCA Class I common shares.

Senior Executive Ownership Requirements

To ensure that senior executives continue to maintain equity ownership levels that Accenture considers meaningful, we require current senior executives to comply with the Accenture Senior Executive Equity Ownership Policy. This policy requires senior executives to own Accenture equity valued at a multiple (ranging from 1 to 6) of their base compensation determined by their position level.

Senior Executive Trading Policy

In July 2005, we implemented a Senior Executive Trading Policy applicable to our senior executives that provides, among other things, that covered shares held by actively employed senior executives will be subject to company-imposed quarterly trading guidelines. We set allocation limits of unrestricted covered shares based on a composite average weekly volume of trading in Accenture Ltd Class A common shares. These guidelines allow us to manage the total number of shares redeemed, sold or otherwise transferred by our senior executives in any calendar quarter. The policy guidelines, which can be adjusted by management, are not legal or contractual restrictions, however, and there is a risk that the internal sanctions available to us might not adequately dissuade individual employees from attempting transfers in excess of the amounts permitted under the policy. The Senior Executive Trading Policy also prohibits senior executives from trading in any Accenture equity during any company-designated black-out period.

Subsequent Development

On September 25, 2007, Accenture Ltd declared a cash dividend of \$0.42 per share on our Class A common shares for shareholders of record at the close of business on October 12, 2007. Accenture Ltd will cause Accenture SCA to declare a cash dividend of \$0.42 per share on its Class I common shares for shareholders of record at the close of business on October 9, 2007. Both dividends are payable on November 15, 2007.

Obligations and Commitments

As of August 31, 2007, we had the following obligations and commitments to make future payments under contracts, contractual obligations and commercial commitments:

Contractual Cash Obligations	Total	Payments due by period			More than 5 years
		Less than 1 year	1-3 years (in millions)	3-5 years	
Long-term debt	\$ 25	\$ 23	\$ 2	\$	\$
Operating leases	2,305	388	574	360	983
Retirement obligations(1)	187	39	64	28	56
Other commitments(2)	162	100	53	9	
Total	\$ 2,679	\$ 550	\$ 693	\$ 397	\$ 1,039

- (1) This represents projected payments under certain unfunded retirement plans for former pre-incorporation partners. Because both of these plans are unfunded, we pay these benefits directly. These plans were eliminated for active partners after May 15, 2001.

- (2) Other commitments include, among other things, information technology, software support and maintenance obligations, as well as other obligations in the ordinary course of business that we cannot cancel or where we would be required to pay a termination fee in the event of cancellation. Amounts shown do not include recourse that we may have to recover termination fees or penalties from clients.

Off-Balance Sheet Arrangements

We have various agreements by which we may be obligated to indemnify the other party with respect to certain matters. Generally, these indemnification provisions are included in contracts arising in the normal course of business under which we customarily agree to hold the indemnified party harmless against losses arising from a breach of representations related to such matters as title to assets sold, licensed or certain intellectual property rights and other matters. Payments by us under such indemnification clauses are generally conditioned on the other party making a claim. Such claims are generally subject to challenge by us and dispute resolution procedures specified in the particular contract. Furthermore, our obligations under these arrangements may be limited in terms of time and/or amount and, in some instances, we may have recourse against third parties for certain payments made by us. It is not possible to predict the maximum potential amount of future payments under these indemnification agreements due to the conditional nature of our obligations and the unique facts of each particular agreement. Historically, we have not made any payments under these agreements that have been material individually or in the aggregate. As of August 31, 2007, we were not aware of any obligations under such indemnification agreements that would require material payments.

From time to time, we enter into contracts with clients whereby we have joint and several liability with other participants and/or third parties providing related services and products to clients. Under these arrangements, we and other parties may assume some responsibility to the client or a third party for the performance of others under the terms and conditions of the contract with or for the benefit of the client or in relation to the performance of certain contractual obligations. To date, we have not been required to make any payments under any of the contracts described in this paragraph. For further discussion of these transactions, see Note 15 (Commitments and Contingencies) to our Consolidated Financial Statements under Financial Statements and Supplementary Data.

Recently Adopted Accounting Pronouncements

As of August 31, 2007, we adopted the recognition and disclosure requirements of SFAS No. 158. The effect of adopting SFAS No. 158 on our Consolidated Balance Sheet as of August 31, 2007 has been included in the accompanying 2007 Consolidated Financial Statements. We are currently assessing the impact of the change in measurement date on our Consolidated Financial Statements. For additional information, see Note 10 (Retirement and Profit Sharing Plans) to our Consolidated Financial Statements under Financial Statements and Supplementary Data.

In September 2006, the Securities and Exchange Commission (the SEC) issued Staff Accounting Bulletin No. 108, *Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements* (SAB No. 108). SAB No. 108 provides guidance on the consideration of the effects of prior year misstatements in quantifying current year misstatements for the purpose of a materiality assessment. SAB No. 108 is effective for fiscal years ending after November 15, 2006 and, as a result, is effective for our fiscal year ending August 31, 2007. The adoption of SAB 108 did not have a material impact on our Consolidated Financial Statements.

New Accounting Pronouncements

In July 2006, the Financial Accounting Standards Board (FASB) issued FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes-an interpretation of FASB Statement No. 109* (FIN 48), which is a change in accounting for income taxes. FIN 48 specifies how tax benefits for uncertain tax positions are to be recognized, measured and derecognized in financial statements; requires certain disclosures of uncertain tax matters; specifies how reserves for uncertain tax positions should be classified in the balance sheet; and provides transition and interim-period guidance, among other provisions. FIN 48 is effective for fiscal years beginning after December 15, 2006 and, as a

result, is effective for us beginning September 1, 2007. Upon adoption, the cumulative effect of applying the provisions of FIN 48 will be reported as an adjustment to the opening balance of retained earnings.

We have substantially completed the process of evaluating the effect of FIN 48 on our Consolidated Financial Statements as of the beginning of the period of adoption, September 1, 2007. We estimate that the cumulative effects of applying FIN 48 will be recorded as an immaterial adjustment to beginning Retained earnings. In addition, in accordance with the provisions of FIN 48, we will reclassify an estimated \$700 to \$800 million of the liability for unrecognized tax benefits from current to non-current liabilities because payment of cash is not anticipated within one year of the balance sheet date.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We have no market risk sensitive instruments entered into for trading purposes; therefore, all of our market risk sensitive instruments were entered into for purposes other than trading.

Foreign Currency Risk

We are exposed to foreign currency risk in the ordinary course of business. We hedge material cash flow exposures when feasible using forward contracts. These instruments are generally short-term in nature, with typical maturities of less than one year, and are subject to fluctuations in foreign exchange rates and credit risk. Credit risk is managed through careful selection and ongoing evaluation of the financial institutions utilized as counterparties.

We use sensitivity analysis to determine the effects that market exchange rate fluctuations may have on the fair value of our hedge portfolio. The sensitivity of the hedge portfolio is computed based on the market value of future cash flows as affected by changes in exchange rates. This sensitivity analysis represents the hypothetical changes in value of the hedge position and does not reflect the offsetting gain or loss on the underlying exposure. As of August 31, 2007, a 10% decrease in the levels of foreign currency exchange rates against the U.S. dollar with all other variables held constant would have resulted in a decrease in the fair value of our hedge instruments of \$9 million, while a 10% increase in the levels of foreign currency exchange rates against the U.S. dollar would have resulted in an increase in the fair value of our hedge instruments of \$9 million. As of August 31, 2006, a 10% decrease in the levels of foreign currency exchange rates against the U.S. dollar with all other variables held constant would have resulted in a decrease in the fair value of our hedge instruments of \$32 million, while a 10% increase in the levels of foreign currency exchange rates against the U.S. dollar would have resulted in an increase in the fair value of our hedge instruments of \$33 million.

Interest Rate Risk

The interest rate risk associated with our borrowing and investing activities as of August 31, 2007 is not material in relation to our consolidated financial position, results of operations or cash flows. While we may do so in the future, we have not used derivative financial instruments to alter the interest rate characteristics of our investment holdings or debt instruments.

Equity Price Risk

The equity price risk associated with our marketable equity securities that are subject to market price volatility is not material in relation to our consolidated financial position, results of operations or cash flows.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

See the index included on page F-1, Index to Consolidated Financial Statements.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

(a) Evaluation of Disclosure Controls and Procedures

An evaluation was performed under the supervision and with the participation of our management, including our chief executive officer and our chief financial officer, of the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Exchange Act) as of the end of the period covered by this report.

Based on that evaluation, the chief executive officer and the chief financial officer of Accenture Ltd have concluded that, as of the end of the period covered by this report, Accenture Ltd's disclosure controls and procedures are effective.

(b) Management's Annual Report on Internal Control over Financial Reporting

Accenture's management is responsible for establishing and maintaining adequate internal control over financial reporting to provide reasonable assurance regarding the reliability of our financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Internal control over financial reporting includes those policies and procedures that:

- (i) pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of our assets;
- (ii) provide reasonable assurance that the transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that our receipts and expenditures are being made only in accordance with the authorization of management and/or our Board of Directors; and
- (iii) provide reasonable assurance regarding the prevention or timely detection of any unauthorized acquisition, use or disposition of our assets that could have a material effect on our financial statements.

Due to its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate due to changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Under the supervision and with the participation of our management, including our chief executive officer and chief financial officer, we conducted an evaluation of the effectiveness of our internal control over financial reporting using the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in Internal Control - Integrated Framework. Based on its evaluation, our management concluded that our internal control over financial reporting was effective as of the end of the period covered by this Annual Report on Form 10-K.

KPMG LLP, an independent registered public accounting firm, has audited the Consolidated Financial Statements included in this Annual Report on Form 10-K and, as part of their audit, has issued its attestation report, included herein, on the effectiveness of our internal control over financial reporting. See Report of Independent Registered Public Accounting Firm on page F-3.

(c) Changes in Internal Control over Financial Reporting

There has been no change in Accenture Ltd's internal control over financial reporting that occurred during the fourth quarter of fiscal 2007 that has materially affected, or is reasonably likely to materially affect, Accenture Ltd's internal control over financial reporting.

ITEM 9B. OTHER INFORMATION

None.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

Information about our directors is incorporated by reference from the discussion under the heading "Board and Corporate Governance Matters - Director Biographies" in the Proxy Statement for our 2008 Annual General Meeting of Shareholders (the "2008 Proxy Statement"). Information about our executive officers is contained in the discussion entitled "Executive Officers of the Registrant" in Part I of this Form 10-K. Information about compliance with Section 16(a) of the Exchange Act is incorporated by reference from the discussion under the heading "Section 16(a) Beneficial Ownership Reporting Compliance" in the 2008 Proxy Statement. Information about our Code of Business Ethics governing our employees, including our chief executive officer, chief financial officer and principal accounting officer, is incorporated by reference from the discussion under the heading "Board and Corporate Governance Matters - Board Meetings and Committees" in the 2008 Proxy Statement. Information about our Audit Committee, including the members of the Committee, and our Audit Committee financial experts is incorporated by reference from the discussion under the heading "Board and Corporate Governance Matters - Audit Committee" in the 2008 Proxy Statement.

There have been no material changes to the procedures by which security holders may recommend nominees to our board of directors from those described in the Proxy Statement for our Annual General Meeting of Shareholders filed with the SEC on December 21, 2006.

ITEM 11. EXECUTIVE COMPENSATION

Information about director and executive compensation is incorporated by reference from the discussion under the headings "Compensation of Executive Officers and Directors," "Compensation Committee Interlocks and Insider Participation" and "Reports of the Committees of the Board - Compensation Committee Report" in the 2008 Proxy Statement.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED SHAREHOLDER MATTERS

Information about security ownership of certain beneficial owners and management and related shareholder matters is incorporated by reference from the discussion under the headings "Beneficial Ownership of Directors and Executive Officers" and "Beneficial Ownership of More Than Five Percent of Any Class of Voting Securities" in the 2008 Proxy Statement.

Securities Authorized for Issuance under Equity Compensation Plans

The following table sets forth, as of August 31, 2007, certain information related to our compensation plans under which Accenture Ltd Class A common shares may be issued.

Plan Category	Number of Shares to be Issued Upon Exercise of Outstanding Options, Warrants and Rights	Weighted-Average Exercise Price of Outstanding Options, Warrants and Rights	Number of Shares Remaining Available for Future Issuance Under Equity Compensation Plans (Excluding Securities Reflected in 1st Column)
Equity compensation plans approved by shareholders:			
2001 Share Incentive Plan	94,649,531(1)	\$ 19.10	154,407,572
2001 Employee Share Purchase Plan		N/A	27,291,328
Equity compensation plans not approved by shareholders		N/A	
Total	94,649,531		181,698,900

(1) Consists of 42,872,677 stock options with a weighted average exercise price of \$19.10 per share and 51,776,854 restricted share units.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

Information about certain relationships and transactions with related persons is incorporated by reference from the discussion under the heading "Board and Corporate Governance Matters - Certain Relationships and Related Person Transactions" in the 2008 Proxy Statement. Information about director independence is incorporated by reference from the discussion under the heading "Board and Corporate Governance Matters - Director Independence" in the 2008 Proxy Statement.

ITEM 14. PRINCIPAL ACCOUNTING FEES AND SERVICES

Information about the fees for professional services rendered by our independent auditors in 2007 and 2006 and our Audit Committee's policy on pre-approval of audit and permissible non-audit services of our independent auditors is incorporated by reference from the discussion under the heading "Independent Auditors - Fees" in the 2008 Proxy Statement.

PART IV

ITEM 15. EXHIBITS, FINANCIAL STATEMENT SCHEDULES

(a) List of documents filed as part of this report:

1. Financial Statements as of August 31, 2007 and August 31, 2006 and for the three years ended August 31, 2007 Included in Part II of this Form 10-K:

Consolidated Balance Sheets

Consolidated Income Statements

Consolidated Shareholders' Equity and Comprehensive Income Statements

Consolidated Cash Flows Statements

Notes to Consolidated Financial Statements

2. Financial Statement Schedules:

None

3. Exhibit Index:

<u>Notes to Consolidated Financial Statements</u>	F-9

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

**To the Board of Directors and Shareholders
Accenture Ltd:**

We have audited the accompanying Consolidated Balance Sheets of Accenture Ltd and its subsidiaries as of August 31, 2007 and 2006, and the related Consolidated Statements of Income, Shareholders' Equity and Comprehensive Income, and Cash Flows for each of the years in the three-year period ended August 31, 2007. We also have audited Accenture Ltd's internal control over financial reporting as of August 31, 2007, based on criteria established in the *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Accenture Ltd's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Annual Report On Internal Control Over Financial Reporting (Item 9A(b)). Our responsibility is to express an opinion on these consolidated financial statements and on the Company's internal control over financial reporting based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the consolidated financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Consolidated Financial Statements referred to above present fairly, in all material respects, the financial position of Accenture Ltd and its subsidiaries as of August 31, 2007 and 2006, and the results of their operations and their cash flows for each of the years in the

three-year period ended August 31, 2007, in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, Accenture Ltd maintained, in all material respects, effective internal control over financial reporting as of August 31, 2007, based on criteria established in *Internal Control Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

As disclosed in Note 10 to the Consolidated Financial Statements, the Company, as of August 31, 2007, changed its method of accounting for defined benefit pension and other postretirement plans. Additionally, as disclosed in Note 11 to the Consolidated Financial Statements, the Company, as of September 1, 2005, changed its method of accounting for share-based awards.

ACCENTURE LTD

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(In thousands of U.S. dollars, except share and per share amounts or as otherwise disclosed)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Description of Business

Accenture Ltd is one of the world's leading management consulting, technology services and outsourcing organizations. Accenture Ltd operates globally with one common brand and business model designed to enable it to provide clients around the world with the same high level of service. Drawing on a combination of industry expertise, functional capabilities, alliances, global resources and technology, Accenture Ltd delivers competitively priced, high-value services that help clients measurably improve business performance. Accenture Ltd's global delivery model enables it to provide a complete end-to-end delivery capability by drawing on Accenture Ltd's global resources to deliver high-quality, cost-effective solutions to clients under demanding timeframes.

In fiscal 2005, Accenture Ltd developed and announced a new, broader career model for its highest-level executives that recognizes the diversity of roles and responsibilities demonstrated by these employees. This new career framework replaced the internal use of the "partner" title with the more comprehensive "senior executive" title and applies the "senior executive" title to its highest-level employees, including those employees previously referred to as partners. However, for proper context, Accenture Ltd continues to use the term "partner" in these Notes to Consolidated Financial Statements to refer to these persons in certain situations related to its reorganization and the period prior to its incorporation.

Principles of Consolidation

The Consolidated Financial Statements include the accounts of Accenture Ltd, a Bermuda company, and its controlled subsidiary companies (the Company). Accenture Ltd's only business is to hold Class II and Class III common shares in, and to act as the sole general partner of, its subsidiary, Accenture SCA, a Luxembourg partnership limited by shares. The Company operates its business through Accenture SCA and subsidiaries of Accenture SCA. Accenture Ltd controls Accenture SCA's management and operations and consolidates Accenture SCA's results in its financial statements.

The shares of Accenture SCA and Accenture Canada Holdings Inc. held by persons other than the Company are treated as a minority interest in the Consolidated Financial Statements. The minority interest percentages were 24% and 30% as of August 31, 2007 and 2006, respectively. Purchases and/or redemptions of Accenture SCA Class I common shares or Accenture Canada Holdings Inc. exchangeable shares are accounted for at carryover basis.

Use of Estimates

The preparation of the Consolidated Financial Statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect amounts reported in the Consolidated Financial Statements and accompanying disclosures. Although these estimates are based on management's best knowledge of current events and actions that the Company may undertake in the future, actual results may be different from those estimates.

ACCENTURE LTD

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)
(In thousands of U.S. dollars, except share and per share amounts or as otherwise disclosed)

Reclassifications

Certain amounts reported in previous years have been reclassified to conform to the fiscal 2007 presentation.

Revenue Recognition

Revenues from contracts for technology integration consulting services where the Company designs/redesigns, builds and implements new or enhanced systems applications and related processes for its clients are recognized on the percentage-of-completion method in accordance with American Institute of Certified Public Accountants Statement of Position 81-1, *Accounting for Performance of Construction-Type and Certain Production-Type Contracts* (SOP 81-1). Percentage-of-completion accounting involves calculating the percentage of services provided during the reporting period compared to the total estimated services to be provided over the duration of the contract. Estimated revenues for applying the percentage-of-completion method include estimated incentives for which achievement of defined goals is deemed probable. This method is followed where reasonably dependable estimates of revenues and costs can be made. Estimates of total contract revenues and costs are continuously monitored during the term of the contract, and recorded revenues and costs are subject to revision as the contract progresses. Such revisions may result in increases or decreases to revenues and income and are reflected in the Consolidated Financial Statements in the periods in which they are first identified. If the Company's estimates indicate that a contract loss will occur, a loss provision is recorded in the period in which the loss first becomes probable and reasonably estimable. Contract losses are determined to be the amount by which the estimated direct and indirect costs of the contract exceed the estimated total revenues that will be generated by the contract and are included in Cost of services and classified in Other accrued liabilities. Contract loss provisions recorded as of August, 31, 2007 and 2006 are immaterial.

Revenues from contracts for non-technology integration consulting services with fees based on time and materials or cost-plus are recognized as the services are performed and amounts are earned in accordance with the Securities Exchange Commission (the SEC) Staff Accounting Bulletin (SAB) No. 101, *Revenue Recognition in Financial Statements* (SAB 101), as amended by SAB No. 104, *Revenue Recognition* (SAB 104). The Company considers amounts to be earned once evidence of an arrangement has been obtained, services are delivered, fees are fixed or determinable, and collectibility is reasonably assured. In such contracts, the Company's efforts, measured by time incurred, typically represent the contractual milestones or output measure, which is the contractual earnings pattern. For non-technology integration consulting contracts with fixed fees, the Company recognizes revenues as amounts become billable in accordance with contract terms, provided the billable amounts are not contingent, are consistent with the services delivered, and are earned. Contingent or incentive revenues relating to non-technology integration consulting contracts are recognized when the contingency is satisfied and the Company concludes the amounts are earned.

Outsourcing contracts typically span several years and involve complex delivery, often through multiple workforces in different countries. In a number of these arrangements, the Company hires client employees and becomes responsible for certain client obligations. Revenues are recognized on outsourcing contracts as amounts become billable in accordance with contract terms, unless the amounts are billed in advance of performance of services in which case revenues are recognized when

ACCENTURE LTD

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)
(In thousands of U.S. dollars, except share and per share amounts or as otherwise disclosed)

the services are performed and amounts are earned in accordance with SAB 101, as amended by SAB 104. Revenues from time-and-materials or cost-plus contracts are recognized as the services are performed. In such contracts, the Company's effort, measured by time incurred, represents the contractual milestones or output measure, which is the contractual earnings pattern. Revenues from unit-priced contracts are recognized as transactions are processed based on objective measures of output. Revenues from fixed-price contracts are recognized on a straight-line basis, unless revenues are earned and obligations are fulfilled in a different pattern. Outsourcing contracts can also include incentive payments for benefits delivered to clients. Revenues relating to such incentive payments are recorded when the contingency is satisfied and the Company concludes the amounts are earned.

Costs related to delivering outsourcing services are expensed as incurred with the exception of certain transition costs related to the set-up of processes, personnel and systems, which are deferred during the transition period and expensed evenly over the period outsourcing services are provided. The deferred costs are specific internal costs or incremental external costs directly related to transition or set-up activities necessary to enable the outsourced services. Deferred amounts are protected in the event of early termination of the contract and are monitored regularly for impairment. Impairment losses are recorded when projected undiscounted operating cash flows of the related contract are not sufficient to recover the carrying amount of contract assets. Deferred transition costs were \$382,914 and \$233,543 as of August 31, 2007 and 2006, respectively, and are included in Other non-current assets. Amounts billable to the client for transition or set-up activities are deferred and recognized as revenue evenly over the period outsourcing services are provided. Deferred transition revenues were \$214,319 and \$120,932 as of August 31, 2007 and 2006, respectively, and are included in Other non-current liabilities. Fiscal 2006 amounts for deferred transition costs and deferred transition revenues have been reclassified to conform to the fiscal 2007 presentation.

Revenues for contracts with multiple elements are allocated pursuant to Emerging Issues Task Force Issue 00-21, *Accounting for Revenue Arrangements with Multiple Deliverables*, based on the lesser of the element's relative fair value or the amount that is not contingent on future delivery of another element. If the amount of non-contingent revenues allocated to a delivered element is less than the costs to deliver such services, then such costs are deferred and recognized in future periods when the revenues become non-contingent. Fair value is determined based on the prices charged when each element is sold separately. Revenues are recognized in accordance with the Company's accounting policies for the separate elements, as described above. Elements qualify for separation when the services have value on a stand-alone basis, fair value of the separate elements exists and, in arrangements that include a general right of refund relative to the delivered element, performance of the undelivered element is considered probable and substantially in the Company's control. While determining fair value and identifying separate elements require judgment, generally fair value and the separate elements are readily identifiable as the Company also sells those elements unaccompanied by other elements.

Revenues recognized in excess of billings are recorded as Unbilled services. Billings in excess of revenues recognized are recorded as Deferred revenues until revenue recognition criteria are met.

Revenues before reimbursements include the margin earned on computer hardware and software, as well as revenues from alliance agreements. Reimbursements, including those relating to travel and other out-of-pocket expenses, and other similar third-party costs, such as the cost of hardware and

ACCENTURE LTD

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)
(In thousands of U.S. dollars, except share and per share amounts or as otherwise disclosed)

software resales, are included in Revenues, and an equivalent amount of reimbursable expenses are included in Cost of services. The Company reports revenues net of any revenue-based taxes assessed by governmental authorities.

Operating Expenses

Selected components of operating expenses were as follows:

	Year Ended August 31,		
	2007	2006	2005
Training costs	\$ 775,768	\$ 680,662	\$ 546,248
Research and development costs	307,357	298,354	243,449
Advertising costs	94,404	68,810	65,902
Provision for (release of) doubtful accounts	9,441	9,389	(3,849)

Subcontractor costs are included in Cost of services as they are incurred.

Employee Share-Based Compensation Arrangements

On September 1, 2005, the Company adopted the provisions of Statement of Financial Accounting Standards (SFAS) No. 123R, *Share-Based Payment* (SFAS No. 123R) to record compensation expense for its employee stock options and share purchase rights. SFAS No. 123R is a revision of SFAS 123, *Accounting for Stock-Based Compensation* (SFAS No. 123), and supersedes Accounting Principles Board Opinion (APB) No. 25, *Accounting for Stock Issued to Employees* (APB No. 25), and its related implementation guidance. Prior to the adoption of SFAS No. 123R, the Company followed the intrinsic value method in accordance with APB No. 25, in accounting for its employee stock, options and share purchase rights. For information regarding share-based compensation, see Note 11 (Share-Based Compensation) to these Consolidated Financial Statements.

Income Taxes

The Company calculates and provides for income taxes in each of the tax jurisdictions in which it operates. Deferred tax assets and liabilities, measured using enacted tax rates, are recognized for the future tax consequences of temporary differences between the tax and financial statement bases of assets and liabilities. A valuation allowance reduces the deferred tax assets to the amount that is more likely than not to be realized. The Company establishes reserves when the Company believes certain tax positions are not probable to be sustained if challenged. Each fiscal quarter, the Company evaluates these reserves and adjusts the reserves and related interest in light of changing facts and circumstances.

Translation of Non-U.S. Currency Amounts

Assets and liabilities of non-U.S. subsidiaries whose functional currency is not the U.S. dollar are translated into U.S. dollars at fiscal year-end exchange rates. Revenue and expense items are translated at average exchange rates

prevailing during the fiscal year. Translation adjustments are included in Accumulated other comprehensive income (loss). Gains and losses arising from intercompany foreign currency transactions that are of a long-term investment nature are reported in the same manner as translation adjustments.

ACCENTURE LTD

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued) (In thousands of U.S. dollars, except share and per share amounts or as otherwise disclosed)

Foreign currency transaction losses are included in Other expense and totaled \$26,313, \$30,778 and \$12,473 in fiscal 2007, 2006 and 2005, respectively.

Foreign Exchange Instruments

In the normal course of business, the Company uses derivative financial instruments to manage foreign currency exchange rate risk. The Company hedges material cash flow exposures when feasible using forward contracts. These instruments are generally short-term in nature, with maturities of less than one year, and are subject to fluctuations in foreign exchange rates. Credit risk is managed through careful selection and ongoing evaluation of the financial institutions utilized as counterparties. Substantially all of the Company's financial instruments are recorded at estimated fair value or amounts that approximate fair value. The Company did not have any derivatives designated as hedges as defined by SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities* (SFAS No. 133) outstanding as of August 31, 2007. The changes in fair value of substantially all derivatives are recognized in the Consolidated Income Statements and included in Other expense.

Cash and Cash Equivalents

Cash and cash equivalents consist of all cash balances and liquid investments with original maturities of three months or less, including time deposits and certificates of deposit of \$919,063 and \$1,292,184 as of August 31, 2007 and 2006, respectively. As a result of certain subsidiaries' cash management systems, checks issued but not presented to the banks for payment may create negative book cash payables. Such negative balances are classified as Short-term bank borrowings.

Client Receivables, Client Financing and Allowances

The Company carries its client receivables and unbilled services at their face amounts less allowances. On a periodic basis, the Company evaluates its receivables and unbilled services and establishes allowances based on historical experience and other currently available information. As of August 31, 2007 and 2006, total allowances recorded for client receivables and unbilled services were \$44,302 and \$48,069, respectively. In limited circumstances, the Company agrees to extend financing to certain clients. The terms vary by contract, but generally payment for services is contractually linked to the achievement of specified performance milestones. Imputed interest is recorded at market rates in Interest income. As of August 31, 2007, total client financing was \$234,969, of which \$170,974 was included in Current unbilled services and \$63,995 was included in Non-current unbilled services. As of August 31, 2006, total client financing was \$262,736, of which \$157,655 was included in Current unbilled services and \$105,081 was included in Non-current unbilled services.

Concentrations of Credit Risk

The Company's financial instruments that are exposed to concentrations of credit risk consist primarily of cash and cash equivalents, foreign exchange instruments and client receivables. The Company places its cash and cash equivalents and foreign exchange instruments with highly-rated financial institutions, limits the amount of credit exposure with any one financial institution and conducts ongoing evaluation of the credit worthiness of the financial institutions with which it does business. Client receivables are dispersed across many different industries and

countries; therefore, concentrations of credit risk are limited.

F-13

ACCENTURE LTD

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued) (In thousands of U.S. dollars, except share and per share amounts or as otherwise disclosed)

Investments

All liquid investments with an original maturity greater than 90 days but less than one year are considered to be short-term investments. Investments with an original maturity greater than one year are considered to be long-term investments. Marketable short-term and long-term investments are classified and accounted for as available-for-sale investments. Available-for-sale investments are reported at fair value with changes in unrealized gains and losses recorded as a separate component of Accumulated other comprehensive income (loss) until realized. Quoted market prices are used to determine the fair values of common equity and debt securities that were issued by publicly traded entities. Interest and amortization of premiums and discounts for debt securities are included in Interest income. Realized gains and losses on securities are determined based on the FIFO method and are included in Gain on investments, net. The Company does not hold these investments for speculative or trading purposes. The equity method of accounting is used for unconsolidated investments in which the Company exercises significant influence. All other investments are accounted for under the cost method.

Property and Equipment

Property and equipment is stated at cost, net of accumulated depreciation. Depreciation of property and equipment is computed on a straight-line basis over the following estimated useful lives:

Buildings	20 to 25 years
Computers, related equipment and software	2 to 7 years
Furniture and fixtures	5 to 10 years
Leasehold improvements	Lesser of lease term or 15 years

Long-Lived Assets

Long-lived assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset or group of assets may not be recoverable. Recoverability of long-lived assets or groups of assets is assessed based on a comparison of the carrying amount to the estimated future net cash flows. If estimated future undiscounted net cash flows are less than the carrying amount, the asset is considered impaired and expense is recorded at an amount required to reduce the carrying amount to fair value.

Recently Adopted Accounting Pronouncements

In September 2006, the Financial Accounting Standards Board (FASB) issued SFAS No. 158, *Employers Accounting for Defined Benefit Pension and Other Postretirement Plans, an amendment of FASB Statements No. 87, 106, and 132(R)* (SFAS No. 158). SFAS No. 158 requires the Company to prospectively recognize the funded status of pension and other postretirement benefit plans on the balance sheet, measured as the difference between the plan assets at fair value and the projected benefit obligation and to classify, as a current liability, the amount by which the benefits included in the benefit obligation payable in the next twelve months exceeds the fair value of plan assets. Under SFAS No. 158 gains and losses, prior service costs and credits and any remaining transition amounts under

SFAS No. 87, *Employers Accounting for Pensions*, (SFAS No. 87) that have not yet been

F-14

ACCENTURE LTD

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)
(In thousands of U.S. dollars, except share and per share amounts or as otherwise disclosed)

recognized through net periodic pension/postretirement benefits expense will be recognized in accumulated other comprehensive income, net of tax, until they are amortized as a component of net periodic pension/postretirement benefits expense. Additionally, SFAS No. 158 requires companies to measure plan assets and obligations at their year-end balance sheet date.

As required by SFAS No. 158, the Company adopted the recognition and disclosure provisions as of August 31, 2007. The effect of adopting SFAS No. 158 on the Company's Consolidated Balance Sheet as of August 31, 2007 has been included in the accompanying fiscal 2007 Consolidated Financial Statements. The Company will adopt the year-end measurement date provision as of August 31, 2009 and is currently assessing the impact of the change in measurement date on the Consolidated Financial Statements. For additional information, see Note 10 (Retirement and Profit Sharing Plans) to these Consolidated Financial Statements.

In September 2006, the SEC issued SAB No. 108, *Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements* (SAB No. 108). SAB No. 108 provides guidance on the consideration of the effects of prior year misstatements in quantifying current year misstatements for the purpose of a materiality assessment. SAB No. 108 is effective for the Company's fiscal year ending August 31, 2007. The adoption of SAB 108 did not have a material impact on the Company's Consolidated Financial Statements.

New Accounting Pronouncements

In July 2006, the Financial Accounting Standards Board (FASB) issued FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes-an interpretation of FASB Statement No. 109 (FIN 48)*, which is a change in accounting for income taxes. FIN 48 specifies how tax benefits for uncertain tax positions are to be recognized, measured and derecognized in financial statements; requires certain disclosures of uncertain tax matters; specifies how reserves for uncertain tax positions should be classified in the balance sheet; and provides transition and interim-period guidance, among other provisions. FIN 48 is effective for fiscal years beginning after December 15, 2006 and, as a result, is effective for the Company beginning September 1, 2007. Upon adoption, the cumulative effect of applying the provisions of FIN 48 will be reported as an adjustment to the opening balance of retained earnings.

The Company has substantially completed the process of evaluating the effect of FIN 48 on its Consolidated Financial Statements as of the beginning of the period of adoption, September 1, 2007. The Company estimates that the cumulative effects of applying FIN 48 will be recorded as an immaterial adjustment to beginning Retained earnings. In addition, in accordance with the provisions of FIN 48, the Company will reclassify an estimated \$700,000 to \$800,000 of the liability for unrecognized tax benefits from current to non-current liabilities because payment of cash is not anticipated within one year of the balance sheet date.

ACCENTURE LTD

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)
(In thousands of U.S. dollars, except share and per share amounts or as otherwise disclosed)

2. EARNINGS PER SHARE

Basic and diluted earnings per share are calculated as follows:

	Year Ended August 31,		
	2007	2006	2005
<i>Basic Earnings per share</i>			
Net income available for Class A common shareholders	\$ 1,243,148	\$ 973,329	\$ 940,474
Basic weighted average Class A common shares	604,128,805	589,099,824	588,505,335
Basic earnings per share	\$ 2.06	\$ 1.65	\$ 1.60
<i>Diluted Earnings per share</i>			
Net income available for Class A common shareholders	\$ 1,243,148	\$ 973,329	\$ 940,474
Minority interest in Accenture SCA and Accenture Canada Holdings Inc.(1)	453,917	447,382	556,485
Net income for per share calculation	\$ 1,697,065	\$ 1,420,711	\$ 1,496,959
Basic weighted average Class A common shares	604,128,805	589,099,824	588,505,335
Class A common shares issuable upon redemption/exchange of minority interest(1)	221,333,732	274,435,250	349,231,576
Diluted effect of employee compensation related to Class A common shares	36,406,094	30,539,042	23,089,039
Diluted effect of employee share purchase plan related to Class A common shares	54,704	183,717	298,943
Weighted average Class A common shares	861,923,335	894,257,833	961,124,893
Diluted earnings per share	\$ 1.97	\$ 1.59	\$ 1.56

(1) Diluted earnings per share assumes the redemption and exchange of all Accenture SCA Class I common shares and Accenture Canada Holdings Inc. exchangeable shares, respectively, for Accenture Ltd Class A common shares on a one-for-one basis. The income effect does not take into account Minority interest other, since those shares are not redeemable or exchangeable for Accenture Ltd Class A common shares.

For fiscal 2007, 2006 and 2005, 8,318 options, zero options and 6,484,295 options, respectively, were excluded from the calculation of diluted earnings per share because their exercise prices would render them anti-dilutive.

3. REORGANIZATION COSTS (BENEFITS)

In fiscal 2001, the Company accrued reorganization liabilities in connection with its transition to a corporate structure. These liabilities included certain non-income tax liabilities, such as stamp taxes, as well as liabilities for certain individual income tax exposures related to the transfer of interests in certain entities to the Company as part of the reorganization. These primarily represent unusual and disproportionate individual income tax exposures assumed by certain, but not all, of the Company's shareholders and partners in certain tax jurisdictions specifically related to the transfer of their

F-16

ACCENTURE LTD

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)
(In thousands of U.S. dollars, except share and per share amounts or as otherwise disclosed)

partnership interests in certain entities to the Company as part of the reorganization. The Company has identified certain shareholders and partners who may incur such unusual and disproportionate financial damage in certain jurisdictions. These include shareholders and partners who were subject to tax in their jurisdiction on items of income arising from the reorganization transaction that were not taxable for most other shareholders and partners. In addition, certain other shareholders and partners were subject to a different rate or amount of tax than other shareholders or partners in the same jurisdiction. If additional taxes are assessed on these shareholders or partners in connection with these transfers, the Company intends to make payments to reimburse certain costs associated with the assessment either to the shareholder or partner, or to the taxing authority. The Company has recorded reorganization expense and the related liability where such liabilities are probable. Interest accruals are made to cover reimbursement of interest on such tax assessments.

The Company's reorganization activity is as follows:

	Year Ended August 31,		
	2007	2006	2005
Reorganization liability balance, beginning of period	\$ 350,864	\$ 381,440	\$ 454,042
Final determinations(1)	(44,066)	(72,362)	(115,444)
Changes in estimates	44,066		
Benefits recorded		(72,362)	(115,444)
Interest expense accrued	26,366	24,396	26,187
Payments			
Costs (benefits), net of accrued interest and payments	26,366	(47,966)	(89,257)
Foreign currency translation	23,998	17,390	16,655
Reorganization liability, end of period	\$ 401,228	\$ 350,864	\$ 381,440

(1) Includes final agreements with tax authorities and expirations of statutes of limitations.

As of August 31, 2007, reorganization liabilities of \$376,793 were included in Other accrued liabilities because expirations of statutes of limitations or other final determinations could occur within 12 months, and reorganization liabilities of \$24,435 were included in Other non-current liabilities. The Company anticipates that reorganization liabilities will be substantially diminished by the end of fiscal 2008 because the Company expects final determinations will have occurred. However, resolution of current tax audits, initiation of additional audits or litigation may delay final settlements. Final settlement will result in a payment on a final settlement and/or recording a reorganization benefit or cost in the Company's Consolidated Income Statement.

Total accumulated depreciation	(1,556,146)	(1,359,978)
Property and equipment, net	\$ 808,069	\$ 727,692

6. BUSINESS COMBINATIONS AND GOODWILL

On June 15, 2005, the Company acquired the net assets of Capgemini's North American Health practice for \$175,000 in cash and incurred \$3,525 in expenses that have been accounted for as part of the purchase price. The business acquired by the Company provided hospitals, insurance companies and government entities with systems integration and consulting services related to the delivery of and payment for healthcare services. The primary assets acquired include professional staff, intellectual property regarding processes and numerous client contracts that generally lasted less than one year. The Company recorded \$144,986 of goodwill, all of which was allocated to the Products reportable

segment, and intangible assets of \$25,600. The intangible assets are being amortized over one to five years. The pro forma effects on the Company's operations were not material. Also in fiscal 2005, the Company recorded additional goodwill of \$14,561 related to its acquisitions of Accenture HR Services and \$8,837 from other immaterial acquisitions during the year.

During the year ended August 31, 2006, the Company recorded additional goodwill of \$163,278, related to seven individually immaterial acquisitions. These additions were offset by \$29,771 in net goodwill adjustments, primarily resulting from the reversal of valuation allowances related to pre-acquisition tax attributes recorded under purchase accounting for previous acquisitions. The total consideration for fiscal 2006 acquisitions was \$209,267. The businesses acquired by the Company in

ACCENTURE LTD

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)
(In thousands of U.S. dollars, except share and per share amounts or as otherwise disclosed)

fiscal 2006 provide various technology consulting, advisory and outsourcing services. In connection with these acquisitions, the Company also recorded intangible assets of \$49,189 which are being amortized over one to seven years. The pro forma effects of the fiscal 2006 acquisitions on the Company's operations were not material.

During the year ended August 31, 2007, the Company acquired the net assets of a provider of management consulting services that assists companies and governments in enhancing their performance through strategic process improvements, accelerated innovation and streamlined operations. In addition, the Company completed two individually insignificant acquisitions. The combined purchase price for the fiscal 2007 acquisitions was \$185,823 in cash and \$1,207 in expenses. The primary assets acquired include professional staff, intellectual property regarding processes and numerous client contracts that generally lasted less than one year. The Company recorded combined goodwill of \$127,129, a portion of which was allocated to each of the reportable segments, and combined intangible assets of \$36,546. The intangible assets are being amortized over one to five years. The pro forma effects on the Company's operations were not material.

During the year ended August 31, 2007, the Company also recorded net reductions in goodwill of \$25,910, primarily resulting from reversals of valuation allowances related to pre-acquisition tax attributes recorded under purchase accounting for previous acquisitions and other adjustments related to purchase accounting for previous acquisitions.

The Company follows the impairment provisions and disclosure requirements of SFAS No. 142, *Goodwill and Other Intangible Assets*. As such, the Company performed impairment tests of goodwill for the fiscal years ended August 31, 2007 and 2006 and determined that goodwill was not impaired. The changes in the carrying amount of goodwill by reportable segment are as follows:

8. BORROWINGS AND INDEBTEDNESS

As of August 31, 2007, the Company had the following borrowing facilities:

	Facility Amount	Borrowings Under Facilities
Syndicated loan facility(1)	\$ 1,200,000	\$
Separate bilateral, uncommitted, unsecured multicurrency revolving credit facilities(2)	350,000	924
Local guaranteed and non-guaranteed lines of credit(3)	139,312	
Total	\$ 1,689,312	\$ 924

- (1) On July 12, 2007, the maturity of the Company's existing \$1.2 billion syndicated loan facility was extended one year, resulting in a current maturity of July 31, 2012. This facility provides unsecured, revolving borrowing capacity for general working capital purposes, including the issuance of letters of credit. Financing is provided under this facility at the prime rate or at the London Interbank Offered Rate plus a spread. This facility requires us to: (1) limit liens placed on the Company's assets to (a) liens incurred in the ordinary course of business (subject to certain qualifications) and (b) other liens securing obligations not to exceed 30% of the Company's consolidated assets; and (2) maintain a debt-to-cash-flow ratio not exceeding 1.75 to 1.00. The Company continues to be in compliance with these terms. As of August 31, 2007 and 2006, the Company had no borrowings under the facility. The facility is subject to annual commitment fees.
- (2) The Company maintains three separate bilateral, uncommitted and unsecured multicurrency revolving credit facilities. These facilities provide local currency financing for the majority of the Company's operations. Interest rate terms on the bilateral revolving facilities are at market rates prevailing in the relevant local markets. As of August 31, 2007 and 2006, the Company had \$924 and \$2,218, respectively, of borrowings under these facilities. The weighted average interest rate on borrowings under these multicurrency credit facilities and lines of credit, based on the average annual balances, was approximately 5% in fiscal 2007, 5% in fiscal 2006 and 7% in fiscal 2005.
- (3) The Company also maintains local guaranteed and non-guaranteed lines of credit for those locations that cannot access the Company's global facilities. As of August 31, 2007 and 2006, the Company had no borrowings under these various facilities.

Under the borrowing facilities described above, the Company had an aggregate of \$164,019 and \$153,318 of letters of credit outstanding as of August 31, 2007 and 2006, respectively. In addition, the Company had no other short-term borrowings as of August 31, 2007 and 2006. The Company also had total outstanding debt of \$25,430 and \$49,639 as of August 31, 2007 and 2006, respectively, which was primarily incurred in conjunction with the purchase of

Accenture HR Services.

Non-U.S.	8,261	(103,597)	(2,438)
Total deferred tax (benefit) expense	(107,102)	(220,535)	60,812
Total	\$ 895,861	\$ 490,535	\$ 697,097

(1) 2006 adjusted to reflect the impact of a reallocation of current and deferred tax (benefit) expense between U.S. and non-U.S. There was no change in total to current or deferred (benefit) expense or to total U.S. or total non-U.S. expense.

Deferred income tax expense related to the additional minimum pension liability was \$13,577 and \$102,863 in fiscal 2007 and 2006, respectively, and was recorded in Accumulated other comprehensive income (loss) in the Consolidated Balance Sheets.

The components of Income before income taxes were as follows:

	Year Ended August 31,		
	2007	2006	2005
U.S. sources	\$ 606,437	\$ 648,283	\$ 682,030
Non-U.S. sources	2,012,481	1,275,384	1,523,972
Total	\$ 2,618,918	\$ 1,923,667	\$ 2,206,002

ACCENTURE LTD

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)
(In thousands of U.S. dollars, except share and per share amounts or as otherwise disclosed)

The reconciliation of the U.S. Federal statutory income tax rate to the Company's effective income tax rate was as follows:

	Year Ended August 31,		
	2007	2006	2005
U.S. Federal statutory income tax rate	35.0%	35.0%	35.0%
U.S. state and local taxes, net	1.0	1.7	1.6
Reorganization cost (benefits)	0.4	(0.9)	(1.4)
Final determinations(1)	(1.8)	(10.8)	(6.4)
Deferred tax revaluation(2)	1.0	(3.8)	
Non-U.S. operations	(2.8)	0.5	(0.4)
Other	1.4	3.8	3.2
Effective income tax rate	34.2%	25.5%	31.6%

(1) Final determinations include final agreements with tax authorities and expirations of statutes of limitations.

(2) Related to updated estimates of the probable future benefits of certain deferred tax assets and the impact of tax rate changes on deferred tax assets and liabilities.

ACCENTURE LTD

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)
(In thousands of U.S. dollars, except share and per share amounts or as otherwise disclosed)

The components of the Company's deferred tax assets and liabilities included the following:

	August 31,	
	2007	2006
Deferred tax assets:		
Pensions	\$ 62,482	\$ 77,845
Revenue recognition	61,206	43,747
Compensation and benefits	235,905	165,180
Stock-based Compensation	210,001	161,220
Tax credit carryforwards	22,775	13,937
Net operating loss carryforwards	173,402	271,458
Depreciation and amortization	142,661	144,023
Other	83,427	48,513
	991,859	925,923
Valuation allowance	(157,905)	(198,654)
Total deferred tax assets	833,954	727,269
Deferred tax liabilities:		
Revenue recognition	(64,440)	(71,319)
Depreciation and amortization	(28,673)	(58,660)
Investments	(59,347)	(51,375)
Other	(44,300)	(32,734)
Total deferred tax liabilities	(196,760)	(214,088)
Net deferred tax assets	\$ 637,194	\$ 513,181

The Company recorded valuation allowances of \$157,905 and \$198,654 as of August 31, 2007 and 2006, respectively, against deferred tax assets associated with certain tax net operating loss and tax credit carryforwards, as the Company believes it is more likely than not that these assets will not be realized. During the year ended August 31, 2007, the Company recorded a \$42,995 reversal of valuation allowances against deferred tax assets primarily for tax net operating loss carryforwards. The reversal was recorded as a \$22,235 reduction of goodwill related to pre-acquisition tax attributes recorded under purchase accounting and a \$20,760 discrete tax benefit recorded in the second quarter. In addition, the Company recorded a net increase of \$2,246 related to individually insignificant changes in the valuation allowance. As of August 31, 2007 and 2006, \$3,997 and \$20,736, respectively, of the valuation allowances related to pre-acquisition tax attributes recorded under purchase accounting, the reversal of which in future years will be allocated first to reduce goodwill and then to reduce other non-current intangible assets of the acquired entity. In

addition, \$1,092 and \$2,043 of the valuation allowances as of August 31, 2007 and 2006, respectively, related to tax attributes, the reversal of which in future years will be allocated to Additional paid-in capital and Retained earnings.

F-25

ACCENTURE LTD

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)
(In thousands of U.S. dollars, except share and per share amounts or as otherwise disclosed)

The Company had net operating loss carryforwards as of August 31, 2007 of \$586,713. Of this amount, \$217,368 expires at various dates through 2025 and \$369,345 has an indefinite carryforward period. The Company had tax credit carryforwards as of August 31, 2007 of \$22,775, of which \$16,631 will expire at various dates through 2026 and \$6,144 has an indefinite carryforward period.

As of August 31, 2007, the Company had not recognized a deferred tax liability on \$874,852 of undistributed earnings for certain subsidiaries, because these earnings are intended to be permanently reinvested. If such earnings were distributed, some countries may impose withholding taxes. It is not practicable to determine the amount of the related unrecognized deferred income tax liability.

On October 22, 2004, the American Jobs Creation Act (AJCA) became law. The AJCA includes a deduction of 85 percent of certain foreign earnings that are repatriated, as defined in the AJCA. The Company's affiliate Avanade Inc. (Avanade) elected to apply this provision to qualifying earnings repatriations in its tax year ending September 30, 2006. Avanade elected under this provision to repatriate \$20,643 in September 2006. The tax expense on the repatriated earnings was \$4.

A portion of the Company's operations are subject to a reduced tax rate or are free of tax under various tax holidays which expire during fiscal 2009, 2010, and 2013. The income tax benefits attributable to the tax status of these subsidiaries were estimated to be approximately \$23,000, \$20,000 and \$17,000 in fiscal 2007, 2006 and 2005, respectively.

During fiscal 2007, the Internal Revenue Service commenced an examination of the Company's Federal income tax return for fiscal 2004 and 2005. During fiscal 2006, the Internal Revenue Service commenced an examination of the Company's Federal income tax return for fiscal 2003. The Company expects these audits to be completed by fiscal 2009. The Company is also under examination by numerous state and non-U.S. tax authorities. Although the outcome of tax audits is always uncertain and could result in significant cash tax payments, the Company does not believe the outcome of these audits will have a material adverse effect on the Company's consolidated financial position or results of operations.

If the Company or one of its non-U.S. subsidiaries were classified as a foreign personal holding company, the Company's U.S. shareholders would be required to include in income, as a dividend, their pro rata share of the Company's (or the Company's relevant non-U.S. subsidiary's) undistributed foreign personal holding company income.

Because of the application of complex U.S. tax rules regarding attribution of ownership, certain non-U.S. subsidiaries of Accenture Ltd met the definition of a foreign personal holding company in fiscal 2005. However, there is no foreign personal holding company income that the Company's U.S. shareholders are required to include in income for such years.

In the event that the Company has net foreign personal holding company income, the Company may distribute a dividend to shareholders to avoid having taxable income imputed under these rules. Under certain circumstances, such a distribution could create additional income tax costs to the Company. Since the Company did not have any foreign personal holding company income in fiscal 2005, no such taxes have been provided.

U.S. tax law repealed the foreign personal holding company provisions, effective for all tax years after fiscal 2005.

ACCENTURE LTD

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)
(In thousands of U.S. dollars, except share and per share amounts or as otherwise disclosed)

10. RETIREMENT AND PROFIT SHARING PLANS**Defined Benefit Pension and Postretirement Benefits**

In the United States and certain other countries, the Company maintains and administers defined benefit retirement plans and postretirement medical plans for certain current, retired and resigned employees. Benefits under the employee retirement plans are primarily based on years of service and compensation during the years immediately preceding retirement or termination of participation in the plan. The Company utilizes actuarial methods required by SFAS No. 87 and SFAS No. 106, *Employers Accounting for Postretirement Benefits Other Than Pensions* (SFAS No. 106), to account for pension and postretirement benefit plans, respectively.

In addition, certain postemployment benefits, including severance benefits, disability-related benefits and continuation of benefits, such as healthcare benefits and life insurance coverage, are provided to former or inactive employees after employment but before retirement. These costs are substantially provided for on an accrual basis.

The impact of the initial adoption of SFAS No. 158 on individual line items in the Company's Consolidated Balance Sheet as of August 31, 2007 for its defined benefit pension and postretirement plans was as follows:

	August 31, 2007		August 31,
	Before	SFAS	2007
	SFAS No. 158	No. 158	After
	Adjustments	Adjustments	SFAS No. 158
			Adjustments
Prepaid benefit cost	\$ 146,330	\$ 14,544	\$ 160,874
Deferred income taxes	20,581	(12,423)	8,158
Accrued benefit liability	391,450	(23,932)	367,518
Accumulated other comprehensive (loss) income	(34,439)	26,053	(8,386)

Assumptions

The weighted-average assumptions used to determine the net periodic pension and postretirement benefits expense are as follows:

Pension Benefits					
Year Ended August 31,					
2007		2006		2005	
U.S.	Non-U.S.	U.S.	Non-U.S.	U.S.	Non-U.S.
Plans	Plans	Plans	Plans	Plans	Plans

Edgar Filing: ACCENTURE LTD - Form 10-K

Discount rate	6.50%	4.68%	5.25%	4.28%	6.25%	4.93%
Expected rate of return on plan assets	7.50%	5.67%	7.50%	5.57%	7.50%	5.19%
Rate of increase in future compensation	4.50%	3.45%	4.50%	3.27%	4.50%	3.16%

F-27

ACCENTURE LTD

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)
(In thousands of U.S. dollars, except share and per share amounts or as otherwise disclosed)

	Postretirement Benefits Year Ended August 31,					
	2007		2006		2005	
	U.S. Plans	Non-U.S. Plans	U.S. Plans	Non-U.S. Plans	U.S. Plans	Non-U.S. Plans
Discount rate	6.50%	6.00%	5.25%	5.50%	6.25%	6.75%
Expected rate of return on plan assets	7.50%/3.50%	N/A	7.50%/3.50%	N/A	7.50%/3.50%	N/A
Rate of increase in future compensation	N/A	2.90%	N/A	3.50%	N/A	4.50%

The weighted-average assumptions used to determine the fiscal year-end benefit obligations are as follows:

	Pension Benefits Year Ended August 31,				Postretirement Benefits Year Ended August 31,			
	2007		2006		2007		2006	
	U.S. Plans	Non-U.S. Plans	U.S. Plans	Non-U.S. Plans	U.S. Plans	Non-U.S. Plans	U.S. Plans	Non-U.S. Plans
Discount rate	6.25%	5.08%	6.50%	4.68%	6.25%	5.70%	6.50%	6.00%
Rate of increase in future compensation	4.50%	3.84%	4.50%	3.45%	N/A	2.57%	N/A	2.90%

The Company's methodology for selecting the discount rate for the U.S. Plans is to match the plans' cash flows to that of a yield curve that provides the equivalent yields on zero-coupon corporate bonds for each maturity. The discount rate assumption for the Non-U.S. Plans primarily reflects the market rate for high-quality, fixed-income debt instruments. The discount rate assumptions are based on the expected duration of the benefit payments for each of the Company's pension plans as of the annual measurement date and is subject to change each year. The expected long-term rate of return on plan assets should, over time, approximate the actual long-term returns on pension and other postretirement plan assets and is based on historical returns and the future expectations for returns for each asset class, as well as the target asset allocation of the asset portfolio.

Assumed Health Care Cost Trend

The Company's U.S. Postretirement Benefits annual rate increases in the per capita cost of health care benefits of 8.5% (under age 65) and 9.0% (over age 65) were assumed for the plan year ending June 30, 2008. The rate is assumed to decrease on a straight-line basis to 5% for the plan year ending June 30, 2011 and remain at that level thereafter. A one percentage point change in the assumed health care cost trend rates would have the following effects:

	One Percentage Point Increase		One Percentage Point Decrease	
	2007	2006	2007	2006
Effect on total of service and interest cost components	\$ 1,332	\$ 3,119	\$ (1,125)	\$ (2,415)
Effect on year-end postretirement benefit obligation	12,832	11,526	(11,158)	(9,560)
	F-28

Transition obligation			80	
Total	\$ 2,354	\$ (940)	\$ (721)	\$ (725)

Funded Status for Defined Benefit Plans

Generally, annual contributions are made at such times and in amounts as required by law and may, from time to time, exceed minimum funding requirements. The Company's U.S. pension plans include plans covering certain

U.S. employees and former employees, as well as a frozen plan for former pre-incorporation partners, which is unfunded.

SFAS No. 87 requires recognition of a minimum pension liability if the fair value of pension assets was less than the accumulated benefit obligation. For the year ended August 31, 2006, the charge was \$154,827, representing an adjustment to increase the pension liability by \$257,690, net of a tax expense of \$102,863. These adjustments were included in Accumulated other comprehensive income (loss).

Investment Strategies

U.S. Pension Plans

The overall investment objective of the plans is to provide growth in the assets of the plans to help fund future benefit obligations while managing risk in order to meet current benefit obligations. The plans' future prospects, their current financial conditions, the Company's current funding levels and other relevant factors suggest that the plans can tolerate some interim fluctuations in market value and rates of returns in order to achieve long-term objectives without undue risk to the plans' ability to meet their current benefit obligations.

The Company recognizes that asset allocation of the pension plans' assets is an important factor in determining long-term performance. Actual asset allocations at any point in time may vary from the specified targets below and will be dictated by current and anticipated market conditions, required cash flows, and investment decisions of the investment committee and the pension plans' investment funds and managers. Ranges are established to provide flexibility for the asset allocation to vary around the targets without the need for immediate rebalancing.

Non-U.S. Pension Plans

Plan assets in non-U.S. pension plans conform to the investment policies and procedures of each plan and to relevant legislation. The pension committee or trustee of each plan regularly, but at least annually, reviews the investment policy and the performance of the investment managers. In certain countries, the trustee is also required to consult with the Company. Generally, the investment return

ACCENTURE LTD

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)
(In thousands of U.S. dollars, except share and per share amounts or as otherwise disclosed)

objective of each plan is to achieve a total annualized rate of return that exceeds inflation over the long term by an amount based on the target asset mix of that plan. In certain countries, plan assets are invested in funds that are required to hold a majority of assets in bonds, with a smaller proportion in equities. Also, certain plan assets are entirely invested in contracts held with the plan insurer, who determines the investment strategy. Pension plans in certain countries are unfunded.

Plan Assets

The following table shows the Company's target allocation for fiscal 2008 and weighted-average asset allocations as of August 31, 2007 and 2006 by asset category, for its pension and postretirement benefit plans:

Pension Plans

Asset Category	2008 Target Allocation		Plan Assets as of August 31,			
	Non-U.S.		2007		2006	
	U.S. Plans	Non-U.S. Plans	U.S. Plans	Non-U.S. Plans	U.S. Plans	Non-U.S. Plans

U.S. Postretirement Plan(1)

Asset Category	2008 Target Allocation	Plan Assets as of	
		August 31, 2007	2006
Equity securities	38%	39%	37%
Debt securities	21	16	20

Cash and short-term investments	41	45	43
Total	100%	100%	100%

(1) The non-U.S. plans are unfunded and thus the table only relates to the U.S. Plans.

Expected Contributions

In fiscal 2008, no contribution will be required for U.S. employees' pension plans. In fiscal 2008, the Company estimates it will contribute approximately \$25,000 to its non-U.S. pension plans. Cash funding for retiree medical plans in fiscal 2008 is estimated to be approximately \$2,000. In fiscal

ACCENTURE LTD

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)
(In thousands of U.S. dollars, except share and per share amounts or as otherwise disclosed)

2008, the Company expects to pay approximately \$9,000 of benefit payments related to the unfunded frozen plan for former pre-incorporation partners. The Company has not determined whether it will make additional voluntary contributions for employee pension plans.

Estimated Future Benefit Payments

Benefit payments, which reflect expected future service, as appropriate, are expected to be paid as follows:

	Pension Benefits		Postretirement Benefits	
	U.S. Plans	Non-U.S. Plans	U.S. Plans	Non-U.S. Plans
2008	\$ 19,443	\$ 15,476	\$ 3,653	\$ 468

Defined Contribution Plans

As of January 1, 2004, the Company established a trustee employer 401(k) match plan, the Accenture U.S. 401(k) Match and Savings Plan, in the United States. The total costs of the 401(k) match plan were \$53,202, \$48,086 and \$44,172 in fiscal 2007, 2006 and 2005, respectively.

In the United States, the Company maintains and administers a trustee profit sharing plan, the Accenture U.S. Discretionary Profit Sharing Plan. The annual discretionary profit sharing contribution is determined by management after the end of the fiscal year. The liability recorded as of August 31, 2007 and 2006 for profit sharing was \$58,358 and \$52,691, respectively. The Company expects to pay the liability recorded as of August 31, 2007 in the first quarter of fiscal 2008. The total costs of the profit sharing plan were \$58,358, \$52,691, and \$49,702 in fiscal 2007, 2006 and 2005, respectively.

In the United Kingdom, the Company maintains and administers a defined contribution plan, the Accenture Retirement Savings Plan. The Company provides matching contributions up to certain amounts based upon the age of the eligible employee. The total costs of the plan were \$57,975, \$50,225 and \$46,045 in fiscal 2007, 2006 and 2005, respectively.

11. SHARE-BASED COMPENSATION

In December 2004, the FASB issued SFAS No. 123R which is a revision of SFAS No. 123, and supersedes APB No. 25, and its related implementation guidance. On September 1, 2005, the Company adopted the provisions of SFAS No. 123R using the modified prospective method. SFAS No. 123R focuses primarily on accounting for

transactions in which an entity obtains employee services in share-based payment transactions. SFAS No. 123R requires entities to recognize compensation expense for awards of equity instruments to employees based on the grant-date fair value of those awards (with limited exceptions). SFAS No. 123R also requires the benefits of tax deductions in excess of compensation expense to be reported as a financing cash flow, rather than as an operating

ACCENTURE LTD

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)
(In thousands of U.S. dollars, except share and per share amounts or as otherwise disclosed)

cash flow as prescribed under the prior accounting rules. This requirement reduces net operating cash flows and increases net financing cash flows in periods after adoption. Total cash flow remains unchanged from what would have been reported under prior accounting rules. Upon the adoption of SFAS No. 123R, the Company recognized an immaterial one-time gain based on SFAS No. 123R's requirement to apply an estimated forfeiture rate to unvested awards. Previously, the Company recorded forfeitures as incurred.

Prior to the adoption of SFAS No. 123R, the Company followed the intrinsic value method in accordance with APB No. 25 to account for its employee stock options and share purchase rights. Accordingly, no compensation expense was recognized for share purchase rights granted in connection with the issuance of stock options under the Accenture Ltd 2001 Share Incentive Plan (the "SIP") and through the Accenture Ltd 2001 Employee Share Purchase Plan (the "ESPP"); however, compensation expense was recognized in connection with the issuance of restricted share units granted under the SIP. The adoption of SFAS No. 123R primarily resulted in a change in the Company's method of recognizing the fair value of share-based compensation and estimating forfeitures for all unvested awards. Specifically, the adoption of SFAS No. 123R resulted in the Company recording compensation expense for employee stock options and employee share purchase rights. The impact of adopting SFAS No. 123R on Net Income and Earnings per share for the year ended August 31, 2006 was a decrease of \$43,816 and \$0.08, respectively.

Results for fiscal 2005 have not been restated. Had compensation expense for employee stock options granted under the SIP and for employee share purchase rights under the ESPP been determined based on fair value at the grant date consistent with SFAS No. 123, with stock options expensed using the accelerated expense attribution method, the Company's Net income and Earnings per share for fiscal 2005 would have been reduced to the pro forma amounts indicated below:

		Year Ended August 31, 2005
Net income as reported	\$	940,474
Add: Share-based compensation expense already included in Net income as reported, net of tax and minority interest		52,140
Deduct: Pro forma employee compensation cost related to stock options, restricted share units and employee share purchase plan, net of tax and minority interest		(150,105)
Subtotal		(97,965)
Pro forma net income	\$	842,509
Basic earnings per Class A common share:		
As reported	\$	1.60
Pro forma	\$	1.43
Diluted earnings per Class A common share:		

Edgar Filing: ACCENTURE LTD - Form 10-K

As reported	\$	1.56
Pro forma	\$	1.40

F-35

ACCENTURE LTD

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)
(In thousands of U.S. dollars, except share and per share amounts or as otherwise disclosed)

Share Incentive Plan

The SIP is administered by the Compensation Committee of the Board of Directors of the Company and provides for the grant of nonqualified share options, incentive stock options, restricted share units and other share-based awards. A maximum of 375,000,000 Accenture Ltd Class A common shares are currently authorized for awards under the SIP. As of August 31, 2007, 154,407,572 shares were available for future grants under the SIP. Accenture Ltd Class A common shares covered by awards that expire, terminate or lapse will again be available for the grant of awards under the SIP.

The Company issues new shares and shares from treasury for shares delivered under the SIP. The parameters of the Company's share purchase and redemption activities are not established solely with reference to the dilutive impact of deliveries made under the SIP. However, the Company expects that, over time, share purchases will offset the dilutive impact of deliveries to be made under the SIP.

A summary of information with respect to share-based compensation is as follows:

	Year Ended August 31,		
	2007	2006	2005
Total share-based compensation expense included in Net income	\$ 306,795	\$ 270,884	\$ 88,341
Income tax benefit related to share-based compensation included in Net income	102,823	93,029	8,274

Restricted Share Units

Under the SIP, participants may be granted restricted share units, each of which represents an unfunded, unsecured right, which is nontransferable except in the event of death of the participant, to receive an Accenture Ltd Class A common share on the date specified in the participant's award agreement. The restricted share units granted under this plan are subject to cliff or graded vesting, generally ranging from 2 to 10 years. For awards with graded vesting, compensation expense is recognized over the vesting term of each separately vesting portion. Compensation expense is recognized on a straight-line basis for awards with cliff vesting. Restricted share unit activity during the year ended August 31, 2007 was as follows:

	Number of Restricted Share Units	2007 Weighted Average Grant-Date Fair Value
Nonvested balance as of August 31, 2006	33,409,269	\$ 23.89
Granted	11,355,972	35.15

Edgar Filing: ACCENTURE LTD - Form 10-K

Vested	(2,740,433)		26.55
Forfeited	(2,007,016)		25.45
Nonvested balance as of August 31, 2007	40,017,792	\$	26.81

As of August 31, 2007, there was \$482,196 of total restricted share unit compensation expense related to nonvested awards not yet recognized, which is expected to be recognized over a weighted average period of 2.1 years. As of August 31, 2007, there were 11,759,062 restricted share units vested but not yet delivered as Accenture Ltd Class A common shares.

F-36

ACCENTURE LTD

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)
(In thousands of U.S. dollars, except share and per share amounts or as otherwise disclosed)

Stock Options

Stock options are granted to senior executives and other employees under the SIP. Options generally have an exercise price that is at least equal to the fair value of the Accenture Ltd Class A common shares on the date the option is granted. Options granted under the SIP are subject to cliff or graded vesting, generally ranging from 2 to 10 years, and generally have a contractual term of 10 years. For awards with graded vesting, compensation expense is recognized over the vesting period of each separately vesting portion. Compensation expense is recognized on a straight-line basis for awards with cliff vesting. Stock option activity for the year ended August 31, 2007 was as follows:

	Number of Options	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term (In Years)		Aggregate Intrinsic Value
Options outstanding as of August 31, 2006	57,582,271	\$ 18.84	6.3	\$	595,954
Granted	36,939	\$ 34.89			
Exercised	(13,673,454)	\$ 17.76			
Forfeited	(1,073,079)	\$ 22.37			
Options outstanding as of August 31, 2007	42,872,677	\$ 19.10	5.4	\$	954,027
Options exercisable as of August 31, 2007	37,696,081	\$ 18.45	5.2	\$	863,541
Options exercisable as of August 31, 2006	44,177,710	\$ 17.35	5.8	\$	522,702
Options exercisable as of August 31, 2005	49,098,967	\$ 15.99	5.9	\$	412,308

The weighted average remaining contractual term and aggregate intrinsic value for options outstanding as of August 31, 2005 was 6.6 years and \$448,382, respectively.

Other information pertaining to option activity is as follows:

	Year Ended August 31,		
	2007	2006	2005

Edgar Filing: ACCENTURE LTD - Form 10-K

Weighted average grant-date fair value of stock options granted	\$ 14.15	\$ 11.13	\$ 11.30
Total fair value of stock options vested	79,730	102,333	183,304
Total intrinsic value of stock options exercised	249,004	197,111	89,219

Cash received from the exercise of stock options was \$242,848 and the income tax benefit realized from the exercise of stock options was \$71,373 for the year ended August 31, 2007. As of August 31, 2007, there was \$8,778 of total stock option compensation expense related to nonvested awards not yet recognized, which is expected to be recognized over a weighted average period of 1.5 years.

The fair value of each option grant is estimated on the date of grant using the Black-Scholes-Merton option pricing model with the following weighted average assumptions.

F-37

ACCENTURE LTD

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)
(In thousands of U.S. dollars, except share and per share amounts or as otherwise disclosed)

	Year Ended August 31,			
	2007(1)	2006(1)	2005	
	Senior Executives	Senior Executives	Senior Executives	Other Employees
Expected life (in years)	6.9	7.4	6.0	5.0
Risk-free interest rate	4.65%	4.15%	4.02%	3.52%
Expected volatility	35%	37%	41%	41%
Expected dividend yield	1%	1%	0%	0%

(1) No stock options were granted to Other Employees during fiscal 2007 or 2006.

For the years ended August 31, 2007 and 2006, the expected life of each award granted was calculated using the simplified method in accordance with SAB No. 107, *Share-Based Payment*. For the year ended August 31, 2005, the Company used a projected expected life for each award granted based on historical experience of employees exercise behavior. The risk-free interest rate is based on the implied yield currently available on U.S. Treasury zero coupon issues with a remaining term equal to the expected life. Expected volatility is based on historical volatility levels of Accenture Ltd Class A common shares. Expected dividend yield is based on historical dividend payments.

Employee Share Purchase Plan

The Accenture Ltd 2001 Employee Share Purchase Plan (the ESPP) is a nonqualified plan that allows eligible employee participants to purchase Accenture Ltd Class A common shares at a discount through payroll deductions. Under the ESPP, substantially all employees may elect to contribute 1% to 10% of their compensation during each semi-annual offering period (up to a per participant maximum of \$7.5 per offering period) to purchase Accenture Ltd Class A common shares. Prior to May 2, 2005, the purchase price of Accenture Ltd Class A common shares was 85% of the lower of its beginning of offering period or end of offering period market price. The weighted average fair value of the share purchase rights granted during each of the offering periods ended November 1 and May 1 for fiscal 2005 was \$6.54. Beginning May 2, 2005, the purchase price of the Accenture Ltd Class A common shares is 85% of the end of the offering period market price. A maximum of 75,000,000 Accenture Ltd Class A common shares may be issued under the ESPP. As of August 31, 2007, 47,708,671 Accenture Ltd Class A common shares had been issued under the ESPP. Under the ESPP, the Company issued 5,080,185 shares, 6,406,441 shares and 8,784,839 shares to employees in fiscal 2007, 2006 and 2005, respectively.

12. SHAREHOLDERS EQUITY

Accenture Ltd

Preferred Shares

The Company has 2,000,000,000 authorized preferred shares, par value \$0.0000225 per share, the rights and preferences of which are currently undesignated. The Board of Directors of Accenture Ltd has the authority to issue

the preferred shares in one or more series and to fix the rights, preferences, privileges and restrictions attaching to those shares, including dividend rights, conversion rights, voting rights, redemption terms and prices, liquidation preferences and the numbers of shares

F-38

ACCENTURE LTD

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)
(In thousands of U.S. dollars, except share and per share amounts or as otherwise disclosed)

constituting any series and the designation of any series, without further vote or action by the shareholders.

Any series of preferred shares could, as determined by Accenture Ltd's Board of Directors at the time of issuance, rank senior to the Company's common shares with respect to dividends, voting rights, redemption and/or liquidation rights. These preferred shares are of the type commonly known as "blank-check" preferred stock.

Class A Common Shares

Holders of Accenture Ltd's Class A common shares are entitled to one vote per share and do not have cumulative voting rights. Each Class A common share entitles its holder to a pro rata part of any dividend at the times and in the amounts, if any, which Accenture Ltd's Board of Directors from time to time determines to declare, subject to any preferred dividend rights attaching to any preferred shares. Each Class A common share is entitled on a winding-up of Accenture Ltd to be paid a pro rata part of the value of the assets of Accenture Ltd remaining after payment of its liabilities, subject to any preferred rights on liquidation attaching to any preferred shares. As of November 22, 2004, the voting agreement dated as of April 18, 2001 among Accenture Ltd and the partners party thereto (the "voting agreement") was amended to eliminate the voting provisions of that agreement. Accordingly, Accenture Ltd Class A common shares and Class X common shares held by the parties to the voting agreement are no longer voted as a block at Accenture Ltd shareholder meetings.

Class X Common Shares

Holders of Accenture Ltd's Class X common shares are entitled to one vote per share and do not have cumulative voting rights. Holders of Class X common shares are not entitled to receive dividends and are not entitled to be paid any amount upon a winding-up of Accenture Ltd. Most of the Company's partners who received Accenture SCA Class I common shares or Accenture Canada Holdings Inc. exchangeable shares in connection with the Company's transition to a corporate structure received a corresponding number of Accenture Ltd Class X common shares. Accenture Ltd may redeem, at its option, any Class X common share for a redemption price equal to the par value of the Class X common share. Accenture Ltd has separately agreed with the original holders of Accenture SCA Class I common shares and Accenture Canada Holdings Inc. exchangeable shares not to redeem any Class X common share of such holder if the redemption would reduce the number of Class X common shares held by that holder to a number that is less than the number of Accenture SCA Class I common shares or Accenture Canada Holdings Inc. exchangeable shares owned by that holder, as the case may be. Accenture Ltd will redeem Class X common shares upon the redemption or exchange of Accenture SCA Class I common shares and Accenture Canada Holdings Inc. exchangeable shares so that the aggregate number of Class X common shares outstanding at any time does not exceed the aggregate number of Accenture SCA Class I common shares and Accenture Canada Holdings Inc. exchangeable shares outstanding. Class X common shares are not transferable without the consent of Accenture Ltd. As of November 22, 2004, the Accenture Ltd voting agreement was amended to eliminate the voting provisions of that agreement. Accordingly, Accenture Ltd Class A common shares and Class X common shares held by parties to the voting agreement are no longer voted as a block at Accenture Ltd shareholder meetings.

ACCENTURE LTD

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)
(In thousands of U.S. dollars, except share and per share amounts or as otherwise disclosed)

Equity of Subsidiaries Redeemable or Exchangeable for Accenture Ltd Class A Common Shares

Accenture SCA Class I Common Shares

Senior executives in certain countries, including the United States, received Accenture SCA Class I common shares in connection with the Company's transition to a corporate structure. After June 28, 2005, only the Company's current and former senior executives and their permitted transferees continue to hold Accenture SCA Class I common shares. Each Accenture SCA Class I common share entitles its holder to one vote on all matters submitted to a vote of shareholders of Accenture SCA and entitles its holders to dividends and liquidation payments.

Subject to the transfer restrictions in Accenture SCA's Articles of Association, Accenture SCA is obligated, at the option of the holder, to redeem any outstanding Accenture SCA Class I common share at a redemption price per share generally equal to its current market value as determined in accordance with Accenture SCA's Articles of Association. Under Accenture SCA's Articles of Association, the market value of a Class I common share that is not subject to transfer restrictions will be deemed to be equal to (i) the average of the high and low sales prices of an Accenture Ltd Class A common share as reported on the New York Stock Exchange (or on such other designated market on which the Class A common shares trade), net of customary brokerage and similar transaction costs, or (ii) if Accenture Ltd sells its Class A common shares on the date that the redemption price is determined (other than in a transaction with any employee or an affiliate or pursuant to a preexisting obligation), the weighted average sales price of an Accenture Ltd Class A common share on the New York Stock Exchange (or on such other market on which the Class A common shares primarily trade), net of customary brokerage and similar transaction costs. Accenture SCA may, at its option, pay this redemption price with cash or by delivering Accenture Ltd Class A common shares on a one-for-one basis. Each holder of Class I common shares is entitled to a pro rata part of any dividend and, subject to the rights of the holders of Class II common shares and Class III common shares, to the value of any remaining assets of Accenture SCA after payment of its liabilities upon dissolution.

Accenture SCA Class II and Class III common shares

On June 28, 2005, Accenture SCA's shareholders approved certain amendments to the rights of Accenture SCA Class II common shares held by Accenture Ltd, as well as the creation of a new class of common shares known as Class III common shares into which all Class I common shares held by Accenture Ltd and its affiliates were reclassified. Accenture SCA Class II common shares and Class III common shares may not be held by any person other than the general partner of Accenture SCA and its subsidiaries. All Class I common shares that are sold or otherwise transferred to Accenture Ltd or its subsidiaries will be automatically reclassified into Class III common shares.

Accenture SCA Class II common shares and Class III common shares (or any lettered sub-series of that class) are not entitled to any cash dividends. If the Board of Directors of Accenture Ltd authorizes the payment of a cash dividend on Accenture Ltd's Class A common shares, Accenture Ltd, as general partner of Accenture SCA, will cause Accenture SCA to redeem Class II common shares and Class III common shares that Accenture Ltd holds to obtain cash needed to pay dividends on its Class A common shares. At any time that Accenture SCA were to pay a cash dividend on its Class I common shares, new Class II common shares and Class III common shares would be issued to the

ACCENTURE LTD

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)
(In thousands of U.S. dollars, except share and per share amounts or as otherwise disclosed)

existing holders of Class II common shares and Class III common shares, in each case having an aggregate value of the amount of any cash dividends that the holders of those Class II or Class III common shares would have received had they ratably participated in the cash dividend paid on the Class I common shares.

Each Class II common share entitles its holder to receive a liquidation payment equal to 10% of any liquidation payment to which a Class I common share entitles its holder. Each Class III common share entitles its holder to receive a liquidation payment equal to 100% of any liquidation payment to which a Class I common share entitles its holder.

Accenture Canada Holdings Inc. Exchangeable Shares

Partners resident in Canada and New Zealand received Accenture Canada Holdings Inc. exchangeable shares in connection with the Company's transition to a corporate structure. Subject to the transfer restrictions contained in Accenture Ltd's bye-laws, holders of Accenture Canada Holdings Inc. exchangeable shares may exchange their shares for Accenture Ltd Class A common shares on a one-for-one basis. The Company may, at its option, satisfy this exchange with cash at a price per share generally equal to the market price of an Accenture Ltd Class A common share at the time of the exchange. Each exchangeable share of Accenture Canada Holdings Inc. entitles its holder to receive distributions equal to any distributions to which an Accenture Ltd Class A common share entitles its holder.

13. MATERIAL TRANSACTIONS AFFECTING SHAREHOLDERS' EQUITY

Share Purchase And Redemption Activity

The Board of Directors of Accenture Ltd has authorized funding for the Company's publicly announced open-market share purchase program for acquiring Accenture Ltd Class A common shares and for redemptions and repurchases of Accenture Ltd Class A common shares, Accenture SCA Class I common shares and Accenture Canada Holdings Inc. exchangeable shares held by the Company's current and former senior executives and their permitted transferees. Effective as of March 24, 2006, the Board of Directors of Accenture Ltd authorized an additional \$1.5 billion for the purchase, redemption and exchange from time to time of the Company's shares, including open-market share purchases. Effective as of March 2, 2007, the Board of Directors of Accenture Ltd authorized an additional \$1.5 billion for the purchase, redemption and exchange from time to time of the Company's shares. In addition, during the year ended August 31, 2007, the Board of Directors of Accenture Ltd separately authorized funding for two discounted tender offers for Accenture SCA Class I common shares.

ACCENTURE LTD

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)
(In thousands of U.S. dollars, except share and per share amounts or as otherwise disclosed)

The Company's share purchase activity for cash during the year ended August 31, 2007 was as follows:

	Accenture Ltd Class A		Accenture SCA Class I Common Shares and Accenture Canada Holdings Inc. Exchangeable Shares(4)		Total	
	Shares	Amount	Shares	Amount	Shares	Amount
Open-Market Share Purchases	1,988,773	\$ 78,633		\$	1,988,773	\$ 78,633
Discounted Tender Offers(1)			16,538,239	485,245	16,538,239	485,245
Other Share Purchase Programs	9,858,011	309,440(2)	37,640,287	1,381,853	47,498,298	1,691,293
Other purchases(3)	1,430,629	52,776			1,430,629	52,776
Total	13,277,413	\$ 440,849	54,178,526	\$ 1,867,098	67,455,939	\$ 2,307,947

(1) On September 11, 2006, Accenture SCA and one of its subsidiaries made a tender offer to Accenture SCA Class I common shareholders that resulted in share redemptions and purchases, effective October 11, 2006, of 7,538,172 shares at a price of \$24.75 per share, resulting in a cash outlay of approximately \$187,195. On March 8, 2007, Accenture SCA and one of its subsidiaries made a tender offer to Accenture SCA Class I common shareholders that resulted in share redemptions and purchases, effective April 9, 2007, of 9,000,067 shares at a price of \$33.00 per share, resulting in a cash outlay of approximately \$298,050.

(2) On November 13, 2006, Accenture Finance (Gibraltar) Ltd, an indirect subsidiary of Accenture SCA, purchased 1,979,450 Accenture Ltd Class A common shares at a price of \$24.75 per share, resulting in a cash outlay of approximately \$48,991. On May 15, 2007, Accenture Equity Finance B.V., an indirect subsidiary of Accenture SCA, purchased 7,878,561 Accenture Ltd Class A common shares at a per share price of \$33.00 or its local currency equivalent based on exchange rates applicable on April 4, 2007, resulting in a cash outlay of approximately \$260,449. Shares in both transactions were purchased from certain former senior executives residing outside the United States.

(3) During the year ended August 31, 2007, as authorized under the Company's various employee equity share plans, the Company acquired Accenture Ltd Class A common shares primarily via share withholding for payroll tax obligations due from employees and former employees in connection with the delivery of Accenture Ltd Class A common shares under those plans.

(4)

Historically, the Company has recorded purchases and redemptions of Accenture SCA Class I common shares and Accenture Canada Holdings Inc. exchangeable shares (collectively, *Subsidiary Shares*) as a reduction to Additional paid-in-capital. During the year ended August 31, 2007, funds used to acquire Subsidiary Shares more than offset the available balance in Additional paid-in-capital. As a result, the Company began deducting incremental purchases of Subsidiary Shares from Retained earnings. Future purchases and redemptions of Subsidiary Shares will be recorded against Additional paid-in-capital, to the extent it is available, and any incremental purchases will be recorded against Retained earnings.

As of August 31, 2007, the Company's available authorization was \$1,650,308, which included \$899,706 and \$750,602 for the open-market share purchase program and other share purchase programs, respectively.

Other Share Redemptions

On May 15, 2007, the Company filed a registration statement on Form S-3 relating to 203,349,557 of Accenture Ltd Class A common shares (the *registration statement*). The registration statement allows the Company, at its option, to issue freely tradable Accenture Ltd Class A common shares in lieu of cash upon redemptions of Accenture SCA Class I common shares held by Accenture's senior executives, former executives and their permitted transferees. During fiscal 2007, the Company issued 3,185,481 Accenture Ltd Class A common shares upon redemptions of an equivalent number of Accenture SCA Class I common shares.

ACCENTURE LTD

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)
(In thousands of U.S. dollars, except share and per share amounts or as otherwise disclosed)

Subsequent Event

On September 25, 2007, Accenture Ltd declared a cash dividend of \$0.42 per share on its Class A common shares for shareholders of record at the close of business on October 12, 2007. Accenture Ltd will cause Accenture SCA to declare a cash dividend of \$0.42 per share on its Class I common shares for shareholders of record at the close of business on October 9, 2007. Both dividends are payable on November 15, 2007. The payment of the cash dividends will result in the issuance of an immaterial number of additional restricted share units to holders of restricted share units.

14. LEASE COMMITMENTS

The Company has operating leases, principally for office space, with various renewal options. Substantially all operating leases are non-cancelable or cancelable only by the payment of penalties. Rental expense in agreements with rent holidays and scheduled rent increases is recorded on a straight-line basis over the lease term. Rental expense including operating costs and taxes and sublease income from third parties during the year ended August 31, 2007, 2006 and 2005 was as follows:

	2007	August 31, 2006	2005
Rental expense	\$ 452,938	\$ 413,722	\$ 371,554
Sublease income from third parties	35,147	29,249	23,485

Future minimum rental commitments under non-cancelable operating leases as of August 31, 2007, were as follows:

	Operating Lease Payments	Operating Sublease Income
2008	\$ 388,074	\$ (34,332)
2009	315,026	(36,076)

15. COMMITMENTS AND CONTINGENCIES

Guarantees

The Company has the right to purchase substantially all of the remaining outstanding shares of Avanade not owned by the Company at fair value if certain events occur. The Company may also be required to purchase substantially all of the remaining outstanding shares of Avanade at fair value if certain events occur.

The Company has various agreements in which it may be obligated to indemnify other parties with respect to certain matters. Generally, these indemnification provisions are included in contracts

F-43

ACCENTURE LTD

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)
(In thousands of U.S. dollars, except share and per share amounts or as otherwise disclosed)

arising in the normal course of business under which the Company customarily agrees to hold the indemnified party harmless against losses arising from a breach of representations related to such matters as title to assets sold, licensed or certain intellectual property rights and other matters. Payments by the Company under such indemnification clauses are generally conditioned on the other party making a claim. Such claims are typically subject to challenge by the Company and to dispute resolution procedures specified in the particular contract. Further, the Company's obligations under these agreements may be limited in terms of time and/or amount and, in some instances, the Company may have recourse against third parties for certain payments made by the Company. It is not possible to predict the maximum potential amount of future payments under these indemnification agreements due to the conditional nature of the Company's obligations and the unique facts of each particular agreement. Historically, the Company has not made any payments under these agreements that have been material individually or in the aggregate. As of August 31, 2007, management was not aware of any obligations arising under indemnification contracts that would require material payments.

From time to time, the Company enters into contracts with clients whereby it has joint and several liability with other participants and/or third parties providing related services and products to clients. Under these arrangements, the Company and other parties may assume some responsibility to the client or a third party for the performance of others under the terms and conditions of the contract with or for the benefit of the client or in relation to the performance of certain contractual obligations. In some arrangements, the extent of the Company's obligations for the performance of others is not expressly specified. The Company estimates that as of August 31, 2007, it had assumed an aggregate potential liability of approximately \$902,844 to its clients for the performance of others under arrangements described in this paragraph. These contracts typically provide recourse provisions that would allow the Company to recover from the other parties all but approximately \$142,367 if the Company is obligated to make payments to the clients that are the consequence of a performance default by the other parties. To date, the Company has not been required to make any payments under any of the contracts described in this paragraph.

Legal Contingencies

As of August 31, 2007, the Company or its present personnel had been named as a defendant in various litigation matters. All of these are civil in nature. Based on the present status of these litigation matters, the management of the Company believes they will not ultimately have a material effect on the results of operations, financial position or cash flows of the Company.

16. SEGMENT REPORTING

Operating segments are defined by SFAS No. 131, *Disclosures about Segments of an Enterprise and Related Information* (SFAS No. 131), as components of an enterprise about which separate financial information is available that is evaluated regularly by the chief operating decision maker, or decision-making group, in deciding how to allocate resources and in assessing performance.

The Company's chief operating decision maker is its Chief Executive Officer. The Company's operating segments are managed separately because each operating segment represents a strategic business unit providing management consulting, technology and outsourcing services to clients in different industries.

Assets as of August 31(2)	571,292	81,849	738,575	435,515	315,722	151,787	2,294,740

- (1) This amount includes depreciation on property and equipment controlled by each operating segment, as well as an allocation for depreciation on property and equipment they do not directly control.
- (2) Operating segment assets directly attributed to an operating segment and provided to the chief operating decision maker include Receivables from clients, current and non-current Unbilled services, current Deferred revenues and deferred transition costs and related deferred revenues, which are included in Other non-current assets and Other non-current liabilities, respectively.
- (3) The Company previously entered into certain large, long-term contracts (the "NHS Contracts") to provide systems and services to the National Health Service in England (the "NHS"). During the second quarter of fiscal 2006, there were several developments that significantly increased the risks and uncertainties associated with the NHS Contracts, and the Company recorded a \$450,000 aggregate loss provision that was reflected in Cost of services of its Government and Products operating groups. On September 28, 2006, the Company entered into an agreement (the "NHS Transfer Agreement") to transfer to a third party all of its rights and obligations under the NHS Contracts, except those relating to the Picture Archiving Communication System. The NHS Transfer Agreement resulted in a \$339,000 reduction in revenues before reimbursements in the fourth quarter of fiscal 2006, which was offset by a decrease in Cost of services, including a reversal of \$396,000 of the loss provision

recorded in the second quarter of fiscal 2006. In addition, during the fourth quarter of fiscal 2006, the Company recorded impairment writedowns on Operational Services assets totaling \$57,000. These fourth-quarter fiscal 2006 adjustments were reflected in the operating results of its Government and Products operating groups.

The accounting policies of the operating segments are the same as those described in Note 1 (Summary of Significant Accounting Policies) to these Consolidated Financial Statements.
